**Strict dissipativity synchronization for delayed static neural networks: An event-triggered scheme**  
... Finally, we have roundly simulated the obtained results by giving three numerical examples. We will learn more and extend the novel research approach to studying the corresponding dynamics, such as dissipativity or state estimation in [37][38][39][40][41][42][43], for delayed and uncertain USOMDVNN with memristors in the future. ...

## Abstract

## InCites Journal Citation Reports

### Journal Impact Factor Calculation

$$2019 \text{ Journal Impact Factor} = \frac{2,089}{863} = 2.421$$

How is Journal Impact Factor Calculated?

$$\text{JIF} = \frac{\text{Citations in 2019 to items published in 2017 (886) + 2018 (1,203)}{2,089}{\text{Number of citable items in 2017 (389) + 2018 (474)}{863}}$$
