การบริหารการศึกษา มหาวิทยาลัยศรีปทุม

เมื่อกล่าวถึงการประกอบวิชาชีพครู / ผู้บริหารการศึกษา ในยุคของการเปลี่ยนแปลงและการแข่งขันของโลกที่นับวันจะสูงขึ้นอย่างต่อเนื่อง ถือได้ว่าผู้ที่อยู่ในวิชาชีพนี้จะต้องเผชิญกับโจทย์และความท้าทายที่หลากหลายเหนือสิ่งอื่นใดเมื่อวิทยาศาสตร์ และเทคโนโลยีเข้ามาเกี่ยวข้องและเป็นปัจจัยที่สำคัญสำหรับการดำเนินชีวิตของคนในสังคมด้วยแล้ว ครู / ผู้บริหารการศึกษา ยิ่งต้องพัฒนาและยกระดับตนเองให้ก้าวทันนวัตกรรมและเทคโนโลยีผสมผสานกับองค์ความรู้ด้านเศรษฐกิจสังคมและอื่นๆ ที่เกี่ยวข้อง

คุณภาพของการศึกษาและคุณภาพของผู้เรียนขึ้นอยู่กับคุณภาพของครู / ผู้บริหารการศึกษา เป็นสำคัญเพราะครูเป็นผู้มีบทบาทสำคัญอย่างยิ่งในการพัฒนาการศึกษาให้บรรลุจุดหมายปลายทางได้ การปฏิรูปการศึกษาจะสำเร็จได้หรือไม่ขึ้นอยู่กับครู ด้วยเหตุนี้ ครูจึงต้องเป็นผู้นำ รู้เท่าทันความเปลี่ยนแปลงต่าง ๆ ที่เกิดขึ้นในสังคม มีการปรับเปลี่ยนบทบาทตนเองให้เป็นผู้นำการเปลี่ยนแปลงเพื่อสร้างเยาวชนรุ่นใหม่ให้มีคุณภาพได้เหมาะสมกับยุคสมัย นอกจากความเปลี่ยนแปลงทางสังคมแล้วยังมีการเปลี่ยนแปลงปัจจัยภายในวิชาชีพครู เช่น นโยบายการปฏิรูปครู นโยบายของการผลิตและพัฒนาครู แผนการศึกษาแห่งชาติ พระราชบัญญัติการศึกษาแห่งชาติ มาตรฐานวิชาชีพครู มาตรฐานการศึกษา และปัจจัยภายนอกวิชาชีพครู เช่น การเปลี่ยนแปลงทางด้านเศรษฐกิจการเมือง สังคม วัฒนธรรม สิ่งแวดล้อม วิทยาศาสตร์และเทคโนโลยี เป็นต้น ซึ่งปัจจัยเหล่านี้ล้วนส่งผลกระทบต่อการศึกษาไทยและส่งผลต่อการปฏิบัติงานของครู / ผู้บริหารการศึกษา ทำให้ต้องมีการปรับเปลี่ยนบทบาทของครูให้มีลักษณะเป็นผู้นำในการเปลี่ยนแปลง

การพัฒนาการศึกษาและวิชาชีพครู / ผู้บริหารการศึกษา เติมเต็มการสูญเสียโอกาสทางการเรียนรู้ของผู้เรียน (Learning Loss) และการฟื้นคืนการเรียนรู้ (Learning Gain) พลิกวิกฤตหลังสถานการณ์โควิดให้เป็นโอกาสก้าวผ่านความท้าทายสู่อนาคตของวิชาชีพทางการศึกษา ด้วยการพัฒนาสมรรถนะการเรียนรู้ต่างๆ ผ่านเทคโนโลยีและนวัตกรรมทางการศึกษา ถือว่ามีความสำคัญยิ่ง และเพื่อการเปลี่ยนแปลงสู่คุณภาพทั้งทักษะชีวิต สุขภาวะทางอารมณ์ สังคม และปัญญา

Nutcharin Thongpun[3]
Suphaporn Chankong[4]
Khanittha Promluang[5]

Abstract

The purpose of this research is to develop an application of fractional calculus for the study of chemical reactions. The rate of a chemical reaction is calculated from the rate of change of the substance per time change. The rate of chemical reaction at any time is calculated using the first derivative of the permutation function. The rate of chemical reactions from fractional order calculus was compared with integer order calculus. Calculating chemical reaction rates with fractional derivatives yielded significantly higher rates than the integer order calculus.

Keywords: Fractional derivative, Conformable fractional derivative , Fractional calculus, Chemical reactions

Introduction

Data accuracy is an essential calculation in physics, engineering, hydrology, finance and economics. In the past two decades, many researchers have used fractional calculus for computational purposes and have achieved better results than integer order. [9] Chemical reactions are the calculation of the concentrations of reactant changes in chemical reactions while the concentration of the reactant decreases, resulting in a more concentrated product. Therefore, applying fractional calculus to the laws of chemical reactions will improve the accuracy of substrate concentration and yield. In addition, it will make the study of chemical reactions more convenient by developing applications.

Research Objective

1. Build knowledge using fractional calculus to study the rate of chemical reactions.
2. Develop applications for using fractional calculus to study chemical reactions.

Research Methodology

Scope of research

1. Fractional calculus applied to chemical reactions is a conformable fractional derivative of order.
2. Regression line of the chemical reaction was calculated by a second-degree polynomial.
3. The application is developed with the Android Studio program.
4. The application supports the Android operating system.

Research methods

1. Study of related research theories (fractional calculus, chemical reaction rate law and regression analysis)

The first concept of fractional calculus was conceived in 1965 when L'Hospital wrote to Gottfried Wilhelm Leibniz asking about the fractional order derivative. Which is not an integer; what will be the result? Leibniz described it would produce power valuable results in the future.[5]

Euler was a famous mathematician and defined fractional mathematics in 1730, Laplace defined it in 1812, and Lacroix was the first mathematician to refer to the term “fractional derivative”. The first application of fractional derivatives was made in 1823 by a mathematician named Abel to find solutions to integral equations in tautochronous problems. Many mathematicians define and assign symbols to fractional calculus. But there are some important and popular definitions in fractional calculus: the Riemann-Liouville definition, the Caputo definition and the R. Khalil definition.[11]

An important definition of fractional derivatives that many scientists have used in their research is the fractional derivative of Riemann-Leuville and Caputo's definition. However, both definitions do not correspond to the product rule, quotient rule and chain rule.[10]

Definition fractional derivatives of R. Khalil as follows

Let f be a function such that $f:[0,\infty)\to R$. The newly defined fractional derivative is called Conformable fractional derivative order α.[8]

$$T_\alpha(f)(t)=\lim_{\varepsilon\to 0}\frac{f\left(t+\varepsilon t^{1-\alpha}\right)-f(t)}{\varepsilon},t>0,\alpha\in(0,1]$$

The Conformable fractional conforms to the rules of conventional calculus. The theory of conformable fractional derivatives of order α where $\alpha\in(0,1]$.

The change in the reactants measures the speed of the reaction. The reaction between the initial substances A and B yields C and D while the responseaction is progressing. The starting substance is reduced while the production will occur.[6]

$$aA+bB\to cC+dD$$

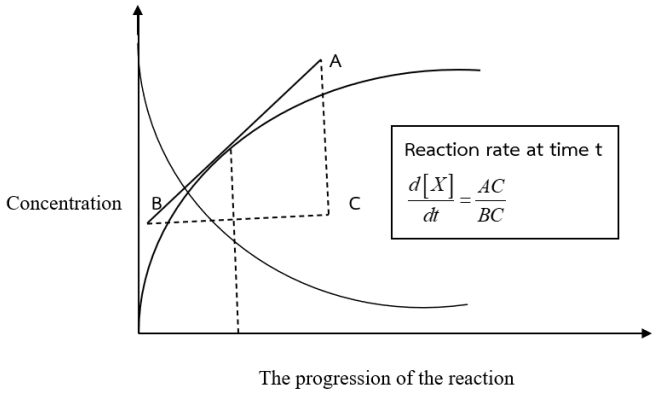

Figure 1 The relationship between Reactant concentration and product versus time

The speed of a reaction depends on the concentration of the reactants. The equation expressing the relationship between the speed and concentration of the reactants is called the rate law or rate equation.

The kinetics of chemical reactions determine the concentration of reactants or products at different times by various methods. One important method is the differential method by Vant Hoff, which measures the concentration of a substance at other times and uses the data to graph. The reaction rate at different times was calculated from the graph's slope at the desired time. [4]

The reaction rate can be written in differential form, known as the rate differential equation. (Differential rate equation) or differential rate law (Differential rate law).[7]

$$v = \frac{d[A]}{dt}$$ where v be reaction rate.

Determining the relationship between mass concentrations and changing times gives the regression line equation in the research. Spline regression was used to construct the regression line equation. [2] The regression line equation is the equation

$$\hat{y} = b_0 + b_1 x + b_2 x^2 + ... + b_m x^m .$$

The sum squares error values are as follows:

$$SSE = \sum_{i=1}^{n} \left(y_i - \left(b_0 + b_1 x_i + b_2 x_i^{\ 2} + ... + b_m x_i^{\ m} \right) \right)^2 .$$

The partial derivative of SSE concerning $b_0, b_1, ..., b_m$ set the value to zero.

$$\frac{\partial SSE}{\partial b_j} = 0, \quad j = 0,1,2,...,m$$

The partial derivative results of SSE compared with $b_0, b_1, ..., b_m$

$$\sum_{i=1}^{n} \left(y_i - \left(b_0 + b_1 x_i + b_2 x_i^{\ 2} + ... + b_m x_i^{\ m} \right) \right) = 0$$

$$\sum_{i=1}^{n} \left(y_i x_i - \left(b_0 + b_1 x_i + b_2 x_i^{\ 2} + ... + b_m x_i^{\ m} \right) \right) = 0$$

$$\vdots \qquad\qquad \vdots$$

$$\sum_{i=1}^{n} \left(y_i x_i^{\ m} - \left(b_0 + b_1 x_i + b_2 x_i^{\ 2} + ... + b_m x_i^{\ m} \right) \right) = 0 .$$

Arranging equations and writing them in matrix form yields the following results.

$$\sum_{i=1}^{n} b_0 + \sum_{i=1}^{n} b_1 x_i + ... + \sum_{i=1}^{n} b_m x_i^{\ m} = \sum_{i=1}^{n} y_i$$

$$\sum_{i=1}^{n} b_0 x_i + \sum_{i=1}^{n} b_1 x_i^{\,2} + \ldots + \sum_{i=1}^{n} b_m x_i^{\,m} x_i = \sum_{i=1}^{n} x_i y_i$$

$$\vdots \qquad\qquad\qquad \vdots$$

$$\sum_{i=1}^{n} b_0 x_i^{\,m} + \sum_{i=1}^{n} b_1 x_i^{\,m+1} + \ldots + \sum_{i=1}^{n} b_m \left(x_i^{\,m}\right)^2 = \sum_{i=1}^{n} x_i^{\,m} y_i$$

$$\begin{bmatrix} n & \sum x_i & \ldots & \sum x_i^{\,m} \\ \sum x_i & \sum x_i^{\,2} & \ldots & \sum x_i^{\,m+1} \\ \vdots & \vdots & \vdots & \vdots \\ \sum x_i^{\,m} & \sum x_i^{\,m+1} & \ldots & \sum x_i^{\,2m} \end{bmatrix} \begin{bmatrix} b_0 \\ b_1 \\ \vdots \\ b_m \end{bmatrix} = \begin{bmatrix} \sum y_i \\ \sum x_i y_i \\ \vdots \\ \sum x_i^{\,m} y_i \end{bmatrix}$$

Where $b_0, b_1, \ldots, b_m$ be the regression coefficient.

2. System and data analysis, design programs for communicating with users in Graphic User Interface (GUI).

Chemical reaction values are calculated by considering the rate of change of reactant concentrations or products over time. The development of applications using fractional derivatives to study chemical reactions begins with the study of fractional calculus to be used in the computational process. Next, analyze and design the system user interface. Finally, we select the software used to develop the application, create an application and test the application.

2.1 system analysis and design

2.1.1) Define Data Flow Diagram

- Create the algorithm for calculating chemical reaction values.
- Create a Fit Curve algorithm

2.1.2) The procedure for calculating the chemical reaction

- Determine the concentration of reactant or product in each period.
- Create a graph showing the relationship between the concentration of reactants and time.
- Calculate the reaction rate with an integer order derivative.
- Take the concentration of the reactant (solvent) at each time to fit the curve with a quadratic equation.
- Take the quadratic equation that has been calculated for the reaction rate. Fractional Derivatives By using the definition of conformable fractional derivatives of order, consider comparing the calculation results between reaction rates from integer derivatives and fractional order derivatives at various levels.

2.1.3) User interface design

- The user interface for calculating chemical reactions

The start menu application is shown in figure 2. Users can study the data of the average reaction rate. Reaction rate at any time before the application calculates the speed of a chemical reaction with an integer derivative or fractional order derivatives by inserting the experimental results at different time points.

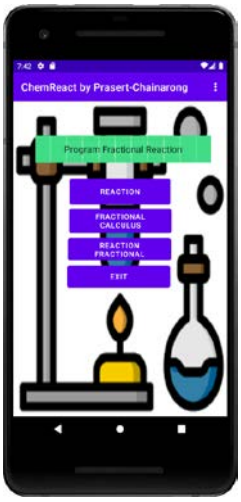

Figure 2 User Interface of the start menu application

The user can select the menu to study the reaction rate calculation; the user enters the screen explaining how to calculate the reaction rate, which is described on various pages (Figure 3).

Figure 3 User Interface for explaining the reaction rate

The user can select the menu to study fractional calculus; the user enters the screen explaining the meaning of fractional calculus. (Figure 4).

Figure 4 User Interface for explaining the fractional calculus

The user can select the chemical reaction rate calculation. The user enters the menu to choose the type of chemical reaction rate calculation (Figure 5), divided into two types: the rate of chemical reaction of the reactants and the rate of the chemical reaction of the products. In the case of calculating the reaction rate of the reactants, the information provided to the application is conditional that the amount of reactants decreases with increasing time. The calculation of the chemical reaction rate of the product is under the condition that the amount of the product increases with increasing time.

When the user selects the chemical reaction rate type, the user enters the screen to determine the reactant's concentration or product at various times. The least squares regression method was used. The reaction rate comparison results were obtained from the reaction rate calculation with integer order calculus and fractional order calculus at different ranks. The application defines fractional order derivatives as 0.1, 0.2, 0.3, ..., 0.9, respectively.

Figure 5 User Interface for type of chemical reaction rate

Separating chemical reaction rate calculations is two types to prevent incorrect information from being provided to applications. The application protects incorrect data entry due to precursor concentration requirements, and the concentration of the product that changes over time is the opposite. The application generates a warning message box if the user provides incorrect information.

2.2 application development

2.2.1) Determine the operating system that supports the application. The applications can work under the Android version 6.0 (Marshmallow) operating system.[1]

2.2.2) Determine the software used for application development. The application is developed from Android Studio software version 3.1.4.

2.2.3) graph display module

The graph display uses library graphview to obtain time and precursor concentration information or the concentration of the product over time. The user provides data to the system in 5 time periods. Receiving data through an object textview stored in a 2 Dimension array variable is the nature of ordered pairs (time, reactant concentration or product) by the application.[3] The point of data the user enters every time interval shows via the scatterplot object.

2.2.4) Regression Equation Calculation Module

A spline regression equation was constructed from second-order polynomials. The data of time and concentration of reactant or product concentration that the user determines by using the data to calculate $b_0, b_1, ..., b_m$ the regression coefficient from solving the system of equations.

$$\begin{bmatrix} n & \sum x_i & \dots & \sum x_i^{m} \\ \sum x_i & \sum x_i^{2} & \dots & \sum x_i^{m+1} \\ \vdots & \vdots & \vdots & \vdots \\ \sum x_i^{m} & \sum x_i^{m+1} & \dots & \sum x_i^{2m} \end{bmatrix} \begin{bmatrix} b_0 \\ b_1 \\ \vdots \\ b_m \end{bmatrix} = \begin{bmatrix} \sum y_i \\ \sum x_i y_i \\ \vdots \\ \sum x_i^{m} y_i \end{bmatrix}$$

and plot the regression line through an object graph.

2.2.5) Reaction Rate Calculation Module

Calculation of the chemical reaction rate at any time by transmission regression coefficient was calculated for the first derivative and the fractional derivative. User selects a choice (0.10, 0.20, 0.30, 0.40, 0.50, 0.60, 0.70, 0.80, ..., 0.90) and displays a calculation of the rate of a chemical reaction at a user-specified time. The application will calculate the rate of a chemical reaction between first order derivatives and user-selected fractional order derivatives.

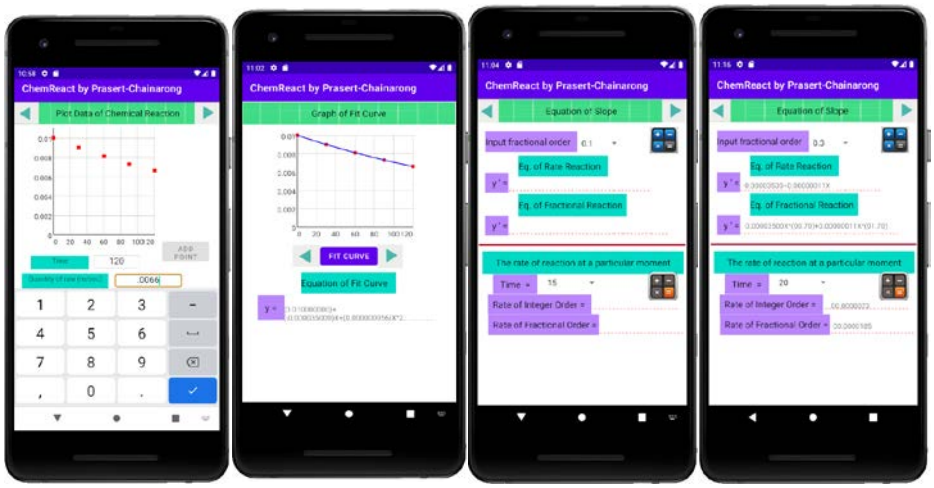

Figure 6 Diagram showing time entry and concentration of reactants and plot graphs

Chemical Reaction Rate Applications with fractional derivatives consist of the first part explaining the meaning of chemical reaction rate. The second part is the definition of fractional calculus. And the last part is calculating the reaction rate with fractional derivatives. In the first part, the user can choose to calculate the chemical

reaction rate of the reactants or the rate of chemical reaction of the product by providing information on the time and amount of substances at different times to the application. The application will perform the fitting curve to obtain the regression line equation and use the regression equation to calculate the rate of a chemical reaction.

Calculating the chemical reaction rate of reactants or products will be determined by the user of the application and input dosage information at any time to the application. The application will generate the regression line equation. And the rate of chemical reaction was calculated using integer order calculus using the first order derivative formula. Part of calculating the rate of a chemical reaction with fractional derivatives. The application uses a formula for calculating fractional derivatives called the conformable fractional derivative. Users can choose to calculate the reaction rate of reactants or the product's chemical reaction rate with derivatives of 0.10, 0.20, 0.30, 0.40, 0.50, 0.60, 0.70, 0.80 or 0.90.

3. Experimental results

3.1 Data of reactants

Table 1. Data on time and concentration of reactants

Time (second)	Concentration (mol)
0	0.01
30	0.009
60	0.0081
90	0.0073
120	0.0066

The relationship between time and the amount of reactant concentration is the regression equation as follows $y = 0.01 - 0.000035x + 0.000000056x^2$.

The rate of chemical reaction of reactants for the experimental data set was calculated with integer order derivatives; fractional order 0.10 are as equations

$$y' = -0.000035 + 0.00000011x$$

$$y' = -0.000035x^{0.9} + 0.00000011x^{1.9}.$$

Comparison of the calculation results of chemical reaction rates of the reactants at 15 seconds by using fractional order derivatives and integer order derivatives as shown in Table 2.

Table 2. The Reaction rate of reactants

Order Derivative	Chemical reaction rate(mol/second)
0.10	-0.0003814
0.20	-0.0002909
0.30	-0.0002219
0.40	-0.0001693
0.50	-0.0001291
0.60	-0.0000985
0.70	-0.0000751
0.80	-0.0000573
0.90	-0.0000437
1	-0.0000333

The calculation of the chemical reaction rate of reactants with fractional order derivatives and first derivatives is negative because the amount of reactants decreases with chemical reaction. When calculating with the 0.10 order derivative, the result of the calculation of the chemical reaction rate had a significance level of 4. When increasing the order of the derivative, The significant value of the rate of a chemical reaction is reduced. Until calculating the rate of a chemical reaction with the first derivative, the significance level was 3.

3.2 Data of product

Table 3. Data on time and concentration of products

Time (second)	Concentration (mol)
0	0
100	0.0063
200	0.0115
300	0.0160
400	0.0197

The relationship between time and the amount of product concentration is the regression equation as follows $y = 0.000037143 + 0.000065957x - 0.000000042x^2$.

The rate of chemical reaction of products for the experimental data set was calculated with integer order derivatives; fractional order 0.10 are as equations

$$y' = 0.000065957 + 0.00000008x$$

$$y' = 0.000065957x^{0.9} + 0.00000008x^{1.9}.$$

Comparison of the calculation results of chemical reaction rates of the reactants at 15 seconds by using fractional order derivatives and integer order derivatives as shown in Table 4.

Table 4. The reaction rate of products

Order Derivative	Chemical reaction rate(mol/second)
0.10	0.0007402
0.20	0.0005646
0.30	0.0004306
0.40	0.0003285
0.50	0.0002506
0.60	0.0001911
0.70	0.0001458
0.80	0.0001112
0.90	0.0000848
1	0.0000647

The calculation of the chemical reaction rate of products with fractional derivatives and first derivatives are positive values because the amount of products increases with chemical reaction. When calculated with the order derivative of 0.10, the result of the calculation of the chemical reaction rate had a significance level of 4. When calculating with the order derivative increased up to the 0.80 order derivative, The significance level of the reaction rate remained constant at 4. Until figuring with the 0.90 derivative and the first derivative, The rate of chemical reaction decreased to a significance level of 3.

Conclusion

The application of fractional derivatives to the study of chemical reactions was developed by integrating the knowledge of fractional calculus chemical reaction rate and polynomial second-order spline regression analysis. As a result of the application, the rate of chemical reaction of reactants or products at the fractional differential level is compared with the rate of chemical reaction calculated with the integer derivative by experimental series. The performance of the application help to calculate the rate of chemical reaction of reactants or products at different ranks.

Discussion

Practical applications of fractional derivatives for chemical reactions have outputs at a higher significance level. In addition calculation of the reaction rate of the products have solutions at a higher significance level as well.

Therefore, using Conformable fractional derivatives to calculate the rate of chemical reaction rate of the reactants or products will be very suitable.

Recommendation

The development of applications for studying chemical reaction rates shows the benefits of applying fractional calculus. It makes learning easier to understand the rate of chemical reactions. In the future, the development of applications using fractional calculus can occur in other fields.

Smart Safe Kids

Klednatee Chaichana[1]

Abstract

The objectives of this research were 1) to develop a vehicle child protection system, 2) to study satisfaction with the vehicle child protection system. The population used in this research were: Student van driver and the parents of 20 students who used the van service to pick up and drop students. The statistics used to analyze the data were the mean, standard deviation. The results showed that satisfaction in each aspect of the entire system was at a high level.

Keywords: Smart Safe Kids

Introduction

School trip of school children Most parents often choose to use the bus service to send students. because it is more convenient Recently, there has been an incident where the driver of the school bus did not check that the child was traveling. Have you got off the car yet? causing a tragic incident from the students being trapped in the school bus and cannot get out of the car by himself there is a loss These events have been featured in many media outlets, most of them tragic (Jitlung, N., 2019). It is often caused by a child trapped in a school bus suffering from acute heat stroke until shock (Denduangboriphan, J., 2023)

As a precaution, many schools teach children how to unlock cars as necessary so that they can survive. But when it actually happened, some children couldn't control their consciousness enough. in order to follow what the shool has taught therefore causing a tragic incident and such losses (Paengwong,T., 2022)

Therefore, in order to effectively prevent The organizing committee therefore created a child protection system in the school bus. By using a circuit board ESP32-CAM to connect to the sensor (Robotsiam, 2020) and alarm signaling devices by using the Internet of Things (IoT) system to transmit and receive data (Inphai, 2022). This allows the device to detect children trapped in the school bus. to notify third parties with a messaging system and sound signal (Omega Measuring Instrument CO., LTD., 2022) And can help the children trapped in the school bus in a timely manner.

Research Objective

1. To study and develop a child protection system in the car Smart Safe Kids. in school vans.
2. To study the satisfaction with the child prevention system in the school bus.

Research Methodology

The population used in this research was student bus driver and parents of students who use the student shuttle service in Suphanburi province. The samples used in this research were: Van drivers picking up and dropping 12 Van drivers. Parents of 8 students who use the bus service total 20 people. The primary variable is the child protection system in the car Smart Safe Kids. The dependent variable is the user evaluation results.

Research tools and tool quality checks

1. Child protection system in the car Smart Safe Kids.

2. Assessment form for experts to examine research tools A questionnaire for research on child protection systems in Smart Safe Kids cars by 3 experts.

3. Satisfaction questionnaire on the Smart Safe Kids child protection system.

Data Collection

1. Design and development of child protection systems in Smart Safe Kids cars Put the child protection system in the car Smart Safe Kids to test the operation. By simulating various situations to check the working conditions of the Smart Safe Kids child protection system and then analyze the operation of the Smart Safe Kids child protection system in order to design the most complete system.

2. Assessment for experts checking research tools A questionnaire for research on the protection system for children stuck in cars Smart Safe Kids by experts. Create a scoped query and the content that is set to cover the conceptual framework that has been created and used to check the quality of the questionnaire. By finding validity (Validity) and verifying the correctness in terms of content (Content Validity) by 3 experts to assess the validity (IOC) of the research tool on the Smart Safe Kids child protection system in order to evaluate the opinions of Experts with questions It is suitable for use as a tool for collecting data in research. and then improve the questions until they pass the criteria

3. To study the satisfaction of the Smart Safe Kids child protection system. Bring the child protection system in the car Smart Safe Kids Bring the satisfaction questionnaire about the child protection system in the Smart Safe Kids car that passed the evaluation criteria by experts. Used to study satisfaction with a sample of 20 people to answer the satisfaction questionnaire on the protection system for children stuck in cars Smart Safe Kids.

Data Analysis

1. Bring information obtained from expert considerations. Let's find the index of consistency between each question and its objective or content (Index of Item - Objective). Assessment form for experts In each issue, there are evaluation criteria as follows:

2. Respondent Satisfaction Questionnaire In each issue, there are evaluation criteria as follows: It is a 5-level estimation scale according to Likert's Scale method.

3. Statistics used to analyze the results for the sample.

1. Percentage by comparing frequencies or the required amount with the frequency or the total number equivalent to 100 in the questionnaire part 1 general information

2. Mean used to analyze the data to show an overview for opinions towards each question. and the total opinion level of all questions. for hypothesis testing In the second part of the questionnaire, the satisfaction of the Smart Safe Kids child protection system

3. Standard deviation (S.D.) is used to analyze the data together with the mean. to characterize the distribution of answers in each question In the second part of the questionnaire, the satisfaction of the Smart Safe Kids child protection system presented in the form of a table Criteria are divided into 5 levels by specifying scoring criteria.

Conclusion

This research was to study the satisfaction of the Smart Safe Kids child protection system. By presenting the results of the satisfaction survey of the Smart Safe Kids child protection system, respectively, in the following topics. User Satisfaction Assessment Results on Smart Safe Kids Child Protection System. Evaluation of user satisfaction that affects the effectiveness of the Smart Safe Kid child protection system by using a 2-part satisfaction rating questionnaire, the evaluation results are as follows: The results can be summarized as follows.

1. Appearance of the device It was found that overall satisfaction from the respondents. Satisfied with the appearance of the device. Overall, it was at a high level. with a total mean of 3.68 (S.D = 0.66). When analyzing individually, it was found that the highest mean was device design the mean was 3.75 (S.D = 0.62), followed by device appearance The average value was 3.70 (S.D = 0.71). The quality of materials used. with an average of 3.65 (S.D = 0.73) the size of the device the mean was 3.60 (S.D = 0.58), respectively (Limpayaraya, S., 2016).

2. Usability and maintenance It was found that overall satisfaction from the respondents. are satisfied with the use and maintenance Overall, it was at a high level. with a total mean of 3.83 (S.D = 0.62). When analyzing individually, it was found that the highest mean was suitability of maintenance methods The mean was 3.95 (S.D = 0.59), followed by Appropriateness of method of use The mean was 3.90 (S.D = 0.62). Appropriateness of the manual. The mean was 3.75 (S.D = 0.70). The suitability of the installation method. mean was 3.70 (S.D = 0.56), respectively (Limpayaraya, S., 2016).

3. The design of the alarm system It was found that overall satisfaction from the respondents. Satisfied with the design of the alarm system. Overall, it was at a high level. with a total mean of 4.00 (S.D = 0.75). When analyzing individually, it was found that the highest mean was the photo alert system via Line, the average value was 4.05 (S.D = 0.74), followed by Alarm message system via Line, the mean value is 4.00 (S.D = 0.77), sound alarm system mean was 3.95 (S.D = 0.74), respectively (Limpayaraya, S., 2016).

4. Security It was found that overall satisfaction from the respondents. Satisfaction with safety Overall, it was at a high level. with a total mean of 4.11 (S.D = 0.74). When analyzing individually, it was found that the highest mean was the system allows outsiders to help in a timely manner. The mean was 4.20 (S.D = 0.68), followed by the system helps third parties to know information about requesting help. The mean value was 4.15 (S.D = 0.73). The system enhances passenger safety. The mean was 4.10 (S.D = 0.77). The system helped to ask for help from outsiders. The mean was 4.00 (S.D = 0.77), respectively (Taithani, P., 2017).

Discussion

The results of the satisfaction questionnaire revealed that the satisfaction was at a high level. Shows that respondents are interested in terms of the external appearance of the device, satisfaction was at a high level. Respondents thought the device was beautiful. Strong material quality usability and maintenance were satisfied at a high level. The respondents thought that it was easy to install and use. As for the design of the alarm system, they were satisfied at a high level. Respondents thought that there was an alert system that could recognize a call for help from trapped inside the vehicle. In terms of benefits in terms of life safety, satisfaction was at a high level. Respondents thought the system would increase safety for children using school bus services (Inampai, P., 2019). From the demonstration of the use of the Smart Safe Kids child protection system, it was found that among the drivers of the van, there is a consensus that the Smart Safe Kids child protection system is useful in helping to increase the safety of passengers. And help prevent the loss of children stuck in the car. On the part of the parents, there was an agreement that the notification system is effective in experiments. before actual use can be detected accurately (Smartbestbuys, 2023).

Recommendation

Suggestions for applying the research results

1. Child protection system in the car Smart Safe Kids. The picture that can be taken should be taken more clearly.

2. Child protection system in the car Smart Safe Kids, the motion sensor should calculate the installation point to cover the entire cabin.

Suggestions for further research

1. The child protection system in the Smart Safe Kids car should have an exhaust fan to help cool the system.

2. The child protection system in the Smart Safe Kids car should have a larger sounding device.

3. The child protection system in the Smart Safe Kids car should have additional sensors.

Improvement of Gelatin Fibrous Scaffold Properties by Polycaprolactone for skin Tissue Engineering

Pongtorn Suparom[1]
Manop Pipathattakul[2]
Prayoon Surin[3]
Banpot Meesa[4]

Abstract

Improvement of gelatin fibrous scaffold by electrospinning technique allows the preparation of ultrafine fibers with diameters ranging from micron to nanoscale fibrous materials. The electrospinning is a novel and efficient fabrication process that produced electrospun fibers through the action of an external electric field to create an electrically charged jet of polymer solution and it can able to be used as a wound closure material or tissue caused by an accident or by diseases etc. Include the development of characteristic to optimize for all applications and reduce the cost of the raw materials and develop to be used in a variety of applications.

This research selected gelatin blended with carboxymethyl cellulose and polycaprolactone fabricated by using electrospinning technique for nanofibrous scaffold. We used design of experiment with voltage and feed rate for the ratios of gelatin /polycaprolactone were 100/0, 90/10, 80/20, 70/30 and 60/40, respectively. To characterize the scaffolds, we analyzed the physical properties by investigating the morphology and measuring the fibers size using Scanning Electron Microscope revealed that when CMC increased from 0 to 40 percent, fiber's size was decreased from 2.1 nm to 7.1 nm. Swelling ratio mixture of G100 ratio had swelling ratio of 11.72%. When adding more PCL, there will be more fiber as well, so the % can be remembered.

Introduction

When tissue loss occurs caused by burns without the body being able to rebuild it Tissue loss can be a wound caused by an accident, disease, infection or burn, when the wound reaches the dermis. Therefore, it is necessary to find skin from other areas to replace the damaged skin. Usually, the doctor takes skin from another part of the patient's body and grafts it into the wound. This is an inconvenient method and scarring the patient [1]. At present, researchers and doctors are thinking of ways to produce artificial skin or synthetic skin, and cell scaffolds [2]. Biodegradable Come to transplant the wound area. by using various types of natural polymers that are cheap and easily available, such as gelatin, collagen and chitosan [3]. in forming the structure This is for convenience and speed. And in case of wounds on the skin that have a wide area making it impossible to find other parts of skin to replace the important function of such skin substitutes is to stimulate the main cells in the dermis layer, namely fibroblast cells [4]. Around the wound growth and mobile come into structure and change shape into complete tissue [5]. Fibroblasts are the main cells in the production of collagen, which serve as the structure of the skin and keep it healthy. And create elastin [6]. to help make the skin flexible [7]. Collagen is used as a natural cell scaffold in commercially available forms. Depending on the usefulness of the application [8]. the structural strength and biodegradability depend on the bonding linkage.

Gelatin is a type of protein produced by the breakdown of collagen by acids or alkalis. It looks like a light brown powder. It can be extracted from bones and skins of animals (such as cattle, buffalo, pigs). When gelatin powder is heated with water at about 32 degrees Celsius, it melts into a viscous liquid. Set aside to cool. The liquid sets to form a gel (a jelly-like appearance). Gelatin is used as a component of many products such as cosmetics, drugs, food, and photographic film [9]. In pharmaceuticals, gelatin is used. It is used in tablet coating, hard capsules and soft capsules for pharmaceutical packaging [10]. In agriculture, it is used as an intermediate for minerals needed to grow plants, etc. [11]. In food products, it has many uses.

Polycaprolactone classified as a type of thermoplastic Classified as a polyester with a straight chain. Can be biodegradable. Currently, polycaprolactone. Much attention has been paid to the development of biodegradable plastics. But biodegradable plastics containing 45% starch mixed with polycaprolactone. still not strong enough for use Because it has a melting point of only 60 degrees Celsius and begins to soften at 40 degrees Celsius, which is a limitation in use.

Use of polycaprolactone It is commonly used as an additive to resins to improve processability and improve other properties such as impact properties. Flexibility due to polycaprolactone It can be easily combined with other materials. Therefore, the use of gelatin mixed with polycaprolactone is used to produce artificial or synthetic skin [12]. or cell cultures biodegradable

Research Objective

1. Study and develop skin cell scaffolds by mixing gelatin, polycaprolactone with electrospinning technique.

2. Study the physical and mechanical properties of the gelatin-containing scaffolds of polycaprolactone.

Research Methodology

1. Condition to impose gelatin. Polycaprolactone The ratios as specified are 100/0, 90/10, 80/20, 70/30 and 60/40 respectively.

2. The material was mixed using a stirrer for 20 minutes at a temperature of 100 °C, 300 rpm.

3. Injection molded by electrospinning machine at 20 KV current.

Test Condition Gelatin/PCL			
Condition	Name	Gelatin	PCL
1	G100	100	-
2	G90	90	10
3	G80	80	20
4	G70	70	30
5	G60	60	40

Figure 1 Condition to impose gelatin/Polycaprolactone ratios as specified

Figure 2 The material was mixed

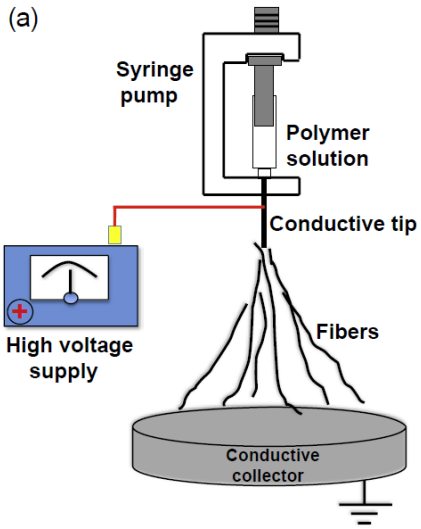

Figure 3 Injection molded by electrospinning

Figure 4 parts by electrospinning machine.

4. Keep the specimen sucked for 72 hours.

Figure 5 Show Keep the specimen sucked chine.

5. Prepare the work piece for cross-link baking.

Figure 6 Show Prepare the work piece for cross-link baking.

6. Bake Cross-link temperature 140 degrees for 72 hours.

Figure 7 Show Bake Cross-link temperature.

Conclusion

Characterization of Nanofibrous physical and mechanical properties Scaffolds by mixing gelatin, polycaprolactone with electrospinning technique

1. Surface morphology of nanofibrous scaffolds

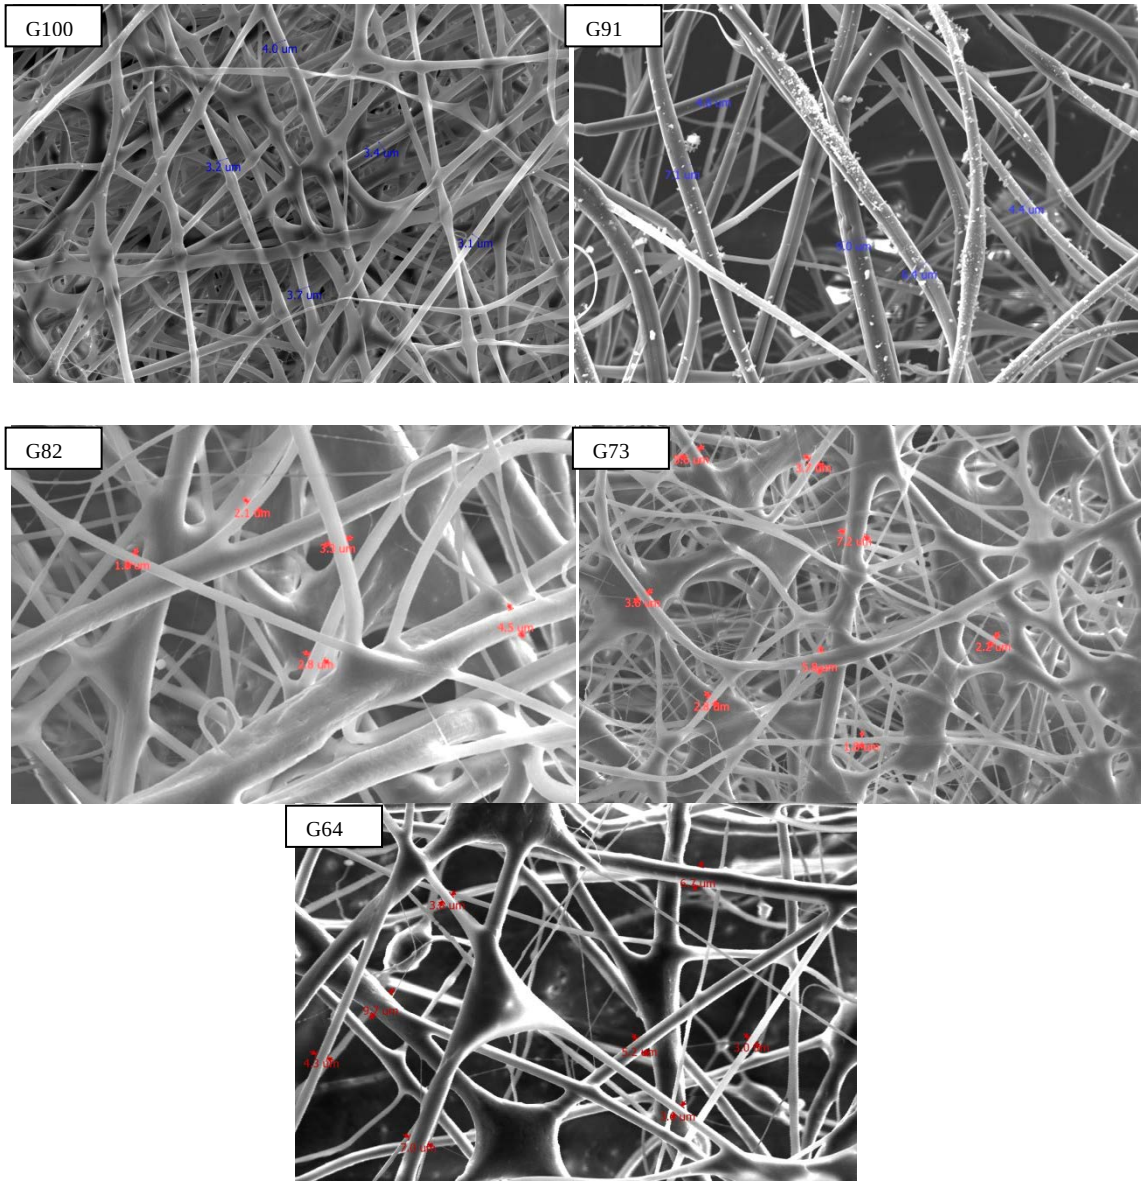

Figure 8 SEM images of scaffolds for nanofibers electrospining with Gelatin/PCL ratios of 10/0 (G100), Gelatin/PCL ratios of 90/10 (G91), Gelatin/PCL ratios of 80/20 (G82), Gelatin/PCL ratios of 70/30 (G73), Gelatin/PCL ratios of 60/40 (G64) and all condition were DHT for 48h.

TABLE 1: Fiber Diameters of Electrospun Gelatin/ PCL

Gelatin/PCL	Range of diameter (um)	Average diameter (um)
100/0	4.4 - 7.1	6.1
90/10	4.4 - 4.8	4.6
80/20	3.3 - 4.5	3.6
70/30	2.1 - 2.8	2.4
60/40	1.8-2.3	2.1

Table 1 show revealed that when CMC increased from 0 to 40 percent, fiber's size was decreased from 2.1 nm to 7.1 nm.

2. Swelling test

The scaffold was put into the swelling test in order to find the difference of dry weight and wet weight of the scaffold in percentage. The dried scaffold was weighted and then soaked the scaffold under PBS buffer solution at the pH of 7.4 and temperature of 37 °C for 3 hours. Then both sides of the scaffold were wiped with low lint paper 10 seconds for each side and then weighted immediately. The dry weight and wet weight were then calculated into percentage using the following formula as shown in (1). We then compared the resulted of swelling ratio of scaffolds from electrospinning [13], [14].

$$Swelling\ ratio = \frac{W_{so} - W_0}{W_0}$$

Where *as*

W_{so} *is the* weight *of scaffold after its water content was* absorbed

W_0 *is the* initial *weight of the scaffold*

TABLE 1: The swelling ratio of scaffolds from electrospinning

Condition	Name	%		
1	G100	11.51	12.03	11.62
2	G90	7.63	8.02	7.89
3	G80	6.65	6.73	6.72
4	G70	5.59	5.80	5.96
5	G60	5.29	5.11	5.10

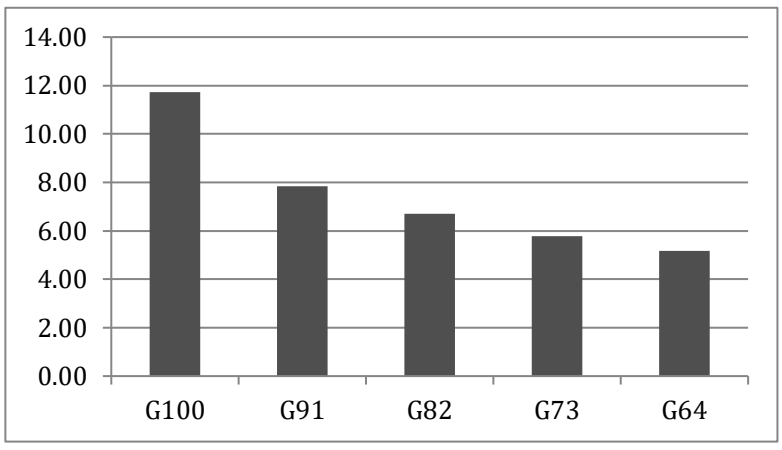

Figure 9 swelling ratio of scaffolds from electrospinning

Figure 9 revealed that the scaffolds from electrospinning with the mixture of G100 ratio had swelling ratio of 11.72% which was the highest. All scaffolds from electrospinning had average lower in swelling ratio compared

with the scaffolds, except for the case of gelatin and PCL mixture at the ratio of G91 which was 7.85%, G82 which was 6.70%, G73 which was 5.78 % and G64 which was 7.85%.

Discussion

Gelatin/PCL fiber produced by electrospinning technique revealed that the highest in swelling ratio and the largest of fiber size was found in gelatin and PCL mixture at the ratio of 100/0. Adding PCL into the gelatin fiber occurred in smaller in fiber size and lower in swelling ratio compared with pure gelatin fibrous scaffold. We could summarize that size of the fiber effected to the swelling ratio which the smaller of fiber, the lower of swelling ratio was found. Analyzing the nanofibrous scaffold produced by using.

Electrospinning technique, the gelatin/PCL fiber with large fiber size would also has high swelling ratio. mixture of G100 ratio had swelling ratio of 11.72%. When adding more PCL, there will be more fiber as well, so the % can be remembered.

Recommendation

1. Solvent Gelatin and PCL which saves money which will help you earn 50% But it is necessary to find securities to audit before auditing.

2. Residues in the testing laboratory are air purified to the air can be distilled. Before doing any inspections, a plan must be made every time.

3. The test, once obtained, may be expected to pass because it requires multiple controls.

Study of Stress on Cervical Plate Thickness by Finite Element Method

Sanphasit Chonlaphan[1]
Narin Koolnapadol[2]
Surapong Keanmanee[3]
Prayuth Inban[4]
Banpot Meesa[5]

Abstract

A treatment of spine by surgery is very complicate and important process to cure spine. Human spine bone has 3 components, cervical, thoracic, and lumbar. A spine surgery needs specific implants and instrument to set a screw, plate, rod etc. to spine bone. One of them is cervical plate that is a connector to fixed bones' s issue. KJ Chomphuphan Medical CO., LTD. Company interest about selection a suitable thickness for load that cervical plate must contact. In market has 1.7, 1.8, 1.9 and 2.0 mm. Therefore, researcher interest to analyzed cervical plate thickness in market size with Solidworks to find suitable thickness that can apply to most patients while still have strength and safety. From the result has found the max stress occur in screw hole that contact with force. the different value of stress in each range of increasing thickness has interest relation. Especially increasing thickness from 1.9 -2.0 mm. that is the lowest of different value.

Keywords: Cervical plate, Finite element, spine, surgery, simulation

Introduction

The spine is a crucial component of human body, that contains nerves, intervertebral discs, and it is connected with numerous vital organs that are necessary for maintaining human life. If the spine got some injury or bone related diseases, immediate treatment will be required. In some cases, spinal surgery requires the use of screws to fix the spine in order to treat spinal injury whether it is the result of an accident, growing older, tuberculosis of musculoskeletal system, or bone cancer which can be found in a large number. This kind of treatment requires the use of screws to fix the bone to the spine and welding each screw with titanium metal wire. In order to alleviate these symptoms and reinforce the spine so that the patient can lead a sustainable life. The size and number of screws used in each case depends on the size of patient's spine and the number of damaged bones.

There are three different types of spines: cervical, thoracic and lumbar. In the procedure of repairing the damaged bone, specific instrument is also needed in each time. In addition, surgery requires several elements such

as screws, plates, HA bone and etc. Which in anterior cervical surgery, cervical plate work as an interface between the bone and the screw. Therefore, cervical plate is very important part that have different size depending on the market brand. However, cervical plate come with variety sizes and thicknesses, patient also have to pay at different prices.

Therefore, selection of a suitable thickness size of cervical plate is importance and interested. This would be benefit for surgery doctor and business owner. KJ Chomphuphan Medical CO., LTD. Company interest to analyze stress in a cervical plate with different size in market, 1.7, 1.8, 1.9 and 2.0 mm. with same load and condition. The analyze was carry in with a Solidworks program to search the suitable thickness of cervical plate for general patients. This knowledge will use in application of treatment a patient about spine surgery.

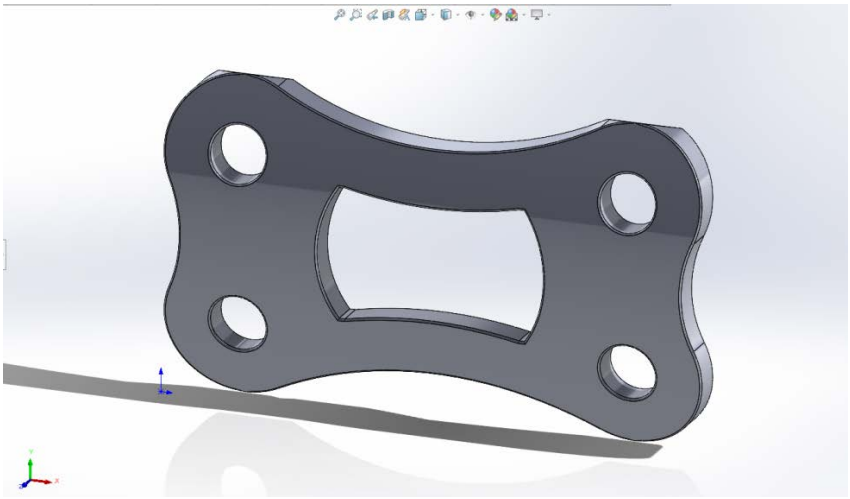
Research Objective

1. Analyze cervical plate by FEA to find Von mises stress in each market size.
2. Study to find suitable thickness in market size under same load.

Research Methodology

Model

A 3D model of cervical plate was created by Solidworks program with 1:1 ratio compared with real size cervical plate. A model samples were created in 4 type different by thickness, 1.7, 1.8, 1.9, 2.0 mm. as show in figure 1. In analyze process is carry on with FEA (finite element analysis). The material of cervical plate is titanium. (Ti-6Al-4V treated and aged) [1] That is medical grade for a surgery operation implant and instrument. The material properties were show in Table 1 [2, 3]



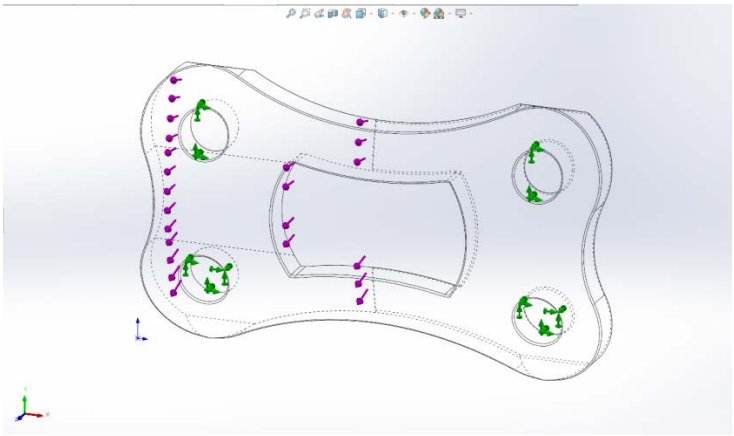


Figure 1 cervical plate model

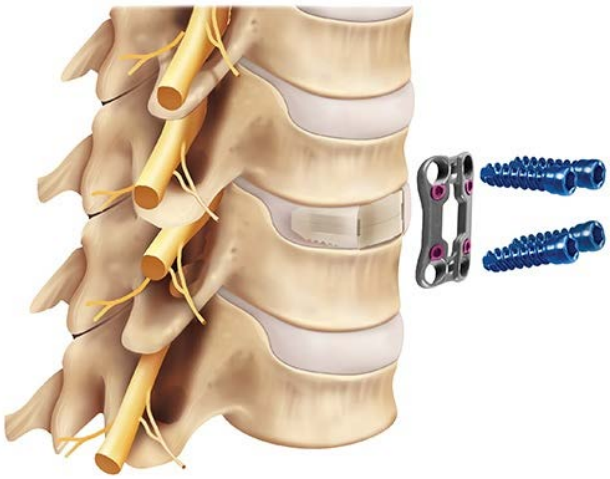
Table 1 Material properties of Ti-6Al-4V treated and aged

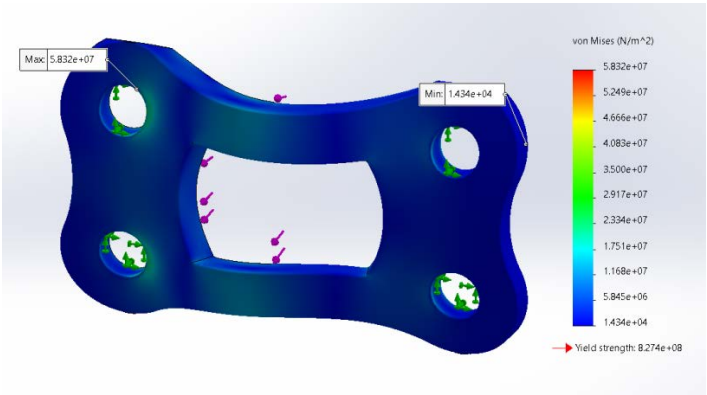


Properties	value	unit
Elastic Modulus	1.048×10^{11}	N/m^2
Poisson's ratio	0.31	-
Shear Modulus	4.102×10^{10}	N/m^2
Mass Density	4428.784	Kg/m^3
Tensiles Strength	1050000000	N/m^2
Yield Strength	827370880	N/m^2
Thermal Expansion Coefficient	9×10^{6}	K^{-1}
Thermal Conductivity	6.7	W/ (m.K)

Experimental set up

A 3D models were analyzed a Von mises stress by Solidworks simulation. [4, 5] The information of cervical plate and condition set up were received by KJ Chomphuphan Medical CO., LTD. Company. The detail of information indicates that the heaviest load is happen when human bow down. The load in this situation is around 12 kg. (117.12 N) The cervical was set with a cervical bone as show in figure 2(a) and the analysis set up condition was set as figure 2(b). The green arrow is fixture position, and the pink arrow is force that contact to cervical plate.

2 (a) cervical plate condition set up



2 (b) cervical plate set up in surgery [3]

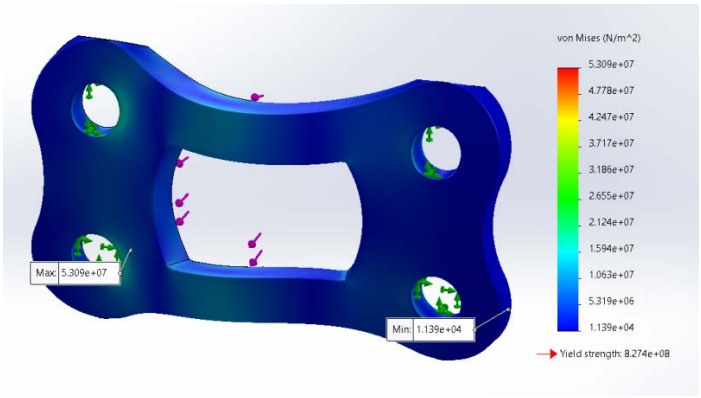


Figure 2 cervical plate model condition set up.

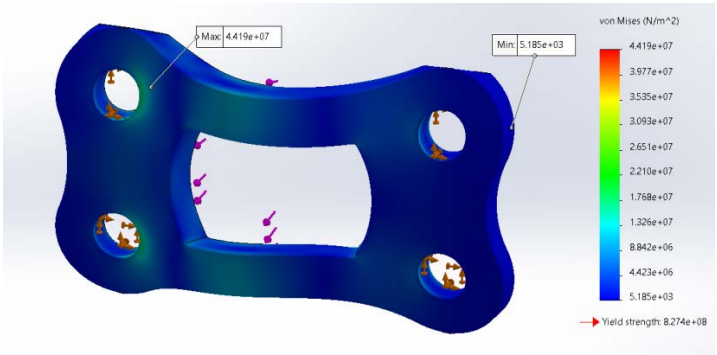
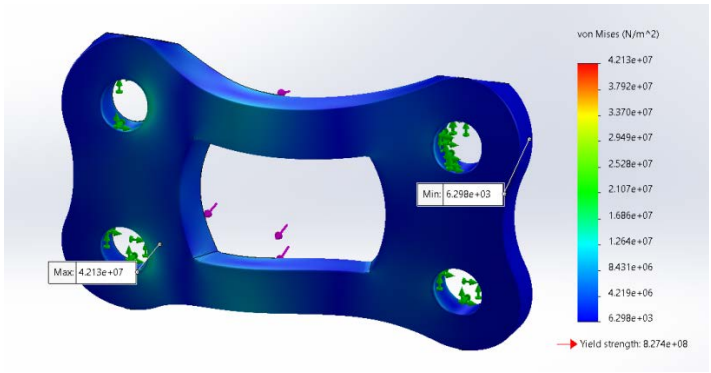
Result and discussion



From experimental analysis has found the max stress is occur in screw hole that force contacted as show in figure 3 (a, b, c and d). The stress is decrease when a thickness of cervical plate is increase. Von mises stress for each cervical plate thickness is $5.83x10^7$, 5.3×10^7, 4.42×10^7 and 4.21×10^7 N/m^2 for thickness 1.7, 1.8, 1.9 and 2.0 mm. respectively as show in figure 4.



(a) cervical 1.7 mm

(b) cervical 1.8 mm.

(c) cervical 1.9 mm.

(d) cervical 2.0 mm.

Figure 3 Von miss stress result for each cervical plate thickness

Conclusion

From analysis result with FEA Solidworks simulation has found increasing cervical plate thickness is decrease stress in samples parts. Because the plate gains more strength from increase a thickness of plate. Every case can use securely. Because it has safety factor at least 20 in every case. The max stress occurs in screw hole that contact with force. the different value of stress in each range of increasing thickness has interest relation. Especially increasing thickness from 1.9 -2.0 mm. that is the lowest of different value. The result show increasing thickness higher than 1.9 mm. is not increase strength significantly. Therefore, cervical plate thickness 1.9 mm. is suitable for cervical surgery for most patients.

Discussion

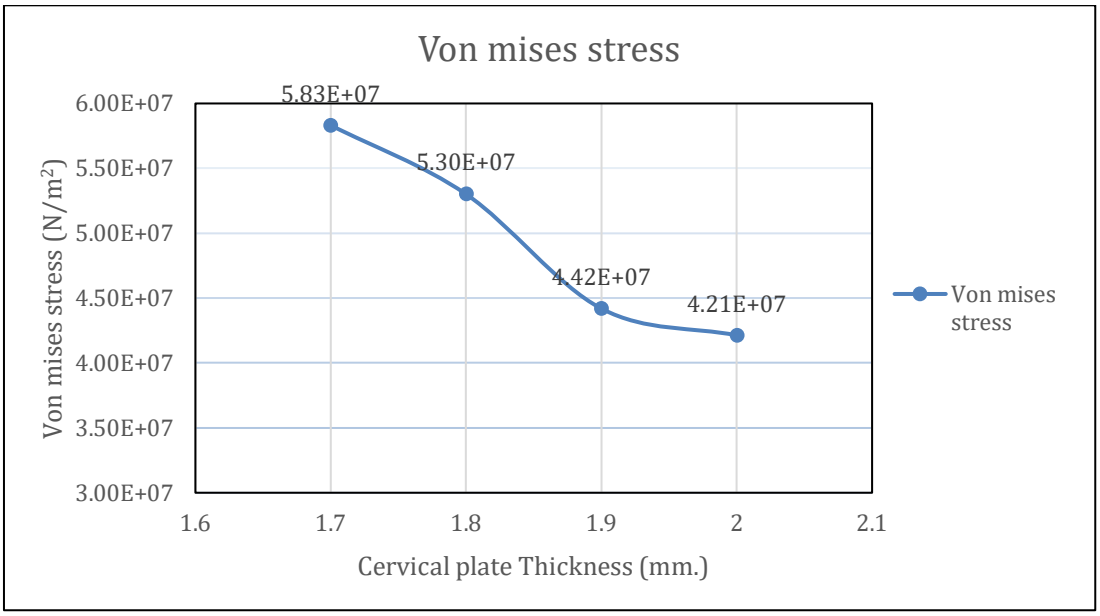


Figure 4 Von mises stress from FEA

From figure 4 has found a trend that is increasing cervical plate thickness will decrease a stress in plate. Each range of increasing cervical plate thickness. The Von mises stress is decreased significantly. In range 1.7 -1.8, 1.8 – 1.9 และ 1.9 – 2.0 mm. the stress decreases 5.31 x 10^6, 8.82x10^6 and 2.06 x 10^6 N/m^2 respectively. Especially rang 1.9 – 2.0 mm. is very clear that increasing plate's thickness over 1.9 mm. is decrease just stress 2.06 x 10^6 N/m^2. that is less value if compare with range 1.7 – 1.8 mm. and 1.8 - 1.9 mm. The trend of graph is started to converge after the thickness reach 1.9 mm.

Varuntorn Duangsuwan[5]
Artaniti Duangkong[6]

Abstract

This paper is purposed to study and to find the solution on second-hand copyright product in Thailand that relevant to animated model. The determinant is caused by the copyright owner right of first sale doctrine in one country and the buyer sales such product as second-hand product to Thai buyer. Consequently, there is a prosecution as the unjust second-hand sale which applies the gap in the law of copyright law. Also, the product duplication on import animated model that Thailand has the distributor to sell the same product. In nowadays, Thailand provides the exclusive right for copyright owner to sell or to utilize his work. Furthermore, there is no enactment on exhaustion of intellectual property right for the first sale. The comparative studies of Thai law to foreign laws, the United States and Japan, we found that both countries have the rule of exhaustion of the first sale on intellectual property product which should apply to Thai legislation to solve the problem of infringement copyright on the second-hand animated model that imported from foreign countries.

Keywords: second-hand animated product, legal enforcement, exhaustion of intellectual property right, first sale doctrine

Introduction

Animation in Japan defines as cartoon movie or motion pictures which is copyright work according to section 4 of the Copyright Act B.E. 2537. Amination is categorized as “Artistic work” that is work of product by creating, combination of light, color and others on material. Copyright products that relevant to animation in the present time have several categories as drawing of the character on amination into products or animated model.

The problem in Thailand is such animated product has the representative which implies that people are able to purchase the product from anywhere in Thailand included online. In the same time, some consumers order the animated products as the second-hand products that not through the agent of Thailand. Almost second-hand animated products are authentic and copyrighted from Japan which came with other products like clothes, ceramics that shipped to Thailand.

According to the exclusive rights of copyright owner, he has sole rights to repeat, modify, broadcast to public, let, benefit from copyright to others or to allow other utilizing the rights of copyright work along the terms that determined by the law. The significant right is the authorization of the owner to prohibit other to breach any action on his copyright work.

There was a case in Thailand relevant to the sale of second-hand animated model and the seller was arrested as copyright infringement. Not only the seller but also the delivery person was arrested while he was on the way to deliver the product to the buyer. These is the initial of consideration on the exclusive right on copyright owner to second-hand product. According to the Copyright Act B.E. 2537, there is no regulation of the exhaustion doctrine while it is available on The Copyright laws of the United States and Japan.

The Copyright law of the United States, the work would copyright immediately when this work is created. The work must be visible and the owner must register with copyright office to acquire the privileges. The register demonstrates the evidence of copyright for legal prosecution. Also, the copyright owner is able to register to the customs officer to prevent the import of illegal copyright products.

In Japan, copyright protections of the owner would initial immediately when the work is created not from the registration. However, the copyright owner is able to recode his work at the Agency for Cultural Affairs where is special cultural agency of Ministry of education, sport, science and technology or MEXT, begun in 1968 to encourage Japanese arts and cultures.

According to the Copyright Act of Thailand, there is no mention relevant to the exhaustion doctrine for secondhand products. It reflects the claim of copyright owner to prosecute the seller who bought the first-hand product copyrighted and he resells as secondhand product in Thailand. Furthermore, there are imported secondhand products which confront the same problem. Comparison with Japan and the United States, there is the exhaustion doctrine. The copyright owner has obtained the benefit from the purchase if the buyer would sell as second-hand product, it is not infringed the copyright. There is crystal regulation on the Copyright Act in both Japan and the United States.

Consequently, we should study the exhausting doctrine that Japan and the United States apply in the copyright law to demonstrate the exclusive right to prosecute the buyer after he does resell the copyright product legally. Also, to study the possibility of applying this doctrine to fill the gap of copyright act to be more effectively.

Research objectives

To establish the understanding of exhausting doctrine of intellectual property from the first-sale of copyright owner of second-hand animated product. Also, to study the exhaustion doctrine of foreign laws to be guidelines of Thailand to amend and apply the exhaustion doctrine to solve the problem of second-hand animated models that imported from foreign countries.

Research methodology

This research is qualitative research by study the relevant documents of domestic law and foreign laws as regulations, researches, journals, academic articles and electronic data.

Discussion and Conclusion

We found that the Copyright Act of Thailand provides just the exclusive rights of the owner and the terms of copyright work but there is no the regulation relevant to the enforcement of copyright infringement of secondhand animated product. The Copyright Act B.E. 2537, there is no obvious regulation of the exhaustion doctrine that seems to be affected the secondhand seller who purchases the copyright product but illegal in Thailand and risk to prosecute from the copyright representative in Thailand.

The first-sale doctrine is significant to copyright law due to the first-sale doctrine is the warranty for the third party who is transferred the product and has capacity to resell without the infringement. At the same time, this doctrine is aimed to protect the copyright owner to obstruct others for finding the benefit from owners' work.

It is interesting to see that the copyright laws of the United States and Japan provide the exhaustion doctrine while Thailand does not. This doctrine would benefit and protect the buyer who purchase the copyright product legitimately. In other words, the copyright owner has gained the benefit since the first-sale if such buyer resells that product as secondhand product to another, it is not an infringement of owners' work.

Another topic of Japanese copyright law is the parallel import for the copyright product which has the domestic representative. Japan applies the exhaustion doctrine to confirm that it is legal and is not infringed the owner's right. These was a case that brought to the court and the judge considered that it is not guilty because the owner has taken the benefit since the first sale which corresponded the exhaustion doctrine.

The United States applies the first-sale doctrine to limit the exclusive right of the owner. They believe when the owner has purchased in the first time, the right of copyright has extinguished. The court of the United States has followed this doctrine even there is no mention in the copyright law to be a warranty of buyer when he has bought legally and has the full rights to do with such product even the copyright owner would assign any condition.

According to the first-sale doctrine concept, after the copyright owner sells the product to the buyer, the buyer is able to resell such product without any permission. It is legal and not infringement in the United States. It purposes to prevent the consumer to utilize the work independently like lend, sale or destroy the work but no over limited to effect the rights of owner as copied without the allowance.

The Copyright Act of the United States 1976, there are several exceptions of first-sale doctrine. For instance, it is only applied to legal copied if the buyer bought copyrighted product and did resell, it refers as copyright infringement. Copied owner is incapacitated to lent, rent out, hired-purchase or any acts without permission from copyright owner. However, there is an exception for educational purpose without seeking for any benefit. Furthermore, there is an exception of using copyrighted product: if the computer program is a component of any machine or any product which cannot duplicate such computer program while performing, the owner of machine or product is able to lent his machine or product. The first doctrine is not applying to the imported product from other nations. The imported of copyrighted copied to the United States, must be permitted from the owner, if not, it refers as infringement of exclusive right of the owner for solely sell the copyrighted work.

Another relevant doctrine is the exhaustion doctrine to limit when the exclusive right of copyright owner is ended. In other words, when the copyrighted product is sold, the owner of product is able to sell such product without asking for any allowance from the copyright owner. It is legitimate to do so. According to the exhaustion doctrine, the exclusive right of copyright owner is extinguished when the product is sold legally which the owner cannot force or control the buyer to resell the product.

Consequently, the purchase of secondhanded animated product is relevant to the exhaustion doctrine which the doctrine would consider when the extinguishing of the exclusive right occurs. These would solve the problem that is happening in Thailand whether the exclusive right of the owner is ended or not, or whether others are able to purchase without copyright infringement or not.

From the study, we found that Thai copyright law is still having a gap which Japan and the United States apply those doctrines which support Thailand to study and to amend the relevant law to be clearer and cover to solve the second-hand copyright product that import from other countries.

Recommendations

The relevant organization should educate or train the first-sale doctrine and the exhaustion doctrine to the entrepreneur.

Also, the relevant organization should offer to apply the exhaustion doctrine to Thai regulation from the studies of foreign laws as Japan and the United States.

Moreover, the relevant organization should create online media relevant to the first-sale doctrine and the exhaustion doctrine that might extend the accesses of public.

Lastly, Thailand should provide the relevant regulation on secondhand copyright product particularly to prevent the conflict between the copyright owner and the secondhand copyrighted seller.

Legal measures that limit prisoners' right to occupation

Wena Suwanno[1]

Abstract

The objective of this research was to study legal measures that restrict occupational rights of those who have been penalized for inequality in occupation. According to the Department of Corrections Act, B.E.2560, Section 43. There is still a lack of a process to protect those who have been convicted because of the attitudes of today's society that mainly look at the qualities of the person making it impossible to find work in addition, various establishments discriminate in accepting people to work, causing this group of people to be unemployed. Therefore, having to turn around and repeat the same mistake and to neglect the profession that had been trained for a good career after being released from punishment If the theory of punishment to correct and rehabilitate offenders is adapted together with the theory of punishment to protect society. During imprisonment, education is provided or vocational training for inmates. When released from prison, the knowledge learned can be used for a career. Do not turn back to commit the crime again because in addition to benefiting the offender himself. It also protects society from repeat offences because if prisoners who have been released can use the knowledge gained from the training going to work and having a place to work will help reduce social problems to some extent. For example, the law in the state of Hawaii enacted the Hawaii Employment Practices Act Chapter 378 (b), Private Sector Employment and Occupational Licenses, setting out rules regarding employment for freed persons. The private sector and obtaining professional licenses that result in efficiency. Reduce disparities in support of professional practice.

Keywords: Prisoner, Occupation, Inequality

Introduction

At present, there are many inmates in prisons or correctional institutions who are about to be released from prisons or correctional institutions, including persons who have been released from punishment everyone is referred to as “the freed.” As soon as the freedman has stepped out of the prison, he faces social problems. Which is mostly a problem in “Occupational occupation” because most people in society feel bad about those released from prison. Both fear, distrust and disdain are therefore not accepted by society. These conditions cause difficulties in adjusting to the family and outside society and deprive the opportunity to start a new life. It is also another reason for those acquitted to repeat the offence. Since the freedman has no one to employ, hence lack of income to earn a living for himself and his family. This results in stress and helplessness in finding honest work. Therefore, returned to do illegal occupation again Whether it is drug trafficking, theft, gold shop robbery, etc. If there is no person or organization to help or give advice, find a way out. The acquittal continues to repeat the offence.

From the study of legal measures that limit the right to work for those who have been punished about the inequality in the support of professional practice. The purpose of this study is to study the concepts, theories, principles and laws related to the restriction of occupational rights of those who have been convicted. This makes the study aware that legal measures that limit the right to occupation of those who have been convicted. According to the Constitution of the Kingdom of Thailand B.E.2560, although there are provisions that guarantee freedom of occupation but it is a provision in the overview that "Every person has freedom of occupation," but does not have other details about the essence of the occupation. What occupations are covered? and protection in what respects.

[1] Lecturer, Faculty of Law, Thaksin University, E-mail wena.s@tsu.ac.th

The problem of inequality in supporting professional practice According to Section 43 of the Department of Corrections Act B.E. 2560, prisons provide for inmates with basic education in accordance with the National Education Act. which must be conducted in accordance with the educational curriculum of the Ministry of Education, including training on morality and ethics and training to increase employment opportunities. Provide all prisoners with equal access to education and training. Prescribing curriculum, criteria, methods and conditions for providing education and training for prisoners. according to the regulations of the Department of Corrections.

Article 44 The prison shall be responsible for the cost of basic education and training for prisoners. Including providing all the equipment for basic education and training to the prisoners. Unless the prisoners bring their own study equipment and have received permission. In the event that inmates wish to study at a higher level than basic education Prisoners are responsible for the cost of such education. by providing the prison with reasonable facilities

Department of Corrections Act B.E. 2560, Section 43, lacks a process to protect those who have been convicted because of the current attitude of society that mainly looks at the qualities of the person, unable to find work. which is a problem of inequality in society where various enterprises have discrimination in recruiting people to work, causing this group of people to be unemployed. When considering the main concept of equality, is therefore an important principle in ensuring and protecting people's rights and liberties which at present has been expressly recognized in the premise that persons are equal to be recognized and protected under the law. Therefore, when this group of people does not have a job, there is no income. need to turn around and repeat the same mistakes. Therefore, neglecting the profession that had been trained for a dishonest occupation after being released from punishment.

Research methodology

This research is a documentary research. The purpose of this study is to study legal measures that limit the occupational rights of inmates with inequality in recruitment. Study the relevant documents, research, laws, policies and electronic data of foreign and domestic laws.

Results

The study found that ex-convicts who tend to repeat offenders because of the current social attitudes that focus on personal qualities are unable to find work. Which is a problem of inequality in society where various enterprises have discrimination in recruiting people to work, causing this group of people to be unemployed. When considering the principle of equality, is therefore an important principle in ensuring and protecting the rights and liberties of the people and can be used to inspect the exercise of state power whether it is a legislative, executive and judicial branch. The legal concept of equality is now explicitly adopted in the assumption that all persons are equal to be equally guaranteed and protected by the law, which means "the principle of equality before the law" is recognized. Rights and liberties that are essential to being human beings. Human beings are born and cannot be taken away. Thus demonstrating the acceptance of natural law theory the principle of equality is recognized as one of the fundamental principles of rights and freedoms that are most important for all human beings to live with equal dignity. Therefore, when this group of people does not have a job, there is no income need to turn around and repeat the same mistakes. Therefore, neglecting the profession that had been trained for a dishonest occupation after being released from punishment. However, most of the inmates, after having received vocational training, use this knowledge to earn a living in order to support themselves and their families.

When studying the law in the state of Hawaii, a law was enacted called Hawaii Employment Practices Act Chapter 378. Arrests and court records detention or confinement detention for interrogation indicted in a criminal case Including people with a criminal record, etc.

1) Harassment Discrimination the Hawaii Employment Practices Act Chapter 378- 2- 1 defines discrimination as unlawful and is discrimination as a result of the following cases.

Discrimination based on race, sex, age, religion, skin color, ethnicity, cause of disability Marital status or crime statistics in terms of discrimination in work because of these reasons It's unlawful. with the following important matters:

(1) For employers in all cases that refuse employment or work or cause obstacles Discrimination is practiced on conditions and conditions. Receiving benefits, compensation, benefits for work.

(2) For work in a government agency that causes another person to suffer failure or denial in connection with the work, or any classification or discrimination against that person.

(3) For an employer or working in a government agency to do any act in such a manner as advertising, printing, publishing or using a job application form, etc., in a manner that restricts rights, classifies or discriminates in any case.

(4) For any labor organization that excludes or expels a person from membership or discriminates in any case.

Such actions are racial discrimination, skin color, or crime statistics. It is a discrimination that goes against the principle of equality. Which is the principle that the constitutional law has provided for the protection of the fundamental rights and freedoms of the people. The legislation was made to comply with the country's highest law.

2) Exceptions

However, this does not mean that employers cannot choose to hire employees with criminal records in all cases. An exception is made that does not constitute discrimination for private employers or unions to do the above. Yes, that is, the employer can refuse or terminate the employment of a freed person and this is not considered unfair discrimination. If the cause of that person's past crimes is directly related to the position responsible for it.

3) Principles of relationship between offenses and responsibilities

What relationship is considered directly related to that responsibility. Standards have been established by The American Bar Association, which directly establishes a relationship in the Draft Standard to the legal status of Prisoners for states to use as a benchmark in considering such relationships. Which can be considered as follows.

3.1 Clause (a) the Barriers to Employment section. Lay down the main principle that “There shall be no deprivation of employment of any person solely because that person has committed a criminal offense in the past and such offense is not materially related to the duties and responsibilities of that nature of work,” it could be said. That employers are prohibited from imposing qualifications in the manner of discouragement or discrimination in employment against persons who have previously been sentenced to imprisonment. But if the offense he committed in the past and the action may affect the work, which is the essence of the work. Employers can also choose to treat those who have been punished. There are factors used to describe the relationship between the offense and the duty to be responsible in the assessment as follows:

(1) Evaluate from the feasibility according to the nature of work or duties. by considering how likely it is to make the likelihood of committing the same offense.

(2) Assessment from the past period of previous offenses.

(3) Assessment based on conduct after being punished.

(4) Assessment of the likelihood of the offense and the motive for the offense to be committed again.

3.2 Clause (b) Employment in the Private Sector and Obtaining Professional Licensing lays out the rules relating to the employment of exonerated persons in the private sector and obtaining professional licenses. The law has set standards that " It is forbidden for the private sector to act in the manner of deprivation and to create any other measures to deter or hinder those who have been sentenced to imprisonment. without reasonable grounds in the scope of the following acts.

(1) Refusal of employment

(2) Dismissal from work

(3) Refusing fair employment conditions and employment conditions to employees.

(4) Refusing to join a labor union or claiming welfare benefits

(5) Refusing or canceling professional licenses that require working conditions for those who have been imprisoned.

However, employers are prohibited from doing the actions as specified in items 1-5 without justifiable grounds for doing so. The reasonableness of such actions is up to the court to decide in each case. Considering the employer's reasons and several environmental factors as supporting factors in the trial.

If considering the theory of punishment for rehabilitation the theory holds that human offenders are determined or pressured by a combination of factors in the social environment, such as psychological factors. Biological factors and environmental factors or family well-being. The offense is therefore caused by many factors combined and may vary from person to person. Punishment should therefore not focus primarily on the offense. But should consider the cause of the offense and fix to the cause of the offense. The punishment of the offender according to this theory therefore focuses more on the offender. Committing offenses by comparing offenders as if they were patients, it is necessary to study offenders individually or classify their characteristics in order to find the cause of the offense and to find solutions. This concept is therefore a concept of giving the offender an opportunity to turn around or improve himself so that he does not repeat the offence, such as imprisonment. But the court ordered to wait for the imprisonment and probation. And to do useful activities that are public services which give opportunities to the offender or if imprisoned, there is training to correct by training, vocational education. Moral and religious upbringing Providing group and individual remedial therapy aimed at addressing the reasons that led the person to become the perpetrator.

The theory of punishment to protect society by reducing the opportunity to commit an offense. The purpose of this theory is to provide punishment for the protection of society by separating offenders from society in order to cut off the opportunity for offenders to commit another crime with the main principle that crime will not happen. If there are no criminals or criminals have no chance to commit crimes. This concept focuses on protecting society from crime. By not allowing the offender to have the opportunity to repeat the offense with the death penalty life imprisonment or being sent to quarantine at a place far away as in the past, England used to send prisoners to colonies, for example sending prisoners to Australia.

From theories and concepts of punishing crimes or offenders as mentioned above, it can be analyzed that there are advantages and disadvantages in itself. It can be seen that the theory of punishment to protect society by cutting off the opportunity to commit an offense. It is to bring offenders out of society under control to protect society. But when the offender was acquitted will be the form of social protection. For the appropriateness of the analysis, the privacy rights of the exonerated person and the protection of society must be taken into account.

Therefore, when the punishment of imprisonment for the defendant or the offender. Is to bring the offender to detention at a place called a prison, which separates the offender from society in order to cut off the opportunity to commit another offense during the imprisonment but separating offenders by means of imprisonment is only effective for a period of time. Because most imprisonment is punishable by the offender. It is usually a term of imprisonment. When the defendant or the offender has passed the imprisonment and has

been released from the prison and returned to society. Along with other environmental factors, it may cause the defendant or the offender to return to commit the offense again. Therefore, it is necessary to analyze the theory of punishment if the punishment theory is applied to rehabilitate the offender. To adapt or to play an important role in conjunction with the theory of punishment to protect society, for example, during imprisonment, education may be provided. or professional training so that inmates or prisoners, when released from prison, can apply the knowledge they have learned to earn income so that they will not come back to commit crimes again This will make the punishment of offenders more effective. Because in addition to benefiting the offenders themselves, it also protects the society from repeat offenders. This concept has lately become widespread and can be called a combination of theories and concepts to protect society and at the same time help offenders.

However, when considering foreign laws to study in order to find solutions, problems in supporting professional practice should be corrected. Adding to the law in Section 43 and Section 44, there is a provision certifying the provision of a place to accommodate persons who have been punished to work. There may be measures or regulations that when these people have been released. There is already a place to work. to reduce the problem of unemployment and to eliminate the problem of discrimination, not accepting such people to work with. By not finding a place to work and the problem of unemployment is gone. It also reduces the problem of crime that may arise from not being able to find a place to work. Therefore, having to repeat the same offense. The researcher agrees that the Department of Corrections should pay attention to this matter and issue measures or laws under section 43 in conjunction with section 44 in the provision of accommodation for acquitted prisoners who have completed vocational training and received a professional certificate. go to work for such persons to have employment have income to support their own family. The government or government agencies will find a place by themselves or agree to cooperate with the private sector in arranging a place to accommodate those released from prison to work. The fact that inmates who have been released from prison can use the knowledge gained from the training to work and have a place to work. This helps reduce social problems to some extent, such as unemployment. and to reduce the problem of recidivism among some groups of inmates. The penalties for repeat offenders must also be more severe. In order to make such people fear the law. And as a way to prevent other people from repeating the same offense. This is for the benefit of the inmates themselves and the nation.

Conclusion

Department of Corrections Act B.E. 2560, Section 43, lacks a process to protect those who have been convicted because of the current attitude of society that mainly looks at the qualities of the person, unable to find work. which is a problem of inequality in society where various enterprises have discrimination in recruiting people to work, causing this group of people to be unemployed. When considering the main concept of equality, is therefore an important principle in ensuring and protecting people's rights and liberties which at present has been expressly recognized in the premise that persons are equal to be recognized and protected under the law. Therefore, when this group of people does not have a job, there is no income. need to turn around and repeat the same mistakes, therefore neglecting the profession that had been trained for a dishonest occupation after being released from punishment.

Originally, the Department of Corrections Act B.E. 2560, Section 43, stipulated that “prisons shall provide inmates with basic education in accordance with the national education law, which must be conducted in accordance with the educational curriculum of the Ministry of education, including training on morality and ethics and training to increase employment opportunities.

Provide all prisoners with equal access to education and training.

Prescribing curriculum, criteria, methods and conditions for providing education and training for prisoners. according to the regulations of the Department of Corrections"

The Department of Corrections Act, B.E. 2560, Section 43, paragraph four, should be amended, stipulating that Let the government or government agencies arrange their own premises or agree to cooperate with the private sector in arranging premises to accommodate those freed from imprisonment in their occupations."

The fact that inmates who have been released from prison can use the knowledge gained from the training to work and have a place to work. It helps reduce social problems to some extent. Similar to the law in the state of Hawaii, a law called Hawaii Employment Practices Act Chapter 378 (b), Private Entity Employment and Occupational Licensing, sets out rules regarding employment for freed persons in the region. private and professional licenses The law has set standards that "It is forbidden for the private sector to act in the manner of deprivation and to create any other measures to deter or hinder those who have been sentenced to imprisonment. without reasonable grounds in the scope of the act: (1) refusal of employment; (2) dismissal; (3) refusing fair employment and employment conditions for the employee; (4) refusing membership. labor union or welfare application; If there are additional modifications, it will result in efficiency. Reduce disparities in support of professional practice.

Factors Influencing Intention to use Hybrid Work Technology: A Proposed Model

Padetyut Yotwinyuwong[1]
Jutamard Thaweepaiboonwong[2]

Abstract

Hybrid office work has been used and discussed for a long time. In this current shifting situation stimulated by the COVID-19 pandemic, the many positive benefits of hybrid office working technologies, including their potential to create a more sustainable work activity, have attracted many studies to gain a better understanding of this subject. This article is a review of the literature to illustrate employees' opinions and attitudes that lead to employee intention to use technology for hybrid office working in the workplace in order to develop a conceptual framework and hypotheses for further research. It denotes a willingness to use, a stronger intention to perform the behavior, and continued use regardless of whether or not the performer has actual use. An extended "Unified Theory of Acceptance and Use of Technology" (UTAUT) model employing environmental concern was used. As in the literature review, there are many factors affecting the intention to use technology, including performance expectations, effort expectations, social influence, facilitating conditions, hedonic motivation, price value, and habit, with generation as a moderator variable.

Keywords: COVID-19; Hybrid Office; Unified Theory of Acceptance and Use of Technology

Introduction

At present, companies have entered a period of transformation and competitiveness in every industry. Corporate executives are becoming aware of and focusing on how to use technology in the organization to keep up with rapidly changing economic and social conditions (Rerkkham, 2020). With the epidemic crisis caused by the COVID-19 pandemic, people in society have had to completely change their way of life, whether it is a form of daily coexistence in society or business operations, especially where more stringent social distancing has been applied (Sangsawangwatthana, 2020). According to the study by Hendl Chung and Wild (2020), there could be up to 40 potential touch points during a typical workday where the virus could spread. As a result, many businesses take into account how the COVID-19 pandemic would affect their workforce, forcing some employees to temporarily convert from working from home to an office setting. This is called a "hybrid office," where employees can work in a blended way between working at the office as an event or meeting with others from any location using communication technology for coordination and connection. The connection between employees creates greater flexibility and independence in choosing the workplace (Bick, Blandin, & Mertens, 2020).

From the literature review, it was found that the result of this intention to use technology for hybrid office working is possible with the adoption of technology. Parker (2020) found that the COVID-19 pandemic led to the transition to remote working, redesigning, and restructuring office work. The management strategy reflects the choice of priorities between occupational health and safety and business returns. Venkatesh et al. (2003) stated that the resulting efficiency and ease of use must come from performance expectations, effort expectations, social influence, and facilitative conditions. This affects behavioral intentions, which directly affect usage behavior.

Gender, age, voluntarily, and experience are taken into account to help direct them together to create dynamic influences.

In addition to the factors related to the adoption of technology, in the latter stages of the operation in each organization, personnel are highly important (Joungtrakul, 2020). Each organization will have different personnel according to the age and age of those who work together in the organization. Most of them have problems working together. This is due to differences in personality, behavior, and communication. As Generation X personalities tend to view work as a mere part of their lives, they tend to prioritize their own wellbeing, family, and social relationships to be able to balance work and personal life very well. Generation Y is highly independent, low-tolerance, inquisitive, regulatory-challenging, change-loving, tech-savvy, enthusiastic, and low in corporate loyalty (Wittawat-oran, 2012). These two groups of employees are significantly different compared to older employees who are still working for the organization (Supprapha, 2013).

Therefore, each organization must retain its competitiveness in light of the changing conditions. This can be accomplished by adapting personal behavior to the COVID-19 pandemic epidemic condition. Employee ability is required, thus the business must train a skilled set of workers with greater abilities in order to uphold work standards in line with the present environment through the use of hybrid office work.

Research Objective

This study aims to examine the factors influencing employees' intentions to use technology for hybrid office work and the differences in the effects of such factors on the intentions to work as a hybrid office between Generation X and Generation Y employees. The results of the study can be used by the organization in managing resources to increase their hybrid work performance and benefit academics who are interested in such matters.

Literature Review

1. Hybrid Office Working

Coronavirus disease 2019, or COVID-19, is a virus that spreads from person to person and has a widespread epidemic. It is a family of viruses that cause illnesses ranging from the common cold to more serious diseases such as Middle East Respiratory Syndrome (MERS-CoVCoV) and acute respiratory syndrome (SARS-CoVCoV). For example, this is a new species that has never been seen before in humans and causes respiratory illness in humans and can be transmitted from person to person. The virus was first identified in Wuhan, Hubei Province, People's Republic of China. The World Health Organization (WHO) has declared the novel coronavirus outbreak a "pandemic" after the infection spread rapidly in all regions of the world. On January 30, 2020, the World Health Organization assessed the situation and declared the novel coronavirus disease of 2019 a Public Health Emergency of International Concern (PHEIC), recommending that all countries accelerate surveillance and prevent the risk of the coronavirus disease of 2019 (Ministry of Public Health, 2020).

