The screenshot shows a web browser window with multiple tabs. The active tab is the ResearchGate profile of Porpattama Hammachukiattikul, displaying the 'Citations of your work' section. The page is filtered for 'Monthly' and shows a dropdown for 'Sep 2022'. A notification states 'Your publication has 2 new citations'. The featured citation is for the article 'Dynamical analysis of a delayed food chain model with additive Allee effect', which is marked as 'Full-text available' and dated 'Sep 2022'. The authors listed are Basma Souayah, Zulqurnain Sabir, Najib Hdhiri, Wael Al-Kouz, and Tarfa Alsheddi. A 'View' link is provided. Below this, a snippet of text from another citation is visible, mentioning 'the time delay in the predator-prey model can cause complex behavior in the dynamics'. The Windows taskbar at the bottom shows the date as 10/6/2022 and the time as 10:32 PM.

**Dynamical analysis of a delayed food chain model with additive Allee effect**

... Singh et al. provided the dual form of the AE with the enhanced system of Leslie-Gower (LG) based on predator-prey dynamics that shows the population of prey with numerous junctions connected to the appropriate limits. Vinoth et al. [21] expressed a mathematical system for the dynamical FCSS using the AE with the process of addition [22]. ...

**A Stochastic Bayesian Regularization Approach for the Fractional Food Chain Supply System with Allee Effects**

Article Full-text available Sep 2022
