Abstract

This paper uses the method of non-decomposition to study the existence and global exponential stability of almost periodic solutions in distribution for a class of

CiteScore 2020 counts the citations received in 2017-2020 to articles, reviews, conference papers, book chapters and data papers published in 2017-2020, and divides this by the number of publications published in 2017-2020. [Learn more >](#)