Currently, the coronavirus disease of 2019 is spreading all over the world, and it is predicted that the number of infections and deaths will continue to rise if there is no definitive and timely prevention and treatment. The coronavirus disease of 2019 can be transmitted from person to person through mucus droplets and saliva from coughing or sneezing. If those droplets are attached to places or things, they have to catch those places or things. The virus can also be contracted by touching the nose, eyes, or mouth with hands, and coronavirus disease 2019 is also transmitted through the inhalation of droplets from infected people who cough or sneeze. The World Health Organization recommends staying at least 1 meter away from infected people, washing their hands with soap or solution or disinfectant gel, and avoiding touching the nose, mouth, or eyes. According to the World Health

Organization, staying at home without touching people or various risk groups will make them safer from contracting and spreading the disease (Chewawiwat, 2020).

Many countries around the world have campaigns or orders requiring people to stay at home to avoid infection or spreading the virus without realizing it. For Thailand, data from the Ministry of Public Health on March 27, 2020, found that more than 1,000 people had been infected and five people had died. The Bangkok Metropolitan Administration has also ordered the closure of shops and services at risk, and the government has announced an Emergency Decree on Public Administration in Emergency Situations (Ministry of Public Health, 2020).

In response to these situations, many government agencies and the private sector have gradually implemented policies requiring employees to work at home or from home instead of in the traditional workplace, in the hopes of reducing the spread of communicable diseases. But when many restrictions and policies are relaxed, some offices have now begun to return to work. The following advantages come with hybrid office working methods, which involve working from home occasionally while also spending some time at the workplace (James, 2018):

1. This makes it possible to reduce the cost of the agency and personnel both directly and indirectly. Rent for office space, utility bills (such as water and energy), and employee travel costs are the expenses that are immediately decreased. Additionally, staff members who are not stressed out or exhausted from commuting to work are less likely to become sick or have an accident, lowering the cost of medical care. These are indirect costs.

2. In a landmark study cited in the Harvard Business Review (Bloom, 2014), call center workers on Ctrip—a Chinese travel website—were given the option to volunteer to work from home for nine months. Half the volunteers did so; the other half was the control group and thus continued to work at the office each day. The study revealed that "people working from home completed 13.5 percent more calls than the staff in the office did—meaning that Ctrip got almost an extra workday a week out of them," according to Stanford University professor Nicholas Bloom. Another study, this one from Gallup (2017), found that employees who work from home three to four days a week are 33 percent more likely to "feel engaged" and 15 percent less likely to feel "not engaged" than employees who report to the office each day. Numerous studies (Gallup, 2017) have found that increased employee engagement boosts productivity.

3. This enables a lower staff turnover rate. Working from home, interspersed with working from the office at times, results in less stress for employees by reducing commuting times, traffic congestion, and so on, and can reduce the rate of unemployment by up to 50%, according to a study by Bloom (2014). In addition to reducing the turnover rate of personnel, companies that offer work-from-home employees also have a higher chance of recruiting. This is a group of young people joining in because a study found that 40 percent of young people in the United States prefer communicating via electronic devices rather than seeing them in person or talking over the phone (Kaur et al., 2018).

4. This allows it to lower the staff sick leave rate since allowing employees to work from home will greatly reduce stress, particularly stress related to travel. Additionally, employees who really are ill can work from home instead of going into the office, lowering the likelihood that they will infect their coworkers and increasing the number of sick days.

It can be seen that working at home, interspersed with working at the office for some time, or working as a hybrid office, can be adapted very well to the epidemic situation of the coronavirus, causing many companies to consider finding a new, highly flexible way of working that many companies have in common: the use of a hybrid office model that combines work from anywhere with office work.

2. Generations at Work

The researcher selected the age distribution of employees for each generation using the theory of Zemke et al. (2000). According to the theory, people were divided into three generations based on sociological

perspectives in which people born in different generations have different general habits due to different situations. The age range and general habits of each generation can be summarized as follows:

1. Baby boomers (Gen B) are people who were born between 1946 and 1964, after World War II. During this time, the population significantly increased as the era was developing and males began working outside the home while women raised their children at home. People of this generation are conscientious, patient, hard-working, and have a sensible attitude. They also have a strong sense of self-worth, an optimistic outlook on the world, and a sense of social importance and affection.

2. Generation Xers (Gen X) are people born in the years 1965–1979, which was an era of economic hardship. Both parents had to work outside the home. Facing high rates of family divorce and an era of the collapse of the Soviet Union, multiculturalism, and growing up with technology, people in this era therefore tend to see the world in a negative way, behave impolitely, have high self-esteem, a high personal world, and need love and acceptance from people around them and society because they feel a lack of warmth from family, have high expectations of others, learn quickly, and love the freedom of life.

3. Generation Nexters (Gen Y) are people born in the years 1980–1999. It was an era of convenience and advancement in technology, so this generation can be considered a generation of materialism. It is a warm family era and an era of racial and cultural diversity. The economic growth rate is high, and technology is developing rapidly, creating comfort for living. People in this era are self-confident, risk-takers, and optimistic. Life is always purposeful, self-sufficient, accepts the opinions of others, is flexible in thinking, and is adaptable, creative, and assertive.

This is because most of the current employees' birth years are close to the criteria for separating Generation X and Generation Y. It was found that when using the above division criteria, there was no gap between generations, which resulted in a good outcome in collecting data from a sample of employees of both Generation X and Generation Y. That did not cause the loss of samples of certain age groups in the generational segmentation. The researcher therefore chose to study a group of employees from generations X and Y, who are currently the main workforce.

3. Theory of Acceptance and Use of Technology

3.1 Theory of Reasoned Action (TRA)

Theory of Reasoned Action (TRA) proposed by Fishbein and Ajzen (1980) aims to predict the behavior of users in a given situation. Its main premise considers that users will adopt a specific behavior if they perceive that this will lead to positive results. In the TRA, a person's behavior is directly influenced by their willingness to adopt or not that behavior (Present Behavioral). Behavioral intention, on the other hand, is influenced by two factors: attitude toward the behavior and subjective norm.

3.2 Theory of Planned Behavior (TPB)

The TPB (Venkatesh & Speier, 1999) is an extension of the TRA that adds the variable of "perceived behavioral control," defined as the person's perception of the ease or difficulty of practicing a particular behavior. The perceived behavioral control depends on control beliefs and perceived facilitation of that control factor to facilitate or inhibit behavior.

3.3 Technology Acceptance Model (TAM)

The TAM (Davis et al., 1989) was specifically designed for the area of Information Technology (IT). This model is based on theoretical and empirical components and it has been successfully tested by several researchers. The TAM has altered some of the associated measures mentioned in TRA by others related to technology acceptance: the ease and usefulness of a system. The TAM indicates that the Behavioral Intention to

Use, which is the willingness to use the system in the future by the user, is determined by two variables: perceived ease of use and perceived usefulness.

3.4 Model of PC Utilization (MPCU)

The MPCU derives greatly from the Theory of Human Behavior established by Triandis (1977). Some authors adapted this theory to predict the use of personal computers rather than the intended use. However, its application has grown sufficient to forecast the acceptance of a wide range of IT.

3.5 Innovation Diffusion Theory (IDT)

IDT is a theory based on sociology, with a strong prominence in the field of explaining the use and adoption of technology (Roger, 1995). The concept of innovation is an idea, practice, or object that is perceived as something new for a user. Innovation creates uncertainty, which motivates a user to seek information about alternatives. Diffusion is the process by which innovation is communicated through different channels over time, by the members of a social system. IDT aims to explain the decision-making process of innovation and determine the factors that influence the rate of adoption as well as the categories of adopters. It aims to predict the probability of adoption of an innovation and its adoption rate.

3.6 Motivation Model (MM)

Basically, system use is determined by two factors: intrinsic motivation and extrinsic motivation. The term "Extrinsic motivation" is defined as the perception that users will want to perform an activity because it is perceived to be instrumental in achieving valued outcomes that are distinct from the activity itself, such as improved job performance. The term "intrinsic motivation" refers to the perception that users will want to perform an activity for no apparent reinforcement other than the process of performing the activity per se. Davis et al. (1992) proposed that perceived usefulness is an extrinsic motivation and perceived enjoyment is an intrinsic motivation. Generally, output quality and perceived ease of use have an impact on perceived enjoyment and perceived usefulness. Moreover, they introduced task importance as a moderator of the ease of use and output quality influences on usefulness. Therefore, output quality and perceived ease of use influence BI indirectly through perceived usefulness and perceived enjoyment.

3.7 Social Cognitive Theory (SCT)

Inspired by social psychology, SCT was proposed based on three main factors: behavior, personal, and environment, which interact bi-directionally in order to predict both group and individual behavior. Moreover, it can identify methods that can change and modify behavior (Rana & Dwivedi, 2015). In the SCT model, behavior factors are chiefly focused on usage, performance, and adoption issues. However, a personal factor is any combination of personality, cognitive, and demographic aspects characterizing a person. On the other hand, environmental factors include physical and social factors, both of which are physically external to the individual. SCT is an inseparable triadic structure in which all three factors constantly influence one another, reciprocally determining each other. The SCT model is integrated to evaluate information technology usage by using some constructs, including self-efficacy, outcome expectations, performance, anxiety, affect, and personal outcome expectations.

3.8 TAM/TPB Combined Model (TAM/TPB)

Taylor & Todd (1995) introduced a hybrid model that combines the variables of the TPB with the perceived usefulness of the TAM. They added a variable to the user experience in IT called "previous experience." Taylor and Todd theorized that by separating users into groups based on previous experience, different forces would be revealed on the effects of variables of this model. For new users, the behavioral intention seems to be more influenced by the perceived usefulness, followed by the ease of use. The main contribution of this combined model is that it suggests that the experience levels of users should be considered in studies of the acceptance of IT.

3.9 Unified Theory of Acceptance and Use of Technology (UTAUT)

The Unified Theory of Acceptance and Use of Technology (UTAUT), developed by Venkatesh, Morris, Davis, and Davis (2003), is a model used in the study of human behavior in acceptance of the use of new technologies and being able to predict the behavior of acceptance of the use of new technologies in the future. It has been developed by combining eight accepted behavior theories, consisting of the Theory of Reasoned Action (TRA), Theory of Planned Behavior (TPB), Technology Acceptance Model (TAM), Model of PC Utilization (MPCU), Diffusion of Innovation Theory (DOI), Motivation Model (MM), Social Cognitive Theory (SCT), and Combined-TAM-TPB (C-TAM-TPB), to reduce limitations and increase efficiency in research. It will consider four factors: performance expectancy (PE), effort expectancy (EE), social influence (SI), and facilitating conditions (FC).

Performance expectancy is a factor of confidence in the machine, the devices or systems that will affect the operation to have a strong direction from the original, which each person has a different level of confidence in. Effort expectancy is a factor in the belief that doing or trying something multiple times will result in better results based on the intention of using it. Each person has a different level of intention. Social influence is the factor that influences the acceptance of the current external environment and is influenced by the accepted praise or lead of a lower expert. Facilitating conditions are operational space factors ease of use or algorithms that will result in smoothness for users during use. This research will focus on social influence (SI) and facilitating conditions (FC), which are part of the external factors, because the researchers view these two factors as measurable factors from the external environment in the current situation (Herrero, Martín, & Garcia-De los Salmones, 2017).

Later, Venkatesh et al. (2012) developed the UTAUT2 theory to make it more appropriate and interesting in the consumer context of use. Further studies revealed that the main factors affecting behavioral intentions were performance expectations, effort expectations, social influences, facilitating conditions, hedonic motivation, price value, and habit. There are also gender, age, and experience as optional variables.

This article selected the Unified Theory of Acceptance and Use of Technology 2 (UTAUT2) as the main model with the context of hybrid office working for its hypothesis because it is the model with the most well-known behavior of human acceptance of the use of new technologies, which uses generation as a moderator variable in order to measure an employee’s intention to use technology in all current corporate environments.

4. Empirical Review and Hypothesis Development

Many articles employ the "Unified Theory of Acceptance and Use of Technology" (UTAUT2) as a model for external variables influencing the intention to use technology for hybrid office work. Researchers reviewed the literature and reached the conclusions in some of the articles hereinafter.

Antecedents and consequences of e-collaboration use in academic institutions are discussed by Lee (2019) and the sample group of people who order or buy food through the delivery app. The results show that performance expectations and habit are factors that positively influence consumers' continued use intent. Benjathikul's (2021) study examines the factors contributing to the success of future hybrid operations. It was found that effective information technology will affect the intention of planning to work in an appropriately integrated form, and the study by Suwansirisilp (2016) found that the performance expectation factor is a factor affecting the intention to use the service with PromptPay. In a study by Merhi, Hone, and Tarhini (2019), the expectations of efforts influenced the adoption of electronic payment systems. If there is little learning to use the system, it will result in an increased intention to use it. This can be seen from past studies by Marpaung et al. (2021), which found that the effort expectation factor influenced the intention to use mobile banking. A recent study by Sina et al. (2020) found that social influence was the most influential factor in the adoption to use. Furthermore, Faqih (2021) and Razif et al. (2020) discovered that the recommendation of friends or close people was beneficial, resulting in people's intention to use the technology as well. A study on the acceptance of teacher learning

management software under the application of Malaysia's UTAUT2 model by Raman and Don (2013) found that having facilities and motivation, such as good infrastructure, the government's initiatives, etc., resulted in teachers' intentions to use the system. In a study on the intentions of using electronic payment systems via mobile devices among people in China, Khan, Hameed, and Khan (2017) found that the facilitating conditions are an important factor that affects the intention of use. Likewise, Chen et al. (2021) found that facility condition factors affect personal cloud service intentions. Compared to financial transactions through other channels, it may affect consumers' willingness to use the service. Research by Rungsiyarom (2017) found that paying for 3G internet to access the SCBEASY application is worth the money. Similarly, research by McCloskey and Bennett (2020) found that the price, value, and habit of artificial intelligence technology devices influence behavioral intentions, making products look valuable in the eyes of consumers and creating credibility and trust to use them more. The result of a study by Pasaribu (2021) based on technology adoption and use theory (UTAUT2) on students' behavioral intentions in conducting mobile financial transactions amid the coronavirus pandemic found that hedonic motivation influences willingness to adopt technology. A study by Aswani et al. (2018) found that user age is a key factor driving the digital gap. According to the findings of an Indian study, age is an important determinant of willingness to use or not use mobile and internet technology. People over 50 years old have a low frequency of internet usage. On the other hand, those who have been born in the last two decades are familiar with the Internet and mobile technology at work or at home and tend to use the technology more often. Therefore, young people use the Internet more than the elderly. Santosa et al. (2021) discovered that the emergence of social distancing and stay-at-home measures during the 2019 coronavirus outbreak has a direct impact on people. Many people, including baby boomers and generation X, are starting to use digital payments for online or offline transactions to reduce their interactions with others. It gathered data from users aged 40–74 who were just beginning to use digital payments during this pandemic, using a structural equation model to analyze the data. As a result, UTAUT indicators have a positive effect on user satisfaction, and user satisfaction has a positive effect on future usage intentions. The study by Sriyuknirund (2017) on Internet banking usage among male and female consumers aged at least 18 years who are domiciled in Thailand discovered that habituation with age as a diametrical variable affects willingness to use current operators' mobile phone service, which is consistent with Venkatesh et al. (2003)'s finding that the fundamental relationship of each theory has been brought together as a factor that affects technology adoption. It was found that age was an extension of the parameters that helped increase the accuracy of forecasting technology adoption and use.

According to a literature review of the definition and related concepts, previous research related to the factors influencing employees' intentions to use technology for hybrid office working. The following are hypothesized and depicted in figure 1.

H1: Performance expectations have a positive impact on the intention to use technology for hybrid office working.

H2: Effort expectations have a positive impact on the intention to use technology for hybrid office working.

H3: Social influences have a positive impact on the intention to use technology for hybrid office working.

H4: Facilitating conditions have a positive impact on the intention to use technology for hybrid office working.

H5: Hedonic motivation has a positive impact on the intention to use technology for hybrid office working.

H6: Price value has a positive impact on the intention to use technology for hybrid office working.

H7: Habit has a positive impact on the intention to use technology for hybrid office working.

H8: Factors of acceptance and use of technology have a positive impact on the intention to use technology for hybrid office working, with generation as a moderator variable.

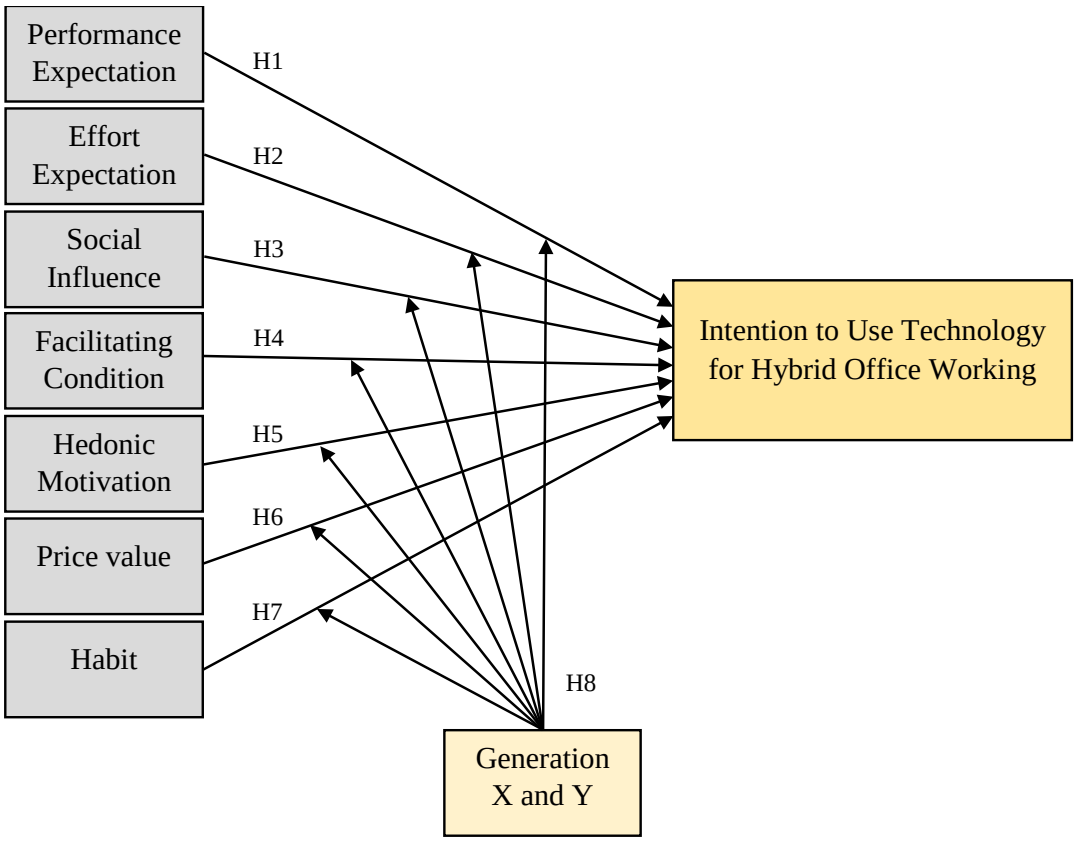

Figure 1 Research's Conceptual Framework

Conclusion

The purpose of this research is to demonstrate that performance expectations, effort expectations, social influences, facilitating conditions, hedonic motivation, price value, and habit are the important external variables that have a positive impact on intention to use technology for hybrid office working, with generation as a moderator variable. From the above models, the researcher can conclude that the extension theory model combines technology acceptance and the use of technology. It is an analysis of factors influencing technology acceptance and use behavior that can be rationally tested. The results can be described as the direct relationship and the indirect relationship. A distinctive feature of the model is the consideration of complementary variables, including age, gender, and user experience. This research examines the factors influencing the intention of using technology for working in a hybrid office, which is a new form of work in which one works both at work and at home. As a result, the adoption and use of context-sensitive technologies must be considered. According to the principles of UTAUT2, it uses a variety of criteria. This study attempted to link performance expectations to effort expectations and to cover individual attitudes and skills. It also includes social influence to gain momentum and hope that new technologies should be used and become intrinsically motivated by the perception that using technology is enjoyable or pleasurable. This study suggests that smart technology choices will automatically promote ease of use and habituation. This is especially true at a time when the intention is to use hybrid office technology to deal with the uncertainty in the coronavirus disease 2019 pandemic, which is driven by the employee's age range. This increases the forecasting accuracy of the model, allowing it to be more efficient.

Recommendation

This study is a review of the literature on the factors influencing intention to use hybrid work technology. Previous research found that performance expectation, effort expectation, social influence, facilitating conditions,

hedonic motivation, price value, and habit, with generation as a moderator variable, had a direct impact on the intention to use hybrid work technology of the employee.

The following phase, a quantitative study and analysis utilizing a structural equation model, is planned by the researcher. Employees from industrial companies that produce electricity will participate in the study. This is a job that requires a lot of knowledge and skills from the employee. Calculate a sample size of 200 people, or 20 times the observable variable. This is consistent with Hair et al.'s (2010) suggestions for determining the appropriate sample size for structural equation model analysis. Before collecting data, the questionnaire will be tested for content validity by having three experts evaluate the IOC values and reliability by trying it out with 30 samples that are close to the populations. As a result of the findings of this research, executives and other interested parties can utilize the study's findings to plan work or figure out how to train people in the future to improve performance.

The Influence of Transformational Leadership, Innovation Climate and Employee Engagement on Innovative Work Behavior of Employees

Paramaporn Tansukchai[1]
Jutamard Thaweepaiboonwong[2]

Abstract

This academic paper is a literature review that aims to explore conceptual factors and influences on innovative work behavior. The results showed that the factors influencing innovative work behavior were transformational leadership, innovation climate, and employee engagement. Employees' innovative work behaviors are critical in guiding an organization to become a sustainable innovation organization. From the review of literature, the factors affecting innovative work behavior are as follows: transformational leadership, innovation climate, and employee engagement. This article aims to apply the results of the study to improve management appropriately and develop the organization to be effective, as well as provide guidelines for studying or conducting research for interested parties from the conceptual framework. The study presented the following six hypotheses and recommendations for future research.

Keywords: Transformational Leadership, Innovation Climate, Employee Engagement, Innovative Work Behavior

Introduction

Nowadays, technology is advancing rapidly. This rapid change affects both the individual and organizational levels. The rapid development of technology makes our world narrows. The way of life of people has changed from before. There has been a change in the surroundings in terms of economy, society, politics, and environment. The volatile and unstable conditions are a key drivers of increased business competition. Organizations must adapt to the changes that occur. Human beings are inevitably involved in such changes. At the same time, the dramatic change in the present world condition gives organizations the opportunity to create new innovations that will enhance their competitiveness. For the organization to survive and have the potential to compete in the long term, advances in innovation are key factors in ensuring organizational competitiveness and long-term survival. The organization, therefore, needs to be committed to recruiting and developing human resources with higher skills and knowledge to support the changing business practices. Because human resources are very important in bringing the organization's ability to change into an innovative organization. Innovative work behavior is thus required to lead the organization toward sustainable innovation organization. Innovative work behavior refers to the behavior of a person with the direct aim of creating new ideas and using them to bring benefits to new work processes with clear objectives. Innovative behaviors can be linked to different departments in the innovation management process to create innovations. (Sivanun Sivapitak, 2011) In addition, innovative work behavior is defined as the expression of a person's desire to enhance creativity by seeking new innovations to improve work processes and problem solving in new ways. Along with the development of new products or

[1] MBA Student, Faculty of Management Sciences, Kasetsart University, Sriracha Campus 199 Moo 6 Sukhumvit Road, Sriracha, Chonburi 20230, Thailand. Tel: +66-99-1206-660, E-mail: paramaporn.ta@ku.th

[2] MBA Teacher, Faculty of Management Sciences, Kasetsart University, Sriracha Campus 199 Moo 6 Sukhumvit Road, Sriracha, Chonburi 20230, Thailand. Tel: +66-81-634-5136, E-mail: jutamard.t@ku.th

services as well as innovative work behaviors, creativity will result in innovation in the organization, which will result in the organization being able to improve efficiency, maintain operational quality, and respond to the needs of customers appropriately. Helping organizations increase their competitiveness can lead to long-term sustainability. (De Jong & Hartog, 2010) For this reason, organizations are trying to support the innovative work behaviors of their employees. Due to corporate management in today's rapidly changing technology era, organizations need to be ready and able to adapt at all times. They also need to be aware of the organization's customer retention by seeking new innovations that meet the changing needs of customers. as well as being aware of creating competitive potential that is superior to competitors. (Bettencourt, Brown & Sirianni, 2013) to drive and enhance the ability of the organization to profit and grow. That is why, Innovative work behavior is a critical factor for the success and sustainability of an organization.

In summary, this article reviewed the research literature on innovative work behavior in terms of meaning, key points, principles, and factors affecting innovative work behavior in order to formulate a theoretical model. This leads to the creation of a conceptual framework for further relevant research.

Research Objective

The purpose of this study was to analyze the level and the influence of transformational leadership, innovation climate, employee engagement, and innovative work behavior. The results of the study can be used as a guideline for executives and the human resource management department in managing human resources within the organization to be effective and consistent with the needs of employees in order to achieve operational efficiency in the future.

Literature Review

1. Innovative Work Behavior

"Innovative work behavior" was first used in West & Farr's (1990) psychological research, which describes the term as arising from two actions: creativity and realization. (West and Farr, 1990). In 1994, Scott & Bruce have proposed “Innovative work behavior” start with Problem Recognition, New Idea or Solution Generation, Seeks Ways to Idea or Solution Promotion and the last step is Idea or Solution Realization. Later, as the concept of innovative work behavior became more widely studied, many researchers tried to define the study of innovative work behavior differently. Janssen (2000) defined innovative work behavior as the intention to create new ideas and introduce or apply those new ideas to work. The purpose is to bring benefits to working in that role. Afterwards, De Jong and Den Hartog (2003) defined innovative work behavior as a willingness to initiate and introduce new ideas. new product or a new process This includes improving existing products or processes. Similarly, Spiegelaere et al. (2012) defined innovative work behavior as the behavior of employees who suggest or apply ideas, processes, products, and work procedures that occur within a role, group, or organization to be used with relevant agencies according to the benefits in various fields. (Spiegelaere et al., 2012). Most researchers agree that innovative work behaviors are helpful. Innovation is what makes an organization efficient and competitive. However, nowadays, the world is changing rapidly. Make organizations want more innovation. Therefore, for each organization to achieve better innovation, it will require an increase in the innovation behavior of employees, both quantitatively and qualitatively. (Gumusluoglu & Ilsev, 2009)

The definitions section of this article uses the definitions presented by Sivanun Sivapitak (2011), which Innovative work behavior can be divided into four elements according to the concept of as follows: (1) Employee creativity means change caused by knowledge, employee experience, and employee knowledge that develops products or services to make the organization successful. (2) Employee innovativeness refers to the behavior of new combinations of employees that can create value for products or services, including the working process of the organization. (3) Proactive behavior means trying to find opportunities and the ambition to succeed in the job

and to grow by being a pioneer, daring to change or start something before other employees or organizations. (4) Opportunity exploration refers to the behavior of attempting to find a way to do something by seeking new knowledge and analyzing chances to improve operations to improve products or services and work processes within the organization.

2. Transformational Leadership

Burns (1978), Bass and Avolio (1994), and Paul (1997) define transformational leadership as the process by which the leader influences employees by transforming the efforts of employees above and beyond the expected efforts, improving the abilities of employees, including making employees aware of the mission and vision of the organization. In conclusion, transformational leadership is the behavior of a leader who influences employees to create an effort to develop employees to their highest potential, inspires employees to be more effective, and motivates employees to be committed to the mission and vision to achieve the goals of the organization. Transformational leadership can be divided into 4 elements according to the concept of Bass and Avolio (1994) as follows: (1) Idealized Influence refers to a leader who acts as a respected role model. They have a vision and can pass it on to their followers. as well as being able to control emotions in critical situations and behave in a moral and ethical manner. Avoid using power for personal gain and act for the common good. Leaders must also have intelligence, determination, and idealistic perspectives. In addition, leaders must take pride in the loyalty and confidence of their employees. Make employees feel united. (2) Inspiration Motivation means that leaders give employees the opportunity to set the vision and goals of the organization to make employees feel important and part of it. Leaders motivate employees to realize the importance of performance, be enthusiastic and have a good attitude. A good leader must continually build employee morale when trying to achieve goals. (3) Intellectual Stimulation means that leaders motivate employees to seek new approaches to solving problems and innovating, as well as motivating and supporting new ideas from employees and encouraging employees to realize that obstacles can be solved. (4) Individualized Consideration refers to the leadership taking care of employees individually. Leaders will be coaches and mentors, as well as promote and develop the potential of their followers to be better. In addition, the leader gives the followers the opportunity to learn new things.

3. Innovation Climate

The definition of an innovation climate is a setting within an organization that raises employee awareness of the value of innovation and encourages employees to be creative in developing new products and services. This will result in the innovative work behavior of employees. Make the work more efficient and respond to the needs of the organization. According to the concepts of De Dreu and West (2001), De Jong and Den Hartog (2007), Yuan and Woodman (2010), and Sivanun Sivapitak (2011), the innovation climate can be divided into three elements as follows: (1) Participatory safety refers to employees' perceptions of workplace safety. Employees should not be penalized for thinking of new things or doing things differently than they used to. (2) Striving for excellence is an employee effort that relates to excellence at work. It has been reviewed and improved based on continuous positive performance under innovation. (3) Support for innovation is the support of employees' efforts to introduce new methods or ideas used in their work.

4. Employee Engagement

The definition of employee engagement refers to the feelings and behaviors of employees that are consistent with the organization as well as employees who are ready to work successfully and achieve the goals of the organization (Institute for Employment Studies, 2004; Woodruffe, 2006). Employee engagement can be divided into three elements according to the concept of Bakker and Schaufeli (2008) as follows: (1) Vigor refers to a person's manifestation of energetic determination with the ability to mentally adjust to flexibility while performing work, willing to put all their effort into the work and have patience with obstacles and difficulties at work. (2)

Dedication means that a person is dedicated to their work by recognizing their work as important and challenging. As well as being enthusiastic and feeling proud of the work, including trying to find new knowledge to improve oneself and the organization, (3) Absorption refers to a person's full concentration and enjoyment at work regardless of the length of time spent and the difficulty of the work performed. There is a feeling that work is part of life.

Empirical Review and Hypothesis Development

1. Transformational Leadership and Innovation Climate

Sagnak et al. (2015) conducted research on transformational leadership and innovative climate: an examination of the mediating effect of psychological empowerment. The study sample consisted of 303 teachers working in Eskisehir Central Secondary School. It has been found that transformational leadership has a positive influence on the innovation climate. It was also found that psychological empowerment partially mediates the relationship between transformational leadership and an innovative climate. Similarly, Puni et al. (2022) studied the mediating role of innovation climate on the relationship between transformational leadership and firm performance with 400 employees in 10 selected manufacturing companies in Ghana. The findings indicate transformational leadership has a significant positive association with an innovative climate. The results of the study support the view that transformational leaders motivate their followers with intelligence, promote innovation, and provide individualized development to accelerate employee creativity and creative behavior. In the year 2011, Sivanun Sivapitak also studied innovation management in business organizations, affecting employees' innovative behavior. The sample consisted of 116 top managers and 890 employees. The results demonstrated that transformational leadership, which consisted of four dimensions: idealized influence, inspiration, motivation, intellectual stimulation, and individualized consideration, is positively correlated with the innovation climate.

2. Transformational Leadership and Employee Engagement

Thisera and Sewwandi (2018) studied transformational leadership and the leadership of 245 executive-level employees working in the hospitality sector in Sri Lanka. and found that there are statistically significant and positive correlations between transformational leadership and employee engagement. Rafia, Sudiro, and Sunaryo (2020) investigated the effect of transformational leadership on employee performance, mediated by job satisfaction and employee engagement. The participants in this study were 77 employees in the department of public housing and settlement areas of Central Java Province. and discovered that transformational leadership has a significant and positive effect on employee engagement. Similarly, Fransiska, Ahadiat, and Hayati (2021) investigated the impact of transformational leadership on employee engagement: the mediation of work-life balance among 107 employees of PT XYZ Bandar Lampung Branch, PT XYZ Pringsewu Branch, and PT XYZ Kotabumi Branch in Indonesia. The study found that transformational leadership can positively affect employee engagement and also found that work-life balance has a mediating role in the positive and significant effect of transformational leadership on employee engagement. This means that the better the application of transformational leadership, being mediated by work-life balance, the better the employee engagement shown will be.

3. Transformational Leadership and Innovative Work Behavior

Imran, Zaheer, and Noreen (2011) conducted research on transformational leadership as a predictor of innovative work behavior moderated by gender. The sample consisted of 320 managers from the top telecommunication organizations in Pakistan. The findings indicate there is a positive and significant relationship between transformational leadership and innovative work behavior. Furthermore, it was also found that gender moderated the relationship between three facets of transformational leadership (attribution, charisma, inspirational leadership, and intellectual stimulation) and innovative work behavior. According to the study by Li et al. (2019), the influence of transformational leadership on employees' innovative work behavior in sustainable organizations: a test of mediation and moderation processes with a sample of 281 multinational organization employees in China,

the results found that there is a positive and significant relationship between transformational leadership and employees' innovative behavior. Furthermore, the relationship between transformational leadership and employees' innovative behavior moderated by empowerment, which means that the relationship between transformational leadership and innovative work behavior becomes stronger at a higher level of empowerment. Similarly, Setiawan et al. (2020) investigated boosting innovative work behavior in local branded fashion by studying the variables of transformation leadership, innovation work behavior, and psychological empowerment. The participants in this study were 100 employees working in a local fashion business in Indonesia. The results showed that transformational leadership has a positive effect on innovative work behavior.

4. Innovation Climate and Employee Engagement

Mejalli (2020) studied the relationship between organizational climate and employee engagement. The sample consists of 116 full-time nonprofit organization (NPO) employees working across four different divisions. It was found that there was a significant positive relationship between organizational climate and employee engagement. In the same year, Ali, Farooq, and Khalid (2020) studied the relationship between organizational climate for innovation and innovative work behavior: the mediating role of employee engagement. The sample consists of 210 employees in Pakistan. The findings indicate the organizational climate for innovation is positively related to employee engagement. On the contrary, Teepapal (2020) studied the relationship between employee involvement, employee engagement, and innovative work behavior and the mediating role of organizational context of employees in a Thai organization with 400 employees of firms that had obtained the Thailand Trust Mark (TTM) issued by the Ministry of Commerce Thailand. The findings indicate insignificant and negative results from indirect effects of employee engagement through organizational context, which corresponds to the results of the study by Allameh, Shahriari, and Mansoori (2012). They investigated employees' attitudes toward organizations, organizational climate, and employee engagement as antecedents of organizational citizenship behavior with 220 bank employees in Australia and found that the relationship between organizational climate and employee engagement did not reach significance.

5. Innovation Climate and Innovative Work Behavior

Onhon (2019) investigated the relationship between organizational climate for innovation and employees' innovative work behavior in the Turkish ICT sector with 270 employees. The results showed that the relationship between the organizational climate for innovation and innovative work behavior is significant because employees’ innovative work behavior is explained by their perception of the organizational climate for innovation. Ali, Farooq, and Khalid (2020) also studied the relationship between organizational climate for innovation and innovative work behavior; the mediating role of employee engagement. The sample consists of 210 employees in Pakistan. It has been found that the organizational climate for innovation is positively related to innovative work behavior. Ahmed, Ata, and Abd-Elhamid (2019) looked at the relationship between leadership behaviors, organizational climate, and innovative work behaviors in 384 nurses at Zagazig University Hospitals. The findings indicate that organizational climate has a positive effect on innovative work behavior. From the review of the relevant literature, it can be seen that innovation climate is a significant predictor of employees’ innovative work behavior.

6. Employee Engagement and Innovative Work Behavior

Swaroop and Dixit (2018) studied employee engagement, work autonomy, and innovative work behavior with 267 employees from various organizations in India. It was found that there is a positive and significant correlation between employee engagement and innovative work behavior. The result suggests that engaged employees are intrinsically inclined towards greater innovative behaviour at work. Li et al. (2019) studied the influence of transformational leadership on employees' innovative work behaviors in sustainable organizations: a

test of mediation and moderation processes with 281 multinational organization employees in China. The results show that work engagement is positively associated with innovative work behavior. In the same year, Zyl et al. (2019) investigated work engagement and task performance with 232 employees in a global ICT consulting firm within the Netherlands. The findings revealed that employee engagement had a significant positive impact on innovative work behavior. Should employees experience work engagement, it may activate the innovative work-related behaviors of employees.

According to a literature review of the definition and related concepts, previous research related to the factors Transformational Leadership, Innovation Climate, Employee Engagement and Innovative Work Behavior. The following are hypothesized and are shown in Figure 1.

Hypothesis 1: Transformational leadership has a positive influence on the innovation climate.

Hypothesis 2: Transformational leadership has a positive influence on employee engagement.

Hypothesis 3: Transformational leadership has a positive influence on the innovative work behavior of employees.

Hypothesis 4: The innovation climate has a positive influence on employee engagement.

Hypothesis 5: The innovation climate has a positive influence on the innovative work behavior of employees.

Hypothesis 6: Employee engagement has a positive influence on innovative work behaviors of employees.

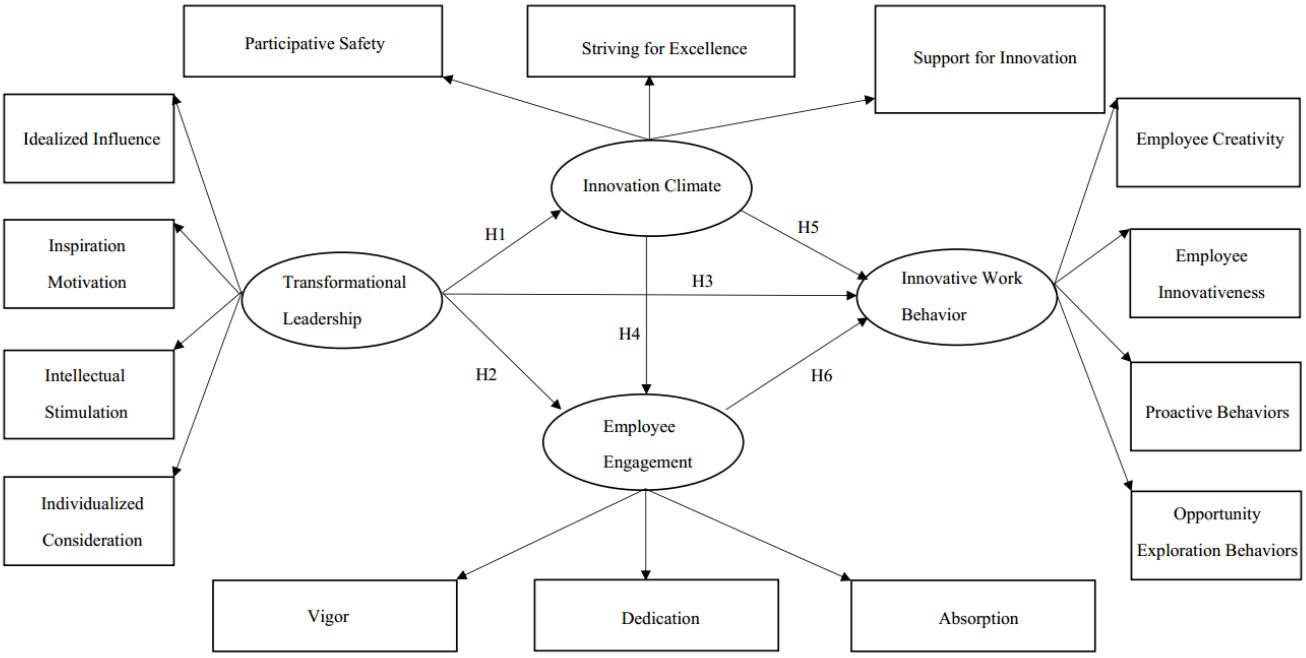

Figure 1: Conceptual Framework

Conclusion

From the literature review, the influence of transformational leadership, innovation climate, and employee engagement on the innovative work behavior of employees can be used as a guideline to promote leadership behavior that will lead the organization to future success. Moreover, it can be applied as a guideline to improve the management of the organization to make the operation more efficient according to the needs of the organization, as well as to develop employees and make the organization more competitive and lead to long-term sustainability. It has been found that transformational leadership, innovation climate, and employee engagement were identified as factors influencing the innovative work behavior of employees, which can consider the results

of various factors in a way that is consistent with the innovative work behavior of employees presented in this article. The literature review led to hypotheses for future studies to examine using quantitative methods to verify the relationship between transformational leadership, innovation climate, employee engagement, and innovative work behavior.

Recommendation

This study is a review of the literature on the influence of transformational leadership, innovation climate, and employee engagement on innovative work behavior. Previous research has found that transformational leadership creates an innovation climate and employee engagement. It has a direct impact on the innovative behavior of employees. The following steps are quantitative and analytical studies using a structural equation model. The researcher plans to collect data from employees in a Power Plant Group Eastern of Thailand. The sample size was calculated for 210 people, or 15 times the observed variable. This is consistent with the recommendation of Hair et al. (2010) to determine the appropriate sample size for structural equation model analysis. Before collecting data, the questionnaire will be tested for content validity by having three experts evaluate the IOC values and reliability by trying it out with 30 samples that are close to the populations. From this research, executives and human resource management departments can use the research results to manage human resources within the organization to be efficient and consistent with the needs of employees and achieve operational efficiency. It is also useful for education among interested parties and for further research on transformational leadership. innovation climate, employee engagement and innovative behavior in the organization and related businesses in the future.

The Influence of Transformational Leadership, Psychological Capital, and Psychological Empowerment on Innovative Work Behavior of Employee in a Company in Petrochemical Industry, Map Ta Phut Industrial Estate, Rayong Province

Rawinnipha Sawanglok[1]
Jutamard Thaweepaiboonwong[2]

Abstract

This article's purpose is to offer a conceptual framework for understanding the relationship among transformational leadership, psychological capital, psychological empowerment, and creative workplace behavior. A review of related academic research studies from 2014 to 2022 was conducted. The results of this study demonstrate that transformational leadership, psychological capital, and psychological empowerment have a positive influence on innovative work behavior. According to the findings, five hypotheses for testing with quantitative methods are stated to explore the significance of such relationships in specific contexts in further research. The results of the study will be able to provide a guideline for executives to consider appropriate policies for improving employees' innovative work behavior in the future.

Keywords: Transformational Leadership, Psychological Capital, Psychological Empowerment, Innovative Work Behavior

Introduction

Innovation is very important to the growth of an organization because it gives the organization the ability to compete and increase its competitive advantage in an era of rapid changes in society, economy, environment, or technology. This makes the organization aware of the need to change the organization's characteristics or behavior to survive and be able to compete with competitors. The minds of individuals can lead to innovative work behaviors. (Den Hartog & De Jong, 2010) The organization needs to innovate or create something different that is a factor in employees' having innovative behavior. This will be beneficial to the development of the organization and the organization's potential in business competition. Many things can influence innovation. But human resources are the most crucial element. Employees are therefore the most crucial component of a business for enhancing creativity. because employees come up with new solutions and implement them to avoid or resolve issues. Additionally, it enhances the company's operational efficiency. As a result, the company must take all reasonable steps to support its employees' innovative work behavior. Therefore, the researcher intends to examine the effects of transformational leadership, Psychological Capital, Psychological Empowerment on Innovative Work Behavior

In conclusion, this article reviewed the literature on innovative work behavior in terms of definition, main points, the principles and factors affecting innovative work behavior to define a theoretical model, leading to the building of a conceptual framework for further relevant research.

Literature Review

Researchers conducted a review of transformational leadership, psychological capital, psychological empowerment and innovative work behavior on concepts and definitions to answer research questions. The main concepts, in brief, are as follows:

2.1 Innovative Work Behavior

Innovative work behavior is the characteristic of generating new ideas that can solve problems and finding new ways of operation to be more efficient and effective in accordance with the goals of the organization. As De Jong and Den Hartog (2010) said, the behavior of a person with the direct aim of initiating something new, the introduction of new ideas that are beneficial to the purposeful production of new products, services, and work processes It led to the creation of innovative behavior. Individual people can be innovative at task by formulating new methods of performing their duties, thinking up novel procedures and ideas, and rerouting known methods into new alternatives (Prieto and Perez-Santana, 2014). A group of behaviors that introduce new ideas that can be developed and implemented with the goal of improving employee and organizational performance is referred to as innovative work behavior. (Jong and Hartog, 2007).

Innovative work behavior is divided into four elements according to the concept of De Jong and Den Hartog (2010) as follows: (1) Idea exploration refers to developing new ideas that are applicable in all aspects. At this stage, problems related to inconsistent and discrete work are recognized, which is a trend that arises to promote new ideas (2) Idea generation refers to creating ideas for improvement purposes by researching methods, techniques, or new working tools, come up with creative solutions for work and find new ways to manage important things, generate new ideas to solve problems or to improve performance. (3) Idea championing refers to behaviors related to finding support and building coalitions, such as motivating and influencing other employees. To develop innovative concepts, one must first gain acceptance or support from colleagues, and then attempt to persuade participants to support such innovative ideas and make the executives enthusiastic about creative thinking in the department. (4) Idea implementation refers to improving existing products or practices or developing new products, which is a behavior related to a person's efforts to develop a chosen idea into a new concept that can be put into practice now that it is part of the working process.

2.2 Transformational Leadership

Transformational leadership is a leadership trait that demonstrates the ability to arouse the interest of coworkers and others in new aspects of work and to raise awareness of the team's and organization's mission and vision. including the development of colleagues' and followers' abilities to a higher level of potential Transformational leadership inspires associates and followers to think beyond their own interests in order to pave the way for the greater good. Transformational leadership, on the other hand, will persuade followers to work more effectively than their followers initially intended. And they frequently use challenges to lead them to higher levels of achievement (Bass and Avolio, 1994).

The process by which leaders influence their colleagues consists of four behavioral elements according to the concept of Bass and Avolio (1994) as follows: (1) Idealized influence means Leaders act as models for their followers. Leaders will demonstrate intelligence. Competence, willpower, and self-confidence in followers encourage a sense of unity in achieving the desired goals. Followers imitate leaders and their actions by developing self-confidence. As a result, leaders maintain their influence by achieving organizational goals and meeting organizational obligations. (2) Inspiration motivation means motivating intrinsic devotion, commitment to goals and showing confidence to achieve them. Leaders encourage team spirit to come alive, show enthusiasm by creating a positive attitude and thinking by the way that leaders help followers to overlook results. (3) Intellectual stimulation encourages followers to recognize problems as they arise, seek methods or solutions, start something

new and creative, and try to solve problems in novel ways. Leaders are encouraged to let followers express their thoughts and reasons. (4) Individualized consideration refers to making followers feel valued, important, and cared for, and understanding and accepting the differences and needs of each person. Leaders will take care of their followers if they need advice, support, or help.

2.3 Psychological Capital

The term capital has been used to represent the value of human resources (human capital).We simply use the term psychological capital here to represent individual motivational propensities that accrue through positive psychological con-structs such as efficacy, optimism, hope, and resilience. Psychological capital refers to a state-like psychological feature that could learn and develop (Luthans, Youssef, and Avolio, 2007)

Psychological capital is divided into four manifestations according to the concept of Luthans, Youssef, and Avolio (2007) as follows: (1) Self-efficacy is the state of being confident in one's own abilities, knowledge, and skills to successfully complete difficult tasks. (2) Optimism means having a positive view of what will happen in the present and the future and believing that it is under your control by setting goals for yourself. (3) Hope means having the idea that they can find a way to achieve the desired goals and having the motivation to aim for the goal of success. (4) Resilience means that when faced with problems and adversity, one never gives up and returns to the original or better condition in order to achieve success.

2.4 Psychological Empowerment

Psychological empowerment refers to one's intrinsic motivation towards roles and tasks performed through a cognitive process that reflects personal beliefs, values, and personal behaviors (Spreitzer, 1995). Psychological empowerment is viewed from the perspective of an individual employee, which is related to cognitive control. performance perception and connection personal goals and organizational objectives (Menon, 1999).

According to the concept of Spreitzer (1995), psychological empowerment is the intrinsic task motivation of employees that is expressed in the four job-related cognitions of meaningfulness, competence, self-determination, and influence. (1) Meaningfulness refers to a perception of the value, goal, or purpose of the work. (2) Competence means a person's belief that they have the expertise and ability to work to achieve goals. (3) Self-determination refers to a person's belief or perception that they have the ability to initiate and control their own actions, thereby demonstrating their autonomy to initiate and maintain their own work, including decisions and effort spent on the work. (4) Impact is an individual's perception of the level of influence they have on work results in terms of strategy, management, or operations.

2.5 Related literature

2.5.1 Transformational Leadership and Innovative Work Behavior

Setiawan et al. (2020) studied the relationship between transformational leadership and innovative work behavior. The study sample consisted of 100 employees from local branded fashion businesses in Indonesia. . It has been found that transformational leadership has a positive influence innovative work behavior. This study has determined the concept of psychological empowerment fills the research gap between transformational leadership and creative work behavior in this study. and Afsar et al. (2014) studied the impact of transformational leadership on innovative work behavior. The study sample consisted of 639 followers and 87 leaders from cross-industry sample of five most innovative companies of China. The findings revealed that psychological empowerment mediated the relationship between transformational leadership and IWB. The study found that transformational leadership has a positive impact on IWB, which includes both idea generation and idea implementation. The findings also revealed that the relationship between transformational leadership and IWB was stronger in employees with a higher interdependent self-construal and a lower independent self-construal. Furthermore, a study Santoso et al. (2019) studied the effects of transformational leadership on innovative work behavior. The study sample consisted of 235 participants with managerial level and above from various

telecommunication companies across Indonesia. It has been found that transformational leadership has a positive influence on innovative work behavior. The study has result indicated a positive and significant relationship between creative self-efficacy, transformational leadership, and innovative work behavior, that innovative work behavior was positively related to performance, and that digital literacy had a significant moderating influence on the relationship between innovative work behavior and performance.

2.5.2 Psychological Capital and Innovative Work Behavior

The study by Chen et al. (2021) with 345 employees, conducted in Chinese cities (Shanghai, Beijing, Guangzhou, Wuhan, etc.) engaged in information technology (IT), testing and certification, research and development (R&D), management, and other sectors, found that psychological capital has a positive impact on innovative work behavior. This study has indicated that knowledge donating and knowledge collecting played a chain mediating role between psychological capital and innovative work behavior. The study's results align with the research of Purwanto et al. (2021), who studied the effects of psychological capital on innovative work behavior with a sample consisting of 195 employees of a manufacturing company in Indonesia. The results of this research are authentic leadership style and psychological capital have a positive and significant effect on innovative work behavior. Psychological capital as a mediator for the relationship between authentic leadership style and innovative work behavior. and Hsu and Chen (2015), with 781 employees in 16 organizations in Taiwan, they study the relationship between organizational innovation climate and employee innovative behavior with employee psychological capital as mediator, found that organizational innovation climate and employee psychological capital significantly affect employee innovative behavior.

2.5.3 Transformational Leadership and Psychological Empowerment

Pranee et al. (2016) studied the impact of transformational leadership and psychological empowerment. The study sample consisted of 408 staff nurses at eighty-three General hospitals in Thailand, The findings of this study revealed that the transformation leadership of Head nurse had positive direct effects on organizational culture and Psychological Empowerment Tsang et al. (2022) studied the relationship between of transformational leadership and psychological empowerment. The study sample consisted of 339 primary and secondary school teachers in China. The results of this research is transformational leadership and psychological empowerment negatively predicted teacher burnout, and the transformational leadership–teacher burnout relationship was mediated by psychological empowerment. And Sagnak et al. (2015), who studied the relationship between of transformational leadership and psychological empowerment. The research sample composed of 303 teachers working in Eskisehir Central Secondary School. It has been found that transformational leadership is significantly related to psychological empowerment and innovative climate. it has been determined that psychological empowerment partially mediates the relationship between transformational leadership and innovative climate.

2.5.4 Psychological Capital and Psychological Empowerment

Iqbal (2017) studied the relationship between psychological capital and psychological empowerment. The study consisted of 200 sample of teaching staff of higher education institutes in Pakistan. This research represents the first comprehensive attempt to examine the mediating role of psychological empowerment in the relationship between psychological capital and organizational commitment. The results show psychological capital has a direct and positive link with psychological empowerment. The results of the analysis further indicate that a positive and significant relationship between psychological capital and psychological empowerment. and Haji et al. (2022) studied the relationship psychological capital and psychological empowerment. The study sample consisted of 375 people who involved in the production practice (or can participate in production of goods or services), The results indicated

that direct effect of psychological capital on psychological empowerment was positive and significant, align with the research of Hassanzadegan et al. (2019) who studied the effects of psychological capital on psychological empowerment. This research was conducted in the Petrochemical Company in Asalouye, Iran. The samples in this study were 204 employees. It has been found that psychological capital had a significant effect on psychological empowerment.

2.5.5 Psychological Empowerment and Innovative Work Behavior

Diana and Sudarma (2021) studied the impact of psychological empowerment on innovative work behavior in employees of CV Mubarokfood Cipta Delicia. The samples in this study included 138 employees. The study's results show transformational leadership has positive and significant effect on innovative work behavior through psychological empowerment. And Nasir et al. (2018) who studied the impact of psychological empowerment on innovative work behavior. This study aimed to study the relationship between extent psychological empowerment and innovative work behavior. The study consisted of 250 sample of lecturers at the Syiah Kuala University, the results show psychological empowerment significantly affects innovative work behavior. and Arslan (2022) studied the relationship psychological empowerment on innovative work behavior. The study sample consisted of 700 employees working in the food and beverage departments of five-star hotel businesses in Antalya. It has been found that transformational leader had an effect on innovative work behaviors and psychological empowerment had a mediating role in this interaction.

Research Objective

1. To analyze the level of transformational leadership of supervisors, psychological capital psychological empowerment and innovative working behavior of employees at all levels in a company in Petrochemical Industry, Map Ta Phut Industrial Estate, Rayong Province

2. To analyze the influence of transformational leadership of supervisors, psychological capital and empowering psychological empowerment on innovative working behaviors of employees at all levels in a company in Petrochemical Industry, Map Ta Phut Industrial Estate, Rayong Province

Research Methodology

4.1 Target group

Employees at all levels in a company in the petrochemical industry, Map Ta Phut Industrial Estate, Rayong Province, with a total of 611 employees (information from the Human Resources Management Department as of June 23, 2022).

4.2 Sampling

Employees at all levels in a company in the petrochemical industry, Map Ta Phut Industrial Estate, Rayong Province, which is determines the sample size used in this research is equal to 352 people. A set of Questionnaires was used to collect data from a sample of 320 people. Simple Random Sampling by Lottery However, the sample size for answering the questionnaire was increased by 10% from the actual sample size to avoid loss and incompleteness of a Questionnaire. The researcher used a Proportional Stratified Random Sampling according to the proportion of the population in the company. Then a simple random sampling by Lottery to distribute questionnaires according to the proportion of the sample group of 352 people.

4.3 Tools

The researcher studied and researched information from textbooks, academic journals, and related research both to collect data and various details to guide the questionnaire's construction. The questionnaire is divided into 6 sections, as follows:

Part 1: Questionnaires about general information: age, gender, education level, job position and age of work of Employee in a Company in Petrochemical Industry, Map Ta Phut Industrial Estate, Rayong Province within closed-ended questions.

Part 2: Questionnaires about transformational leadership

Part 3: Questionnaires about psychological capital

Part 4: Questionnaires about psychological empowerment

Part 5: Questionnaires about innovative work behavior

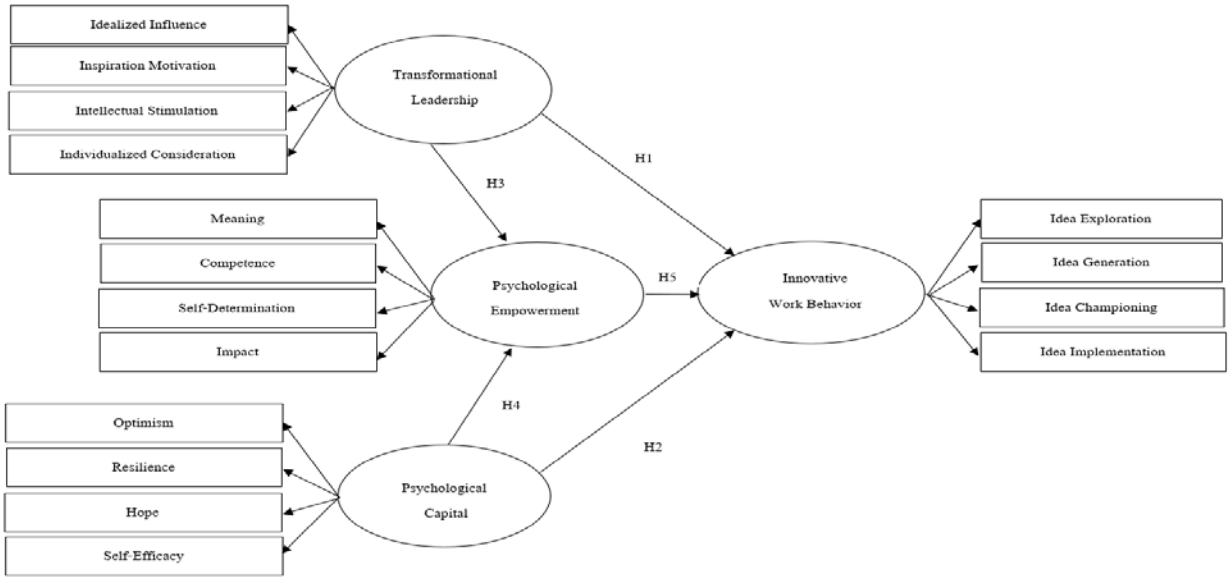
Part 6: Opinions and suggestions about the factors that effect to employee's innovative work behavior

Conclusion

After the literature review, the effects of transformational leadership, psychological capital, psychological empowerment, and innovative work behavior were identified. It can be used as a guideline to encourage and develop the innovative work behaviors of employees, which will have a high benefit for the organization in terms of human resource management. Moreover, it can be applied as a guideline to improve the company's human resource management strategy and promote transformational leadership behavior and psychological capital for employees to create innovative working behaviors. As a result, employees can create new objects or programs, which is beneficial to the organization. Furthermore, it's a guide for those who are interested in studying the knowledge of transformational leadership, psychological capital, psychological empowerment, and innovative work behavior. The literature review led to hypotheses for future studies to examine using quantitative methods to verify the relationship between transformational leadership, psychological capital, psychological empowerment, and innovative work behavior. In order to further research, the hypotheses are as follows:

Hypothesis 1: Transformational leadership has a positive influence on innovative work behavior.

Hypothesis 2: Psychological capital has a positive influence on innovative work behavior.



Hypothesis 3: Transformational leadership has a positive influence on psychological empowerment.

Hypothesis 4: Psychological capital has a positive influence on psychological empowerment.

Hypothesis 5: Psychological empowerment has a positive influence on innovative work behavior.

Discussion

Regarding reviewing all the relationships between transformational leadership, psychological capital, psychological empowerment, and innovative work behavior, researchers describe them in the conceptual framework in figure 1. It includes academic journals and research results that support the above as follows: The relationship between Transformational Leadership and Innovative Work Behavior from Setiawan et al. (2020), Afsar et al. (2014), and Santoso et al. (2019). The relationship between psychological capital and innovative work behavior is explored by Chen et al. (2021), Purwanto et al. (2021), and Hsu and Chen (2015). The relationship between transformational leadership and psychological empowerment is explored by Pranee et al. (2016), Tsang et al. (2022) and Sagnak et al. (2015). The relationship between psychological capital and psychological empowerment from Iqbal (2017), Haji et al. (2022), and Hassanzadegan et al. (2019). The relationship between psychological empowerment and innovative work behavior is explored by Diana and Sudarma (2021), Nasir et al. (2018), and Arslan (2022).

Conceptual Framework

Figure 1: Conceptual Framework

Recommendation

1. The additional factors that affect to on innovative work behavior may be exist depend on the transformational leadership, psychological capital, and psychological empowerment.

2. In future studies, other types of data collection tools, such as interviews, may be used in combination with questionnaires to obtain more accurate and clear data.

3. This study's sample group is composed entirely of employee in a Company in Petrochemical Industry, Map Ta Phut Industrial Estate, Rayong Province. As a result, it is advised that those who are interested in the same subject study in a different industry.

The Relationship Between the Consumer Engagement and Consumer Brand Experience Affect Consumer Repurchase Intention of the Modern Retailer Convenience Store in Bangkok

Sopida Woranin[1]
Rawida Wiriyakitjar[2]

Abstract

Modern Retail is a large business that drives the global economy by being a prototype and sources of innovation and products, it might be the reason why many consumers have more choices to buy the product by purchasing online. Moreover, switch from centralized retail and from traditional to modern and most retail spending is concentrated in large cities (Guo, 2019). Thus, the retail business in Bangkok has a lot of investment and it has continued to expand more convenience stores which made the income grow rapidly in Thailand. Hence, the region is truly recovering from the economic downturn, as well as changes in consumer behavior in using online channels to buy products, there is a tendency to increase as well (Phutti, 2019). This study has focused on the consumers who decision repurchase intention in convenience stores such as 7-11, CJ Express Supermarket, Tesco Lotus, Mini Big C. The researcher will be aware of important variables in consumer repurchase intention as for the customer engagement, brand experience and social influence is there a direct result? Moreover, this paper will be creating the conceptualization and theory such as customer engagement, brand experience, social influence, brand love and value perception that came up to support the research in the part of literature review.

Keywords: Consumer Engagement, Consumer Brand Experience, Consumer Repurchase Intention, Modern Retail Convenience Store

Introduction

In Thailand, convenience stores have become a popular destination for grocery shopping, accounting for a significant portion of the packaged grocery market. In fact, over a third of all grocery sales in Thailand are made through this channel (Euromonitor International, 2020). This trend can be attributed to the busy lifestyles of shoppers in urban areas, who are looking for quick and convenient options that save time. Instead of making a trip to the traditional grocery store, they can stop by a convenience store to pick up a few items on the way home from work or while running errands. Additionally, the high levels of traffic congestion in major cities have encouraged people to do more frequent, small-scale shopping to meet their daily needs (Hawkins-Mofokeng et al, 2022). Convenience stores are well-suited for this type of shopping, as they are usually located in busy areas and offer a wide range of products

The convenience store business in Thailand has a relatively short history, having emerged in the late 20th century. The first convenience stores in Thailand were 7-Eleven stores, which were introduced to the country in 1989 by a franchise holder named CP All. 7-Eleven stores quickly became popular in Thailand due to their convenient locations and long operating hours, as well as the wide variety of products they offered. In the years that followed, other convenience store chains, such as Family Mart and Tesco Lotus, also entered the Thai market. These stores also focused on offering a wide range of products and services, including fresh food, drinks, snacks, and household items. Today, convenience stores in Thailand are a common sight and are found in most neighborhoods, serving

(Tel +662-697-6101 E-mail: rawida_wir@utcc.ac.th)

as a convenient destination for a wide range of products and services. They are particularly popular among younger consumers, who appreciate the convenience and variety of products that these stores offer.

The convenience store industry in Thailand has experienced significant growth in recent years. According to a report by the Thailand Convenience Store Association (TCSA), the number of convenience stores in Thailand increased from around 20,000 in 2014 to more than 35,000 in 2020. This rapid expansion has been driven by increasing demand from consumers and the expansion of major convenience store chains into new areas. The convenience store market in Thailand is highly competitive, with many domestic and international players vying for market share. Some of the largest convenience store chains in Thailand include 7-Eleven and Lotus go fresh, as well as local chains such as Mini Big C and CJ Express. These chains have a strong presence in the market and have been successful in attracting customers with their wide range of products, competitive prices, and convenient locations. The convenience store industry in Thailand is supported by favorable government policies, such as tax incentives for businesses operating in certain areas.

However, the convenience store industry has been impacted by the COVID-19 pandemic over the past couple of years. The Thai government has implemented measures such as lockdowns, travel restrictions, and social distancing guidelines in an effort to control the spread of the virus. These measures have disrupted many businesses and caused economic downturns in various sectors. Convenience stores, like many other businesses, have had to adapt to the challenges posed by the COVID-19 pandemic. The research company KResearch predicts that convenience store turnover will resume growth of approximately 13-15% year-on-year in 2022, due in part to the low base in 2021. Other factors contributing to this growth include an increase in consumer purchases at convenience stores, particularly by local office workers and foreign tourists, as well as price hikes on several consumer products and the remodeling of branch formats with more convenience stores becoming partners or being operated under the network of a large retailer. Despite these positive indicators, the convenience store industry may see slower turnover growth in 2022 due to uneven recovery in consumer purchasing power and intense market competition.

Research Objective

1. To develop the conceptual framework of the relationship Between the Consumer Engagement, Brand Experience, social influence, brand love and value perception Affect Consumer Repurchase Intention of the Modern Retailer Convenience Store in Thailand.

2. To investigate the indirect effects of Consumer Engagement, Brand Experience and social influence on Consumer Repurchase Intention and the direct effects of Consumer Engagement, Brand Experience and social influence on brand love and value perception which in turn affect Consumer Repurchase Intention.

3. To examine both overall models fit according to research framework and the relationships among Consumer Engagement, Brand Experience, social influence, brand love, value perception and Consumer Repurchase Intention by using the structural equation modelling (SEM)

Literature Review

Convenience store

Convenience store is a small retail outlet that is open for extended hours and is typically located in a convenient location for customers. Convenience stores usually carry a wide range of products, including food, drinks, snacks, household items, personal care products, and other everyday essentials. They are known for their quick and convenient service, as well as their accessibility and availability. Convenience stores may be owned by a larger retailer or may be independently owned and operated. They may also be found in urban, suburban, or rural areas, and may be standalone stores or part of a larger retail chain (Bainbridge, 2000; Hameli, 2018).

Customer engagement for modern retailer

Customer engagement has garnered significant attention among marketing scholars, with a variety of research being conducted in various contexts such as banking, hotels, and social media platforms (Maslowska et al., 2016; Vivek et al., 2014; Islam et al., 2019). It has also been emphasized in the realm of digital marketing, where digital platforms allow for increased interactivity and meeting of personal or mutual objectives (Islam et al., 2019). Despite the popularity of customer engagement among marketing practitioners (Sashi, 2012), it remains a complex concept that can be viewed in terms of short- or long-term exchange relationships. In the ASEAN region, especially Thailand, digitalization is driving changes in the customer service sector and making the purchasing experience enjoyable is important to consumers (Euromonitor, 2019). As a result, customer engagement can serve as a competitive advantage for modern retailers (Omar et al., 2021).

There has been a growing focus on consumer engagement in Thailand in recent years, as companies look for ways to connect with and build loyalty among Thai consumers (Puriwat & Tripopsakul, 2021). One key way that companies in Thailand are engaging with consumers is through social media and other digital channels (Calderón-Monge & Ramírez-Hurtado, 2022). These channels offer a number of opportunities for companies to interact with consumers in real-time and to gather data on consumer behaviors and preferences. In addition to using digital channels, companies in Thailand are also using experiential marketing techniques to engage with consumers (Bunpis & Haron, 2014). This can include events, promotions, and other activities that provide consumers with a tangible, immersive experience with a brand.

Word-of-mouth and recommendations from friends and family are also important factors in consumer engagement in Thailand (Puriwat & Tripopsakul, 2021). Thai consumers place a high value on the opinions of those they trust, and companies that can leverage word-of-mouth and social influence can be successful in engaging consumers in Thailand. Overall, it is important for companies in Thailand to understand the unique cultural and societal factors that influence consumer behavior and to develop marketing strategies that are tailored to the Thai market (Sharma & Singh, 2018).

Effective consumer engagement requires a shift in perspective and approach for both consumers and professionals. Hibbard et al (2009) have suggested that advocating for consumer engagement may require individuals to adopt new roles. It is important to note that there can be a wide range of perspectives on what consumer engagement is or should be within and across organizations, as well as between different consumers, staff members, and professionals (Fudge et al., 2011; Daykin et al., 2004). In order to effectively support research and implementation of consumer and community engagement, some have suggested the need for a more centralized approach (Dessart et al., 2016). This can help to ensure that the needs and perspectives of all stakeholders are considered and that engagement efforts are coordinated and effective. From the gaps in their literature mentioned above, the research questions are addressed accordingly.

Brand Experience in retailing

The concept of branding in the retail industry has undergone significant changes in recent years (Burt and Davies, 2010). In the past, branding was primarily associated with individual products, leading to the concept of a product as brand (Grewal et al., 2004). However, as the retail industry has evolved, the focus has shifted to the idea of the store as a brand, or a store as brand (Khan and Rahman, 2015). This shift highlights the importance of the physical store in creating a brand identity and experience for customers. More recently, the concept of a retailer as brand has emerged, which refers to the idea that retailers can be viewed as brands in and of themselves (Perrigot, 2006). Retail brands differ from service brands in that they offer both tangible products and, to varying degrees, services. While service brands focus primarily on intangible services, retail brands offer a combination of

both tangible merchandise and intangible services. This distinction is important because it highlights the unique branding challenges faced by retail brands and the ways in which they differ from service brands.

Consumers make purchasing decisions based on a variety of factors, including the value of the product itself as well as the experiential value provided by the retail brand (Mathwick et al., 2001). When consumers visit a retail brand to make a purchase, they are not just buying a product or service, but also experiencing the atmospheric elements of the retail environment, which can shape their perceptions and emotions (Nuttavuthisit, 2014). Effective management of these consumer experiences can provide retailers with a competitive advantage, increase customer loyalty, and strengthen the consumer-brand relationship. In recognition of the importance of consumer experiences, researchers have focused on examining how consumers interact with and perceive retail brands (Healy et al., 2007).

While the concept of retail brand experience has been defined, the methods of measurement have remained underdeveloped. While Brakus et al (2009) proposed a scale for measuring brand experience that includes sensory, behavioral, affective, and intellectual dimensions, the scale measures general brand experience, as it was tested using a variety of brands, including retail brands, in a series of studies. Ishida and Taylor (2012) tested the usefulness of this scale in a retail context and found that it may be necessary to expand upon the retail-specific aspects of brand experience beyond those used in Brakus et al (2009). Nuttavuthisit (2014) also emphasized the need for a deeper understanding of brand experience in the retail industry. Retail brands involve more experiences than general brands, as customers interact with the store, find merchandise, interact with store personnel, and return merchandise (Dabholkar et al., 1995). Additionally, the retail environment should be welcoming and inviting, allowing customers to try out products, ask questions, and learn about services without feeling pressure to purchase, which further distinguishes retail brand experiences from general brand experiences (Jones et al., 2010). The intensity and frequency of customer traffic is another important aspect of retail brand that sets them apart from other brands (Kent, 2003). These unique characteristics of retail brands necessitate the use of a separate scale to measure the experiences evoked by retail brands, rather than relying on general brand experience measures (Ailawadi and Keller, 2004).

The concept of Repurchase Intention

Kim et al. (2012) describe repurchase as a decision to buy products or services from the same seller that results from satisfaction with the products and services. For the decision can be caused by both internal and external factors, in the second part by the consumer. Hsu et al. (2015) explain that a repeat purchase is a situation in which a person buys a product more than once. The pattern of repeat purchases is diverse and consists of many factors that affect the rate of repeat purchases, such as factors of marketing activities like advertising, promotion, pricing, and shipping. Factors related to the type of products and brands. Factors of market share and distribution of products (penetration rate). Factors in the number of purchases per person and duration of purchases per time. Factors in the purchase of competing brands. Factors in cost of switching (switching costs) at the same level of brand. Factors in consumer attitudes toward brands and other specific factors such as appearance, demographics, etc.

Decision-making process for repurchases

1) Repeated solving: Repurchases often require ongoing problem solving due to many factors. The most important is that one is dissatisfied with the choice purchased in the past. To the point where there is a need to continually change brands. This may be due to the fact that the product is no longer in stock in the store. The buyer must weigh whether it is worth investing time and manpower to store elsewhere (Sianturi et al, 2019).

2) Habitual decision making: Repeated purchases may be due to habits that simplify decision making and allow consumers to better manage life's forces. Buying habits vary depending on the level of commitment and effort put into the product. It is therefore necessary to compare buying habits based on brand loyalty and those based on inertia (Crotts, 1999).

3) Brand loyalty: This is usually the case when the first decision is made and it appears that all parties involved in the sale of the product are trusted. This can be considered as a good news for consumers. Therefore, there is no incentive for consumers to change their behavior. Every time consumers are aware of their needs, they will buy that brand again and be loyal to the store. Even if it takes more time and cost due to the store's inconvenient location. Brand loyalty is deeply rooted because it comes from high involvement (Said, 2014).

4) Inertia: Habitual consumers are categorized as consumers who lack the commitment and effort required for these types of products. They believe that all brands are the same. But in reality, they do not change brands very often unless they are sold at a special price. This behavior is called inertia. It is a trait that does not last and is not brand loyal. But after buying the same brand over and over again until he finds that the one that is sold cheaper would switch. If he finds that someone is selling cheaper, he will switch indefinitely (Cui et al, 2021; Khajouei & Nayebzadeh, 2013).

In summary, repurchase intention is the consumer's decision to buy or receive services from the same service provider or producer. The result is that the consumer is satisfied with the product, good or service. The fact that consumers come back to buy again is considered a success for the sales of the manufacturer or service provider. This is because consumers have confidence in the product or service. It is the basis that the product or service is of good quality, suitable for the price the buyer has to lose, or worthwhile. Repeat purchases can be caused by external influences such as marketing promotions, packaging, and pricing. Including word of mouth or persuasion to create loyalty to the product or brand.

Contributions of the Study

The potential outcomes of a study on the relationship between consumer engagement, consumer brand experience, and consumer repurchase intention in the context of modern retailer convenience stores in Thailand could include the following: first, the study might find that there is a positive relationship between consumer engagement and consumer brand experience, such that consumers who are more engaged with a convenience store are more likely to have a positive brand experience. Second, the study might also find that there is a positive relationship between consumer brand experience and consumer repurchase intention, such that consumers who have a positive brand experience are more likely to intend to repurchase from the convenience store in the future. Third, the study might also examine the role of other factors that might influence consumer repurchase intention, such as the convenience store's product offerings, pricing, and location.

Integrated Conceptual Framework

The conceptual framework is important for integration to synthesized area of study in research paper. Building on the background literature reviewed to explain the research model. The study proposed that consumer engagement, brand experience and social influence have a relationship to repurchase intention through the mediating effect of brand love and value perception as shown in Figure 1.

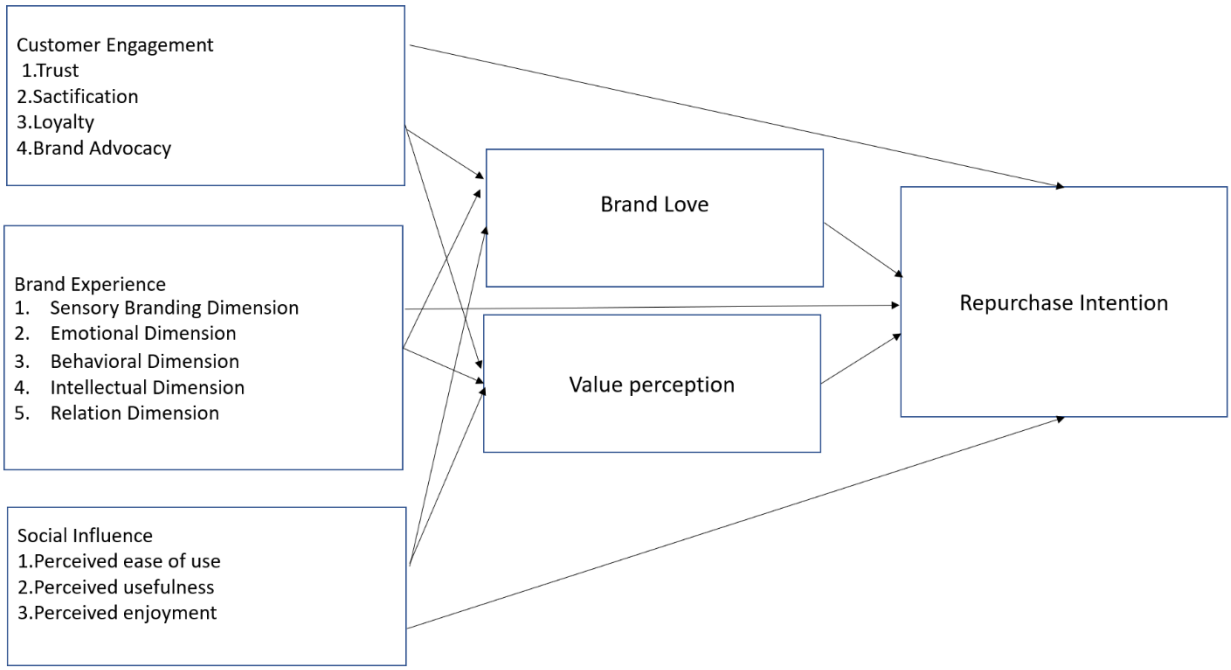

Figure 1 Integrated Conceptual Framework of Repurchase Intention

Conclusion

The retail business in Thailand is growing and developing rapidly and this is considered a mechanism for one of the important factors in distributing products to target customers which is the final product to the consumer as well. The modern retail model is becoming more popular nowadays. As a result, traditional retail reduces the importance of has become less important due to intense competition. Therefore, this article is intended to clarify the conceptual scope of retail expansion. It illustrates the multidimensionality of the variables that drive repeat purchases in the modern retail sector. In additionally, this article explores several potential reviewers. This may have implications for the success of modern retail optimization. In conclusion, the current research aims to develop a better understanding of the benefits and/or disadvantages of modern retail sector augmentation activities. This article will first review the retail expansion release. It will then be followed by a proposed conceptual model to discussion on how to evaluate the model and discussions about the meaning of education.

The Company or the Market? Competing Explanations for Long-term IPO Underperformance on the Market for Alternative Investment (Thailand)

Kasidid Vachekrilas[1]

Abstract

The purpose of this study was to investigate long-term underperformance of initial public offerings on the Stock Exchange of Thailand's Market for Alternative Investments. The study investigated three theories of IPO underpricing and underperformance, including the 'fad hypothesis', the 'hot issue market' hypothesis, and the role of company fundamentals. Data was collected for IPOs that had been issued on the MAI (2001 to 2022). An event study was conducted, investigating significant differences in cumulative abnormal return (CAR) at one week, six months, one year, two years, and three years after issuance. Determinants including initial underpricing, trading volume and IPO frequency at time of IPO, and firm fundamentals.

Keywords: alternative investment markets, IPO underpricing, IPO underperformance

Introduction

The long-run performance of initial public offerings (IPOs) is a long-standing conundrum which has not really been fully explained, although several theoretical arguments have been made. It is possible to observe two key facts about IPOs. First, IPOs are persistently underpriced, meaning that the initial price at offering is significantly exceeded by the price in near-term trading (Krigman et al., 1999; Reber & Vencappa, 2016). While sometimes IPOs are overpriced, this is much less common (Rathnayake et al., 2019). Second, IPOs have a noticeable pattern of long-term underperformance in comparison to either the market in general or to comparable firms that have been listed longer (Chen & Zheng, 2021; Shefrin, 2002). While these patterns are clear, what is much less clear is why this occurs or whether there is a connection between them.

Initial public offerings (IPOs):

An initial public offering (IPO) is the process by which a formerly privately owned company enters the public market for the first time (Jain & Kini, 1999). By this point, the firm has typically been established for some time, and has an established track record of entrepreneurial performance (Jain & Kini, 1999). While the most common reason for an IPO is to create or increase the firm's liquidity through the cash flows from sale of stocks, it can also be conducted for other reasons such as company reputation and profile or even assisting in acquisitions (Celikyurt et al., 2010). Firms have a significant amount of leeway in deciding whether to undertake an IPO and, if it is decided to do so, when the IPO should take place (Latham & Braun, 2010). This means that for example if the market is viewed as unusually risky or hostile to IPOs, firms may choose to wait, rather than undertaking the IPO at that time (Latham & Braun, 2010). However, firms may have less leeway in deciding which market to list on, as exchanges have different rules for company size, age, financial stability, performance and other measures (Chahine, 2007).

Alternative Investment Markets:

One of the limiting factors in the choice of an IPO on most investment markets is firm size (Jain & Kini, 1999). However, smaller firms may have the choice of listing on an alternative investment market, which is specifically designed for investments in smaller firms (and sometimes higher risk firms) (Revest & Sapio, 2013). As

[1] (นักศึกษา) ปริญญาเอก บริหารธุรกิจดุษฎีบัณฑิต DBA มหาวิทยาลัยหอการค้าไทย (089-1632847 E-mail kongkasidid@gmail.com)

Revest and Sapio (2013) explained, the alternative investment markets began to emerge in the 1990s as a way of encouraging the growth of small and medium-sized firms through public investment, although the extent to which this is successful remains in question. For example, it has been shown that the London Alternative Investment Market (AIM) was successful in supporting firm capitalization in its first decade of operation, but this growth in capitalization was not matched by increases in productivity (Revest & Sapio, 2013). There are also some ethical issues with alternative investment markets, which typically foster lighter regulation of the listed firms than main exchanges and which therefore represent higher risk for investors, which may not be fully disclosed or obvious (Mallin & Ow-Yong, 2011). The relatively small size of firms also makes it easy for shareholders to capture control of firms listed on alternative markets (Mortazian et al., 2019). Therefore, while listing on alternative investment markets can be beneficial to small firms, it can also be problematic.

IPO pricing and performance:

One of the problems of the IPO is that, as the firm has not been traded publicly before, there is a need to determine an appropriate initial selling price (Chang et al., 2017). While in a few markets there is useful information from pre-market trading, this type of trading is only obligatory in one market (Taiwan) and is unavailable for most firms (Chang et al., 2017). Instead, IPO pricing results from an analytical process performed by one or more underwriters, which are investment banks that are supporting the IPO (Dong et al., 2011). The process of IPO pricing would seem to be straightforward, as it is based on a combination of company fundamentals and market conditions (Dong et al., 2011). In practice, however, IPO pricing can be a complex and uncertain process. For example, pricing can depend on the underwriter's own quality of analysis (Dong et al., 2011), conservatism (Ferris et al., 2013), investor sentiment (Jiang & Li, 2013), regulatory requirements such as IPO lockup (a post-IPO period when initial investors cannot sell shares) (Gao et al., 2017), and even media coverage and public opinion (Chen et al., 2020).

Given the complexity of IPO pricing and the multitude of factors that can influence it, it is not surprising that IPOs are persistently mispriced (Krigman et al., 1999; Reber & Vencappa, 2016). IPOs can be said to be underpriced, indicating that they were offered at less than their true market value at the time of the IPO (Butler et al., 2014). Somewhat less commonly, IPOs may be overpriced, or offered at more than their value at the time of offering Pricing methodology, overpricing and underpricing, performance (over and under) (Rathnayake et al., 2019). Rathnayake et al. (2019), who investigated IPOs on the Colombo Stock Exchange (1991 to 2017), found that on average, IPOs were underpriced by 47%. However, they also found that 32 IPOs (out of 148 listings) were actually overpriced by around 18% (Rathnayake et al., 2019). Thus, IPO mispricing is prevalent, but underpricing is more common than overpricing.

A related problem to IPO mispricing is long-run IPO underperformance, in which the firm's long-run performance does not match price expectations set in the IPO (Chen & Zheng, 2021). The explanations for IPO underperformance vary substantially, and it is a seemingly difficult problem to resolve (Chen & Zheng, 2021).

Explanations for IPO underperformance:

Long-run IPO underperformance cannot be predicted from information available at the time of IPO (Goergen et al., 2007; Lee et al., 1996a). However, it can be explained post-hoc, as a result of conditions that occur between the IPO and long-run periods (Lee et al., 1996a). There are multiple theoretical explanations for IPO underperformance. Table 1 summarizes and explains these theories, as well as the empirical support for each of the explanations. It should be noted that some of these theories are both poorly supported and controversial. For example, Kirkulak (2008) was one of the few that actually tested the venture capital certification theory proposed by Bray and Gompers (1997), and he did not find evidence for this relationship in the market.

Despite the wealth of theories, there are still significant gaps in the research. Most of the studies supporting these theories have been conducted on main markets, rather than alternative investment markets. However, it has long been known that smaller firms tend to underperform more than larger firms (Goergen et al., 2007). Given that alternative investment markets are specifically designed for smaller firms, it can be expected that underperformance will be exacerbated, which may make it easier to identify and to investigate specific determinants. However, what evidence is present most strongly suggests three possibilities. First, the 'fad' hypothesis, which suggests that initial overvaluation is corrected as investors gain more information, is strongly supported (Aggarwal & Rivoli, 1990; Banu Durukan, 2002; G. Chen et al., 2000; Kirkulak, 2008; Kirkulak & Davis, 2005). Second, basic characteristics of the IPO and the firm itself are associated with underperformance (Ahmad-Zaluki et al., 2007; Álvarez & González, 2005; Banu Durukan, 2002; Bessler & Thies, 2007; Butler et al., 2014; G. Chen et al., 2000; Chorruk & Worthington, 2010, 2013; Goergen et al., 2007; Jelic et al., 2001; Kirkulak, 2008; Lee et al., 1996a, 1996b). Third, the market timing or 'hot market' hypothesis is strongly supported (Chen et al., 2000; Ljungqvist, 1997; Loughran & Ritter, 1995; Ritter, 1991; Thomadakis et al., 2012). These three hypotheses are incorporated into the conceptual framework.

Theory	**Explanation**	**Empirical Support**
Divergence of opinion	Initial investors in an IPO are more enthusiastic about the performance potential of an IPO than later investors, causing prices to drop as new investors enter the market (Miller, 1977, 2000).	(Miller, 1977, 2000)
Firm fundamentals	Firm characteristics and performance are associated with performance, including: *IPO Characteristics* - Initial underpricing (-) - Initial returns (-) - Issue size as a proxy for demand (+) - Retained ownership (-) - Institutional ownership (+) - International ownership (+) - Share structure (A-share versus B-share) - Percentage of shares offered to the public - Offer price revision - Underwriter market share - News stories *Firm characteristics* - Firm size at the time of IPO (+) - Firm age at the time of IPO (+) - Firm sales - Earnings growth - Debt-to-equity ratio - Price to sales ratio - Book-to-market ratio - Industry - Issuance of further offerings	(Ahmad-Zaluki et al., 2007; Álvarez & González, 2005; Banu Durukan, 2002; Bessler & Thies, 2007; Butler et al., 2014; G. Chen et al., 2000; Chorruk & Worthington, 2010, 2013; Goergen et al., 2007; Jelic et al., 2001; Kirkulak, 2008; Lee et al., 1996a, 1996b)

Theory	Explanation	Empirical Support
Idiosyncratic risk	IPOs underperform compared to older comparable firms due to idiosyncratic risk (A. Ang et al., 2006; H. Chen & Zheng, 2021)	(H. Chen & Zheng, 2021)
Market inefficiency, 'fads' and investor overreaction	Investors initially overvalue IPOs in early trading due to inefficiency and lack of information, while later and more efficient valuation corrects the price (Aggarwal & Rivoli, 1990). Underwriters deliberately overprice IPOs to create 'buzz', leaving the market subject to investment fads or overreaction (de Bondt & Thaler, 1985, 1987; Shiller, 1990). This initial underpricing can drive prices up too high, leading to long-run underperformance compared to post-IPO conditions (Shefrin, 2002).	(Aggarwal & Rivoli, 1990; Banu Durukan, 2002; G. Chen et al., 2000; Kirkulak, 2008; Kirkulak & Davis, 2005; Shefrin, 2002)
Market timing and 'hot issue markets'	Firms which undergo IPOs during high-volume periods are more overvalued at issue and have comparatively lower long-run returns (Loughran & Ritter, 1995; Ritter, 1991). On the other hand, firms entering the market during a period of high IPO activity can overperform the market for some time before performance falls off (Shefrin, 2002).	(G. Chen et al., 2000; Ljungqvist, 1997; Loughran & Ritter, 1995; Ritter, 1991; Shefrin, 2002; Thomadakis et al., 2012)
Post-IPO performance	IPOs are advantageously timed with respect to the firm's operating performance, which declines in the post-IPO period (Jain & Kini, 1994). This timing may be exacerbated by factors like earnings management (Teoh et al., 1998). This decline in performance can be attributed to agency problems stemming from the change in ownership (Jensen et al., 1976).	(Kooli & Suret, 2004; Ljungqvist, 1997)
Underwriter reputation	Underwriters with higher reputations are associated with lower levels of underpricing and therefore less underperformance in subsequent periods (Jelic et al., 2001)	(Jelic et al., 2001; Kirkulak & Davis, 2005)
Venture capital certification	Venture capitalists specialize in start-ups and early growth companies and have premium information regarding such firms; therefore, firms which were supported by venture capitalists underperform less than unsupported firms (Brav & Gompers, 1997)	(Brav & Gompers, 1997) Opposition (Kirkulak, 2008)

Table 1 Summary of explanations for IPO underperformance

In this research, the phenomenon of long-term underperformance is investigated in the context of Thailand's Market for Alternative Investment (MAI). The MAI is a companion alternative market to the Stock Exchange of Thailand (SET), which was established in 1999 to provide smaller firms with an opportunity for wider investment and growth (Stock Exchange of Thailand, 2021). The MAI saw its first listing in 2001, and as of October 2022 had a total of 191 companies listed (Stock Exchange of Thailand, 2021). To date, there have been few studies that have investigated IPO underpricing and/or underperformance in Thailand, with only a few studies being identified at the time of this research (Allen et al., 1999; Chorruk & Worthington, 2010, 2013). Only one of these studies has investigated the performance of stocks on the MAI (2001 to 2008), indicating that both underpricing and subsequent underperformance were less prevalent than on the main SET (Chorruk & Worthington, 2013). However, the SET has received relatively little attention in the literature since then, raising the question of how IPOs perform in the long run.

Objective

The aim of this research was to investigate the causes of long-term IPO underperformance on the Stock Exchange of Thailand's Market for Alternative Investments (MAI). The key objectives of the study include:

1. Evaluating company fundamentals as a cause of IPO underperformance.
2. Evaluating market factors as a cause of IPO underperformance.
3. Evaluating short-term underpricing as a cause of IPO underperformance.

These objectives are accomplished through an event study of the SET MAI, investigating the phenomenon of overpricing and underperformance in the context of an alternative investment market.

Topic (1)

The conceptual framework (Figure 1) proposes that there are three influences on long-run underpricing of MAI stocks. The first of these hypotheses is derived from the 'fad' hypothesis, which argues in brief that initial underpricing drives up demand for the stock, increasing the post-IPO price, which then does not perform to market expectations in the long run and hence underperforms (Aggarwal & Rivoli, 1990; de Bondt & Thaler, 1985, 1987; Shefrin, 2002; Shiller, 1990). Therefore,

Hypothesis 1: Initial underpricing of the IPO is positively associated with long-run underperformance of the IPO.

Topic (2)

The next set of hypotheses is derived from the 'hot issue market' hypothesis, which argues in brief that IPOs issued in periods of high trading volume or high IPO issuance are likely to be overpriced during the post-IPO period due to high demand, leading to long-run underpricing as the firm is eventually based on performance rather than market conditions (Loughran & Ritter, 1995; Ritter, 1991; Shefrin, 2002). Therefore,

Hypothesis 2: Trading volume at the time of IPO issuance is positively associated with long-run underperformance of the IPO.

Hypothesis 3: IPO frequency at the time of IPO issuance is positively associated with long-run underperformance of the IPO.

Topic (3)

The third set of hypotheses is based on the firm's fundamental, which are empirically a significant factor in long-run underperformance according to a wide range of studies (Ahmad-Zaluki et al., 2007; Álvarez & González, 2005; Banu Durukan, 2002; Bessler & Thies, 2007; Butler et al., 2014; G. Chen et al., 2000; Chorruk & Worthington,

2010, 2013; Goergen et al., 2007; Jelic et al., 2001; Kirkulak, 2008; Lee et al., 1996a, 1996b) This hypothesis investigates some of the best supported firm characteristics, stating:

Hypothesis 4: Firm characteristics (age and size at time of IPO, firm sales, earnings growth, and issuance of further equity offerings) are negatively associated with long-run underpricing of the IPO.

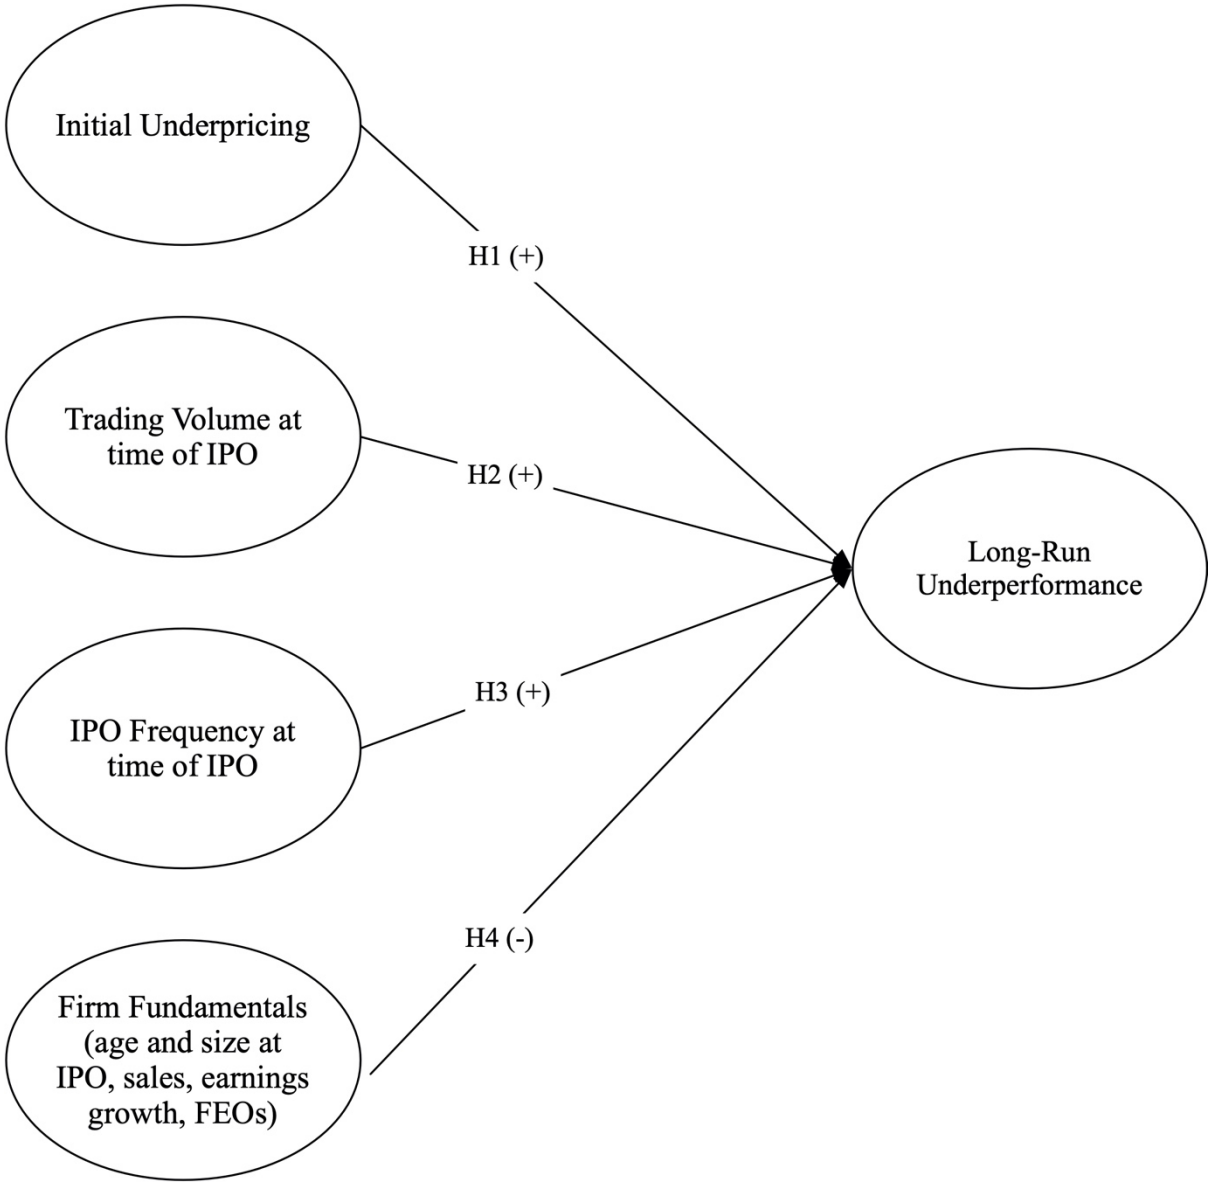

Figure 1 Conceptual framework

Summary

There are several possible ways to measure long-run IPO performance, including cumulative abnormal return (CAR) (Fama, 1998; Ritter, 1991) and buy-and-hold abnormal return (BHAR) (Barber & Lyon, 1997). Evaluation of the studies reviewed within the literature has shown that both CAR and BHAR, as well as a few other measures, are commonly used in investigation of IPO underperformance, with essentially every paper reviewed using one or both of these measures. Therefore, both CAR ad BHAR are used as dependent measures of IPO underperformance. This use of multiple measures also supports the finding that multiple perspectives are needed in small samples

to avoid over-rejection of impacts (Ang & Zhang, 2015). The analysis approach follows the approach set out by Chorruk and Worthington (2010), who have previously investigated long-run stock performance in Thailand.

In conclusion, the information provided here will be helpful for investors intending to invest in the MAI market, particularly in IPO equities, in determining if the transaction would be profitable. Investors would be able to determine from this information which factors, such as a company's fundamental structure, 'fad hypothesis', the 'hot issue market' hypothesis have the most impact on stock prices in the long-run.

Relationship between the demand for holding money that affects the investment of Gen Y people during the pandemic.

Danaikrit Inthurit[1]

Abstract

This research aimed to find the [2]relationship between the demand for money that affects the investment of Gen Y people during the pandemic by using the investment of people born between 1980-1999 during the Covid-19 outbreak in the Bangkok area as a case study. This research examines the relationship between the demand for holding money that affects the investment of Gen Y people during the pandemic by confirming factor analysis by collecting data fsrom questionnaires with a sample of 400 people in Bangkok. The results showed that the relationship between investment and the Transaction demand for money is the number of dependents in the family with a factor loading value of 0.79 oppositely. At the same time, income determines the relationship between the Speculative demand for money and investment with a factor loading value of 0.81. In contrast, the number of dependents in the family determines the relationship between investment and the precautionary demand for money with a factor loading value of 0.61.

Keywords: Behavior, Investment, Pandemic, Generation Y, Confirm Factor Analysis

Introduction

When the outbreak of Coronavirus Disease 2019 (COVID-19) has spread worldwide it has affected the health and lives of many people worldwide. Moreover, it does not include the value of worldwide economic damage. While the outbreak in Thailand, since January 2020, has affected the lives of Thai people at all levels in every dimension. Especially in the economic size, Thai people have changed their spending behavior. Savings and investments go big. The survey found the spending of Thai people during the COVID-19 era. There is an increase in spending, And it is increasingly evident that Thai people pay more attention to savings and accumulating wealth. Moreover, research indicates that Gen Y suggests the COVID-19 outbreak. Throughout the past, Gen Y has strongly emphasized investing and getting wealth in securities and digital assets. Investing in digital transactions, Especially digital lending transactions that make it easy to access credit sources (National Credit Bureau, 2021), reflects changes in personal financial management behavior, including savings and investments of Gen Y people in a situation where the pandemic.

Therefore, the researcher is interested in studying the relationship between the demand for holding money that affects the investment of Gen Y people during the pandemic. The results of this research will be helpful for government agencies. Financial institution the business sector related to savings in Thailand will understand the causal factors in saving money for Gen Y during the pandemic to adjust strategies to attract the funds of this population into the economy. In addition, government agencies, Thai financial institutions, and businesses related to savings will understand Gen Y's savings and investment trends during the pandemic to find ways to prevent financial crises. Furthermore, in the future, if there is another pandemic as well as government agencies, financial institutions, and the business sector related to savings in Thailand can consider the savings trend of Gen Y people to analyze ways to attract the money this population into the economy again if there is another pandemic in the future.

[1] Lecturer Dr., Department of Economics Faculty of Business Administration and the Information Technology Rajamangala University of Technology Tawan-Ok Email: danaikrit_in@rmutto.ac.th

The researcher designed an analytical model from the literature reviewed to extract research variables as a confirmatory factor analysis model of the confirmatory factor in saving money for Gen Y people in the pandemic situation.

Objectives of the research

To find the relationship between the demand for holding money that affects the investment of Gen Y people during the pandemic.

Literature Review

Concept of savings the complete income hypothesis explains the assumption that describes the relationship between income and consumption, which is a positive relationship. It can be concluded that when income increases, consumption will also increase, but consumption will increase. The increase is not equal to the rise in revenue, which is determined through the consumption function (Amonthip Thaetiangtham, 2001, pp. 62 - 108).

The concept of Investment sets aside some money for a while to generate future cash flows, which will compensate the moneymaker with this cash inflow. Therefore, it should be worth the inflation rate and the uncertainty of future cash inflows (Amonthip Thaemthip, 2001, pp. 62-108).

Concepts of Fiscal Policy fiscal policy consists of government expenditure policies, income policies, public debt policies, and budgetary policies. The expenditure policy relates to budgeting various government expenditures to generate financial results in an appropriate direction (Wanrak Mingmaneenakin, 2003, pp. 115 - 120).

The concept of demand for money means dividing the demand for money into three categories: the need for money for everyday expenses, the need to hold cash for costs when unexpected events occur. Moreover, the need to save money for profit from what Keynes believes People will have part of the money for profit (Wanrak Mingmaneenakin, 2003, pp. 59-63).

The researcher designed an analytical model from the literature reviewed to extract research variables as a confirmatory factor analysis model of the confirmatory factor in investment for Gen Y people in the pandemic situation, as shown in the picture. 1

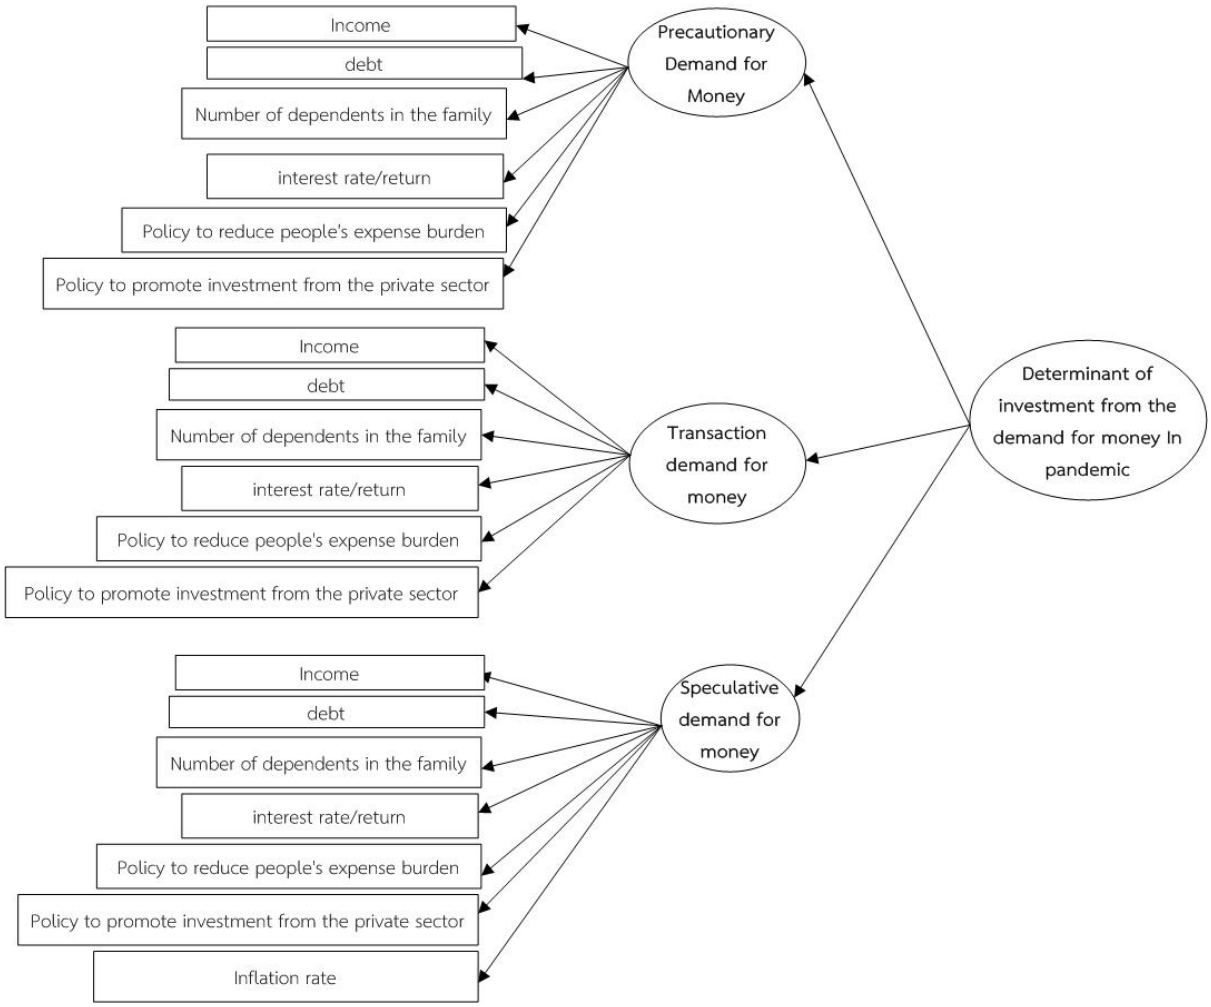

Figure 1 Confirmatory Factors Analysis Model of Demand for money affecting the investment of Generation Y people

Research method

Target area

The sample was purposive sampling) and then classified in random selection by the Yamane sampling formula. The study area is in 5 districts in Bangkok, Thailand: Bang Khen, Chatuchak, Bang Kapi, Sai Mai, and Lat Krabang, where the Gen Y population lives the most. (Thailand National Statistical Office, 2021)

Population and sample

The population used in this research was born between 1980 - 1997 or between the ages of 1,543,348 people (National Statistical Office, 2020). based on specified information, It is a purposive sampling of 400 Gen Y people who have either income and generate savings and investments from Yamane's calculations (Yamane, 1973) 5 percent.

Data Collection Method

The researcher used questionnaires as a tool for data collection. The questionnaire was divided into three parts; part 1, general information of respondents; part 2, investment behavior before and after the COVID-19 outbreak; and part 3, investment behavior before and after the COVID-19 outbreak. 19 The researcher tested the validity of the questionnaire through a pre-test with 40 consumers in Nonthaburi province using Cronbach's Alpha internal consistency measurement method. Confidence from 0.70 up, which is considered to be reasonably reliable

(Thanin Siljaru, 2012). From the test, the confidence value is 0.836, which is regarded as reliable. Therefore, the questionnaire was used to collect data.

Data analysis

The analysis in part 1 is general information including gender, status, age, education, occupation, and monthly income; part 2 is behavior before and after the outbreak of the COVID-19 virus, and part 3 is investing behavior both before and after the attack of the COVID-19. The data analysis in this three-part used mean, percentage, and the interpretation of results according to the stratum.

Part 4 found factors affecting the investment of Gen Y people in the pandemic when preliminary statistical data can be collected from all three elements. The researcher will analyze the factors influencing the investments of Gen Y people in the pandemic situation. The linear correlation paths between the variables were analyzed using the AMOS computer program for confirmatory factor analysis. (Confirmatory Factor Analysis) by establishing a confirmatory factor analysis model of the confirmatory factor in the investment of Gen Y people in the pandemic situation.Confirmatory factors Analysis Model of Confirmatory aspects of Gen Y's investment in the Pandemic Situation

Results

General information about the sample

General information of the sample the gender of the sample respondents was 220 females, 55.2 percent, and 180 males, representing 44.8 percent, while the sample was 83 in the age range of 22-25 years. People, representing 20.75 percent, aged 26-30 years; 130 people, representing 32.50 percent; 31-35 years old, 93 people representing 23.25 percent; and the age range 36-41 years, 94 people representing 23.50 percent. As for the education level of the sample, it was found that Education level below a bachelor's degree, 58 people, representing 14.50 percent, graduated with a bachelor's degree, 278 people, representing 69.50 percent, master's degree, 55 people, representing 13.75 percent; 9 doctoral degree students, representing 2.25 percent. When asked about the occupations of the sample, it was found that they were civil servants and government employees; 116, representing 29.00 percent, were employees of state enterprise agencies, and 42, representing 10.5 percent, were employees. Private employees, 138, representing 34.50 percent, are entrepreneurs. Business owners, self-employed, 80, representing 20.00 percent, and other occupations, 24, representing 6.00 percent. For income data, 74 people below 15,000 baht, representing 18.50 percent, earning 15,000 - 25,000 baht, 156 people accounted is 41.3 percent, income 25,001 – 35,000 baht, 95 people, 23.75 percent, income 35,001 – 45,000 baht, 45 people, 11.25 percent, revenue and higher than 45,001 baht, 30 people, 7.5 percent.

Result of the relationship between the demand for holding money that affects the investment of Gen Y people during the pandemic.

The result of the relationship between the demand for holding money that affects the investment of Gen Y people during the pandemic can be discussed on the following topics:

Investment behavior of Gen Y people

Research findings on the investment behavior of Gen Y people in the pandemic situation the results can be discussed in Table 1 – 2.

Table 1 Levels of investment behavior before and after the COVID situation

Factors	Score	Interpretation
Investment behavior before the covid outbreak situation	1.61	Rarely level
Investment behavior after the covid outbreak	3.26	Often Level

Source: from surveys and calculations

Table 2 Factors influencing investment

Factors	Score	Result in investment at the level
monthly debt burden	4.11	Always
Income	3.91	Always
Precautionary Demand for money in the COVID-19 pandemic	3.71	Often
Speculative Demand for money before the COVID-19 pandemic	3.54	Often
Fiscal Policy to reduce people's expenses	3.49	Often
Transaction Demand for money in the COVID-19 pandemic	3.47	Often
Number of dependents in the family	3.50	Often
Precautionary Demand for money before the COVID-19 pandemic	3.69	Often
Policies/products promoting investment from the private sector	4.07	Often
Policies/products promoting investment from the government	3.12	Sometime
The interest rate increase during the outbreak of COVID-19	3.33	Sometime
Speculative Demand for money in the COVID-19 pandemic	3.27	Sometime
Transaction Demand for money before the COVID-19 pandemic	2.95	Sometime
Inflation	3.73	Often
Government Investment Promotion Fund In the situation of COVID-19	2.55	Rarely

Source: from surveys and calculations

Table 1-2 shows the factors influencing the investment of Gen Y people before and during the pandemic. The research found that the debt burden at the end of the month, with a score of 4.11, was the highest factor affecting investment. The most followed Policies/products promoting investment from the private sector in the

COVID-19 situation with a score of 4.07. At the same time, the government investment promotion fund during the pandemic has a score of 2.79 as a factor affecting investment the least.

Confirm Factors Analysis of Demand for money on Gen Y's Investment during a Pandemic

Confirmatory factors studies were established to analyze the demand-to-money holdings and investment of Gen Y in a pandemic situation through confirmatory factors analysis) by identifying a single likelihood of the Model, i.e., specifying that the Model can be estimated as a single parameter. After that, the parameter values from the Model are calculated by analyzing the data from the sample to find parameter values using the estimation Maximum Likelihood method. The researcher tested the Model. by looking at the results of the statistical test values that pass the criteria for determining the harmonization of the affirmative elements It presents the threshold values through benchmarks, validation results, and interpretations. Model adjustments are made in cases where the Model is inconsistent with the empirical data. The Model must be revised to allow the parameter to be re-estimated. By relaxing the preliminary agreement, the discrepancy of the observed internal variables was correlated until the newly analyzed Model was consistent with the empirical data. Then, the results of the data analysis were interpreted (Schumacher, R. E., & Lomax, R. G., 2010) and shown in Table 3.

Table 3 Model Validation

Evaluation statistics	Standard criteria	Audit results	Refer to standard criteria
Chi-square Probability	$\rho > .05$	0.283	Byrne (2005)
Chi-square Relative	< 3	1.171	Hair et al. (2010)
Goodness of Fit Index: GFI	> 0.90	0.988	Hair et al. (2010)
Comparative Fit Index: CFI	> 0.90	0.998	Byrne (2005)
Root mean square residual: RMR	< 0.05	0.022	Hair et al. (2010)
Root Mean Square Error of Approximation	< 0.08	0.021	Hair et al. (2010)

Source: from surveys and calculations

From Table 3, it can be explained that the inspection results that pass the standard can be seen. Shows that the Model has model validity. Then, the researcher conducted a confirmatory factors analysis of the demand-to- money holdings to the savings in the pandemic situation through the study, showing the weight of the component from the path analysis of the causal relationship between the variables. The research can be illustrated in Figure 2.

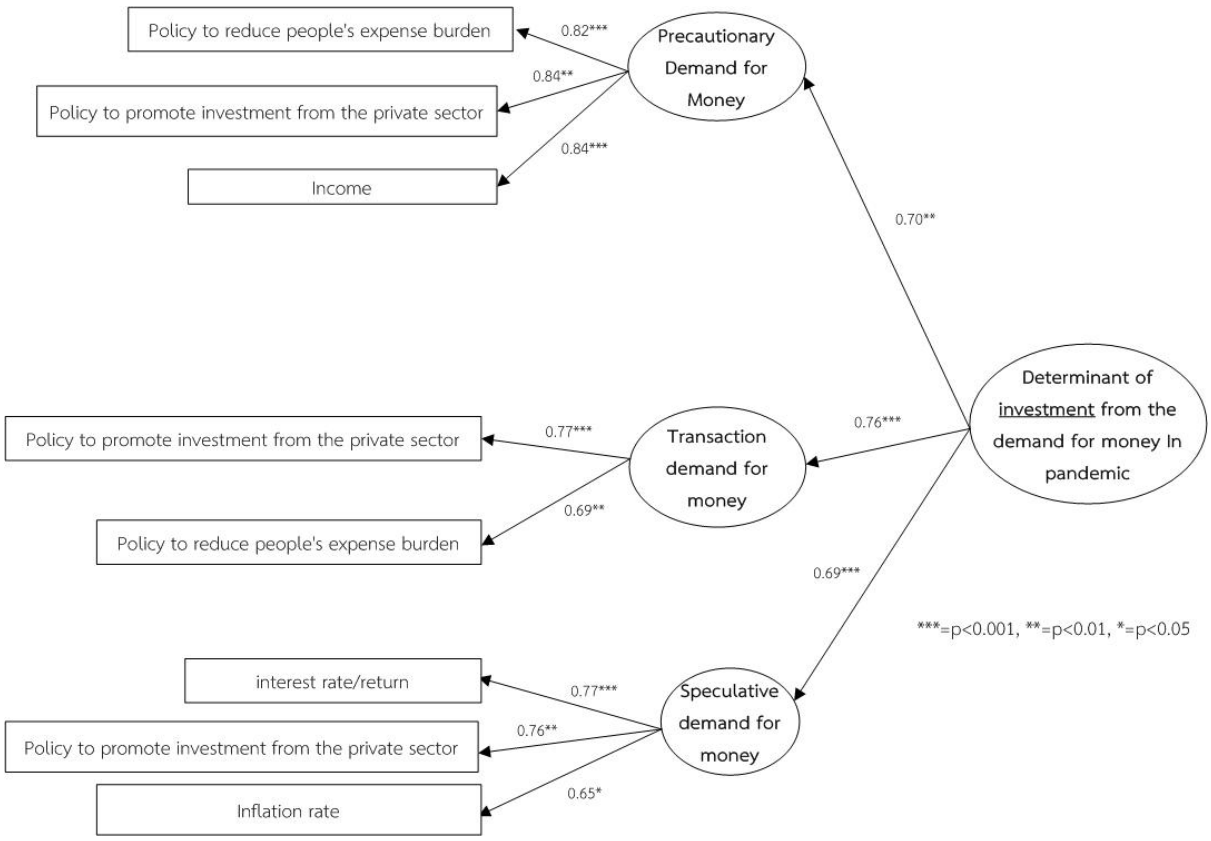

Figure 2 Confirm Factors Analysis of Demand for money on Gen Y's investment during a Pandemic.

Figure 2 can be analyzed to confirm the components of money holdings that affect the investment of Gen Y people in the pandemic situation by observing the factor loading of the causal relationship model. Then the factor loading was then considered for the coefficient of determination (R^2), which indicates the degree of relationship between the confirmatory factors. It can be used to discuss the findings of the confirmatory factors of the demand for money holdings. It can display component weight values and forecast coefficients on the investment of Gen Y people in the pandemic situation, as shown in Table 4.

Table 3 The factor loading and coefficient of determination

Factors	Factor loading	coefficient of determination (R^2)
Transaction demand for money	**0.76**	0.57
Policy to promote investment from the private sector	0.77	0.59
Policy to reduce people's expense burden	0.69	0.47
Speculative demand for money	**0.69**	0.47
interest rate/return	0.77	0.59
Policy to promote investment from the private sector	0.76	0.57
Inflation rate	0.65	0.42
Precautionary Demand for Money	**0.70**	0.49
Policy to reduce people's expense burden	0.82	0.67
Policy to promote investment from the private sector	0.84	0.71
Income	0.84	0.71

Source: from surveys and calculations

Table 4 shows that the results of considering every factor loading value shown are all above 0.30, which means that every variable shown There is a good correlation effect. Therefore, when considering the results together with Figure 1, the results of the analysis of the confirmatory components of the demand for holding money on the investment of Gen Y in the pandemic situation can be discussed as follows:

1) Transaction demand for money had a coefficient of determination of 0.47; the highest coefficient of determination value of components was the Policy to promote investment from the private sector 0.59, followed by the Policy to reduce people's expense burden of 0.47. Therefore, it can discuss the most crucial thing in the relationship between investment and the demand for carrying money for daily living is the policy to promote investment from the private sector, which the public will consider with fiscal policy to reduce people's expense burden before deciding to invest in the pandemic situation.

2) Speculative demand for money had a coefficient of determination of 0.47; the highest coefficient of determination value of components was the interest rate or return of 0.59, followed by policy to promote investment from the private sector of 0.57 and the inflation rate of 0.42. It implies that the most crucial relationship between investment and the demand for carrying money for speculation is a reasonable return in conjunction with policy to promote investment from the private sector and inflation.

3) Precautionary Demand for Money had a coefficient of determination of 0.49; the highest coefficient of determination value of components was the policy to promote investment from the private sector and income of 0.71, followed by the policy to reduce people's expense burden of 0.67. Therefore, it can discuss the most crucial thing in the relationship between investment and having cash flow reserved for emergencies is the policy to promote investment from the private sector and income.

Discussion

1) Policy to promote investment from the private sector, which is the influencing factor in every component of the model. It can imply that policy to stimulate investment from the private sector is an essential stimulus for investment in the epidemic situation. This issue is consistent with Emigdio Larios-Gómez's research stating that attractive promotions from the private sector encourage the public to invest more. (Emigdio Larios-Gómez, 2021)

2) Considering the confirm factor analysis, Transaction demand for money is the path with the highest predictive coefficient, meaning that people considering investing in a pandemic must consider having cash for everyday use as a priority before considering investing money. This issue is consistent with Hongyun Si's research, providing information in a way consistent with this research (Hongyun Si, 2021).

Recommendation

The following are some recommendations based on the research results:

1) considering the confirm factor analysis, if in the future there is an epidemic situation, The government will be able to stimulate savings from this population by using measures or policies that reduce the cost burden of the people because such factors have a high effect on investment. Likewise, the private sector or financial institutions should create attractive savings products and offer various benefits to attract savings from this population.

2) Considering the confirm factor analysis, it was found that the trend of demand for holding money for everyday use affects savings and total investment. If in the future there is an epidemic situation Government and private sectors can stimulate savings and investments from this population. They must target groups of people with sufficient cash flow for daily living, which may be determined by necessary considering personal and household debt.

An Investigation of Primary School Teachers' Competency in Learning Activity Management

Rungrudee Bunjun[1]
Vijittra Vonganusith[2]
Brendan D. McKell[3]
Yatawee Chaiyamat[4]
Sumran Gumjudpai[5]
Jinda Lapho[6]

Abstract

This paper aims to examine primary school teachers' competency in learning activity management. The study was based on document inquiries by investigating 24 relevant documents from Google Scholar and ThaiLIS. The survey tool created by the researchers included a set of questionnaires with a 5-rating scale asking the participants' perspectives on learning activity management. The results showed that the teachers' competency in learning activity management included three key components with 13 subcomponents and 40 indicators: *Knowledge and Understanding of Learning Activity Management*, covering six subcomponents with 18 indicators, *Professional Conscience in Teaching* made up four subcomponents with 11 indicators, and *Personality* with three subcomponents and 11 indicators.

Keywords: Teachers' Competency, Learning Activity Management

Introduction

Schools today operate in a complex and constantly changing world of knowledge and information. Teachers have the responsibility to prepare students and equip them with future skills. Learning activity management help students connect with material or activity to develop themselves in all areas to their full potential (Moore, 1992, p. 4), or to achieve the objectives of the course. As educators have said, learning activity management is an interactive process between teachers and learners to enable students to learn according to the objectives of the teacher's focus on students. Relevant and meaningful activities that engage students and connect with what they already know help build connections and long-term memory (Nuammano, 2019, p. 76).

Education management at all levels requires careful consideration of designing learning activities. Teachers are also a crucial mechanism in implementing classroom learning activity management according to the student's interests, abilities, and use of thinking skills. The teachers' professional responsibilities may involve encouraging

[1] Ph.D. student in Research of Curriculum and Instruction, Faculty of Education, Sakon NakhonRajabhat University, Thailand

[6] Lectuters, Faculty of Education, Sakon Nakhon Rajabhat University, Thailand

students to use the thinking process in groups, engaging with the environment, applying knowledge effectively, expressing viewpoints, debating, investigating, and building knowledge (Suwantrai, 2016). Hence, in managing and applying knowledge in daily life, learners who are committed to learning are crucial. Therefore, teacher empowerment is a crucial step in the process of enhancing student achievement.

Competency can be defined as an individual's knowledge and expertise in the specific group task and possesses, that is, teachers' roles, functions, required knowledge, skills, strategies, and rules and regulations (Wallace, 2015, online). Competency could also be defined as 'adequacy for a task' or as 'possession of required knowledge, skills, and abilities (Houston, 1972, p. 9 cited in Sikki, Rahman, Hamra, & Noni, 2013, pp. 141). Any mode of instruction aims for competence for developing well-qualified individuals who possess the required knowledge and skills. Sikki, Rahman, Hamra, & Noni, (2013, pp. 142-144) classified English teachers' competency into two aspects; Professional Competency comprises knowledge about various aspects of language (linguistics, discourse, sociolinguistic, and strategic), mastering English spoken and written, receptive and productive in all aspect of communicative, mastering the competency standards and basic competency, developing learning materials, developing professionalism in sustainable reflective action, and utilizing technology information and communication to develop themselves; and Pedagogical Competency comprising mastering the theory of learning, and learning principles, developing curriculum, organizing the learning, using technology, information and communication in the learning process, communicating effectively and politely to the learners, conducting assessment and process evaluation and learning result, using the result of assessment and evaluation for learners, and utilizing the results of assessment and evaluation for learning, and taking reflective action to improve the quality of learning. The study results revealed that teachers need to improve their competency. Most aspects of professional competencies needing improvement were material development, classroom language, ICT, grammar, research, competency standards and basic competency, text vocabulary, conversation, and translation. Pedagogical competencies that need improvement were methods of teaching English, learning models and design, learning theory, authentic assessment for young learners, preparation of syllabus and lesson plan, curriculum development, and instructional media.

Nessipbayeva's study (2012, pp. 148-153) identified the competencies of modern teachers, including 1) teaching skills and life-long learning competencies (e.g., performing complex pedagogical duties, being well-spoken, in good mental and physical health, stable and tolerant, having the propensity to work with the younger generation, having good communicative and observational skills, tact, a vivid imagination, and leadership); 2) levels of personal growth comprising pedagogical ability (e.g., knowledge of the subject), pedagogical skill (e.g., teaching skills), pedagogical creativity (e.g., implementing new methods and techniques into educational activities), pedagogical innovation (e.g., incorporating new, progressive ideas, principles and methods of training and education); 3) Pedagogical culture comprising teacher acceptance of the values of pedagogical work, facilitating solving various pedagogical tasks, and entailing setting goals, planning, analyzing and self -critiquing; 3) 21st-century teaching competency comprising 1) leadership by demonstrating leadership in the classroom (e.g., evaluating student progress, developing appropriate classroom and instructional plans, maintaining a safe and orderly classroom, creating positive management of student behavior, proving effective communication to defuse and deescalate disruptive behaviors, and using safe and appropriate seclusion and restraint techniques); 2) leadership in the school by engaging collaborative and collegial professional learning activities, displaying an ability to use appropriate data/elements needed in a school improvement plan, demonstrating high ethical standards; 3) Knowing the content they teach and making instructions relevant to students; 4) Reflecting on teaching practice.

Building teachers' capabilities in learning activity management by providing frequent training may not be adequate to support the continual and successful growth of their knowledge, skills, or competencies in managing learning activities. Hence, the Teachers' Council of Thailand (TCT) (2018, pp. 8-11) initiated the development of a teacher competency framework consisting of four essential competencies, including knowing and understanding what to teach, helping students learn, engaging the community, and becoming a better teacher every day, and 12

general competencies that Southeast Asian teachers must possess to perform in their profession. Competencies refer to a combination of skills, knowledge, behaviors, and attributes that enable effective or better job performance (TCT, 2018, p. 4). TCT has promulgated Thailand Professional Standards for Teachers (TPST) (Revision 2019) and monitored its standards and set up three main professional standards comprising 1) Standards of professional knowledge and experiences that includes six components and require one year of practicum; 2) Standards of performance consisting of (2.1) Teacher performance including five components, (2.2) Learning management consisting of six components, and (2.3) Parents and community relations management comprising six components; 3) Standards of ethical conduct comprising five components. Despite components of standards sharing similarities with some general and specific competencies for teacher education. Some specific tasks and responsibilities should be addressed in the time of change after the pandemic coronavirus (Covid-19) so that teachers are better prepared for their profession.

And what is important in enhancing the competence of teachers covers factors affecting the goal of success in three areas, namely, Knowledge and Understanding of Learning Activity Management, Professional Conscience in Teaching, and Personality as drawn from document inquiries.

Objectives

The objectives of this paper aimed to examine Thai teachers competency in learning activity management.

Research Methodology

The document inquiries were done through 24 published articles, books, full-text research studies, and research of all university members via Google Scholar and ThaiLIS (a Thailand Library Integrated System). The teacher competency in learning activity management was grouped into three components with 13 subcomponents and 40 indicators: Knowledge and Understanding of Learning Activity Management, covering six subcomponents with 18 indicators, Professional Conscience in Teaching made up of four subcomponents with 11 indicators, and Personality with three subcomponents and 11 subcomponents.

Results

The competencies of Thai language teachers could be summarized based on 24 journal articles and research studies covering three major components.

Table 1 summarizes the first key component-*Knowledge and Understanding of Learning Activity Management*, covering six subcomponents (e.g., instructional management, curriculum, measurement and evaluation, selection of teaching approaches, developing teaching materials and innovation, and using technology), with 18 indicators.

Key Components	Subcomponents	Indicators	References
Knowledge and understanding of learning activity management	Instructional management	Having knowledge and understanding of the course content, materials, and experiences	Wallace (2015) Pourpan & Thongsuk (2021) Panich (2012) Tayathong (2019), Sikki, Rahman, Hamra, & Noni, (2013
		Having knowledge and understanding of learners' characteristics	
		Knowing how to build the body of knowledge for self and students	
		Using language correctly and fluently	
	Curriculum	Analyzing curriculum by the course objectives, standards, and descriptions	Anderson (2014) OBEC (2010) MOE (2017) Petchkongkul (2017)
		Creating lesson plans by the course objectives, standards, and descriptions	
	Measurement and evaluation	Using clear and appropriate measurement and evaluation methods	MOE (2017) OBEC (2010), Wutthivech (1999) Petchkongkul (2017) Thongjeen (2017)
		Preparing the assessment tool covering the learning objectives	
		Using assessment results to improve learning	
		Implementing an ongoing process of learning evaluation and measurement	McDonough (2015)
	Selection of teaching approaches	Selecting teaching methods to suit the content of theobjectives	Vejkama (2019), Boonkham (2015), Pourpan, N. & Thongsuk, (2021) Prasitwutthivech (1999) Thongjeen (2017)
		Allowing learners to learn for developing knowledge, skills, morals and ethics, and good values	
	Developing teaching materials and innovation	Creating teaching materials and innovations following the content and interests of the students	Warinin (2014), Boonkham (2015) Pourpan, & Thongsuk, (2021) Tayathong (2019) Lauridsen (2003) Wutthivech (1999) Petchkongkul (2017)
		Selecting teaching materials related to the content objectives	
		Using appropriate teaching techniques	
		Implementing instructional strategies to pique students' interests.	
		Having knowledge of conducting research	
	Using technology	Using computers, media, and technology appropriately	Panich (2012) Cerbin and Kopp (2006)

Table 2 summarizes the second key component-*Professional Conscience in Teaching* made up of four subcomponents (e.g., being exemplary, public participation, learning to balance national interests and students' needs, and engagement with students), with 11 indicators.

Key Component	Subcomponent	Indicators	References
Professional conscience in teaching	Being exemplary	Acting as a model for the preservation of the Thai language andculture	Khamkerd (2007), Warodomdamrong,(2020)
		Setting a good example for students and others	
	Public participation	Leading in an organization, group, or community's activities	Vejkama (2019), Cerbin and Kopp (2006)
		Taking part in an organization, group, or community's activities	
	Learning to balance national interests and students' needs	Maintaining linguistic and literary trends needed in meeting national standards	Wallace (2015), Vejkama (2019), Pourpan, & Thongsuk, (2021) Pubootcha, Chalakbang, Phengsawat, &Teannoppakao (2018)
		Mastering education subjects to local and global concerns	
		Creating a safe and comfortable environment for students	
	Engagement with students	Inspiring students for good deeds	Pubootcha, Chalakbang, Phengsawat, &Teannoppakao, (2018) Thongjeen (2017)
		Working and initiating new commitments to students	
		Making use of opportunities to explore students' world	
		Taking responsibility for self-improvement in the educational process and personal life	

Table 3 summarizes the third key component-*Personality* consisting of three subcomponents (e.g., Physical, Emotional, and Social Personalities), with 11 indicators.

Key Component	Subcomponent	Indicators	References
Personality	Physical Personality	Having a pleasant and tidy appearance, and politemanners	Nuammano, (2019), Tayathong (2019), Panich (2012)
		Speaking softly spoken with proper style, and friendliness	
		Posing effectively and acting appropriately for the status	Pubootcha, Chalakbang, Phengsawat, &Teannoppakao, (2018)
		Maintaining a proper posture with students and others	
	Emotional Personality	Having Good emotional regulation	Panich (2012) Nuammano, (2019), Pubootcha, Chalakbang, Phengsawat & Teannoppakao, (2018)
		Paying interest in the issues facing students	
		Showing consideration, help, and concern for students	
	Social Personality	Displaying humor, vibrant, happy, and smiling	Panich (2012) Pubootcha, Chalakbang, Phengsawat, & Teannoppakao, (2018) Nessipbayeva (2012)
		Desiring to recognize and share different types of information	
		Having the ability to handle difficulties quickly and effectively	
		Desiring to study and stay with the current	

Discussion

The finding from the document inquiries revealed that the competency of primary teachers covers three key components, namely: 1) Knowledge and Understanding of Learning Activity Management, with six subcomponents and 18 indicators. The subcomponents include instructional management, curriculum, measurement and evaluation, selection of teaching approaches, developing teaching materials and innovation, and using technology; 2) Professional Conscience in Teaching, with four subcomponents and 18 indicators. The subcomponents include being exemplary, public participation, learning to balance national interests and students' needs, and engagement with students; and 3) Personality, with three subcomponents and ten indicators. The subcomponents include physical personality, emotional personality, and social personality.

In line with the results of Rittisak Suwantrai (2016, p 143-144.)'s research showed that learning activity management situations and activities for learners are arranged to create behavioral changes resulting from experience. That has resulted in learners having growth and development both physically and mentally. Instructional management at all levels requires careful consideration. To align learning activities and content with students' interests, aptitudes, the practice of thinking skills, management, and application of knowledge in daily life, teachers must have a crucial mechanism for implementing methods of learning management, measurement, and evaluation, and developing teaching materials and innovation. Learners who are committed to learning activity management are crucial as it provides a chance for students to get involved in the procedure both in terms of

sharing ideas, conversing, and doing research. Teaching through knowledge building into practice encourages learners to use their thinking and group processes and interact with the environment to apply knowledge appropriately.

Prakob Sritrakul (2008) also researched the conditions and requirements for developing the learning activity management skills of vocational teachers. The study's findings revealed: the teachers' competency with learning activity management was overall at a moderate level. The competency included the ability to manage learning activities. Five factors, listed in the order of importance for the growth of the learner's learning process, can be summed up as being critical to the development of competency in learning management, designing education, creating lesson plans, planning educational activities, and utilizing new and innovative media. In addition, the study by Verachai Sriwongrat (2016, p. 119) revealed that teachers' learning management competencies were discovered to be very high, including learning how to manage learning in a way that prioritizes student-centeredness, media, and creativity. The development of self-study students was significantly impacted.

Reviewing findings of Nessipbayeva (2012, p. 154) indicated that teacher competencies covering: 1) Effective classroom management (e.g., maximizing efficiency, maintaining discipline and morale, promoting teamwork, planning, communicating, focusing on results, evaluating progress, making constant adjustments, promoting positive relationships, and engaging students in productive tasks; 2) Effective teaching practices (e.g., using multiple of teaching and learning strategies, engaging students in active learning approaches to promote critical thinking and problem solving, and help students identifying and using learning resources, and 3) Effective assessments (e.g., incorporating appropriate assessment strategies including self-assessment); and 4) Technology skills (e.g., knowing when and how to use current educational technology, and using appropriate type and level of technology to maximize student learning).

One aspect of knowledge and understanding of learning activity management during the changing era, which is often referred to as the heart of education is using technology in practice. In this context, Panita Wanpirun and Naphajit Dusdee (2020, p.171) stated that teachers learn through hands-on experience and active learning. Teachers have a better understanding of their students as well as their jobs. The development of students and the professional growth of teachers are both influenced by experiential learning. In the digital age, the direction of education must change. The PLC's work process will be aided using cloud technology, and instructors will gain the knowledge and abilities necessary to raise their level of teacher competency. proficiency of digital educators

This could be concluded that Thai teachers' competency is crucial and required because it influences how effective teaching is. The fact is that teachers must possess each competency to successfully develop into professional teachers.

Professional Conscience in Teaching

In this context, Wichien Wittayaudom (2019, cited from Charan Nuammano, 2004, p. 130) stated that an attitude is a set of sentiments, assumptions, and actions that are connected to certain people, teams, concepts, expressions, or goals. Naret Pubootcha, Wannika Chalakbang, Waro Phengsawat, & Porntep Steannoppakao (2018, p. 256) examined teachers' competencies and students' quality in the 21st century and revealed that teachers' competencies that contributed to the learning environment in the 21st century in the north-eastern region of Thailand included 1) personal competency, 2) leadership competency, 3) moral and ethical competency, 4) classroom management competency, and 5) learning management competency. The five competencies were theoretically believed to benefit learners' qualities in terms of 1) good citizenship, 2) skills and knowledge determined in the curriculums, 3) thinking skills, and 4) life skills that could lead to a successful life in the 21st century.

Likewise, a study by Nawarat Pourpan and Phaitoon Thongsuk (2021, pp. 24-35) stated that primary and secondary school teachers' needs for characteristics development of the 21st-century teachers in schools under the Office of Educational Service Area, Surin Province, reached a high level. The teachers' characteristics comprised eight aspects: C-connect, C-computer, C-constructionist, C-connectivity, C-collaboration, C-creativity, and C-caring. The descriptions of 8C could be explained as follows: C-connect. To meet local needs and the national curriculum, teachers must design and develop a curriculum that includes assessment, subject-matter expertise, conducting research relevant to students' needs, self-improvement through workshops, training, academic presentation, and knowledge sharing with parents and communities on related subjects they teach; C-*computer*. Teachers must be able to use information and communication technologies to manage classrooms, teach and learn, seek out new material, and collaborate with parents to build school-parent networks for better instructional management; *C-constructionist*. Teachers must develop a variety of teaching strategies or models to meet the needs of their students, carry out efficient learning assessments, examine problems faced by their charges to find better solutions, and develop learning activities to encourage students to learn and work together for self-improvement; *C-Connectivity.* To improve children's education, teachers must use local learning resources, establish school-parent-community learning networks, disseminate information to parents and the community about each student's performance and progress, and foster a positive learning environment for better student-student and teacher-student relationships.; *C-collaboration*. Teachers must allow students to set learning objectives and assessments, develop activities that support the development of student's social, academic, and occupational skills, develop moral and ethical activities by encouraging student participation in decision-making, encourage student collaboration in setting classroom rules through group work and coordinate with parents, students, teachers, and the community to participate in school-related activities.; *C-Communication*. Teachers must use appropriate teaching resources, integrate moral and ethical principles into their lessons, foster collaboration, accept differing viewpoints, and foster positive parent-teacher relationships to effectively manage learning. *C-creativity*. Teachers must make use of local learning resources, choose a variety of innovations and technologies related to content and learning management, apply the effects of learning design appropriately to improve effective learning management, develop classroom research projects and put them into practice, use the results of student assessment results to design learning management and process, and invite participation from village philosophers and scholar; and *C-caring.* Teachers are accountable for assisting each student in consistently improving their behavior, motivating parents to get involved in the student aid system, and fostering positive behavior and discipline in the classroom by using the right strategies or procedures.

Personality

The traits and actions of people with distinctive qualities that are manifested both inside and outside are referred to as personality (attributes). The things that separate one person from another are the products of their experiences or environments. Sutida Lekawattana, Chaveewan Ponsana, and Wirat Phongsiri (2021, pp. 99-100) examined the expectations of good teachers' characteristics using the priority needs index to identify the most important characteristics of teachers. The results revealed that the teacher should have 1) a good personality 2) leadership, 3) empathy and discipline by showing gentleness, love, and compassion for students, being willing to be a consultant on all matters, always encouraging students, and being serious about discipline, 4) knowledge with strictness and knowledge, including economic, social, and political knowledge, and 5) having the ability to use modern media in teaching. Likewise, Charan Nuammano (2019, p. 127) stated that a successful teacher needs to have a positive demeanor. Physical personality, emotional personality, social personality, and intellectual personality are the four personality traits that teachers should possess. Because teachers who are physically healthy, respectable, and credible will have the best chance of succeeding in interacting with kids with both verbal

and nonverbal cues, as well as being emotionally secure and mature enough to talk in a caring manner, enabling kids to receive the connection between the personality component and the learning management system.

This is in a row with Nanthaka Warinin's (2014, abstract) research, which also investigated a model for boosting' competency in learning activity management in Kamphaeng Phet Primary Education Service Area Office 2 and realized that: the overall level of learning activity management competency was moderate. There were high-level development needs and problems of high-level learning management competency. For example, five components made up the learning management competency: 1) developing curriculum, 2) teaching subjects, 3) putting the learner first, 3) measuring and evaluating learning outcomes, and 4) using and developing innovative information technology.

The attitudes of students, teachers, and school officials at the Los Angeles Community College system were also examined by Calderon (1989) to determine the qualities of excellent teachers. The findings revealed that the same opinions were shared by students, teachers, and school officials concentrating on personality There were three positive qualities:Effective teaching qualities; Positive personality traits; and Positive attitudes toward students are characteristics that made a good teacher. A comprehensive understanding of the present and the truth, and an understanding of physical and mental development were also critical aspects of teachers' qualities. The findings also showed that training teachers to become professional instructors with effective learning management skills has a significant impact on the teaching and learning process. Teachers and school administrators must also train teachers to become such professionals.

Conclusion

According to the study's findings, teachers and school administrators must invest in their professional development for them to have a significant impact on the teaching and learning process. Teachers must also become proficient in learning management. Teachers should be encouraged by school administration to create a model of proactive learning management and to support a professional learning community. To collaborate on effective learning management that influences the quality of learners' growth, they must work together to exchange knowledge and assist one another is required.

Recommendations

Educational institutions should develop teachers' learning activity management skills and support activities that motivate students to be modern citizens of the 21st century. School administrators should also provide teachers with training to increase their skills and knowledge. Educational institution managers should also support proactive learning management in classrooms and support teachers' continual application of the proactive learning management model. Teachers themselves should create a learning environment in which students can freely express themselves, thinkboldly, and participate in class, inspire students, use a variety of reducing materials, and use instructional strategies that are appropriate for the subject matter. In addition, the school curriculum should be measured and evaluated in the context of current events or inthe context of integrated knowledge across various learning subject groups, and plan events to improve Thai students' skills and knowledge to meet individual needs and future workplaces.

Abstract

This paper aimed to examine the critical thinking teaching strategies employed by science teachers in a primary school science classroom in the first semester of the academic year 2022. The sample, obtained through purposive sampling, consisted of 44 science teachers from primary schools under Nakhon Phanom Primary Educational Service Area Office 2. The result revealed that the critical thinking teaching strategies of science teachers in a primary school science classroom in Northeast Thailand consisted of five components with 17 sub-components, namely, 1) encouraging students to make their own decisions, 2) giving students opportunities to think, and give reasons, 3) providing a variety of learning materials, 4) creating a group learning environment, and 5) building self-confidence in students' abilities.

Keywords: Critical Thinking Teaching Strategies, Science Teachers

Introduction

Global change has led to an increase in the complexity of education to maintain to be competitiveness in a world that is rapidly changing. The 21st century needs individuals, especially teachers, who are capable of intensively implementing a variety of teaching styles, strategies, and creative and innovative activities to improve students' academic performance, desirable characteristics, and attitudes. The teachers must be equipped with 21st-century knowledge and abilities and learn how to integrate them into classroom practices where students are applying their learning and engaging in more collaborative activities such as project-based learning, research and analysis, and problem-solving tasks (Alismail, & McGuire, 2015). Additionally, future primary school teachers must receive an education that enables them to effectively reach a variety of students because children learn differently and can come from widely varying backgrounds. In this way, children can develop their critical thinking skills and prepare for the challenges of living in a diverse, and complicated environment (AACTE, 2010, p. 9).

Teaching critical thinking in schools is also one of the key topics in the debates regarding 21st-century skills (Hobbs, 2008; AACTE, 2010; Collins, 2014; Scott, 2015). Ownership of critical thinking skills is very important, whether for continuing study as primary students or in developing peaceful daily life. This is in line with the characteristics of critical thinkers according to Ruggiero (2012) who identified critical thinkers as being truthful to themselves, aware of what they do not know, their limitations, and their mistakes. CT has also been referred to as

[1] Ph.D. student of Research and Instructional Development, Faculty of Education, Sakon Nakhon Rajabhat University, Thailand (08-7945-5670) E-mail: njoy10062532@gmail.com

[5] Lecturers, Faculty of Humanities and Social Sciences, Sakon Nakhon Rajabhat University, Thailand
[6] Lecturers, Faculty of Humanities and Social Sciences, Sakon Nakhon Rajabhat University, Thailand

the process of “thinking about thinking” as defined and proposed by Flavell (1979). CT is a learned skill that requires instructional strategies that actively engage students in the learning process and practice. Some researchers found a significant correlation between instructional strategies and the critical thinking skills that students will need in the 21st century (Alismail, & McGuire, 2015; Ay & Orhan, 2020; Phumphisan, Chanthachum & Chanprathuk, 2020; Manthanom, Koedsuwan, & Na-soontorn, 2022).

Developing students’ skills requires a content-rich curriculum, supportive teachers, and better assessment. Critical thinking (CT) is also one of the most important skills that teach students to ask or reflect on their understanding and knowledge about the information that has been presented to them and see the connection between what they are learning to achieve life skills and future careers. The students are also supposed to make decisions reasonably and accurately in the situations they encounter. In the world of information and technological advancement, a person with a good sense of humor, and the ability to analyze the principles, control, manage and examine the information. Teachers then should find practical and efficient strategies for the 21st-century curriculum and instruction as well as instill necessary skills and tools that help students face their challenges successfully. In addition, the strategies for teaching CT encourage students to think critically covering the subjects in the school curriculum, such as problem-based learning, and project-based learning-that allow students to collaborate, work on authentic problems, and engage with the community. Various research studies reported the same findings that teachers must design activities and employ teaching strategies that encourage students to make their own decisions, allow students to think, and give reasons, encourage students to know how to plan work, create a group learning environment, ask open-ended questions, listen and accept the opinions of others, build self-confidence in their abilities, distinguish facts and opinions, distinguish unsure conclusions, stimulate imagination, practice finding information that supports the opinions and facts, promote interaction among students as they learn - learning in a group setting often helps each member achieve more (Oraphan, 2000; Snyder, & Snyder, 2008; Susaraj, 2008; Rotherham, & Willingham, 2009; Sinthaphanon, 2009; Pornkul, 2011; Wahyudi, Verawati, Ayub, & Prayogi, 2019).

There are specific instructional strategies oriented toward the promotion of CT, which are identified in the literature as fostering CT as shown in the Table below. All five teaching strategies are listed for educational activities to improve learners’ critical thinking

Teaching Strategies that Promote Critical Thinking	
Main Components	**Sub-components**
1. Encourage students to make their own decisions. (Sinthaphanon, 2009; Oraphan, 2000; Susaraj, 2008; Pornkul, 2011.)	1.1 Focus on the problem-based learning process 1.1.1 Identify the issues. 1.1.2 Specify options. 1.1.3 Separate the pros and cons of each option. 1.1.4 Compare options using appropriate and consistent criteria. 1.1.5 Rank the options and rate each option 1.1.6 Decide which option gets the most points. 1.2 Focus on different activities for integrating critical thinking skills, such as the questioning technique, case studies, scenarios, or debatable issues, peer coaching techniques, and research-based learning
2. Allowing students to think and give reasons.	2.1 Encourage active participation

Teaching Strategies that Promote Critical Thinking	
Main Components	**Sub-components**
(Oxman,1991; Potts,.1994; Halpern, 1999; Pornkul, 2011; Chansir, 2019; Brookfield, 1987; Susaraj, 2008.)	2.2 Give learners the opportunity to explain one's thinking and point of view in one's own words. 2.3 Wait for learners to process and formulate their responses
3. Providing a variety of learning materials. (Sinthaphanon, 2009; Chansir, 2019; Brookfield, 1987; Halpern, 1999.)	3.1 Use movies or television series to reflect, analyze, and debate. 3.2 Use multimedia tools to encourage students to practice thinking and judgment in situations close to real life. 3.3 Explore the new technological means to encourage students' interactivity. 3.4 Allow learners to research information from several resources.
4. Creating a group learning environment (Langrehr, 2008; Susaraj, 2008; Sinthaphanon, 2009; Pornkul, 2011; Chansir, 2019; Potts, 1994)	4.1 Use empathy in the classroom. 4.2 Encourage learners to show empathy for friends who encounter difficulty. 4.3 give learners the opportunity to express and exchange ideas with friends and teachers 4.4 Support social interaction by dividing learners into different groups with diverse abilities and interests
5. Building self-confidence in students' abilities (Brookfield, 1987; Langrehr, 2008; Susaraj, 2008.)	5.1 Listen and ask questions 5.2 Encourage and give constructive feedback 5.3 Give individualized feedback 5.4 Guide learners through the process

In general, the learning process at a Thai primary school level remains using conventional learning, such as textbooks and teacher-centered instruction, which results in passive learning that is disconnected from real life. In Thai primary-level science classes, students are not supposed to express their opinions before permitting to do so by the science teachers. Students are expected to be passive receivers of the teacher's content knowledge instruction. Consequently, the student's critical thinking abilities have not developed as they should have, which has ultimately impacted their learning outcomes. This is in line with Wulandari (2015; cited in Bustami, Syafruddin, 2018) who stated that the low students' critical thinking skills were initiated by passive learning. The low critical thinking skills can be seen in a study conducted by Muhlisin (2012) which revealed that 80.9 % of students' critical thinking skills belonged to a low category. Furthermore, Fuad (2017) showed students' critical thinking skills scored only 21.89 on average and were categorized as low.

In the Thai context, PISA Program summarized the student performance in reading literacy that on average, 44 percent of 15-years-old students in Thailand did not achieve basic proficiency in science, while 60 percent of students failed to reach the required reading proficiency (World Bank, (2020). With the reform of the National OBEC curriculum (2013), the subject groups of divided knowledge group into six strands, including language and literary works, media and communication, science, technology, and mathematics, living and world work, society and human beings, and ASEAN region and Global, emphasizing learners to have the critical thinking, analytical and creative thinking, and work creatively. The ability to think clearly and rationally, understand the logical connections between concepts, and translate the information that learners must process into knowledge that will be valuable

for future academic success and employability are all examples of critical thinking. As has been said, what happens in the classroom depends on the teacher's abilities and strategies to maintain students' interest and engage in their learning. Thus, teachers play a crucial role in shaping changes in the classroom.

Therefore, the researcher is interested in investigating the real situation in a science primary school classroom and the teachers' teaching strategies to improve learners' critical thinking, which was examined through ten documents through Google Scholar and ThaiLIS. This case study was driven by the following research question: What teaching strategies are implemented to improve students' critical thinking in a primary school classroom?

Research Objective

The purpose of this study was to examine the critical thinking teaching strategies used by science teachers in primary schools in Northeast Thailand.

Research Methodology

1. Participants.

The population of this study was 181 science teachers under the Nakhon Phanom Primary Educational Service Area Office 2. The sample group included 44 science teachers, chosen using random purposive sampling, working under the Nakhon Phanom Primary Educational Service Area Office 2 in Si Songkhram District, Nakhon Phanom Province in the 2022 academic year.

2. Research instrument

2.1 The research tool was a set of questionnaires examining critical thinking teaching strategies of science teachers in a primary school science classroom, consisting of three parts: 1) basic information of the respondents, 2) The 5-item questionnaire examining critical thinking teaching strategies of science teachers in a primary school science classroom, and 3) open-ended questions for other comments and suggestions for teaching and learning promoting the ability to think critically of primary school science teachers.

2.2 The instruments' quality included the questionnaire's content validity, which was examined by three experts with an index of item objective congruence (IOC) of 1.00. Also, the reliability of the questionnaire was determined through Cronbach's Alpha Coefficient was 0.94. The research tool was tried out with 30 non-sample science teachers.

3. Data collection and analysis

3.1 The survey questionnaire was administered to the sample group, including 44 science teachers from primary schools. This study incorporated using a Likert-type response format. The researcher, therefore, used a frequency criterion of 30 percent or more in the selection. The questionnaire was used to obtain insight into teachers' practices on critical thinking implementation in a science classroom at a primary school level in five areas: (1) encouraging students to make their own decisions, (2) giving students opportunities to think and give reasons, (3) providing a variety of learning materials, (4) creating a group learning environment, and (5) building self-confidence in their abilities. The survey was delivered via an electronic survey accessed through Google Forms. The researcher statistically analyzed data through frequency distribution and percentage.

3.2 The critical thinking teaching strategies (CTTS) of science teachers in a primary school science classroom were analyzed by using mean and standard deviation. The content validity was done through three experts with a value of 1.00 and reliability of 0.94 The survey questionnaire was tried out with 10 non-sampling science teachers and refined according to the experts' reviews and the try-out session. The completed survey was then administrated to 44 science teachers working in a primary school under the Nakhon Phanom Primary

Educational Service Area Office 2. After the data was gathered, the values were computed. The mean interpretation values of five intervals were as follows:

4.50–5.00	means	performing CTTS at the highest level
3.50-4.49	means	performing CTTS at a high level
2.50–3.49	means	performing CTTS at a moderate level
1.50–2.49	means	performing CTTS at a low level
1.00–1.49	means	performing CTTS at the lowest level.

Conclusion

1. Characteristics of the Participants

As shown in Table 1, the science teachers' characteristics could be summarized into three areas: major of teaching, teaching experience, and academic classification.

Table 1 Summarizing the science teachers' characteristics

Variables		Frequency	Percentage
Major of teaching	Biology	5	11.36
	Chemistry	7	15.91
	Physics	2	4.55
	Science	30	68.18
Professional Qualification	Bachelor's Degree	11	25.00
	Master's Degree	33	75.00
	Doctoral Degree	-	-
Teaching Experience in years	0-5 years	15	34.09
	6-10 years	17	38.64
	Above 10 years	12	27.27
Formal Training in CT	Yes	29	65.91
	No	15	34.09

Table 1 shows the frequencies of the demographic variables considered under study in teaching strategies that promote critical thinking in science classrooms at a primary school level.

Most of the participants (68.18%) taught Science. Their teaching experience ranged from 0 to Above 10 years. According to the professional qualification, out of bachelor's degree participants, 75% held a master's degree. In light of formal training, 65.91% of participants were trained in teaching and learning that promotes critical thinking ability.

2. Document inquiries

From the document inquiries, the teaching strategies promote students' critical thinking drawn from ten scholars' research studies both domestically and internationally through Google Scholars and ThaiLIS, and the experts' reviews. The five components with 17 sub-components could be summarized as follows:

Component 1: Encouraging students to make their own decisions. The two sub-components include: 1.1) Focus on the problem-based learning process consisting of 1) Identifying the issues, 2) Specifying options, 3) Separating the pros and cons of each option, 4) Comparing options using appropriate and

consistent criteria, 5) Ranking the options and rating each option, and 6) Deciding which option gets the most points; and 1.2) Focus on different activities for integrating critical thinking skills, such as the questioning technique, case studies, scenarios, or debatable issues, peer coaching techniques, and research-based learning

Component 2: Allowing students to think and give reasons. The three sub-components include 2.1) Encourage active participation, 2.2) Give learners the opportunity to explain their thinking and point of view in their own words, and 2.3) Wait for learners to process and formulate their responses

Component 3: Providing a variety of learning materials. The four sub-components include 3.1) Use movies or television series to reflect, analyze, and debate, 3.2) Use multimedia tools to encourage students to practice thinking and judgment in situations close to real life, 3.3) Explore the new technological means to encourage students' interactivity, and 3.4) Allow learners to research information from several resources.

Component 4: Creating a group learning environment. The four sub-components include: 4.1) Use empathy in the classroom, 4.2) Encourage learners to show empathy for friends who encounter difficulty, 4.3) Give learners the opportunity to express and exchange ideas with friends and teachers, and 4.4) Support social interaction by dividing learners into different groups with diverse abilities and interests.

Component 5: Building self-confidence in their abilities. The four sub-components include: 5.1) Listen and ask questions, 5.2) Encourage and give constructive feedback, 5.3) Give individualized feedback, and 5.4) Guide learners through the process.

3. Survey outcomes

The result of an analysis of teaching strategies that promote critical thinking in science classrooms at a primary school level was described in Table 2.

Table 2 Analysis of CT teaching strategies among science teachers.

Critical thinking teaching strategies	Statistical value (n = 44)		
	$\bar{X}$	S.D.	Level
1. Encouraging students to make their own decisions.	4.54	0.49	Highest
2. Allowing students to think and give reasons.	4.54	0.46	Highest
3. Providing a variety of learning materials.	4.55	0.44	Highest
4. Creating a group learning environment.	4.58	0.47	Highest
5. Building self-confidence in students' abilities.	4.56	0.54	Highest
Average Score	**4.55**	**0.44**	**Highest**

Table 2 showed an analysis of critical thinking teaching strategies of science teachers in a primary school science classroom. It was found that teaching strategies that promote critical thinking overall and in each aspect were at the highest level. When considering each aspect from highest to lowest average was as follows: Creating a group learning environment ($\overline{X}$ = 4.58, S.D. = 0.47), Building self-confidence in students' abilities. ($\overline{X}$ = 4.56, S.D. = 0.54). Providing a variety of learning materials. ($\overline{X}$ = 4.55, S.D. = 0.44), Allowing students to think and give reasons ($\overline{X}$ = 4.54, S.D. = 0.44), and Encouraging students to make their own decisions ($\overline{X}$ = 4.54, S.D. = 0.49), respectively.

Discussion

The development of critical thinking has been the topic of many educational contexts recently. There are numerous instructional methods that exist to encourage thinking critically in the classroom and educators can

use various instructional methods to promote CT and problem-solving. Likewise, students need to be exposed to diverse teaching methods that promote CT to nurture the CT learning process.

1. Results from an analysis of CT teaching strategies among science teachers

Different teaching strategies are featured in this study for science teachers in primary schools in Northeast Thailand and reached the highest level of critical thinking integrated practices ($\overline{X}$ = 4.55, S.D. = 0.49). It would conclude that the method effectively integrated critical thinking strategies into the science curriculum in primary schools. This is in line with the study by Rashid, & Qaisar, (2017) that after the intervention of critical thinking integrated role play, primary school students in Pakistan had strong CT skills, appeared more confident, and showed fair-mindedness by learning respect for others' feelings. The participants also enjoyed learning relationships with peers and shared their comments accurately and logically. The teaching strategies employed included questioning techniques, a whole class discussion, collaborative learning, social skills techniques, and ongoing monitoring through the learning process. In addition, Santos (2017, p. 3) concluded that the critical thinking applications and processes included research, observation, exploration, problem-finding, problem-solving, decision-making, obtaining information, critical questioning, construction of reliable knowledge, discussion and debate, valuation, solving and clarifying and concluding true statements, and meaning. Similarly, Kongkaew, & Juithong (2018) study by after the implementation of the 7E learning cycle, incorporating the Learning Together technique in a science class at a primary school, the students obtained critical thinking ability at the .01 level of significance.

2. Results from document inquiries.

Based on the findings, the researcher synthesized the implementation of teaching strategies that promote critical thinking in primary schools, which could be summarized into five components with 27 sub-components as follows:

Component 1: Encouraging students to make their own decisions.

Teachers should foster an environment in which students can make their decision because making a decision is a crucial stage in identifying many choices to suit the best individual goals, objectives, and values and to reduce the possible disagreement about problems. Students who can make good decisions are more likely to try new things. The finding is in line with a study by Langrehr (2008) that demonstrated activities for fostering critical decision-making, including distinguishing facts and opinions, distinguishing unsure conclusions, challenging the reliability of a claim, considering other points of view, and decision-making. The infusion of the mentioned activities in all studying hours or extra curriculum can be implemented in both face-to-face and online learning. Therefore, teachers should receive training on how to incorporate activities to give students opportunities to practice specific knowledge, particularly problem-solving, and they should be given time to put new teaching approaches into effect.

Component 2: Allowing students to think and give reasons

When using reason and critical thinking to analyze a problem, one step in the process is gathering information about it and looking into any additional factors that might have an impact on the conclusion. This allows one to judge whether the conclusion is accurate and, more specifically, what the current problem is. This is in line with Pornkul (2011) has proposed teaching activities that promote, critical thinking are listed below. Giving students the opportunity to think and give reasons encourages students to participate in the thinking of students while students are learning. critical thinking is the ability to evaluate information, increase significant questions, clearly formulate problems, collect and assess relevant information, use abstract concepts, think freely, and effectively interact with others. The finding is also consistent with the ideas of Susaraj (2008) that teachers should be very clear in selecting and processing the appropriate materials and teaching styles in the learning process by allowing students the opportunity to evaluate and support their arguments to foster high-level thinking.

Component 3: Provide a variety of learning materials

For effective teaching and learning, the teacher must be able to use various and appropriate teaching materials for students. As a result of practice and experience, teachers can design their instructional materials. Teaching materials that are presented with complex contents and lessons should be made to be more understandable and easier to remember. Utilizing a range of instructional materials through converting tedious activities into fun activities would help to encourage students' motivation and positive learning outcomes as they learn science, as described by Sinthaphanon (2009) has proposed teaching that promotes, critical thinking is listed below. Improve and change the teaching process. Emphasis on the critical thinking process in a systematic way Encourages students to make their own decisions Provide a variety of learning materials. According to Halpern (1999), recommended activities are based especially on real-world task-based learning activities with a variety of teaching materials to encourage students to practice thinking judgment in situations close to real life.

Component 4: Learning in a group setting

Compared to conventional approaches, this teaching strategy requires greater effort and input from both teachers and students. The teacher's role shifts from a director to a facilitator, and the students take on a more active in choosing their learning tasks. Teaching and learning management that encourages learners to learn and practice group process skills according to their roles, duties, and responsibilities in group work, including practicing thinking skills, researching, and seeking knowledge on their own. In addition, learners will gain experience in coexistence with others, helping others, accepting each other's opinions, building mutual trust, practicing leadership, and working in a team. This also includes different study groups, both formal and informal, so that teachers can place learning plans that lead to more effective learning.

Potts (1994) has proposed teaching activities that promote critical thinking as follows: Promoting interaction among students as they learn - Learning in a group setting often helps each member achieve more. Asking open-ended questions that do not assume the "one right answer" - Critical thinking is often exemplified best when the problems are inherently ill-defined and do not have a "right" answer. the use of group processes allows learners to work together to promote common objectives. For example, writing a report, creating a workpiece, discussing a group, or doing an experiment and having the ability to summarize knowledge. Likewise, Commeyras (1993) also suggested activities that are appropriate to promote critical thinking, such as collaborative learning group discussions, seminars, problem-solving activities, and role play. Discussion and dialogue activities also play a role in developing effective thinking and reasoning. Teachers also should allow students' responses during learning by responding to student questions or inviting students to take part in each other's group discussions.

Component 5: Building self-confidence in their abilities

Self-confidence is a crucial component of the human being that arises from the inner mind. It is the outcome of pride and worthiness. If students have self-confidence, they will be brave enough to voice their opinions and thoughts, make choices, and even respond to questions to engage in activities. The finding is in line with the study by Susaraj (2008), learners who have self-confidence can refine their thoughts. The selection of varied and suitable activities will satisfy the interests of the students. Similarly, Langrehr (2008). stated that teachings that promote critical thinking include the following: Building self-confidence teachers' listening, asking questions, and encouraging and giving constructive feedback would build up the students' confidence to be able to express ideas.

Limitation

Based on the perceived CTTS, the readiness of teachers in practicing CTTS becomes a reality in the case of science teachers at primary schools under the Primary Educational Service Area Office 1 Sakon Nakhon. However, these behaviors need to be observed through students' critical thinking, which is the limitation of this study. This preliminary study will be further investigated through variables such as barriers and obstacles in implementation, school planning, teacher preparation, and school community.

Recommendation

Recommendations for Future Research

1. Science teaching strategies that promote students' ability to think critically should be studied. at the next level.

2. Teaching strategies for teaching and learning management should be studied to promote the critical thinking abilities of teachers in other subjects.

An Investigation of Teachers' Competencies in Active Learning Management in Primary Schools

Patcharida Tiyaboot[1]
Vijittra Vonganusit[2]
Brendan D. McKell[3]
Yatawee Chaiyamat[4]
Sumran Gumjudpai[5]

Abstract

The purposes of this research were to examine teachers' competencies in active learning management from 12 academic document papers and researches related to active learning management to determine the primary teachers' competency in active learning management. The data was analysed by content analysis. The findings revealed that the five components of primary teachers' competencies in active learning management consisted of 1) Designing and developing a learning management plan, 2) Organizing teaching-learning activities, 3) Managing teaching and learning processes through the thinking process and action, 4) Using technology media in learning management, and 5) Implementing measurement and evaluation in instructional settings.

Keywords: Teachers' Competency, Active Learning Management

Introduction

Knowledge and skills required to thrive in 21st-century students combined with traditional academic learning will equip students to succeed in the rapidly changing digital economy. How about teachers? What competencies will teachers of the 21st century need to equip students? How are they different from the competencies that teachers once required?

The information age has brought about the advancement in communication that is borderless and allows access to resources anywhere and anytime. Globalization's impact has also led to an era where people are always seeking knowledge and learning new things. Research provides evidence that learners cannot be developed to apply the knowledge they have gained in class to practice well when traditional teacher-centered instruction is used. Therefore, teachers must adapt their teaching and learning strategies in light of the changes in society, technology, and student learning styles to develop learners who can seek knowledge and skills, and a self-understanding until they acquire meaningful learning (Khammani, 2008).

The educational community has been looking into alternative teaching-learning methods involving active learning strategies, aiming to equip teachers with new knowledge and skills in teaching practices. Thus, several studies are widely recognized due to the positive outcomes of implementing active learning strategies, such as increased student engagement and performance as well as teacher competency in meeting professional teaching

standards (Neves, Lima, and Mesquita, 2021, pp. 9230-9231; Situmorang, Gultom, Mansyur, Gultom, & Ritonga, 2022, p. 677; Kaewchote, & Wattanathum, 2022, p. 1566).

Many educators' different definitions of active learning have been given as follows: Wattana (2003, pp. 30-31) has defined the meaning of active learning as a learning process that allows students to learn meaningfully through collaboration between students. In this regard, teachers must reduce their role in teaching and giving information to learners directly. Include procedures and exercises that will pique students' interest in undertaking more diverse activities. Whether it be speaking, writing, or having a conversation with friends, experience exchange is important.

The active learning approaches also often embrace the use of cooperative learning groups, a constructivist-based practice that places particular emphasis on the contribution that social interaction can make. Active learning was first defined by Bonwell and Eison (1991, pp. 1-2) as "anything that involves students in doing things and thinking about the things they are doing". Active learning, which grows from developments in adult, cognitive, and educational research, replaces traditional lecture formats with more interactive activities that invite students to participate in learning. These activities include fostering conceptual awareness, applying knowledge through experience, and transferring skills across contexts. In addition to emphasizing students' skill development, active learning encourages them to explore their attitudes and values (Mayer and Jones, 1993, p. 6; Petty (2004, cited in Boonmak, 2019, p. 76). In addition, Silberman & Auerbach (2006, pp. 10-11) define active learning as learning management that allows learners to speak, listen, read, write, and express their opinions while doing activities in problem-solving processes, informal small group discussions, simulations, case studies, role play, and other activities in which learners must apply what they have learned in such activities into practice.

According to Medicine Studies, Prince of Songkla University (2016, p. 2), learners who participate in active learning have the chance to complete activities. There are methods for working and solving problems in real life as well as abilities for thinking. To share what they are learning, students can discuss, write, and engage in debate with teachers and peers. Students can also discipline themselves in the process of problem-solving and arranging their thoughts.

Furthermore, Boonmak (2019, p. 77) concludes that active learning is an activity in which students participate in learning through various activities in various ways with hands-on practice through listening, speaking, reading, and writing. Emphasis is placed on encouraging students to develop advanced thinking processes and to think critically, analyze knowledge, synthesize, and evaluate information.

Teachers' competency in teaching and learning is a key factor in determining student quality. Their ability and wisdom in handling learning activities will have a direct impact on students' active involvement in learning activities. Therefore, the development of teachers' competency involving the efforts of fostering positive attitudes was a major agenda to strengthen the teaching profession and to ensure great development of education quality in many countries around the world (Awang, Jindal-Snape & Barber, 2013). Approaches that promote active learning often explicitly help students to make connections between new information and their current mental models and extend their understanding. In other cases, teachers may design learning activities that allow students to confront misconceptions, and reconstruct their mental models based on a more accurate understanding. In addition, there is some evidence that active learning approaches are an effective tool in making classrooms more inclusive at national and international levels.

In the past decade, the Thai Ministry of Education has encouraged the adoption of various teaching and learning approaches, including active learning principles, and organized the teacher training-Boot Camp-to improve teachers' English proficiency and teaching methodology. Thus, more research studies have been conducted on

the active learning approach on teachers' and students' perceptions. Many academics have discussed and investigated primary school teachers' competencies in active learning management as follows:

Only a few Thai researchers follow up on some concerns that hinder the efficacy of implementing the approach. For example, Yusuk's (2020, p. 36) study with 41 in-service teachers after 40 hours of training on the active learning approach. The findings revealed that the approach implemented in the classroom was moderately

practical. However, based on classroom observation, classroom facilities did not fully support active learning. From the interviews, some negative impacts hinder the effective implementation of active learning in the classroom such as limited resources, space, and time, as well as challenges in classroom management. Similarly, Kulachit, & Nuangchalerm (2021, p. 2929) indicated that 12 primary English teachers in Thailand's Kalasin Province had ideas and concepts of active learning but need to improve active learning in their classrooms at a high level of practice.

In light of the previous studies, the researcher is interested in examining the competency of in-service teachers on active learning management to provide promising points for the improving professional development of primary school teachers and active learning classroom practices in a primary school in Northeast Thailand.

Research Objective

The objective of the study was to identify the primary teachers' competency in active learning management from the published papers.

Research Methodology

The 12 relevant educational and academic documents drawn from published articles, papers, and theses through Google Scholar and ThaiLIS in Thailand and international contexts were analyzed to identify teachers' competencies in active learning management in primary schools. The components were analyzed using the content analysis approach from the sources and assessed the frequency of more than 50 % for drafting the teachers' competencies in active learning management. The design of teacher training promotes the effective application of knowledge and skills. The study findings would represent a starting point for a comprehensive investigation into and support Thai primary school teachers in the development of active learning management skills. The author intends to undertake a study with in-service teachers to look at how competence in active learning management has evolved. The data will provide insightful information for further running the research project and program input on efficient strategies for encouraging this development.

Conclusion

The results of the synthesis of competence components in active learning management of 12 documents both domestically and internationally found several competency components in active learning management are all interrelated principles. The researcher, therefore, used a frequency criterion of 50 percent or more in the selection. The components of teachers' competencies in active learning management in primary schools under Nakhon Phanom primary educational service area office 2. could be divided into five components as follows: 1) Designing and developing a learning management plan, 2) Organizing teaching-learning activities, 3) Managing teaching and learning processes through the thinking process and action, 4) Using technology media in learning management, and 5) Implementing measurement and evaluation in instructional settings.

Table 2 Teachers' competencies in active learning management

Teachers' competencies in active learning management		
Components	Sub-components	Indicators
Designing and developing a learning management plan	- curriculum design	-Analyze curriculum for lesson planning
	- developing a learning management plan design	- Determine the goals of learning management that reflect the needs of the learners.
		- develop a learning management plan that allows learners to relate ideas about a given topic
Organizing teaching and learning activities	- learning management model	- student-centered model
		-cooperative learning
	- learning activities	- organize learning activities that allow students to do activities according to their interests.
		- organize learning activities that focus on students to apply in real life
Managing teaching and learning processes through the thinking process and action	- learning processes through the thinking process and action	- organize activities that focus on developing higher-order thinking skills for learners
		- organize activities that allow learners to connect old knowledge with new knowledge
		- Encourage learners to interact with teachers and classmates.
Using technology media in learning management	- technology media in learning management	- Encourage learners to use technology in their pursuit of knowledge.
		- Create a classroom atmosphere that is conducive to learning.
Implementing measurement and evaluation in instructional settings	- Methods for measuring and evaluating learning management	- learning assessments are evaluated and results are summarized to improve learning management
		- have an assessment by a group of friends
		- learners have an assessment by self

Discussion

The current study reported that the five components of primary school teachers' competency involved 1) Designing and developing a learning management plan, 2) Organizing teaching and learning activities, 3) Managing teaching and learning through the thinking process and action, 4) Using technology media in learning management, and 5) Implementing measurement and evaluation in instructional settings. This is in line with Neves, Lima, and Mesquita (2021, p. 9231), the scope of educational competency includes teachers must be able to plan and design the teaching and learning process, work collaboratively, and be able to communicate effectively both in oral and in written ways among other. Kulachit, & Nuangchalerm (2021, pp. 2938-2939) reported the study findings that Boot camp teachers are trained in professional English and communicative skills, designing lesson plans, using a variety of techniques and strategies, and preparing learning materials, media, equipment, games, and worksheets. This enables students to actively participate in lessons. Boot camp teachers also use technology and other learning materials from social media and online resources to engage students in active learning while integrating content and learning activities. In terms of assessments in active learning classrooms, boot camp teachers express opinions toward active learning at high levels, and some items indicate they sometimes do active learning, such as writing lesson plans to organize learning activities, organizing events for challenging situations, promoting and developing thinking skills for a wide range of advanced thinking, encouraging students to participate in learning and self-awareness and using a wide range of measurement and evaluation tools.

This is also in line with Chanaman (2020, p. 34) who states that active learning is the learning management process that focuses on the learners. Teachers will organize various learning activities and allow students to do the activities through a group or individual process. As a result, learners can exchange knowledge and use advanced thinking processes, namely, analytical thinking, and synthetic thinking which active learning management will help learners construct their knowledge. In addition, Yusuk (2020, p. 36, 52) examined how EFL schoolteachers perceived and employ active learning in classrooms. She also discovered that majority of the teachers had a positive perception of active learning. Teachers involved in active learning management viewed it positively. They are also prepared to introduce active learning into their classrooms as it can enhance students' active participation and self-confidence. Educators should provide more training for teachers who engage in active learning, active instruction, and active assessments so that they are active teachers who can design and develop classrooms for 21st-century learning. The benefits of active learning include improved learning outcomes for students and increased content knowledge and higher-order thinking, motivational learning, communicative and interpersonal skills, learning through collaboration and interaction with other students, and increased students' self-esteem.

Neves, Lima, and Mesquita (2021, p. 9230) also discovered that the most critical teacher competencies for active learning which were most often selected by 205 respondents: teamwork (collaborative work with other teachers, relation with students (empathy), giving feedback throughout the learning process, use of new technologies, selection of methodologies in the teaching and learning process, and creativity.

Recommendation

Regarding the findings of the study, considerations are suggested. First, schools should develop and strengthen competency in active learning management by raising awareness among teachers to emphasize the importance and need for cooperation in the management of active learning. Second, schools should establish a system for monitoring and evaluating the development of continuous active learning management. Third, organizing activities encourage school administrators and teachers to be aware of professional standards and ready to develop themselves continuously. Encourage teachers to gain knowledge and understanding of forms, techniques, and active learning management methods by organizing a meeting. School administrators and teachers

should examine the factors affecting active learning management that has direct and indirect impact and design active learning management to be attractive.

Brendan D. McKell[3]
Yatawee Chaiyamat[4]
Sumran Gumjudpai[5]
Jinda Lapho[6]

Abstract

This study aimed to obtain data and information on the need for learning management using brain-based learning (BBLM) among teachers in primary schools in Northeast Thailand. The research method used was a set of questionnaires filled out by 226 teachers in primary schools in Srisongkram district, Nakhon Phanom province in Northeast Thailand. Data analysis was quantitative and descriptive in the form of percentage, mean, standard deviation, and the Priority Needs Index ($PNI_{Modified}$). The results revealed that the current conditions of BBLM in primary schools were at a moderate level ($\overline{X}$ = 3.19, S.D. = 0.36), whereas the desirable conditions were at the highest level ($\overline{X}$ = 4.68, S.D. = 0.41). The primary school teachers' needs in BBLM were sorted in descending order as follows: Presentation ($PNI_{Modified}$ = 0.519), followed by Learn-Practice ($PNI_{Modified}$ = 0.494), Summary ($PNI_{Modified}$ = 0.458), Warm-up ($PNI_{Modified}$ = 0.455), and Apply ($PNI_{Modified}$ = 0.408).

Keywords: Priority Need Index, Brain-Based Learning Management

Introduction

This paper is based upon part of the work that will form a much larger doctoral study describing the use of brain-based learning management (BBLM) in primary school classrooms in Northeast Thailand. It is hoped that further development on this finding would result in a training approach that will better prepare in-service primary school teachers for effective teaching and learning.

The underlying learning theory that guides the work of many teachers in the classroom is difficult to discern or explain. A theory in and of itself is different presumptions about the nature of knowledge, the possibility of choice, and what it means to be human (Kohn, 1993, p. 10). Learning is a complex and continuous process that occurs whenever people interact with other human beings and objects in their surrounding environments. Learning may as well take place consciously or subconsciously. Interaction is very important for creating learning experiences for learners to enable the learners to acquire cognitive, psychomotor, and affective behavioral changes (Jensen, 2000, p. 5). The most important aspect of brain-based learning is what the learners are expected to perform, how the learners are supported to accomplish their expectations, and how they engage with the challenges.

The Office of Basic Education Commission (OBEC) aims to increase students' academic achievements and to develop learners through brain-based learning (BBL). Integrating learning concepts with brain works by applying BBL strategies commonly known as BBL, which have more positive effects on students' academic attitudes, motivation, and knowledge than teacher-centered learning. The policy shed lighted that all basic schools in Thailand used BBL in the classrooms with school administrators' and teachers' participation by creating a physical environment that stimulates students' brains causing effective learning (OBEC, 2015, p. 2). For example, teachers use various activities to teach through different brain channels and use new materials, technology, and innovations that are exciting and colorful in a colorful classroom environment. Similarly, the strategy to implement the BBL is to create a classroom atmosphere more relaxing and encourages students to be enthusiastic learners and enjoy participating in classroom activities, in contrast to the traditional approaches and models (Materna, 2000, p. 36).

In addition, Cross (1999, p. 23) states that the essence of learning is the teacher's effort to help their students build a connection between or among ideas or concepts to challenge thought and to engage students actively in questioning and thinking. The theories and principles of BBL are based on brain function and teachers should attempt to monitor brain function through classroom management techniques. In education, evidence of the influence of BBL strategies can be seen in various studies in terms of increased motivation, academic performance, and work memory. For example, Jampamoon (2014, p. 43) reported that after the implementation of brain-based learning activities on English speaking class of primary school students, the students' English-speaking ability increased significantly at the .01 level. Likewise, the BBL method is effective for all students, but it affects high-ability students more as compared to low-ability students (Noureen, Awan, & Fatima, 2017, p. 93). In addition, the findings of a study by Alanazi (2020, Abstract) confirm that BBL methods are likely to improve student learning and outcomes. BBL uses neuroscience to create an informed curriculum and lesson design to work around the brain's ability to change, remap, and recognize itself when learning new information. Thus, the newer skills are practiced, the easier learning becomes. The core principles of BBL are to better retention and learning among students.

Although it has been shown that brain-based learning improves student learning, little is known about whether elementary instructors intentionally or unintentionally employ brain-based teaching methods in the classroom. There isn't enough data on how to use brain-based learning tactics, therefore it's impossible to estimate how many elementary instructors are familiar with the theory and skilled at doing so.

Therefore, the study investigated the extent to which teachers are aware of BBL theory and are using BBLM in the classroom of primary schools. The study will provide a better understanding of what information currently teachers have and what they need to implement curriculum using the framework of BBL.

Research Objectives

The objectives of the study were as follows:

1. To investigate the current and desirable conditions of learning management using BBLM of teachers in primary schools.

2. To examine the need for using BBLM for the learning management of teachers in primary schools.

Research Methodology

The study was conducted with the research methodology as follows: The sample of this study was 226 out of 550 teachers at primary schools in Srisongkram district, Nakhon Phanom province in Northeast Thailand the first semester of the 2022 academic year. The teachers were selected using stratified random sampling and a table of Krejcie & Morgan for sample size determination (Krejcie & Morgan, 1970, pp. 608-609). The research instrument

was a 5-point Likert scale questionnaire that had two parts as follows: The respondents' background information and the current and desirable conditions of BBLM of teachers in primary schools, consisting of 25 items related to Warm-up, Presentation, Learn-Practice, Summary, and Apply.

The qualification examination of the instruments used in this research was obtained. The content validity of the questionnaire was examined by five experts. The try-out session of the research tools was administrated with 30 non-sample teachers. The reliability of the questionnaire was determined through the Cronbach's Alpha Coefficient as follows: 1) the questionnaire on the current and desirable conditions of BBLM of teachers in primary schools had the index of item objective congruence (IOC) at 1.00, the discriminative power of each item was ranged between 0.51 - 0.82, with the reliability of 0.96. The discriminative power ranged between 0.62 - 0.87 with a reliability of 0.98. The researcher questionnaire forms were distributed to 226 teachers in primary schools for data collection in person. Out of 226 distributed questionnaires, 226 were returned. Thus, the return rate was 100 percent.

For data analysis, the researcher statistically analyzed data by using frequency distribution, mean, and percentage. For the current and desirable conditions of BBLM of teachers in primary schools, mean and standard deviation were employed. The configuration of the mean interpretation values for five intervals are:

4.50 - 5.00 means the current and desirable conditions of the highest level
3.50 - 4.49 means the current and desirable conditions of the high level
2.50 - 3.49 means the current and desirable conditions of the moderate level
1.50 - 2.49 means the current and desirable conditions of the low level
1.00 - 1.49 means the current and desirable conditions of the lowest level.

The respectively sorted needs in BBLM of teachers in primary schools by using the Modified Priority Needs Index ($PNI_{Modified}$) (Wongwanich, 2015, pp. 275-279). The formula for the calculation used for this study was as follows:

$PNI_{Modified} = (I - D) / D$

PNI = priority needs index
I = desirable conditions mean
D = current conditions mean

Results

The research results are shown as follows:

1. The current conditions of BBLM of teachers in primary schools were at a moderate level ($\overline{X}$ = 3.19). When considering each aspect, apply ($\overline{X}$ = 3.33) was rated at the highest level, followed by Warm-up ($\overline{X}$ = 3.21), Summary ($\overline{X}$ = 3.19), Learn-Practice ($\overline{X}$ = 3.12) and Presentation ($\overline{X}$ = 3.10), respectively. The desirable conditions were at the highest level ($\overline{X}$ = 4.68). When considering each aspect, Presentation ($\overline{X}$ = 4.71) was rated at the highest level, followed by Apply ($\overline{X}$ = 4.69), Warm-up ($\overline{X}$ = 4.67), Learn-Practice ($\overline{X}$ = 4.66), and Summary ($\overline{X}$ = 4.65), respectively as shown in Table 1.

Table 1: The analysis results of current and desirable conditions of BBLM

BBLM	Current Conditions			Desirable Conditions		
	$\bar{X}$	S.D.	Level	$\bar{X}$	S.D.	Level
1) Warm-up	3.21	0.53	Moderate	4.67	0.46	Highest
2) Presentation	3.10	0.51	Moderate	4.71	0.45	Highest
3) Learn-practice	3.12	0.54	Moderate	4.66	0.45	Highest
4) Summary	3.19	0.53	Moderate	4.65	0.45	Highest
5) Apply	3.33	0.46	Moderate	4.69	0.45	Highest
Average Score	**3.19**	**0.36**	**Moderate**	**4.68**	**0.41**	**Highest**

Table 1 shows the analysis results of current and desirable conditions of BBLM of teachers in primary schools. It shows that the current conditions for the desirable conditions in all aspects were below average. In conclusion, the BBLM of teachers in primary schools rated their needs in all aspects at the highest level.

2. The needs in BBLM of teachers in primary schools were sorted in descending order using the Modified Priority Needs Index ($PNI_{Modified}$) shown in Table 2.

Table 2: The Modified Priority Needs Index of needs in BBLM

BBLM	Current conditions mean	Desirable conditions mean	$PNI_{Modified}$	Order
1) Warm-up	3.21	4.67	0.455	4
2) Presentation	3.10	4.71	0.519	1
3) Learn-practice	3.12	4.66	0.494	2
4) Summary	3.19	4.65	0.458	3
5) Apply	3.33	4.69	0.408	5

Table 2 shows the needs of BBLM of teachers in primary schools with a $PNI_{Modified}$ value between 0.408 - 0.519. The items were ranked in descending order as follows: 1) presentation ($PNI_{Modified}$ = 0.519), 2) learn-practice ($PNI_{Modified}$ = 0.494), 3) summary ($PNI_{Modified}$ = 0.458), 4) warm-up ($PNI_{Modified}$ = 0.455), and 5) apply ($PNI_{Modified}$ = 0.408).

Discussion

1. The current and desirable conditions of learning management using BBLM of teachers in primary schools could be described as follows:

1.1 The current conditions of BBLM of teachers in primary schools were rated at a moderate level.

The finding accorded to DiTullio (2018, p. iv, 24) who revealed that teachers had little knowledge of BBL theory unless they had engaged in professional development specific to BBL. However, teachers often unknowingly implemented BBL strategies. The study included recommendations for BBL teacher preparation

programs. Likewise, Srichan (2016, p. 3) indicated that the way teachers manage learning in primary schools is diverse, depending on the knowledge, skills, and experience of each teacher, as well as the policies for promoting the learning management of the schools, as well as the methodology of learning management must be consistent with the subject content or be appropriate to the learner's grade level.

1.2 The desirable conditions were rated by participants at a high level.

This is because teachers at the primary level have expectations and desires to organize brain-based learning activities aimed at improving learning management. The result is supported by the study of Schwille, Dembélé, & Schubert (2007, p. 9) that teachers and administrators, as well as other educational stakeholders, are more aware of implementation strategies and the role of various mechanisms. An increasing concern for the quality of educational outcomes and the overall quality of the educational process. This is also in line with Yoskhamlue, & Chittranun (2021, p. 799) that the primary school administrators and teachers rated the moderate-level current and high-level desirable conditions in BBLM at primary schools under the Office of Udonthani Primary Educational Service Area 3. The study suggested the need to explore BBLM in more depth to support the potential benefits of BBL to education.

2. The need for BBLM of teachers in primary schools was sorted in descending order as follows: Presentation was ranked at the highest level, followed by Learn-Practice, Summary, Warm-up, and Apply.

This is because the presentation stage is a learning arrangement that opens up opportunities for all learners effectively by visualizing through hearing voices, moving, and using the senses, focuses on giving learners cognitive skills, engaging learners in the presentation of knowledge in a variety of ways, and learning by materials, such as real media, photo cards, word cards, number cards, songs, etc. This is also consistent with Chantarachit (2010, p. 341), who states that the presentation stage of teachers' learning management starts from studying materials or from students' conducting surveys to find answers from knowledge sources in a variety of interesting ways. The main principle of the activity is to provide students with the opportunity to engage in groups or individual activities and to recognize and comprehend new information or lessons. A variety of perceptions are more concrete, including interaction and collaboration with others.

In terms of the Learn-Practice stage, this is because of learning management with an emphasis on learners' hands by engaging learners in activities, managing both individual and group learning and learning management, and allowing learners to practice repeatedly until knowledge and skills are developed. Likewise, Raha (2017, p. 32) discusses hands-on learning, which allows learners to experiment with knowledge, and practice activities until understanding is achieved and can visualize the knowledge of the subject.

The Summary stage is rated at a high level because the activity allows learners and teachers to summarize knowledge together with the content, encouraging learners to summarize knowledge in various ways, including thought charts, knowledge charts, worksheets, etc. The stage also includes exchanging learning, correcting mistakes together between learners or learners and teachers, and organizing an exhibition board for the student's work to appreciate the work of oneself and others. This is also consistent with Lertwicha (2015, p. 32), who indicated that the Summary stage brings about the experience of learning to summarize a topic or topics. The categorization of data and knowledge using color, and text size help the brain easily record that information by using diagrams, tables, graphs, and images, and provides the brain with systematic thought processes.

Likewise, the warm-up stage was placed fourth. The activities include organizing brain stimulation activities before starting the lessons with brain exercises, body or stretching activities, and stimulating both sides of the brain using music poems, games, and fun activities. The BBLM stimulate and motivate learners' curiosity, makes them learn more, and inspires them to seek solutions. Lertwicha's (2015, p. 27) study has mentioned Warming Up as an activity that keeps the brain awake in preparation to learn from three methods: 1) brain exercise, by moving the body across the core of the body to stimulate and develop both brains, 2) rhythm, the activity allows the child to move freely in different parts of the body, using music, rhythm and melody, rhymes or

movement accompaniment and 3) stretching, with stretching in various postures the cerebellum develops a stronger and more developed body.

Another stage that emerged from the study was the Apply stage. The activities in this stage allow learners to create their new workpieces manually, applying knowledge, skills, and attitudes with integrating across subject Groups. Learners apply newly gained knowledge to everyday life and solve problems for the future. Chantarachit (2010, p. 341) confirmed that the activities in this stage encourage learners to bring knowledge to suit the context and the newly faced situation. To get the right and accepted answers high maturity may deploy applied activities in tandem with expanding or re-knowledge due to the knowledge expansion stage. It is an activity stage that encourages learners to use their experiences, and additional knowledge, integrating ideas that will be applied to new problem situations, to modify and design learning activities that lead to concepts. A new practice that differs from the original in appearance creative because expanding knowledge will be more complicated.

Recommendation

Based on the description above there are some recommendations related to BBLM for stakeholders. For example, school administrators can use the obtained information to set guidelines for developing teaching and learning arrangements to ensure that teaching practices are consistent with contextual conditions and appropriate to educational institutions. Teachers should also employ the found results from the study to design appropriate and effective BBLM. Suggestions for future research include investigating the factors affecting learning organization BBLM, the learning outcomes using BBLM of teachers, and guidelines for developing in-service teachers on BBLM at all school levels.

A Study of Specific Competency of a Fundamental Computer Science Course for Undergraduates

Kannikar Kamolrat[1]
Vijittra Vonganusith[2]
Sumran Gumjudpai[3]
Yatawee Chaiyamat[4]
Brendan D. McKell[5]

Abstract

This research aims to synthesize specific competencies and indicators of a fundamental computer science course for undergraduates. We have synthesized the key competencies from 1) 50 documentaries through google scholar and THAILIS on information technology competency, information and communication technology competency, digital competency of undergraduate students, and employment needs for business sectors, 2) The national higher education qualifications framework; and 3) The descriptions of a fundamental computer science course. The findings of specific competencies of undergraduates in the fundamental computer science course of a computer science program in the faculty of science and technology at Sakon Nakhon Rajabhat University (SNRU) could be categorized in accordance with the research objective into three competencies with seven sub-competencies and 45 indicators.

Keywords: Specific Competency, Fundamental Computer Science Course

Introduction

The increasing number of bachelors is not only the reason for the difficulty of their employability but also the competency of fresh graduates falls short of workplace expectations (OEC, 2009; SHR, 2014; Thianboocha A., 2016). According to the global market changes, employers have distinctly expressed their need for graduates who can be based on changes in the global economy. Additionally, they claim that recent graduates are unequipped and lack practical and soft skills because they are not taught in universities (Al-Shehab, AL-Hashimi, Madbouly, Reyad, and Hamdan, 2021). In line with this period of globalization, national and international policy documents refer to competencies as essential educational tools for promoting students' wellness. MHESRI (2021) has been concerned with the development of educating graduates' knowledge, attribute, and skills by the time of graduation at a higher education level:

Higher education in Thailand aims to produce graduates and improve the opportunities for lifelong learning for all ages, fostering the development of morals and ethics, and have the necessary competencies to support society and disruptive technology both

now and in the future, including increasing the nation's competitiveness at the international level and improving people's quality of life, while also having love and pride in institutions, culture, and good traditions. Graduate training and workforce development must be carried out in close collaboration with numerous sectors, including the public and private sectors, civil society, and the local community.

Additionally, MHESRI's (2022) Ministerial regulations on Higher Education Qualifications Standard 2022 have been made public and defined learning outcomes as outcomes received by learners through the learning process through education, training, or experiences gained through practice or actual learning at work during study. The graduates' learning outcomes at all levels of higher education certification criteria must include at least the following four elements: 1) knowledge, 2) skills, 3) ethics, and 4) personal qualities. Therefore, each curriculum should emphasize teaching and learning for each subject to ensure that students may obtain adequate competency. Each subject should be described in terms of what students can do when studying by applying their existing knowledge, skills, and attributes or attitudes to use in the tasks assigned to accomplish the intended purposes. This will be consistent with the learning outcomes for graduates at all levels in maintaining academic standards and meeting the requirements for higher education qualifications.

From the Thai higher education philosophy and the new higher education system on producing graduates and developing manpower according to the Higher Education Qualification Standards of MHESRI, as previously stated. In the teaching and learning of a Fundamental Computer Science Course, a Thai university has attempted to take both educational and technological factors into account to transform the teaching and learning management system to facilitate university students during the COVID-19 impediment and to promote learner competencies to meet the market needs.

According to a survey conducted by Shadbolt from 2012 to 2013, employment rates for computer science graduates increase closer to the average (5.4% of 2008/2009 computer science graduates were unemployed 3.5 years after graduating). Consequently, it is feasible to infer that there are issues for computer science graduates, specifically with the pace at which they progress to employment. In addition, mixed views among graduates on how well computer science courses prepare them for the workplace and whether the balance between technical and general skills is appropriate. In general, graduates felt that their university had not done enough to prepare them for the workforce in terms of commercial skills and business acumen, according to the study's findings. This is related to the employability of computer science graduates who frequently lack knowledge of their options and pathways into employment as well as the services available to them when making key career choices. (Shadbolt, 2016)

The faculty of science and technology of Sakon Nakhon Rajabhat University (SNRU) gives opportunities for each program to improve students' specific competencies to facilitate skill growth. There is relatedness between graduates of computer science's academic and work preparation. Little is also known, however, about the specific competencies of undergraduates in a higher education curriculum and whether the required competencies meet the workforce. The results obtained were expected to be a source of information for my recent research project. Thus, the researchers are interested in exploring specific competencies for undergraduates in a fundamental computer science course at SNRU to improve student quality to meet the future workforce.

Research Objective

This research aims to synthesize specific competencies and indicators of a fundamental computer science course for undergraduates.

Research Methodology

For the specific competencies of undergraduates in a fundamental computer science course, the researchers have synthesized information from reviewed papers and studies in more depth on many aspects of each competency. By determining the frequency which concerns are chosen to be considered with a frequency of more than 50%, in conjunction with content analysis related to a fundamental computer science course's description and the national higher education qualifications framework. As a result, three competencies in a fundamental computer science course are more clearly defined.

Table 1: Specific competencies in a fundamental computer science course.

Core-competencies	Sub-competencies	Indicators
Competency 1: Using tools interactively 1A-Data and information access, evaluation, and management 1B-Basic computer programming (ISTE, 2007; UNESCO, 2011; NICS, 2012; Srinakharinwirot University, 2014; Siddoo, V., Sawattawee, J., Janchai, W., & Yodmongkol, P.,2017; Kaeophanuek, Na-Songkhla, and Nilsook, 2018; Techataweewan and Prasertsin, 2018; ONDE, 2019; OCSC, 2019; Sakolkijrungroj, 2020; Aničić, K. P., & Bušelić, V.,2020; IPST, 2021; Park, H., Kim, H.S., & Park, H.W.,2021) (Boonjing, 1999; Suriyapiwat , 2010; Sommerville, 2011; Chuen-im and others, 2012; Savitch, Walter, and Mock, Kendrick, 2015; Baesens, Bart, Backiel, Aimee and Broucke, Seppe Vanden, 2015; Uprasitwong, 2015; Im-siriwong, 2516; Yu, Y., Wu, P., & Su, Y., 2017; Timothy J. O'Leary, Linda I. O'Leary and Daniel A. O'Leary, 2017; Janpla, S., &	1A-Data and information access, evaluation, and management	1. Search data and information online as well as in books and textbooks. 2. Verify the data and information that the subject that truly meets the needs. 3. Search for data and information from trustworthy sources. 4. Consider selecting up-to-date data and information. 5. Analyze data and information into smaller issues. 6. Synthesize related data and information. 7. Gather data and information for presentations.
	1B-Basic computer programming	
	1B1-problem analysis and requirement	1. Define the objective of programming. 2. Analyze input data properly. 3. Analyze the program's desired output format. 4. Analyze program-required variables. 5. Analyze the program's algorithm.
	1B2-Program flowcharting and pseudo coding	1. Define the meaning of symbols used in programming flowcharts. 2. Write program flowcharts according to the program's algorithm. 3. Write pseudo code according to the program's algorithm.

Core-competencies	Sub-competencies	Indicators
Piriyasurawong, P., 2018; Chemerys, H., Osadcha, K., Osadchyi, V., & Kruhlyk, V., 2019; Djumaboev, S., Usmonov, S., & Ergashev, U., 2021; Prakobphon, 2021)	1B3-Programming	1. Produce sequential programming. 2. Produce condition programming to make decisions. 3. Produce loop programming. 4. Produce condition programming to make decisions. 5. Produce modular programming.
	1B4-Program testing and debugging	1. Test a program. 2. Debug a program.
	1B5-Program documentation and maintenance.	1. Produce program documentation. 2. Maintain and update programs.
Competency 2: Acting independently 2A-Systematic problem-solving 2B-Creation of basic programming tasks (ISTE, 2007; TQF-HEd, 2009; Partnership for 21st Century Skills (P21), 2011; Panich, 2012; Sintapanon and others, 2012; Sung-ong, 2012; KMUTNB, 2014; Stratford High School, 2015; Neelayothin, 2016; Hollister, J. M., Spears, L. I., Mardis, M. A., Lee, J., McClure, C. R., & Liebman, E.,2017; Aničić, K. P., & Bušelić, V.,2020; IPST, 2021; Department of Computer, 2021)	2A-Systematic Problem-solving analysis, requirement, and evaluation	1. Identify problems clearly and carefully. 2. Gather thorough information regarding problems. 3. Design a step-by-step solution. 4. Perform the troubleshooting procedures designed. 5. Select an appropriate solution. 6. Present and explain a solution.

Core-competencies	Sub-competencies	Indicators
(Torrance and Myers, 1962; Guilford,1967; Anderson and et al., 2001; Khammanee, 2011; Songkram, 2013; Khenkhok & Rachvijit, 2016; Yu, Y., Wu, P., & Su, Y., 2017; Janpla, S., & Piriyasurawong, P., 2018; Chemerys, H., Osadcha, K., Osadchyi, V., & Kruhlyk, V., 2019; Pitaksongkram & Jamjan, 2020; Yinghueng & Rampai, 2020; Thitipetchakul & Samutpaojinda, 2021; Djumaboev, S., Usmonov, S., & Ergashev, U., 2021; British Council, 2021)	2B-Creation of basic programming tasks to solve issues or create new things.	1. Establish goals for creative thinking in computer program development to solve issues or build new things. 2. Process knowledge or information relevant to issue resolution or the invention of new items in computer program development. 3. Think or imagine new ideas to solve issues or create new things in computer program development. 4. Use several strategies may be used to broaden the scope of computer program development from the initial concept to a variety of concepts that can be utilized to build new things. 5. Evaluate and select fresh ideas for solving issues or developing new things in computer program development. 6. Develop new computer programs that are prototype concepts that can be used and produce greater outcomes than the original. 7. Present and explain newly built computer programs.
Competency 3: Interacting diverse work groups 3A- Morality, and Ethics 3B- Positive Attitudes 3C- Teamwork (ISTE, 2007; TQF-HEd, 2006; NICS, 2012; Makletsov, S. V., Starshinova, T. A., & Khabibullina, G. Z., 2016; Chiu, K. K., Mahat, N. I., Rashid, B., Razak, N. A., & Omar, H., 2016; Barbarash, D., 2016; Edokpolor, J. E., & Somorin, K., 2017; Yu, Y., Wu, P., & Su, Y.,2017; Kaeophanuek, Na-Songkhla, and Nilsook, 2018; Techataweewan and Prasertsin, 2018; ONDE, 2019; Sakolkijrungroj, 2020; IPST,	3A-Morality and Ethics	1. Use data and information in a moral and ethical manner. 2. identify the work's resource references appropriately.
	3B- Positive Attitudes	1. Follow a code of ethics when developing works for programs. 2. Demonstrate positive behaviors while leveraging information. 3. Demonstrate positive behaviors when working in computer science.
	3C- Teamwork	1. Communicate with others to solve issues or build new ones to establish projects collaboratively. 2. Work with others to develop computer programming. 3. Be a leader and follower in developing computer programming.

Core-competencies	Sub-competencies	Indicators
2021; Park, H., Kim, H.S., & Park, H.W.,2021)		

Table 1 shows the specific competencies of undergraduates in the fundamental computer science course, which could be categorized into three competencies with seven sub-competencies and 45 indicators as follows: Competency 1 Using tools interactively consisting of 1A-Data and information access, evaluation, and management with one sub-competency and seven indicators, and 1B-Basic computer programming with five sub-competencies and 17 indicators; Competency 2 Acting independently consisting of 2A- Systematic problem-solving with six indicators, and 2B- Creation of basic programming tasks with seven indicators; and Competency 3 Interacting diverse work groups consisting of 3A-Morality and Ethics with two indicators, 3B-Positive Attitudes with three indicators, and 3C-Teamwork with three indicators.

Conclusion

The findings of this study, the specific competencies of undergraduates in the fundamental computer science course of a computer science program in the faculty of science and technology at Sakon Nakhon Rajabhat University could be categorized in accordance with the research objective into three competencies with seven sub-competencies and 45 indicators.

Discussion

The computer science curriculum that students take in the fundamental computer science course should teach them how to obtain such competencies in three areas: 1) using tools interactively, 2) acting independently, and 3) interacting diverse work groups to satisfy the demands of employers. The finding consistent with Chiu, Mahat, Rashid, Razak, & Omar (2016) indicates that basic knowledge, communication skills, practical skills, leadership, and attitude meet the requirements of the workplace. In addition, a study by Edokpolor, & Somorin (2017), creative and innovative skills would have helped them in starting and running their own business.

Likewise, a study by Lundberg, Krogstie, & Krogstie. (2020) reveal that graduates need to have a set of skills, knowledge, and personal attributes. According to the informants, this knowledge base should contain two or more programming languages, math, algorithms, and data structures, knowledge of security issues, and how to deal with them, UX, database, cloud development, and knowledge on how to manage version control. Some informants also point out that graduates should know different paradigms for software development and understand different frameworks. Other skills deemed important include problem-solving skills, teamwork skills, communication skills (in different languages, and the ability to describe a technical problem to a nontechnical person), understanding that they are a part of a bigger system, the ability to think holistically, and lifelong learning, teamwork (cross-disciplinary and/or global teams), and communication (with non-technical persons or persons from other fields).

A recent study by Myagmarjav, & Altangerel, (2022) assessed university graduates' skills. The result of this study showed that students' professional knowledge and skills are assessed differently. Employers of large corporations are fully satisfied with graduates' communication skills, adaptability, and teamwork skills while employers of medium-sized enterprises are satisfied with critical thinking, time management, and decision making.

Similarly, a study by Kalra, S. (2019) on the perceived employability of computer science graduates. The following themes emerged as a result: 1) General practice around embedding of employability in curricula around technical teaching, 2) Co-teaching with industry, 3) Soft versus hard skills and, 4) Higher order thinking skills.

Recommendation

The findings of this study may be used to enhance teaching and learning for students at Sakon Nakhon Rajabhat University or other universities in computer science curricula to improve learners' quality that aligns with the Thai Qualifications Framework for Higher Education (TQF: HEd) while also meeting the demands of employers. As a result, universities should take the following:

1) Evaluate the current curriculum of the Bachelor of Science in Computer Science to cater to the current and future needs of social and economic changes.

2) Assess the current on-the-job training programs and choose partner industries to provide job training skills to the students.

3) Develop courses that fulfill the TQF minimal criteria and train graduates' competencies in accordance with labor market expectations.

4) Implement modern teaching and learning management to assist students to develop competencies that can be applied in real-world situations.

An Investigation of In-Service Teachers' competence of TPACK in Primary Schools

Ratchanee Samornrit[1]
Vijittra Vonganusith[2]
Brendan D. McKell[3]
Yatawee Chaiyamat[4]

Abstract

This article aims to study the competence in TPACK of in-service teachers in primary schools under Nakhon Phanom Primary Educational Service Area Office 2 through 12 documents inquiried from published articles, papers, and theses of Google Scholar and ThaiLIS. The results showed that the framework of TPACK consists of two components: Basic Knowledge with three sub-components, including CK, PK and TK, and Technology Integrated Knowledge with three sub-components, including TPK, TCK, and PCK. Each sub-component has the following indicators: CK with six indicators, PK with six indicators and TK with four indicators. The integration between two basic components has three sub-components: Each sub-component has the following indicators: TPK with five indicators, TCK with six indicators and PCK with five indicators

Keywords: Technological Pedagogical Content Knowledge, TPACK, TPCK

Introduction

The knowledge economy is driven by technological advances and accelerated the path to industrial and post-industrial development. Since knowledge is dynamic expanding, and constantly changing, to help students learn effectively in the digital age, teachers need to know "What knowledge they must apply in learning management? ".

In response to the need in embracing the ever-changing world of technology in education, various approaches in using technology to support teaching and learning have been discovered and infused classrooms with digital tools, such as handheld devices, and computers. Technological pedagogical and content knowledge (TPACK) is also an integrated approach that has been investigated to support values, and challenges for directing future educational implementation designed to identify a teacher's teaching and learning process acting as a dynamic framework for describing teachers' knowledge required for designing, implementing and evaluating curriculum over instruction with technology (Niess, 2011, p. 299). Mishra and Koehler (2006, p. 5) also described TPACK as "the domain of knowledge where all the forms of a teacher's knowledge intersect. This is the form of knowledge that is required to plan and implement successful technology-infused learning experiences".

Presently, researchers and educators have implemented TPACK into practice.
As can be seen from Jang & Chen's (2010) study developed online lessons supporting the TPACK learning process for Taiwanese science teachers' training. In this course, mastering diverse ideas has typically been the main focus of earlier teaching methods. In addition, emphasizing the importance of using technology as a key teaching tool in

[4] Lecturers, Faculty of Humanities and Social Sciences, Sakon Nakhon Rajabhat University.

the classroom, it was also created to emphasize how students may manage their own classroom learning, and permit students to practice their learning with the results being reflected. The study found that science teacher training students were aware that not all science information could be taught using conventional techniques and understand the TPACK conceptual framework and expertise in using technology tools to support science classroom instruction. Additionally, the use of TPACK in blended learning for teacher development was investigated by Anwa Ahmed Abdo Qasem and Gandin Viswanathappa (2016). It was discovered that TPACK was a crucial instrument for evaluating teachers' information technology competence. Further, blended learning offers a flexible and dynamic learning environment. In English courses, Srisukong (2021) integrated the TPACK idea with the KWL PLUS learning management system to improve learners' English reading and writing abilities effectively. Tanjung (2021) also applied the problem-based learning (PBL) model with the Technological, Pedagogical, and Content Knowledge (TPACK) Approach. The results of this study revealed that there was a positive and significant influence of the PBL Model and the TPACK Approach on the history learning outcomes of students at High School (SMA) Sultan Iskandar Muda Medan. The student learning activities were successful and satisfying.

Recent research also points out that teacher education programs are often seen as the key catalyst in the preparation of new teachers to integrate technology into their teaching practice. Over 90% of educational institutions are furnished with infrastructure and information and communication technology, according to the findings of a survey conducted by the National Statistical Office. However, it was discovered that just 26.9% of teachers can use technological applications to stimulate real-world environments. Additionally, the utilization is restricted to complementing the material. During the impact of Covid-19, there are three main factors that influence teachers' use of technology, including availability in the classroom, own skills and competencies, and the challenges experienced in using technology (Winter, Costello, O'Brien, & Hickey, 2021, p. 236). This is in line with Irene Piction (2019, p. 3) indicated the findings on the National Literacy Trust report that most teachers supported technology but lacked training as the major barrier. Almost 23.3% had no training in using technology in literacy teaching.

The studies reviewed the teacher's interest in improving TPACK competence for pre-service teachers by infusing technology in teacher education programs for both single courses and through more integrated approaches to facilitate personal and professional development and to improve the quality of future students. Consequently, the purpose of this paper is to examine in-service teachers' TPACK competence in primary schools. The 12 studies reviewed here exemplify the in-service teacher's competence of TPACK. The seven types of knowledge represented in the TPACK construct: Technological (TK), pedagogical (PK), content (CK), technological pedagogical (TPK), technological content (TCK), pedagogical content (PCK), and technological pedagogical content knowledge (TPACK).

Research Objective

The objective of this paper was to examine the in-service teachers' competence in TPACK from published papers.

Research Methodology

This investigation is interested in examining in-service teachers' competence of TPACK. As part of the study plan, the researcher constructed the document inquiries through published papers, articles, and theses from Google Scholar and ThaiLIS.

Results

The TPACK competence study, it can be concluded that: Technology, pedagogy, and content are the three fundamental components; as a result, understanding each component should be defined first. Following that, a synthesis of these two components has been defined. In the end, TPACK is described as a synthesis of technology, pedagogy, and subject-matter expertise. These elements can be used as a blueprint for incorporating new technologies into educational settings. Using the TPACK framework to guide the investigation design for primary school teachers in Thailand, the document inquiries based on the following studies by Hongkhuntod (2015), Thammaprateep (2016), Adulasas (2016), Bangtamai (2018), Phuapan (2019), Sahin (2011), Srisukong (2021), Cox and Graham (2009**),** Mishra & Koehler (2013), Kurt (2018), McDonald (2019), and Santos & Castro (2021).

The findings from this survey offer a promising starting point for a significant effort to investigate and support Thai primary school teachers in developing the competence of TPACK. The author intends to undertake a study with the in-service teachers to look at how TPACK competence has evolved. The data will provide insightful information on the growth of TPACK and program input on efficient strategies for encouraging this development.

Discussion

These results indicate that the TPACK knowledge domains comprised seven components: CK, PK, TK, TPK, TCK, PCK, and TPCK, which are considered the heart of teaching. Although the document inquiries are limited in a Thai context, there are good indicators that the survey is likely a reliable measure of TPACK and its components related knowledge domain. Future work will include further refinement of the collected data and instrument

validation through interviews and examination from experts, and relevant stakeholders. Readers are reminded that this survey was specifically designed for Thai in-service teachers in primary schools under the Nakhon Phanom Primary Educational Service Area Office 2. Northeast Thailand. Thus, the content knowledge domain includes separate factors for the other content areas and attempts to support the idea that the TPACK frameworks. Future work in this area will benefit in the other contents and specific areas.

Matthew J. Koehler et al. (2013, p.4) also said, "The TPACK framework also functions as a theoretical and conceptual lens for researchers and educators to measure pre-service and in-service teachers' readiness to teach effectively with technology.", and TPACK is knowledge about the complex relations among technology, pedagogy, and content that enable teachers to develop an appropriate lesson, contextual classroom strategies, and instructional practices through technology. It is a basis of effective instruction with suitable technology, requiring an understanding of the representation via technologies, pedagogical techniques as well as classroom management. Contents and contexts bring to students by educational technologies appropriately to create students' learning fit in 21st century learning environments.

Therefore, teachers with the knowledge and ability to design learning management systems according to the TPACK concept will increase the efficiency of learning activities for learners, and help students learn new knowledge and creativity in the subject content. Learners also have an interest in learning and the use of technology that is diverse and in line with their needs and learning in the present.

Related research studies supported by Knolton(2014), found that the CK is the actual subject matter that is to be taught and learned, including the understanding of the subject taught, knowledge of central facts, concepts, theories, and procedures within a given field; knowledge of explanatory frameworks that organize and connect ideas; and knowledge of the rules of evidence and proof.

As well as the results of the study by Srisukong(2021) has developed an English reading and writing learning management model, the TPACK-KWL Plus Model, and said that content knowledge, pedagogical knowledge, and technology knowledge are all important. When it appears as a single piece of knowledge, it is not enough for efficient learning management. Teachers must integrate the two types of knowledge to form PCK, TPK, and TCK knowledge. If teachers can integrate all three types of knowledge together, TPACK will occur. It is this knowledge that allows teachers to adapt technology to teaching methods and content appropriately and consistently. As a result, the management of learning English is efficient.

In addition, Bangtamai (2018) found that the training package developed according to the TPACK concept has a step-by-step activity with CK, PK, TK, PCK, TPK,TCK, and TPCK, helping to promote innovation and educational information technology capabilities. For teacher students who will work in the teaching profession in the future, they will have the knowledge and ability to effectively manage teaching and learning with learners in the 21st century and will result in educational institutions being able to use them to increase their knowledge and ability in the application of technology to teaching and learning management.

This indicates that teachers do not have sufficient knowledge to integrate correlated elements. Therefore, education agencies should train teachers to have a better understanding of the concept of TPACK and develop a learning management system that integrates TPACK to help support learners' learning.

Recommendation

The suggestions involve school support equipment and technology to facilitate the design of learning management for teachers. School directors should also provide support for teachers' learning management, including supervision and monitoring, which can organize learning exchange activities and collectively demonstrate the approach of implementing TPACK to design learning management. Teachers also can create a learning environment by developing their knowledge and understanding of learning design that combines CK, PK, and TK expertise and help in learners' learning. The school curriculum should also be revised to reflect advancements in

understanding knowledge and learning methods. Additionally, there should be training or activities that support the use of technology in learning effectively and efficiently

The Study of the STEM Learning Management Characteristics for Promoting Learning in the 21st Century for Nakhon Phanom Primary School Students

Angsana Suporn[1]
Yattawee Chaimat[2]
Vijittra Vongnanusit[3]
Sumran Gumjudpai[4]
Brendan D. McKale[5]

Abstract

The study was a preliminary study from a larger research project to investigate the characteristics of learning management in STEM education. The data collection steps consisted of two steps: 1) synthesizing 12 academic documents, papers, and research related to the characteristics of learning management in STEM education; and 2) determining the indicators for learning management according to the STEM education approach by using the content analysis method. The finding revealed that six characteristics should be cultivated for the learners according to learning management in STEM education, including: 1) work-piece design, a problem-solving method; 2) plan and implement a solution; 3) present a solution; 4) state the problem or situation; 5) collect relevant information and evaluate and improve; and 6) link STEM to the real world.

Keywords: Learning management, STEM education, Primary school, the 21st century

Introduction

Human development is the growth of a country so that it can be affluent both economically and socially in the future. A vital and demanding development that entails training young people in order to develop them as learners. Rational initiative, creativity, analytical, and problem-solving abilities (Office of the Education Council Secretariat, 2013). Education is critical in preparing students to learn. learners to be moral learners capable of coexisting with others in society, which is the root to provide students the skills they need for the twenty-first century, education must accelerate the transformation in how students learn in a real way (Ministry of Education, 2017). At the same time, future learners must maintain Thai culture along with learning new sciences. Theerakiat Charoensettasil (2016) stated that the next generation will need to develop the skills required in the twenty-first century in order to prepare human resources to compete internationally and live in a changing world by relying on three main skills: learning, innovation, and skills. Developing Thai children to be good children, smart children, happy children, can divide the 21st century skills of Thai children into 2 groups: the 4R group focuses on literacy (literacy consists of reading comprehension (Read) and writing quality (Write), numeracy and reasoning (Reasoning), and Group 7C is the core skill group, namely critical thinking skills (Critical Thinking Skills Computing skills, career and life skills, life skills in cross-cultural skills, communication skills (communicative skills), skills to work together, collaborative skills, and creative problem solving skills (Pimpan Dechagup and Payao Yindeesuk, 2014).

STEM education is an educational management approach that integrates science, engineering, technology, and mathematics. Focus on applying knowledge to solve real-life problems. To enhance students' experience, life skills, and creativity, teachers need to prepare to enable students to perform tasks that require knowledge and process skills in science, mathematics, and technology that will lead to future innovations (Institute for the Promotion of Teaching Science and Technology, 2014), in which STEM-based learning management has some different forms and workflows. But the goal is the same, which is to make students understand the work step by step. They know how to plan and solve problems Creativity leads to innovation (National STEM Education Center, 2015). Teachers, therefore, need to organize learning activities in various forms to emphasize learners' skills in the learning process that are important and of quality. practical knowledge of the content being taught and developing skills such as creativity, problem solving, etc. In addition, learning management must be organized in a way that encourages learners to apply the content learned to apply to problems that occur in real life and be able to create various innovations as well as apply the knowledge gained in future careers (Montri Chulawathon, 2013).

Science, technology, engineering, and mathematics (STEM) education is an approach to learning management that integrates across subject groups between these four fields, bringing together knowledge from each into a unified whole to help students see the interconnectedness and interdependence of these fields and the ability to apply knowledge from across these fields to real-world problems, explorations, creations, and developments. situations that occur in the real world Ratchaniyom Nuchanapa (2015)

STEM education has the following concepts and characteristics of learning management (Porntip Siripattrachai , 2013); 1) It is an integration across a group of disciplines (interdisciplinary integration), that is, it is an integration of various disciplines, such as science (S), technology (T), engineering (E), and mathematics (M), that perfectly combines the strengths of nature as well as the teaching methods of each subject area., 2) it is a degree of integration that can be taught from kindergarten to secondary school. It was discovered that in the United States, STEM was developed as an educational policy for each state. According to the study's findings, teachers adopted this teaching style. Learners can produce and develop work well through project-based learning, problem-based learning, and design-based learning, and if teachers can use STEM education to educate faster, more learners will have the capacity and potential., and 3) It is a teaching style that makes learners develop in various areas completely and consistently with the guidelines to develop people to have qualities for the 21st century, such as intelligence, understanding the subject matter, and thinking skills. Learners develop thinking skills, especially higher-level thinking skills such as analytical thinking, creative thinking, etc. Learners are capable of working in groups, communicating effectively, leading others, and accepting criticism from others.

The main goal of this learning approach is to learn science and technology. Engineering and mathematics related to conceptual understanding, process skills, and individual ability in relation to individuals and society by people knowledgeable in science, technology, engineering, and mathematics (Bybee, 2011) should look like this: 1) apply science, technology, engineering, and mathematics knowledge to various issues, 2) understand science, technology, engineering, and mathematics as a human effort that combines the process of acquiring technological knowledge scientific knowledge, and mathematics used in the design of engineering systems, 3) be aware of the patterns of content and problem solving in science, technology, engineering, and mathematics, and is one of the world's cultures, and 4) what is important for global citizens to do is to become involved in issues concerning science, technology, engineering, and mathematics.

According to the previous research studies relating to the management of STEM education at the primary level, Krittayanee Kong-Iam (2560) studied the development of a web-based teaching and learning system based on the STEM education approach to promote creative problem-solving abilities. Elementary school students, demonstration schools, and universities are under the Office of the Higher Education Commission. Teaching and learning according to the STEM approach consists of six steps: 1: identifying problems or situations, 2: gathering

pertinent information, 3: designing a work piece or solution, 4: planning and implementing a solution, 5: conducting an experiment, and 6: evaluation and improvement.

Similarly to the study of Suriyont Kunarak and Prayoon et al. (2018) investigated the development of science process skills in Grade 6 science learning groups through STEM education. It was found that teaching and learning through STEM education followed six steps, as follows: Step 1: Identify the problem found in real life. Step 2: Gather information that will help you solve problems or create new work pieces. Step 3: Design the solution, taking into account the constraints and specified conditions. Step 4: Planning and Implementation :This step defines the steps and implements the plan. Step 5: Testing and evaluating the results obtained in order to improve and develop for efficiency. Step 6: The Presentation Stage, in which methods and results of problem solving are presented. Moreover, Vasquez Sneider and Comer (2012) discussed the principles and guidelines of STEM education and identified five themes as follows: 1) Focus on integration; 2) Establish relevance by making connections with everyday life and work or job opportunities in the future, 3) Focus on learning skills in the 21st century. This is regarded as an essential skill for today's workers. 4) Test the learners' abilities. 5) Allow students to express their opinions and ideas, as well as present works and items obtained through the learning process.

As a result, the main concept of STEM education is to organize learning activities that integrate science across four fields: science, technology, engineering, and mathematics. Integration must be linked by four disciplines and from real life to real life in order to enhance learning skills for the 21st century and develop advanced thought and creativity. The purpose of critical thinking and problem-solving is to create or develop things that already exist or have never existed, as well as to solve obstacles that impede growth. or resolve issues that create challenging conditions in life and society. Therefore, this current study aims to synthesize the main characteristics of STEM education through document analysis from 12 related literatures in order to supervise and promote learning ability in the 21st century for primary school students in Nakhon Phanom.

Research Objective

The objective of this current study is to synthesize the characteristics of learning management in STEM education.

Research Methodology Data collection and analysis

The characteristics of STEM education for science learning management were classified using a study of 12 relevant documents and related literature (Krittayanee Kong-Iam, 2560 ; Jumrat Inthalaporn , 2015 ; Suriyont Kunarak , 2018 ; Nuchanapa Ratchaniyom , 2015 ; IPST , 2013 ; National STEM Education Center , 2014 ; Institute for Academic Quality Development , 2016 ; Wasinee Israsena Na Ayutthaya , 2017 ; Satiya Langkarpin , 2013 ; StohImann, Moore, & Roehrig , 2012 ; Vasquez Sneider, & Comer , 2012 ; Rodger W. Bybee , 2011). The research method was divided into two steps as follows:

Step 1: Compile the relevant academic documents, papers, and research. The 12 academic document sources were analyzed and synthesized in this step to discover the characteristics of students based on STEM education for science learning management.

Step 2: Using the content analysis method, create indicators for learning management based on the STEM education strategy. To identify the indicators from the sources, content analysis was used. According to the STEM approach, the highest frequency of more than 50% was counted to develop an indication for learning management.

Result

The results of a study of 12 related documents and research classified learning management according to the STEM education approach as follows:

Table 1 shows the characteristics of learning management according to the STEM approach. Documents for creating learning management according to the STEM education approach 16 components were combined and synthesized similar characteristics from concepts, theories, research studies and relevant documents. The result shows that six components were presented in more than 50% including: 1) workpiece design, problem solving method; 2) Plan and implement a solution; 3) present a solution; 4) State the problem or situation; 5) Collect relevant information and evaluate and improve; 6) Linking STEM to the real world with 100 % , 91.67 % , 83.33 % , 75.00, 66.67 and 58.33 respectively. The learning management according to the STEM education approach with a frequency of less than 50 percent, including experiments, encourage students to work together in groups, use the project as a base, creating acceptance and participation from the community, creation and support from local experts, emphasis on 21st century learning skills, use the problem as a basis, learning at your own pace and instilling values and ethics that are correct and good.

Conclusion

The components of learning management's characteristics were determined using document analysis from various academic sources from 12 sources, according to the STEM education approach. The results showed that learning management according to the STEM approach consists of 6 components: 1) design a solution piece; 2) plan and implement a solution; 3) present a solution; 4) identify a problem or situation; 5) collect relevant information and evaluate and improve; and 6) link STEM to the real world. This pattern of research is consistent with the previous study of Suriyon Kunarak and Prayoon et al. (2018) investigated the development of scientific process abilities in life and the environment in grade 6 by structuring STEM learning in the subject area of science. It discovered six steps, which are as follows: Step 1) Identify the problem in real life; Step 2) Gather information leading to problem solving or work piece development; Step 3) Design, taking into account the limitations and conditions specified; Step 4) Planning and Implementation, which defines the steps and implements the plan; Step 5) Testing and Evaluation by bringing the results obtained to improve and develop for efficiency; and Step 6) Presenting the method and solution results. In addition, Kawin Chuekklang (2014) stated that STEM education is a form of learning activity designed to complement science learning, mathematics learning, and technology learning by integrating all three subjects through the engineering design process. STEM education does not focus solely on skill content and the necessary processes to understand and seek knowledge, but rather on the process of bringing the knowledge to use in thinking and finding and selecting the most suitable solution to solve problems related to life and work. There are seven suitable solutions, such as 1) identifying the problem, need, or preference; 2) gathering information to develop possible solutions; 3) selection of the best possible solution; 4) designing and making; 5) testing to see if it works; 6) modification and improvement; and 7) assessment.

Discussion

In addition to diversity in terms of degree of integration, STEM education is diverse in terms of the relationship between the four disciplines from teaching by engineering design. (Institute of Teaching Science and Technology, 2018), which has 6 steps that appear in the previous topic. Scientific knowledge and mathematical knowledge are seen as the basis for engineering design. This is to create innovation or technology. Therefore, from this point of view, students should have scientific knowledge and mathematical knowledge first. and apply those knowledge to create innovation or technology. However, in addition to looking at technology as a result of the engineering design process, Kelly and Knowles (2016) viewed that knowledge and technological tools can be the basis of engineering design as well Moreover, Antink-Meyer and Brown (2019) add that not only does scientific knowledge affect engineering design, but also Engineering design can also lead to the creation of new scientific knowledge. With the diversity in terms of the relationship between these sciences STEM education therefore comes in many forms and no one is the best.

Recommendation

The essence of STEM education is therefore not a level or a form in which the four branches of science are integrated. Rather, it encourages students to use knowledge and skills from these sciences. to solve problems in real life (Vasquez, 2015), as well as to encourage students to understand that Solving real-life problems requires knowledge and skills from various disciplines. which sometimes or often may be more than science, technology, engineering and mathematics "National Strategy 2018-2037 foresee the importance of other branches of science beyond the four disciplines, by identifying "knowledge and artistic skills" as part of learning reform in an interdisciplinary manner. Changes at the policy level and at the curriculum level Although it is necessary, it is still not enough. that can cause changes at the class level except that Teachers have appropriate awareness, knowledge, understanding, and beliefs in bringing STEM education into their classrooms (Lucha Ladachart et al., 2019; Margot and Kettler, 2019; Srikoom and Faikhanta, 2018).

Japanese Traveler's Expectation and Satisfaction of 5 Stars Hotels' Service Quality in Sukhumvit Area, Bangkok during the epidemic of Coronavirus 2019 (Covid19)

Korawit Suankamsri[1]
Supasak Ngaoprasertwong[2]

Abstract

The purposes of this quantitative research were 1) to study the perception factors affecting Japanese Traveler's Expectation of 5 Stars Hotels' Service Quality in Sukhumvit Area, Bangkok during the epidemic of Coronavirus (Covid-19), and 2) to investigate the level of Japanese Traveler's Satisfaction of 5 Stars Hotels' Service Quality in Sukhumvit Area, Bangkok during the epidemic of Coronavirus (Covid-19). Research samplings were 100 Japanese Travelers and questionnaires were the research tool. Data analysis was conducted by the use of descriptive statistics consisting of frequency, percentage and mean. Inferential statistics methods on multiple regression analysis were used to test hypotheses in the study. The result can be found that most of the Japanese Travelers who use the service are males accounted for 74 percent, while female accounted for 26 percent whereas it found that the age range of 38-53 years is the most respondence, followed by the age range 21-37 years. Most of those who come to use the service at 5 stars hotel in Sukhumvit area have a bachelor's degree that there are 81 percent. Most of them working as the owner of business by 44 percent, and 34 percent working as Tour guide which stayed at the 5 stars hotel in Sukhumvit area on the weekend for 47 percent and stayed at holiday for 33 percent. Most of the respondents stayed alone at the hotel by 56 percent and 21 percent of the respondents stayed with family. The purpose of stay is for working 54 percent, and for leisure for 39 percent. Chanel of the reservation, 40 percent from hotel official website, and 34 percent for oversea travel agent website. Most of the Japanese Travelers who stayed at 5 stars hotel in Sukhumvit area informed that the situation of the Covid-19 epidemic effect with their decision to use the service by 95 percent. Moreover, for the factors of customer satisfaction, there was found that most of the respondents ranked their satisfaction at high level as very satisfied for hotel facilities, communication channels, promotion, hotel staffs, and safety. For price factor respondents ranked satisfied level for 59 of respondents.

Keywords: Service Quality, Guest's Expectation, Guest's Satisfaction, 5 Stars Hotel

Introduction

The world is facing a major threat from the COVID-19 pandemic, which is creating destruction in all sectors around the globe. The coronavirus pandemic, better known as COVID19, originated in Wuhan, China, before spreading to other countries around the world. The first cases were reported in November 2019, and the World Health Organization (WHO) declared COVID-19 a pandemic on 11 March 2020. It has had and is having a huge impact on people, families, and communities. As of 31 March 2022, there have been around 487 million (487,326,252) confirmed infections around the world, increasing from 3,042,444 infections on 28 April 2020. About 6,163,880 people have died, and there are approximately 58 million (58,576,206) active cases. The United States

Email: Supasak.ng@ssru.ac.th

has the highest number of infected people with 81,740,722 reported cases, followed by India with 43,024,440 cases, and Brazil with 29,916,334 cases (Worldometers, 2022, https://www.worldometers.info/coronavirus, accessed on 31 March 2022).

Although COVID-19 is an ongoing crisis, there is already a small number of published projects that attempt to explore potential recovery plans. Mulder (2020), for example, proposes focusing on tourists who are potentially immune after successfully recovering from COVID-19. However, this could be complicated by the new evidence suggesting that people can be re-infected with COVID-19. The tourism industry, which is extremely sensitive, is currently sailing through uncertain waters, and this is exacerbated by the fact that it is hard to predict when the COVID-19 pandemic will end. However, crisis management theory in this situation can help businesses to deal with the ongoing disruption that is threatening their existence.

The COVID-19 pandemic has caused a dilemma between economic stimulus and public health control [29]. Before the COVID-19 pandemic, tourism accounted for 22% of Thailand's GDP, and in 2018, one-sixth of Thailand's jobs were in tourism [30]. The economic costs of Thailand's border and business closures and strict restrictions are enormous. Companies in the service and tourism industries have been hit hardest. Therefore, Thailand has developed a COVID-19 vaccination plan for individuals with severe symptoms and the general population in outbreak areas to improve the community's immunity. The Thai government aims to achieve herd immunity against COVID-19 through vaccination, and the goal is to reach 70% of the population by the end of 2021, National News Bureau of Thailand (2021). In addition, Thailand has permitted vaccinated people with at least one dose to engage in socio-economic activities such as public gatherings and public transport, Hindustan Times (2021). Thailand opened up Phuket's tourism industry on 1st July 2021. Despite the third wave of coronavirus outbreaks in Thailand, economic pressures urged the restoration of its tourism industry. As a matter of fact, Thailand has announced to welcome fully vaccinated foreign tourists, including returning Thais and foreign residents, who enter the country by plane from an approved country/region without quarantine requirements from 1st November 2021, by the Tourism Authority of Thailand (2021).

Alexandru Arba (2022) found that in 2021, there were approximately 9.5 thousand travelers from Japan to Thailand. The number of Japanese travelers to Thailand has been increasing continuously since 2014 approximately at 1,268 thousand until the advent of the COVID-19 pandemic, when figures declined to almost zero. Also according to the Director of the Thai Travel Service Association (TTSA) Jarivat Wongsomsri (2022) said that currently, flight availability between Japan and Thailand is just 40% of pre-pandemic levels. Thais are plucking up the courage to travel again after the pandemic and Japan is an attractive destination. Last month, Japan launched visa-free entry for eligible countries, including Thailand. What's more, the Japanese Yen has weakened against the baht. Despite the cost of package holidays to Japan shooting up 80%-100%. East Asian Director of the Tourism Authority of Thailand (TAT) Chuwit Sirivejkul (2022) revealed that from January until October this year, Thailand welcomed 230,000 – 240,000 tourists from Japan. The TAT's goal is for 350,000 tourists from Japan to enter Thailand before the end of the year. Chuwit said he has been working with agents in Japan to design packages for the kingdom which are attractive to Japanese tourists.

Bangkok's Sukhumvit Road and the surrounding district is one of the best known localities in the Thai capital. As a major Bangkok street, getting to the Sukhumvit district of Bangkok couldn't be easier. It's one of the longest streets in the world, starting in the heart of Old Bangkok and continuing for some 400 kilometres (250 miles) along the south eastern coast of Thailand, almost to the border with Cambodia. Sukhumvit is one of Bangkok's most important areas, with excellent shopping, dining and nightlife. The many fashionable restaurants, bars, air-conditioned malls, luxury hotels and clubs give the area a distinctly modern, cosmopolitan flavour.

Regarding as Japanese travelers who travel to Thailand has been increasing continuously and the Sukhumvit area is one of Bangkok's most important areas thus the current writing aims to study about

Japanese Traveler’s Expectation and Satisfaction of 5 Stars Hotels' Service Quality in Sukhumvit Area, Bangkok during the epidemic of Coronavirus 2019 (Covid19).

Research Objectives

This research consisted of two objectives:

2.1 To study the perception factors affecting Japanese Traveler’s Expectation of 5 Stars Hotels' Service Quality in Sukhumvit Area, Bangkok during the epidemic of Coronavirus (Covid-19)

2.2 To investigate the level of Japanese Traveler’s Satisfaction of 5 Stars Hotels' Service Quality in Sukhumvit Area, Bangkok during the epidemic of Coronavirus (Covid-19).

Research Methodology

This study used online survey research for about Japanese Traveler’s Expectation and Satisfaction of 5 Stars Hotels' Service Quality in Sukhumvit Area, Bangkok during the epidemic of Coronavirus 2019 (Covid19).

Populations

The population used in this research was Japanese Travelers who stayed at 5 Stars Hotels' Service Quality in Sukhumvit Area, Bangkok during the epidemic of Coronavirus 2019 (Covid19) period December 2021 to February 2022 by randomly for 100 persons of responders.

Sample

This study will estimate the size of the sample and set ratio in case of an unknown number of people. Whereas the sample size is important in research on a sample of the data obtained from the sample is enough to make it valuable research. Sample size it is suitable for the study based on research that will allow a much inaccurate that is acceptable. The sample size can be calculated from the formula. The is formula will be set as a ratio people or approximately 100 persons.

Research Result

In this research study, Japanese Travelers who stayed at 5 Stars Hotels' Service Quality in Sukhumvit Area, Bangkok during the epidemic of Coronavirus 2019 (Covid19) where the researcher analyzed the data and interpreted the meaning of the data analysis results. The symbols and variables used in data analysis were defined as follows:

Table 1: Demographic data classified by Gender

Demographics	Percentage
1. Gender	
Male	74
Female	26
Totally	100

For the gender found that as majority of respondents were male by 74 percent, and female 26 percent.

Table 2: Demographic data classified by Age

Age	Percentage
21 - 37	33
38 - 53	65
54 - 72	2
Totally	100

The age range of Japanese Travelers was found that most respondents were 38-53 years old as 65 percent whereas 21-37 years old as 33 percent and 54-72 years old as 2 percent.

Table 3: Demographic data classified by Educational

Educational	Percentage
High school / High Vocational Certificate	3
Technical Certificate	5
Bachelor's degree	81
Master's degree	11
Totally	100

Education level, there was found that most of the respondents were studying at bachelor's degree as 81 percent, master's degree as 11 percent, Technical Certificate as 5 percent, and High school or High Vocational Certificate as 3 percent.

Table 4: Demographic data classified by Occupation

Occupation	Percentage
Business Owner	44
Private Employee	34
Housewife	9
State Enterprise Employee	7
Tour Guide	6
Totally	100

For Occupation, there was found that most of the respondents were business owner as 44 percent, Private employee as 34 percent, Housewife as 9 percent, and State Enterprise Employee as 7 percent, and Tour Guide as 6 percent.

Table 5: Demographic data classified by Period of stay

Period of stay	percentage
Weekend	47
Holiday	33
Weekday	20
Totally	100

For period of stay, there was found that most of the respondents were stayed during weekend as 47 percent, during holiday as 33 percent, and weekday as 20 percent.

Table 6: Demographic data classified by Attendant

Attendant	Percentage
Alone	56
Family	21
Partner	15
Co-worker	8
Totally	100

For attendant, there was found that most of the respondents were stayed alone as 56 percent, stayed with family as 21 percent, with partner as 15 percent, and with co-worker as 8 percent.

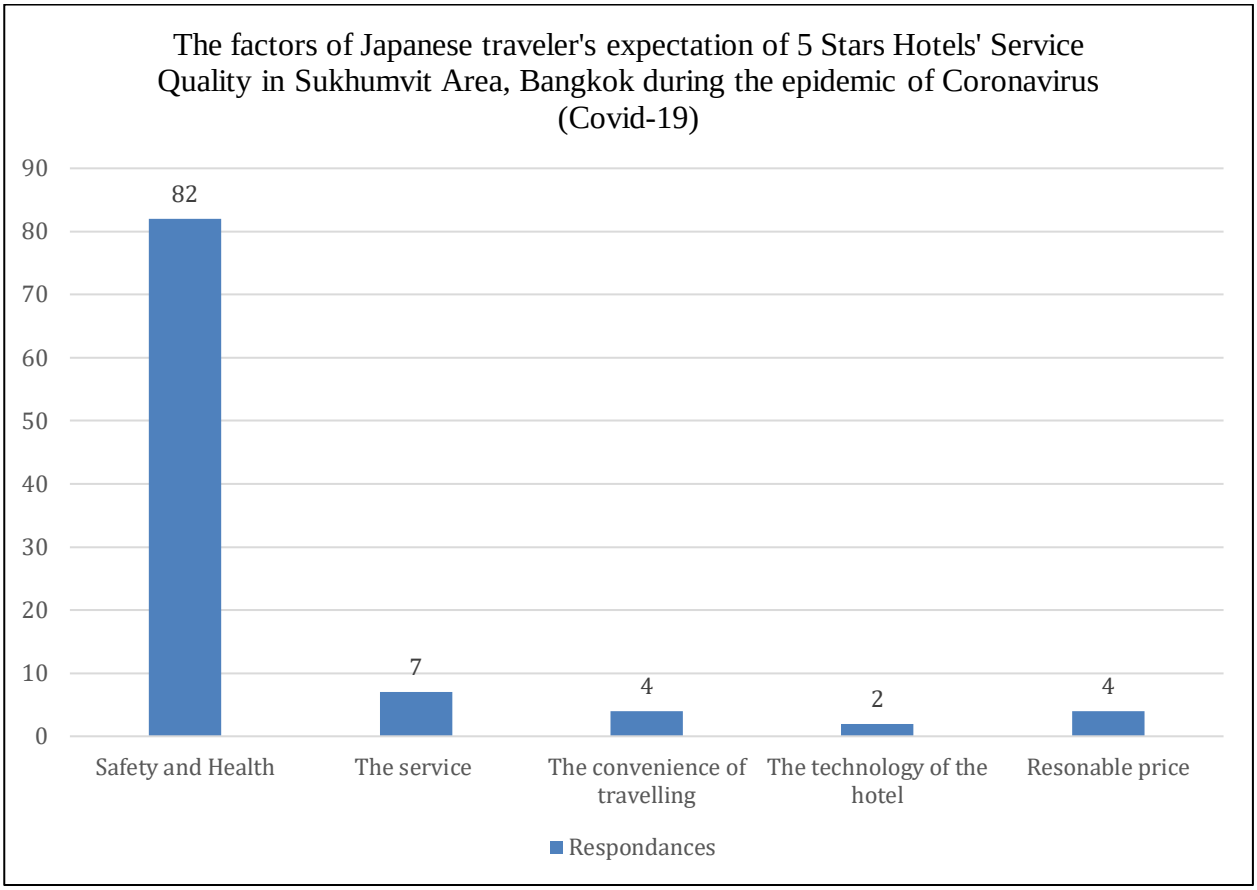
Table 7: Demographic data classified by Purpose of stay

Purpose of stay	Percentage
Business trip	54
Leisure trip	39
Resting for the next destination	7
Totally	100

For purpose of stay, there was found that most of the respondents were stayed for business trip as 54 percent, leisure as 39 percent, and resting for the next destination as 7 percent.

Table 8: Demographic data classified by Reservation Channels

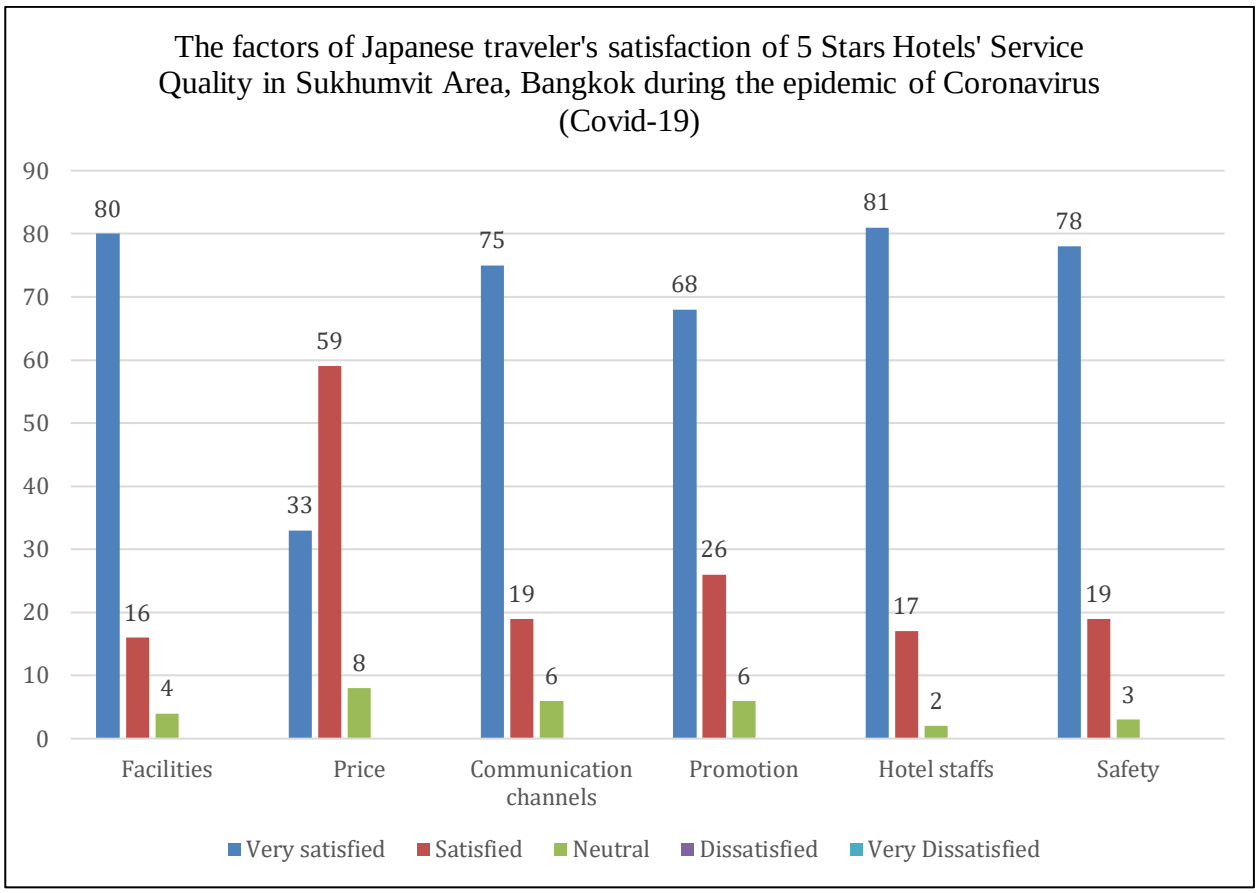
Reservation Channels	percentage
Official Hotel Website	40
Travel Agency website	34
Travel Agency Mobile Application	12
Travel Agency	9
Hotel Reservation	5
Totally	100



For reservation channels, there was found that most of the respondents made a reservation through Official hotel website as 40 percent, Travel Agency website as 34 percent, Travel Agency Mobile Application as 12 percent, Travel Agency for 9 percent, and hotel reservation directly as 5 percent.

Table 9: Demographic data classified by Impact on the decision to use the service during the covid-19 epidemic situation

Impact on the decision to use the service during the covid-19 epidemic situation	Percentage
Affect the decision to use the service Does not affect the decision to use the service	95 5
Totally	100



For Impact on the decision to use the service of Japanese at 5 Stars Hotels' Service Quality in Sukhumvit Area, Bangkok during the epidemic of Coronavirus 2019 (Covid19), there was found that most of the respondents thought that there was affect the decision to use the service, and for 5 percent thought that there was not affect the decision to use the service.

Table 10: Demographic data classified by the factors of Japanese traveler's expectation of 5 Stars Hotels' Service Quality in Sukhumvit Area, Bangkok during the epidemic of Coronavirus (Covid-19)

For the factors of Japanese traveler's expectation of 5 Stars Hotels' Service Quality in Sukhumvit Area, Bangkok during the epidemic of Coronavirus (Covid-19), there was found that most of the respondents ranked at 84% for the part of Safety and Health at high level as concerns with the epidemic of Coronavirus (Covid-19).

Table 11: Demographic data classified by the factors of Japanese traveler's satisfaction of 5 Stars Hotels' Service Quality in Sukhumvit Area, Bangkok during the epidemic of Coronavirus (Covid-19)

For the factors of Japanese traveler's satisfaction of 5 Stars Hotels' Service Quality in Sukhumvit Area, Bangkok during the epidemic of Coronavirus (Covid-19), there was found that most of the respondents ranked their satisfaction at high level as very satisfied for hotel facilities, communication channels, promotion, hotel staffs, and safety. For price factor respondents ranked satisfied level for 59 of respondents.

Conclusion and Discussion

From the objectives, the result can be found the details as follows; for the gender, there was found that most of the Japanese Travelers were male by 74 percent, while female are 26 percent, most of the respondents of Japanese Traveler who stayed at 5 Stars Hotels in Sukhumvit Area, Bangkok during the epidemic of Coronavirus 2019 (Covid19) has the age range between 38-53 years at 65 percent, followed by the age range between 21-37 years as 33 percent. Most of the respondents, their background education is Bachelor's degree by 81 percent. For occupation, most of the respondents were business owner as 44 percent, Private employee as 34 percent, Housewife as 9 percent, and State Enterprise Employee as 7 percent, and Tour Guide as 6 percent. Period of stay, they were stayed during weekend as 47 percent, during holiday as 33 percent, and weekday as 20 percent. Most of the respondents were stayed alone as 56 percent, stayed with family as 21 percent, with partner as 15 percent, and with co-worker as 8 percent. For purpose of stay, there was found that most of the respondents were stayed for business trip as 54 percent, leisure as 39 percent, and resting for the next destination as 7 percent which consistent with Leah Watkins (2008) found that Japanese people now tend to stay longer in one destination rather than visiting as many places as possible, and want to 'experience' rather than just observe foreign lifestyles and cities. According to the result, modern Japanese travelers are "high spenders, enthusiastic shoppers, service

oriented and quality conscious; they are concerned about safety and difficulty communicating in foreign languages". Long working hours and a lack of holidays remain the biggest constraints on overseas travel and, despite a new government initiative to make Japan a "lifestyle superpower" along with attempts to reduce work hours and increase holidays, Japanese companies remain resistant to change. For reservation channels, there was found that most of the respondents made a reservation through Official hotel website as 40 percent, Travel Agency website as 34 percent, Travel Agency Mobile Application as 12 percent, Travel Agency for 9 percent, and hotel reservation directly as 5 percent which resembles with Nuntaporn Chuenkrathok (2010) that the long economic recession that has continued since 90s and the ICT revolution in the world economy, Japan has had to develop and expand its ICT environment in order to increase its competitiveness. One of the important technologies for this revolution is the mobile phone, which has been used all over the country since the mid-90s. Over the period of one decade, the mobile phone has exhibited several impacts on Japanese society, such as consumption, business, communication culture, crime, work, and information access. Instead of being successful with this revolution, Japan is still facing inefficient information usage compared with other developed countries and this problem will affect the competitiveness of Japan in the future. For the impact on the decision to use the service of Japanese Traveler's at 5 Stars Hotels in Sukhumvit Area, Bangkok during the epidemic of Coronavirus 2019 (Covid19), there was found that most of the respondents thought that there was affect the decision to use the service, and for 5 percent thought that there was not affect the decision to use the service which similar as Julio Tolares (2020) that outbreak is leading to additional health problems such as stress, anxiety, depressive symptoms, insomnia, denial, anger and fear globally. Collective concerns influence daily behaviors, economy, prevention strategies and decision-making from policy makers, health organizations and medical centers, which can weaken strategies of COVID-19 control and lead to more morbidity and mental health needs at global level. For the factors of customer satisfaction, there was found that most of the respondents ranked their satisfaction at high level as very satisfied for hotel facilities, communication channels, promotion, hotel staffs, and safety, but ranked price factor just satisfied for 59 of respondents which resembles with Wilarwon Chantarawadee (2011) that Hereinafter were shown components of all aspects with which those customers highly satisfied. In terms of reliability, the hotel staff provided services to customer correctly and the reservation was reliable. In terms of responsiveness, the hotel staff was willing and ready to serve customers at prompt. In terms of assurance, the hotel staff had polite manners and friendly serve customers. In terms of empathy, the hotel staff was polite and friendly to customers. In terms of tangibles, the hotel offered many more amenities, especially for health care such as swimming pool and fitness room, and had sufficient extinguishers. For the factors of Japanese traveler's expectation of 5 Stars Hotels' Service Quality in Sukhumvit Area, Bangkok during the epidemic of Coronavirus (Covid-19), there was found that most of the respondents ranked at 84% for the part of Safety and Health at high level as concerns with the epidemic of Coronavirus (Covid-19) which resembles with Rafael Robina-Ramírez (2021) which he found that within the de-escalation phases proposed by the health authorities in Spain, it is necessary to guarantee health security in the tourist services that are provided to avoid the spread of the virus with new infections. Through a participatory methodology, hotel managers proposed a series of measures to be considered by these authorities. Three theoretical and four empirical conclusions are drawn from the results.

Research Recommendations

First, this study is slightly limited since it was only carried out in the small group of the respondents; hence the projected findings cannot be generalized for all of the hotels within Bangkok. As a result of this factor, future studies should consider analysis from various parts of Thailand and cut across several aspects, including larger sample size and enhanced demographic characteristics. Second, this study never made any substantial

comparison of customer and hotel staff perceptions regarding service quality. Future researchers should attempt to define any customer rating disparities towards service quality and those ratings from hotel staff. This factor will enable hotel management to develop other effective strategies that enhance customer satisfaction.

The Effect of the Multicultural Competency Development for Art Student Teachers of a Public University in Northern Thailand

Saipin Sungkitsin[1]

Abstract

This research study aimed 1) to study the effect of the multicultural competency development for art student teachers to examine the change in multicultural competency of art student teachers and 2) to study the effect of the development and the change in multicultural competency of art student teachers. The sample in this research consisted of 36 fourth year students majoring in Art Education. The sample group was selected using purposive sampling method. The research instruments were a semi-structured interview, observations, focus group discussion record forms, and a questionnaire. The qualitative data were analyzed based on content analysis, whereas the quantitative data were statistically analyzed for percentage, mean, and standard deviation. The findings of the multicultural competency development for art student teachers showed that 1) after studying, there was a change in all aspects at a high level. The knowledge aspect had the greatest change, with mean of 3.78, standard deviation of 0.78; followed by the skill aspect with mean of 3.85, standard deviation of 0.78. There was the least change in the attitude aspect with mean of 4.25, standard deviation of 0.74. 2) The change in multicultural competency of art student teachers demonstrated that 19 students with no change were the most proportion (52.78%), followed by 13 students with a change (36.11%). The least proportion were 2 students with highly change and decrease (5.56%). There were not many changes because the majority of students had a positive attitude towards art learning management for multicultural learners. Furthermore, the findings reflected that the students still lacked knowledge and skills in teaching and learning management according to aforementioned concept. However, after studying, students had better knowledge and skills.

Keywords: Multicultural competence, Art student teachers, Art learning management, Culturally relevant pedagogy

Introduction

Thailand and the surrounding area are known as Southeast Asia (especially in the continental part). In the past, there were always migrations of different groups of people. Many people were forcibly deprived as a result of the wars between large and small provinces of states. For example, forcing of the Tai Lue, Tai Yai and other ethnic groups to come to the land of Lanna or northern Thailand in the age of “picking vegetables in baskets and collecting people into the city". Phaya Kawila revived Chiang Mai in the early Rattanakosin period, or the big transportation of people and personal belongings to another place of Lao people across the Mekong River after Vientiane was broken during the reign of King Rama III. They came to the land of northeastern provinces and some areas of the Chao Phraya River Basin. They also searched for fertile land and sought new opportunities for life (Saenghong, 2018). This information corresponds to Naowarat (2013) that Thailand is one of the region's most ethnically diverse societies. Nowadays, the issue of ethnic diversity has been recorded in the study area, such as grade 6 textbooks of the Social Studies, Religion and Culture Department. These textbooks present about the highland ethnic groups in the term "minority". “The minority in Thailand is a group of people with a small proportion of the population in a country. Their cultures, traditions, and way of life are different from most parts of the country. They may be hill tribes or the ethnicities that immigrate or escaped into the country.” Besides, the number

[1] Doctoral student, Education Program (Multicultural Education), Faculty of Education, Chiang Mai University (Tel +66089-0612829 E-mail: saipin_sun@g.cmru.ac.th)

of hill tribe ethnic minorities is recorded as having nine tribes including Hmong, Yao, Muser, Lisu, Akha, Karen, Lua, Thin and Khmu. Most of them lives in the northern and northeastern provinces. It can be seen that Thailand has a population with cultural diversity in terms of ethnicity, language, gender, age, religion, skin color, way of life, economy, and so forth. Thus, in order to live together in the midst of this diversity, there must be acceptance, respect, sympathy for each other as well as admiration and appreciation of one another's cultures. School is regarded as a place that provides education, training, knowledge and experience to nurture these diverse people from a young age so that they will grow up to be quality adults and be able to live together in society peacefully.

Education for culturally diverse students or multicultural Education has several purposes, for instance, to create fairness and equality in educational opportunities regardless of the culture of the learners, to create a better understanding between learners of different cultures, and to reduce prejudice and cultural discrimination in the hope that these understandings will lead to peaceful coexistence of people in society (Arphattananon, 2020). This is compatible with Yongyuan, Thanasethakorn and Choomchuea (2010) that educational service area office administrators, educational supervisors, school administrators, teachers, and parents mostly agreed with the Ministry of Education' policy in distributing educational opportunities of for children of different nationalities and cultures to have the opportunity to attend schools.

Culturally responsive teaching has been considered as a way to implement the concept of multicultural education in schools. In recent years, academics have paid much attention to the importance of creating the classroom experience with students' cultures in order to strengthen the social, academic and cultural values of all children. This study was designed to identify teachers' perceptions towards the importance of culturally sensitive teaching in elementary schools in the United States. It was found that 96% of respondents considered culturally sensitive teaching to be an important part of working with culturally diverse students. Significantly, it was not possible to observe that the way teachers presented their perceptions of the importance of culturally sensitive teaching matched the manner in which they responded to the traits of culturally relevant pedagogy (Phuntsog, 2001). Besides, Gay (2002) defined culturally relevant pedagogy (CRP) as a teaching management that used cultural characteristics, experiences, and perspectives of students with cultural differences as a teaching medium to make teaching students of different cultures more effective. Gay (2002) also pointed out the quality of education for students of color, both special and regular educations. It could be greatly improved by using teaching and practice programs that reflected cultural heritage, experiences, and perspectives in which many elements of culturally responsive teaching were explained along with some research on student achievement. This included the teachers' critical cultural consciousness, a pluralistic classroom atmosphere, a diverse student community, and a multicultural curriculum. Without culturally sensitive teaching, education would never be the best. Therefore, it should be essential for students who were not part of the majority and mainstream. Furthermore, multicultural education would help teachers and students as well as students and students to know each other in different dimensions, and to encourage, support, and accept each other without bias. Multicultural arts education was able to bring people together by sharing beliefs values and aesthetics in one's own ideas to others through education in art in order to understand the relationship between cultures and aesthetics of different groups, and to analyze the similarities and differences, as well as to accept and appreciate cultures that were different from their own through the study of arts and culture with understanding (Bates, 2000). This conformed with Yongyuan, Thanasethakorn and Choomchuea (2010). Additionally, Gay and Kirkland (2003) proposed that developing a critical consciousness towards individuals and professionals concerning racial, cultural and ethnic diversity should be a core component of teacher preparation in the education system. This idea also corresponded to Naowarat (2018) that preparing teachers to work with new learners in the new century required a certain pattern so that teachers would have knowledge about the new world of learners.

Therefore, the researcher realized the importance of preparing student teachers to be ready to educate students, especially students with diverse cultural diversity. It could enable art student teachers in teacher

education institutions to develop their multicultural competency to realize the value and importance of teaching and learning for diverse learners. It should be prepared at the root by relying on cooperation in the teaching and learning process from all stakeholders including teacher education institutions and schools where students practiced their teaching. This could create an effective learning and teaching management process, and produce graduate art teachers with competence in multiculturalism in a diverse classroom context with knowledge, skills, and good attitudes towards the multicultural classroom both in the north and all over Thailand. This idea was relevant to Gay's (2001) culturally relevant pedagogy concept. Gay proposed five elements of teaching concepts related to learner culture including component 1 the development of cultural diversity fundamental knowledge, component 2 the design of culturally relevant curriculum, component 3 the cultural empathy and the building of a learning community, component 4 cross-cultural communication, and component 5 the consistency between learners' cultures and classroom teaching. The contents in the Art Instruction 3 course were integrated according to Bank's (2014) concept. Bank proposed 5 dimensions of multicultural education management. The first dimension was content integration which corresponded with Banks and Banks's (2005) 4-step approach for integrating multicultural contents as follows. The first step was the contributions approach. The second was the additive approach. The third step was the transformation approach. The fourth step was the social action approach. For these reasons, it leaded to an article on "The Effect of The Multicultural Competency Development for Art Student Teachers of a Public University in Northern Thailand". The researcher hopes that this work will be useful to any art teacher education institutions as a way to develop multicultural competence of art student teachers according to culturally relevant pedagogy. Moreover, there will be art education student teachers who have competency in multicultural competence in terms of knowledge, skills and good attitude towards multicultural society. They will accept the differences of their classmates, people around them, their community, and their society for a peaceful society in the future.

Research Objective

1. To study the effect of the multicultural competency development for art student teachers.
2. To examine the change in multicultural competency of art student teachers.

Research Methodology

The researcher mainly used the research methods and collected data through the participatory action research process of Kemmis & McTaggart (1988) and Sutthinarakorn (2013). The processes for conducting research were as follows:

Sample

The sample group in this research consisted of 36 fourth-year students studying in the art education program, faculty of education of a public university in northern Thailand enrolling in the Art Instruction 3 course (CI 4642) in the second semester of the 2020 academic year. They were selected using purposive sampling method.

Scope of the Research

1. Area scope

1.1 The development of art education teaching and learning management in this research referred to the organization of the teaching and learning process for the Art Instruction 3 course of the Bachelor of Education Program in Art Education (5 years) (revised curriculum 2012). It consisted of objectives, contents, instructional management guidelines, media and learning resources, and measurement and evaluation of the art education program, faculty of education of a public university in northern Thailand which had ethnically diverse students including Tai Yuan, Tai Yai, Hmong, Tai Lue, White Karen, Akha, central and northeastern students.

1.2 This experimental approach to the development of art education teaching and learning management was conducted as a case study in the Art Instruction 3 course which was a course in the existing curriculum and opened for teaching. However, the course's objectives, contents, teaching activities, media and learning resources, measurement and evaluation were adjusted. The teaching process based on the concept of culturally relevant pedagogy was emphasized through the content integration. It was conducted with the fourth-year students majoring in art education, faculty of education of a public university in northern Thailand in the second semester of the 2020 academic year, totaling 1 semester.

2. Content scope

2.1 This study was a participatory action research for developing art education teaching and learning management based on the culturally relevant pedagogy. The contents were concerning art education teacher preparation, the concepts of art education instruction, the concept of culturally relevant pedagogy, and 5 dimensions of teaching and learning management: the integration of the contents that affected students in teaching and learning management which was related to the culture of the students.

Research instruments and data collection

This research was a participatory practice research with both quantitative and qualitative data collection. The accuracy and reliability of the data were verified by using the data triangulation. The research instruments and data collection were explained as follows.

1) Semi-structural interview

The interview was about knowledge and experiences in art education teaching and learning management as well as perspectives on cultural diversity. The interview form contained a line of questions by specifying the issues studied as follows: 1) general information, 2) multicultural perspectives and experiences, 3) cultural diversity in the classroom/department and teaching and learning management, and 4) the possibility of integrating the culturally relevant pedagogy concept with the art education teaching and learning management. It was built from a research conceptual framework derived from theoretical concepts and research related to the development of art education teaching and learning management for student teachers to have multicultural competence. The content analysis was utilized to gain baseline information in order to be a guideline for the development of teaching and learning management for student teachers in the future.

2) Observation

There were 2 types of observation including participant observation and non-participant observation.

2.1) Participant observation

- The participant observation was employed for interviews and clarifications to all stakeholders regarding research goal and research process in the development of art education teaching and learning management for student teachers to have multicultural competence. The content analysis was used to obtain background information as a guideline for further student development.

- The participant observation was employed for a group meeting to collect problems and formulate plans about art education teaching and learning management for student teachers to have multicultural competence in order to create understanding, sense of empathy and sense of ownership of the research project. This meeting was considered as the orientation of the participants. The plan making technique was used. The attendees were all stakeholders. The content analysis was employed.

- The participant observation was used for teaching and learning management in the Art Instruction 3 course in order to provide knowledge and understanding to art education student teachers to have multicultural competence and to solve problems according to the designed plan. The content analysis was employed.

- The participant observation was utilized for organizing seminars to exchange knowledge, concerning the results of art education teaching and learning management for student teachers to have multicultural competence, between the researcher and the students after the teaching practicum. The content analysis was used.

2.2) Non-participant observation

- Non-participant observation was employed for students' teaching practice in the educational institutions in order to investigate the teaching performance of student teachers to have multicultural competence. The content analysis was used.

3) Focus group discussion record forms

Focus group discussion record forms included a participation observation record form, a student's teaching observation record form, a focus group discussion record form, and a reflection record form explained as follows.

3.1) The participation observation record form

- The participation observation record form was used for the group meeting in order to clarify and make an understanding regarding research goals and processes in developing art education teaching and learning management for student teachers to have multicultural competence. It was also used to create understanding, sense of empathy and sense of ownership of the research project. The meeting was considered as the orientation of the participants including all stakeholders. The content analysis was employed.

- The participation observation record form was utilized for collecting problems and formulating plans concerning art education teaching and learning management for student teachers to have multicultural competence. In this meeting, the plan making technique was used. The attendees were stakeholders who were school teachers and university lecturers. The content analysis was employed.

- The participation observation record form was used for teaching and learning management in the Art Instruction 3 course aiming to provide knowledge and understanding to art education student teachers to have multicultural competence and to solve problems according to the designed plan. The content analysis was employed.

- The participation observation record form was utilized for checking the teaching performance of student teachers in the Art Instruction 3course. The content analysis was used.

- The participation observation record form was used for organizing seminars to exchange knowledge between the researcher and all stakeholders concerning the development of teaching and learning management for art education student teachers to have multicultural competence. The content analysis was used.

3.2) The student's teaching observation record form

- The student's teaching observation record form was employed for the students' teaching and learning management in classrooms and students' teaching practice in educational institutions in order to examine the results of teaching practices with multicultural competence. The content analysis was used.

3.3) The focus group discussion record form.

- It was utilized in a group meeting to brainstorm problems and set plans concerning the development of art education teaching and learning for student teachers to have multicultural competence. In this meeting, planning techniques were also used. Participants in the meeting were stakeholders who were teachers in the school and lecturers in universities. The content analysis was used.

3.4) The reflection record form.

- It was used in a meeting to examine the result of the teaching performance of the Art Instruction 3 course and resolve problems according to the designed plan. The content analysis was used.

4) Questionnaire

The researcher used a questionnaire asking students' opinions on teaching and learning management related to their own cultures during the teaching practice in educational institutions. The quantitative data were statistically analyzed for percentage, mean, and standard deviation in order for further development of teaching and learning management.

Research process

The data were mainly collected through the participatory action research process of Kemmis & McTaggart (1988) and Sutthinarakorn (2013). The research activities consisted of two phases according to the semesters. Phrase 1 was during June – September 2020, and phrase 2 was during November - December 2021.

Step 1 Planning

1) Explore the basic information about curriculum in art education teaching and learning management of universities in Thailand.

2) Study curriculum problems in the past and present on the issue of developing art education teaching and learning management leading to analysis of guidelines for solving problems.

3) Study the problems of art teaching and learning management as a guideline to develop or improve the quality of instruction

4) Interview about experiences of art education teaching and learning management and perspectives on cultural diversity of all target groups in order to obtain preliminary information.

5) Analyze and synthesize the results of the interview to be a guideline for teaching and learning management for all target groups as well as to obtain guidelines for the development of art education teaching and learning management by integrating the culturally relevant pedagogy with the Art Instruction 3 course.

6) Organize the group meetings with all target groups to collect problems and formulate a plan for the development of teaching and learning management according to the culturally relevant pedagogy in order to obtain guidelines for teaching and learning management and course syllabus.

7) Employ teaching guidelines to develop a course syllabus for using in the art education teaching and learning management according to the culturally relevant pedagogy.

Step 2 Action

1) The lecturer introduced the course to students in order for them to have knowledge and understanding about the art education teaching and learning management by integrating the culturally relevant pedagogy with the Art Instruction 3 course.

2) The lecturer began to organize the teaching and learning process according to the prepared guidelines.

3) The students practiced teaching in classrooms.

4) The students went out to practice teaching in schools where the target teachers were teaching and in various schools with cultural diversity.

Step 3 Observation

1) Teaching and learning process was conducted by the lecturer according to the designed plan.

2) The students practiced teaching in classrooms, whereas the lecturer observed students' characteristics in teaching and learning management.

3) While the students went out to practice teaching in schools, teachers in the targeted schools monitored and controlled the students' teaching and learning management in accordance with cultures. The teachers also supervised, controlled and monitored teaching and learning management of students in other schools.

Step 4 Reflection

1) There was a reflection activity through the opinion writing of the students about cultural diversity in classrooms and in the society.

2) The students gave the presentations about the results of teaching practice in schools, the exchange of knowledge relating to the diversity of learners in different schools, and the management of teaching and learning corresponding to learners' cultures.

When step 4 was completed, the lecturer used the results of teaching and learning management for further planning, improvement, correction and development as shown in the diagram below.

Conclusion

1. The results of the development of multicultural competency of art student teachers using a questionnaire revealed that, before studying, the students expressed their opinions on the art education teaching and learning management according to the concept of culturally relevant pedagogy in terms of attitude the most at a high level, with mean of 4.23. Besides, the skill and knowledge aspects were in a moderate level, with mean of 3.28 and 3.19 respectively. On the other hand, after studying, there was a change in all aspects at a high level. The knowledge aspect had the greatest change, with mean of 3.78, standard deviation of 0.78; followed by the skill aspect with mean of 3.85, standard deviation of 0.78. There was the least change in the attitude aspect with mean of 4.25, standard deviation of 0.74.

2. According to the questionnaire, semi-structured interview, observations and focus group discussion record form, the change in multicultural competency of art student teachers demonstrated that 19 students with no change was the most proportion (52.78%), followed by 13 students with a change (36.11%). The least proportion were 2 students with highly change and decrease (5.56%). There were not many changes because the majority of students had a positive attitude towards art learning management for multicultural learners. Furthermore, the findings reflected that the students still lacked knowledge and skills in teaching and learning management according to aforementioned concept. However, after studying, students had better knowledge and skills. Moreover, instructors and student teachers had an understanding in multicultural learners and had a positive attitude towards the diversity of learners. They had to be careful with their speeches, minds and behaviors that could be sensitive to the feeling of the learners; thus, this did not cause bias against each other and they could live together peacefully. In addition, student teachers were able to manage the art education teaching and learning in various schools that corresponded to the cultural diversity of the learners.

Discussion

1. The results of the development of multicultural competency of art student teachers using a questionnaire revealed that, before studying, the students expressed their opinions on the art education teaching and learning management according to the concept of culturally relevant pedagogy in terms of attitude the most at a high level, with mean of 4.23. Besides, the skill and knowledge aspects were in a moderate level, with mean of 3.28 and 3.19 respectively. On the other hand, after studying, the students' opinions changed in all aspects at a high level. The knowledge aspect had the greatest change, with mean of 3.78, standard deviation of 0.78; followed by the skill aspect with mean of 3.85, standard deviation of 0.78. There was the least change in the attitude aspect with mean of 4.25, standard deviation of 0.74. These results reflected that students still lack knowledge, understanding and skills in teaching and learning management according to the aforementioned concept. However, after studying, students had better knowledge and skills which corresponded to the research study of Arphattananon (2020). Arphattananon found that, for an overall of the development of multicultural

schools to build multicultural competence through education for teachers and students in Thailand, teachers and school administrators had positive attitude and correct understanding of cultural diversity. However, they still lacked cross-cultural communication skills, skills for teaching culturally diverse learners, and open attitude to respect and value all cultures. In addition, Miller and Fuller (2006) developed the cultural competence of early childhood student teachers through their own Cultural Self-Analysis (CSA) project. They found that the Cultural Self-Analysis (CSA) project was able to serve as a catalyst for incorporating cultural understanding into teacher preparation programs in order to enhance the cultural competence of future early childhood teachers to have a strong potential to expand knowledge and practical strategies. It was necessary to develop the essential cultural competence for teaching multicultural children and working with family effectively. After finishing the CSA project, they felt more comfortable with their ability to interact with multicultural children and families while they prepared teaching.

2. According to the questionnaire, semi-structured interview, observations and focus group discussion record form, the change in multicultural competency of art student teachers demonstrated that 19 students with no change was the most proportion (52.78%), followed by 13 students with a change (36.11%). The least proportion were 2 students with highly change and decrease (5.56%). There were not many changes because the majority of students had a positive attitude towards art learning management for multicultural learners. Furthermore, the findings reflected that the students still lacked knowledge and skills in teaching and learning management according to aforementioned concept. However, after studying, students had better knowledge and skills. Moreover, instructors and student teachers had an understanding in multicultural learners and had a positive attitude towards the diversity of learners. They had to be careful with their speeches, minds and behaviors that could be sensitive to the feeling of the learners; thus, this did not cause bias against each other and they could live together peacefully. In addition, student teachers were able to manage the art education teaching and learning in various schools that corresponded to the cultural diversity of the learners. These results also corresponded to the research study of Arphattananon (2020) that the implementation of lesson plans for culturally diverse learners in teaching practice could enable students to develop their skills in living and working with one another in a multicultural society. Moreover, it could enable students to deal with conflicts and to improve the social movement skill in order for them to solve problems arising in the students' daily lives. This was the ultimate aim of providing education for culturally diverse learners. It conformed with the research of Suwanma and Srisuk (2017) that, after the workshop, teachers had an opportunity to practice teaching in classrooms with students of various ethnicities which enabled them to have competency in teaching and learning management with the Rater Agreement Index: RAI between 0.80-0.99. The students at all grade levels changed their behaviors in a better way. Furthermore, according to the research of Phinla (2016), it was found that the guidelines for enhancing social studies learning management competence for living together in a multicultural society for teachers in the 21st century should focus on enabling learners to be able to practice according to their potentials in line with the living in a globalized society based on cultural diversity.

Recommendation

1. There should be the development of multicultural competency of art student teachers according to the culturally relevant pedagogy in other art education courses, so that student teachers will understand, accept, respect one another as well as understand, accept, and respect diverse students. Moreover, they will provide equal teaching and learning for multicultural learners.

2. There should be a study and analysis of the problems of multicultural learners in various contexts at all levels in order to improve guidelines for the development of teaching and learning management according to the culturally relevant pedagogy as well as to maximize benefits in all dimensions.

An Investigation of Students' Desirable Characteristics Based on the Principles of Sufficiency Economy Philosophy for Primary Schools in the Northeast

Santhit Chonburee[1]
Yatawee Chaiyamat[2]
Brendan D. McKell[3]
Vijittra Vonganusith[4]

Abstract

The study was a preliminary study from a larger research project to investigate the desirable characteristics of students in Northeast elementary schools based on the principles of sufficiency economy philosophy. The data collection steps consisted of two steps: 1) synthesizing 12 academic document papers and research related to students' characteristics according to the philosophy of sufficiency economy; and 2) determining the indicators of students' characteristics according to the philosophy of sufficiency economy. The finding revealed that six desirable characteristics should be cultivated by the learners according to the principles of sufficiency economy philosophy, including 1) integrity, 2) discipline, 3) diligence, 4) frugality, 5) sufficiency, and 6) patience.

Keywords: Students' Desirable Characteristics, Principles of Sufficiency Economy Philosophy, Northeast elementary schools

Introduction

As technology advances in Thailand, social conditions and people's ways of life have altered. Children's and youth's behaviors have changed, which has led to a decline in society's state. Thai children and teens are shaped to adhere to consumerism for a variety of reasons, which are elements that place them in such distressing conditions that they tend to consume and live opulently (Phadung Jitjuajun, Online).

Therefore, the 2008 Basic Education Core Curriculum seeks to turn students into good, smart, and joyful people with possibilities for further education and employment. (OBEC, 2008) and set standards and indicators to instill and nurture learners' adherence to the sufficiency economy in thinking, as well as other qualities required for 21st-century living. Planning and conducting as well as other 21st-century skills are included (Chakparun Wichaakharawit, 2018). In addition, the Basic Education Core Curriculum 2008 defines the first goal as possessing morals, ethics, and virtuous principles of self-worth, developing self-discipline; adhering to their religion’s tenets; and following the principles of sufficiency economy philosophy (SEP) in their mindset (OBEC, 2008).

The principles of SEP are the name of a Thai development approach attributed to King Rama IX that places a strong emphasis on people being and acting in all spheres of existence to advance along a medium route fit for the direct way of life of the Thai people, at the family level, community level, and state level, especially in economic development to keep pace with the current phase of globalization, as well as in the development and management of the nation ((NESDC, 2014). Sufficiency-based philosophical principles serve as the cornerstone of

life, which underpins the stability of the nation. It resembles a pile that has been fastened together to support the dwellings and the structure itself. The principles of feeding the majority of the population must be established as a foundation for the development of the country.

The principles of SEP are comprised of the following three rings (components) and two accompanying conditions, respectively (NESDC, 2014, pp. 14-16).

1) Moderation is defined as being neither too much, nor too little, but rather appropriate for the circumstance, in keeping with one's position in society, the environment, and local culture, and is unable to affect wither oneself or others.

2) Reasonableness means making rational decisions based on
academic grounds, legal principles, moral standards, ethical principles, and decent culture. This also includes taking a close look at the current situation and weighing the potential implications of such actions.

3) Self-Immunity means getting ready for impacts and changes in the
economy, society, environment, and culture so that one can quickly adjust and cope with internal and external changes. The SEP recognizes the dynamic and fluid circumstances and situations in people's lives.

4) Appropriate Knowledge means using caution and great care while putting numerous academic fields to work when organizing and carrying out each stage of planning and implementation.

5) Ethics and Virtues. The improvement of the nation's mental infrastructure
is vital and will foster human development so that people become more honest, understand love and oneness, are not avaricious or stingy, can live with others, and live with intelligence, patience, persistence, and attentiveness.

Based on the research studies at the primary school level, the findings on the students' desired characteristics according to the SEP principles are varied and could be summarized as follows:

REF 1 Manasanun Khamton (2018, pp. 35) research abstract "Development of indicators of sufficiency characteristics according to the Sufficiency Economy Philosophy for lower secondary school students in Chiang Rai province." The results of the study revealed that there are 4 indicators of morality:

1. Honesty
2. Generosity
3. Diligence, perseverance
4. Knowing love and unity

REF 2 Oratai Thonglueklit and others (2017, pp. 256) have studied morals ethics of learners in educational institutions under the Ministry of Education in 6 areas: discipline responsibility Integrity, sacrifice, patience, forbearance and sufficiency were found that the aspect with the highest average In order of importance is discipline. responsibility sacrifice Sufficiency Integrity and patience.

REF 3 Pipidhanawwadee Somkhane and Prayoon Saengsai (2022, pp. 1236) said that the knowledge and morals of the learners Knowledge must be promoted through opportunities to develop skills in various fields, morality, such as discipline, respect, honesty, filial piety, diligence, patience, interest in knowledge and conscience in doing good for the public. in terms of skills, productivity and responsibility (Productivity and Accountability) in society together for well-being.

REF 4 Chakparun Wichaakharawit (2018, pp. 50) researched "Moving the Sufficiency Economy Philosophy to Basic Education in Ban Pang Mayao School Chiang Dao District Chiang Mai Province" summarizes the virtues born to learners, consisting of frugality, diligence, patience and honesty.

REF 5 Jetsada Srisuphap (2020, pp. 124) The results of the research, "The model of character development is sufficiency according to the philosophy of sufficiency economy among junior high school students under the Secondary Educational Service Area Office, District 26". Just according to the philosophy of sufficiency

economy of junior high school students under the Office of Secondary Education Service Area 26, there are 4 aspects. including economic sufficiency cultural sufficiency environmental sufficiency and social sufficiency.

The SEP principles offer an alternative solution for solving problems in Thai education. Students who are instilled with the philosophy of the sufficiency economy Philosophy It will be a basic virtue that will make children grow up to be good adults. Live according to the Sufficiency Economy Philosophy: live together with others in society with generosity that does not interfere, leading to peace, love, unity, and lasting happiness.

In 2007, the Ministry of Education established a policy framework for solving problems and improving the quality of education. By adopting the implementation of the Sufficiency Economy Philosophy as a direction for policy formulation with a focus on the development of balanced and sustainable education, both in quantity and quality, to lay the foundation for the continuous long-term development of education and to keep pace with the changing world. Therefore, the Ministry of Education has adopted the philosophy of sufficiency economics into practice. with important activities as a focus The strategy consists of encouraging all educational institutions to organize learning activities to cultivate morality Supporting various forms of student development activities as a mechanism to promote morality Educating all levels of management on the philosophy of sufficiency economics and good governance. Integrate in personnel development in all courses and strengthen the student care system. Because of this, educational institutions must use the philosophy of sufficiency economy as a guide for making their policies (Kasem Wattanachai, 2008).

The Office of the Basic Education Commission (OBEC) has revised the Basic Education Curriculum B.E. 2544 to be clearer in the goals and quality of learners. In accordance with the 2007 Constitution, by promulgating the Basic Education Core Curriculum B.E.Development of learners is to have morals, ethics, and desirable values, discipline and practice according to the principles of Buddhism or their religion; to adhere to the philosophy of sufficiency economy; and to have desirable characteristics or focus on 8 quality learners, namely patriotism-religion-king Sincerity, discipline, a desire to learn, and a willingness to work Being Thai, having a public mind, and establishing indicators standards in the 2008 curriculum are all aimed at cultivating and cultivating learners to adhere to the sufficiency economy philosophy in thinking, planning, and conducting, as well as other features required to live in the twenty-first century (Sufficiency Education Center Yuwasathirakhun Foundation, online). The pupils should keep this in mind as they study the moral values that they have been taught by the SEP, and foster the students' desired characteristics, which are the crucial virtues that will help youngsters, develop into moral adults. Follow the SEP when living can promote cooperation, kindness, and non-interference to bring about peace, love, and permanent happiness. Especially Ethics and Virtues are varied and could be summarized as follows:

Chakparun Wichaakharawit (2018, pp. 50) researched "Moving the Sufficiency Economy Philosophy to Basic Education in Ban Pang Mayao School Chiang Dao District Chiang Mai Province" summarizes the virtues born to learners, consisting of frugality, diligence, patience and honesty.

Pipidhanawwadee Somkhane and Prayoon Saengsai (2022, pp. 1236) said that the knowledge and morals of the learners Knowledge must be promoted through opportunities to develop skills in various fields, morality, such as discipline, respect, honesty, filial piety, diligence, patience, interest in knowledge, and conscience in doing good for the public in terms of skills, productivity, and responsibility (productivity and accountability) in society together for well-being.

Therefore, this current study aims to synthesize the characteristics of students in elemental schools that offer sufficient economic learning for communities and teachers through document analysis of 12 documents and related literature.

Research Objective

1. To synthesize students' characteristics according to the philosophy of sufficiency economy.

2. To determine the indicators of the students characteristics according to the philosophy of sufficiency economy.

Research Methodology

The 12 relevant documents and research studies were carried out to categorize the students' characteristics according to the principles of sufficiency economy philosophy.
(ONCC, 2002; Ministry of Education, 2008; Basic Education Core Curriculum, 2008; Ministry of Education, 2009; Office of the Permanent Secretary, 2007; Chakparun Wichaakharawit, 2018; Jetsada Srisuphap, 2020; Manasanun Khamton, 2018; Oratai Thonglueklit and others, 2017; Pipidhanawwadee Somkhane and Prayoon Saengsai, 2022). These primary sources are drawn from Thai contexts. The research method was divided into two steps as follows:

Step1: Synthesize the related academic document papers and research. In this step, the researcher analyzed 12 academic document sources, and synthesized the characteristics of students according to the philosophy of sufficiency economy.

Step2: Determine the indicators of the students' characteristics. The content analysis method was used to look at the indicators from the sources, and the frequency of more than 50% of them was used to create the indicators for students based on the sufficiency economy philosophy.

Conclusion

The result of the study 12 relevant documents and research studies were carried out to categorize the students' characteristics according to the principles of sufficiency economy philosophy as follows:

Table 1 The results of the students' characteristics according to the principles of sufficiency economy philosophy

Components	ONCC (2002)	Ministry of Education (2008)	Basic Education Core Curriculum (2008)	Ministry of Education (2009)	Office of the Permanent Secretary (2007)	Chakparun Wichaakharawit (2018)	Jetsada Srisuphap (2020)	Manasanun Khamton (2018)	Oratai Thonglueklit and others (2017)	Pipidhanawwadee Somkhane and Prayoon Saengsai (2022)	Pamon Supapak and other (2017)	Rommanee Butjantra (2021)	frequency	percentage
diligent	√	√			√	√		√		√			6	50.00
responsibility	√				√				√		√		4	33.33
frugality	√	√		√		√					√		5	41.67
discipline	√	√	√	√	√				√	√			7	58.33

Components	ONCC (2002)	Ministry of Education (2008)	Basic Education Core Curriculum (2008)	Ministry of Education (2009)	Office of the Permanent Secretary (2007)	Chakparun Wichaakharawit (2018)	Jetsada Srisuphap (2020)	Manasanun Khamton (2018)	Oratai Thongluekit and others (2017)	Pipidhanawwadee Somkhane and Prayoon Saengsai (2022)	Pamon Supapak and other (2017)	Rommanee Butjantra (2021)	frequency	percentage
nationalism, religion, and, monarchy	√		√										2	16.67
Integrity		√	√	√	√	√		√	√	√	√		9	75.00
politeness		√											1	8.33
cleanliness		√											1	8.33

sacrifice									√		√		2	16.67
respect										√			1	8.33

Table 1 shows the students' traits in terms of morality according to the sufficiency economy philosophy. The document inquiry constructs 20 components of the students' moral traits based on the principles of sufficiency economy by combining and synthesizing similar features from ideas, theories, research studies, and relevant organizations' rules and regulations. The students' characteristics include these three major components: 1) Integrity, 2) discipline, and 3) diligence, with 75%, 58.33%, and 50%, respectively. The other traits with a frequency of less than 50% are responsibility, frugality, nationalism, religion, and, monarchy, politeness, cleanliness,

harmonious relations, being considerate, willing to learn, sufficiency, earnestness, Thainess, public mind, gratitude, patience; generosity, sacrifice, and respect. According to the principles of sufficiency economy, students should have frugality, sufficiency, and patience, which are seen as characteristics of students according to the principles of sufficiency economy.

Discussion

Components of students' characteristics were determined using document analysis through various academic sources in Thai contexts from 12 sources, according to the principles of sufficiency economy philosophy. According to the research findings, there are categories for the students' characteristics based on the principles of sufficiency economy. The research findings revealed that there are six components of students' characteristics according to the principles of sufficiency economy philosophy includes 1) integrity, 2) discipline, 3) diligence, 4) frugality, 5) sufficiency, and 6) patience. This pattern of research is consistent with the previous concept of Chakparun Wichaakharawit (2018, pp. 50), who researched "Moving the Sufficiency Economy Philosophy to Basic Education in Ban Pang Mayao School, Chiang Dao District, Chiang Mai Province." This concept summarizes the virtues born to learners, consisting of frugality, diligence, patience, and integrity. In addition, Pamon Supapak and colleagues (2017) conducted research on the development of youth leadership characteristics in a sufficiency economy. The research showed that 1) the qualities of young leaders in sufficiency economies are: (1.1) having good immunity to protect yourself, your family, and your country; and (1.2) having enthusiasm, being brave enough to think and act, and being strong-willed. (1.3) having morality in saving, honesty, and taking responsibility for the country; (1.4) being attentive to learning about the economy Sufficiency (1.5) courage, patience, and sacrifice. As a result, all six characteristics are desirable characteristics based on the principles of sufficiency economy and should be cultivated in learners according to the philosophy of sufficiency economy.

Recommendation

1. Those who are interested in students' characteristics based on the principles of sufficiency economy philosophy should analyze needs and expectations for determining
students' desirable characteristics based on the principles of sufficiency economy philosophy.

2. This research study was a qualitative design, therefore, students' characteristics based on the principles of sufficiency economy philosophy are a desirable characteristics that communities and teachers needs.

Production and Development of High-Performance Vocational Manpower

Kanokwan Songsomboon[1]

Abstract

The quality enhancement of vocational education management for and creating the country's competitiveness is the mission according to the policy and focus of the Office of the Vocational Education Commission (OVEC). This policy is driven by the establishment of the Center of Vocational Manpower Networking Management (CVM) under the Excellent Center Project which is the policy and focus of the Ministry of Education in 2023, "Education to Improve Career Skills and Increase Competitiveness". At present, there are 431 government vocational education institutions (Office of the Vocational Education Commission, 2021). 120 vocational institutions were selected as educational institutions with specialized excellence under the driving standard of the Excellence Center for vocational education, which aims to produce and develop workforces in the fields that are the needs of the country according to the Thailand 4.0 model. They were managed through the 25 centers of Vocational Manpower Networking Management, together with the joint committee and sub-committee of public and private sectors for vocational manpower development, to increase the number of professional workforce with knowledge and skills in technology and innovation for the main industrial groups in the current and future development of the country.

Keywords: CVM, excellent center, vocational manpower, high performance

Introduction

Currently, the government has increasingly focused on the management of vocational education to produce professional workforces from vocational institutions. The government has set a national agenda to promote the production of high-quality manpower in the domestic and foreign labor markets. With the support of the government through the Ministry of Education, the Office of the Vocational Education Commission (OVEC) has received budget contributions to establish the Center of Vocational Manpower Networking Management (CVM) on 24 November 2021. Twenty-five educational institutions are assigned to oversee 25 professional fields with high labor demand now and in the future, including the following disciplines: mechanical technology, production technology, automotive body and paint repair technology, electronics, mechatronics and robotics, tourism, hotels, conferences and exhibitions, logistics and supply chain management, retail businesses, plant science, animal science, food and nutrition, marine mechanical technology, aircraft maintenance, railway transportation control and maintenance technology, petrochemistry, electricity generating industry, alternative power technology, digital business technology, construction, gem and jewelry, refrigeration and air-conditioning technology, metal technology, and beauty technology. In this paper is **to present** High-Performance Vocational Manpower, CVM and Excellent Center, and Conclusion.

[1] Kanokwan Songsomboon, Ph. D. (Educational Administration) Faculty of Education, Nakhon Pathom Rajaphat University, Nakhon Pathom 73000. Corresponding author, e-mail: knwssmbn55@gmail.com Tel. 0 8144 03359

High-Performance Vocational Manpower

High-performance vocational manpower is the production and development of manpower to meet the acceptable standards of domestic and ASEAN labor markets and the encouragement of graduates to apply their knowledge, skills, attitudes, and characteristics in their work operation and in real life. High-performance vocational manpower management isthe skill addition and development--reskill, upskill, and new skill--for workforces so that they can cope with new normal lifestyles. These changes result in the adjustment of manpower production process to meet the needs of national development and technological change along with the national strategy, as well as creating the country's competitiveness and economy mobilization (Theera Chinapha et al.: 2022). Thanu Wongjinda, the Secretary-General of the Vocational Education Committee, addressed the policy of the Minister of Education, Ms. Trinuch Tienthong, to improve the quality of vocational education management in order to produce and develop high-quality workforces under 5 main policies: 1. enhancing the quality of public and private vocational education, 2. enhancing cooperation and create images of public and private vocational education, 3. expanding educational opportunities and vocational education equality, 4. strengthening safe vocational education, and 5. enhancing the efficiency of management. Seven urgent policies are: 1. enhancing dual vocational education, 2. enhancing vocational boarding programs with free education for careers, 3. driving the new dual education system, 4. mobilizing the vocation for public assistance centers, 5. propelling the safety center of OVEC, 6. reforming colleges in fisheries and agriculture technology, and 7. creating vocational education images. The production policy of high-performance vocational education workforce has been implemented according to the 15-year policies and strategies (2012-2026) of the OVEC for 10 years and is entering its 11th year of operation. There is a policy to increase the number of vocational learners with quality according to the cooperation framework of the ASEAN Economic Community. It promotes and develops various forms of vocational education management and vocational training, both formal and informal education and dual system. Collaborative vocational management to produce and develop manpower between the educational institutions and the establishment, especially the dual education system and professional experience training in the workplace, has been promoted. Moreover, there is a policy to increase educational opportunities and vocational training for non-formal groups (vocational projects to produce craftsmen based on Phra Dabos Concept), as well as policies to adjust images, attitudes, and social acceptance toward vocational learners through a qualitative process among students, parents, and communities.

CVM and Excellent Center

Center of Vocational Manpower Networking Management (CVM) helps the vocational education system increase the potential to manage in the field consistent with urgently needed occupation groups for the country's development. It has the main missions of producing and developing manpower in accordance with the needs of the country, enhancing the country's competitiveness, and encouraging graduates to have careers with decent incomes. The OVEC, by the subcommittee of public and private sectors for vocational manpower development, has selected 25 educational institutions with specialized excellence in education management in the field that responds to the News S-Curve to be the CVM center throughout the country. There are educational institutions with education management excellence as a network institution. The vocational educational institution selected to be a CVM center shall be an institution with educational and spatial contexts conducive to vocational education management in the fields of the country's industrial development goals (S-Curve) through the intensive dual vocational system. The OVEC provides budgets and resources to the selected excellent institutions for organizing quality vocational education (Office of the Vocational Education Commission, 2021). The guidelines or criteria for selecting excellent centers are as follows: (Notification of the Office of the Vocational Education Commission, 2021) 1) the institution cooperates with establishments in the management of dual educational system, 2) the number

of teachers in the excellent and specialized fields is sufficient to manage quality vocational education, and teachers have the ability to produce digital media and organize learning on digital platforms, 3) the institution has educational infrastructure and environment as quality sources of digital learning, 4) the institution manages vocational education to produce and develop manpower in fields of the country's industrial development goals (S-Curve), 5) the institutions must be accredited by the vocational institution quality from its original affiliation, 6) the institutions has collaboration with domestic or oversea vocational/higher education institutions in exchanging academic and professional knowledge of teachers and learners, 7) the institution must continuously develop the curriculum in accordance with professional standards together with the establishment, be able to link professional competencies to academic qualification system, and has a variety of learning management innovations, 8) the institution has educational and spatial contexts conducive to vocational education management of the excellent fields with quality, and 9) the institution empowers learners and graduates with competencies and qualifications that meet the needs of the establishment and graduates are employed after graduation.

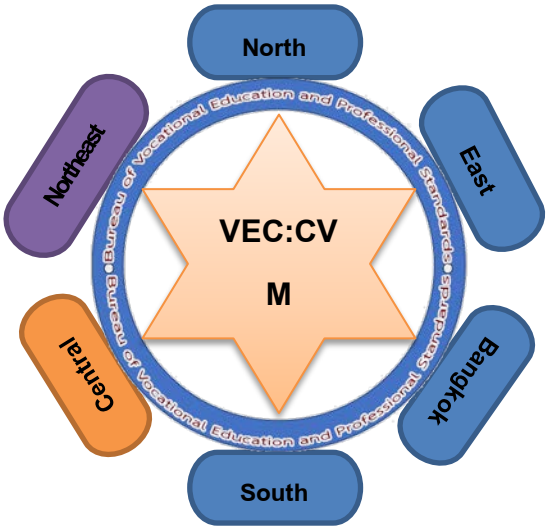

Figure 1 Twenty-five CVM Centers in 6 regions under the supervision of OVEC

The operation of all 25 CVM centers is driven through the Vocational Excellent Center by producing high-potential manpower according to the contexts of the area-- the industrial development zone and the special economic development zone under the special economic policy of the country governed by the Special Economic Zones Development Policy Committee, e.g., Tak Economic Development Zone, Trat Economic Development Zone, Sa Kaeo Economic Development Zone, Mukdahan Economic Development Zone, Songkhla Economic Development Zone, Eastern Economic Corridor (EEC), Western Economic Development Zone, and Economic Development Zone of Southern Border Provinces. Professional competencies in future skills are also developed to accommodate the sudden change in the world situation and to support the advancement of the 21st century with the capacity of Thailand's workforce through the Center of Vocational Manpower Networking Management. There are 13 government-supported enterprises in 10 provinces of Special Economic Zones: 1) agro-industry, fishery industry, and related industries, 2) ceramic product industry, 3) textile, garment, and leather industry, 4) furniture products, 5) gem and jewelry industry, 6) medical device product, 7) automotive, machinery, and parts industry 8) electronic and electronic industry, 9) plastic manufacturing industry, 10) pharmaceutical manufacturing industry, 11) logistics industry, 12) industrial zone or estates, and 13) tourism promotion industry (Bureau of Area Development Strategy and Planning, Office Economic Development Commission, 2016). All 13 industries consist of 62 types of businesses, for example,

plant drying and silo, feed manufacturing, plastic products manufacturing, building development for industrial plants, electric vehicles, and cosmetics manufacturing.

For the OVEC's policy on producing and developing high-performance vocational workforces to meet the needs of entrepreneurs and government policies, the CVM has been operated in connection to institutions classified as an excellent and specialized group. This Excellent Center has been established since 2020 in response to the policy of driving the country's targeted industry or S-Curve. The targeted industries include 1) next-generation automotive, 2) smart electronics, 3) affluent, medical, and wellness tourism, 4) agriculture and biotechnology, 5) food for the future, 6) robotics, 7) medical hub, 8) aviation and logistics, 9) biofuels and biochemistry, 10) digital industry, and 11) infrastructure. 120 vocational institutions were selected as the Excellent Centers, consisting of 107 government and 13 private educational institutions. These 120 institutions are monitored and assessed yearly. The disciplines selected as Excellent Centers receive special budgets every year for the purpose of special education organization, from the student selection process, teacher recruitment, promotion of learning management development, and adequate and appropriate specialized material and equipment support. In all 120 institutions, the Office of Vocational and Professional Standards has appointed a committee to select educational institutions according to the notification of specialized characteristics of vocational institutions as the Vocational Excellent Centers. Twenty-five institutions were selected as the CVM centers as follows: 1. Mechanical Technique - Chachoengsao Technical College, 2. Mechanical Technique (automotive body and paint repair technology) - Chaiya Industrial and Community Education College, 3. Production Technique - Samut Songkhram Technical College, 4. Electronics - Nakhon Nayok Technical College, 5. Tourism - Chiangrai Vocational College, 6. Hotel - Phuket Vocational College, 7. Convention And Exhibition - Khon Kaen Vocational College, 8. Plant Science - Suphanburi College of Agriculture and Technology, 9. Animal Science - Songkhla College of Agriculture and Technology, 10. Food And Nutrition - Chachoengsao Vocational College, 11. Mechatronics and Robotics - Sattahip Technical College, 12. Logistics and Supply Chain Management - Udon Thani Vocational College, 13. Marine Mechanical Technology - Nakhon Si Thammarat Seaboard Industrial College, 14. Aircraft Maintenance - Thalang Technical College, 15. Railway Transportation Control And Maintenance Technology - Chonburi Technical College, 16. Petrochemistry - Maptaphut Technical College, 17. Electricity Generating Industry - Mae Moh EGAT College of Technology and Management, 18. Alternative Power Technology - Chaiya Phum Technical College, 19. Digital Business Technology - Thonburi Commercial College, 20. Construction - Sakaeo Technical College, 21. Gems and Jewelry - Golden Jubilee Royal Goldsmith College, 22. Retail Business - Bangna Commercial College, 23. Refrigeration and Air-conditioning Technology - Rajasitharam Technical College, 24. Metal Technology - Hatyai Technical College, and 25. Beauty Technology - Samut Prakan Polytechnic College. Additionally, there are another 95 Excellent Centers as follows: Mechanical Technique (Chonburi Technical College, Nakhon Sawan Technical College, Phrae Technical College, Automotive Industry Technical College, Trang Technical College, Nakhon Si Thammarat technical college, Sakon Nakhon Technical College, Nakhon Ratchasima Technical College, Chachoengsao Technical College, Toyota Automotive Technological College), Telecommunication Technology (Nawamin Thrachutit Industrial and Community Education College), Electronics (Nakhon Nayok Technical College, Lampang Technical College, Surat Thani Technical College, Nongkhai Technical College), Science-Based Industrial Trade (Suranaree Technical College, Science-Based Technology Vocational College (Chonburi)), Science-based Commercial and Services (Phang Nga Technology College), Hotel (Pathumthani Vocational Education College, College of Business Administration and Tourism, Chiang Mai Vocational College, Phuket Vocational College, Ubon Ratchathani Vocational College, Wimol Business Administration Technological College), Science-based Agricultural Biotechnology (Lamphun College of Agriculture and Technology), Plant Science (Chiang Rai Agriculture and Technology College, Phrae College of Agriculture and Technology, Phayao Provincial Agriculture and Technology College, Chiang Mai College of Agriculture and Technology), Animal Science (Lopburi College of Agriculture and Technology, Si Sa Ket College of Agriculture and Technology), Aquaculture (Tinsulanonda Fisheries College), Farm

Mechanics (Buriram College of Agriculture and Technology), Agro-Industry (Mahasarakham College of Agriculture and Technology), Science-based Food Technology (Singburi Vocation College), Food and Nutrition (Saowabha Vocational College, Eamla-or Vocational College, Chachoengsao Vocational College, Nakhon Pathom Vocational College, Lampang Vocational Education College, Uttaradit Vocational Education College, Chiang Rai Vocational College, Songkhla Vocational College, Pattani Vocational College, Nakhonratchasima Vocational College, Surin Vocational College, Thai & International Food Technological College), Electronic Engineering Science-Based Technology Vocational College (Chonburi), Mechatronics Engineering (Suranaree Technical College), Mechatronics and Robotics (Suranaree Technical College, Sattahip Technical College, Minburi Technical College, Ayutthaya Technical College, Suphan Buri Technical College, Saraburi Technical College, Samut Sakhon Technical College, Samutsongkhram Technical College, Kamphang Phet Technical College, Phichit Technical College, Nakhon Si Thammarat Technical College, Roi Et Technical College, Siam Technology College), Marine Maintenance (Phuket Vocational College), Logistics and Supply Chain Management (Udonthani Vocational College), Marine Mechanics (Ban Khai Technical College, Nakhon Si Thammarat Seaboard Industrial College), Aircraft Mechanics (Don Mueang Technical College, Samut Prakan Technical College, Sattahip Technical College, Thalang Technical College, Ubon Ratchathani Technical College, Khon Kaen Vocational College), Railway Transportation Control and Maintenance Technique (Sattahip Technical College, Chonburi Technical College, Ayutthaya Technical College, Nakhon Lampang Technical College, Hatyai Technical College, Surat Thani Technical College, Wapi Pathum Technical College, Ban Phai Industrial and Community College, Tharn Technological College), Petrochemistry (Maptaphut Technical College, IRPC Technology College), Chemical Industry (Rayon Technical College, IRPC Technology College), Instrumentation and Petroleum Control (Hatyai Technical College), Electricity (Photharam Technical College, Saraburi Technical College), Electricity Generating Industry (Mae Moh EGAT College of Technology and Management), Power Technology (Chaiya Phum Technical College), Digital Business Technology (Intrachai Commercial College, Thon Buri Vocational Education College, Thonburi Commercial College, Wangnamyen Technical College, Suphan Buri Vocational Education College, Chiang Mai Technical College, Udonthani Vocational College, Khon Kaen Vocational College, Tangtrongchit Commercial Technological College), Computer Graphics (Santirat Vocational College, Siam Business Administration Technology College), Information Technology (Krabi Technical College, Siam Business Administration Technology College Nonthaburi), Construction (Dusit Technical College, Sakaeo Technical College, Boonthavorn Technology College), Textile Technology (Photharam Technical College), Gems and Jewelry (Golden Jubilee Royal Goldsmith College), Retail Business (Bangna Commercial College, Panyapiwat Technological College), Refrigeration and Air-conditioning Technology (Rajasitharam Technical College), Metal Technology (Hatyai Technical College), Beauty Technology (Samut Prakan Polytechnic College) (Office of the Vocational Education Commission, 2021).

Conclusion

The high-performance vocational workforce has been developed for 10 years and is entering its 11th year of development. New branches are organized to produce graduates into the labor market of the country with quality. Meet the needs of both domestic and ASEAN establishments. New professional fields are classified as Excellent Centers, consisting of 107 government schools and 13 private schools. Advanced and outstanding disciplines include mechatronics and robotics, logistics and supply chain management, digital graphics, digital technology, rail transportation management, modern automotive technology, airline businesses, aircraft mechanics, ship maintenance, information technology, petrochemistry, industrial chemistry, textile technology, food technology, beauty technology, etc. These new branches promote future professions with high demand, i.e., software developer, cybersecurity, robotics engineer, project manager, e-commerce specialist, mobile application

developer, content creator, user experience (UX) researcher, business consultant, sale representative, care worker, and mental health counselor. The examples of quality vocational education institutions under the Office of the Vocational Education Commission in response to the policy to promote professional education were Rayong Industrial Estate Technical College, Nakhonratchasima Vocational College, Ubon Ratchathani Vocational College, Khon Kaen Vocational College, Rayong Technical College, Phatthalung Technical College, Hatyai Technical College, Phuket Vocational College, Chumphon Technical College, Ratchaburi Technical College, Sing Buri Technical College, Suphan Buri Technical College, Lampang Technical College, Chiang Rai Vocational College, Phrae Technical College, Phitsanulok Technical College, etc.

Discovering the Teachers' Characteristics for 21st-Century Learning in the Northeast Region of Thailand

Isara Chonburi[1]
Vijittra Vonganusith[2]
Brendan D. McKell[3]
Yatawee Chaiyamat[4]

Abstract

This article presents a preliminary study drawn from the main research on a training course for the preparation and intensive development of Thai primary school teachers in the Northeast Region of Thailand. This study aimed to synthesize elements of Thai teacher characteristics in the 21st century. The study evaluated various academic journals and used a synthesis of academic documents and related research through Google Scholar and ThaiLIS. The result showed that the composition of teachers' characteristics in the 21st century consists of four elements: Work with Technology, Work with What Works, Work with Other People, and Work with Appropriate Personal Traits and Beliefs.

Keywords: Teacher Characteristics, Guidelines for Teacher Preparation Programs

Introduction

Several studies examine the preparation program for the 21st century in Thailand and recommend the way forward for teacher education preparation programs. The current teacher education preparation programs in Thailand have been launched continuously to prepare teachers to meet the challenge of the rapid changes in the digital age.

Since 1990, The Teacher Council of Thailand has set standard criteria for professional teachers that identify the key features required for professional teachers in four aspects: mastery, good teaching, morals and ethics, and a commitment to development. The new criteria for teachers with 11 standards cover the same criteria that can be practiced, evaluated, and developed to a new level of quality in terms of teachers' ethics.

Likewise, Thailand has implemented several reforms to raise the quality of the teaching profession, including a 5-year program for pre-service teachers, and a teacher certification system. The additional improvements in terms of teaching professions through in-service training or pedagogical training and seminars. Higher educational institutions also prepare in-service teachers by cooperating with private organizations offering comprehensive programs in the basic education curriculum or other key areas. Similarly, online training activities increase the opportunity to join in with several teaching training courses (Office of the Education Council, 2015, p. 78 cited in Jamjuree, 2017, p. 15).

For example, a study by Kawinkiat Nonphala (2017) on the potential advancement of teachers as government officials in the 21st century. The teachers' competencies could be summarized as research skills, and present possible self and professional development consisting of knowledge, skills, and desirable traits principles. In addition, Chumchit (2007)'s study reveals that teacher preparation must focus on the self-development of teachers, and cover all aspects, such as having knowledge and understanding of new teaching techniques, and government regulations, using different tools effectively, and promoting permanent stability and prosperity for teachers.

Khamwang & Chaijayad (2016) and Nonphala (2017) have proposed that teachers must have knowledge management, learning, and innovation skills, as well as literacy skills (information, media, and technology skills). The development of desirable characteristics of teachers should be trained in workshops/seminars and provided competent speakers to educate and promote skills using a school-based development method. Buakhamkrot (2020) indicates that using the professional learning community (PLC) would promote, support, and create understanding for teachers in schools, and arrange for them to work together and be ready to learn. Likewise, Yamtim (2020) suggests the supervision, and follow-up for teachers to be developed into true professionals focusing on knowledge, and self-practice.

While the need for curriculum materials, classroom practices, and learning environments to alter is acknowledged to keep pace with the knowledge, and abilities of 21st-century learners, teachers must also have qualities and skills for dealing with rapid changes to prepare students to meet the challenges of the future and foster the development of social and technical skills among students (Faulkner, & Latham, 2016; Nuangchalerm, 2016). This is also consistent with Kawinkiat Nonphala (2017) who studied the subjects on the development of government teacher potential in the 21st century. The findings revealed that the necessary potential for the development of government teachers consists of three areas: knowledge, skills, and attributes. The perceived opinions on the development of desirable attributes were: 1) internal attributes and 2) external attributes. These include the morality and spirit of a teacher, love, kindness towards learners, care, patience, patience, determination, and effort. Practice according to governmental patterns of professional ethics, including behaviors and conduct that is a good example, both verbally and physically.

To promote effective learning management and influence the caliber of learners, teachers must possess positive attributes and training as educators. Instructions for preparing teachers to instruct students effectively with innovative and cutting-edge technologies are also provided. Anything or a symbol that indicates virtue, the desired qualities of society, or the excellent qualities of teachers are considered positive teacher features. The characteristics that make a desirable 21st-century teacher should go hand in hand with the requirements for high-quality learning, as the saying goes, "The quality of children mirrors the quality of teachers". Additionally, being able to use efficient strategies to advance teachers' professional development would put children's academic performance at an advantage.

The overall aim of this paper is to understand the characteristics of Thai primary school teachers that can make the effectiveness of the education experience and wider development of young people drawing on practice in Thailand. In this paper, the authors have examined the characteristics of primary school teachers in the Northeast Region of Thailand. According to the literature reviews, Thai teachers in the 21st century need to be proficient in the following elements: work with technology, work what works, work with other people, and work with appropriate personal traits and beliefs.

Research Objective

The purpose of the study was to synthesize elements of the characteristics of Thai primary school teachers from published papers in the Northeast Region of Thailand.

Research Methodology

The paper is solely based on secondary data examination through journal articles, e-books, reports of various organizations and commissions, and articles published in national, and international sources on Google Scholar and ThaiLIS. This paper will give a brief description of the characteristics of 21st-century Thai primary school teachers in the Northeast Region of Thailand.

Conclusion

The results of the synthesis of teacher characteristics in the 21st century revealed that teachers should have important characteristics: Work with Technology, Work with What Works, Work with Other People, and Work with Appropriate Personal Traits and Beliefs. The teacher development strategy's objective is to assist educators in gaining greater expertise, experience, and knowledge in overseeing the learning process so they can manage activities, work effectively, and benefit students and educational institutions. The potential development of teachers is the most crucial component of high-quality education. The most important element of high-quality education is teachers' potential development. By boosting teacher capacity and bringing it up to pace with that of other nations, all parties involved must make an effort to improve the stability and sustainability of Thailand's educational system.

Discussion

Characteristics of teachers in the 21st century found that teachers should have important characteristics, including Working with Technology, Working with What Works, Working with Other People, and Working with Appropriate Personal Traits and Beliefs.

5.1 Working with Technology

Teachers share the responsibility of building quality education and reconstructing society by shaping the life of learners. The characteristics of 21st-century teachers according to the Bureau of Social Learning Promotion (2014) and Pattanaphon (2014) are those who have skills in the use of technology. Their technology skills would include information, media, and technology.

Teachers with better technological skills are required to respond to the present rapid technological advances in education (Sinlarat, 2013; Sumardi, Rohman, & Wahyudiati, 2020). Since information technology has developed into a vast learning resource, teachers, as well as learners, may access to create their bodies of knowledge, synthesize content, and evaluate materials at any time and anywhere. Thus, the transformation of the educational process to embedding technology to support the teaching and learning process is challenging. Professional teachers continuously develop their learning skills in new things (Choositong, Pawabutra, & Suwannatrai, 2020), including the integration of technology into the classrooms to move toward a learner-centered learning approach (Jan, 2017). The information skills are critical for teachers and may transfer to students to learn how to distinguish reality from fiction, access correct information, and reach appropriate and useful information.

The media and technology skills are also important for teachers as they can be utilized in the classroom as well as a medium for communication and knowledge exchange among students, and teachers. The focus has always been on the positive influences teachers' competencies have on student achievement. For example, the 1070 primary school students' conceptual understanding and interest were measured during the teaching of primary science education. The effects from classroom practices, when added to those of other teacher characteristics positively related to student achievement (Wenglinsky, 2002; Tungduangdee, 2016; Yodsaleem, & Boonsong, 2016; Fauth, Decristan, Decker, Büttner, Hardy, Klieme, & Kunter, 2019).

Therefore, teachers' effective use of new media and technology in the classroom will also affect both students' skills development. The implementation of a new learning environment aided by technology would develop students' competence, such as critical thinking, communication, collaboration, creative thinking, and innovation (Sumardi, Rohman, & Wahyudiati, 2020).

5.2 Working with What Works

Work What Works in this study is defined as the professional skills that are the development of teaching careers teachers as a result of progressively reflecting on and obtaining more experience in their classrooms. As Shulman (2008 cited in Saeed & Akbar, 2021) indicated that professional skills comprise the knowledge of instruction methods, knowledge of student learning difficulties, and specific assessment methods. Professional skills could be summarized as follows: understanding the subject matter, preparing teaching and learning, having content knowledge, communicating information to the students in an understandable manner, and practice of reflection.

Teachers are defined as individuals who have completed practical training in educational institutions following TCT board guidelines and whose primary profession relates to the teaching and learning process, as well as the promotion of learning among learners through various methods at all educational levels (The Teachers Council of Thailand (TCT), 2005; Office of the Education Council Secretariat, 2012).

Much of this literature on teachers' teaching competence examines that teachers must have basic skills, which is one of the most essential requirements for becoming good and successful teachers by mastering the subject matter that would be taught to their students (Thanaphatchotiwat, 2014; Chumchit, 2010). Teaching skills are the most determinant of the student's academic success in the classroom. Thus, teachers must be proficient in explaining the lessons well to maximize the student's understanding of lessons. A well-organization lesson also enables the teachers in making clear descriptions. This is in line with a study by Freiberg, Huzinec, & Templeton (2009). They reveal that teachers' classroom management and assessment procedures have an impact on students' learning and academic progress.

The students must engage in learning and be provided with instructions using a variety of methods and pedagogical approaches. For example, The Bureau of Social Learning Promotion (2014) and Pattanaphon (2014) indicate that those must have a good understanding, and knowledge of instruction management. Additionally, teachers must also be proactive in managing teaching and learning and using a variety of teaching approaches to suit students' learning styles and create opportunities for learners to learn the necessary abilities (Buakhamkot, 2020). Consequently, the implementation of an inclusive teaching and learning environment would lead to better learning outcomes (Siphai, & Wanawan, 2019; Nuangchalerm, 2019; Munna. & Kalam, 2021).

The practice reflection is also crucial for teachers to analyze a teaching process to understand the relationships and influences embedded within it and how it affects individual practice. Therefore, the teacher can reconstruct this incident and develop new techniques to deal with a similar incident in the future classroom. The practice reflection that teachers should do or share on organizing their teaching and teaching their classes, including 1) self-examine individuals practices-identifying the learning barriers, being aware of the underlying issues to react appropriately, giving good feedback to build a positive effect on students' self-confidence and self-esteem, establishing assessment strategies that involve learners in self-assessment activities to help them become aware of their strengths and areas for improvement and to inspire them to create personal learning goals, and using a variety of research approaches to improve teaching and learning; and 2) examine other's practices-critiquing others' practices and providing useful suggestions (Kabilan, 2007; Nessipbayeva, 2012; Nonnapa, 2015)

5.3 Working with Other people

Work with other people in this study could be categorized into two aspects: working with other people in schools and working with people in communities (TCT, 2005; Nessipbayeva, 2012; Munna & Kalam, 2021).

Working with other people in schools is a professional practice that must be based on the principles of social inclusion and foster each student's potential. Teachers must also possess knowledge of students' development and learning as well as confidence while interacting with students, colleagues, and other teachers from other schools. Teachers should be able to interact with students individually and inspire them to become fully engaged, active citizens. Teachers must also be able to work collaboratively with peers in ways that improve students' capabilities and enhance their learning and teaching.

Working people in communities could be defined as working through a school-community collaboration to assist students to improve their well-being in life and study. Teachers should assist students in integrating into their local communities and inspire them to take responsibility locally and globally, encourage students to respect different cultures, be open to cooperation, and observe local and others' common values. Teachers should establish continuous and constructive cooperation with members of the community to examine an instruction and balance the relationship to be more innovative and productive, and to promote individual and organizational learning and growth.

5.4 Working with Appropriate Personal Traits and Beliefs

Another aspect that can be associated with classroom teaching-learning is the personal traits of teachers that reflect teachers' thoughts, feelings, and behaviors. The personal traits of Thai teachers must be based on the King of Thailand's sufficiency economy philosophy (PSE) highlighted a balanced way of living, which has been implemented into the Thai education system. PSE is a method of human development based on three principles: moderation, reasonableness, and self-immunity, with two accompanying conditions: appropriate morality and knowledge (Monsawad, 2010; Office of the Chaipattana Foundation, 2017). The other global characteristics that teachers should exhibit in and out of the classroom include diligence, responsibility, morality, a sense of community, physical and emotional stability, belief in the value of education, adaptability, being a spiritual teacher, serving as a role model, wisdom, teachership, being a person of learning, expressing love for the teaching profession (Thanaphatchotiwat, 2014; Promkarn, 2016; Athiratpanya & Kanat, 2018; Chumchit, 2010; the Bureau of Social Learning Promotion, 2014; Thanaphatchotiwat, 2014; Pattanaphon, 2014).

Recommendation

Teacher qualities should be instilled in the teacher's production process. Therefore, it should be proposed educational institutions that are responsible for producing teachers. Using the research results as a guideline for formulating curricula for teacher production and development and being consistent with the current education management are prioritized. Teachers should also develop themselves in terms of knowledge enhancement skills and experience in organizing the learning process so that teachers can organize activities and work efficiently. Likewise, school administrators should study and apply guidelines for teacher development in learning management in the 21st century to fit the context of each educational institution, especially in small schools with limited personnel and resources to make effective learning management in the 21st century.

ED-057

Immersive Learning in the Classroom of the Future

Chonlachai Sreechiang[1]

Abstract

The purpose of this article is to present the essence and necessity of digital technology for education, which highly affects the development of educational institutions to be practical, systematic, modern, and ready to deal with changes. Specifically, the content includes definitions, significance, and elements of smart classrooms that significantly contribute to learning management with effective digital technology. Additionally, the benefits and importance of Augmented Reality (AR) and Virtual Reality (VR) technologies in education are mentioned. This development of educational environment aims to equip learners to cope with changes in the digital era which results in in-depth experiential learning, called immersive learning.

Keywords: educational digital technology, smart classroom, AR, VR, immersive learning

Introduction

The world is now entering an era of economic and social systems in which digital technology significantly integrates with people's lives. Digital technology also completely transforms the structure of economic activities--production process, trade, and services--and other social processes, as well as the interaction between individuals. In the future, it is predicted that the competition for digital technology will increase with the development of new technologies to support the rapid changes in the global society, moving toward a borderless learning society. In order to produce people to live and keep up with changes, we need to look to the future and analyze ways of pushing and developing the country's education. This can be done by developing learners with the necessary skills for the future so that they can live happily in changing society (Sreechiang, 2020). Digital technology, therefore, must be introduced in supporting learning management to produce learners with skills, knowledge, and experience.

Thus, the development of a smart classroom where digital technologies are applied, including the introduction of Augmented Reality (AR) and Virtual reality (VR) technologies, and supported activities to enhance the classroom experience for learners to deeper learning. In this paper is to propose ideas and perspectives on digital technologies that can be used in educational management, especially in smart classroom management, where digital technologies and the use of AR and VR technologies are used to support educational management to create immersive learning.

Educational Digital Technology

Nowadays, in the digital era, society is changing rapidly due to technological advancement which increasingly plays an important role in human society and everyday life. Punkhetnakorn et al. (2021: 329) said that nowadays the progress of digital technology is continuously and exponentially evolving and there is a sudden change in technology. This surge of changes, defined as digital disruption, is the impact of the combination of digital technologies and new operating models, as well as the key concepts for adapting learning methods. Therefore, the design and development of online learning materials using digital technology as a tool is of great importance. As learners' learning behaviors today have changed, the design of content and learning activities should respond to learners' age and their learning behaviors. Learning should focus on providing learners with knowledge and skills in accordance with 21st-century situations. Additionally, the learning styles are different depending on age and individual interests. Technology literacy enables learners to quickly search for information according to

[1] Chonlachai Sreechiang, Ph. D. (Educational Administration) Faculty of Education, Nakhon Pathom Rajabhat University, Nakhon Pathom 73000. Corresponding author, Tel. 0 9525 18854 e-mail: armzonic@gmail.com

their interests both in learning and working. Moreover, learners in the 21st century should be bold to express opinions, think out of the box, and courage to make decisions with technology supporting creativity. Technologies that administrators must apply in educational institution administration include:

1. Cloud computing is a technology of online cloud servers. Schools do not need to set up their own server systems on the school site. This technology saves the schools' budget for data storage and software applications and investment in hardware and system administrators because these costs are included in the responsibilities of cloud hosting providers. Examples of cloud hosting providers are Amazon Web services (AWS), Microsoft Azure, IBM/Soft Layer, and Google Computer Engine. The cost of cloud services depends on the applications or software used and the required storage capacity and connectivity.

2. Mobility devices include portable equipment that can be used anywhere, e.g., mobile phones, smartphones, tablet PCs, and other computing devices with free access for mobile use. These devices have applications that allow users--teachers, school personnel, or even students--to access various knowledge resources inside and outside schools. According to mobile phone usage statistics, only 0.20% of the world population used mobile phones in 1990, but in 2015 the number increased to 50%. In the past, mobile phones were only used as a telephone, but now it is multipurpose.

3. In the digital age, social media have a strong influence on the attitudes, behaviors, and beliefs of people in society. The influential social media included Line, Facebook, Twitter, WeChat, and Instagram. Therefore, school administrators must be able to use social media effectively and suit the nature of school management. For example, the administrators may use the Line Group for informal communication of news, information, knowledge, and understanding, but not for formal direction or management. Nowadays, social media can also be used to support school management, on the other hand, it can destroy the school work atmosphere in case of inappropriate use.

4. Now and in the near future, by the year 2020, everyday devices will be connected via the Internet with the Internet of Things (IoT) technology, e.g., office equipment, home appliances, smartphones, tablet PCs, and smartwatches. IoT can be used to create teaching innovation, organize the structure and administration into a smart office, or plan the work-at-home concept in the future.

For school management in this digital age, If teachers know how to use digital technology, it will increase school efficiency. For example, in teaching and learning, teachers may not use PowerPoint or other presentation programs alone, but use the Internet to connect knowledge from the outside world to the classroom. Students will enjoy learning more and teachers can play the role of learning facilitators well. Furthermore, students can learn through inquiry learning or cooperative learning inside or outside the classroom with fun. Teachers can also create a digital classroom environment. However, technology cannot replace teachers but teachers who do not use technology must be replaced by teachers who have technology literacy.

Based on the above-mentioned, the authors agree that the introduction of digital technologies in educational management is very necessary due to the changing conditions of the digital world. Everyday objects are directly or indirectly related to digital technology. Educational management and design of content and learning activities must respond to the needs of both learners and social expectations. The application of digital technology in educational management also increases schools' capacity and develops schools with the potential to cope with changes in the digital society.

Smart classroom

Nowadays, digital technology is evolving in many different aspects and it can be well applied to teaching management. Organization of environments and facilities to foster learners' learning is, therefore, much better than

it was in the past. With basic equipment, such as computers or smartphones and the Internet, a classroom that is a simple square room can become like a large library. In the past, if a teacher wants to teach students how to make snacks, s/he need to find someone to teach students or has to learn how to make snacks himself/herself and transfer the knowledge to students. At present, the teacher just googles the ingredients and preparation methods, then searches YouTube to find a chef to teach students. Cooking class can easily happen. This is what happens in the time when knowledge content is uploaded online and accessible to everyone. The importance of a new role for teachers is to analyze and manage big data for learners to screen and teach them how reliable the data are. Technology will assist teachers as learning designers, adjust the difficulty of activities, and analyze the learning proficiency and deficiency of individual learners. Additionally, technology help records and process the data and send the result to the teacher. Innovation has been used to enhance teaching. EEF (2020) by Mingsiritham & Koraneekij (2019: 234) discussed five components of smart classroom: 1) teacher, 2) learner, 3) digital tools and supporting technologies, 4) learning activities, and 5) evaluation.

Element 1: The instructor is an important part of making learning with this open smart classroom application successful. The instructor conveys knowledge and experience to learners by presenting learners a problem or question to think, analyze, and search for information from open educational resources provided by the instructor, including other external sources. After that learners can take the information into consideration and choose the answer from reliable sources. The instructor must understand his/her role well and act as a facilitator of learning for learners. Moreover, the instructors should be a mentor who gives advice, motivates learners' thoughts, and provides appropriate learning and research resources.

Element 2: Learners of the 21st century are learners who learn through technology medium by themselves and in groups. They can learn from various learning resources, not limited in the classroom. Moreover, learners are free to set their own time, place, and method of learning. In addition, they must have skills in knowledge retrieval, problem-solving, using digital tools and information technology to facilitate learning, and selecting appropriate technology to present their individual or group work. The researcher has studied the needs of university students to create an application for an open smart classroom using open educational resources which are not much available. According to the need analysis, the respondents had the highest need in the learning aspect.

Element 3: Digital tools and supporting technologies focus on the use of tools and technologies in response to learners with emphasis on quick access to information and flexible usage on different technological devices.

Element 4: Learning activities focus on an activity or lesson with questions or problems that encourage critical thinking skills and learning methods. Learners can access the learning resources through the teacher's instruction and researching the knowledge themselves or their peers' suggestions.

Element 5: Evaluation is an essential part of ensuring the quality of education management and activity organization. This is to determine the value of education management performance. Evaluation can be done before, during, and after learning. In the research, there is an evaluation from the assessment of information skills, media and technology for learners, behavior observation, work evaluation, and satisfaction assessment with the application for the open smart classroom. The assessment forms are derived from analyzing and synthesizing relevant documents and research, including quality validation by experts. Then, the results are used to improve and revise the assessment form for the experiment.

S: Showing, the ability to present information in teaching through technology media, 2. M: Manageable, the ability to manage teaching system, media, equipment, resources, and environment in smart classrooms, 3. A: Accessible, the ability to access information sources of learning through the use of media, tools, and equipment in smart classrooms, 4. R: Real-time interactive, the ability to interact while creating an instructional experience, including learning through interactive media, tools, and technology devices in smart classrooms, 5. T: Testing, the

ability to test or validate qualitatively for teaching activities and monitoring of learning behaviors in using smart classrooms.

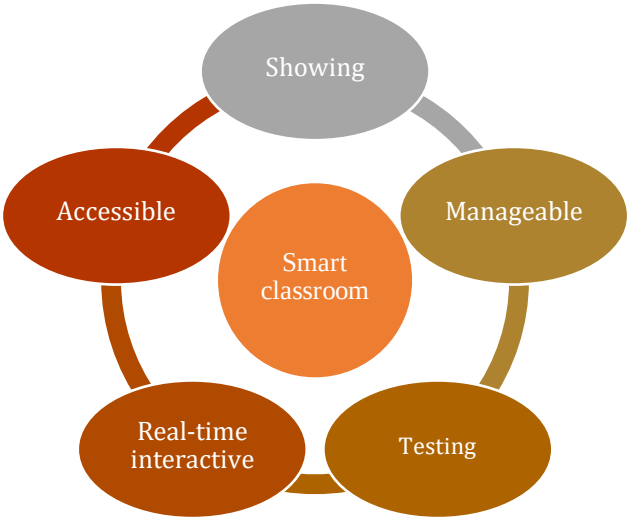

Figure 1 Elements of Smart Classrooms

The authors are of the view that smart classrooms refer to a classroom where technologies are involved in all teaching processes. The main purpose is to empower both instructors and learners through the enhancement and development of a more effective teaching experience, with the support of various forms of digital technology. As a result, instructors and learners can interact at any time in and out of the classroom, creating a classroom with a learning environment anywhere, at any time.

Immersive Learning

The advances in digital technology in media and entertainment are rapidly evolving. This technology can be applied in various educational areas. For example, AR technology enables learners to acquire knowledge and experiences from virtual images that are replicated to overlap with the real world. Moreover, VR technology enables learners to acquire knowledge and experiences as they actually participate in that event or place, or create virtual worlds that enhance their learning potential and encourage creativity.

CSL (2022) said that rapid change comes from new technologies triggering change, so today's world of learning and education is no longer confined to the classroom. There are many IT technologies that facilitate education, for both teachers and learners. One of the technologies that is likely to become the new educational norm in the future is virtual world technologies, consisting of 2 technologies:

1. Augmented Reality (AR) technology is a technology that uses communication devices, e.g., mobile phones, and smartphones, to integrate the virtual world, which shows images, audio, and videos on the devices, into the real world environment as if it is bringing the virtual world out into the real world.

Smithirittha (2022) said that Augmented Reality or AR is a virtual reality-based technology that is highly popular today. This can be seen in the launch of Pokemon GO, a smartphone-based game of Nintendo with AR. This game gained popularity and generated huge revenue over time. In an era where technology and innovation are the precursors to businesses and consumer activities. In the digital age with a smartphone or tablet to connect to the Internet as the fifth factor, commerce has to adopt a proactive online strategy for social media channels by developing attractive multimedia. Pokemon GO is the turning point that makes AR technology closer to consumers. AR is widely applied in various areas, including art, medicine, education, and commerce. According to the operating principles, the device displays information in the form of images or audio suitable for users' environments through hardware devices and software. In order to use AR technology, a total of 4 factors are required: 1. The AR Code is

like a maker in order to determine the position of the object, 2. The Eye is the position of the camera or other sensors used to view the AR Code and process it, 3. The AR Engine is the processor from the AR Code reading, and 4. The Display is a monitor that allows us to see the information that AR Engine has processed as a picture or a three-dimensional video. Smartphones that we currently used combine AR Engine and Display together (scan and immediately display). The most widely used AR technology today is divided into 2 types: 1. The Geospatial AR system is an AR technology that integrates with the GPS (GPS-based AR) system, for example, the popular Yelp Application used by tourists to find attractions and famous stores, or even the hottest game application, Pokémon GO, where the player walks around and captures Pokémon from a real location. This game combines AR with the mapping system in a smart way. 2. 2D AR system is a two-dimensional media AR technology often used in commercials or education. This type of AR technology is highly-popular because of the less complexity of the system and easier to use. 2D AR system turns two-dimensional objects into three-dimensional objects with an AR code through a web camera. Scanning by a smartphone's camera, the system processes the code and visualizes three-dimensional objects. Examples of 2D AR system implementation are children's storybooks that incorporate 2D AR system to fulfill storylines and imagination.

In education, AR has taken on an increasingly important role according to the development of innovation and digital technologies in education and has played a role in learning and development. According to IPST (2020), the use of AR in education has increased the learners' interest in learning, and the instructor does not have to explain much. Exams were conducted before and after using AR in education. There was a significant improvement in scores after using AR. NIA (2019) said that AR technology is a technology that combines the virtual world with the real world by processing images through a camera and then displaying them on a screen as 3D images that float over the real surface. This technology is useful in many ways, such as in business. It is applied by using smartphones to create interesting product presentations or create a replica of the product wearing so that customers can choose products easier and more fun. In education, AR is used to transform complex knowledge that is difficult to understand into concrete models and make it easier for learners to understand. Learners can see from a massive storm to tiny DNA structures.

DAQRI Anatomy 4D Application

Google's AR Expeditions were born from the inspiration of bringing the imagination into the virtual world. The AR capabilities make it easier for learners to understand knowledge. For example, the human body structure is hard to understand. The DAQRI Anatomy 4D Application with a body structure poster helps learners visualize clearly by scanning the poster with a cell phone's camera. The application creates a three-dimensional human body model with complete information about each body part. A similar application such as DAQRI Elements 4D uses the same principles to create the three-dimensional periodic table in a more precise and understandable model.

Quiver Application

AR technology is useful in the academic aspect and can also be used to enhance creativity. As in the Quiver application, which is an application for young children, there are many images that can be downloaded for children to color. The colored images become three-dimensional animations. The images in the application cover science to social subjects or even cartoon characters that children love. Besides, this application improves children's imagination and promotes muscle development and collaboration between hands and eyes.

HP Reveal Application

AR technology is not only beneficial for learners. For instructors who want to design their own teaching, the HP Reveal application is ready to create the desired classroom. Users can use this application to design AR with photos, animations, or videos of their own or of others who share information through this application. Instructors can use the designed AR, while learners learn and experience how AR works. In conclusion, the application of AR in the classroom significantly improves learning and opens the door to a new world. Although

there are some limitations to implementing this technology, in the future, the education sector will adopt AR to a full degree. As a result classroom learning will catch up with the ever-changing world and the utmost benefit will fall on learners.

2. Virtual reality (VR) technology is the technology that brings users into the virtual world. This technology creates a new virtual environment both vision and audio. The virtual environment may look similar to or different from the real-world environment. Using VR technology, users wear a VR headset to connect themselves to the virtual world created by the computer system. Learners have new and different perspectives. This is in line with Funchian (2020) who said that virtual reality (VR) is a 360-degree virtual world. AR creates vision and reaction to virtual objects of the real world, while VR technology takes users into the virtual reality world through VR glasses. This technology gives a sense of reality where the user allows to be part of virtual reality and react as much as possible in the virtual world according to the set boundaries. At present, the industry involved in VR technology is expanding and growing dramatically due to investments and support from around the world. In the near future, VR devices will be cheaper and more accessible to people at all levels. VR technology can help learners go into the virtual world of learning without leaving the classroom. They can experience what they read or see in the book and fool the body into a new place. Additionally, VR technology allows learners to visit various cultural attractions around the world, including unseen lands, such as the Egyptian City and dinosaur land.

The authors opined that the application of AR and VR technologies in education management considerably increases teaching effectiveness. For example, using AR technology by bringing 2D and 3D virtual images to overlap with real-world images or environments makes it easier for learners to visualize or imagine things in real-world settings. VR technology can also use making instructional materials more interesting, allow learners to have a virtual experience in some places without traveling, or create a virtual world that has an environment fostering learning in various ways related to the lesson or the learner's interest. This will efficiently enhance imagination, resulting in immersive learning.

Conclusion

In today's social environment, digital technologies play a role in every part of human life, directly or indirectly. Learner development to cope with changes in the digital age is essential. Therefore, the application of digital technologies to support the educational management process, both in administrative systems, academic work, or document work will make the school more efficient, convenient, and faster in its management. Additionally, digital technology can be used for classroom management. The inclusion of digital technologies in all teaching processes will empower both instructors and learners by creating and developing more effective teaching experiences. Teachers and learners can interact with each other through various supporting digital technologies, inside and outside the classroom. Consequently, a classroom with anywhere-anytime learning is created. Moreover, AR and VR technology contribute to immersive learning based on reinforcing experiences to learners through simulated environments or scenarios. As a result, learners can learn and develop new skills and techniques more from a reality that is unable or difficult to achieve. The learner is not just a spectator, but will also be part of a learning situation or outcome with the safe and limitless practice that will significantly enhance imagination.

Vocational Education and the Production and Development of Workforce in the Future

Chumphol Khamthien[1]

Abstract

This academic paper aims to present the essence of vocational education and future workforce production and development. Since the world is transitioning to dependence on capital-technology industries, drawing on the potential of the best technologies of the modern era to apply in industrial systems which creates new innovations in the production system is essential. Moreover, having skilled workers with advanced industrial skills in line with the development of technology is also required because labor is an important mechanism to drive the industrial system. Both new and existing workers should be cultivated. At this point, strategy formulation for the development of national education is vital, especially institutions and vocational schools that produce and develop manpower to keep up with the future changes of the world and in line with the changes in the economy, society, and digital technology and the needs of the industrial sector. This article presents the dimensions of change in the future, the vocational education change, industry 4.0 and new skills of vocational education, quality driving in vocational education, and creating national-building vocation.

Keywords: national-building vocation, industry 4.0, workforce production and development

Introduction

Moving into the technological age in the industry or Industry 4.0 increase work efficiency, rapidity, and flexibility, as well as productivity of manufacturing systems. This creates a production revolution to drive the economy and embrace the growth of the industry. Changes in technology in the industry affect human living and working. The labor force must be prepared with the knowledge, attitude, and skills necessary for incurring changes so that they can work with robots and artificial intelligence. The preparation for labor with technology to replace must be in accordance with technology development so that they can develop skills and compete with the labor market abroad. Preparing people who are about to start a new job and giving priority to people who are already working through the practice of necessary labor skills is not only necessary for industrial and labor sectors but public and private sectors, establishments, and education must have good knowledge, attitude, and skills to be ready for changes. Particularly, vocational institutions that produce and develop manpower to enter the labor market must focus on the production of qualified workforce who are ready to work with the technology of change.

Future Dimensions of Changes

Education and human resource development from the pre- to post-industrial and digital technology era today, especially in vocational education. Vocational education institutions that produce and develop manpower must adapt and focus heavily on the design of vocational management that creates a new generation of people into opportunities and challenges with the changing dimension in the future. As a result, the manpower or workforce has the skills and ability to work with robots and artificial intelligence.

[1] Chumphol Khamthien, Educational Administration Program, Nakhon Pathom Rajabhat University, Tel 084-5718448, E-mail: chumpol141971@gmail.com)

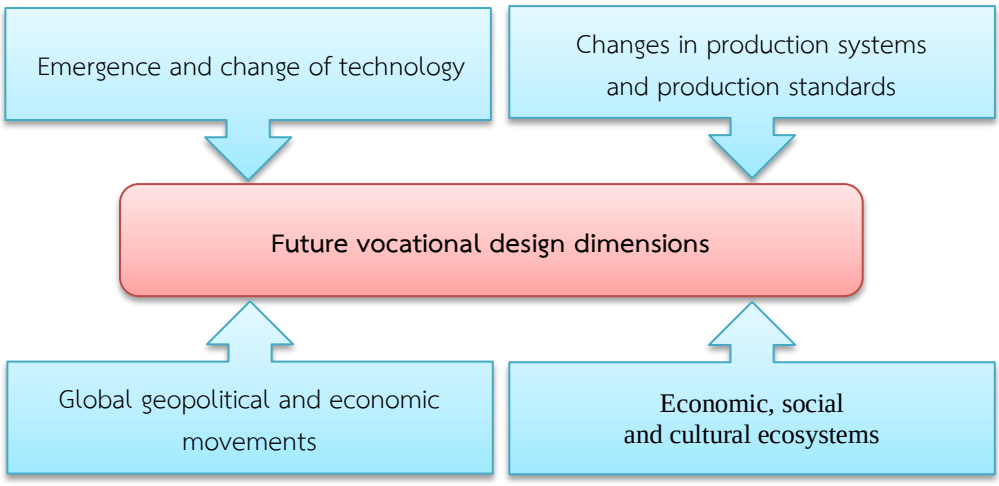

Figure 1 Design Dimensions of Future Vocational Education

1. Emergence and change of technology The emergence and rapid transformation of technology, from robotics, automation, artificial intelligence, communication, IT, information systems, Big Data, the development of the Internet of Things, etc. The movement of technology is a catalyst for changes in global society, from individual life to culture, economy, entry into the future of people, livelihoods, societies, and relationships to new business models, as well as energetic management of new foundations of thought.

2. Changes in production systems and production standards The shift of the industry and new production systems has aimed to reduce the cost of production processes with automation systems that rely on mechanical robots and intelligent management with limited human work, called knowledge-based production mechanisms. There are standards that regulate the whole system. The creation of economy - investment and development of the country's personnel must respond to the need for people development and achieve the goals of industry, manufacturing, and modern service.

3. Global geopolitical and economic movements The essence of the two sectors interacts significantly with each other. This helps to guide the direction to the "offensive or defensive" of countries with limited political and economic power, such as Thailand in order to create wealth and survive with the most minor loss according to the dynamics of the economic, trade, and financial wars.

4. Economic, social and cultural ecosystems The changing economic, social, and cultural ecosystems result in the transition of self-management of humans and society and the world environment to the digital world. The traditional transitions from agricultural society culture to commercial society, industrial society, and post-industrial society have changed the thinking and livelihoods. The culture of the digital age is in a new and borderless economic ecosystem. People can access knowledge "when needed" and enter the world through the virtual world. Additionally, Big Data databases make work and life easier.

The world changes and so does vocational education.

Vocational education is a study aimed at developing people with skills that meet the needs of labor markets. Therefore, it shall keep pace with economic and global trends to prevent the curriculum from falling behind. UNEVOC identifies the challenges for labor markets that may continue for decades as follows:

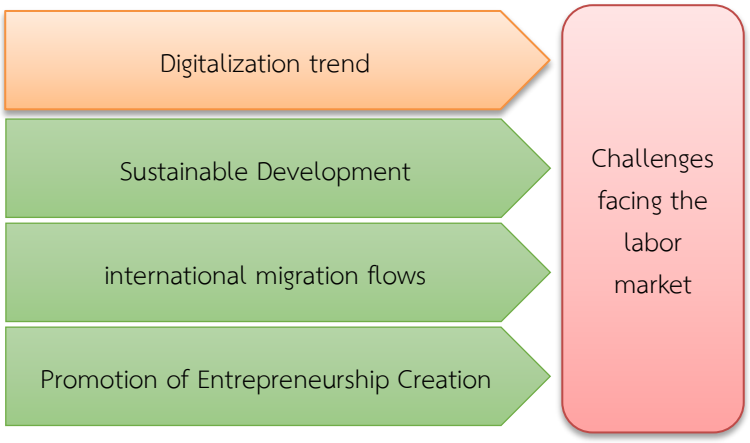

Figure 2 Challenges faced by the labor market

1. Digitalization The world of work in the future will progress rapidly and be increasingly intelligent until we are unable to keep up. It affects people directly in terms of becoming part of work or completely changing the nature of the current work. Manual work and routine work are going to be extinct soon. But what cannot be predicted is where technology will stop developing. If digitalization is still a problem that "disrupts" the labor market, then modern workers must also be aware of the development of innovation.

2. Sustainable development The new feature the business sector is looking for from workers is environmental awareness. Businesses in the future will be operated by considering using the least natural resources for the worthiest production and jointly maintaining the environment through corporate culture and other lifestyles. This attribute causes by instilling the right attitude and knowledge in the education system.

3. International migration+ In a globalized world that allows students to study abroad and migrate internationally independently, technical and vocational education in many countries is a system that accommodates many international students. It prepares vocational students to enter the country's labor market with quality. As a result, future vocational education must consider the plan to admit international students to study together with domestic students and teachers.

4. Promoting entrepreneurship Technical and vocational education learning at the global level offered courses to promote entrepreneurship for the advancement of individuals and economic society. The entrepreneurial concept study gives workers a broader view of market trends and consumer needs, a flexible problem-solving perspective, and situational adaptation. These are good survival skills in the rapidly-changing labor market.

Industry 4.0 with New Skills of Vocational Education

Human resource development plays an important part in the success of the economy. If workers' skills are not in line with the needs of the industry, it may prevent the economy from achieving its potential. The 4th Industrial Revolution impacted people's jobs and professional skills. Therefore, it is necessary for everyone to understand the application of digital technology and have digital literacy. At this point, human resource development is an important issue. International Labor Organization (ILO) analyzed the impact of Industry 4.0 and revealed that workers working in electronics and electricity are at high risk of being replaced by automation. Low-

skilled or unskilled jobs may be affected. Computers will be used to replace routine jobs. The skills needed in the 21st century, in connection to Industry 4.0, were workers must have the ability to learn to use technology expertly and learn to work with various data formats, including understanding and considering the environmental and social impacts of different technological and innovative options. The creation of educational, training, and learning alliances are required to develop technical and vocational training courses.

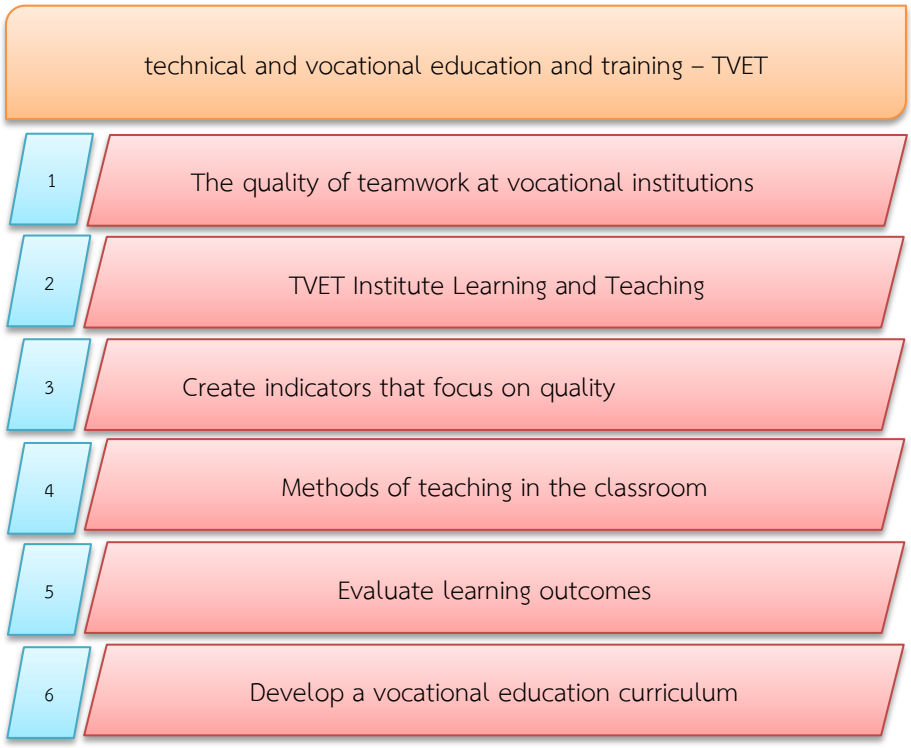

Figure 3 Development of Technical and Vocational Training Curriculum (TVEC)

The TVET Center provides effective instruction by focusing on the following implementation:

1. Promote quality culture and team working at vocational institutions.
2. Transform the learning and teaching paradigm of TVET.
3. Create quality-oriented indicators and set standards for quality improvement.
4. Promote classroom teaching for self-learning ability.
5. Evaluate learning outcomes using assessment tools in the classroom.
6. Cooperate with the industrial sector to improve and develop a vocational education curriculum.

Driving the Quality of Vocational Education

The Office of the Vocational Education Commission is the main organization in the production and development of manpower. It is necessary to plan and develop manpower to meet the needs of the establishment s and have the ability to deal with changing technologies by emphasizing learners with critical skills and foreign language communication. In addition, the focus must be on the development of vocational teachers to have practical knowledge, ability, and specific expertise, including using digital platforms for learning. As a result, teachers can provide quality education management under the Human Capital Excellence Center (HCEC), and the production and development of vocational manpower meet the needs of the entrepreneurial sector.

Figure 4 Human Capital Excellence Center: HCEC

1. Standard Every vocational school should provide education according to vocational standards.

2. Expert Vocational institutions should have educational contexts conducive to vocational education management in specialized fields, focusing on dual system management.

3. Excellence Center Vocational institutions should have educational contexts and spatial contexts that facilitate vocational education management in the fields that meet the country's target S-Curve industrial development with a focus on an intensive vocational dual system.

4. Human Capital Excellence Center: HCEC Vocational institutions should be educational institutions that has a spatial context to enhance excellence and expertise, especially specialized colleges according to the value chain of occupations in industries in line with the country's target S-Curve industrial development. The vocational institution should be ready to upgrade to a specialized college and cooperates with domestic or foreign establishments intensively in the management of dual vocational education for at least 80% of the total number of learners. The establishments should participate in curriculum development, learning management, teacher development, learner development, and quality supervision at all stages of vocational education management.

Creating "National-Building Vocation"

Amidst a world that is transitioning to dependence on capital and technology-intensive industries, high-skilled workers are essential. The strategy for national education development focuses not only on general education but also gives considerable importance to vocational education. Vocational education is widely accepted in countries like Germany, South Korea, and Singapore with globally recognized quality. These countries are moving forward with the national industrial economy strategy, therefore the development of the vocational education

system always goes hand in hand. Because the global economy never stops, people development strategy through vocational education needs to be reformed and adapted in accordance with global industrial-economy trends.

The reform of vocational education instruction at each time mainly aims to produce labor to meet the labor demand trend at that particular time. To produce human resources to answer real situations, learners shall be allowed to learn through practical experience as much as possible. Vocational education in Germany implements a dual system of teaching where theoretical classes at school are organized along with internships in paid industrial establishments. Weight is placed more on the internship, in which students take experience from practice to share in the classroom. The dual system is considered very successful since it can produce students with skills that meet the company's needs and are ready to work as soon as graduation. Many students often work with internship companies. If not, they are qualified to work for other companies. Likewise, South Korea took Germany's model to pilot a new vocational school, called Meister Vocational High School (MHS) Program, which emphasizes learning from real practice as well as studying at school. MHS also emphasizes project-based learning (PBL) to reinforce important soft skills, including planning, team working, problem-solving, and creativity. In addition, MHS adopts the 'Employment First, University Later' concept. It supports students to start working in the industry immediately after graduation so that they have solid work experiences before furthering their higher education. Additionally, educational institutions in Singapore place great emphasis on providing hands-on learning. For example, the Institute of Technical Education (ITE), the main vocational education institution in Singapore, places more weight on learning through practice than theoretical learning in a proportion of 70:30. Furthermore, there are work-study programs to intensify the skills, knowledge, and experience of students. The success of vocational education in Germany, South Korea, and Singapore is largely due to the openness of the private sector to engage with education and the emphasis on learning from working with industrial establishments.

The participation model of the private sector is not only about setting curriculum direction and accepting students for internships, but also about funding and teaching resource support, technical support, and counseling. This allows educational institutions to have more funds and resources to implement and improve the quality of education. At the same time, the participation of private institutions also motivates young people to attend vocational institutions, whether by providing scholarships for students or guaranteeing student work contracts after graduation by quota. Another sector that plays an important role in the advancement of vocational education is the government sector. Since the government recognizes the importance of vocational education as a priority, it has developed a policy that continually promotes the development of vocational education institutions, especially by supporting funding and resources, as well as facilities and infrastructure development. The government also plays a critical role in motivating more people to attend vocational education. In South Korea, the government has policies to waive tuition fees for students in the MHS program, provide scholarships for vocational students, and postponed enlistment for up to 4 years if students are employed immediately after graduation.

In a rapidly changing world, workers need to continuously improve their skills and learn new things, even after graduation. Encouraging human resources from the vocational education system to 'learn for life' is an important agenda and is another key to the success of people development. In Germany, the Continuing Vocational Education Training (CVET) Program has been established for workers who have graduated from vocational education and have some work experience. Their jobs may be disrupted by changes in economic structure or they have individual demands to upgrade their skills. CVET adopts a dual system, whereby workers can work and study at the same time. A study timetable is subject to agreement between learners, employers, and educational institutions. The government also continuously provides incentives for workers to enter the CVET program through tuition support and special contributions for the unemployed and low-skilled workers. While in Singapore, there is the Skills Future Singapore (SSG) Program, in which the government has collaborated with educational institutions and companies to create more than 10,000 short courses in various professional fields for workers who want to develop their skills. This program is not limited to workers who graduated from the vocational education system.

The Singapore government also motivates Singaporeans to take Skills Future courses by granting initial credit money to all citizens at the age of 25 and periodically replenishing the credit to support tuition fees. Particularly, after the COVID-19 crisis, the Singapore government offers more tuition support packages, especially for courses related to skills development in the post-Covid, such as digital skills and artificial intelligence. Moreover, new courses are added to increase more choices of studies. South Korea is another country that focuses on the skill development of graduates. Government agencies at national and local levels together with the Chambers of Commerce Council and vocational institutions have established a number of skills training centers offering a variety of courses. Online learning platforms, e.g., K-MOOC (Korean Massive Open Online Course), are developed. Like in Germany and Singapore, the South Korean government motivates people to enroll in these upskill courses through tuition support. Furthermore, the South Korean government also aims to expand vocational education curriculums to accommodate the transition of the workforce into the 4.0 era.

Upgrading Thai vocational education to be the core of the country's development requires mobilization in many aspects from many sectors, i.e., education sector itself, the government's vision, policy, and support, as well as private sector support. Another important factor is that the public sector must have a positive attitude toward vocational education; otherwise, vocational education development is impossible. The success of vocational education in Germany, South Korea, and Singapore may guide all sectors of Thailand to cooperate in driving vocational education seriously and continuously. If Thai vocational education can be pushed to be the gear of the country's economy and the key to national development, it will make the phrase ‘national-building vocation' more realistic. This is an indicator for the success of vocational education in Thailand.

Conclusion

The world’s situation is changing in terms of science, information advancement, economy, society, and politics. There are likely to be many disruptions from various factors, such as economic stagnation caused by the impact of the COVID-19 pandemic, and the overall forecast of the technology deployment in jobs and skills in the next five years. This all affects the education management that produces human resources with the skills and readiness to cope with the changes. The Office of the Vocational Education Commission is the main organization in the production and development of manpower which is the main force in the country’s development. Therefore, it is necessary to plan and develop manpower to meet the needs of business establishments and have the ability to cope with rapid changes in technology. The information that the Office of the Vocational Education Commission used to support manpower production management in the future consists of future change dimensions, world changes – vocational education changes, Industry 4.0 and new skills of vocational education, and the drive for vocational education quality and vocational education national-building. If Thai vocational education can produce and develop manpower to be the gear to mobilize the national economy and the key to national development, it will be an indicator for the success of vocational education management in Thailand.

Academic Administration of Secondary Schools toward Excellence

Sugunya Suksomboon[1]

Abstract

The purpose of this academic paper is to present the essence of academic management in secondary schools to excellence under the Office of the Basic Education Commission. The study emphasizes the practice that leads to knowledge construction by combining critical thinking with experience. This article presents the essence related to academic administration in secondary schools to excellence including theoretical concepts about school administration, secondary school administration, and academic administration.

Keywords: administration, secondary school, toward excellence

Introduction

Basic education is the first step in efforts to reduce human inequality, lack of opportunity to attend schools, and unemployment. Countries around the world, therefore, turn to focus on basic education as a basis for the country's development to eliminate inequalities by ensuring equality and opportunities for having basic education. Regarding the education administration under Section 39 of the National Education Act B.E. 2542 and its amendment (No. 2 B.E. 2545 and No. 3 B.E. 2553), the educational administration and management shall be decentralized into academic management, budget management, personnel management, and general management. The educational administration shall also construct creative development of the school's educational quality process continuously. Additionally, this quality must be assessed by the Office for National Education Standards and Quality Assessment (Public Organization) (ONESQA) at least once every five years. According to the requirements, all educational institutions are aware of and accelerate quality improvement in order to pass the assessment and be certified by quality standards and external quality assurance from the ONESQA. As a result, Thai education has continuously made efforts to promote educational institutions toward excellence.

Educational institutions, therefore, play an important role in quality development at the educational institution level. Academic administration is an important mechanism for developing, promoting, and driving the quality of life. Moreover, academic administration is the key to school administration which is the direct role of administrators in driving education. Therefore, administrators should focus on effective academic administration with an emphasis on developing the quality of learners. The results must directly impact the development of learners' potential, aim to develop the quality of education management, and possess excellence and equality in providing equal and standardized educational services to achieve an “Excellent” level based on “learners are the priority” concept. In this paper is to present the essence of the academic administration of secondary schools toward excellence.

Theoretical concepts of school administration

School administration is critical in the educational management system. This is due to the fact that school administration is a matter of school administrators’ performances and the operation of persons involved. The aim

[1] Sugunya Suksomboon, Educational Administration Program, Nakhon Pathom Rajabhat University, Nakhon Pathom 73000 (Tel 081-1989339) E-mail: Sugunyaso393@gmail.com

of school administration is the success of teaching and learning arrangement. The definitions of school administration are defined in the following section.

Definitions of school administration

Scholars, both foreigners and Thais, have defined school administration differently as follows:

Frederick Taylor (1916: 8) states that school administration refers to operations with criteria to achieve better results in production. The principles that make the educational institution administration most effective depend on 3 important things.

1) select the person with the highest ability (Selection);

2) train workers properly (Training); and

3) find incentives to encourage work (Motivation).

Good (1973, p. 211) states that school administration refers to the consideration, control, and management of school work or affairs, including both school business administration and operations involving all school personnel, and activities directly related to students, such as teaching and learning, guidance, and extra-curricular activities.

Hoy, Wayne & Cecil (1996:170) stated that school administration refers to the management of educational personnel, teachers, and students to ensure cooperation and collaboration in school operations under the set agreement and strict adherence to it.

From the concept and meaning of school administration mentioned above, it can be concluded that school administration refers to the collaboration of personnel, the use of art and science in administration in accordance with the set agreement, and strict adherence to the agreement for the utmost benefit and efficiency.

Significance of school administration

The importance of educational administration has been discussed as follows:

Teera Runcharoen (2002) mentioned that school administration is the primary mission of administrators who establish work patterns, methods, and procedures systematically. If the administrative system is ineffective, it will affect other parts of the school. Therefore, in order to achieve the goal, good school administrators must understand how to select an appropriate and efficient administrative method. Administrative tasks must integrate both art and sciences since school operation is not only administrators' actions but also subordinators' responsibilities as a part of success. Importantly, each subordinator differs in intelligence, abilities, aptitudes, and requirements. Consequently, it is the duty of administrators to implement appropriate administrative techniques, methods, and processes to achieve school effectiveness and goals.

Education Reform Office (2002: 29) has summarized 5 aspects of education reform as follows:

1) consistent education system reform, both formal, non-formal, and informal systems;

2) learning reform by emphasizing the core curriculum and local curriculum, content, teaching methods, learning resources, and learning processes in the community;

3) education administration and management reform in government organizations, local administrative organizations, and private sectors with an emphasis on decentralization;

4) teachers, faculty members, and educational personnel reform, as high-profession personnel who adhere to professional standards and ethics and continuous self-development; and

5) educational resources and investment reform to mobilize resources from different sources for education management, allocate resources to learners equally and fairly, and prepare a resource management model with flexibility, efficiency, and verifiability.

It can be concluded that administrators play a significant role in education management for youth and people in both public and private schools with quality in accordance with national education standards and related laws. The responsibility is to effectively achieve the target objectives with an emphasis on producing the youth to be good, smart, and live in society happily.

Secondary School Administration

Modern educational concepts place a strong emphasis on technology, with information and communication technology being integrated into all aspects of learning. It also creates a new environment for learning that significantly alters the roles of teachers and students.

Abbey (2021) stated that a secondary school is an educational institution providing secondary education in Thailand. It was affected, similar to other organizations which are operated under pressure and changes in economic, social, cultural, and intellectual aspects. Entering the knowledge-based economy has resulted in educational reform and school administration reform. Educational organizations have to adjust themselves. Institutional factors are modified to enable development to reach its full potential. As a result, it is necessary to develop school administrative strategies in the information and communication technology aspect in response to the rapid advancement of information technology. According to this, administrators of secondary schools must place importance on proactive administrative strategies in the information and communication technology aspect. These strategies accelerate educational organizations' operations into the digital world and create a strong stance on the goals of survival, growth, and competitiveness, leading to the sustainable survival of organizations.

Ministry of Education (2007) has set the scope of educational institutions management into 4 parts according to the Ministerial Regulations prescribing criteria and methods for decentralizing educational administration and management B.E. 2542 by virtue of the second paragraph of Section 5 and Section 39 of the Education Act B.E. 2542 (as amended by the National Education Act No. 2 B.E. 2545) as follows: 1) academic administration, 2) budget administration, 3) personnel Management, and 4) general administration.

Secondary schools in Thailand are educational institutions that provide education at the lower and/or upper secondary education under the Secondary Education Service Area Office, Office of the Basic Education Commission, Ministry of Education.

Information technology management of educational institutions at present is the application of knowledge and ability in the management of communication technology systems and computer technology in educational management and school administration. Technological advancement can connect people, enable development in many dimensions, and allow news, information, and knowledge to spread quickly. The digital age is a shift in which technology is used in school administration. To keep up with the rapidly changing era and the global economy, all educational institutions have been continuously driven to transform into digital organizations by introducing communication and computer technology in school administration. The aim is to achieve the school's mission and vision, increase work capacity, and manage changes efficiently to gain the most benefit (Luengsrichai, 2019: 31).

Scope of Educational Institution Management

According to the Ministerial Regulations prescribing criteria and methods for decentralizing educational administration and management B.E. 2550, by virtue of Section 5 and Section 39 paragraph two of the National Education Act B.E. 2542 (as amended by the National Education Act No. 2, B.E. 2545), the Minister of Education requires the Ministry of Education to decentralize the educational administration and management into four parts: academic administration, budget administration, personnel administration, and general administration. "The Permanent Secretary for Ministry of Education or the Secretary-General of the Basic Education Commission shall consider decentralizing education administration and management in academic, budget, personnel, and general administration to the Educational Service Area Committee, The Office of Educational Service Area, or educational institutions under the supervision as the case may be."

Academic administration is the main task or center of school administration. Academic administration refers to the management of all activities related to teaching and learning, including environments that affect teaching and learning. Academic works that consistently create dynamic operation affect the efficiency, effectiveness, and quality of education, achieving curriculum objectives and students' utmost benefit.

Academic Administration

Academic administration is the top priority of educational institutions and schools. It is due to academic administration involves all types of activities in educational institutions, relating to quality improvement and a measure of success of teaching and learning management. School administrators use their knowledge, ability, and experience to carry out school administration to ensure that students achieve academic success and qualify as socially expected. In order to administer academic work effectively, administrators must know the scope of academic work clearly. Educational organizations determined the scope of academic affairs with 17 duties as follows:

1.1 Development or operation relating to opinions on local curriculum development;

1.2 Academic planning;

1.3 Teaching and learning management in educational institutions;

1.4 Educational curriculum development;

1.5 Development of learning processes;

1.6 Assessment, evaluation, and transfer of learning results;

1.7 Research to improve the quality of education in educational institutions;

1.8 Development and promotion of learning resources;

1.9 Educational supervision;

1.10 Guidance;

1.11 Development of internal quality assurance systems and educational standards;

1.12 Promoting academic strength in the community;

1.13 Cooperation in academic development with other educational institutes and organizations;

1.14 Promotion and support of academic works for individuals, families, organizations, agencies, establishments, and other educational institutions;

1.15 Establishment of regulations and guidelines for academic work of educational institutions;

1.16 Selection of books and textbooks for use in educational institutions; and

1.17 Development and use of educational technology media

Based on the above-mentioned concepts of secondary school administration in academic administration, it can be concluded that the administration related to educational quality development consists of the development of the school curriculum; development of the learning process; measurement, evaluation; and transfer of academic results; research for improving the quality of education, developing innovative media and educational technology; development of learning resources; educational supervision; educational guidance; quality assurance development; and promotion of academic knowledge to the community. Educational institution administrators shall have academic knowledge to manage and develop strength in academic work in educational institutions to meet the needs, interests, and potential of learners, parents, communities, and localities.

School-Based Management: SBM

Secondary school administration and education reform are critical factors in country's development toward sustainability. For achievement, many parties must collaborate in development. The determination of educational institutions to be a juristic person under the Organization of Administration of Ministry of Education Act B.E. 2546 is the highly important education reform. This is consistent with the intent of the National Education Act B.E. 2545 and its amendments (No. 2 B.E. 2545), which aimed to raise national education to meet standards

and provide comprehensive and quality education. This is accomplished by requiring the Ministry, in section 39, to decentralize education administration and management, including academic administration, budget administration, personnel administration, and general administration, to the Offices of Educational Service Areas and educational institutions directly. The decentralization makes educational institutions more flexible and independent in administration under school-based management (SBM). This establishes the foundation and strength for educational institutions in managing education with quality, standards, and continuous development. Based on the aforementioned concept, the state allows educational institutions to be juristic persons according to Section 35 of the Ministry of Education Administration Act B.E. 2546, provided that educational institutions providing basic education under Section 34(2), particularly schools, shall be juristic persons. The status of a juristic person is terminated upon the dissolution of the educational institution under paragraph one.

According to the Ministry of Education (2003, pages 6-7), the educational institution that is juristic persons in accordance with the intent of the law, shall have not only authorities, duties, and responsibilities to follow, but also shall implement budget, personnel, and general administration effectively under SBM and good governance principles based on the rule of law, morality, participation, responsibility, transparency, and value. These principles are tools for taking vision and policies to SBM, and the Organization of Administration of Ministry of Education Act B.E. 2546. The goal is for school administrators and others involved to study and apply the school administrative strategies as a guideline for future school administration.

The concept of SBM is an educational reform that focuses on returning control of education management to schools or educational institutions. Because education occurs in schools, administrators should have executive power, management power, decision-making power, and freedom to organize education with the community in all matters related to successful education management based on the learner-centered concept. It can be seen that education is important in preparing Thai people to live in society appropriately. This also gives them work potential as a driving force in the country's development and future growth. As a result, administrators must serve as educational leaders who are knowledgeable, have good management principles, and work with the community to promote, support, and facilitate quality education management in accordance with world situations. It is also believed that education is the most important factor in developing people’s physical, mental, emotional, and social well-being.

According to the concept of school-based management mentioned above, the primary educational organizations apply decentralization of administration and education management to create flexibility in administration in response to the needs of schools and communities, resulting in higher effectiveness and sustainable development of schools.

Conclusion

Schools are social institutions whose duty is to provide education to develop students to meet the quality specified by the curriculum. The primary aim is to produce learners who have knowledge, morality, and ability to live happily in society, as well as work to drive economic, political, and governance systems to prosperity. Schools need to change their way of thinking and operating models for effectiveness or excellence in creating and developing quality learners who are able to live happily in society with self-reliance. This is the expectation of society toward the school. As a result, schools must have an administrative process that ensures high-quality learners according to educational standards. Learners shall be developed in all aspects based on their abilities and in line with the needs of the community. Moreover, the school shall be accepted and be a role model of "quality" to other schools with the main goal of developing learners’ potential for excellence. The ideas and practices of learners’ development are directly influenced by the changing needs of students, parents, and society. Thai society

should be aware of the transformation of the digital age. Children should be developed and encouraged to learn skills and knowledge that support their growth and society's development. The future changes to keep up with the digital age are big challenges. To handle this issue, teachers, students, stakeholders, organizations, and communities should be aware of the changes and collaborate in an extraordinary digital way. New approaches for promoting democracy in the classroom, readiness to accept new things, work collaboration, openness, sharing, interdependence, and honesty are the issues that should be focused. Educational institutions must share curriculums so that all children have an equal knowledge base which is a fundamental principle to developing 21st-century education.

As a result, academic administration in secondary schools must adapt the administrative method to reflect the current situation. School administrators, teachers, and educational personnel must have knowledge, understanding, and eagerness to learn to develop schools systematically by building a school administrative model to excellence. Moreover, there should be a consideration of school contexts and responses to ever-changing demands. Efficient academic administration shall focus on student quality development through the development of quality education management to excellence, qualified standards, and equality education. Additionally, education management shall aim to achieve "Excellence", and such excellence must be based on "Learners are the priority".

Structural Equation Model of Casual Factors of Effectiveness of Enrichment Program of Science, Mathematics, Technology and Environment (SMTE) in the Northeast Region

Dechathon Bongboot[1]
Sikarn Peantanyakorn[2]
Sawat Phothiwat[3]

Abstract

The purposes of this research were 1) to study characteristics of causal the factors Structural Equation Model (SEM) influencing the effectiveness of science, mathematics, technology, and environment (SMTE) in the northeast region, 2) to examine the causal factors of SEM the selected developed model affecting the effectiveness of SMTE in the northeast with the empirical data, and 3) to obtain guidelines for developing the selected factors that affected the effectiveness of science, mathematics, technology, and environment special classroom project in the northeast. The subject of this study consisted of 561 related persons. The research methodology was conducted in 3 phases: 1) constructing the hypothesis model, 2) examination of conformance with empirical data, and 3) finding ways to develop causal factors. The tools used for collection were a questionnaire and an interview form. Statistics used for data analysis were percentage, mean, standard deviation, Pearson's coefficient, and the analysis of structural equation modeling. The results of the research were as follows: 1) The structural equation model that was created consisted of causal variables, namely school management and participation of parents and student's physical environment in teaching and learning science and mathematics; 2) the causal factors of structural equation model of the project effectiveness; 3) this research presents guidelines for the development of causal factors that directly, indirectly, and overall affect the project effectiveness as follows: school management, the participation of parents and students, physical environment and science and mathematics teaching and learning management.

Keywords: Structural Equation Model, Project effectiveness, Science special classroom, SMTE, Northeast

Introduction

The Constitution of the Kingdom of Thailand, B.E. 2017, Section 54, Chapter 5, Duties of the State, paragraph two, stipulates that the state must proceed to ensure that people receive education according to their needs in different systems. Including promoting lifelong learning and providing for cooperation between states' local government organizations and the private sectors in managing education at all levels. The state has a duty to operate, supervise, promote and support such education management to meet international quality standards. (Secretariat of the House of Representatives, 2018) The Thai government has carried out the duty of the state in the Constitution of the Kingdom of Thailand B.E. 2017 to solve the problem of differences in educational quality between schools: Problems of the inferiority of opportunity and equality in education, the problem of centralization of power, decentralization of power to schools and irresponsible management for students, focus on quantity over quality and produce manpower to meet the needs of the labor market and national development. (Dumcha-Om & Suksodkiew, 2019) As well as, preparing the 12th Education Development Plan of the Ministry of Education (2017-2021) strategy number 3, which is about manpower production and development

[1] Bungkan School, Mueng Bueng Kan, Beung Kan 38000, Thailand E-mail: Dechathon.Bo63@snru.ac.th

[3] Educational Administration, Faculty of Education, Sakon Nakhon Rajabhat University 47000, Thailand

strategy. Including research that corresponds to the needs of the country's development and has a body of knowledge in technology and innovation to support the country's sustainable development which response to the development in terms of quality and in terms of responding to changing contexts in line with the 12th National Economic and Social Development Plan (2021) that aims to develop students' knowledge and morality and to have a good quality of life happy in the society**.** (Office of the Permanent Secretary, Ministry of Education, 2016) By providing education for children with special abilities which is a youth group of hopes to develop the country is comparable to other countries in the world**.**

The Ministry of Education has prepared a draft strategy for developing talents 2017-2020 encourage such groups of students to develop their talents to their full potential. The Ministry of Education has a concept of organizing, seeking, producing, developing personnel, creating and transferring knowledge. The provision of education for people with talent consists of 6 key strategies: 1) Development of mechanisms and administrative systems, 2) Development of education systems 3) Production and development of personne, 4) Creation and transfer of knowledge, 5) The development of children and youth with high-level talents; Organize education and activities to children and youth with special abilities correctly, appropriately, systematically, comprehensively, creating equality, thoroughness and fairness to children and youth to this group to spread throughout the country. (Bureau of Basic Education Policy and Planning, 2016)

Education management for gifted people is considered an important part of learning reform according to the National Education Act B.E. 1999 and all amendments, section 10, paragraph four states that "Education for people with special abilities must be organized in an appropriate format by taking into account the talents of that person must be organized in an appropriate format taking into account the abilities of the person under Section 22 stipulates that educational management is based on the principle that learners can learn and develop themselves, and considered the learners to be the most important. The educational management process must encourage learners to develop naturally to their full potential together with the concept of developing the quality of learners to have learning skills for continuing education and life skills in the 21st century. In Section 24 on the organization of the learning process, content and activities must be arranged in accordance with the interests and aptitudes of the learners taking into account individual differences practice skills in the thinking process, management, coping with situations application of knowledge by allowing students to learn from real experiences. (Office of the National Education Commission, 2010)

As for education management for students with special abilities in science and mathematics in the special science, mathematics, technology and environment classrooms. There is one important principle. Educational management to develop human resources to become researchers, inventors, and innovators in science, mathematics and technology with high international potential. At present, Thailand is still very lacking. In the past, the management of mathematics education Science and technology in Thailand, both at the basic and tertiary education levels, emphasizes graduates having the ability to use science and technology for their living and occupations efficiently and knowingly, by dividing the students into group. 1, it is a study for life so that, all Thai people can apply the basic knowledge of mathematics science and technology as well as thinking processes and scientific processes used in life, and can choose and use various products at full efficiency economically and safely. Group 2 is occupational education. For people who need skills and knowledge math ability science and technology directly applied in the profession which requires more specialized skills and abilities than group 1, able to work effectively economically and safely Examples of such professions include doctors, nurses, engineers and science teachers, industrialists, technologists, etc. In the past, science, mathematics and technology education in Thailand was not enough for students to be researchers, and inventors. There is an initiative to create a new body of knowledge in mathematics, science and technology. This is because the budget allocation to support talents are still limited to some groups of students. As a result, it affects the creation of wisdom for the nation in many respects. The education management for those with talents in science and mathematics must be carried out in

conjunction with the creation of guidelines for special classroom management in science, mathematics, technology and the environment. This is another way to help teaching and learning management effectively. (Chewpreecha, 2012)

Therefore, the management of special classrooms is considered one of the important concepts for learning management for special education students. A collaboration with the Institute for the Promotion of Teaching Science and Technology Mahidol Wittayanusorn School Ministry of Science and Technology higher education institutions, departments and organizations set guidelines for requesting special classes in Science, Mathematics, Technology and the Environment to develop the potential of high school students. The Bureau of Academic Affairs and Educational Standards under the OBEC is the operator of the project to support 220 schools, recruiting students who have graduated from junior high school with special abilities in mathematics and science to attend. High school level according to a special learning curriculum that is different from the general classroom, and they are also in charge of selecting equipment, places and teachers to encourage students to experience and develop the potential of special classroom students to be successful. (Chewpreecha, 2012) The management of special classroom projects in science, mathematics, technology and the environment of the region has been divided into regions and each region jointly develops its students. This is to make it easier to manage. According to this approach, Special Science Classroom Project, the upper and lower northeastern networks, a total of 60 schools, each of which has set a way to determine activities. Mathayomsuksa level 4-6, for students to have the potential to think, solve problems, support and increase their knowledge and experience in solving problems with quality scientific processes, (Chumphon Phon Phisai School, 2019) as well as, management of Special Classroom Projects in Science, Mathematics, Technology and Environment. In the past, there have been studies that reported that there are total of 13 elements in the science classroom project administration, namely 1) Student recruitment and selection, 2) Student governance, 3) Classroom media usage, 4) Determination of measurement and evaluation methods, 5) Student development activities, 6) Teacher personality development, 7) Teacher specific competency development, 8) Classroom atmosphere creation, 9) Physical environment arrangement, 10) Special classroom teacher selection, 11) Learning support network creation, 12) Student participation, 13) curriculum-based learning management. (Dumcha-Om & Suksodkiew, 2019)

In determining what factors make the management of a special classroom project in science, mathematics, technology and environment less successful, there are many factors. Some of which may have an indirect effect and some that directly and indirectly affect the success or effectiveness. The researcher was therefore interested in studying causal factors affecting the effectiveness of special classroom project management in science, mathematics, technology and environment in the Northeast. Because it is a study from theory to modeling that shows the structure of relationships between variables in which the structural equation model (SEM) is a causal relationship investigation. The theoretically constructed models derived from empirical data and testing the model's consistency is a statistical technique used to test and estimate causal relationships in modeling equations. Action structure that is available for both verification and survey purposes or it can be said that the creation models are intended to confirm or test theories or leads to the development of theory, that is also suitable for research in the knowledge society era. Enhance and expanding new knowledge leads to best practice**.** (Sanrattana, 2013) So, there is an idea to test the theory and confirm the structure of the theory by analyzing the structural equation model that can be applied to real empirical data. The LISREL program was used to analyze the structural equation model because it is a program that has outstanding points which 1) displays the analysis results in both text and diagrams, making it easy to verify the accuracy, 2) there are many model consistency check indexes as if there were many experts. You can confirm and verify that the developed model is consistent with the empirical data or not, 3) be able to analyze complex data more realistically. (Suksawang, 2014) To create and verify the

validity of the causal factor structural equation model on the effectiveness of the special science, mathematics, technology and environment classrooms project and find ways to develop the effectiveness of special classroom projects in science, mathematics, technology and environment. Make this research lead to further excellent practice.

Research Objective

1. To study characteristics of causal the factors Structural Equation Model (SEM) influencing the effectiveness of science, mathematics, technology, and environment (SMTE) in the northeast region

2. To examine the causal factors of SEM the selected developed model affecting the effectiveness of SMTE in the northeast with the empirical data

3. To obtain guidelines for developing the selected factors that affected the effectiveness of science, mathematics, technology, and environment special classroom project in the northeast.

Research Methodology

This research used a causal-comparative research methodology to create a causal relationship model of factors affecting the effectiveness of a special science classroom project of mathematics technology and the environment in the Northeast in accordance with the theoretical knowledge and empirical research results and in accordance with the preliminary agreement (assumptions) to create a structural equation model that is a research model or a hypothesis model. The result will be a hypothesis model that consists of a measurement model and a structural equation model conducted according to statistical research methods. In order to answer the research question of whether the structured equation model was the supporting theory and research consistent with the empirical data the data were analyzed using the LISREL program. The result was a causal relationship model of factors affecting the effectiveness of science classroom project management of mathematics technology and environment in the Northeast, as shown in Figure 1.

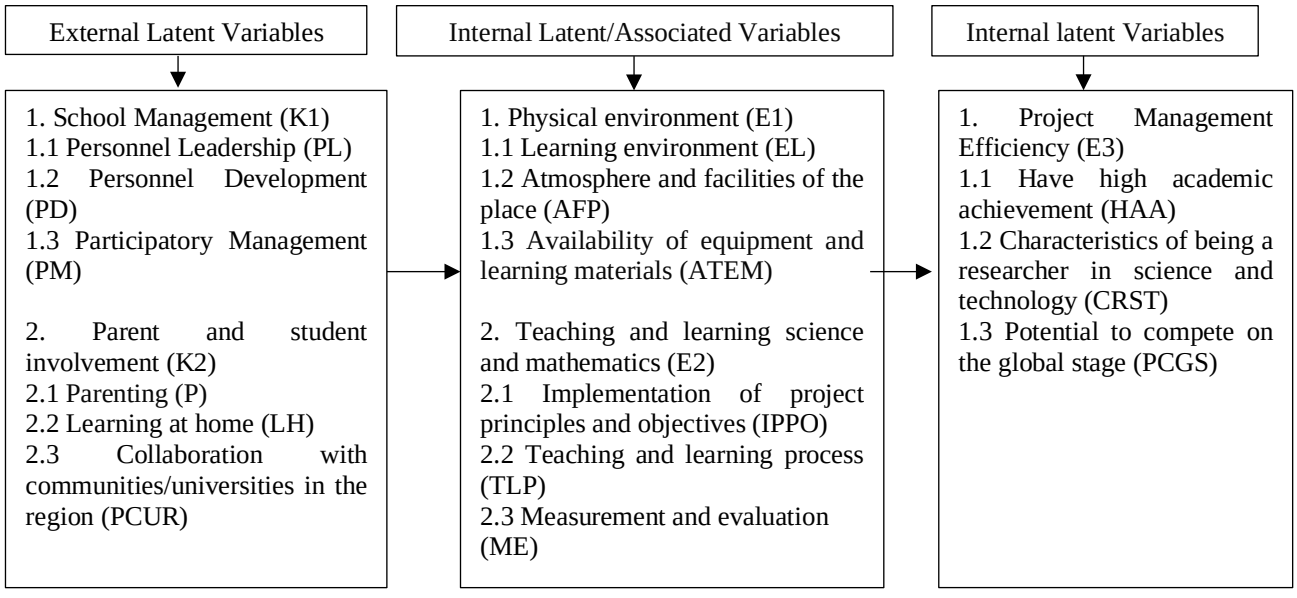

Figure 1 Research Conceptual Framework Elements

From the above information, the researcher divided the research method into 3 phases: Phase 1 modeling the hypothesis; phase 2 Checking the consistency with empirical data (rating scale); phase 3 Finding ways to develop factors that influence classroom project effectiveness, especially in science, mathematics, technology and environment in the Northeast. The details are as follows.

Research population and sample

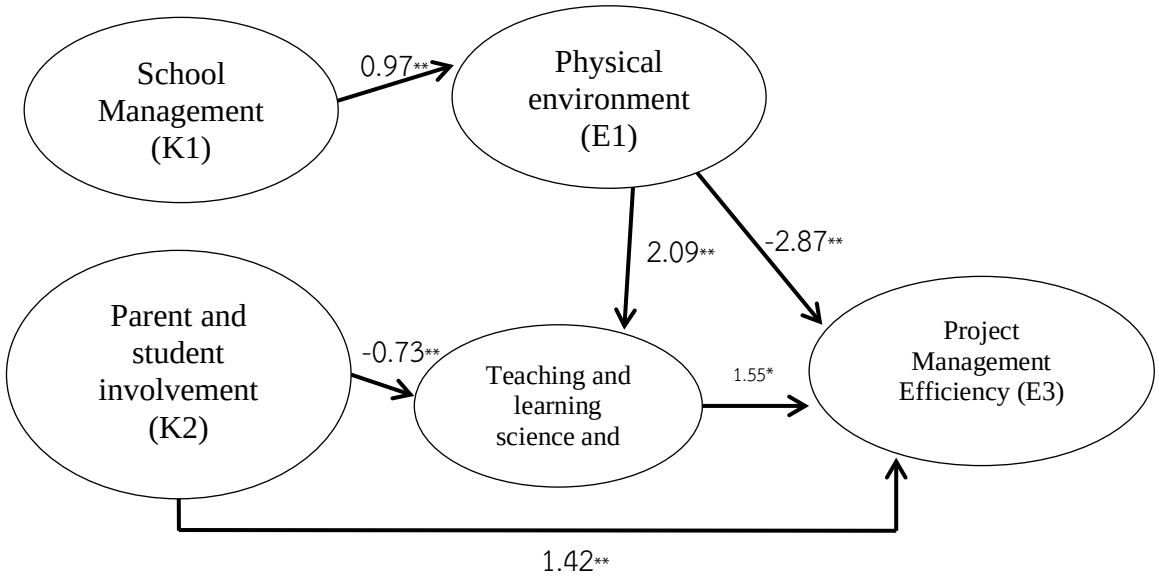
The researcher sets up the scope of population and informants based on the procedural research steps as follows:

1. Population in this study was those involved in the Special Science Classroom Project, mathematics technology and the environment in the Northeast for the academic year 2020 of 960 people, consisting of 60 school directors and 180 deputy directors, 240 science teachers, 240 mathematics teachers, computer teachers and 240 people from 60 schools.

2. The sample group in this research was those involved in the Special Science Classroom Project, Mathematics technology and the environment in the Northeast Academic Year 2020, a total of 561 students from 51 schools, using the criteria for determining the sample size. Specify the sample size as a function of the number of parameters to be estimated, i.e. there must be approximately 20 sample sizes per parameter. (Wiratchai, 2005) Therefore, the researcher used the 0.7 ratios to determine the total number of schools as a randomized unit.

Choosing a random sample of schools using proportional stratified random sampling: using the size of the school as a strata and assigning informants in each school. There was 11 people per school, including 1 school director and 1 deputy director, teachers in the content: 3 science teachers, 3 mathematics teachers, and 3 computer teachers, totaling being 561 samples.

Research and operational steps



The research tools, Certified by Sakon Nakhon Rajabhat University Ethical Committee COA No. 121/2022 and IEC NO. HE 65-086 were composed of Five steps. Step 1: The questionnaire was constructed on a 5-level rating scale, by creating questions from the definition of variables, divided into 6 parts. Step 2: The researcher conducted a content validity check by examining the consistency between the questionnaire text and the operational definitions (rating scale) from 5 experts. Step 3: The researcher examined the confidence of the tool. (Reliability) by using the questionnaire to experiment (Try Out) with the data users who have the same characteristics as the actual samples, namely 9 schools in the Science, Mathematics, Technology and Environment Special Classroom Program in the Northeast, totaling 9 schools, 6 each. There is 1 school director, 1 deputy director, 2 science teachers, 1 mathematics teacher, and 1 computer teacher, totaling 54 people. Step 4: The reliability of the questionnaire was analyzed using the alpha coefficient formula according to Cronbach's method (1970, p. 161). The confidence of the whole questionnaire was .970 and the side confidence was between .219. - .789. Then selecting questions with discriminating power of 0.23 or higher to be used to collect real data. (Pinyoanuntapon, 2002). And Steps 5: The researcher analyzed the data from the questionnaire. The researcher analyzed the mean ($\overline{X}$), standard deviation (SD), skewness and individual kurtosis of the data using a packaged program by setting the criteria for the mean ($\overline{X}$) which considered the research data by using advanced statistics, namely Confirmatory Factor Analysis **(**CFA**)**, Structural equation modeling (SEM) analysis and linear model analysis using Chi-square statistics.

Conclusion

1. Causal factor structural equation model of project effectiveness generated contains the following causal variables: there are 2 endogenous latent variables: 1) School management variables, consisting of 3 observed variables, namely, personnel leadership; personnel development and participative management; 2) the parent and student participation variable consisted of 3 variables that were observed, namely Parenting, learning at home and cooperation with communities/universities in the region. There were 3 internal latent variables, consisting of 1) Physical environment variables consist of 3 observable variables: Learning environment, Atmosphere and facilities of the place and the Availability of equipment and teaching materials, 2) the science and mathematics teaching

and learning management variable consisted of 3 variables that were observed: application of principles and objectives of the project; teaching and learning process and measurement and evaluation. As well as 3) Project effectiveness, consisting of 3 variable observed was high learning achievement, Characteristics of being a researcher in science and technology and the potential to compete on a global stage.

2. Causal factor structural equation model of project effectiveness generated are consistent with empirical data. The statistical value for measuring the harmony of the pattern is Chi-square; χ^2 = 44.66 at degrees of freedom (df) = 33, relative chi-square (χ^2/df) = 1.35, probability (p-value) = 0.0847, root mean square error estimate (RMSEA). was 0.02, GFI was 0.99, Adjusted AGFI was 0.97, Critical Sample Size (CN) was 669.12, Comparative Concordance Index (CFI) was 0.99, and Root Index was 0.02. The mean square of the residuals (RMR) was 0.01 and the forecasting coefficient (R2) of the latent variables was 0.55, indicating that the variables in the model could explain the variance of the project effectiveness 55% by School management (K1) indirectly affects Project effectiveness (E3) through 2 routes, i.e. route 1 via physical environment (E1) has an influence value of (0.97)x(-2.87) = (-2. 24) and the teaching and learning of science and mathematics (E2) directly affects Project effectiveness (E3) with an influence value equal to 1.55 as shown in the figure 5

Note ; ** means statistically significant at the 0.01 level (p<0.01),
* means statistically significant at the 0.05 level (p<0.05)

Figure 4 Causal Factor Relationship Model of Special Classroom Project Effectiveness in Science, Mathematics, Technology and Environment

As for confirmation of the causal factor correlation model of the project effectiveness, researcher conducted a Focus Group Discussion with 10 experts, all experts agreed on the causal relationship model of the project's effectiveness. Confirmation of direct influence values indirect and combined influences of causal factors of project effectiveness by using the model to confirm the linear structural relationship of the factors of project effectiveness. After adjusting the model, it was found that 10 experts agreed with the direct influence, Indirect influence and the combined influence of the causal factors of the project effectiveness.

Discussion

Causal Factor Relationship Model of Special Classroom Project Effectiveness in Science, Mathematics, Technology and Environment are consistent with empirical data. This is in accordance with the hypothesis, namely,

the latent variable outside school management (K1) indirectly influences the project effectiveness (E3) through two routes. The physical environment variable (E1) and the second pathway through Science and Mathematics Instructional Management variable (E2) were latent external variables, and parent-student participation (K2) had both direct and cognitive influences. There was an indirect effect on the science and mathematics teaching and learning management variable (E2). Mathematics (E2) and indirectly on project effectiveness variables (E3).

Considering the total influence of the project effectiveness variables (E3) as a whole, it was found that latent variables within science and mathematics teaching and learning management (E2) had the highest total influence, followed by latent variables within the physical environment (E1) Latent variables outside school administration (K1) and latent variables outside parent and student participation (K2), respectively.

1. Science and mathematics teaching and learning management (E2) directly influenced the project effectiveness variables due to the factors of science and mathematics teaching and learning having a positive effect on students It is caused by those involved having learned and understood the principles and objectives of the science, mathematics, technology and environment teaching and learning management project. So well that they understand and can be used in various operations, such as creating educational institute curricula, teaching media, teaching methods, measurement and assessment, and the teachers have a relatively permanent knowledge of science and mathematics as a result of experience. With a continuous sequence of steps from beginning to end it helps them to achieve effective learning leading to the success of the student's goals in this project, including having high academic achievement. The student's expression behavior is indicative of being a researcher in science, such as being observant, inquisitive and curious cause-effect, initiative with effort and patience until making students have a good attitude towards science that makes them have the potential to compete on a global stage. Therefore, the teaching and learning of science and mathematics under Special classroom projects result is effective and consistent with the research report of Chaisawat (2015) said teaching management is an indicator of the success of special education management in Science, Mathematics and English (SME) classrooms. Teaching materials and learning resources, as well as the quality of students, which is in line with the research report of the National Research Council (1988, online) reported the results of improving science and mathematics education quality indicators at the basic education level, consisting of 4 components: 1) Science teaching and learning and mathematics, 2) student behavior, 3) technology quality, and 4) curriculum. teaching management related to student learning. As the research report of Thakham et al (2018) learning skills achievement motivation and learning behavior of students was a positive correlation with the success of teaching special science-mathematics classrooms in schools under the Office of the Basic Education Commission with statistical significance at the .01 level. Student characteristics were positively correlated with the success of opening special classrooms at the .05 level of significance.

2. The physical environment (E1) includes the learning environment. The atmosphere and facilities of the place and the availability of equipment and teaching materials had a direct influence on science and mathematics teaching and learning management variables and have direct and indirect influences on project effectiveness variables. Educational institutions have a learning environment, including classrooms, and laboratories, or the construction of a building or room for science, mathematics, and technology learning source within the school, a learning area such as a botanical garden, a butterfly dome, or a relaxation area under the shade of a building or tree. Which promotes learning of science and mathematics enjoyable and to have atmosphere and facilities conducive for students learning, such as lighting, sound, and well ventilated classrooms. In the classroom, there will be tables, chairs, blackboards, and information boards, science and math learning classroom illustration. In addition, there is the availability of equipment and instructional materials for conducting experiments, or teaching arrangement that is good and sufficient to meet the needs of the students and it will

result in better learning of science and mathematics for students. It will affect the effectiveness of the project, for example, students will have higher learning achievement, students will develop the characteristics of being researchers in science and technology, students will have the potential to compete on a global stage, and students will have higher academic achievement.

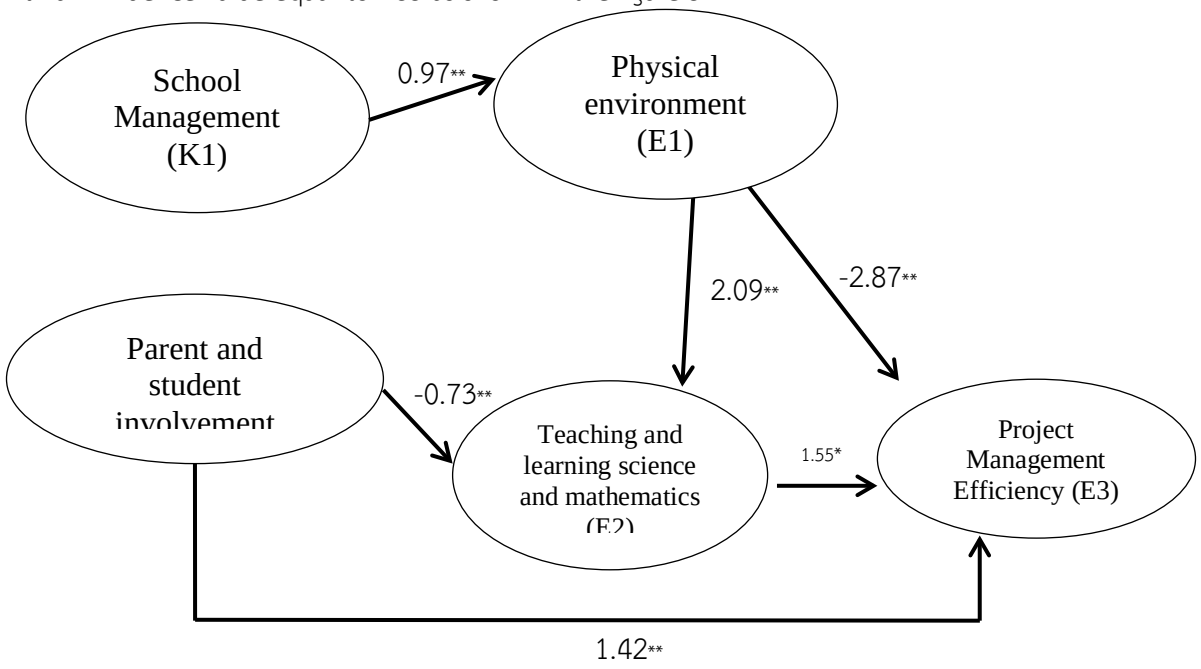
From the causes and effects of the above project effectiveness factors, it shows that organizing the physical environment is conducive to learning making teaching and learning such as science and mathematics more effective. The science and mathematics classrooms have the atmosphere, facilities and equipment for learning materials that are ready to be used in learning management. When these things are available for learning, it affects the success of the project which is in line with the concept of Paknara (2021), which states that the provision of an environment conducive to learning consists of 2 factors: 1) the physical external environment, and 2) the internal psychological environment. All of these affect learning by having a good physical environment that promotes good physical health and hygiene. The psychological environment affects the learning atmosphere. Having good mental health and having desirable characteristics according to curriculum expectations allow teachers to manage the learning process effectively and make the students happy and successful in learning.

3. Educational Institution Management (K1) consists of Personnel Leadership. Personnel development and participative management indirectly influence physical environment variables. Due to the management of educational institutions, there is an operating process in various activities of the educational institution, There aspects are Academic administration, Budget management, Personnel Management and General administration with administrators, teachers, professors and personnel from various departments of the local community participate in the educational management plan within the educational institution in a systematic manner according to the established standards to benefit the management of education correctly and efficiently. Consistent with the concept of (Boonmuang, n.d.) said that the management of educational institutions is the formulation of policies, planning, control, correction and improvement of various environments in educational institutions to be in good and hygienic condition: School administrators are the proner leader in setting directions and policies and leading educational institutions to implement physical environmental management, build buildings and facilities that facilitate student learning to be successful.

In addition, school management also had an indirect effect on science and mathematics teaching and learning management variables, consisting of applying the principles and objectives of the project in teaching learning process, measurement and evaluation and the project effectiveness variables, therefore, contain high academic achievement characteristics of being a researcher in science and technology and the potential to compete on a global stage due to the management of school administrators that aim to develop students to have knowledge and abilities and skills that can compete internationally and can live happily. Educational institution administrators, therefore, promote and support educational management in various forms in terms of budget, academics, personnel, and buildings in accordance with the activities of the four educational institutions, namely academic administration. budget management Personnel Management and general administration. In particular, academic administration is the main mission of school administrators and is an administrative process in various activities organized by educational institutions which directly and indirectly influence the students. This is to improve, promote and develop students standard quality in accordance with the intent of education as much as possible. (Pratoom, 2016)

Therefore, administrators can have good educational institute management, by the process of persuasion. for others to act in accordance with the intentions of work under various circumstances leading to the same destination and have personnel development as well as having participatory management together to plan and manage the physical environment and science and mathematics teaching and learning to achieve the same goal. It will make the management of the school affect the effectiveness of the project, for example, students

have higher learning achievement. Students develop the characteristics of being researchers in science and technology. That enables them to have the potential to compete on a global stage.



4. Parent-student involvement (K2) includes: learning at home and cooperation with communities/universities in the region have both direct and indirect influences on project effectiveness variables because parents and students participate in learning and developing educational institutions in many dimensions. It also gives students the opportunity to study according to their aptitudes and interests independently based on individual differences with specialized experts as consultants to take care of these learning and developing the potential to become a talent. As a result students have higher learning achievement. Students develop the characteristics of being researchers in science and technology and students have the potential to compete on a global stage. Consistent with the research report of Dumcha-Om & Suksodkiew (2019) Said that the factor affecting the administration of special classroom projects in science, mathematics, technology and environment is student participation. There were 3 outcome indicators that resulted in this variable: 1) allowing students to study according to their aptitude and interest independently based on individual differences with specialists as consultants to take care of. 2**)** The questions must be open-ended questions as much as possible and 3) the students participation in the selection of contents to organize learning-style activities in the classroom. The indirect influence was found through the science and mathematics instructional management variables because students are recipients of knowledge and experience from teachers who manage teaching and learning. Make the students who participate in teaching and learning activities from the grade level to the school level with school administrators As a result, teaching and learning are effective at various levels in which students are involved consistent with the research of Kongcharoen (n.d.) A study of parent's participation in the teaching and learning development of students at Plai Bang Wat Sunthonthammikaram Municipal School, Bang Kuay District, Nonthaburi Province found that overall, there was a high decline sorted from the average to the least student's behavior and academic, respectively, and indicated that parents' participation affected teaching and learning management since it is related to academics, including the preparation of local curricula of educational institutions by using local wisdom from parents, students, and communities. Pay attention to follow-up on learning outcomes, and setting up an environment that promotes learning. Measurement and evaluation according to actual conditions, with parents participating in the evaluation and improvements and repairs. Reports of improvements are made regularly and continuously in student behavior in a good direction, including support and encouragement, and by training students to be responsible.

Conclusions

1. Causal factor structural equation model of project effectiveness generated contains the following causal variables: There are 2 endogenous latent variables: 1) School management variables, consisting of 3 observed variables, namely, personnel leadership; personnel development and participative management 2) The parent and student participation variable consisted of 3 variables that were observed, namely Parenting, learning at home and cooperation with communities/universities in the region. There were 3 internal latent variables, consisting of 1) Physical environment variables consist of 3 observable variables: Learning environment, Atmosphere and facilities of the place and the Availability of equipment and teaching materials 2) The science and mathematics teaching and learning management variable consisted of 3 variables that were observed: Application of principles and objectives of the project; Teaching and learning process and measurement and evaluation. As well as 3) Project effectiveness, consisting of 3 The variable observed was high learning achievement, Characteristics of being a researcher in science and technology and the potential to compete on a global stage.

2. Causal factor structural equation model of project effectiveness generated are consistent with empirical data. The statistical value for measuring the harmony of the pattern is Chi-square; χ^2 = 44.66 at degrees

of freedom (df) = 33, relative chi-square (χ^2/df) = 1.35, probability (p-value) = 0.0847, root mean square error estimate (RMSEA). was 0.02, GFI was 0.99, Adjusted AGFI was 0.97, Critical Sample Size (CN) was 669.12, Comparative Concordance Index (CFI) was 0.99, and Root Index was 0.02. The mean square of the residuals (RMR) was 0.01 and the forecasting coefficient (R2) of the latent variables was 0.55, indicating that the variables in the model could explain the variance of the project effectiveness 55% by School management (K1) indirectly affects Project effectiveness (E3) through 2 routes, i.e. route 1 via physical environment (E1) has an influence value of (0.97)x(-2.87) = (-2. 24) and the teaching and learning of science and mathematics (E2) directly affects Project effectiveness (E3) with an influence value equal to 1.55 as shown in the figure 5

Note ; ** means statistically significant at the 0.01 level (p<0.01),
* means statistically significant at the 0.05 level (p<0.05)

Figure 4 Causal Factor Relationship Model of Special Classroom Project Effectiveness in Science, Mathematics, Technology and Environment

As for confirmation of the causal factor correlation model of the project effectiveness. By conducting a Focus Group Discussion with 10 experts, all experts agreed on the causal relationship model of the project's effectiveness. Confirmation of direct influence values indirect and combined influences of causal factors of project effectiveness by using the model to confirm the linear structural relationship of the factors of project effectiveness. After adjusting the model, it was found that 10 experts agreed with the direct influence. Indirect influence and the combined influence of the causal factors of the project effectiveness.

Recommendation

Guidelines for developing causal factors that directly and indirectly affect project effectiveness experts offer the following: teaching and learning science and mathematics is the heart of learning management according to the curriculum with practical guidelines for special classroom projects in science, mathematics, technology and environment, namely: 1) Continuous science process skills enhancement for students; 2) The class schedule was consistent with the time management guidelines and 3) The design of learning activities based on projects that were unconventional and different from normal classrooms.

Strategic Academic Administration for Quality Schools

Pimprapa Panpipat[1]

Abstract

Schools are important educational institutions for productive education. School administrators play an important role in bringing success to education and enhancing learning quality within the schools. The quality of schools makes students, parents, communities, and society feel confident in that schools. Therefore, schools that are qualified in academic administration, which is a core task of school management, can create a dimension of excellence in the modern education management system. It is essential for schools to have good strategic management which is the heart of school administration. As a result, school administrators must determine the most effective management strategy in order to develop the quality of schools and lead to excellence in the future.

Keywords: strategy, academic administration, quality school

Introduction

Strategic management is a key to success for school management. School administrators play a significant role in driving to school achievement. Therefore, administrators should focus on strategic management since it is the master of school administration that bring successful in their operations. Without formulating the strategies, the schools will not have clear guidelines for how to perform their work to suit the school environment and context. Regarding the changed of society in the present era including rapid technological progress, they are the important factors that affect the quality of education management.

The major purpose of providing quality education is to develop children and youth into excellent individuals with knowledge, skills, and vital competences in line with the management of Education in the 21st century. If the school can handle academic administration, this will result in quality schools.

The development to enhance the quality of the school is the important duty of the school to push and try for the school to move towards quality. and in accordance with the National Education Act B.E. 2542 and its amendment (No. 2 B.E. 2544 and No. 3 B.E. 2553). It is related to the framework for national development outlined in the 20-year National Strategy (2017-2036) and the 12th National Economic and Social Development Plan (2017-2021). It is a framework for the country's development in all systems to be consistent. And lead to the ultimate goal of making the country stable, prosperous, and sustainable.

Objective

To present perspectives, concepts, and directions for strategic academic administration aimed at improving school quality. To prepare students to be complete human beings in all aspects of their lives: physically, mentally, intellectually, morally, ethically, and culturally. capable of living happily with others.

Administration Strategies

The core of school administration is strategic management. In order to make educational institutions successful, school administrators play a crucial role. As a result, administrators should concentrate on strategic school management, including all administrative functions. Administrators are required to develop strategies since

[1] Ph. D. (Educational Administration) Faculty of Education, Nakhon Pathom Rajaphat University, Nakhon Pathom 73000. Corresponding author, e-mail: Phanphiphat2518@gmail.com Tel. 0 984 810558

they serve as the foundation for organizational management, operational master planning in advance so that everyone who is involved can move toward the desired outcomes. Executives must know how to plan strategies carefully and intelligently; analyze school resources and context; used them to formulate strategies that responds to the needs of the learners. The administrators also require to have the creative ideas to create a guideline for school personnel to be able to work more perfectly. Without setting administrative strategy in school, the school will not have a clear guideline on how to operate according to the environment and context of the school. Additionally, the changes in today's society including rapid technological advances and the current situation of the spread of the corona virus, they are important factors that affect the quality of education management. Any school that can provide the quality of education, able to instill and train children and youth to be good and knowledgeable people, have skills and competencies that are important in accordance with the goals of education management in the 21st century, make children and youths to be good citizens of society and contribute to the development of the nation in the future will have a positive effect on the development of the nation.

The Definition of Strategy

Parit Siribunpitak (2009) explained that strategy was first used in the military and business circles before the civilian, government and educational circles, which meant a proactive approach to achieving goals in which one strategy consisted of multiple proactive approaches.

Royal Institute (2013: 73) has given the meaning that strategy means A cunning battle, a method that requires various stratagems and cunning in battle.

Sumit Suwan (2018) said that “strategy” is a term derived from military personnel in war or battle in the past. They must find strategies or methods to defeat the enemy, such as ambushing, digging pitfalls to lay traps, cutting off food supply routes, sending spies, etc. The South Vietnamese soldiers have used the strategy said “if you come I will escape, if you stop I will start, if you are the loser I will attack”. Ultimately, the United States had to withdraw the troops from Vietnam.

Process and steps

Rewat Chatrivisit et al. (2010: 28) proposed the steps of the strategic management process as follows:

1. Strategic planning is an analysis of the external environment, including opportunities, threats and analyzing the internal environment of the organization (strengths and weaknesses).

2. Implementation of the strategic plan, including management of the organization development action plan. operation adjustment

3. Monitoring and Evaluation: monitoring, controlling and evaluating

Jintana Boonbongkan and Natthaphan Kecharanan (2006, cited in Sumit Suwan. 2018) have proposed a process and steps for strategic management. It has the following important components:

1. Environmental analysis
2. Determining the direction of the organization (set organization direction)
3. Strategy formulation
4. Strategy implementation
5. Strategy evaluation and control

Thongchai Santiwong (1997, cited in Sumit Suwan. 2018) also proposed a process and procedure for strategic management in 5 steps as follows:

1. Analysis of the external environment in terms of marketing government economic change, competitors, regulations, or laws

2. Using discretion to examine and assess opportunities, threats or risks caused by the external environment at the same time, it considers the internal environment as well—what the organization's strengths and weaknesses are.

3. Choosing a strategy and setting up a strategy that aims to best benefit.

4. Determination of policies for each aspect to be used as a direction for the preparation of various plans.

5. Strategy implementation.

Kirati Yodyingyong (2006, cited in Sumit Suwan, 2018) mentioned that strategic management or strategic planning is a complex process that executives have to make decisions on the following issues:

1. Clearly define the objectives of the organization.

2. Set goals and objectives of the organization. What are the efforts that the organization must strive to achieve? and how to measure that success

3. Analyze current strengths and weaknesses of the organization that What are some things that the organization finds good? and what doesn't work well

4. Analyze opportunities and threats from the external environment. that may happen to the organization in the future

5. Compare strengths and weaknesses with opportunities and threats. Considering that the current strengths and weaknesses of the organization Will it enable organizations to take advantage of future opportunities and convert threats from the external environment to their advantage? How?

6. What is the long-term strategic direction? to make decisions based on a long-term strategy So that organizations can reap the benefits of future opportunities and convert threats from the external environment to their advantage.

7. What internal components must be changed? in order to put the plan into action in order to make a strategic plan Can be executed with the most successful strategies.

8. Evaluate the strategic plan

Sumit Suwan (2018) has an opinion that When the organization has set a vision goals or objectives. The strategy acquisition process and steps consist of 4 main steps:

1. Environment analysis which is divided into 2 parts. The first part is an analysis of the environment within the organization, which are strengths and weaknesses. The second part is an analysis of the environment outside the organization, i.e. opportunities and obstacles.

2. Strategies to achieve the vision, goals, or objectives set.

3. Implementation of strategies that have been established.

4. Monitoring and reviewing strategies by organizing all personnel to participate to think in order to exchange knowledge and drive the organization to achieve a common vision, goals or objectives, analytical thinking of the future, external environment that affects the organization. Generally, it is considered in 4 areas: politics, economy, society and technology, which have many techniques or methods, namely (Certo Samual & PeterPaul, 1991 cited in Sumit Suwan, 2018).

1. Prediction based on intelligence and experience of executives

2. Trend analysis from various opinion documents of scholars

3. Interviewing experts or experts in that subject

4. The use of statistical methods

4.1 Trend extrapolation

4.2 Using EFR and EDER interview techniques

4.3 Using the delphi technique

4.4 Impact analysis (cross – impact analysis)

Academic administration to quality schools

Quality schools in the era of education management in the 21st century must be improved and developed to keep up with changes in social trends in the current situation. Which requires competition and struggle with the current situation surrounding the problem. so that the school can develop and maintain its own status to continue to exist When considering the overall picture, it focuses on the quality of the school. The end goal is the quality of the students. This is probably because the changes in the current social conditions change the school environment to disclose information to the public. To be adaptable and flexible for the progress of the school, the school must be aware of the environment social context area where students live resources available to the school Including the current situation at all times Development to improve the quality of schools in line with the goals, focus and policies of the education management of the Ministry of Education and the needs of that society Therefore, it is an important duty and obligation of the school to push and strive for the school to move towards quality. and in accordance with the National Education Act B.E. 2542 and it amendments (No. 2 B.E. 2544 and No. 3 B.E. 2553), section 4 "Education" means a learning process for the prosperity of individuals and society. by transferring knowledge, training, training, cultural continuation Creativity fosters academic progress. Knowledge creation arising from the environment, society, learning and supporting factors Persons learn continually throughout their lives, and Section 6. Education management must be in order to develop Thai people to be complete human beings in terms of body, mind, intellect, knowledge and morality, ethics and culture in life, able to live with others happily Especially in Section 22, it states that education management must be based on the principle that all learners have the ability to learn. and self-development considered the learners to be of the utmost importance. The educational management process must encourage learners to develop themselves naturally and to their full potential. Therefore, all schools across the country must have a duty to implement the policy of the National Education Act B.E. 2542 and its amendments (No. 2 B.E. 2544 and No. 3 B.E. 2553) announced in the Government Gazette, Volume 127/Part 45 Kor/Page 1/22 July 2010) and in line with the national development direction framework according to the 20-year national strategy (2017-2036) and the 12th National Economic and Social Development Plan (2017-2021) is a framework for implementation. so that the development of the country in all systems is consistent and lead to the goal of developing the country to be "stable, prosperous and sustainable". From the above, it can be seen that academic administration is important to quality because it is the work that directly develops the education of the learners and there must be a method. The process has a strategy to drive academic work. In all educational institutes, academic work is considered the key to improving the quality of education.

The essence of academic administration

Academic work is the main mission of educational institutions according to the National Education Act B.E. 2542 and it amendments (No. 2 B.E. 2544 and No. 3 B.E. 2553), section 39 that mentions the administrative power and management of academic education of the institution. study that must be managed Organize the learning process and set educational management goals to develop a complete human being, both physically and mentally, wisdom, knowledge, morality, ethics and live happily with others, as Hoy & Miskel (2007, cited in Sukanya Chamchoi, 2022) has proposed that academic work, especially teaching and learning management, is considered the core of school administration and is the heart of education management. School administrators, therefore, should give first priority to academic administration and consider the main goal of teaching management. As Preeyaporn Wonganutaroj (2010) said that academic work focuses on the development of intelligence, knowledge, abilities, morals, ethics, attitudes, and values for students to be smart, good, and happy persons, as well as being valued persons in society. Academic work is an indicator of school quality. The school quality relies on the school's

academic work by considering the methods and outputs of the academic work system, including teaching methods, academic administration, academic achievement, and desirable characteristics of learners. Moreover, academic work is an indicator of school administrators' success and competence. Because academic work is the main task in schools, school administrators must encourage and motivate teachers to cooperate in improving academic work constantly. Therefore, school administrators must know how to plan, communicate, coordinate, control, supervise, diagnose, instruct, and delegate work correctly and appropriately to achieve the objectives of the curriculum. This is in accordance with Sukanya Chamchoi (2022: 45 - 46) who concluded that academic administration is an important mission as defined in the National Education Act. Therefore, all types of schools need to focus on academic work in order to develop students' knowledge, quality, or desirable learning outcomes. To achieve academic administration objectives. school administrators and all relevant personnel must have knowledge, understanding, and skills in academic conduct and academic leadership in curriculum design, learning management, and learning assessment. They must also understand local contexts in order to be able to manage education to meet the needs of the community and keep pace with the changing world at present and in the future. In addition, good academic administration is an indicator of school quality and success and is a factor that leads to the allocation of workloads and resources of the school.

Principles of Academic Administration in Schools

Guidelines for education management in Thailand according to various measures under the National Education Act B.E. 2542 and its amendments (No. 2 B.E. 2545, and No. 3 B.E. 2553) can be summarized as the principles of academic administration as follows:

1. Decentralize academic administration in line with school contexts and school-based community
2. Organize learning based on the concept of lifelong education to develop learners in terms of knowledge, skills, and desirable attributes with the involvement of all sectors.
3. Develop a variety of curriculum, essence, and learning methods to suit the learner's potential and age range based on learner-centered concepts.
4. Encourage instructors to use teaching materials, learning resources, local wisdom, and research for developing effective learning arrangements.

Pariyaporn Tangkunanan (2020) said that academic administrators should adopt the P - O - L - C management principles as a guideline for academic administration to achieve desired goals as defined by the school. P = Planning - Planning requires an analysis of the school environment before determining the direction. Strategies must also be implemented with the preparation of an annual action plan. O = Organizing - Main structure organization of educational institution consists of 5 parts: 1) teachers, 2) school administrators in the educational service area, 3) school directors, 4) analysts and researchers, and 5) support departments. L - Leading - In leading the organization, academic administrators must have the leadership to lead the school in the right direction and must communicate with school personnel to mutually understand the practical guidelines and the school goals. Administrators must focus on the role of the group or team and must motivate school personnel to perform academic work in the same direction. C = Controlling - The administrators must set academic performance standards for academic work as planned so that they can control and follow up on academic operations. If the operation does not meet the set standards, academic administrators must find the cause and use the information to further improve and revise the academic administration. Priyaporn Tangkunanan (2020: 62 - 76) concluded the principle of P - O - L - C administration as in the figure below.

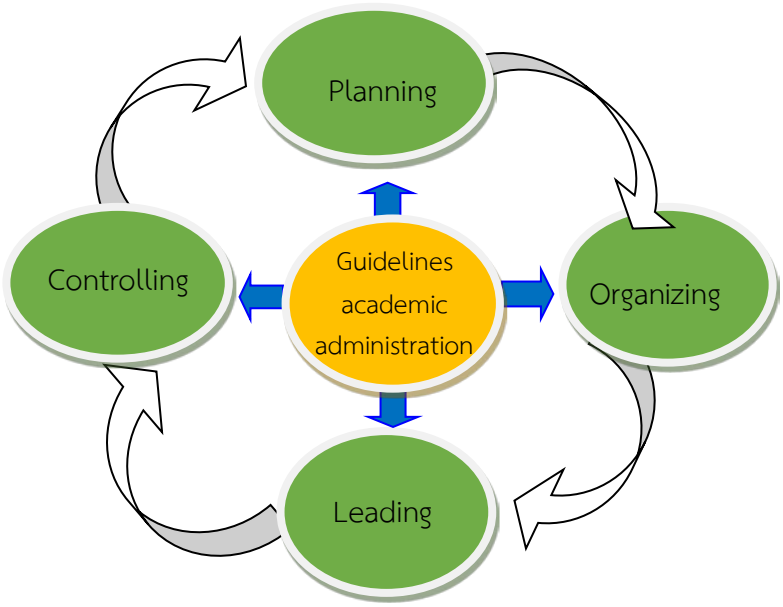

Figure 1 Academic Administration Approach

Quality Schools

Somsak Donprasit (1998: 11) said that quality schools demonstrate "Quality Dimensions" in the following areas:

1. The school has the education management performance according to the expected standards and in accordance with the curriculum objectives.

2. The school has special features which have been created in addition to normal education management, e.g., clean and shady area, modern teaching materials, and local curriculum.

3. Administrators and personnel are reliable in good management, leadership, and teaching profession.

4. The school can operate as announced or agreed with the learner or parent and conform with relevant rules, criteria, and regulations.

5. The school uses quality teaching materials, durable building and facilities which contribute to educational activities to the fullest potential, suitable for age, convenient, and safe

6. The school has service ability to provide activity services for students, parents, and community (Service Ability), e.g., recreation area, sports stadiums, and auditoriums; and listen to the opinions of all parties to improve and correct the operations.

7. The school provides an aesthetic atmosphere that is conducive to learning management of teaching, e.g., organizing a shady atmosphere and recreational activities.

8. The school has reputation/recognition as a quality school with quality perception by all sectors in terms of teaching and learning activities as expected.

The Ministry of Education (2022: Online) has established guidelines for the development of "quality schools" by assigning the Office of the Basic Education Commission (OECD) to drive various projects under the operation framework and 7 focuses as follows:

1. Student safety
2. Quality assurance system
3. Teacher development

4. Teaching and learning
5. Evaluation and measurement
6. Supervision, monitoring and following up
7. Big Data

Tiwat Sridamrong (2022: Online) summarized the characteristics of quality schools as follows:

1. Administrators have leadership, both specific and power aspect, based on their authorities to motivate school personnel to perform academic work and other tasks effectively with the fullest potential. As a result, the school is recognized as a quality school and results of the management process can be a model for other schools.

2. Student-oriented teaching is conducted according to two key principles: the differences of learners and application of knowledge in real life. The focus should be on full-time teaching and full course content, with the emphasis on remedial teaching. Students are assessed based on authentic conditions with the goal to develop learners to their full potential.

3. Family, parent, and school collaborate to develop learners and mobilize resources for education.

4. The school work performance is empirical with parents and the community acceptance. The school is a good choice for educational institutions according to the mission to provide education management to society.

5 The school is qualified according to educational standards in terms of quality of learners, quality of teaching, and quality of management. The school quality meets the needs of the community and the social expectations to have schools across the country equal in standards.

Hoy and Miskel (2001, cited in Songpol Charoenkam, 2019) claimed that factors promoting the school management to be a good quality school are quality teachers with experience and high academic qualifications, sufficient supporting personnel, libraries and a variety of research facilities, modern and comprehensive equipment, and sufficient building and construction. The educational institution must have a duty to manage and provide quality education management and teaching services, as well as be responsible for the management results and incurring quality of education. Therefore, the educational institution must have an educational management and management system with clear goals and action plans, including guidelines for promoting the quality of education and improving the quality of learners according to the operating factors and processes.

Sammons, Hillman & Moretimore (1995, cited in Songpol Charoenkam, 2019) proposed a theoretical concept of quality school management, which consists of 11 components:

1. Professional administrators
2. Shared visions and goals
3. Environment facilitating learning
4. Strength in teaching and learning
5. Learning plans with objective
6. High expectation in school and student
7. Positive reinforcement
8. Student's progress following up
9. Responsible students
10. Collaboration of parent and community
11. Knowledge organization

Conclusion

Based on the above rationale and concept, the development to the quality school according to the policies and focus of the Ministry of Education. The author recognizes the importance in the use of strategies in school administration. Academic administration is considered an important task because it enhances the quality of education with strength in academic and readiness for developing morality and ethics. Consequently, learners are trained to be good people with knowledge, professional skills, and healthiness. Academic administration can increase opportunities to access quality education, reduce educational inequality, solve socio-economic inequality for local and rural students, and promote the participation of private, family, temple, and school to improve quality learners. If any school can organize quality education and develop learners to have key skills and competencies to achieve the objectives of education in the 21st century, children and youth will be of good quality people of society and has a positive effect on further development of the nation.

Politics of Multicultural Education Competence Discourse: Singapore and South Korea

Changju Wu [1]

Abstract

The major purpose of this paper was to examine the politics of multicultural competency discourse through case studies of Singapore and South Korea. The study focused specifically on multicultural competence for in-service teachers. The primary source of this study draws on multicultural education policies, national education acts, teacher professional standards, and secondary data based on a qualitative document research. The data was analyzed by utilizing the critical discourse analysis (CDA) method, and the results were interpreted with Iris Marion Young's concept of politics of difference, and Kimberle Crenshaw' s theory of intersectionality. The findings revealed that local context has a significant impact on how multicultural competency is defined and on which social identities should be addressed. In South Korea, multicultural competency is concentrated on migrant children and international marriages, whereas in Singapore, it is centered on Singaporean identity, racial and religious harmony, despite the existence and rise of other social identities within the nation. This study suggests the need for a more inclusive discourse on multicultural competencies.

Keywords: multicultural competence, in-service teachers, Politics of Difference, South Korea, Singapore

Introduction

As the process of global integration accelerates, the growing demographic change has unavoidably made the schools and classrooms more diverse. Simultaneously, social tensions, injustice, and inequalities between different social groups are becoming more pronounced and serious. The outbreaks of the Stop Asian Hate movement and the Black Lives Matter movement, for example, have sparked worldwide protests demanding justice and equality. Such movements demonstrated that multicultural education is still critical and should be given more attention in order to promote a harmonious, cohesive, and justified society in today's world.

As an idea, an educational reform movement, and an ongoing process, multicultural education provides equal opportunities for all students to achieve successfully in school, regardless the diversity of their race, ethnicity, language, religion, culture, social class, gender, and sexual orientation (Banks & Banks, 2013). Multicultural education is first developed in the United States of America as a result of the African American Civil Rights movement in the 1950s and 1960s, which challenged discriminatory practices and racism in public spaces, particularly in educational institutions. It is then adopted by many countries as an effective and powerful strategy for embracing differences, promoting social integration and social justice. Multicultural education policy makes it possible for the alienated and marginalized groups to be recognized and empowered in the educational system, help them achieve equal and equitable education opportunity. As an essential mechanism to guide the implementation and practice of multicultural education, countries have developed specific policies for multicultural education in accordance with their particular sociopolitical contexts. In the United States, for instance, multicultural education policies are autonomously determined and formed by federal and state legislation, in order to response to the needs of racial, ethnic, and language minority groups. These authorized regulations make more effective implication on schools and staff in terms of the implementation and maintaining of multicultural education (Kellogg, 2015). The multicultural education policy in Australia reacts to the diversity in the country's cultures, languages, and religions. It commits schools to giving every student the chance to succeed academically and socially and to successfully

integrate into the country's multicultural society (NSW, 2022).

As two fast economically developed countries in Asia, Singapore and South Korea are among those countries that have implemented multicultural education. Singapore is a multi-racial, multi-religious, and multi-language parliamentary republic with a highly developed economy. It is ranked as one of the most developed and prosperous countries in Asia. Since its political independence in 1965, Singapore has declared itself a constitutionally multiracial and multicultural country (Chua, 2003), with Chinese, Malay, and Indian citizens making up the majority of its population. The Malays, notably, are constitutionally recognized as the indigenous people of Singapore (Bokhorst-Heng, 2007). In addition to its major three groups of citizens, Singapore has drawn a great number of immigrants and foreign workers to cater to the needs of globalization and economic development (Ho et al., 2017). According to the Singapore Department of Statistics (2020), its total population is 5.69 million among which Chinese make up 74.3%, Malays at 13.5 %, Indians at 9.0 %, and 3.2 % of Others (include Eurasians, Caucasians, Arabs, Japanese, etc.). In addition, there are 1,427,500 migrant workers in Singapore, composing 38% of its labour force (ILO, 2020). With regard to religion, 31.1% of the nation's population over the age of 15 identify themselves as Buddhists, followed by 8.8% as Taoists, 18.9% as Christians, 15.6% as Muslims, and 5% as Hindus, with the other 20% claiming no religious affiliation (DOS, 2020).

Having learned the lesson from the historically violent riots in 1950 and 1964, the government realized the significance of taking into account the complexity of Singapore's social context and maintaining social cohesion, peace, and harmony among various racial and religious groups.Therefore, when Singapore claimed independence from Malaysia in 1965, the founding prime minister, Lee Kuan Yew, pledged to create a multiracial nation for everyone (Sim, 2015). This promise is also reflected in its national policies in different areas, such as the bilingual policy implemented in 1966 in the field of education, the establishment of the Group Representation Constituency in the parliament in 1988, and the Ethnic Integration Policy introduced in 1989 in the housing sector. In the field of multicultural education, Singapore’s policies are based on the principle of "unity in diversity". The policies aim to promote racial and religious harmony, foster a sense of national identity, and ensure that all students have access to quality education regardless of their background.

Different from Singapore, South Korea is regarded as an ethnically homogeneous nation if dated back to its origin. It was until the 1980s, the rapid economic development attracted a growing number of migrant workers and international marriages, which caused a dramatic demographic change and inevitably turned South Korea into a multicultural society (Kim & Kim, 2012). According to the data from Statistics Korea 2020, the total population of this country was 51.83 million, which increased by 0.1 % from 2019. The foreign nationals was amounted to 1.70 million, which occupied 3.3% of its total population. Among this number, 31.9% are Korean-Chinese, 12.3 are Chinese nationals, 11.8 % Vietnamese, 9.8% Thais, 3.5% Americans, and 30.7 % of others. In 2020, the marriages of immigrants totaled 16,177 cases, which made up 7.6% of its total marriages. The marriages of Korean husbands and foreign wives consisted of the largest share (66.4%) of the total marriages of immigrants, then followed by Korean wives and foreign husbands (18.7%) and naturalized Koreans (14.9%) (Statistics Korea, 2020). Accordingly, 16,421 children were born into the international marriage families in 2020, which means there will be approximately this number of children of international marriages going to school in a few years. The number of students from multicultural families attending elementary, middle, and high schools in 2020 was 147,378, which was a threefold increase compare to 2013 (Lee, 2021). In addition, the number of migrant workers from foreign countries was up to 673,000 in 2020 (Statistics Korea, 2020). As a result of the growing number of its diverse population, the Korean educational system face a significant challenge in integrating multicultural contents in the schools that have been long accustomed to operating on a traditional curriculum for its monolingual and homogeneous population (Chang, 2015). At the same time, an increasing rate of students from multicultural families are also experiencing more

difficulties both in academic learning and school adaptation. For example, students who are "mix-blood" have lower academic performance and a higher dropout rate from school (Lim, 2009). Furthermore, students from multicultural backgrounds are easily to get bullied and discriminated by their peers due to the difference of their language and appearance. It is reported that three out of ten students with mixed-heritage have experienced discrimination in school (Lee, 2021). Apart from the growing number of international marriages and migrant workers, the North Korea defectors are another integral fact that the Korean government has to take into account to the diversification of its population. Many people escaped from North Korea since the start of the economic crisis in the North in the 1990s (Kang, 2010). The number kept growing until recent years. It reached the highest at 2,914 persons as of 2009, while there were only 229 in 2020 (Statista, 2022). Although the number is relatively small, the young school-aged children are still subjected to lower academic records, poor acceptance, and higher dropout rate (Cho, 2015). In such cases, it is pertinent for the government and policy makers to reconsider the educational policies and take actions to promote a more inclusive and multicultural education to address the needs of the diverse students.

Despite the different approaches towards the implementation of multicultural education, the two countries have established and achieved a higher standard education system. However, it is also imperative to investigate the inclusion and exclusion facts existing in these policies, in which some groups are still left out. Moving beyond the single social identity approach, this study employs the theory of politics of difference by Iris Marion Young (1990), and the theory of intersectionality by Kimberly Crenshaw (1989), aiming to investigate which social groups are counted in or excluded from the multicultural education policies in Singapore and South Korea, as well as how in-service teacher's multicultural competence is conceptualized by the dominant discourses within the particular sociopolitical context of these two countries.

Research Objective

This study aims to investigate which social groups are counted in or excluded from the multicultural education policies in Singapore and South Korea, as well as how in-service teacher's multicultural competence is conceptualized by the dominant discourses within the particular sociopolitical context of these two countries.

Research Methodology

This study is conducted as a document analysis which is one of the forms of qualitative research. Bowen (2009) defined document analysis as a systematic process for reviewing or evaluating written and electronic documents. There are numerous types of documents that can be collected as data sources, including books, journals, letters, diaries, agendas, meeting reports, advertisements, and newspapers, the majority of which are accessible via the internet, libraries, newspaper archives, and institutional files (Bowen, 2009; Yin, 2009).

This study selects South Korea and Singapore as research sites for three reasons: first, they are all developed countries with a large population of immigrants, foreign workers, and international students; second, the two countries have unique, but also share characteristics, experiences, and policies regarding multicultural education; and third, each of these countries has achieved multiculturalism. The primary sources of data of this study focus on the multicultural education policies, national education acts, and teacher professional standards released by the respective ministry of education of the two nations.

This study utilizes critical discourse analysis, which is a useful approach for researchers to explore the connections between educational practices and social contexts (Mullet, 2018). Critical discourse analysis (CDA), according to Van Dijk (1993), deals with the discourse dimensions of power abuse, as well as the social injustice and inequality that follow from it. CDA aims to address social issues and gain a better understand of them through discourse analysis. Through critical understanding, CDA attempts to challenge the power and speak for the marginalized or dominated people who suffers from social injustice and inequalities (Van Dijk, 1993). Therefore,

Critical discourse analysis (CDA) helps this study make a critical sense of how the dominant groups and subordinate groups are presented in the official documents of South Korea and Singapore.

Conclusion

This study respectively examined the multicultural education policies, national educational acts, and teacher professional standards of Singapore and South Korea, focusing on the identity groups presented in the official documents, the strategies implemented, and the training standards for teachers' multicultural education competence.

Singapore has a long history of promoting multiculturalism or multi-racialism, and its commitment to provide quality education to all Singaporean citizens. It is obvious to find that the shared national values and a common Singapore national identity are the main focuses throughout its educational policies which have been effective and successful in creating a diverse and harmonious society. As the country is proud of its success in maintaining racial and religious harmony, there are scholars, nevertheless, arguing that racial harmony has not been fully achieved as there are still tensions existing among the Singaporeans and between the Singaporean citizens and new immigrants (Ho et al., 2017; Karupiah & Berthelsen, 2011; Mathew, 2015). Prime Minister Lee Hsien Loong (2015) also emphasized in a speech that:

"One of our most remarkable achievements over these last 50 years, has been our racial and religious harmony. It stems from a strong belief in the ideal of a multiracial society where everybody is equal, regardless of race, language, or religion..... in any society, race and religion will remain as difficult issues, will remain as sensitive issues.....in some ways, are more complicated and more difficult than it used to be.....It is very unwise to assume that we do not have to be careful, that we do not have to be sensitive when we are dealing with issues of race and religion. It is always work in progress."

The aforementioned statements demonstrate that despite the achievement of its "unity in diversity," possible conflicts and tensions will still lurk underneath the surface. Moreover, as the times are changing, new, urgent concerns, especially the LGBTQ+ community, who are being subject to bias and discrimination, are rising up to demand more presence and justice in the schools and society. For example, the educational system of Singapore is being criticized that the existence of LGBTQ+ identities are erased from the education curricula, LGBTQ+ teachers have to stay closeted and hide their identity in order to keep their job, teachers should not discuss this kind of issues with students, and LGBTQ+ students are bullied and discriminated in the school, and so on (Heckin Unicoorn, 2022). As a result of these emerging challenges, it is imperative to consider whether the current policies are truly inclusive or multicultural enough for all. And it is imperative to review and reconsider the policies tin order to ensure that everyone is included and respected in both policies and realities.

In terms of teachers' competence, it highly requires that teachers in primary and secondary schools must go through a series of strict examinations, which includes their commitment to teaching profession and service to diverse student populations, as well as other qualifications (Bautist et al., 2015). According to the Singapore Graduand Teacher Competence (NIE, nd), teachers are requires to achieved the three professional standards: professional practice, leadership and management, and personal effectiveness. **Referring to multicultural competence, it requires teachers to be competent of nurturing the whole child by believing that all pupils can learn, showing care and concern for all pupils, in addition, teachers should have high expectations towards all pupils, regardless of their varied backgrounds, and are committed to their development.** In order to guarantee an effective multicultural education, Karupiah and Berthelsen (2011) suggested teachers attain proper knowledge, positive attitude, and skills to conduct multicultural practice in their classrooms. These elements can be found in the Singapore Teacher Training Programmes (NIE, 2021), in which student teachers are require to take

the course of “The Social Context of Education in Singapore”, which requires them to understand the critical functions of education in Singapore, namely to support economic development, foster social cohesion, socialize young people into their citizenship role. In addition, this course enables teachers to understand the major policy directions driving education reform, and the attempts to reduce education inequality. Under these major discourses, the Teacher Training Programme aims to cultivate teachers with multicultural education competence through different subjects. For example, the essential course “Multicultural Studies” which aims to introduce student teachers to the implication of a living in a diverse society, and covers the topics of race, ethnicity, class, gender, and other social structures. Also the courses such as “Managing Diversity in the Primary Social Studies Classroom” and “Social Studies in the Secondary Classroom” under the theme of The Teaching of Social Studies, “Identity in a Diverse World”, “Singapore Studies”, “Supporting Diversity at the Primary Level”, and “Character and Citizenship Education”. Obviously, Singapore has developed a relatively concrete training system for cultivating future teachers with multicultural competence. These courses help develop a positive attitudes and understanding for future teachers, and equip them with needed knowledge and skills to teach in diverse classrooms. According to the results from the OCED Teaching and Learning International Survey (TALIS) (2018), 100% of teachers in Singapore hold a positive attitude towards teaching students from different cultural backgrounds. Nevertheless, only 60.9% of teachers believe that they are “well-prepared” or “very well-prepared” to teach in a multicultural setting. Though the proportion is higher than other countries, it also indicated that there are teachers who are not ready or are not competent enough to conduct multicultural education. Therefor, it is significant for the country to reflect and reconsider its training programmes in order to produce more qualified and well-prepared teachers. In addition, it is suggested that the Ministry of Education and related government departments take into account of more gender issues, which are becoming an increasingly intensive topic in Singapore. And a more critical training plan should be developed to address the issues of inequality and injustice in the education system.

In the case of South Korea, the government has made significant efforts to promote education for multicultural children by implementing annual Multicultural Education Support Plans since 2006 to 2020. Undoubtedly, these plans have been effective in ensuring educational opportunities for multicultural students and integrating them into the Korean educational system and society. And, as goals and countermeasures evolved throughout the years, it is certain that South Korea is committed to improve the quality of education for all students, and to raise the importance of awareness towards multicultural education as it is becoming a more welcoming and accepting place for people with diverse backgrounds. However, it is worth noting that these support plans aimed to create a more inclusive education environment for multicultural students, but did not adequately address the underlying issues of discrimination and inequality. In addition, children of multicultural families have been the main targets of these policies since the implementation, which means they are regarded as “different” from the “general students”. Furthermore, the implementing strategies such as the learning of Korean language and Korean cultural education have always been the main focus over the years, which are in some way strengthening the privilege and power of the dominant culture, and are trying assimilating the “different” into the mainstream society.

Regarding to nurturing teachers’ multicultural education competence, it is explicitly stressed in its annual Multicultural Education Support Plans. For example, the 2008 Multicultural Education Plan emphasized the training contents for teachers’ multicultural education competence including inducing interest and educational consideration for students through a change in the perception of teachers and principals who are in charge of multicultural families. The 2009 plan focused on conducting training on the theory and practice of multicultural education for student guidance, and practical training to improve teachers’ understanding of multiculturalism. It is undeniable that the government has devoted great effort to develop competent teachers in teaching multicultural education, however, the main training focus throughout all these policies is about improve teachers’ multicultural understanding, which is inadequate to tackle the real issues and difficulties that the teachers face in the diverse

classrooms. The results of the OCED Teaching and Learning International Survey (2018) on South Korea explicated that though 97% of teachers have a positive attitude towards teaching students with different backgrounds, and only 30.9 % of teachers felt that they are prepared to teach in a multicultural classroom. Compared to other OCED countries, it was at a very low rank in terms of multicultural teaching competence (TALIS, 2018). Additionally, these training programs emphasize on promoting teachers' understanding for multiculturalism and multicultural students, but less importance is attached to the enhancement of teachers' professional knowledge and skills to better integrate both multicultural students and general students. Otherwise, the issues of discrimination and prejudice will not be radically addressed.

To summarize, Singapore's and South Korea's multicultural education programs function differently due to their unique national contexts. Needless to say, Singapore has a long history of implementing multicultural education, which has significant implications for other countries striving to create a truly multicultural society. However, the Singapore national context is continually evolving; the government must adjust and reform in order to fulfill the increasingly diverse demands of all citizens and become a truly inclusive society for everyone. South Korea's efforts to promote a multicultural society are unquestionable; nonetheless, a more concrete and inclusive program should be devised, as well as a stronger political will to become a true multicultural society should be incorporated in educational planning.

Dual Vocational Education (DVE) for Persons with Disabilities

Natthawat Siritachaphat[1]

Abstract

This paper aims to present the importance of vocational education management for persons with disabilities in the dual system. The topics included: the dual vocational system, current employment for persons with disabilities, and the dual vocational system for persons with disabilities. The essence focuses on dual vocational system management, employment of persons with disabilities, current trends in demand for disabled workers, and importance of dual vocational system management for persons with disabilities.

Keywords: person with disabilities, dual vocational education, dual vocational education for person with disabilities

Introduction

The education management under Section 8 of the Vocational Education Act B.E. 2551 stipulated that vocational education and training shall be provided in three different forms: 1) Informal education is primarily focused on education at vocational schools or institutions with a clear determination of aim, study method, curriculum, study time, and measurement and evaluation based on the conditions for graduation. 2) Non-formal education is flexible management of vocational education in determining the aim, study method, study time, and measurement and evaluation which shall be appropriate for and in accordance with problem conditions and needs of particular groups. 3) Dual education system is vocational education management under the agreement between vocational education institutions and establishments, state enterprises, or government agencies on curriculum and learning management, and measurement and evaluation. Learners spend part of their time studying in vocational institutions and practicing at establishments, state enterprises, or government agencies (Dual Vocational Education Center, 2021). At present, the Office of the Vocational Education Commission (OVEC) launched a policy to promote and open educational opportunities for persons with disabilities to attend vocational education thoroughly. The main purpose is to improve the quality of life of persons with disabilities so that they can apply knowledge and professional skills in work, make a living, and live life happily. This can be seen from various projects of the OVEC which are specifically organized for persons with disabilities. There is also support for the establishment of the Disability Support Services Center (DSS), to manage vocational education for persons with disabilities in 5 colleges: Phutthamonthon Vocational College, Bangsaen Technical College, Chiang Mai Polytechnic College, Nakorn Luang Polytechnic College, and Surin Polytechnic College. Additionally, educational institutions are encouraged to organize education based on the dual system. It can be concluded that the dual education system is increasingly important in developing learners to apply theoretical knowledge in the classroom and practical experience from vocational training to work successfully. In this paper, I am presenting the importance of vocational education management for persons with disabilities in the dual system.

The Dual Vocational Education System

The dual vocational education system (Center for Dual Vocational Education, 2021) was started in 1984.

[1] Ph.D. candidate in Education Administration Nakhon Pathom Rajabhat University.
Corresponding author., Tel. +66 08-4634-9993 E-mail: n.siritachaphat@gmail.com

It is vocational education organized with cooperation between educational institutions and establishments. The dual vocational education system has been continuously developed which can be divided into four phases as follows:

Phase 1 School-Factory Project (Dual System) (1984 – 1994) The Department of Vocational Education received academic assistance from the German Government under the aid of the GTZ: Deutsche Gesellschaft Fuer Teche Zusammenarbeit.

Phase 2 The Dual Vocational Education Project (1995 - 1998) The Department of Vocational Education at that time promoted the "dual education system" by updating the Certificate of Vocational Education Curriculum B.E. 2538 with different learning management, i.e., normal system, dual system, credit accumulation/transfer system, and remote system. The symbol of Dual Vocational Training (DVT) was first used.

Figure 1 The Dual Vocational Training Symbol
Source: http://bsq2.vec.go.th/

Phase 3 Half-curriculum internship (1999 – 2007) The OVEC has developed the Certificate of Vocational Education Curriculum B.E. 2542 (revised B.E. 2546) and the High Vocational Certificate B.E. 2546. These curriculums are the vocational education management with the cooperation between vocational institutions and the establishments. Vocational training can be organized in two forms: 1) half-curriculum internship (dual system), in which students have professional training for the period of at least half of the program at the establishments; and 2) one-semester internship, in which students have professional training for at least one semester under the DVT (Dual Vocational Training) symbol. Due to the end of the Thai-German academic cooperation project, the dual vocational training symbol was revised. The symbol contains only the DVT abbreviation without the flags of the two countries.

Figure 2 The Revised DVT Symbol
Source: http://bsq2.vec.go.th/

Phase 4 2008-present The Vocational Education Act B.E. 2551 came effective. Section 8 (3) specified that the dual education system is a vocational education arrangement under the agreement between educational institutions and establishments, state enterprises, or government agencies on the management of curriculum, learning, and measurement and evaluation. Learners spend part of their time studying in a vocational institution and practicing in establishments, state enterprises, or government agencies with an emphasis on the dual education system. The dual education system symbol has changed according to the English wording from Dual Vocational Training – DVT to Dual Vocational Education - DVE.

Figure 3 the Dual Vocational Education Symbol
Source: http://bsq2.vec.go.th/

Dual vocational education aims to develop students to work effectively. In other words, students are trained in skills, knowledge, and competence to keep up with technological advancement according to the establishment's needs. This also implies the preparation of vocational education personnel for the labor market. The benefits that students receive are 1) in general, they get an allowance and other benefits as agreed, have a good opportunity to work in the establishment where they have received vocational training, receive a work experience certificate from the establishment, and gain the Vocational Certificate and the High Vocational Certificate, the same as academic students; 2) academic benefits are students gain theoretical knowledge from learning at the institution, be able to apply the knowledge to the practice at the establishment immediately, and have professional skills that meet the needs of the establishment; and 3) work character benefits include students have high responsibility, punctuality, good personality, and appropriate to work, as well as understand work system in the establishment, and can solve problems well.

The principles of dual vocational education are responding to the establishment's needs based on the curriculum structure, adopting flexible methods based on the availability of educational institutions and establishments, and aiming to improve students' skills, proficiency, and qualifications.

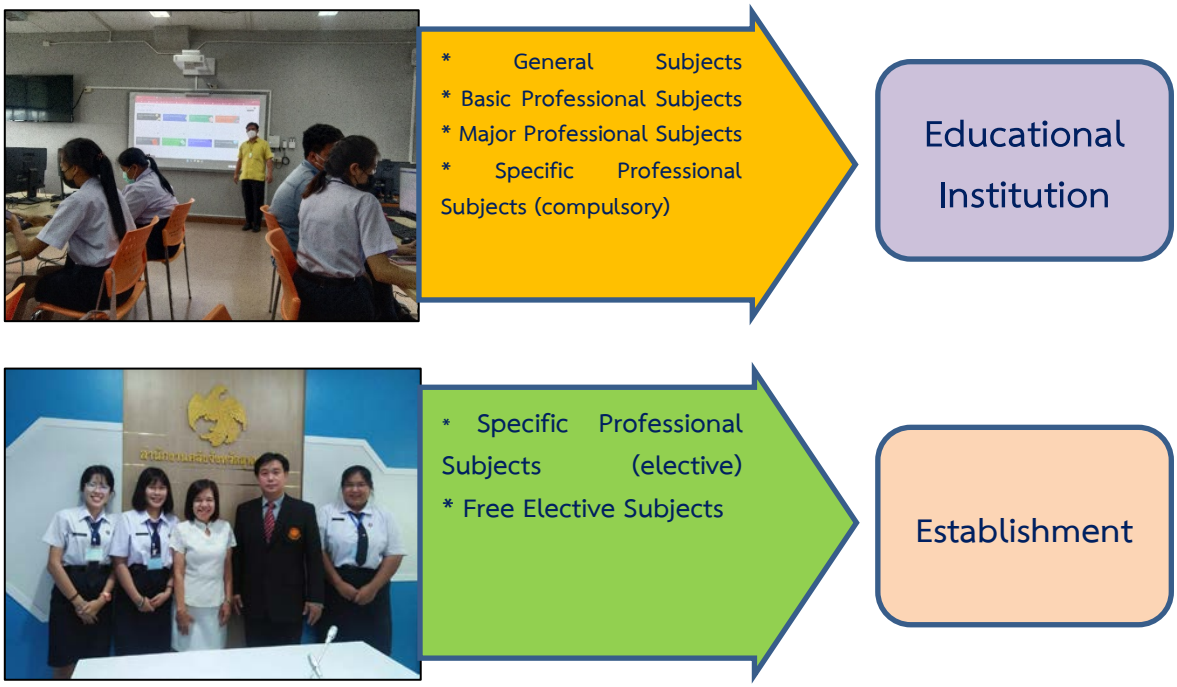

Figure 4 Flowchart of Dual Vocational Education Management

The personnel involved in the ducal vocational education system are as follows:

1) Establishments

- Internship supervisors include owners, managers, supervisors, or those assigned by the establishment.

- Teachers include those who teach and train in the establishment. They must be knowledgeable and competent in the professional field in which students are trained, and have good character and attitude toward the transfer of knowledge to others.

2) Educational Institutions

- Head of the dual vocational education system
- Supervising teachers
- Advisors

The benefits that an establishment can gain when cooperating in dual vocational education were: 1) in the business aspect, the establishment is able to develop personnel to have skills and knowledge, meet the establishment's needs, and plan its workforce systematically in the long term. This makes it possible to prepare qualified personnel to support future labor needs. Moreover, the establishment also gains benefits under the Career Promotion Act. 2) In the social aspect, dual vocational education gives the company or establishment a good image. It can publicize the organization to society. This can support and promote students' opportunities to learn from practical experience. As a result, it raises learners' quality of life by providing allowances and other benefits.

Success in dual vocational education management depended on the preparation of learning plans, vocational training plans, job training, measurement and evaluation which focus on producing graduates with skilled, technical, and technological levels. The graduates are persons with knowledge, understanding, skill, ethic and morality, professional conduct, and habit appropriate to work in real life. They can effectively operate technical work, create and develop tasks, plan, manage and develop themselves, and collaborate with others. The graduates have academic and professional progress, including competency to perform work or self-employment according to the professional education standards and competency standards of the subject. This is in accordance with the 20-Year National Strategy, the National Economic and Social Development Plan, and the National Education Plan. The quality of graduates, ducal vocational education at all levels, subjects and disciplines must have standards as specified in the Ministry of Education's Notification on the national vocational qualifications framework. The graduates' qualifications include: 1) be able to perform work in the field immediately after graduation, and 2) have competency according to the vocational qualification criteria for each level and subject. For instructors and supporting personnel of dual vocational education, the vocational education institutions shall perform as follows: 1) at least 30 percent of professional instructors in vocational education institutions adopting dual vocational education must have professional development no less than eighty hours per person per academic year from the participating establishment that manages the dual vocational education system. 2) The vocational education institution must provide experienced, skilled, and professional expertise to transfer skills, experience, and knowledge to learners and instructors no less than twice a year, no less than two hours per subject per semester.

Vocational education institutions and establishments that jointly manage the dual vocational education system must have sufficient materials, supplies, space, and educational equipment to manage teaching and vocational training.

Current Situations of the Employment of Persons with Disabilities

There are three ways of employing persons with disabilities in establishments and government agencies (Department for the Promotion and Improvement of the Quality of Life of Persons with Disabilities, 2022). The establishment can choose to operate in one or several ways, including:

Section 33 Regarding the employment of persons with disabilities, the establishment and government agencies shall accept disabled persons who are able to work in the establishment in accordance with the law on labor protection or government agencies in accordance with the prescription of the Office of the Civil Service Commission

Section 34 To send money to the fund, the employer or the owner sends money to the fund to promote and improve the quality of life of the disabled person on a yearly basis. Government agencies do not have to send money to the fund.

Section 35 An employer or owner of an establishment makes a concession under Section 35 by applying to the Department of Employment or the Provincial Employment Office where the headquarters of the establishment is located, or to a government agency.

Year	The number of government agencies that must be employed		Performance						Need to hire more (%)
	Agency (Place)	To Employ (person)	Results reported (places)	Hire 33 (person)	Concession 35 (contract)	Total	Employed (%)	Need to hire more (people)	
2562	212	14,226	131	3,327	2,930	6,257	43.98	7,969	56.02
2563	290	15,412	204	2,633	1,278	3,911	25.37	11,501	74.63
2564	292	17,622	223	1,801	781	3,582	20.33	14,040	79.67
2565	294	17,534	141	2,214	459	2,673	15.24	14,861	84.75

Table 1 The statistics of disabled person employment of GOV
ที่มา : https://dep.go.th/images/uploads/files/job200565.pdf

Year	The number of establishment agencies that must be employed		Performance						Need to hire more (%)
	Agency (Place)	To Employ (person)	Hire 33 (person)	Concession 35 (contract)	Send Money 34 (person)	Total	Employed (%)	Need to hire more (person)	
2562	14,453	69,974	40,405	13,172	15,798	69,375	99.14	599	0.86
2563	14,906	70,161	40,429	14,108	13,833	68,370	97.45	1,791	2.55
2564	13,713	64,785	37,850	13,786	12,910	64,546	99.63	239	0.37
2565	13,643	63,876	33,730	12,946	11,548	58,224	91.15	5,652	8.85

Table 2 The statistics of disabled person employment in establishments (nationwide)
Source: https://dep.go.th/images/uploads/files/job200565.pdf

According to Table 1, government agencies also need to increase the employment rate of 14,861 persons, or by 84.75 percent. In Table 2, 5,652 persons with disabilities, or 8.85 percent, are required to increase the employment rate of persons with disabilities.

Under Section 4 of the Promotion and Improvement of the Quality of Life of Persons with Disabilities Act B.E. 2550, persons with disabilities are defined as persons who are limited in performing their daily activities or engaging in social activities due to their visual, hearing, motor, communication, mental, emotional, behavioral, intellectual, and learning disabilities, or any other impairment with various impediments, and special need for assistance in order to perform their daily activities or engage in social activities as normal individuals. According to the types and criteria announced by the Minister of Social Development and Human Security, there are seven categories of disabilities: visual disabilities, hearing disabilities or articulation disabilities, motor or physical disabilities, mental or behavioral disabilities, intellectual disabilities, learning disabilities, and autism disabilities. Each of which has different limitations, which make it possible for people with disabilities to choose jobs that meet their aptitudes and limitations. From the researchers' experience in teaching learners with disabilities, people with disabilities are able to upskill and reskill as regular students, depending on their disability and proficiency. For example, one student in the higher vocational certificate level of Banhan-Chaemsai Polytechnic College in SuphanBuri Province has hearing disability, but she could graduate in Business Computers and work in information technology at the Supamitr Hospital in SuphanBuri Province. Another student of Suphanburi College of Vocational Education, one with hearing disabilities from SuphanBuri Vocational Education College has hearing disability but could graduate with vocational certificate and high vocational certificate levels, as well as a Bachelor's degree (ongoing) in Business Computer with free tuition and able to run a private business without any problems. Moreover, the researcher participated in the workshop seminar to develop the study plan for disabled learners, organized by the OVEC, Chiang Mai Vocational College in cooperation with the Center for the Development, Promotion, Coordination of Student Affairs and Special Affairs (2020) between 22-25 November 2020. The researcher visited Chiang Mai Polytechnic College and met with a disabled learner who has half a body, but is good at repairing motorcycles without thinking of disability as an obstacle.

Persons with disabilities have the potential to develop AI superior to normal persons (Saruta, 2025). Saruta Benkotem said that blind people process sounds twice as quickly as ordinary people. Deaf people can see wide and see details better than non-deaf people. Autistic people can catch patterns well and exclusively focus

on their interests, and some have excellent long-term memories. From the coronavirus outbreak 2019 which had major impacts on the economic and social systems, all sectors accelerate the application of digital technologies to work in order to reduce the risk of infection. Moreover, work from home leads to a new normal lifestyle. This adaptation increases opportunities for people with disabilities to work through various platforms easily. It increases the choice of work for both people with disabilities and the establishment and also supports the Rehabilitation of Disabled Person Act B.E. 2534, which stipulated that the establishment with 200 employees or more is obliged to accept persons with disabilities to work at a ratio of 200 employees per one person with disabilities.

Dual Vocational Education System for Persons with Disabilities

From the OVEC Announcement on 23 November 2020 on the establishment of the Vocational Special Education Management Center as an internal agency under the OVEC. The Vocational Special Education Management Center is responsible for preparing policy proposals and plans for the management of special vocational education and professional training for persons with disabilities, special needs persons, and the underprivileged, including evaluating and reporting on the implementation of vocational education management and training for persons with disabilities, organization of system, media, and facilities under the Education Management for Persons with Disabilities Act B.E. 2551. The center also manages vocational education for special needs persons and the underprivileged. It encourages, supports, and coordinates the management of vocational education and professional training for persons with disabilities, persons with special needs, and the underprivileged, including evaluating and reporting and promoting and supporting the Vocational Special Education Management Center and educational institutions to provide inclusive classes for persons with disabilities and special needs persons in the area of responsibility thoroughly. As a result, the center is able to produce and develop technology to support learning and facilities for education management for persons with disabilities and those with special needs. It coordinates, promotes, and supports the educational management of vocational institutions of the public and private sector, local administrative organizations, including individuals, families, communities, community organizations, funds, professional organizations, religious institutions, establishments, and other institutions that organize vocational education and training for persons with disabilities, special needs persons, and underprivileged groups. The center coordinates, promotes, and supports the development of teachers and personnel for vocational education management and professional training for persons with disabilities, special needs persons, and the underprivileged in public and private institutions.

The Vocational Special Education Management Center collaborates and promotes education management for persons with disabilities, special needs persons, and the underprivileged to be in accordance with the vocational education policies and standards. Moreover, it compiles the database on vocational education management and professional training for persons with disabilities, special needs persons, and the underprivileged in public and private educational institutions. Furthermore, the center works with or supports the performance of other related or designated functions and performs other related or assigned tasks. It is evident that the OVEC gives importance to the education of disabled learners, especially in dual vocational education, with a variety of disciplines. This allows people with disabilities to upskill and reskills according to their own disabilities and aptitudes.

Although the dual vocational education system may not be the answer for all persons with disabilities, it is a good option for persons with disabilities to develop their potential to enter the labor market effectively through the process of improving the knowledge and abilities of students in the dual education system. Additionally, this education system meets the needs of the labor market through the collaboration of establishments for the development of disabled students together with educational institutions.

Relevant Research

Anchalee Saratana et al. (2020) researched the current state of occupational needs of persons with disabilities and studied the case study of persons with autism. The research aims to 1) examine the current state, vocational needs, and problems in occupation of persons with disabilities in the Northeast; and 2) examine the current state, vocational needs, and problems in occupation of autistic persons with a case study in Khon Kaen Province. The research results revealed that the problems in occupation of disabled persons are mostly basic needs such as funding, knowledge, occupational skills, and welfare. The support still focuses on helping the disabled person not to be a burden on family and society and having more self-esteem and attempt to develop the occupation and performance. Quality educational management thoroughly for persons with disabilities is necessary. Regarding the research results, it is found 7.75 percent of persons with autism from all types of disabilities. The occupational development of autistic students is the need of their parents and teachers. It is necessary to develop a specific vocational curriculum for autistic persons so that they can work, communicate, adapts to others, and works appropriately. The major obstacle in work operation of autistic persons is the severity level of autism.

Sumalee & Benjamaporn (2019) studied dual education management in the 4.0 era. The guidelines for the development of dual education system in the 4.0 era were presented as follows: 1) schools must place importance on and understand learners and parents, and negotiate to save the rights and interests of learners and parents. The establishment must adjust the teaching process. There should have supervising teachers and training teachers of the establishment to develop learners. Problems, obstacles, and solutions in curriculum management must be measured and evaluated. 2) The establishment must have a way to manage the dual education system curriculum with no treaty with the educational institution. 3) For learners, there should have methods for solving learners' problems and obstacles. The teacher has an important role in developing learners in adaptation, problem-solving, and critical thinking principles.

Elizabeth Ellen Simonson (2013) researched the role of technical vocational training in Texas in early college high schools (ECHS). The study aimed to prepare the document about the role of vocational training programs in the ECHS and to identify barriers that might hinder the introduction of effective vocational training programs in the ECHS. The study was descriptive nature, using a mixed methodology model, especially a sequential design survey, and an instrumental development model. The researchers hypothesized that in the context of the ECHS, the specific role of vocational training programs as well as the barriers that might hinder the implementation of such programs based on qualitative outcomes were derived from three Delphi studies. The study concluded that eight of the 15 hypotheses were viable. From the quantitative results, practitioners involved in the ECHS often agree on the roles and barriers.

Conclusion

The OVEC has announced the establishment of the Vocational Special Education Administration Centre as an agency under the OVEC and direct command of the Office of Standards. The center is responsible for preparing policy proposals and plans for special vocational education management and training for persons with disabilities, persons with special needs, and the underprivileged. It can be seen that the OVEC places importance on the education of persons with disabilities in order to improve their quality of life. They can apply knowledge and professional skills to make a living and live happy life. When the coronavirus spread in 2019, information technology in the workplace evolved exponentially. It is a good opportunity for persons with disabilities to turn a crisis into an opportunity by upskilling and reskilling in information technology to create work skills in the 21st century. Particularly, dual vocational education organizes vocational education under an agreement between a vocational institution and an establishment, state enterprise, or government agency on learning management and measurement and evaluation. Learners spend part of their study time in a vocational institution and practice

working in an establishment, state enterprise, or government agency. They have precise theoretical knowledge from the institution and practical experience from working in the establishment. Apart from the implementation under the Rehabilitation of Disabled Person Act B.E. 2534, which prescribed that the establishment shall employ persons with disabilities. The Ministerial regulations (B.E. 2537), issued according to the provision of the Rehabilitation of Disabled Person Act B.E. 2534, set the number of persons with disabilities that an employer or owner of the establishment shall employ. Specifically, the establishment with 200 or more employees shall accept persons with disabilities to work in the ratio of 200:1. In addition, the establishment can receive tax deductions from the admission of disabled learners for vocational training through dual vocational education in the establishment, according to the Skill Development Promotion Act B.E. 2545.

Recommendation

Dual vocational education for persons with disabilities is not widespread—among vocational education institutions, establishments, and persons with disabilities—due to the budget and the understanding of roles, duties, and importance of learning in dual vocational education of persons with disabilities. Therefore, the OVEC must accelerate public relations, and cooperate with all sectors to search for budget support in dual vocational education management for persons with disabilities, in terms of learning management, universal design, and personnel in operations related to dual vocational education for persons with disabilities.

The Causal Relationship Model of Administrators Affecting Effectiveness of Secondary Administration Schools in The Northeastern Region.

Sayanon Sirikhun[1]
Sikan Pienthunyakorn[2]
Jinawatara Pakotang[3]

Abstract

The purposes of this research were: 1) to examine factors in the causal relationship model of administrators affecting effectiveness of secondary administration schools in the northeastern region, 2) to develop and verify the causal relationship model that was created with the empirical data, and 3) to find guidelines to develop factors that directly affect the effectiveness of secondary administration schools in the northeastern region. The research was divided into 3 phases, consisting of: Phase 1: Creating a hypothesis model. Phase 2: Check for consistency with empirical data, the key informants are administrators and teachers in secondary schools in the northeastern region, the year 2022, 1,280 samples from 640 schools. Phase 3: Finding ways to develop factors that directly affect the effectiveness of secondary administration schools in the northeastern region. The findings were as follows: 1) The variables studied in the causal relationship model that was created consisted of 4 causal variables, all of which had a high average level, 2) The causal relationship model that was created is consistent with empirical data, and 3) Have guidelines for developing variables direct influencing the administrators affecting effectiveness of secondary administration schools in the northeastern region.

Keywords: The causal relationship model, affecting effectiveness of secondary administration schools.

Introduction

Disruption means interruption and destruction. It is frequently used in industrial and business technology scenes. **(สุมาลี มหณรงค์ชัย, 2563)** The researcher concludes that disruption means replacing the old with new technologies or innovations that are more potent and efficient, for example, smartphones replace traditional mobile phones. Consumer behavior turns to using YouTube, Facebook, Line, Shopee, Lazada or even doing important things such as financial transactions via Mobile Banking, which are just a few examples of technological advancements. It changes the concept of human lifestyle, resulting in new skills and occupations that will support this change that is becoming increasingly important and inevitable. (Ismail, S., 2014) has compared the linear growth or development of human beings with the potential of technology. Technology as a tool came after humans and their early potential were greatly inferior to humans. But at some point, the potential of technology will be vastly higher than that of humans. The difference gap is called disruption. Analysts have concluded that we have already crossed the point where human and technological capabilities are equal and that in the next 3-5 years the impact will be even more exponential. Therefore, it can be said that the present and the future are completely disrupted. In the midst of technological advancement and digital development, human behavior has changed from the past. The behavior of the students is the same. Learners are looking for a flexible learning model that can be used anytime, anywhere. A completely different form of learning from the past is known as Disruptive Education and

[3] (Educational Administration), Faculty of Education, Sakon Nakhon Rajabhat University

the more there is epidemic of the Coronavirus 2019, which stimulates the education management model to change even more quickly. **(สุมัทนา หาญสุริย์, 2563)**

From the rapid change and development of technology, new careers and new work skills have arisen, which raises the question of whether Thai education is ready or not to prepare human resources that will be the future to drive the country further. Thai studies that have been surveyed are not as satisfactory as they should be, and it cannot be denied that it is the result of the education management of Thailand that still needs to be developed. **(ชัชวาล โอสถานนท์, 2563)** Seize the opportunity from the era of disruption to develop the education system, create quality human resources and develop the country further. The important cog that will drive the strategy into practice is inevitable from the school administrators, which is in line with **(ชัชชญา พีระธรณิศร์, 2563)** That said, executives must have leadership, role play, directing work, planning, supervising, monitoring and evaluating success. The executives themselves must dare to challenge themselves, and change their life when considering the administration of secondary schools in the era of disruption School administrators and teachers as well as parents in this era. All of them are users of information technology, with educational institution administrators having important tasks in terms of academic administration, budgeting, personnel administration, and general administration. According to the National Education Act Has assigned the Ministry to decentralize the administration and management of education in such matters. At the same time, results must be achieved in accordance with the context of the community in which the educational institution is located. **(สงบ อินทรมณี, 2562)** same as **(กรรณิการ์ แก้วประสิทธิ์, 2564)** It was found that from the spread of COVID-19, Academic administration needs to be adjusted to online learning management due to the new lifestyle-based lifestyle that uses technology in administration and learning management. To be effective and affect the learning achievement of the learners, which is the main duty of the educational institution to lead the organization to success in accordance with **(สราวุฒิ ไทยสงค์, 2564)** that presents guidelines for personnel management when the situation spreads Coronavirus disease 2019 (COVID-19) outbreak by managing personnel using technology Effectively, it requires executives with knowledge and expertise in using digital technology to lead the transformation of the organization's work. Executives must rely on strategies to manage their limited human resources to be as effective and efficient as possible, to drive educational institutions to achieve the goals set.

From the importance of factors affecting school effectiveness. Although this study was large-scale, it was a study in another organization, make the researcher interested in studying the causal relationship model of administrators affecting effectiveness of secondary administration schools in the northeastern region. Because it is a study from theory to modeling that shows the structure of relationships between variables. The researcher can examine the structural relationships of the theoretical models generated from the literature review. The data were then collected and tested for model concordance, for the benefit of understanding knowledge and expanding new knowledge lead to best practice.

Research Objective

1. To study the variables in the causal relationship model of administrators affecting effectiveness of secondary administration schools in the northeastern region.

2. To develop and verify the harmonization of the causal relationship model of administrators affecting effectiveness of secondary administration schools in the northeastern region.

3. To find guidelines to develop variables directly influencing administrators affecting effectiveness of secondary administration schools in the northeastern region.

Research Methodology

The researcher divided the research method into 3 phases as follows:

Phase 1 Create a hypothesis model, divided into 2 steps.

Step 1 Study and analysis of documents the resultant factors and components of secondary school administration effectiveness were as follows:

1. Two latent external variables were 1) Executive Leadership in the Disruption Era and 2) School Environment and Culture.

2. Three latent variables were 1) the competency of teachers and educational personnel in managing the learning process, 2) innovative schools using technology and information, and 3) the effectiveness of secondary school administration.

Step 2 Bring the knowledge gained, to interview 9 experts from 3 groups, namely academic experts; Educational Administration, and the administration of educational institutions to confirm the knowledge gained from the study

Phase 2: checking for consistency with empirical data, divided into 4 steps as follows:

Step 1 Population and sample The population is a secondary school in the northeast, under the Office of the Basic Education Commission for the academic year 2022, totaling 933 schools and the sample group consisted of 640 secondary schools, using the size of the school as a chart There were 2 informants in each school, consisting of 1 school administrator and 1 teacher.

Step 2 Creation and development of research tools the researcher created a questionnaire with a rating scale of 5 levels (Rating Scale), namely, most, most, medium, least and least. Checked for validity in terms of content by 5 experts. Selected items with a consistency index of 97 items. To be published as a questionnaire, the questionnaire then takes into consideration the ethics of research in human subjects. Sakon Nakhon Rajabhat University Then checks the confidence of the tool by bringing the questionnaire to try out (Try Out) with a group of informants with characteristics such as the same as the real sample, which is a secondary school. Under the Office of the Basic Education Commission, 50 places are not a sample group.

Step 3 Data Collection

Step 4 Analysis and Interpretation The researcher used to mean (S.D.), skew, and kurtosis analysis when the data were found to be close to the normal distribution. Therefore, correlation analysis between latent variables was performed. Next, the relationship between the observed variables was analyzed using SPSS. Lisrel was then used for single-variable confirmatory component analysis. When all variables analyze the pattern with empirical data is to see how harmonious it is, until the influence of the variable.

Phase 3: Finding ways to develop factors influencing the effectiveness of secondary school administration, divided into 4 steps as follows:

Step 1 was to collect data from the model and its direct influence on secondary school administration effectiveness. Create an interview

Step 2: Interview 9 experts from 3 groups for guidelines to develop the aforementioned factors.

Step 3 Data analysis and interpretation bring the contents that have been summarized as a guideline for development.

Step 4 Evaluate the development approach the assessment uses 3 standard criteria: accuracy, feasibility, and suitability With 5 experts, data were analyzed by frequency and percentage.

Conclusion

1. The established causal relationship model of secondary school administration effectiveness in the northeastern region consisted of the following causal variables: 1) latent variables outside executive leadership in the disruption era; There were 4 variables that were observed at a high level: Big New Creative Disruptor Adapter

Idol. 2) latent variables outside the school environment and culture The average was at a high level, consisting of 4 variables that could be observed: external expectations for achieving goals; the positive atmosphere at work Emphasizing and encouraging participation and adhering to the rule of law and working as a team
3) latent variables within competencies of teachers and educational personnel in learning process management The mean was at a high level, consisting of 5 variables that were observed, namely knowledge and understanding of learning standards, techniques, and teaching methods that focused on learner quality, conducive atmosphere for learning career development and professional teachers
4) Latent variables within educational institutions of innovation using technology and information The average was at a high level, consisting of 4 variables that could be observed, namely, the structure of the school. Vision, Mission, and Strategy Allocation of learning resources with technology and information and the use of information technology and communication systems in management. The resulting internal latent variable was secondary school administration effectiveness. The average was at a high level, consisting of 4 variables that were observed: academic administration, budget management Personnel Management, and general administration.

2. The causal relationship model of administrators affecting effectiveness of secondary administration schools in the northeastern region is consistent with empirical data with statistical values measuring the harmony of the pattern, it was found that the hypothesis model is inconsistent with the empirical data. After adjusting the model, it was found that the model was in harmony with the empirical data with the statistical value measuring the model's harmony as Chi-Square = 102.02, Degree of Freedom : df = 107, P-Value = .61807 more valuable .05 shows that close fit, χ^2/df = .95,

RMSEA = 0.00, Goodness of Fit Index (GFI) = .99, Adjusted Goodness of Fit Index (AGFI) = .98, it shows that the model developed by the researcher is consistent with the empirical data.

3. Guidelines for the development of variables influencing the effectiveness of secondary school administration in the northeastern region the experts presented the following:

3.1 Leadership development for executives in the era of disruption Executives should have both science and art. Dare to think outside the box creatively. Be a good role model in every dimension. Keep inspiring others to accept change. Encourage teachers and school personnel to love educational and professional development. Give stakeholders the opportunity to participate in setting vision, goals, and strategies. It also needs to improve the management structure. Keep up with changes by using information technology, as well as dealing with the risk of changing existing processes that are inconsistent with development on the basis that management is flexible and able to achieve goals effectively.

3.2 Development of school environment and culture Administrators should take action for parents. The community trusts and expects the learning management of educational institutions. Create an atmosphere where everyone in the school trusts each other. There is a clear and concrete work motivation system. Give opportunities for all groups of people in educational institutions to participate in a co-thinking, co-operating, co-deciding, co-responsible manner, as well as participating in the evaluation By focusing on the rule of law and working as a team that will lead to the goals of the school.

3.3 The development of the competencies of teachers and educational personnel in organizing the learning process. Administrators should ensure that teachers and educational personnel have knowledge. process skills, morality, ethics, professional ethics and values; use knowledge, abilities, skills, technology to manage learning for a variety of learners Create innovative and integrative learning methods with the help of technology. Provide students with access to information resources. information and experience Provide training for learners to learn about careers Support and encourage learners to study, to learn, to seek knowledge and to learn by themselves according to their potential and hospitable. in order to achieve a truly student-centered learning management In

addition, it must be promoted and developed to measure results. Evaluate results according to real conditions that focus on the quality of learners and develop learners' potential.

3.4 Innovative educational institute development using technology and information Executives should pay attention to technology and information. Encourage teachers to use technology in learning management, create and use innovations in teaching effectively, encourage and encourage all personnel to envision the future seek new ways to solve learning management problems Encourage cooperation in the development of creation with ICT systems. Buildings, premises, and facilities are improved to be suitable for the use of ICT in all dimensions. Students are encouraged to develop ICT skills until they can use ICT as a tool to produce and present their work according to their potential and interest, student for management and learning management to be effective and achieve objectives.

Discussion

1. The causal relationship model of administrators affecting effectiveness of secondary administration schools in the northeastern region consists of the following variables:

1.1 Latent variables outside executive leadership in the era of disruption all observed variables were at a high level. It shows that executives demonstrate leadership that is not attached to the same knowledge, ideas, and processes, be a role model Suitable for an era that is changing rapidly, which corresponds to (Hoque, 2015) Said that executives must be able to deal with things that affect their work, and can provide guidance to team members. Leadership in the era of replacement by the new so it's not just the ability to bring about change. but must be able to blend that change to suit the context of the organization and in line with **(ทองพันชั่ง พงษ์วารินทร์, 2564)** said that the 5 things leaders in the disruption era must do are 1) Communicate to the point, 2) Use human resources, 3) Dare to face new changes, 4) Think more, and 5) Create your own motivation and pass that willpower to all team members To drive the team forward continuously, non-stop.

1.2 All latent variables outside the school environment and culture were observed at a high level. It shows that the management has an environment that promotes the operation, improve the teacher's work both physically mentally and socially. There is also a school culture that is like an image of the organization in line with (Hoy and Miskel, 2005) said Most good organizational cultures consist of 1) innovation, 2) stability, 3) people focus, 4) teamwork, and 5) goal-oriented. and also in line with the research of **(อิทธิพล พลเหี้ยมหาญ, 2562)** said school environment affects effective school administration It can be observed from the physical, academic, social and cultural environments of the organization.

1.3 The variables of competency of teachers and educational personnel in organizing the learning process were all observed at a high level. It shows that teachers and educational personnel have quality, knowledge, competence, skills, and good attitudes through student-centered learning management, a learning management process that gives importance to learners, which corresponds to **(พระราชบัญญัติการศึกษาแห่งชาติ, 2562)** and research of **(วิไลลักษณ์ โภคาพานิชย์, 2562)** said organization of Learning Processes Affecting Educational Management Effectiveness of Secondary Schools in the Northeastern Region As a result of teachers and educational personnel assessing learning skills according to real conditions. Analyze learning standards very well. A student-centered curriculum and teaching methods are used, along with professional development and learning resources, needs, interests, and necessities of learners.

1.4 All variables of innovative educational institutions using technology and information were observed at a high level. It shows that administrators manage systems and various resources in educational institutions to promote and support the creation of various innovations efficiently, which is consistent with the research of **(รัชพล จอมไตรคุป, 2563)** and (Dundon & Elaine, 2002) Said that an innovative organization comes from creating a shared vision and strategy for innovation. There is an environment that supports innovation. Resources

are allocated for innovation. There is a network of innovation processes, developing skills for innovation Recognize and motivate innovation, as well as encourage third parties involved to create innovations.

1.5 The administrators affecting effectiveness of secondary administration schools corresponds to **(พระราชบัญญัติการศึกษาแห่งชาติ, 2562) (ธีรพงศ์ แสนยศ, 2560) (สสิชร์ สาทรพณิชย์, 2562)** and **(ศรประภา พงษ์หัตถาศิลป์ , 2557)** said that it is a process that uses both science and art of administration to achieve the goals set by the school, consisting of 4 aspects: academic administration budget management personnel management and general administration.

2. The causal relationship model of administrators affecting effectiveness of secondary administration schools in the northeastern region is consistent with empirical data which is in accordance with the assumptions set, namely:

2.1 Executive leadership in the era of disruption directly influences administrators affecting effectiveness of secondary administration schools since the school administrator is the highest commander within the school, it will have a role in managing various resources in accordance with modern needs. If administrators have executive leadership in the era of disruption, it will result in teachers and educational personnel. The direction of operation of educational institutes in full efficiency poses administrators affecting effectiveness of secondary administration schools which is consistent with the research results of **(ทรัพย์หิรัญ จันทรักษ์, 2561)** said, technology leadership has the most direct influence on school effectiveness. and in accordance with **(ปุญชรัศมิ์ เหมบุรุษ และ วีระวัฒน์ อุทัยรัตน์, 2562)** said, the use of characteristic and behavioral leadership by high school principals in terms of the vision development, inspiration, and intellectual stimulation influences changes in the attitudes and behavior of members of the organization. Engage members with changes in the organization's key objectives and strategies. It is a model that responds to the school administration with a modern and up-to-date management method according to the standard quality criteria of the operation to develop secondary schools into high-performance organizations.

2.2 School environment and culture had a direct influence on the effectiveness of secondary school administration. Because parents and communities trust each other, schools create an atmosphere of mutual trust. There is a clear motivation to work. Opportunity for everyone in the educational institution to participate in the work. with everyone conscious of their duties and shared responsibility By focusing on the rule of law and working as a team to provide quality learners that will lead to achieving the goals of the school, which is one of the indicators of the school's effectiveness which is in line with **(สันติ สุขสัตย์, 2561)** said, organizational performance Organization of learning, commitment to the organization community involvement had a positive direct influence on school effectiveness

2.3 The competencies of teachers and educational personnel in organizing the learning process directly influenced the effectiveness of secondary school administration. Because teachers and educational personnel have knowledge process skills moral ethics Professional ethics and good values in technology-assisted integrative learning management in order to achieve truly student-centered learning management Encourage and develop the measurement Evaluate results according to real conditions that focus on the quality of learners and develop learners' potential. as part of the effectiveness of secondary school administration in line with **(สำนักแผนและประกันคุณภาพการศึกษา, 2558)** it was found that the direct influence of factors affecting school effectiveness was learning management process factors. So that all learners will receive quality educational services from educational institutions to develop knowledgeability and desirable characteristics of learners the competence of teachers and educational personnel in organizing the learning process

2.4 Innovative educational institutions using technology and information have a direct influence on the effectiveness of secondary school administration. Because executives should pay attention to technology and

information. Encourage teachers to use technology in learning management, create and use innovations in effective teaching promote and promote cooperation in the development and creation of ICT systems. There are improvements to buildings and facilities suitable for the use of ICT in all dimensions for management and learning management to be effective and achieve success. Objectives correspond to **(รัชพล จอมไตรคุป, 2563)** found that the organization of innovation had a direct influence on the performance of secondary schools in the northeastern region and in accordance with **(สันติ สุขสัตย์, 2561)** found that learning organization had a positive direct influence on school effectiveness.

3. Guidelines for developing influencing variables causal relationship model of administrators affecting effectiveness of secondary administration schools, experts offer the following:

3.1 Leadership development for executives in the era of disruption Executives should have both science and art. Dare to think outside the box creatively. Be a good role model in every dimension, inspiring to embrace change Encourage teachers and school personnel to love educational and professional development. Provide opportunities for stakeholders to participate in setting vision, goals and strategies.

3.2 Development of school environment and culture Administrators should take action for parents. The community believes in and expects the learning management of educational institutions. Create an atmosphere where everyone in the school trusts each other. There is a clear and concrete work motivation system. Provide opportunities for all groups of people in educational institutions to think together, act together, make decisions, and participate in the evaluation.

3.3 The development of the competencies of teachers and educational personnel in organizing the learning process. Administrators should ensure that teachers and educational personnel have knowledge, process skills, morality, ethics, professional ethics, and values; use knowledge, abilities, skills, and technology to manage a variety of learners' learning Create innovative and integrative learning methods with technology.

3.4 Innovative educational institute development using technology and information Administrators should improve buildings and premises to suit the use of ICT in all dimensions, paying attention to technology and information. Encourage teachers to use technology in learning management. Create and use innovation in effective teaching, and encourage and encourage all personnel to see the future.

Recommendation

This research yielded the causal relationship model of administrators affecting effectiveness of secondary administration schools in the northeastern region which is a body of knowledge that can be used as a guideline for formulating an effective school development policy and can apply the causal relationship model to make decisions about the planning for effective educational institution quality development It can be expressed as a suggestion for applying the research results as follows:

1. Office of the Basic Education Commission (OBEC) can use the research results to prepare policy proposals, education development plan Determination of criteria, guidelines, and actions related to supporting resources. setting up resource allocation and manage budgets to subsidize basic education management as well as developing the management system and promoting the coordination of the information network and the use of information technology in administration and teaching and learning.

2. The Secondary Educational Service Area Office in the northeastern region can use the research results to formulate policies, development plans and educational standards of the educational area in accordance with the policy. Educational standards, education plans, establishment of general subsidy budgets of educational institutions.

3. High School Administrators in the Northeast can use the research results to plan and direct the work of teachers and educators. The executives have to rethink and make new ones, not taking the original frame as a limitation to be used only as part of the guideline. The next part in the development of executive leadership.

It should be motivating what your management goals are, and have guidelines for self-development how to develop work to be excellent or create excellent management principles for oneself Empowering teachers and educational personnel to have the capacity to organize an integrative learning process with the help of technology, as well as supporting teachers educational personnel and learners are innovators Know how to create and use innovation from technology and information creatively, for the management and management of learning to be effective and achieve the set objectives.

An Investigation into the Perceptions of Professional learning community Experienced by Teacher under Nakhon Phanom Primary Education Service Area Office 2

Kanchana Hok-on[1]
Vijittra Vonganusith[2]
Brendan D. McKell[3]
Yatawee Chaiyamat[4]

Abstract

The purpose of this study is to examine the perceptions on professional learning community of teacher .The research used a quantitative approach with an explanatory survey conduct in Nakhon Phanom Primary Education Service Area Office 2. The target group were 305 teachers.

The instruments used in collecting data were questionnaires. Data analysis was quantitative and descriptive in the form of percentage, mean, standard deviation, The results showed that in the perceptions about professional learning community experienced by teacher was at high level ($\overline{X}$ = 4.42, S.D. = 0.64)

Keywords: teacher, **professional** learning community, perception,

Introduction

Many educational institutions are still struggling. Despite problems with the PLC loop, the academic group, or the community, it is a vital tool for encouraging students to keep learning. The PLC procedure is an invaluable resource for The modernization of the teaching workforce, which the Ministry of Education has fostered, is an important aspect of the country's future. Using the PLC method, all schools have refined the teaching profession to better facilitate student learning and institutional objectives. as a group, they take a comprehensive view of the learning process and its promotion by examining, reflecting, and criticizing their work through the lens of the concept of collective power (Office of the Basic Education Commission, 2017) When people come together, they share what they've learned in the classroom, what they've discovered in their research, what they've come up with in their creative pursuits, and how they manage the logistics A similar study by Louis and Marks (1998) looked at the effects of a PLC on student outcomes in 24 primary, secondary, and tertiary institutions by focusing on the integration of social and technical aspects of the classroom (8 of each school type). The research showed that the PLCs boosted student success and improved classroom management (Louis & Marks, 1998). Examining "learning enriched schools" with both qualitative and quantitative approaches.

All schools must adhere to the National Education Act of B.E. 2542, as amended by the Second National Education Act of B.E. 2545, as amended by the Third National Education Act of B.E. 2553, and any other applicable rules issued by the Ministry of Education. As reported by the National Education Commission's office in 2011 It is imperative that schools be structured in a way that allows students to grow naturally and reach their greatest potential. All educators have a responsibility to implement strategies that promote learning for all children in keeping with the spirit of the Act. Teachers need to be familiar with a new concept called a Professional Learning Community (PLC), which is short for a "Community of Practice" (CoP). in the role of instructor, or more generally, It's a get-together for the purpose of learning and practice. The role of the educator in the classroom, when students and teachers come together to learn from one another's experiences. Facilitate group or team projects by playing the role of a teacher. It's possible that this is a group of students from the same institution. various educational institutions.

The Professional Learning Community (PLC) is a group of people who share the fundamental belief that school staff members should aid and encourage one another to share their expertise through a process known as professional development (Well and Feun. 2007: 141). A community focused on vocational education is known as To facilitate discussion and learning, you should get together a group of educators who are interested in a specific topic and have prior experience teaching it. Talk to one another and get to know one another. Collaborate in order to purchase horses that have gained new knowledge that can be applied and adapted. a variety of circumstances and predicaments, depending on the surrounding surroundings. The collaborative environment for learning will Shift away from the typical work culture that instructors have been accustomed to. from working on their own to working together as part of a team, with a commitment to improving their academic achievement instruction in many trades for both students and teachers Students' abilities to learn are the driving force behind change. and a culture that thrives on the accumulation of knowledge Cooperation is the cornerstone of innovation and the birth of new things, which are necessary to build a community of openings. The term "professional development" refers to a community that helps teachers and teacher groups enhance their abilities, attitudes, and understanding while also stimulating their performance. It begins with methodical practice and progresses to include self-improvement. Create a learning organization that can evolve into a learning community over time. Teachers' ability to continuously learn is supported by vocational education (Pongthip Thep-Aree, 2014: 286), as is the community of vocational learners. Through the use of professional learning communities, professionalism will eventually become ingrained in the company culture that determines the overall quality of the educational institution. This will result in the creation of a school that is a happy place for students, teachers, and administrators (Wachiran Panich. 2012: 176). It is the process of bringing about change through the acquisition of knowledge through action and. providing assistance to one another and to one another with the intention of fostering the development of lead learners' learning together, setting goals The learning and monitoring of learners reflects both the learners' individual performance as well as the learners' performance as a whole, and this is accomplished through the process of exchanging and reviewing information, as well as gaining new information. Criticism Working together as a group collectively working together Strength attained through concentrating on and encouraging the process of learning in its complete context (1) According to the (Teacher and Personnel Development Foundation in 2017, 1)

As a result, educators will be required to make significant adjustments, which might be challenging; hence, they will want the assistance of a learning community. Learning for professionals, often known as Professional Learning. Community is a gathering of educators with the purpose of exchanging ideas and learning from one another about the profession of teaching. The Teacher Quality Development System, which must be supporting the formation of a community system for professional learning together, has been researched and examined by the TDRI, which stands for the For the Development of Thailand organization. (Institute of Science in Thailand for the Development of 2014: 17) Teachers will benefit from using systematic learning management since it will help them build confidence in arranging their academic courses. Learning management, both in terms of the

teaching system, as well as the implementation method, design, and growth of teaching, which will effect the teaching of teachers in organizing Learning or planning for learning management. Learning management Users have the option of utilizing theories, principles, conceptions, or determinations in their work. Both the material being taught and the capabilities of the students are taken into consideration while developing the instructional philosophy. detailing the circumstances around the organizing Learning to take use of each other first and foremost, then selecting from a variety of teaching formats, teaching methods, and teaching techniques, or employing a teaching approach that is a blend of several teaching approaches (Pampan Dechakupt. 2008: 17-18) Using the idea of a professional learning community in the classroom as a means to effect positive change in one's life. Make new connections and establish a community or support network to facilitate conversation and assistance. The work that teachers do will change, as will the atmosphere at school, which will become a place where everyone can find happiness. The culture of the school is a reflection. new concepts as well as adjustments to the way the instructor acts The relationship between the teachers' collective effectiveness and A community of vocational learning has resulted in students achieving better academic performance. This relationship was influenced by dialogue to assist students in teacher-teacher career development in schools (Gilrane and others. 2008: 101), and as a result of this dialogue, teachers' collective effectiveness increased. (Calcasola. 2009: 137) Additionally, the management of a vocational learning community is an opportunity for one's professional development (Morrow. 2010: 89). a group dedicated to the advancement of vocational training Careers will transform students. consistent throughout the teachers, administrators, and schools (Wachiran Panich. 2012: 191)

According to the findings of the study, the researchers believe that a strategy for the development of teachers that organizes conceptual learning should be developed. Learning community for educational institutions that focuses on professional development and is a process A new school in which teachers can interact with one another to discuss, share, and gain knowledge from their experiences in performing the responsibilities that teachers make horses that have new information. to be applied and adapted with the intention of having an impact on scientific competence vocational training for teachers and the education of students. A researcher who is responsible for guiding teachers and providing consultations to teachers in the Nakhon Phanom Primary Education Service Area Office 2 interested in conducting a survey to investigate how instructors affiliated with the Nakhon Phanom Primary Educational Service Area Office 2 feel about the idea of a professional learning community, which will directly effect the organization's ability to continue to grow and evolve. in order for educators working in educational institutions to be able to perform their jobs in an effective and professional manner. to discover methods that would enable future teachers to be more efficient and effective in their work.

Research Objective

To investigate the perceptions of Professional learning community experienced by teachers the Nakhon Phanom Primary Education Service Area Office 2

Research Methodology

Participants

The participants in this research consisted of 305 teachers of primary schools in Nakhon Phanom Primary Education Service Area Office 2 The sample size was employed by Krejcie and Morgan table (Krejcie & Morgan, 1970 pp.608-609) that calculated the sample by proportion of teachers in each school. Then, stratified random sampling and simple random sampling were applied.

Measures

The instrument used in this study was a questionnaire comprised 2 parts consisted of background data of the participants and the characteristics of professional learning community of schools.

Part 1

It was the list to inquire general data of the participants that consisted of work position, school size and work experience.

Part 2

It composed of the rating scale questions that was created along Likert rating scale (Likert, 1967) to inquire the characteristics of professional learning community of schools with the reliability of The component of professional learning community consisted of 1) shared vision 2) collaborative teamwork 3) shared leadership 4) professional learning and development 5) caring community and 6) supportive structure

Procedure and design

This study was a survey research collecting data by a questionnaire. The data was collected by google form after the researcher sent the link to target school.

Statistical analysis

The data was analyzed by using Statistical Package for the Social Sciences: SPSS. The descriptive statistics was applied for frequency, percentage, mean, standard deviation.

Conclusion

The research results are shown as followed:

The perceptions of professional learning community experienced by teachers in Nakhon Phanom Primary Education Service Area Office 2 were at a high level ($\overline{X}$ = 4.42). When considering each aspect, Supportive structure ($\overline{X}$ = 4.64) was rated at the highest level followed by Collaborative Teamwork ($\overline{X}$ = 4.58), Professional learning and development ($\overline{X}$ = 4.47), Shared Leadership ($\overline{X}$ = 4.35), Caring community ($\overline{X}$ = 4.29), and Shared Vision $\overline{X}$ = 4.23) respectively as shown in Table 1

Table 1: The analysis results of components of the professional learning community experienced by supervisors.

Components	Awareness Level		
	$\overline{X}$	S.D.	Level
1) Shared Vision	4.23	0.75	Hight
2) Collaborative Teamwork	4.58	0.61	Highest
3) Shared Leadership	4.35	0.60	Hight
4) Professional learning and development	4.47	0.71	Hight
5) Caring community	4.29	0.68	Hight
6) Supportive structure	4.64	0.49	Highest
Average Score	**4.42**	**0.64**	**Hight**

Table 1 shows the analysis results of components of the professional learning community experienced by teachers in Nakhon Phanom Primary Education Service Area Office 2.It shows that the perception on the professional learning community by supervisors in Nakhon Phanom Primary Education Service Area Office 2 at the high level.

Discussion

The perception of professional learning community experience by experienced by teachers in Nakhon Phanom Primary Education Service Area Office 2 were rated in high level in overall and each aspect.

This because the professional learning community to develop education is the duty of the supervisor who have to collaborate and join forces to learn. To help every student grow to their full potential. Including teachers and administrators in educational institutions increase their professional expertise at the same time. There are important principles. The goal is the learning of the learners, the cooperation of all personnel. work culture joint learning exchange Teachers and administrators have developed their own professional and communication and Work is creative. For important concepts, focus on the learning quality of all students. The learning process is a collaborative learning. joint exchange to learn more professional advancement for stakeholders and the creation of an organizational learning culture (DuFour, 2004).

The results of this research are consistent with previous research that has studied the learning community process. It was found that the concepts and principles of professional learning communities in 6 components, i.e. shared vision collaborative teamwork shared leadership professional learning and development caring community and supportive structure (Suthiphon Khanom, 2018 ; Sakchai Phucharoen, 2014 ; Hord, Roussin and Sommers, 2009 ; Woralak Chukanert, Ekarin Sangthong and Chavalit Kerdthip, 2014 ; Sergiovanni, 1994 ; Hargreaves, 2003 ; Stoll and Louis, 2007 ; DuFour, 2006 ; Kotter and Cohen, 2002 ; Olivier and Hipp, 2006 ; Thompson, Gregg and Niska, 2004 ; Boyd, 1992 ; Eastwood and Louis, 1992 and Suraphon Thamromdee et al. (2010).

The. educational management in the responsibility of Nakhon Phanom Primary Education Service Area Office 2 in order to get employment, will work to establish a community that emphasizes vocational education. The necessary learning network from the compiler is generated as a result of the application of education management by teachers. Why exactly is it considered a learning community This is in line with the findings of the research done by Peyanat Kusumal (2017: 107-111) To be able to keep their jobs, teachers need to participate in ongoing professional development courses, as this is an essential tactic that fosters the development of their careers. and manage learning to be more efficient and effective by allowing teachers to work and development approach using the concept of a professional learning community in manage learning for educational institutions is to promote, support, and create understanding among teachers in schools manage learning to be more efficient and effective by allowing teachers to work on their own regarding the concept of a learning community and the professional learning community, as well as the management of the learning process In order for educational institutions to reach the same level of knowledge and comprehension, as well as to organize teachers so that they may manage and learn together, professionals are required. In order to manage learning effectively, it is important to implement teacher development based on the idea of a professional learning community. It is the responsibility of educational institutions to foster, assist, and develop an understanding among instructors working in schools. Regarding the concept of a learning community and the professional learning community, as well as the management of the learning process To ensure that educational institutions all have the same level of knowledge and comprehension, and to organize instructors so that they can learn together professionally. In order to manage learning for educational institutions, it is important to implement teacher development by utilizing the concept of a professional learning community. The findings of research conducted by Mintra Laisnitserikul (2014: 397-40 1) on management strategies schools to become a community of professional learning of secondary schools in Benjaburapha University Bangkok found that the current state of school administration of secondary schools in Benjaburapha Campus Bangkok in every respect and in every aspect. The application side of things was handled really well. In line with the findings that Papavee Pipatlak (2014: 164-166) has uncovered through their investigation. Building a professional learning community requires strategies for the development of sustainable leadership

among co-educational school administrators. These strategies should be based on the concept of sustainable leadership. Join the concept of sustainable leadership, it was discovered that the current status of executive leadership school research. to significantly enhance the total capacity of the professional learning community at the level It was discovered that the factor with the highest mean is Learning and Professional Growth, which indicates that instructors exhibit behaviors that are reflective of learning and professional development. This was discovered across the board. Consistent with what Wijarn Panich (2012 p:135) says about the importance of having similar ideals and a shared vision in order to learn together, as well as bring things learn to creatively apply together. Consolidation in this form is analogous to a rod pushing force that is exerted by the demands and interests of members of the professional learning community for the purpose of learning and professional growth in the direction of student learning standards. According to Woralak Chukanerd (2014: 99-100), it is advantageous to serve as a Kanlayanamit for your community. The essence is to place an emphasis on cultivating a happy community in the workplace as well as in daily life, and to do so in conjunction with a "open culture" in which everyone is free to express themselves. The act of freely expressing one's opinion is a form of liberty, and it creates a place that provides a feeling of safety or liberation from oppressive power when it is founded on trust, respect, and the ethics of generosity. In terms of ethics, the collective values held by the group's members Dedicated to professional work while maintaining a good attitude toward education and the students who will benefit from it. Thapakorn Udomsri (2015:313) Because of the concept that human development can be affected by personal leadership, administrators and educators are aware of and pay priority to the development of personal leadership. Contributes to an increase in the effectiveness of operational efficiency since, even so, how efficient will management be? How cutting-edge the technology is, but it will not be used in any way. The availability of human resources is the most crucial aspect, and without it, it will not be possible to attain the results that have been wanted. Knowledge, knowledge, and abilities adequate for moving the system ahead in a forward-looking direction.

Recommendation

The further research should study factors that affect professional learning community of schools to seek factors to predict professional learning community of schools and support professional learning community building. Moreover, the research should develop the ways of building professional learning community to guide schools create professional learning community clearly.

The Causal Relationship Model of Internal Quality Assurance Operational Effectiveness of the Small Sized Primary Schools in the Northeast

Khuanjai Wongsuwan[1]
Sikan Pienthunyakorn[2]
Sawat Phothiwat[3]

Abstract

The purpose of this research were to 1) study effectiveness of internal quality assurance operations in the small sized primary and causal factors chosen to study, 2) examine the consistency of the causal relationship model of internal quality assurance operational effectiveness of the small sized primary schools developed to empirical data, 3) to establish the guidelines for developing factors affecting the internal quality assurance operational effectiveness of the small sized primary schools. The three-phase research was conducted: Phase 1 was constructing the causal relationship model, step 1 was analysis of documents and relevant research studies, and step 2 studied from experts. Phase ll involved the validation of a causal relationship model with empirical data. Research population were the small sized primary schools in the Northeast 7,231 schools in the 2021 academic year. The subjects were drawn from 360 small primary schools under the OBEC in the 2021 academic year. The two respondents were selected from each school using a multi-stage random sampling, yielding a total of 720 respondents, including 360 school administrators and 360 teachers. The findings were as follows:

1. Effectiveness of internal quality assurance operational effectiveness of the small sized primary schools was high mean scores ranking. Causal factors chosen studied was high mean scores ranking, with mean scores ranking from high to low in descending order as follows: personnel attributes, working environment, corporate culture, and leadership of school administrator.

2. The developed causal relationship model of effectiveness of small primary schools was consistent with the empirical data : Chi-square of 51.66, degrees of freedom (df) of 40, the relative chi-square value $\chi 2/df$ of 1.29. Consequently, p-value of 0.102, Root Mean Square Error of Approximation (RMSEA) of 0.02, Adjusted Goodness of Fit Index (AGFI) of 0.97, Critical N (CN) of 876.94, Comparative Fit Index (CFI) of 0.99, Root Mean Squared Residual (RMR) pf 0.01, and Alpha Coefficient (R2) of 0.86.

3. The guidelines for developing factors effectiveness of internal quality assurance operational of the small sized primary schools. The four factors that had the direct influence on the effectiveness of internal quality assurance operational of the small sized primary schools shorted in descending order as follows: Leadership of school directors is directors must develop leadership through training or development using innovations, programs, and research, Personnel attributes to Raise awareness among personnel about the value and importance of internal quality assurance operations, Working environment must be developed, improved, clean, beautiful, safe, sufficient to meet the needs, and Corporate culture is foster a culture of engagement in the workplace.

Keywords: The Causal Relationship Model, Effectiveness of Internal Quality Assurance Operational

Introduction

The Ministry of Education has issued the Ministry of Education Quality Assurance Regulation B.E. 2561 dated February 20, 2018. The guidelines are implemented in accordance with the Ministerial Regulations on Systems. The criteria and methods of quality assurance of education B.E. 2553 (2010) are inconsistent with the actual principles of quality assurance of education. As a result, internal and external quality assurance operations are irrelevant. There is duplication and misunderstanding of practice. This does not reflect reality and creates a burden on educational institutions and school personnel, as well as affiliated agencies, regulatory agencies, and external agencies more than necessary. Criteria and methods for ensuring the quality of education, In order to have a mechanism of conduct that is conducive to the implementation of the educational standards of each level and to be effective in improving the quality of education, it is necessary to issue this Ministerial Regulation. (Ministry of Education, 2018, p. 5) In addition, the Ministerial Regulations ensure the quality of education. The 2018 Act defined "quality assurance of education". It is an assessment and monitoring of quality in accordance with the educational standards of each level and type of education, with mechanisms for controlling and monitoring the quality management system of education held by the educational institutions. To develop and reassure stakeholders and the public that the school can manage quality education in accordance with educational standards.

Quality assurance within educational institutions is developed to ensure that all levels of education management are of high quality and that basic educational standards are maintained. By assessing and monitoring the quality of schools in accordance with basic education standards, which are consistent with Rattinan Thaweesuksang (2014, p. 14) said: Quality assurance within the school means that the school administration process must be carried out continuously to improve the quality and standards of education and ensure that the learners have good quality that meets the needs of the community. And in line with Thanarat Srikong (2015, p. 24), it has been concluded that quality assurance within a school means conducting an evaluation. Monitor and monitor the quality and standard of education to continuously improve the quality of learners to ensure direct access to educational services. Therefore, internal quality assurance is a management process to monitor and control the quality in school education management. The internal quality assurance system is a system in which educational institutions reassure their clients, ruler communities, as well as organizations or establishments that accept students for further study or work. The school can manage the quality of education in accordance with the standards set by the school. Graduates are knowledgeable, skilled, and have desirable attributes according to the curriculum and society expectations. Be able to live happily in society as well as benefit families and communities as appropriate.

Internal quality assurance operations in small elementary schools; It found that small elementary schools had more quality assurance operational problems than medium and large elementary schools, due to restrictions on both personnel and budget to support. As a result, smaller elementary schools face staffing problems in schools that lack knowledge and understanding of the principles of standardization of education. Information preparation lacks of implementation of the school's educational management development plan. Supervision Checks the quality of education, lack of continuity. Also, the personnel have a lot of workload. Teachers also lack the know-how. In line with Chittawimon Supan (2013, pp. 65-66) states that the operational problem of internal education quality assurance, in terms of setting educational standards, is a personnel problem in the premises. The study lacks knowledge and understanding about the principles of standardization of education in the preparation of educational management development plan, the problem of personnel in educational institutions lacking knowledge and understanding about the preparation of educational management development plan of educational institutions. Management and information management is a problem of personnel in educational institutions lacking knowledge and understanding in the preparation of system databases.

So, to know what are the causal factors affecting the effectiveness of internal quality assurance operations for small elementary schools in the Northeast and to benefit the school, learners, teachers, parents and all stakeholders we are therefore interested in studying the causal relationship model of internal quality assurance operational effectiveness for small elementary schools in the Northeast. The results of the research will be useful for school administrators to effectively use in internal quality assurance. Effectively, taking into account the standardized quality in accordance with the educational quality assurance guidelines set out in the National Education Act, there is a real improvement in the quality of education.

Research Objective

1. To study the level of effectiveness of internal quality assurance operations of small elementary schools in the Northeast, and the causal factors chosen to study.

2. To determine the harmonization of the causal relationship model of effectiveness, the internal quality assurance operations of small elementary schools in the Northeast developed with empirical data.

3. To find ways to develop factors that directly affect the effectiveness of internal quality assurance operations of small elementary schools in the Northeast.

Research Methodology

1. Populations and samples in research.

1.1 The population in this research is a small elementary school affiliated with the Office of the Basic Education Commission in the Northeast. In the 2021 academic year, there were 7,231 schools.

1.2 The sample was 360 small elementary schools. Each school has 2 students consisting of school administrators. 1 person and teacher in charge of quality assurance in the school A total of 720 respondents were selected using a sample by a Multi-Stage Random Sampling.

2. Variables used in the research include:

2.1 External latent variables, which are causal variables, include school directors leadership and the work environment.

2.2 Internal latent variables include personnel attributes and organizational culture, which are interstitial variables, and internal quality assurance operational effectiveness, which are result variables.

3. Research Conceptual Framework.

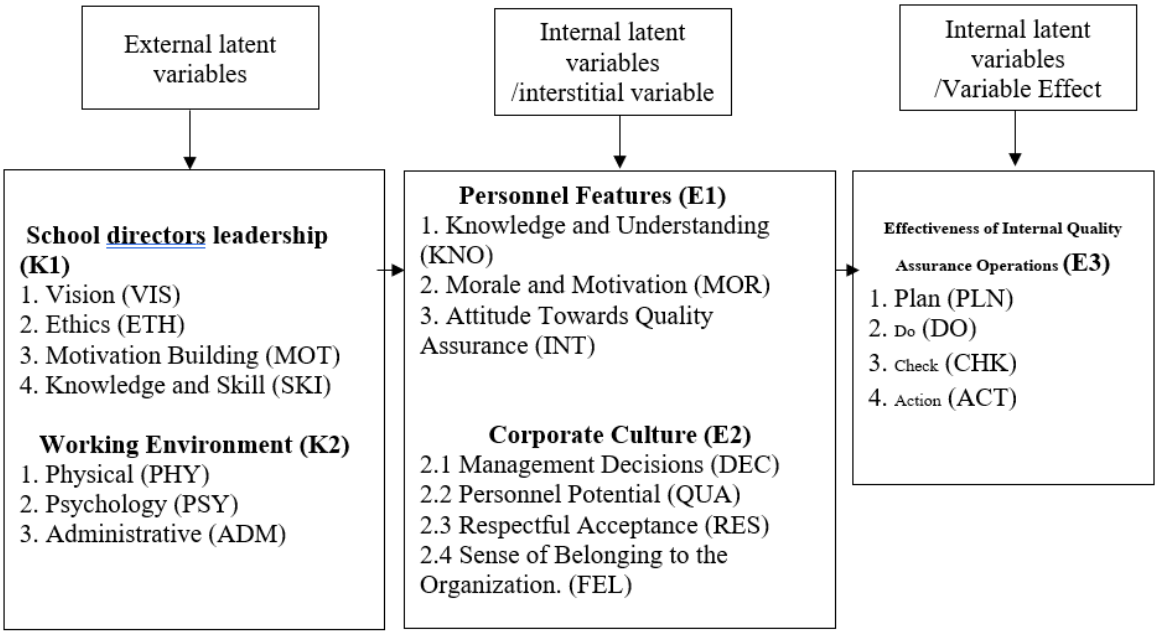

Illustration 1 Research Conceptual Framework.

4. Research tools.

Expert interviews, questionnaires with five levels of estimation: most, very, medium, few and least.

5. Research phase.

The research is divided into 3 phases:

Phase 1 modeling hypotheses, with the following steps: Step 1 Document study and analysis. Step 2 Learn from experts.

Phase 2 Verification of conformity with empirical data Analyze data using SPSS and ready-made programs LISREL, which is quantitative data analysis by advanced statistics.

Phase 3 Finding ways to develop factors that directly affect the effectiveness of internal quality assurance operations of small elementary schools by discussing small groups with experts, 2 groups of 8 people each. Group 2 is the teachers responsible for the internal quality assurance operations of small elementary schools.

Conclusion

1. Effectiveness of internal quality assurance operations of small elementary schools. In the Northeast there is a high level of averages, and the causal factors chosen for study are very average. By ordering the average in descending order as follows Personnel features Have an average ($\bar{x}$ = 4.46) working environment. There is an average ($\bar{x}$ = 4.42), an organizational culture, an average ($\bar{x}$ = 4.17), and school directors leadership. There is an average ($\bar{x}$ = 4.16) respectively.

2. A causal relationship model of the effectiveness of internal quality assurance operations of small elementary schools. In the northeastern created It is consistent with empirical data, with statistical values measuring the harmony of the pattern: chi-square is 51.66, at degrees of freedom (df) is 40, χ2/df is 1.29, probability (p-value) is 0.102. The quadratic root tolerance estimate (RMSEA) is 0.02, the harmonization index (GFI) value is 0.99, the revised harmonization index (AGFI) value is 0.97, the critical sample size (CN) value is 876.94, the comparative conformity index (CFI) value is 0.99. And the index value of the remaining average quadratic root (RMR) is 0.01, and the forecast coefficient (R2) of the internal latent variables is found to be equal to 0.86, indicating

that the variables in the model can explain the variability in the effectiveness of internal quality assurance operations of small elementary schools. In the Northeast, it's 86 percent. As shown in Table 1 and Illustration 2.

Table 1 Statistical values measure the consistency of patterns with post-modulated empirical data.

Index	Acceptance level	Statistics obtained	Result
1. Chi-square	p-value >.05	χ^2=51.66 p =0.1023	passed
2. χ^2/df	< 2.00	1.29	passed
3. GFI	**> .90**	0.99	passed
4. AGFI	**> .90**	0.97	passed
5. RMSEA	**< .08**	0.02	passed
6. CN	**> 200**	876.94	passed
7. CFI	**> 0.90**	0.99	passed
8. RMR	**<.08**	0.01	passed

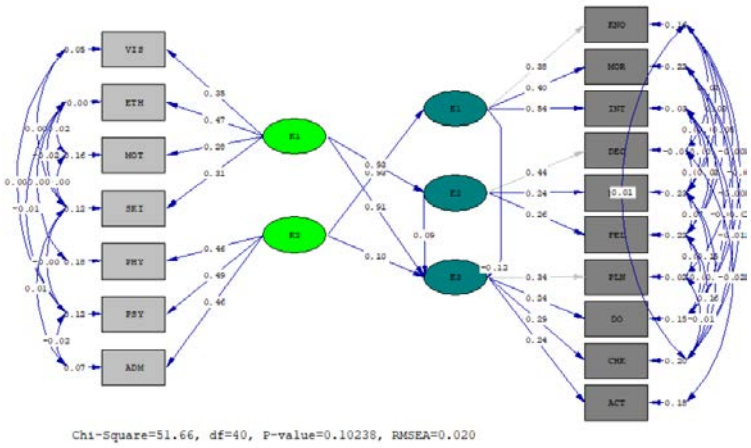

Illustration 2 Results of pattern analysis with post-modulated empirical data.

The researchers used data from the conformity of correlation patterns, the linear structure of factors affecting the effectiveness of internal quality assurance operations. After adjusting the model, using LISREL version 8.52, rearrange the model to show the path of influence more clearly. As illustrated 3.

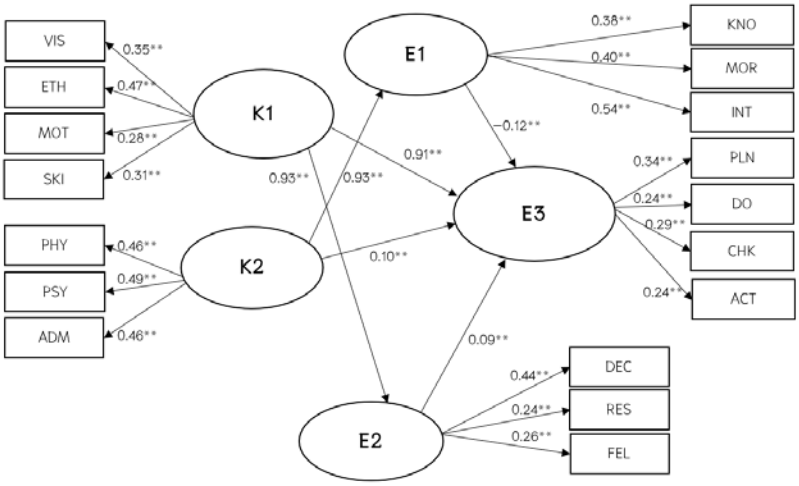

Illustration 3 Results of conformity checks of correlation patterns, linear structure of factors affecting the effectiveness of quality assurance operations within small schools. After adjusting the model.

3. Guidelines for developing factors that directly affect the effectiveness of internal quality assurance operations of small elementary schools in the Northeast.

3.1 School directors must develop leadership by training or development using innovations, programs, research in the areas of vision, morality and ethics, knowledge and skills, and motivation to work. The administration must emphasize participation so that everyone can participate in the operation. Operations must operate in a PDCA quality cycle model.

3.2 Approaches to the development of work environment factors Studying work from successful organizations, having best practices, the physical environment needs to be developed. The project should be developed to improve and develop the environment and encourage cooperation in the work both school and community personnel or related agencies.

3.3 Guidelines for the development of personnel attribute factors Raise awareness of the value and importance of internal quality assurance operations and develop personnel to have knowledge, understanding and skills to work. Strengthen the morale and motivation of the staff, and the school management should manage by emphasizing the participation of all personnel so that everyone can participate in thinking, participating, and evaluating.

3.4 Guidelines for the development of organizational culture factors to promote a culture of participation in work. Provide personnel with the opportunity to express their opinions on internal quality assurance operations, and to cooperate and promote the participation of school personnel themselves. Cooperation from the community and related agencies Prepare a manual for the internal quality assurance operation of the school to guide the work of personnel or to guide personnel to study and understand the internal quality assurance operation more, and use the results of the previous year to plan improvements and developments for greater efficiency and effectiveness in the following year.

Discussion

1. Effectiveness of internal quality assurance operations of small elementary schools. And the causal factors chosen to be studied appear in the research that led to the discussion as follows.

1.1 The latent variables within the effectiveness of internal quality assurance operations that are result variables consist of four observable variables: planning, implementation, evaluation, and improvement and development. As a result of the Ministry of Education Quality Assurance Regulation B.E. 2561 No. 3, each educational institution shall establish a system of quality assurance within the educational institutions by setting

the educational standards of the educational institutions to meet the standards of each level and type of education announced by the Minister of Education. This is in line with Bhumi Prasad (2014, p. 241), which has concluded that the effectiveness of internal quality assurance operations in small primary schools as a whole is very average and all variables are very average. In line with Adul, Sucheram (2012, p. 108), conducting a study to develop a model of internal quality assurance effectiveness of basic educational institutions, found that the internal quality assurance effectiveness model of basic educational institutions, in terms of the internal quality assurance system of educational institutions based on the opinions of administrators and teachers as a whole, was very high. On a case-by-case basis, it was found that it was very high in all of them.

1.2 Latent variables outside of school directors leadership consist of four observable variables: vision, morality, morality, motivation, and overall knowledge and skills. This is because school administrators are critical in successfully managing small schools with staff and budget constraints. Management requires knowledge. Very high ability and potential in management. In line with Pattanan, Hansaphiromchok (2014, pp. 95 - 108) concluded that the analysis of research on leadership versus the effectiveness of small schools. Effective leadership attributes of outstanding school administrators include 1) vision, 2) knowledge and skills, 3) personality, 4) morality and ethics, 5) learning management, 6) team development, and 7) community development and engagement. In line with Komsart Wish Suk (2015, p. 125), it has been found that there are four effective leadership elements of small school administrators: 1) vision, 2) participatory management, 3) motivational enhancement, and 5) focus on outcomes.

1.3 Latent variables outside the work environment consist of three observable variables: physical, mental, visual, and administrative, collective and individual. The assembly is average to a considerable extent. As a result, the school's internal quality assurance operations must constantly improve and develop the school environment and resources in order to pass the assessment program, resulting in a large level of operation. In line with Vilailak Phokapanich (2019, p. 178) concluded that the causal factors influencing the effectiveness of secondary school education management in terms of the environment are very high. When considering the list of elements, it was found that there was a large level of all elements. In line with Sukrit Anubut (2012, p. 9) studied the arrangement of an environment conducive to the management of education in the army's primary schools. There are 4 aspects: 1) physical, 2) administrative, 3) teaching and learning, and 4) social.

1.4 Latent variables within personnel attributes consist of 3 observable variables: cognition; Morale and motivation, and attitudes towards quality assurance, are averaged at a very high level. Because small schools have staffing restrictions, there are not enough personnel. Therefore, everyone is involved in the work in order to achieve the objectives. In line with Mahdi Vadramae (2013, pp. 64-69), it has been concluded that personnel attribute factors refer to factors that characterize executives and personnel in educational institutions that are conducive to the implementation of quality assurance within the educational institution. Attitude towards quality assurance, operational motivation and according to the results of the analysis, the characteristics factors of the personnel. There are averages, both overall and individually, at a very high level. In line with Mayuri Ubiquitous (2018, p. 28), it analyzes the factors affecting the administration of quality assurance in small schools. It was found that personnel characteristics factors consist of observable variables such as learning and understanding about quality assurance. Operational motivation, quality assurance and attitude to quality assurance.

1.5 The underlying variables in organizational culture, consisting of three observable variables: executive decisions, respectability, and feelings of belonging to the organization. Due to the context of small schools, the culture of work is a family coexistence. There is a bond, a unity, a culture of organization for everyone to participate in the work. There is respect for the elders, the sacrifice, and the sense of belonging to the organization. In line with Naowarat Sirimethangur (2019, p. 202), it has been concluded that the causal factors in

organizational culture are very high. When considering the list of elements, it was found that it was at a considerable level in all elements. Corresponded to. Karun Bubba (2016, p. 96) outlines the elements of organizational culture, including 1) partisanship, 2) organizational aspirations, 3) diversity of personnel, 4) quality of personnel, 5) reliability, 6) empowerment, 7) executive decision-making, 8) respect, 9) integrity, and 10) generosity.

2. A causal relationship model of the effectiveness of internal quality assurance operations of small elementary schools. It is consistent with empirical data. The discussion can be as follows:

2.1 Latent variables outside school directors leadership It has a direct and indirect influence on the effectiveness variables of internal quality assurance operations and is the most influential factor. Because having leadership in the school directors will give subordinates faith. Be confident, respectful, and be a consultant to personnel when things happen, helping to solve problems that arise. School directors leadership can also help coordinate conflicts or promote and motivate personnel. Leaders can motivate, guide, push other people or groups of people to be willing and active in doing things with group or school success as a goal. In line with Pattanan, Hansapiromchok (2014, pp. 95 - 108) has provided ideas on how to improve the quality of small schools in the community. The success factor is that management has leadership. In line with Chaiwat (2010, p. 136) concludes that the causal variables that influence quality assurance success are the most influential executive leadership variables. It has a direct influence on quality assurance success with an influence magnitude of 0.52.

2.2 Latent variables outside the working environment There is a direct and indirect influence on the effectiveness variables of internal quality assurance operations, as a good work environment will result in a successful job. A good physical environment that is beautiful, clean, fresh, safe, has a comfortable resting place, it affects the mind of the operator, helps to increase the satisfaction of work and makes it happy to perform the work. When you're happy, it increases operational efficiency. In line with Sikan Pienthunyakorn (2018, p. 202), it has been concluded that the working environment Factors and elements that surround the practitioners in the agency, which affect the person in the agency physically, mentally, physically, mentally. Emotionally, socially, divided into physical work environments. Social and psychological aspects good place to work There are equipment to facilitate work. Having a good working atmosphere will result in a good mental and emotional state, which results in good work as well.

2.3 Variables within personnel attributes There is a direct influence on the effectiveness variables of internal quality assurance operations in a negative direction, since the attributes of personnel contribute significantly to the operation of internal quality assurance. Assisting each other in operations Personnel must have knowledge and understanding of internal quality assurance, as well as good morale and motivation in order to affect good performance, and must have a positive attitude towards internal quality assurance work. Therefore, management must be prepared for personnel to have such attributes, but they should act at a fair and appropriate level. Because personnel attributes have the opposite influence on the effectiveness of internal quality assurance operations. If it is overdeveloped, it will pull teachers out of classrooms and schools. The small number of personnel in small schools, if they still have to go to self-improvement several times or several days, may not have time to develop other tasks, including internal quality assurance work. In line with Pornchai Bualuang (2012, Abstract), it has been concluded that the internal quality assurance approach is that all school personnel must work together as a team. Have the right knowledge and understanding of internal quality assurance. Educational institutions should prepare their personnel by raising awareness of the value of internal quality assurance. Educational institutions should have workshops on internal quality assurance with personnel attending meetings. Educational institutions should be equipped with personnel to appreciate internal quality assurance. In line with Adul, Suchiram (2012, p. 8) concluded that based on the results of the data analysis, personnel variables in organizations exert the highest direct influence on the internal quality assurance effectiveness variables of basic education institutions.

2.4 Latent variables within the organizational culture have a direct effect on the effectiveness variables of internal quality assurance operations, since organizational culture is an important part of helping people in the organization to have values. Therefore, organizational culture is an important part of advancing the school's operations and achieving the objectives or goals set. In line with Rajpol, Marshal Trikup (2020, p. 238) concluded that organizational culture has a direct influence on the effectiveness of secondary schools. Organizational culture is responsible when shared beliefs and values drive schools to do the right thing for school success. Being an organization of innovation gives schools a competitive advantage. Innovation in schools Teachers are individuals of learning. Students can work as a team, be friendly with each other. This is one indicator of school effectiveness. In line with Chaiwat Prasongsang (2010, p. 136) concludes that cultural variables and work atmospheres have a direct influence on quality assurance success with an influence magnitude of 0.20.

Recommendation

1. The Office of the Basic Education Commission should promote personnel support and budget and supplies to adequately small schools. School administrators have direct, indirect, and indirect influence. The highest total influence on the effectiveness of internal quality assurance operations, so executives should be encouraged all schools.

2. School district offices should focus on executive leadership development. should management developed by training. Seminars, group discussions, job visits to develop executive leadership at the school district level.

3. School administrators should develop leadership to build faith, confidence in schools should build. Motivation to work for personnel to develop the appropriate working environment. Create a corporate culture of participation.

4. Administration of small schools under resource constraints Executives should choose to develop variables. School directors leadership is primarily because it is a direct influence variable. Indirect influences and maximum total influences.

The Causal Relationship Model of Effectiveness of Opportunity Expansion Schools in The Upper Northeast.

Sabaiporn Phongsart[1]
Sikan Pienthunyakorn[2]
Sawat Phothiwat[3]

Abstract

The purpose of this research were to 1) study effectiveness of opportunity expansion schools in the upper Northeast and causal factors chosen, 2) to examine the consistency of the causal relationship model of Effectiveness of opportunity expansion schools in the upper Northeast developed to empirical data, and 3) to establish the guidelines for developing factors effectiveness of opportunity expansion schools in the upper Northeast. The three-phase research was conducted: Phase I was constructing the causal relationship model. Phase ll involved the validation of a causal relationship model with empirical data. Phase lll to establish guidelines for developing factors effectiveness of opportunity expansion schools in the upper Northeast. Research population were the opportunity expansion schools in the upper Northeast 794 schools in the 2021 academic year. The subjects were drawn from 433 opportunity expansion schools in the upper Northeast in the 2021 academic year. The two respondents were selected from each school using a multi-stage random sampling, yielding a total of 866 respondents.

The findings were as follows:

1. The effectiveness of opportunity expansion schools in the upper Northeast was high mean scores ranking. Causal factors chosen studied was high mean scores ranking, descending order as follows: teacher competencies, leadership of administrators, parental and community cohesion.

2. The effectiveness of opportunity expansion schools in the upper Northeast was consistent with the empirical data : Chi-square of 70.96, degrees of freedom (df) of 66, the relative chi-square value x^2/df of 0.27, p-value of 0.316, Root Mean Square Error of Approximation (RMSEA) of 0.01, Adjusted Goodness of Fit Index (AGFI) of 0.98, Critical N (CN) of 1166.725, Comparative Fit Index (CFI) of 1.00, Root Mean Squared Residual (RMR) pf 0.01. and $R^2$of .993

3. This research proposed the guidelines for developing factors effectiveness of opportunity expansion schools in the upper Northeast. The four factors that had the direct influence on the of opportunity expansion schools in the upper Northeast shorted in descending order as follows: teacher competencies, leadership of administrators, parental and community cohesion.

Keywords: Effectiveness, Opportunity Expansion Schools

Introduction

Education is an important factor in human development towards physical, mental, knowledge, morality, skills, critical thinking. Ability to work as well as be able to bring the education received to benefit society and the nation. Schools are an important source of learning in developing and producing individuals to their potential. To use the quality personnel resources obtained from school production to develop the nation. Able to compete economically, politically, and technologically with other countries (Rajpol Jomtraikup, 2020, p. 2).

Section 22 of the National Education Act on Education Management says education must be based on the principle that all learners have the ability to learn and develop themselves. The educational process must encourage learners to develop naturally and reach their full potential. The government has seen the importance of young people being educated to their full potential. Educational Opportunity Expansion Schools were established, with educational opportunity extension schools first emerging under the Compulsory Education Expansion Pilot Program. It offers junior high school classes in elementary schools across the country for the first time. 119 schools according to a cabinet resolution dated May 23, 1990.

The implementation of educational arrangements in schools expands the educational opportunities of the Office of the Basic Education Commission. In all sectors, there are similar problems: 1) the placement of teachers in most classes does not match the majors studied; It is necessary to arrange for teachers to teach in subjects where there is a shortage of teachers. This causes teachers to lack confidence, which has an impact on the quality of education. Teachers lack understanding of the curriculum. Subject content Organizing teaching and learning activities Secondary school measurement and evaluation. Some teachers have long stuck with the method of teaching at the elementary level. 2) Teachers have a large teaching burden as they are responsible for both primary and secondary school students. 3) There is a shortage of certain teaching and learning equipment, such as scientific equipment, equipment used in language laboratories, etc. (Patcharin Kotsombat, 2015, p. 213).

School administration expands that effective and productive educational opportunity. It requires the school as the base of all aspects of management. Whether it's decentralization of administration, where the agency that influences students is the school, the school thinks and plans for itself, manages, corrects, decides, and takes responsibility for itself. At the same time, it provides a common stakeholder, namely students. ruler Community School Administrators Teachers and school personnel are involved in planning, managing, and sharing responsibilities.

Given the circumstances, the school's educational management expands such educational opportunities, suggesting that the quality of educational management of the basic educational institutions. In particular, schools expanding educational opportunities must be urgently implemented in terms of producing learners for higher academic achievement, particularly those in the Upper North East, which are unique from other regions, i.e., almost all of them are provinces along the national border. Most parents of students are employed in the daily employment category based on the minimum wage. Some were farmers on no more than one acre of land, which did not have sufficient funds to bring their children to prestigious schools far from residential communities. While some student parents earn a lot from working abroad, they do not have enough time to send their children to schools outside their community. As a result, students in the school expand their chances of obtaining an education that is comparable to that of a reputable school. It is necessary to develop students to have attitudes, life skills, career skills, and to adapt education patterns to keep up with educational reforms and social changes. Economy, Politics Governance, as well as local contexts, will have many factors affecting each other.

From such problems, The researchers were therefore interested in studying the causal relationship model of school effectiveness in the Upper Northeast, in order to identify the causal factors that contribute to school success or effectiveness to be used to improve and improve the quality of education management in schools.

Research Objective

1. To study of school effectiveness, expanded educational opportunities in the Upper Northeast, and the causal factors studied.

2. To examine the causal relationship model of school effectiveness, expanding educational opportunities in the Upper Northeast developed with empirical data.

3. To find ways to develop factors that directly affect school effectiveness, expand educational opportunities in the Upper Northeast.

Research Methodology

1. Populations and samples in research.

1.1 The population used in this research includes 794 schools expanding educational opportunities in the Upper Northeast, affiliated with the Office of the Basic Education Commission for the 2022 academic year.

1.2 The samples used in this research include: 433 schools expanding educational opportunities in the Upper Northeast, under the Office of the Basic Education Commission for the 2022 academic year. There are 2 informants in each school, consisting of 1 school administrator and 1 teacher, for a total of 866 people. The school expands educational opportunities into analytical units, derived from multi-stage random sampling.

2. Variables used in the research include:

2.1 There are 2 external latent variables:

1) school directors' leadership and 2) teacher competence.

2.2 There is one internal latent variable that is a transmission variable: parental and community involvement.

2.3 The resulting internal latent variable. There is one variable is School effectiveness expands educational opportunities.

3. Research tools.

Expert interviews, questionnaires with five levels of estimation: most, very, medium, few and least.

4. Research phase.

The research is divided into 3 phases:

Phase 1 modeling hypotheses, with the following steps: Step 1 Document study and analysis. Step 2 Learn from experts.

Phase 2 Verification of conformity with empirical data Analyze data using SPSS and ready-made programs LISREL, which is quantitative data analysis by advanced statistics.

Phase 3 Finding ways to develop factors that directly affect the effectiveness of Effectiveness of Opportunity Expansion Schools in The Upper Northeast by discussing small groups with experts of 9 people.

Conclusion

1. School effectiveness expands educational opportunities, which are the resulting variables, consisting of four observable variables: the ability of teachers to develop students; Academic achievement Desirable characteristics of students and satisfaction with the work of teachers. There's a huge average on every single one of them.

External latent variables School directors' leadership, which consists of four observable variables: motivation for leadership; Having vision, having knowledge and skills in management. It consists of three observable variables: knowledge of the subjects taught; Curriculum management and learning management and learner

development. The internal latent variables that are interstitial variables of parental and community engagement, consisting of three observable variables: participation promotes the learner's learning process both at home and at school; The community sends talented people to participate in organizing various activities and participating in the operation of important days or school activities. The resulting internal latent variable. There's a lot of averages in every one of them as well.

2. The results examined the harmonization between hypothetical models and empirical data. When analyzing models, structural equations based on research hypotheses after revision. It was found that the model is consistent with empirical data, with Statistical values measure the harmony of patterns. The chi-square value is 70.96, the degree of freedom (df) is 66, the probability (p-value) is 0.316, the relative chi-square value (χ2/df) is 0.27, the value is less than 2.00, the GFI value is 0.99, the AGFI is 0.98, the RMSEA value is 0.01, the CN value is 1166.725, the CFI is 1.00, and the RMR is 0.01.

To considering the direct and indirect influence lines, it was found that school director's leadership had a direct influence of 0.29 on the school effectiveness variable, expanding educational opportunities, and indirectly influencing the school effectiveness variable, expanding educational opportunities. Through parent and community engagement variables, 0.17. Latent variables outside of teacher performance There is a direct influence of 0.36 on the school effectiveness variable, expanding educational opportunities, and indirectly influencing the school effectiveness variable, expanding educational opportunities. Through parent and community engagement variables, -0.08 latent variables within parental and community engagement. There was a direct influence of 0.12 on the school effectiveness variable extending educational opportunities, with the researchers finding that all latent variables had a direct impact on school effectiveness, expanding educational opportunities.

To considering the collective influence that affects school effectiveness in expanding educational opportunities, it was found that executive leadership It has a total influence value of 0.46, followed by teacher performance. It has the highest total influence value. It is equal to 0.28 parental and community engagement. It has the least total influence value, equal to 0.12, respectively.

3. Guidelines for developing factors that directly affect the effectiveness of educational opportunities in the Upper Northeast, according to experts from the Focus Group Discussion, are as follows:

3.1 Guidelines for developing executive leadership factors that affect school effectiveness Expand educational opportunities: 1) School administrators with leadership with a clear vision will incentivize teachers and staff to perform their tasks to ensure school effectiveness. The management supports teachers 2) the administrators give teachers the happiness of work, giving teachers the opportunity to undergo training, 3) school administrators must have an understanding of teachers and students. As the school expands educational opportunities from early childhood to secondary school, students in grades 5-6 are imitating secondary senior behavior, which is behavior that does not meet their own age, 4) administrators must have administrative skills, 5) administrators use morality and administrative ethics, and 6) provide a lot of morality and morality to teachers.

3.2 Guidelines for developing teacher performance factors that affect school effectiveness expand educational opportunities As teachers are key variables that contribute to the desirable attributes of students that contribute to school effectiveness. Therefore, the focus should be on teachers and developing at teachers. Teacher development includes: 1) Knowledge is knowledge of the subject content taught, whether the subject material matches or does not match the teacher's major. Because in the context of expanded educational opportunities, teachers are often given teaching duties that do not match the majors due to teacher shortages. Teachers do not complete majors in schools. Teachers should know academic techniques for students to learn, and then teachers should have academic performance to reflect performance. 2) Skills are teachers perform their duties until mastery is achieved, teachers are taught through competency-based technology. Teachers have leadership and can provide integrated teaching and learning. Teachers manage to teach both life skills and career skills. 3) Attitude has a

teacher spirit, love and faith in the profession. Work willingly, full-time, full-time, full-fledged, understanding of the material, as well as understanding the nuances of the learner.

3.3 Guidelines for developing parent and community engagement factors that affect school effectiveness Expand educational opportunities: 1) Parents and communities push schools to be effective by raising funds, such as organizing charitable activities for schools, educational forests, obtaining materials, equipment, and buildings where schools are in need. 2) The community sends local sages to pass on local wisdom to students, or some communities have foreigners living by marrying people in the community. The school invites foreign speakers to teach English on a daily basis, and the ability for parents and the community to get involved with the school is due to the management and teachers asking for cooperation with parents and the community. It relies on publicity.

Discussion

1. The results of the study include:

1.1 School effectiveness expands educational opportunities in the Upper Northeast. This is because the school's qualified staff are teachers with the ability to develop students, which is the main cog in driving academic achievement, which is how students apply the knowledge gained from integrated teacher learning to accumulate experience with skills such as learning skills, information innovation, media and technology, life skills, career skills, for living in the 21 century. Students are able to perform activities in accordance with the annual indicators standard, have test results based on core curriculum standards, have grade level results not less than 3.00, have district-level test results with average scores not lower than the school district level, and have national test results not higher than the national average. Have a positive attitude towards the things around you and behave appropriately. By developing students, teachers must bring their ability to use media, technology and innovation to help them develop. As well as relying on inputs and process factors. The school relies on the results of producing students with desirable attributes to build trust with parents and the community. This is expressed in the way students behave positively. Have desirable values, quality, knowledge, communication skills, problem solving skills. as well as having the ability to do so. The production of quality students is due to the satisfaction of the teacher's performance. This is derived from motivation as well as morale in performance, which is in line with the research of Theeranan Pirunsunthon (2018, p. 213) that found that school effectiveness consists of variables of academic achievement. In line with Panuphong Kampusa (2019, p. 220), it was found that school effectiveness expands educational opportunities. There's a lot of averages, too.

1.2 The results of the study of causal variables, both external latent variables and interstitial variables, include executive leadership. Teacher Competence Parental and community involvement, all three variables, averages a significant level. It can be explained. as follows:

1.2.1 School director’s leadership variables, which are external latent variables. This is because school administrators work to achieve their objectives based on knowledge, skills, internal and external experience. Self-drive and self-drive are expressed by deliberately performing their duties to achieve the school's goals. It is used to lead school personnel. A clear vision is created. Conceptualize the direction. Plan your actions systematically and focus on success. Motivate people In addition, executives must have knowledge and skills in management. Understand the context of the school environment. Discretion, human relations can build confidence among those involved in the management of the study. Communication, thinking, analysis, resourcefulness, as well as morality and ethics can satisfy parents and communities in management. In line with Chamnan Khampanyosinothai (2016, p. 547), it is stated that school administrators are successful in managing through vision and can be conveyed to personnel, able to control emotions in crisis situations, be moral, ethical, intelligent, competent, intentional, self-confident. Ideological steadfastness and confidence create unity. In line with Maghroori

and Rolland (1997, cited in Pichit Gopol, 2016, p. 298), it is proposed that the process of determining the direction of the school and its aspirations to create and implement involves a vision, mission and strategy to achieve the school's objectives.

1.2.2 Teacher performance variables, which are external latent variables This is because teachers have the ability to organize teaching and learning effectively and focus on improving the best interests of students in every way. Teachers are well-versed in the National Education Plan. curriculum Course Goals Subjects taught Lesson plans are prepared for students of different abilities. Teachers are well-versed in urban situations and important changes to education management. Management strategies inside and outside the classroom There is a system to support students and promote the development of all aspects of students. Whether it's physical. Emotions, society, and intelligence can motivate students to learn. It can teach developmental repairs to learners who are different. Integrate learning to suit the school context, develop materials, tools, equipment, and use technology to help teach. Organize the environment. Experience angles are analyzed, student progress is analyzed, measured. Evaluate and reflect the teacher's own performance. In line with the research of Ratchapol Chomtrikup (2020, p. 238), it was found that the organization of the learning process, which consists of: Assessment of learning skills, learning standards, curriculum and teaching methods, as well as career development and learning resources are variables that directly influence school effectiveness. Because there are five observable variables, that's what really makes students learn things. Once child-centered learning occurs, students can put them into concrete actions that will allow them to adapt and solve any problems that arise. Have the potential to read, think critically, and gain important competencies for learning and have the satisfaction of living a normal life. This is consistent with the Bureau of Education Planning and Quality Assurance (2015, pp. 3-5) saying that learning management is a process of changing an individual's behavior from the training and experiences that an individual acquires, perhaps directly or indirectly, using tools of observation or monitoring. This is the result of learning that changes a person's behavior in a positive way and is a relatively permanent and passive trait. By behavior, change occurs gradually.

1.2.3 Parental and community engagement variables, which are interstitial variables This is because schools and communities can develop the need from the wording, relying on tiger boats, relying on forests. If the school values the community and the community values the school, there will be a common development. The school builds unity with the community. Make love cherished together. The school promotes various community-related activities to parents. Communities and stakeholders in education management School boards are appointed and convened to determine the need for joint school development. At least one parent meeting is held per semester, with parents being given the opportunity to participate in educational arrangements by sending local speakers or sages to help convey local wisdom. Get involved in big day operations. As well as requesting courtesy of supporting resources to procure materials, equipment, buildings, facilities that are necessary and beneficial to educational management. This is in line with the research of Naowarat Sirimethangkur (2019, p. 249), which found that latent variables within participatory management that affect school effectiveness consist of four observable variables: love and attachment to schools; Participation in decentralization, mutual trust. Having a common purpose and purpose. Participatory management is an administration that provides an opportunity for individuals involved in educational management to participate in decision-making. Co-planning, co-working, thus creating a sense of attachment. Bind and agree on school administration to achieve its goals. And it's also consistent with Prajak Needles (2016, p. 317) finding that the school's relationship with the community. The highest coefficient indicator is that administrators organize community events to visit schools on occasion. It has a coefficient of 0.49, which shows that the school organizes events and offers opportunities for community visits. The school will be a source of cultural transmission and preparation for members of the community, a collection of heritage and social development. Lead to further social speakers.

2. The causal relationship model of school effectiveness expands educational opportunities in the Upper Northeast. It is consistent with empirical data, which is based on established assumptions. The researchers used factors that influenced from high to low to discuss the results. as follows:

2.1 Teacher competency (K2) directly and indirectly affects School effectiveness expands educational opportunities (E2) through 2 routes, including two lines (0.36 +(-0.80) equal to 0.28, i.e. route 1 directly affects the school effectiveness, expands educational opportunities (E2) has an influence value of 0.36. This is because teachers are an important variable in driving student achievement as well as the outcome of success for the school. By applying knowledge and skills in teaching, as well as appropriate techniques and methods in teaching and learning. Preparation of curriculum and lesson plans to keep up with changes in school situations and contexts. In line with Pisit Kongpadung (2013, p. 162), teacher leadership was found to be "unconstitutional." It has a direct influence on school effectiveness, with a statistically significant 0.29 influence coefficient at the .01 level. It can be explained that the success of the management of the school depends on the teacher. Teachers will lead change that demonstrate their commitment to improvement and change to keep up with working with today's rapidly changing world. In addition, teacher competence (K2) indirectly affects School Effectiveness Expands Educational Opportunities (E2) on Route 2 through Parental and Community Engagement (E1) to School Effectiveness Expands Educational Opportunities (E2) has an influence value (-0.67 × 0.12) equal to -0.08. This is because students spend more time in school than they do with their parents. Learning often comes from school. When teachers have the knowledge, skills, and experience to teach, they are trained to develop in the subjects taught. Quality teaching and learning is provided. Use technology to organize teaching and learning Able to integrate academic content, academic achievement will be achieved. Students will integrate the knowledge gained. Learning skills, information innovation, media technology, life skills and career skills are formed solely from teachers' teaching and learning activities. In line with Karnika Phetchanui (2018, p. 44), some have found that the pedagogical behavioral component of teachers influences or indirectly affects school effectiveness. It influences or indirectly influences students' cognitive behavioral elements.

2.2 Executive Leadership (K1) directly and indirectly affects School Effectiveness Expands Educational Opportunities (E2) through 2 routes: Route 1 directly affects the school effectiveness expands educational opportunities (E2) with an influence value of 0.29.

Route 2 through Parental and Community Engagement (E1) to School Effectiveness Expanded Educational Opportunities (E2) has an influence value (0.42 × 0.12) of 0.17, including two lines (0.29 + 0.17) of 0.46. This is because the administrator is the visionary, a destination linked to the school's mission to achieve its objectives. Therefore, it relies on the internal drive of the management, the willingness to perform the work. Having knowledge and skills in administration, as well as working with moral and ethical principles, will lead to the school's intended purpose. In line with Naowarat Sirimethangkur (2019, p.246), it was found that latent variables outside executive leadership have a direct influence (0.16) and indirect influence (0.43) on school effectiveness variables as well, in line with Yukl (2002, p.128) who found that executive leadership attributes have direct and indirect influence on school effectiveness.

2.3 Parental and Community Engagement (E1) Direct Effect School Effectiveness Expanded Educational Opportunities (E1) has an influence value of 0.12 due to the emphasis on parents and communities by creating a sense of shared ownership of the school. The school's news was communicated. Organize activities that engage parents. Request community feedback on community-related operations. Courtesy of local speakers or local sages to help organize events will help the community recognize the unity between the school and the community. Collaboration will take place and affect the effectiveness of the school. In line with Panuphong Khampusa (2019, p. 222), it was found that the factors influencing the effectiveness of educational opportunities

are participatory administrative factors. Has the greatest influence value of 0.39. It explains that participatory management is important for educational management, with key principles contributing to the creation of a democratic work climate, allowing all stakeholders to participate in expressing their opinions, making it difficult for workers to take inherent pride and that their work is difficult to accomplish. It explains that participatory management is important for educational management, with key principles contributing to the creation of a democratic work climate, allowing all stakeholders to participate in expressing their opinions, making it difficult for workers to take inherent pride and that their work is difficult to accomplish.

The Causal Relationship Model of Selected Factors Affecting Effectiveness of Phrapariyattidhama Schools in General Education Division in the North-Eastern Region

Phra Charatchai Paññāvajiro (Vajirespannasakula)[1]
Sayan Boonbai and Ploenpit Thummarat[2]

Abstract

The purposes of this research were to examine Selected Factors affecting Effectiveness of Phrapariyattidhama Schools in General Education Division in the North-eastern Region, 2) to verify a causal relationship model of selected factors affecting effectiveness of Phrapariyattidhama schools in the northeastern region with the empirical data, and 3) to establish the guidelines for developing selected factors affecting effectiveness of Phrapariyattidhama schools in the northeastern region. The research was divided into three phases: Phase 1: Construction of Hypothesis Model. This phase comprised two steps: step I was related to document inquiries and analysis concerning principles, theories, concepts about factors affecting effectiveness of school educational administration, and Step II: concerned a study of selected factors affecting effectiveness of school through nine experts. Phase 2: Model verification with Empirical Data, the Sample in this phase consisted of 172 Phrapariyattidhama School in General Education Division in the North-eastern Region in the academic year 2022. Two Key informants were drawn from each school, including a school administrator and a teacher, yielding a total of 516 persons. Phase 3: involved the establishment of guidelines for improving selected factors affecting effectiveness of Phrapariyattidhama school in General Education Division in the North-eastern Region, using Structural Equation Model (SEM), and Linear Model Analysis of Chi-square Statistics. The quantitative data was analyzed through the SPSS And LISREL Programs. The interviews with nine experts were also conducted for data analysis.

The findings were as follows:

1. The causal relationship model of the selected factors affecting the effectiveness of Phrapariyattidhama School in General Education Division in the North-eastern Region was constructed: culture and innovation organizations in the learning process

2. The developed causal relationship model was consistent with the empirical data: Chi-square value ($\chi 2$) is 137.86, degree of freedom (df) of 117, p-value of 0.09121, the relative chi-square value $\chi 2$ / df of 1.17. Consequently, it could be concluded that the model fit was good. Thus, the null hypothesis of this model failed to be rejected. The developed causal relationship model was consistent with the empirical data and the results of statistical tests. The results were as follows: Goodness of Fit Index (GFI) .98, Adjusted Goodness of Fit (AGFI) of .94, approaching 1, and Root Mean Square Residual (RMR) of .00, approaching zero, and the predication coefficient of determination (R2) of .92. Ten Experts confirmed that the developed model was consistent with the research result analysis.

3. This research proposed the guidelines for developing selected factors influencing effectiveness of Phrapariyattidhama schools in General Education Division in the North-eastern Region. The Three selected factors that had the direct influence on effectiveness of Phrapariyattidhama school in General Education Division in the North-eastern Region comprising superior leadership, Learning process management, and innovative organization,

[2] Ph.D. (Educational Administration), Faculty of Education, Sakon Nakhon Rajabhat University.

in addition, the researcher proposed guidelines for developing the selected factor – organizational culture – that had both direct and indirect effects.

Keywords: The Causal Relationship Model, Effectiveness of Phrapariyattidhama Schools in General Education Division.

Introduction

According to the National Education Act of 1999, amended (2nd edition) B.E. 2545 requires society to have a duty and participate in education management. by making religious institutions the center of learning and has also determined that education management are a formal education, a non-formal education and an informal education which must emphasize the importance of both knowledge and morality learning process and integration as appropriate for each level of education While Thai society has Buddhist temples which plays an important role in the way of life of Thai people from past to present The temple was able to manage education according to international standards combined with traditional education in Buddhism as well, for example, providing education in the form of Phrapariyattidhama School in the general education department. Which is responsible for providing education for monks and novices? There are more than 400 Phrapariyattidhama schools in the general education department throughout the country, which are responsible for teaching monks and novices in worldly academics along with moral and ethical development. Although the operation has been successful in many areas, there are still many problems and obstacles in the operation. School is considered to be the most important source of learning for learner development and is a place to produce manpower to have the potential to help develop the country to be able to compete in economics, politics and technology with other countries. Developing schools to provide potential and readiness to develop quality learners will inevitably lead to achievement by requiring knowledge along with virtue, which is the main goal and is important in the development of learners. This also helps to eliminate various educational crises such as different educational institutions Quality of learners with unequal standards Learners lack a learning process that can develop their work continuously throughout life. Therefore, it is the commitment of the Ministry of Education to develop education for quality and educational equality that occurs from the grassroots of education management by reducing the difference in education management in schools.

Phrapariyattidhama School, General Education Department under the National Office of Buddhism It is another type of educational institute that provides teaching and learning according to the Basic Education Core Curriculum, B.E. 2551 of the Ministry of Education. For students, monks and novices, they studied secular studies in 8 subject groups: 1) Thai language subjects 2) Mathematics subjects 3) Science subjects 4) Social studies, religion and culture subjects 5) Health studies subjects 6) Art subjects 7) Basic academic subjects career and 8) foreign languages and have specific subjects such as Pali and Buddhism subjects consisting of history of Buddha discipline and Religious practices (Punyapong Utathorn, 2018, pp. 123-124), although there is a study of dharma principles to behave appropriately for the congregation. But there are still some problems of students that need to be solved, for example, from interviews with administrators, educational personnel, staff, and from the observations of the researchers in the general education department of Phrapariyattidhama schools, it was found that a number of students of the Phrapariyattidhama school, the general education department were addicted to games. variety both online and offline causing students to frequently miss school or don't come to class while studying, bring the phone up to class or do something else that is not related to the content that the teacher is doing teaching, therefore, the Office of the Study Area Therefore, it should be supported, promoted and motivated. Encourage them to study and seek knowledge from various learning sources. Have a habit of continuous learning and focus on self-development in living a good.

Selection factors are considered to be important processes related to organizational effectiveness. The changing nature of the organization and its environment including the important role of management to understand

the relationship between the elements of the organization. That will lead to raise the level of success and effectiveness of the organization. Which covers three important dimensions: 1) awareness and importance of achieving the highest possible goals; 2) systematic organizational considerations emphasizing the importance of interaction between the organization and the environment; 3) emphasizing the behavior of individuals in the organization. with an emphasis on understanding in the role of a person's behavior that sends the productivity of the organization and the need for consistency between personal goals and organizational goals.

It consists of leadership of organizational culture executives. Organizing the learning process and organization of innovation in line with the research of Ratchapol Jomtraikup (2020, p. 149) has studied selective factors affecting the effectiveness of secondary schools in the northeastern region.

The effectiveness of the established schools was consistent with empirical data. The Chi-square value is 119.86, the probability is .00930, the Chi-square value is 1.39, that is, the model has good harmony, showing that accepts the main hypothesis that the causal relationship model selective factors affecting efficacy. Developed school results harmonize with empirical data which is consistent with the results of the analysis of the Harmfulness Index (GFI) equal to .99, the corrected harmony index (AGFI) is .94, approaching 1, and the root-square-of-residue index (RMR) is .0044, approaching zero, and the predictive coefficient was .92 and it was also consistent with the research of Phra Mahathip Oatngam (2020, page 120) to study the linear structural relationship model of factors affecting the quality of work of Phrapariyattidhama School teachers. General education in the sector northeastern region, it was found that the developed pattern was consistent the quasi-square was 161, the probability was .01, the GFI was .97, the adjusted AGFI was .94 by the organizational climate. Organizational culture job satisfaction Organization commitment can together explain the variance in teachers' quality of working life way significantly statistical at the .01 level and has a direct influence on job satisfaction. Statistically significant at the .05 level of organizational culture have a direct influence job satisfaction statistically significant at the level .01 and job satisfaction have a direct influence on organizational commitment statistically significant at the .01 level

Therefore, the effective development of Phrapariyattidhama School in the general education department. It is necessary to rely on administrative factors such as knowledge and ability of personnel. Management style, resources and supporting factors and cooperation from various sectors and determine the appropriate form and method. This will enable the management to achieve its goals, which the development of school effectiveness can be considered from the use of resources in school administration, including personnel, budget, management, materials and technology. that affects the quality of education especially the characteristics of students and educational achievement This is in line with the concept of school effectiveness, arising from the need to systematically improve the quality of education. It aims to achieve equality in education, equality in the quality of education in schools, and reduce disparity in the quality of produce for all Thai children This means the quality of service that students will receive. It has been widely mentioned. According to the International Institute for Educational Planning of UNESCO (Grisay & Mahled, 1991, p. 48) has established a guideline for educational quality development that educational quality development consists of 3 related dimensions: quality of resources used in teaching and learning and the quality of teachers and Educational personnel (Input) Similarly (Coombs, 1991, pp. 21-23) has explained the meaning of educational management quality that may have meanings including content. Teaching methods for organizing the educational process; Efforts to adapt education to the changing needs of innovation.

Phrapariyattidhama School General Education Department in the Northeast. It is an educational institute that manages the study of Scripture in the general education department. The study of Buddhism in the Pali Sanam Luang department and Sanam Luang Dharma Department along with the basic education curriculum Based on the Ministry of Education The Scripture Education Committee is responsible for setting policies and plans for Scripture

education in accordance with the objectives with the National Buddhism Office is a central agency to promote and support Coordinate the study of the Scriptures and is the secretary office of the committee having administrative duties and support academic work The secretary of the committee has administrative duties and supports academic work for the committee, including the duties provided by law. and perform duties assigned by the Board of Directors There are 20 provinces in the northeast of the Phrapariyattidhama School, divided into 5 educational areas, namely, the Phrapariyattidhama School, the General Education Section, Region 7 consisting of Khon Kaen, Loei and Nong Bua Lam Phu, the Phrapariyattidhamarat Education Area, the General Education Department, Region 8 consisting of Nong Khai, Udon Thani, Sakon Nakhon and Bueng Kan, Phra Pariyatthamma Study Area Department of General Education Region 9 consists of Ubon Ratchathani, Yasothon, Amnat Charoen and Mukdahan provinces. Phrapariyattidhama Study Area Department of General Education Region 10 consists of Roi Et, Maha Sarakham, Kalasin and Nakhon Phanom provinces. Phrapariyattidhama Study Area Department of General Education Region 11 consists of Nakhon Ratchasima, Buriram, Surin, Sisaket and Chaiyaphum provinces. It also plays a very important role in the development of human beings as good members of the social community. which will be the power to develop the country to progress Keep up with the world situation and from the study of the document also found that Phrapariyattidhama School, General Education Department Able to develop morality for students as well Therefore, the study of selective factors affecting the effectiveness of the General Education Department of Phrapariyattidhama School in the Northeastern Region wasTopics of interest and the results can be used as a guideline for the development of Phrapariyattidhama School, General Education Department. Therefore, the researcher is interested to study Causal Model of Selected Factors Affecting the Effectiveness of the General Education Department of Phrapariyattidhama School in the Northeastern Region.

Research Objective

This research researcher has set the aims of the research as follows.

1. To study selective factors affecting the effectiveness of Phrapariyattidhama School. Department of General Education in the northeast.

2. To examine the causal relationship model of selected factors affecting Effectiveness of the Phrapariyattidhama School General Education Department in the Northeastern Region developed with empirical data.

3. To find ways to develop selected factors that affect the effectiveness of Buddhist schools. Dharma teaching in the department of general education in the northeast.

Research Methodology

This research used quantitative research methodology (Quantitative Research). Causal comparative research, which is a research that aims to obtain a causal relationship modality of selected factors affecting the effectiveness of the General Education Department of Phrapariyattidhama School in the Northeast. Therefore, the method was divided into 3 phases: Phase 1: Creating a hypothesis model. Phase 2 Checking for consistency with empirical data (rating scale) Phase 3 Finding ways to develop selective factors influencing Phrapariyattidhama School, General Education Division in the Northeast. The details are as follows.

Phase 1 Model the hypothesis.

Step 1 Study and analysis of documents It is a study of principles, theories, and

concepts about factors affecting school effectiveness as follows:

1.1 Data source: The researcher studies information from documents, textbooks, journals, articles, research and resources

1.2 Storage methods the researcher collects data using analytical studies. synthesis principle Theoretical concepts from documents, textbooks, journals, articles, research and other sources.

1.3 Data analysis and interpretation the researcher analyzed the data which was preliminary data using descriptive statistics, namely frequency and percentage.

Step 2: Expert Education The researcher proceeds as follows:

2.1 The researcher requested a book from the Graduate School. Sakon Nakhon Rajabhat University for requesting assistance from experts, 9 people, consisting of monastic university administrators academic group and administrators of Phrapariyattidhama School, General Department, 3 people, according to the list of experts used to confirm the components of the causal relationship model and check the consistency between the questionnaire and the operational definition in the appendix.

2.2 Interview tools

Tools used to collect data There are questions about opinions and recommendations for the development of factors that directly and indirectly affect the effectiveness of Phrapariyattidhama School, General Education Department in the Northeast There is a way to create a questionnaire in order as follows.

2.2.1 Set interview issues in the various factors needed in each issue

2.2.2 Prepare a draft interview form and a list of questions for each issue.

2.2.3 Check the questionnaire quality by advisor thesis, and then revise according to the thesis advisor's recommendation.

2.2.4 Take the questionnaire to collect data.

2.3 Data Collection

The researcher contacted the interviewee for cooperation by giving each picture, each the person determines the date, time and location of the interview. Interview issues were then submitted about 2 weeks in advance. The collected questionnaires were collected and audio recordings were allowed. Then be transcribed to summarize and compile according to each issue that has been defined.

2.4 Data analysis

Information from the interview Bring the contents that have been examined completely according to desired issue Then use the content analysis method. Summary of the consensus of the overall concept as a guideline for the development of the model component causal relationship model.

Phase 2: checking for consistency with empirical data

Step 1: Population and sample determination The researcher has done the following:

1.1 The population of this research is Phrapariyatdhamma School, General

Department Study in the Northeastern region, academic year 2022, 207 schools

1.2 The sample group of this research was the Phrapariyattidhama

Department School. General Education in the Northeast, Academic Year 2022, 172 schools. The sample group was 516 people, using the criteria for determining the sample size. The sample size was specified as a function of the number of parameters to be estimated, i.e. the sample size was about 20 people per 1 parameter (Nonglak Wiratchai, 2005, p. 53). Therefore, the researcher used a ratio of 0.9 to determine the school as the random unit. All the selection of the school samples were random units. The proportional stratified random sampling method was used. (Proportionate Stratified Random Sampling) using the province as the strata and assigning 3 informants/persons in each school, consisting of 1 director, 1 monk teacher and 1 teacher.

Conclusion

The research results can be summarized as follows.

1. Causal relationship model of selected factors affecting effectiveness Phrapariyattidhama School, General Education Department in the Northeast It's contains the following variables:

1.1 Executive Leadership Variables it's consists of 5 observable variables.

are 1) self-esteem, 2) consciousness and consciousness, 3) honesty, 4) ability to connect networks, and 5) creativity.

1.2 Organizational culture variables it's consists of five observable variables:

1) Organizational values 2) Behavior 3) Personnel management 4) Teamwork and 5) Goal aiming

1.3 Learning process management variables Contains 5 observable variables.

These are 1) Curriculum and teaching methods, 2) Learning standards, 3) Learning skills assessment, 4) Career development, and 5) Learning resources.

1.4 Innovation variables it's consists of five observable variables:

1) Shared vision 2) Organization structure 3) Information system 4) Resource allocation and

5) Learning organization.

2. Causal relationship model of selected factors affecting effectiveness Phrapariyattidhama School General Education Department in the Northeast are consistent with empirical data There was a statistical value for measuring the harmony of the pattern, namely, the chi-square value was 137.86, the degrees of freedom (df) was 117, the probability (p-value) was 0.09121, the relative chi-square value. (χ2/df) was 1.17, RMSEA was .019, GFI was .98, AGFI was .94.

Executive leadership. There was a relationship with latent variables outside the organizational culture with statistical significance at the .01 level and affecting internal latent variables, namely, the effectiveness of Phrapariyattidhama School, General Education Department and organizing the learning process model variables could explain the variance of each latent variable 97.00 and 90.00 percent, respectively.

As for confirming the causal relationship model of selected factors affecting school effectiveness by conducting a focus group discussion, 10 experts, all experts agree with the causal factor correlation model of selective factors. Confirmation of direct influence values indirect influence and the combined influence of the causal relationship model of selected factors by using a model to confirm the linear structure relationship of selective factors. After adjusting the model, it was found that 10 experts agreed with the direct influence indirect influence and the collective influence of selective factors affecting the effectiveness of Phrapariyattidhama School, General Education Division.

3. Guidelines for developing selective factors that influence the effectiveness of Phrapariyattidhama School Department of General Education in the Northeast Experts offer the following:

3.1 Executive Leadership Development Executives must always develop themselves.

To have knowledge, ability, know-how to keep up with technology and social changes. Keep pace with technology use technology as an administrative tool should understand the learning management process according to the situation teaching and learning supervision as an adviser to teachers who teach should promote the creation or production of management innovations to keep up with the events, bring the knowledge of innovation to develop the organization as a whole. Must have leadership, understanding, access to subordinates, compassion, generosity, neutrality listen to other people's opinions. The development results of the year should be used to study, analyze, and plan development according to the PDCA system continuing to focus on the participation of stakeholders

3.2 Organizational culture development organizational culture virtual agreement An organization that everyone should be aware of and use it as a practice guideline in the organization. In connection with leadership with their ideology will make it a living organization Happy with the management teachers and staff Organizational culture should be integrated with the teaching and learning process. Working for the effectiveness of the quality of the organization in all dimensions creating a happy working atmosphere requires an organizational culture. There is a clear management plan that can be evaluated concretely.

3.3 Development of an innovative organization learning management is the heart of Teaching and learning by administrators Teachers must understand and access the science of teaching. The administration has a

learner-centered learning management process. Reach individual learners analyzing students Develop learners according to their knowledge and abilities difference of students organizing the learning process will affect the overall effectiveness of the school Teachers should pay attention to learner development. Understand the learners' backgrounds, families, economic conditions, and community environments of learners will make the students happy effective learning organizing the learning process Emphasis should be placed on the participation of communities, parents, and local wisdom in order to learners are proud of their own locality and love the locality. The learning process should focus on the participation of the learners, co-thinking, co-planning, co-designing learning activities will produce wisdom the learning is self-esteem of the learners.

3.4 Development of learning process management Creation of an innovative organization in academia, it is a matter of urgency for executives. Teachers and communities must work together to promote and support learning. Learners should be involved in creating new innovations in problematic learning able to learn through modern technology or local innovation Administrators should have a policy to encourage teachers and learners to jointly produce innovative learning materials integrated with real ways of life. Educational institutions should be organizations of learning innovation for the community. To be a source of contemporary science for the community, emphasizing on the participation of the community in the operation.

Discussion

From the research on causal relationship model of selective factors affecting on the effectiveness of Phrapariyattidhama School, General Education Department in the Northeastern Region, the researcher presented as an issue for discussion based on the hypothesis of the research as follows:

1. Causal relationship model of selected factors affecting effectiveness Phrapariyattidhama School General Education Department in the Northeast consists of the following variables:

1.1 Latent variables outside executive leadership consisted of 5 variables.

It can be observed that it is self-identity. Consciousness and awareness honesty, morality, ability to connect networks of relationships creativity Leadership organizational culture is important in management. School administrators who are successful in organizational management. Nowadays, in the era of globalization, it corresponds to Suthep Pongsriwat (2018, Online) said that Leadership is a belief in one's inner abilities. Higher will use empathy and persuasive speech, such as encouragement and respect show empathy more than coercion Leaders who believe in their outward abilities often use

Emotions in working and solving problems as a result, stress on oneself and others results in a decrease in the effectiveness of the organization. How much higher will leaders with high belief in their own abilities create organizational effectiveness than those with high beliefs in their own abilities? The more innovations happen, the less imitation of competitors, the more courage to make risky decisions. More planning and perspective on the future and also in line with Paradee Anannavee (2008, pp. 77-78) proposed that leadership it is important for the organization to help coordinate conflicts within the organization. Help persuade personnel to devote their knowledge and abilities to the organization. Leadership in executives will make subordinates acceptance, faith and confidence. It is the anchor for personnel when the agency faces a critical situation. in order for the agency to escape from a critical situation

1.2 Latent variables outside the organizational culture consisted of 5 variables.

observable organizational values behavior personnel management Teamwork and goal striving The organizational culture helps the organization achieve its goals by working. It is in line with Duangkamol Intha (2013, Online) that organizational culture helps shape people in the organization to have beliefs and behaviors in the same direction. is the purpose or goals of the organization itself In addition, there is a low level of conflict within

the organization. Inevitably, the organization can develop an organization faster than an organization with high conflicts. because everyone in the organization works together to create benefits to the organization
Not against personal interests

1.3 Latent variables within the learning process consisted of 5 observational variables.

It is an assessment of learning skills. learning standards curriculum and teaching methods Career development and learning resources It is a learner development process by allowing students to participate in learning activities. To develop students in both intellectual, physical, emotional and social aspects. This is in line with the Office of Educational Planning and Quality Assurance (2015, page 3-5), Partnership for 21st Century Skills (2009, p. 147), Wijarn Panich (2012, page 5) and the Office of Higher Secondary Education. NP (2016, pages 18-26) presented that organizational learning is the process of changing individual behavior from training and the experience that the individual has gained may be observed directly or indirectly through the use of observation or monitoring tools. This is the result of learning that will change a person's behavior in a positive way and is a trait that is quite permanent and ingrained. The behavioral change occurs gradually.

1.4 Latent variables within the innovation organization consisted of 5 variables can

be observed is a shared vision Organization structure, information system, resource allocation and learning organization. It is the cooperation of the participants involved in the educational institution to develop the organization for innovation. Through having a shared vision organizational structure appropriate information systems and resource allocation including being a learning organization Consistent with the concept of McGregor (2008, p. 104) that an organization of innovation is an organization that has the ability to create innovations in various fields to the market, which will result in business success that has consistent with Robert (1995, p. 5) that an organization seeks to look for ways to create new things that bring benefits and productivity to the organization and make relevant people acquire learning skills in the 21st century.

1.5 Latent variables within school effectiveness consisted of 5 variables observed is

the ability of the students to adapt problem solving ability of students Student Academic Achievement school administration and the satisfaction of those involved in the education management It is a school achievement that is defined by a process organized and implemented in the school and has an important effect on learning outcomes, consistent with Tawatchai Tang-uthairuang (2014, p. 28) Hoy and Miskel (200, p. 281) stated that the school can produce students with high academic achievement. Develop students' ability to adapt to their surroundings and solve problems in educational management Educational strategic plans must be prepared in order for education to truly achieve its goals. There is an education plan in line with the government's policy. School administration must consist of teachers, students and parents. All activities must be handled with a system without gaps that can be implemented and without implacable.

2. Causal relationship model of selected factors affecting effectiveness Phrapariyattidhama School General Education Department in the Northeast are consistent with empirical data which is in accordance with the assumptions set, namely latent variables outside executive leadership latent variables within innovative organizations and latent variables within the learning process management had a direct influence on school effectiveness variables. latent variables outside organizational culture has a direct influence on school effectiveness In considering the total influence

that affected the overall school effectiveness variables found that learning organization culture variables innovation organizations had the highest total influence, followed by latent variables outside the organization of learning process latent variables outside the organization of innovation. and latent variables outside executive leadership, respectively, can be discussed as follows:

2.1 Executive Leadership have a direct influence on school effectiveness

Due to the fact that school administrators are the highest commanders within the school, the ministry has a role in managing things in accordance with the requirements set. If executives have high leadership will

inevitably cause subordinates to develop their own leadership and as a result, various tasks are effective at the school. This is consistent with the research of Jatupat Prathum (2016, page 124), which found that the direct influence of selective factors affecting school effectiveness was the factor leadership by showing leadership behaviors will result in a good atmosphere that is satisfactory, resulting in good cooperation in the operation of managing the organization to be effective and in line with Paradee Anannavee (2008, page 77 - 78) Said that leadership is important to the organization, helping to coordinate various conflicts within the work, helping to persuade personnel to devote their knowledge and abilities to the organization. Having leadership in executives will for subordinates to be accepted It creates faith and confidence and is the basis for the personnel to hold on.

2.2 Organizational culture has a direct influence on school effectiveness

General Education Department in the Northeast This may be because shared beliefs and values enhance cooperation and bonding. Organizational culture functions when shared beliefs and values drive a school to do what is right for its success at the same time. Being an innovative organization gives schools a competitive edge. innovation in school A teacher is a person of learning. Students can work as a team. There is friendship with each other, which is one of the indicators of school effectiveness. This is consistent with Amara Chaiyadam (2016, pages 217-218) found that the direct influence of factors affecting school effectiveness is the organizational culture factor. In addition, the organizational culture also indirectly influenced the effectiveness of Phrapariyattidhama School, General Education Department in the Northeast.

2.2.1 The organization of the learning process that results from the school

having a good organizational culture affects teachers' values in organizing a good learning process. This is consistent with Samaporn Phuwijit (2015, p. 74) found that organizational culture is an important factor in creating values and behaviors work adaptation and striving for success in the job Causing teachers to focus on organizing a good learning process

2.2.2 Organization of Innovation as a result of culture the organization sets

the tone for a collective approach in schools. Is the main factor that leads to the behavior and work of personnel will result in the organization of innovation in the school. This is in line with Wattanachai Siriyan (2017, p. 260), found that organizational culture is a common guideline in schools. It is the main factor leading to the behavior and work of personnel in the organization that creates the organization of innovation in school.

2.3 Organization of the learning process which consists of Skill Assessment

learn learning standards curriculum and teaching methods as well as career development and learning resources It is a variable directly influencing the effectiveness of the Phrapariyattidhamma School in the general education department in the northeastern region. For those 5 variables, it is what makes students truly learn things. When learning is child-centered, students can take concrete actions that will allow themselves to adapt and solve problems various things that can happen Have the ability to read, think, analyze and develop competencies that are important to learning and have satisfaction in living a normal life This is consistent with the Bureau of Educational Quality Assurance and Planning (2015, page 3-5). So that all learners will receive quality educational services from educational institutions to develop their knowledge, abilities and desirable characteristics.

2.4 Organization of Innovation which consists of shared vision organizational structure and appropriate information systems as well as resource allocation and being a learning organization It is a variable that has a direct influence on the performance of Phrapariyattidhama School, General Education Department in the Northeast. Because all 5 observational variables will be what will allow students to learn effectively. Students can use things to cause learning by teaching the thinking process must be caused by the teacher. The importance of building systems of thinking, having information systems and resources that promote and support teaching and learning. This is in line with the research of Chanatip Pornkul (2011, page 48), which found that the direct influence of factors

affecting school effectiveness was the organization of innovation. The method of teaching is mainly based on information systems. It has the advantage of improving the learning quality of the learners. able to remember much and longer It allows learners to learn in greater volumes in the allotted time and keeps learners interested and involved in the process.
learn more.

3. Guidelines for the development of selective factors that affect the effectiveness of
Buddhist schools Dharma teaching in the department of general education in the Northeast Experts offer the following:

3.1 Executive Leadership Development Executives need to develop themselvesalways provide knowledge, ability, know-how to keep up with technology and social changes keep pace with technology use technology as an administrative tool should understand the learning management process according to the situation teaching and learning supervision as an adviser to teachers who teach Should promote the creation or production of management innovations to keep up with the events, bring the knowledge of innovation to develop the organization as a whole. Must have leadership, understanding, access to subordinates, compassion, generosity, neutrality Listen to other people's opinions. The development results of the year should be used to study, analyze, and plan development according to the PDCA system.Continuing to focus on the participation of stakeholders

3.2 Organizational culture development organizational culture virtual agreementof the organization that everyone should be aware of And use it as a practice guideline in the organization in connection with leadership with their ideology will make it a living organization Happy with the management teachers and staff Organizational culture should be integrated with the teaching and learning process. Working for the effectiveness of the quality of the organization in all dimensions creating a happy working atmosphere requires an organizational culture. There is a clear management plan that can be evaluated concretely.

3.3 Development of an innovative organization learning management is the heart of teaching and learning management by administrators Teachers must understand and access the science of teaching. The administration has a learner-centered learning management process reach individual learners analyzing students Develop learners according to their knowledge and abilities difference of students organizing the learning process will affect the overall effectiveness of the school Teachers should pay attention to learner development. Understand the learners' backgrounds, families, economic conditions, and community environments of learners. will make the students happy effective learning organizing the learning process Emphasis should be placed on the participation of communities, parents, and local wisdom in order to
Learners are proud of their own locality and love the locality. The learning process should focus on the participation of the learners, co-thinking, co-planning, co-designing learning activities. will produce wisdom The learning is self-esteem of the learners.

3.4 Development of learning process management Creation of an innovative organization in school is a matter of urgency for executives. Teachers and communities must work together to promote and support learning. Learners should be involved in creating new innovations in problematic learning able to learn through modern technology or local innovation Administrators should have a policy to encourage teachers and learners to jointly produce innovative learning materials integrated with real ways of life. Educational institutions should be an organization of learning innovation for the community, be a source of contemporary science for the community, emphasizing community participation in the operation.

Recommendation

1. Suggestions for applying the research results

This research resulted in a causal relationship model of selective factors. Affecting

the effectiveness of Phrapariyattidhama School, General Education Department That has been validated by a research process and confirmed by experts. that the results are consistent with empirical data There were direct influencing values of the variables that could be used to develop school effectiveness from descending to descending as follows: Administrator's Leadership Organizational culture variables Organizational variables of innovation and learning process management variables, respectively, with suggestions for implementation as follows:

1.1 Executives must make personnel have good shared values. Promote a good organizational culture effective learning process management and encourage an innovative organization was born in the school.

1.2 Administrators should pay attention to the school committees in their status.of networks that enhance school development.

1.3 Teachers must change their roles from giving knowledge toFinished each time, go to teach. Become a facilitator (facilitator) in learning for students.

2. Suggestions for further research for suggestions for further research

2.1 Research should be done on this subject with participatory action researchJoint (Participatory Action Research)

2.2 Research should be done on this subject. with research and development(Research and Development)

2.3 Research should be done in this way with research on the foundation theory (Grounded Theory) to create a model from the qualitative research results compared with the theoretical variables for research on the effectiveness of the General Education Department of Scripture School.

A Causal Relationship Model of Selected Factors Affecting Elementary School Administrators' Effective Implementation of Technology in Digital Era of Basic Education School in the Northeast

Siriporn Mingwongtham[1]
Sikan Pienthunyakorn[2]
Ploenpit Thummarat[3]

Abstract

The purposes of this research were: 1) to examine the level of elementary school administrators' effective Implementation of technology in digital era of basic education school in the northeast and the level of selected factors; 2) tovalidate the concordance of the causal relationship model of selected factors with the empirical data; and 3) to establish the guidelines for developing selected factors affecting elementary school administrators' effective implementation of technology in digital era of basic education school in the northeast. The research was divided into three phases, including Phase-1 Construction of Hypothesis Model, Phase 2-Model Verification with Empirical Data and Phase 3 involved the establishment of guidelines for developing selected factors affecting elementary school administrators' effective Implementation of technology in digital era of basic education school in the Northeast. The sample consisted of 520 primary schools under the Office of the Basic Education Commission in the northeast in the 2021 academic year using a multi-stage random sampling. Findings revealed that the elementary school administrators' effective implementation of technology in digital era was: 1) in medium score ranking, 2) consistent with empirical data, and 3) the guidelines for developing selected factors affecting elementary school administrators' effective implementation of technology in digital era are technology management policy, school's technology infrastructure, teachers' competencies on technology implementation, and 4) the competencies of technology integration of the elementary school administrators and teachers.

Keywords: Causal Relationship Model of Factors, Effective Implementation of Technology, Digital Era

Introduction

In today's world, globalization is associated with rapid and significant human changes, which the modern language calls "Digital Era". It is an era that has caused a new paradigm in organizational management (New Organization), which emphasizes on the knowledge and speediness using technology as tool. When effectively implemented in to the organization, technology can extend school effectiveness in powerful ways, such as the development of digital citizenship skills, which leads organization to the competitiveness and the successfulness (Drucker, 2007). Regarding education though, the effects of globalization have certainly transformed, and still does, the filed in different ways. Therefore, each school must change the pattern of the school management, especially, a school's ability to produce the quality product or service in a better way than its competitors. The present economic system and society requires the preparation of highly skilled and competent person for the 21st century. The 21st century skills that students need for their future jobs and lives are comprised of the 3Rs (Reading, (W) Riting and (A) Rithmetic) and the 7Cs (Critical Thinking and Problem Solving; Creativity and Innovation; Cross-cultural Understanding; Collaboration, Teamwork and Leadership; Communications, Information, and Media Literacy;

[2] Ph.D. (Educational Administration), Faculty of Education, Sakon Nakhon Rajabhat University.

[3] Ph.D. (Educational Administration), Faculty of Education, Sakon Nakhon Rajabhat University.

Computing and ICT Literacy; Career and Learning Skills. In Thailand, technology has received a great deal attention in recent years, as educators and other stakeholders have realized the importance and the advantages of technology in education. Governments have invested heavily in information and communications technology (ICT) in school. Education provision in Thailand needs to be improved in order to prepare learners for participation in the global economic system of this century, and for developing the country with highly competitive skills. Learning skills of the 21st Century; deemed a strategic guideline for learning management – places emphasis on body of knowledge, skills, expertise, and competency of learners for daily living in a changing world. In line with the Chapter 9 of the National Education Act B.E.2542 (1999) and Amendments (fourth *National Education Act* B.E. 2562 (2019), the technologies for education were stipulated and promulgated (กระทรวงศึกษาธิการ, 2562).

Considering that technology is a crucial factor in school effectiveness in digital era, up to date, there have been numerous studies proving the existence of the factors which is affecting school administrators' effective implementation of Technology (ทิพย์วิภา เทศวิศาล, 2553; รัชฎาพร มีอาษา, 2555; ชวาลี สกุลเอี่ยมไพบูลย์, 2558). Nevertheless, competing narrative and inconsistent research finding on the technological integration raise genuine concerns, but the effectiveness they done is incomplete. This statement is in line with previous report of UNESCO (2002) which exposed five policy issues that may holding Thailand back: 1) inequity infrastructure provision; 2) limited digital learning materials relevant to national curriculum; 3) teachers' confidence and capacity to use ICT in classroom; 4) lack of effective monitoring of ICT policies; and 5) no coherent framework for investment in ICT. The finding of the UNESCO study partially supported the problem of lacking digital infrastructure to support effective ICT use in schools in Thailand (จิณณวัตร ปะโคทัง, 2561). Special attention was paid to examine the factors which is affecting effective Implementation of Technology in school (ภาวิช ทองโรจน์; 2559; ปณพักตร์ พงษ์พุทธรักษา, 2562; นพรุจ ศักดิ์ศิริ, 2550; ทิพย์วิภา เทศวิศาล, 2553; จรูญเกียรตติ กุลสอน และคณะ, 2559; จันทิมา รุ่งเรือง, 2563). In order to identify key of school management on technology and prepare the teacher, students and school for the future.

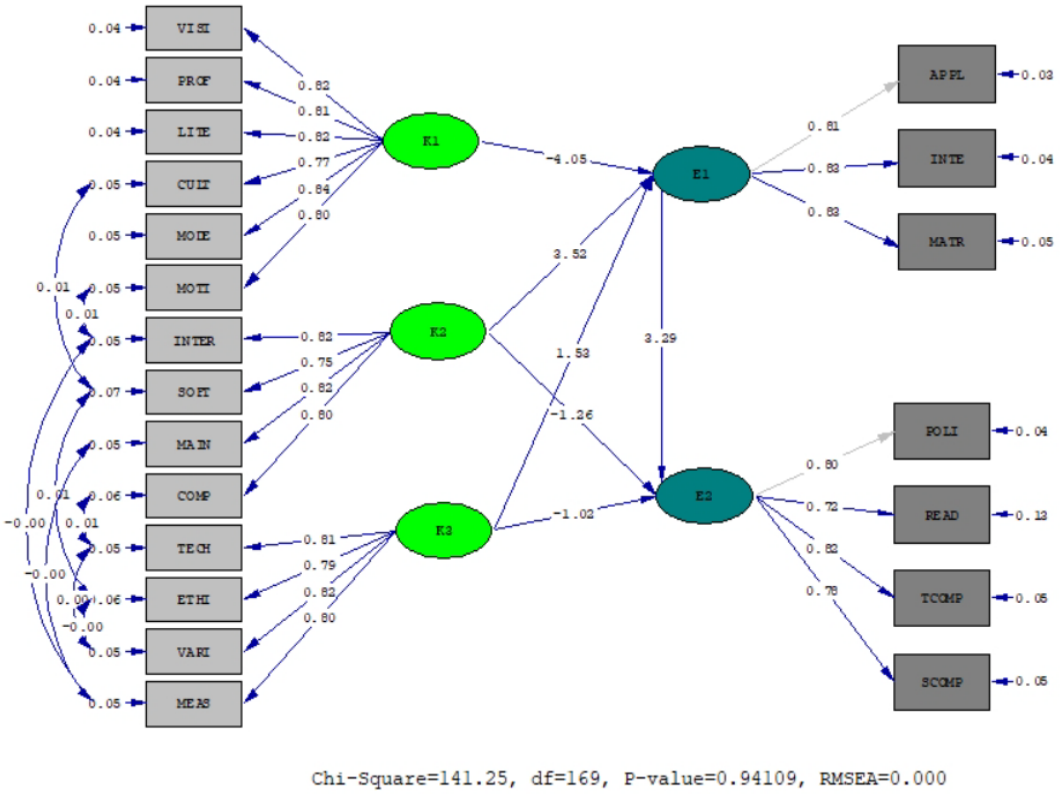
According to the importance of ICT education over the past few decades in Thailand, the researcher aimed to examine the factors which affecting elementary school administrators' effective implementation of technology of Basic Education School in the Northeast of Thailand using a causal relationship model.

Research Objective

1. To examine the level of elementary school administrators' effective Implementation of technology in digital era of basic education school in the northeast and the level of selected factors;

2. To validate the concordance of the causal relationship model of selected factors affecting elementary school administrators' effective implementation of technology with the empirical data;

3. To establish the guidelines for developing selected factors affecting elementary school administrators' effective implementation of technology in digital era of basic education school in the northeast



Research Methodology

The population in this research were schools under the Office of the Basic Education Commission in the northeast of Thailand, academic year 2021. The sample group consisted of 520 elementary schools using multi-stage random sampling. Two key informants were drawn from each school including 520 school administrators and 520 teachers who responsible for technology in school, yielding a total 1,040 persons. Sample size that is suitable for data analysis using LISRELL program by using the structural equation modeling (SEM) technique according to Hair et al. (2006) had suggest the sample size should be 10-20 times the number of observation variables in the research itself. There are 26 observable variable in this research. The suitable and sufficient sample size should be at least 10 times x 26 observation variables equal to 260 samples up to 20 times x 26 observable variables equal 520 samples.

The research procedure divided into 3 phases. Phase 1 is construction of hypothesis model, comprising two steps: 1) document and relevant research studies, and step 2) concerned a study through nine experts. Phase 2 is model verification with empirical data using a 5-level rating scale questionnaire. Data were analyzed by program computer suing the method of structural modeling (SEM). Basic standard deviations for analysis the consistency of the model, relationship of the selected factors and the empirical data by the Path Analysis method, determine by the Goodness of Fit Measures. And, Phase 3 is the establishment of guidelines for developing selected factors affecting elementary school administrators' effective Implementation of technology in digital era of basic education

Conclusion

1. The elementary school administrators' effective implementation of technology in digital era was in medium score ranking. The whole selected factors were in medium score ranking: technology management policy, school's technology infrastructure, teachers' competencies on technology implementation, and the elementary school administrator and teachers' competencies of technology integration throughout the school system.

Picture 1: The developed causal relationship model of selected factors and the empirical data

2. The developed causal relationship model of selected factors affecting elementary school administrators' effective implementation of technology in digital era was consistent with the empirical data: Chi-square value of 141.25, degree of freedom (df) of 169, the relative chi-square value χ^2/df of 0.84, Probability Value (p-value) of 0.941, Root Mean Square Error of Approximation (RMSEA) of 0.0, Goodness of Fit Index (GFI) of 0.99, Adjusted Goodness of Fit Index (AGFI) of 0.98, Critical N (CN) = 1547.65, Comparative Fit Index (CFI) of 1.00, Root Mean Squared Residual (RMR) of 0.01 and Alpha Coefficient (R2) of 1.00 as shown in the picture below.

3. The research proposed the guidelines for developing selected factors affecting elementary school administrators' effective Implementation of technology in digital era. The four selected factors that had both direct

and indirect effects on the elementary school administrators' effective Implementation of technology in digital era of basic education school in the northeast, comprising 1) technology management policy; involving staffs in policy establishment and specifying the technology policy in school management plan , 2) school's technology infrastructure; forming school's technology infrastructure developing plan, assign responsible staff and duties , 3) teachers' competencies on technology implementation; reskilling and upskilling on technology, being a good example of technology user in improving technology competencies and 4) the elementary school administrator and teachers' competencies of technology integration throughout the school system; bringing technology into work.

Discussion

Elementary School Administrators' Effective Implementation of Technology in Digital Era of Basic Education School in the Northeast can be discussed as follows:

1. Endogenous latent variable: the elementary school administrators' effective implementation of technology in digital era was in medium score ranking. They were 3 observables variable medium score ranking, including technology management policy, teachers' technology competency in learning management, and students' technological competency. This was probably due to the elementary school is the smallest unit of the Primary Educational Service Area Office, therefore, they will have the limitations in various aspects, such as budgeting needs to be tied closely to policy, and teachers' ability in using technology for teaching and learning management. It seems that the major subject of teacher's bachelor effected on the ability in technology integration, whether a bachelor's degree of four-year program, or a five-year program, most of these teachers were technological fair in use. Thus, this limitation restricted teachers in promoting technology in classroom, throughout teaching and learning management. Then, the students' ability or the competency in technology were restricted. Moreover, the limitation of elementary students, includes ages and financial position might cause the technology accessibility. Parents are unable to classroom. As a result, students cannot master the skills for the 21st century (3Rs+8Cs), which are desirable skills based on plans in the Twelfth National Economic and Social Development Plan of Thailand B.E. 2560 – 2564 (กระทรวงศึกษาธิการ, 2559). For the readiness of technology infrastructure in school was in the high score ranking probably caused by stipulation and promulgation in Chapter 9 of the National Education Act B.E.2542 (1999) and Amendments about the technologies for education (กระทรวงศึกษาธิการ, 2542).

2. Cause Variables can be discussed as follows:

Exogenous latent variable: technology management policy consists of 6 observable variables, they were technology visionaries, individual technology development plan, technology literacy and competency, creating a culture of using technology, being the role model in using technology, encouraging and creating the inspiration in using technology, the finding was in medium level. Similar to the study about the policy and management, mentioned that the essential of the school' administrator technology knowledge and competency (สุริยา หมาดทิ้ง, 2557) because the administrators' technology skill has the positive role in promoting vision, mission, goal, strategy and regulation in school. The finding also confirmed the previous study that indicate the role of technology on the improvement of elementary school effectiveness and the guidelines are as flows: creating a policy that aims to create an atmosphere and motivation in integrating ICT use in teaching and learning, developing personnel's ICT competencies, and promoting the use of ICT in their operations (ชวาลี สกุลเอี่ยมไพบูลย์, 2558).

Considering the variable that have an overall effect on the effectiveness of technology implementation both in positive and negative direction, it is found that the technology management policy had the greatest overall effect in a negative direction (-13.32), followed by the school's technology infrastructure with an overall effect of 10.31, knowledge and teachers' competencies on technology implementation with an overall effect of 4.00, and the elementary school administrator and teachers' competencies of technology integration throughout the school system had the least overall effect equals 3.29.

2.1 Technology management policy had a negative indirect effect on the elementary school administrators' effective implementation of technology in digital era through the competency of administrators and teachers in integrating technology into their work. The technology policy in the administration sets the rules for the practice of administrators or their subordinates that determine future guidelines. It is an attempt to do in order to achieve a set goal or objective. But the operational process cannot be established without the effective implementation of the policy by administrators or teachers. or administrators and teachers do not have the capacity to integrate technology. The aligned opinions of policy makers and policy implementers. It can affect the satisfaction of school members, and effects the integration. The attitudes related to the effectiveness of using technology in school administration in the digital age of school administrators were consistent with นพรุจ ศักดิ์ศิริ (2007) who stated that the attitude of the practitioners was the most important factor of the factors. related to the success of implementing information and communication technology policies for education in basic education institutions.

2.2 School's technology infrastructure had a negative direct effect and positive indirect effect on the elementary school administrators' effective implementation of technology in digital era. The technology of educational institutions required sufficient budget, the technology equipment is a high cost equipment, especially in term of the high quality materials, in the same vein as สุติพงษ์ อมูลราช (2558) who mentions the guidelines for infrastructure development in school by finding funding for supporting school technology, likewise ศิริลักษณ์ นาทัน (2550,) who discussed the problem of technology management of model schools was the technology structure , efficient resources and the maintenance.

2.3 Teachers' competencies on technology implementation consists of the ability to use technology in teaching and learning, ethical in using and the use of technology for measurement and evaluation. The results revealed the negative direct effect and a positive indirect effect on the on the elementary school administrators' effective implementation of technology in digital era passing the latent variables of the elementary school administrator and teachers' competencies of technology integration throughout the school system. Based on the regulation of professional standards of teachers in Thailand, teachers were called for the ability, knowledge, experience and leadership characteristics in digital learning management to improve the quality of education (วีริยา ภูถาวร, 2564)

2.4 The elementary school administrator and teachers' competencies of technology integration throughout the school system consisted of applying technology in school management, the design of the learning process emphasizes the integration of technology, and the production and development of technological media for a variety of learning. It had positive direct effect on the elementary school administrators' effective implementation of technology in digital era, this may cause by the limitation of integration in school which can be improved of promoting the seminar by experts. Agreeing by ชวาลี สกุลเอี่ยมไพบูลย์ (2558) who stated that the ability to integrate technology into work is the key in setting the vision, promote learning culture in the digital age. The administrators' ability in using technology had a positive relationship with effectiveness of school. As well as the integration of technology of play an important role in inspiring students as the good digital citizens กนกวรรณ โพธิ์ทอง (2559).

Recommendation

1.1 It was found that the school's technology infrastructure had negative direct effect on the elementary school administrators' effective implementation of technology in digital era. The average showed that software legitimation schools is lower than other aspects. Therefore, the Primary Educational Service Area Office should support the schools with legitimate software with sufficient quantities to meet the needs of each school.

1.2 In the research, it was found that Teachers' competencies on technology implementation had negative direct effect on the elementary school administrators' effective implementation of technology in digital era. By the way, the lowest average was found as the ethics in using. Therefore, school administrators must raise awareness of teachers about the importance of ethical in implementing technology.

1.3 In the research, it was found that the elementary school administrator and teachers' competencies of technology integration throughout the school system had a positive direct effect on the elementary school administrators' effective implementation of technology in digital era. However, the production and development of learning medias had a lower average level than other aspects. School administrators should support by providing the professional training from experts in technological filed.

1.4 In the research, it was found that 1 Technology management policy had negative indirect effect on the elementary school administrators' effective implementation of technology in digital era. Nevertheless, the average of building culture and using technology atmosphere had lower averages than other aspects. Hence, School administrators should be a good example in creating culture and atmosphere of technology implementation.

Future studies should take into account as flows:

2.1 Future research should be done on this similar subject studying with a group of model schools in effective technology implementation or aa group of schools that have problems with implementing technology to manage schools to examine the factors that lead to development and increasing of the effectiveness in implementing technology in school administration.

2.2 Future studies should do some research with case stud to understand the factors that affect the use of technology in school management in the digital age of school administrators with clear boundaries and specification.

2.3 Research should be done on this subject. With research and development (Research and Development) to develop a model for using technology in school management in the digital age of school administrators. Trials and empirical quality checks were conducted.

2.4 Research should be done on this subject. With future research (Future Research) for the benefit of planning and policy formulation, as well as guidelines for using technology in school management in the digital age of school administrators in the future.

The Complexity of English Linguistics Studies

Pairote Bennui[1]

Abstract

It has been perceived that English linguistics is a complex discipline because it goes beyond language skills, uses and communication which are familiar to non-native English learners and users. Thus, this paper attempts to present specific reasons why English linguistics is complicated through related studies regarding English as a foreign language and a global language. Further, it provides particular factors influencing such difficulties of English linguistics, and it highlights possible solutions to lessen the difficulties. Overall, it is inevitable that the nature of English linguistics comes along with the systematic, scientific, theoretical, and academic notions of the language which require scholars of English studies to diminish the intricacy so that learners and users of English can become more motivated to apply it.

Keywords: Complexity; English; Linguistics Studies

Introduction

It is undeniable that linguistics is a required course in curricular of English studies in universities or higher educational institutions worldwide. Linguistics is a discipline that points out the nature and system of the English language. Likewise, students majoring in all national, or second, or foreign language of English are required to study linguistics in order to comprehend its phonological, morphological, semantic, grammatical, syntactic, and textual features prior to apply for use. At present, English is used worldwide in different contexts according to a country's language planning and policy as well as use of English as a native language (ENL) or English as a second language (ESL) or English as a foreign language (EFL). However, linguistics is inevitably a course that can enhance English education in understanding ENL, ESL, and EFL. Or even English as an international language or World Englishes which are a modern course challenging the use of English for non-native identity still relies on linguistics. It could be said that linguistics is embedded in all language-related courses. This means linguistics has its prominence towards learners and users of English. Although linguistics aims to enable English users and learners to attain how to pronounce sounds, form words, perceive meaning, construct grammatical structures, and analyze texts for English usage, it seems that non-native English learners find that studying English linguistics is difficult. Thus, this paper has three main aims as follows: (i) to seek certain reasons why English linguistics is complicated; (ii) to identify particular factors affecting its complexity; and (iii) and to discuss possible ways to lessen the difficulty of English linguistics studies.

Aspects of Linguistics and English Linguistics

Understanding linguistics, one needs to be aware of its interrelated term, namely 'language'. It has been perceived that linguistics is about language studies. The notion of linguistics does not look friendly to the hearers (users/learners). It seems to be systematic or difficult itself. Meanwhile, the term 'language' is much friendlier as it indicates uses, symbols, and communication. This is true that linguistics involves a discipline, knowledge, system,

[1] Department of Western Languages, Faculty of Humanities and Social Sciences, Thaksin University, Songkhla.
E-mail: bpairote@tsu.ac.th

nature, and evolution of human language studies (UC Davis, Department of Linguistics, 2022; UC Santa Cruz, Linguistics, 2022). Meanwhile, language concerns a set of sound and written symbols used as a tool for humans for communication (Collins Dictionary, 2022); humans acquire and use language to attain language skills and proficiency.

Every living language has its linguistic system. The phonological, morphological, grammatical, orthographic, semantic, and textual systems of a language contribute to their institutionalization to language users, learners, and instructors of a society or nation. These systems conform to the status of linguistics as a discipline under human science. Without these systems, a language cannot be theorized, organized and standardized for using, learning-teaching, or applying. Using a language with an awareness of linguistics definitely can enhance one's functions.

English is currently a global language and lingua franca where many native and non-native speakers are functionally using, learning, and teaching (Rao, 2019). As a living language, English has its linguistic core, leading to the term 'English linguistics'. To complete its disciplinary status, English linguistic studies provides its specific sound, word, grammar, meaning, textual and writing systems for those who use the language. Obviously English linguistics comes along with the term 'English language studies' as they contain particular theories and practices for its users and learners worldwide. Although English is globally used and learnt, its convention as the language of the Anglophone culture is still rooted. Moreover, non-Anglophone cultures along the use of English as a world language lead to a linguistic evolution of English. Thus, English linguistics studies in the new era inevitably interfaces these cultural aspects of the language, partially resulting in a complexity of this discipline.

Difficulties of English Linguistics Studies

The complication of English linguistics is manifested in problems found by students and users of the language worldwide. However, this paper pays special attention to only Thai learners of higher education and Thai professional users of English as a foreign language. The problems taken from many studies concern sounds, words, grammar, meaning, as well as text and discourse.

(i) Phonetics and phonology

Phonetics and phonology concerns sound structure of a language. It is mainly divided into two levels – segmental and supra-segmental aspects. The former is about consonant and vowel sound while the latter concerns accents, stress, and intonation, for instance (Bennui, 2018). In light of English, Thai learners and users face some difficulties in both levels. According to Piyamat and Deekawong (2021), a number of Thai EFL students at Huachiew Chalermprakiet University are not able to articulate English consonant sounds which are /z/, /r/, /v/, /t∫/, /∫/, /ʒ/, and /ʤ/. Further, they struggle to pronounce the interdental sounds, that is, [θ], [ð], and [ʤ], which are not found in the Thai sound system. This may affect their miscommunication in oral English if they cannot pronounce these sounds clearly. Likewise, such a problem of the segmental level of sound studies, namely the interdental sounds, is also faced by Thai students at Kalasin University. Moreover, these students encountered the problem at the supra-segmental level in articulating linking sounds and some final sounds with /-d/ and –ed/ for their oral expressions. Mostly, these problems are caused by the students' past learning experience of oral English and mother tongue interference. They have been taught incorrect ways to pronounce some English consonant sounds as well as the linking sounds and final sounds (Sahatsathatsana, 2017). Similarly, Thai EFL learners at Prince of Songkla University, Hatyai campus, seem to face some problems in English conversation. In light of a segmental level, they are about final sound omission, incorrect pronunciation of vowel sounds, the /l/ and /r/ deletion in consonant clusters. In line with a suprasegmental level, the problem is the students did too many pauses within construction units in their conversation (Tantiwicha & Sinwonsuwat, 2021).

Awareness of phonetics and phonology can be applied to listening comprehension of oral English. However, this comprehension seems to be problematic to some Thai logistics professionals. In Phyathip's (2019) study, it was found that 30 Thai employees working in the Trade Service Section were not able to understand oral English when it was very fast spoken. Moreover, they could not understand foreign customers speaking in different English accents, especially those from China and Japan. That is, the way Chinese and Japanese guests speak English is not understandable to these Thai workers because of Chinese and Japanese sound influence in English. In the same vein, Anuwaiya, Boontos and Wisttranon (2018) reveal that a number of hotel receptionists in Burirum province face difficulties in English listening and speaking. For listening, they did not understand fast oral English spoken by foreign customers with different accents. For speaking, they could not pronounce some English consonant sounds such as /s/, / t∫/, /∫/, /r/, /t/, /ð/, and /ed/. These problems affected their professional communication in English as they were also thinking in Thai when trying to speak in English.

(ii) Morphology and lexis

Morphology and lexis are a study of words in a language. The former is related to word structure and its grammatical components while the latter points out meaning of words and vocabulary use (Bennui, 2018). Some problems in English words are found. First of all, Suetae and Yok (2012) reveal that 4th year English majors at Prince of Songkla University, Pattani campus, made lexical errors in their writing regarding direct translations, namely a type of interlingual errors. The majority of the problem was omission while the last frequent of lexical errors was that they were confused about binary terms. These problems lead to their inability in vocabulary use in English which is caused by negative transfer from their first language (Thai) into English (their target language). That is, when they were writing in English, they did not think in English. This is similarly found by 28 third year English minors at Thaksin University, Songkhla, who produced paragraph writing which was full of L1 lexical interference. The problem was about literal translation of Thai words into English words and the use of Thai words. The students created eleven vocabulary items in English literally translated from Thai. They were "get/ receive, serious, book, meet, use, true, close, change, alone, make, and cost". An outstanding example was "I *get* the knowledge without the teacher, and I *receive* the knowledge and experience for my job". Another issue of L1 lexical interference was the use of Thai word in their English paragraph, namely 'Tuk-Tuk' in the sentence 'I go to (the) university by Tuk-Tuk" (Bennui, 2008). These examples can be problematic in terms of lexical errors. In light of professional users, English word problems are found by Khamthakrua (2018), who analyzed language errors in corrective action reports (CARs) of Thai staff in an automotive industry company in the east of Thailand. In this regard, lexical errors in CARs concern (i) misinformation (11.32%) in which the writers usually translated in English from their Thai language but did not use lexical borrowing from Thai and coinage, and (ii) lexical distortion errors which consist of omission (17.52%), mis-ordering (2.44) and over-inclusion (1.35%). These errors in English business writing are caused by L1 interference.

(iii)Grammar and syntax

Grammar concerns a set of rules in phrases, clauses, and sentences as well as grammar points with regard to verb tenses, for instance (Cowan, 2008). Meanwhile, syntax is a discipline in which grammatical elements of phrases, clauses, and sentences are theoretically examined in tree diagrams (Hasa, 2016). Some problems in English grammar by Thai learners and users are found. First of all, Promsupa, Varasasin, and Brudhisprabha (2017) revealed that 34 Thai 2nd year English majors at a Thai university. From 2,218 grammatical errors in the students' written essays, the errors could be categorized into two types – morphological errors (81.97%) and syntactic errors (18.03%). These two types also provided 32 errors subtypes which are singular/plural errors (30.43%), article errors (21.51%) and preposition errors (5.23%) subsequently. These errors are caused by interlanguage and intralingual factors of the Thai EFL students. In the same manner, Watcharapunyawong and Usaha (2013) found that 40 second-year English majors at a Thai university presented a range of grammatical errors in writing English paragraphs. In narrative paragraphs, the errors concern verb tense, word choice, sentence structure, preposition, and modal/auxiliary. Meanwhile, the errors in descriptive as well as comparison and contrast paragraphs are about and

articles, sentence structure, word choice, singular/plural form, and subject-verb agreement. These errors are mainly because of the Thai language interference. Beside Thai EFL students, Thai professional users of English also encounter grammatical difficulties. This is apparent in Foosuwan, Champavan, and Suksaeresup's (2019) study which analyzes grammatical errors in written tasks in English by Thai employees working in a banking business. Their writing was found with errors in punctuation, verb use, nouns, prepositions, articles, syntax, lexicon, pronouns, capitalization, spelling, sentence fragment, adverbs, conjunction, subject omission, and adjectives, respectively. These mistakes could affect the professionalism of the employees' proficiency and image of the banking industry. Likewise, English grammar errors can be also be called 'deviations'. This is evident in a study by Yuvajira, Tayjasanant, Sungkaman (2018) who found that 525 commercial and service advertising for Thai traditional products in the context of the economic and commercial promotion by the government contained grammar deviations from Standard English. The errors are about articles, numbers, negatives, copula, relative pronouns, prepositions, verb distribution, subject-verb agreement, collocations, and ellipsis complements. Further, other specific grammar issues found in the products concern serial verbs, verbless clause, adjectives, conjunctions, voice, and continual sentences. These deviated grammar points in English are similar to the Thai grammatical structure that influences the English sentence patterns.

(iv) Semantics

Semantics involves a study of meaning of linguistic expressions. This meaning can be related to a reference of the truth in the real world. It focuses on meaning of words, phrases, and sentences (Bennui, 2018). Particular problems about English semantics are linked to language learning and skills of Thai students. This is found in a study by Rajsombat and Indrambarya (2019) who revealed that 50 students at Kasetsart University in Kampaengsan campus seemed to create semantic and syntactic errors in writing compound sentences in English. Semantically, the problem was seen through the notion of 'but' in English that is different from its Thai version of แต่ /tɛ':/. The students' compound sentences were incomprehensible. The Thai students were aware that the coordinator 'but' in English is used for joining the contrastive senses of clauses only. They thought that this use of but in English was similar to Thai /tɛ':/. However, in English, 'but' has more meaning and usage more than what the students know. That is, 'but' can be used as a discourse marker in English speaking which is not found in Thai. Moreover, semantic errors can take place in translation. In this respect, Siriseranee and Chompurach (2020) found that 20 English majors at Nakhon Phanom University made some grammatical and semantic errors in their translation from English into Thai. From 170 errors, the errors were 80 grammatical and 90 semantic. Semantically, the errors were about the students' misperception and misunderstanding of homonyms, phrasal verbs/two-word verbs, and idioms. For instance, the students were confused with the word 'rose' which is a past simple verb of 'rise'. Instead, they translated this word in Thai as a flower that is familiar to them. This is because of their misinterpretation of grammatical contexts of this word in English. In addition, Putsomsoo (2017) revealed that a professional translator also made some semantic errors in translating a Thai children's literature titled 'Kaew the Playful' into English. The mistakes in meaning are about mistranslation, over-translation, and under-translation. For example, 'silently' was mistranslated as 'nearby', 'a large clay pot' was mistranslated as 'a big jar', and 'Khao Din' was mistranslated as 'zoo'. Next, "…. playing the rivers with fun," was under-translated as "…playing the river". Last, 'teacher' was over-translated as 'homeroom teacher'. These mistranslations lead to the inaccuracy of the story. In this regard, the mistranslation problem is also caused by semantic errors without considering cultural meaning of Thai lexical items. That is, some Thai proper names should not be translated into English; their loan word in the Thai Romanized item should remain in English texts.

(v) Text and discourse

Text and discourse are a linguistic structure of a language beyond a sentence level, namely paragraphs. They concern the way oral and written texts are organized through a range of discourse markers for an achievement of cohesion and coherence (Halliday & Hasan, 1976). They can also involve social, cultural, literary, historical, economic, political, educational, political, and professional aspects of language embedded in text production. In this paper, some problems about text and discourse faced by Thai learners and users of English are revealed. First of all, Tikham (2022) found that 131 argumentative essays and 131 descriptive essays written by Thai EFL students at a northern university in Thailand show misuse of discourse markers. They were "although, for example, because of, and but". These markers are mistakenly used with punctuations, so their written texts did not meet the notion of coherence. These students seemed to translate from Thai into English when applying these markers in their essays rather than thinking in English. Likewise, Chaichanasiri (2007) found that 110 Thai computer professionals in international organizations and 30 Thai computer science instructors at a university level in Bangkok faced a problem of discourse. When they were using English texts in computer science, their problem was about contexts and being insufficient of knowledge of subject matter in English. This affected their reading comprehension of computer texts. Similarly, Kongsong (2021) presented business writing problems faced by 30 Thai employees in a steel company. The problem was about a textual level of English. These staffs were not aware of writing process and the format of email writings. This did not lead them to produce a well-organized business email in English.

These five layers of English linguistics are merely part of empirical studies that reflect emerging problems of learning and using English. They represent the way Thai university students and professional users are struggling in pronunciation, listening-speaking, reading, writing, and translation in English in which sounds, words, grammar, meaning, and textual elements are constructed.

Factors that Affect the Difficulty of English Linguistics

From the above problems, in fact there are specific causes of why English linguistics at different levels is difficult to be learned and applied for use provided by the researchers of those empirical studies. However, this paper attempts to highlight possible factors of such difficulties by summarizing through a description of linguistic phenomena.

(i) A scientific study of linguistics

Linguistics is different from other disciplines of arts and humanities in that it can be linked to a science. That is, a scientific study of linguistics is a factor that leads to its complexity. According to Linguistic Society of America (2022), "linguistics is the science of language, and linguists are scientists who apply the scientific method to questions about the nature and function of language". Understanding linguistic components of a language, one needs to prove the way a language is naturally structured by a language user. This can be done through an experimental method of language research. For instance, studying English consonant and vowel sounds, one needs to understand a number of terms in physiology, especially regarding oral science, to question where certain sounds are articulated in manners and positions in which tongue and other articulators are involved. Likewise, the use of computer programs is applied for collecting linguistic data to produce a corpus in order to analyze spoken or written features of a human language. The use of computer is also applicable for studying language documentation for linguistic revitalization. Basically, a study of how language is processed can be linked to a scientific study with regard to Neuro-linguistics which is about language and brain. Another science-based language study is syntax. As grammar of words, phrases, clauses, and sentences of English is outstanding, its structure can be proved by different rules using tree diagram structure which can be compared to mathematic principles. This is apparent in analyzing or proving the constituents of a variety of English sentences. Likewise, the philosophical aspect of language when one wants to study semantics can be scientifically based. That is, semantic features of words can be true or false with regard to the real world analysis, namely meaning in dictionaries. Hence, whatever concerns scientific studies

is somewhat difficult among those who dislike this discipline. Science must be proved with evidence and the real world truth, so studying and using linguistic elements of English through science orientation can be intricate.

(ii) Complex terminology

Like many other subjects, linguistics can be institutionalized as a discipline because of its specific terminology. A number of terms in linguistics seem to be complicated because of an emergence of linguistic branches. The reasons why there are many terms in English words can be evident. As many people around the world use English, many words are emerging. Many terms can be changed according to functional uses and registers. Many users of English in arts and humanities may not be familiar with terms of English used in medical and dentistry contexts. Further, all knowledge around the world is being created through the use of English, so a plenty of lexical forms of English can be more complex according to linguistic phenomena. The complication of linguistic terminology can be manifested through a variety of English dictionaries produced in different professional contexts worldwide. In fact, understanding those five layers of linguistics can be possible if one tries to point out dictionaries of phonetics and phonology, morphology and lexis, semantics, and text-discourse. All human languages, not only English, can be shared with these dictionaries to perceive the complexity of terminology.

(iii) Complex forms, rules and theories

Linguistics is a difficult discipline because of its complex forms, rules, and theories. These three factors or elements contribute to an academic status of linguistics. Firstly, linguistic forms of English can be evident in consonant and vowel systems based on IPA (International Phonetic Alphabet). Many English learners have to encounter IPA systems which are full of unfamiliar symbols. They have to understand these sound forms to be aware of pronunciation rules. Likewise, lexical forms of English have a variety of meaning, resulting in awareness of word use. Similarly, many English words have a wide range of morphological structures that lead to word formation requiring a deep analysis. In light of rules, they can be seen in grammar. Beyond structure of phrases, clauses, and sentences, grammar also plays a crucial role in other levels. That is, every language has grammar of sound (phonetics and phonology) and grammar of word (morphology and lexis). Hence, grammar entails the notion of rules. When many rules of language are constructed, they can be developed into theories by theorists. Linguistic theories have been constructed by many schools of theorists. For instance, Ferdinand de Saussure constructed the school of modern linguistics. Michael Halliday was a key theorist of the British structuralism. Moreover, Noam Chomsky is an influential linguist of the American structuralism (California State University Long Beach (n.d.). Under a level of linguistics, there are different embedded theories – morphology theories, grammar theories, syntactic theories, semantic theories, and phonology theories, for instance. Currently, there appear to be a variety of applied linguistics in which linguistics is used for solving in learning-teaching as well as language use. Thus, there are many theorists who form the knowledge, models, and theories of applied linguistics with regard to English for many scholars worldwide, such as approaches to World Englishes, sociolinguistics theories, and theories of second language acquisition. Indeed, the notion of theories seems to be abstract, detailed, patterned, and modelled. They are important for all disciplines. English linguistics thus needs theories of language and linguistics for practices in researching and teaching-learning, so it can be evolving. Therefore, forms, rules and theories of linguistics are similar to the wall that surrounds a core of language.

(iv) Purposes, Motivations, and Strategies of Language Learning and Using

The difficulty of language and linguistics studies is caused by the factor of learning, teaching, and using. English proficiency is needed by non-native speakers worldwide. Some can achieve their learning, teaching, and using because they possess motivation and strategies to learn and use it. They are aware of language forms, rules, and theories, so they can apply for learning and using. English skills – listening, speaking, reading, writing, and translating – can be achieved by ESL/EFL learners and users if they have sufficient knowledge of English linguistics

and attained abilities in English use. If they set up purposes of English learning and using along with motivation and strategies of those skills, they will not find out the difficulty of English linguistics. Even though the difficulty of English linguistics comes out, the proficient learners and users of English can attempt to come across such a complication. Without explicit purposes, motivation, and strategies, it is quite hard to ESL/EFL learners and users to gain insights into English language and linguistics.

(v) L1 Interference and target Language

From a review of the empirical studies on problems of English language and linguistics above, many Thai learners and users of English faced the difficulty because of their L1 interference that affects their target language. Majority of Thai people have been learning and using English or the target language as a foreign language. A few Thais learn and use English as a first or second language. Thus, it is normal for Thai EFL learners and users to have a limited chance to practically use English with foreigners. The medium instruction of English classes in Thailand is more based on Thai than English, so it is inevitable that L1 or mother tongue interface can occur through all English skills in Thais' perceptions. The phonological, lexical, grammatical, semantic, and textual level of the Thai language can influence the way Thais learn and use English. Thais' interlanguage structure is still embedded in their thought patterns, so it is hard for Thais to move to be ESL users.

(vi) The language family of English

Differences in language families of English and Thai can be a vital factor for the difficulty of English linguistics. Geographically, Thailand and English are located in different continents. Thus, their language family is obviously different. A West-Germanic language under the Indo-European family of English (Xavier, 2020) can be unfamiliar to many EFL Thai learners and users with a background of the Sino-Tibetan family, especially different written and oral systems of the language orthography. The Thai language has its Sanskritization of orthographic systems while English has the Romanization system. Thus, this historical linguistic element can be another factor of the complexity.

(vii) Varieties of English

Currently, English is not only the language of Anglophone culture, namely British, American, Canadian, Australian, and New Zealand people. It belongs to the global language; linguistic forms of English travel through different indigenous languages and cultures around the world. This results in an emergence of varieties of English through accents, words, grammar forms, patterns of use. This also leads to a complexity of English linguistics embedded in oral and written texts influenced by the mother tongue structure of non-native speakers of English. Further, the importance of global tourism as well as science-technology development through a journey of non-native varieties of English seems to support the complication of the modern English language use.

These seven factors are based on the notions of linguistics and the English language. These causes are merely observed with a basis of the above problems of learning and using English among Thais. They also reflect the multi-facets of linguistics and the English language in light of their nature, system, and application.

Possible Ways to Lessen the Difficulty

The mentioned problems and factors of why studies in English linguistics are not at ease can be solved with some possible ways through the following key persons – instructors, scholars, language learners, and language users.

(i) Instructors: As English linguistics studies are taught in universities or colleges, their difficulties can be lessened by the instructors or lecturers. Those who are teaching undergraduate students of English linguistics may be wondering how to lessen this difficulty because English linguistics is naturally difficult. They may say that all academic books of syntax, phonology, morphology and semantics are written with complicated academic styles, so the students need to understand what linguistics should be like. This saying is true, but the instructors can simplify the structured language in a variety of books to make the students feel comfortable to read and analyze

English linguistics through simple language patterns simplified in the worksheets or slides of the lessons by the instructors. If the students read the original academic works on English linguistics by the key scholars such as Chomsky, Halliday, Bauer, and Yule, they will feel that it is hard to understand the concepts of each linguistic level. However, the lectures may show some extracts from the original books on English linguistics so that the students can realize the original texts of linguistics in order to make understanding of them.

(ii) Scholars: Scholars can be academic writers and researchers of English linguistics. Most of them are native English speakers while many of them are non-native English writers. Indeed, these scholars attempt to maintain the quality of written work on English linguistics using specific terminologies, academic language style of writing, and content correctness. What they can do for lessening the complexity of English linguistics is about the use of examples or situations regarding English language used in certain countries in which some loanwords or lexical borrowing may be used. Alternatively, some contents found in examples of syntactic structures can be locally related to non-native English speakers. That is, non-Anglophone socio-cultural aspects of English language items can be highlighted. This will make readers of the academic books or empirical research studies on linguistics become much familiar with and feel more motivated to read, learn or explore more about English linguistics studies.

(iii) Language learners: Language learners at the tertiary level are required to look for possible strategies to gain insights into English linguistics. Only reading the textbooks and discussion with their peers can be alternative to lessen the difficulty of linguistics. Now there are many lessons of English linguistics posted on electronic media such as YouTube and many additional websites of educational institutions. Thus, they should take this opportunity to watch videos on English linguistics taught by many experts around the world in order to find out certain ways to analyze linguistics. Online materials created by non-native English scholars are full of simplified written styles, so this can motivate the students to study this academic subject. Another way that can be lessening the difficulty is that thinking comparatively. Studying syntax can be compared to mathematics and drawing pictures through tree diagrams. Moreover, studying semantics can be related to our philosophical life that needs to explore the truth of lexical items. Learning linguistic history of English can be similar to studying socio-cultural history of language and literature that provide fun narrative stories of English words, sentences, and texts. These examples of mind-sets can encourage students to be positive towards English linguistics.

(iv) Language users: Those who are neither students nor scholars of English linguistics can involve language studies. They can be translators, writers, interpreters, international relation officers, and language practitioners. Their work life may be related to the use of linguistic items. The use of online Standard English dictionaries can be a possible implementation. Dictionaries by Oxford University, Cambridge University, Longman, and McMillan are the best tools of British English for those who will use reference books for their translated, written, documentary, and transactional works. Meanwhile, the use of American English words can be verified through the use of Merriam-Webster Dictionary and Collins Dictionary. This will help to lessen the difficulty of lexical and syntactic elements of the English language.

Conclusion and Recommendation

This paper focuses on a never-ending query of the complication of English linguistics. It has revealed that such complication is observed in many empirical studies in a Thai context in which Thai EFL university students and users of global English have encountered. These problems are mainly caused by linguistic and non-linguistic elements of the English language as well as historical-cultural, educational and psychological factors with regard to learners and users. Thus, this complexity can be lessened with a contribution by instructors, learners, scholars, and users of English.

This paper provides only examples of empirical studies based on Thai EFL and global English context. However, it can also represent problems in English linguistics faced by those in other EFL countries. Thus, it is suggested that this paper can be beneficial to those who are planning to solve English linguistics problems in pedagogy and use. Aspects of knowledge on English linguistics studies as well as its problems and solutions can be useful for future researchers and academic writers who intend to make English linguistics much more applicable and much friendlier than theoretical and complex.

The Causal Relationship Model of Factors Affecting Effectiveness of World–Class Standard Schools in the Northeastern Region of Thailand.

Phongphiphat Narinruk[1]
Sikarn Peantunyakorn[2]
Ploenpit Thummarat[3]

Abstract

This research aims to 1) study the effectiveness of World–Class standard schools. in the Northeast, 2) to examine the causal relationship model of factors affecting the effectiveness of World–Class standard schools in the northeastern region developed with empirical data, and 3) to find ways to develop direct factors on the effectiveness of World–Class standard schools in the Northeast. The sample group consisted of 420 World–Class standard schools in the Northeastern region. 1,260 informants were school administrators, academic supervisors and teachers. Structural equation modeling (SEM) analysis and linear model analysis were performed using Chi-square statistics. Data were analyzed using SPSS and LISREL software packages. The results showed that 1) the effectiveness of World–Class standard schools in the Northeast had an average level, 2) a causal relationship model of factors affecting the effectiveness of World–Class standard schools in the Northeast are consistent with empirical data, 3) a factor directly influencing the effectiveness of World–Class standard schools in the northeastern region consisting of administrator's leadership, organizational culture, teacher learning management, and learning organization.

Keywords: Causal Relationship Model, World–Class Standard School Effectiveness.

Introduction

The results of the past supervision and monitoring of school operations in the World–Class Standard School Project Problems and obstacles were also encountered, for example, the redundancy of additional subject matter with the country's World–Class curriculum and the curriculum management of many educational institutions in the part of the additional subject matter that was inconsistent with the structure and time specified in the curriculum. necessary skills and abilities to help make Thai children and youth Able to develop themselves towards World–Class ization, which are creative analytical thinking pursuit of knowledge Tech skills and ability to work with others are not satisfactory. Test results at various levels in Thailand, including the Basic National Education Test (O-Net). General Aptitude Test (GAT) and Academic and Professional Aptitude Test (PAT) scores of students are overall low and high distribution is not satisfactory. and the results of participation in the World–Class Mathematics and Science Education Project (PISA) Organized by the member countries of the Organization for Economic Cooperation and Development. There are about 65 countries participating in the project. The average score of Thai students is lower than the average of World–Class students (Sirima Piayu, 2018, p. 260).

from such information Make society both within the country and abroad come to a conclusion and believe that the quality of education in Thailand Compared to the quality of World–Class education is still at a low level, which affects the image and confidence that foreigners have in Thailand. Therefore, it is necessary to improve Thai education to be of equal quality to World–Class education. The Office of the Basic Education Commission has therefore considered and reviewed the problematic points in the operation of World–Class standard schools and developed and improved the guidelines for

(Tel: +66962568959 E-mail: tongmath55@gmail.com)
[2] Ph.D. (Educational Administration), Faculty of Education, Sakon Nakhon Rajabhat University
[3] Ph.D. (Educational Administration), Faculty of Education, Sakon Nakhon Rajabhat University

educational institutions to use in organizing the teaching and learning curriculum. This is to develop the quality of learners in schools of World–Class standards more efficiently (Office of the Administration of Secondary Education, 2018, p. 11)

The Thai government has established a 20 year national strategy (2018 - 2037) that focuses on using knowledge to create innovation. Developing and empowering people that are friendly to the environment And has set the vision of Thailand 4.0 The country is stable, prosperous, sustainable, being a developed country. with the development of the philosophy of sufficiency economy" Thai people 4.0 are knowledgeable, skilled, highly competent. Become a complete human being in the 21st century. In addition, the 12th National Economic and Social Development Plan (2017 - 2021) has focused on strengthening and developing people's potential. To receive a high quality education of World–Class standards. and can learn on their own continuously And the National Education Plan 2017 - 2036 has focused on the development of all learners. To have characteristics and learning skills in the 21st century (The Secretariat of the Council of Education, 2017, p. 15). In order to be consistent with the policy, vision and goals of development mentioned above. The Office of the Basic Education Commission therefore has expanded the implementation of the World–Class Standard School Project to raise the quality of education and learning management to meet World–Class quality and standards. as well as reducing inequality in education Learners are developed and empowered to be Thai people 4.0 (Office of the Secondary Education Administration, 2018, p. 5).

The effectiveness of World–Class standard schools will occur more or less from various factors, including learner competency. Quality Management and the satisfaction of teachers, students and parents. Because the aim and direction of the operation of an World–Class standard school will be successful, there must be the development of learners to have the potential to be world citizens (World Citizen) creating a path of enlightenment. Create new motivation for students to become committed to the pursuit of knowledge. Able to analyze and summarize knowledge have the ability to communicate effectively and have a public mind and a sense of social service (Fueangfah Rueangwet, 2015, p. 77). Quality Management It is an important mechanism to drive school development to World–Class standards, which will create characteristics for teaching and learning management. This will affect students, which is the end goal of education management (Sirima Piayu, 2018, p. 268). and satisfaction of teachers, students and parents of World–Class standard schools There is success that comes from having an effective, focused workforce. operational enthusiasm Able to manage quality learning until receiving awards Recognized and accepted by the community have teamwork and work in the organization with quality welfare is promoted and stability with personnel Personnel development There is a participatory planning system. There is a decentralized administration. Parents participated and provided support (Anucha Ngernphaet, 2017, p. 104).

Therefore, in this research The researcher therefore studied the following factors: executive leadership; organizational culture teacher learning management and learning organization which is a causal factor affecting the effectiveness of World–Class standard schools of secondary schools in the Northeastern region. and from the study of related textbooks Therefore, the researcher is interested in studying the causal relationship model of factors affecting the effectiveness of World–Class standard schools in the northeastern region. Because it is a study from theory to modeling that shows the structure of relationships between variables. In which the researcher can examine the causal relationship of the theoretical generated model obtained from empirical data collection. Then test the model for consistency. Conducting this type of research is called a structural equation model. It is a statistical technique used to test and estimate the rational relationship. to model equations that structure Available for both verification and survey purposes. In other words, modeling is for verification and exploration purposes. In other words, modeling is intended to confirm or test a theory. or the development of a theory and also suitable for research in the knowledge society era It is beneficial for both building and expanding new knowledge. leading to excellent practice (Wiroj Sararattana, 2013, p. 11)

Research Objective

1. To study the effectiveness of World–Class standard schools in the Northeast and causal factors selected to study.

2. To examine the causal relationship model of factors affecting the effectiveness of World–Class standard schools in the Northeast developed with empirical data.

3. To find ways to develop factors that directly affect the effectiveness of World–Class standard schools in the Northeast.

Research Methodology

In this research The researcher divided the research method into 3 phases: phase 1 modeling the hypothesis phase 2 checking consistency with empirical data (Rating Scale) phase 3 finding ways to develop factors influencing the effectiveness of standard schools World–Class in the Northeast The details are as follows.

Phase 1: Create a hypothesis model, divided into 2 steps as follows.

Step 1 Study and analysis of documents It is a study of principles, theories and concepts about factors affecting the effectiveness of World–Class standard schools. To determine the variables and the causal relationship model of the factors affecting the World–Class standard school effectiveness. In order to use such information to define the preliminary conceptual framework of the research.

Step 2: Expert Education In order for experts to present their opinions whether they agree with the factors obtained by the researcher from the study of relevant documents and research, including causal relationship analysis of factors affecting school effectiveness with World–Class standards.

Phase 2: checking for consistency with empirical data In this step, the researcher proceeded as follows.

Step 1: Population and sample determination To obtain a number of samples that are suitable for research and are representative of the population. The researcher has done the following.

1.1 The population in this research is 439 secondary schools in the Northeastern region of the academic year 2022, divided into small schools. medium school large school and large schools (Office of the Basic Education Commission, 2022)

1.2 The sample group in this research consisted of 420 secondary schools in the Northeastern region of the academic year 2022, using the criteria for determining the sample size. Specify the sample size as a function of the number of parameters to be estimated, i.e. there must be a sample size of approximately 20 schools per 1 parameter (Nonglak Wiratchai, 2005, p. 53). Therefore, the researcher uses a ratio of 0.7 to determine the number of schools as a unit. all random. Choosing a random sample of schools using proportional stratified random sampling using the size of the school as a strata and assigning data providers in each school, 3 people per school, consisting of 1 director of education, 1 head of academic department and 1 teacher. people, including a sample of 1,260 people.

Step 2 Creation and development of research tools To obtain content-correct and reliable research tools for use in data collection, a causal relationship model of factors affecting school effectiveness is of World–Class standard.

Step 3 Data Collection Data collection from sample schools The respondents were assigned to 1 school administrator, 1 academic supervisor and 1 teacher.

Step 4 Analysis and Interpretation.

Phase 3: Finding ways to develop factors influencing the effectiveness of World–Class standard schools. by doing the following.

1. Collect the data obtained from structural equation modeling (SEM) analysis and linear model analysis using Chi-square statistics. secondary education Come to prepare an interview form to find ways to develop and prepare work to study information from experts.

2. Prepare for interviews with 9 experts on improving factors affecting school effectiveness at World–Class standard schools of secondary schools.

3. Evaluate development guidelines Stufflebeam's theory was applied as a guideline for assessing the development of factors affecting school effectiveness of World–Class standard secondary schools obtained by experts in this research. The assessment model has chosen to use 3 standards for evaluation as follows. 1) Accuracy The proposed guidelines are accurate and consistent with the objectives of developing and improving those factors. The proposed approach is feasible in practice and 3) suitability is appropriate to implement.

4. Data analysis and interpretation The researcher analyzed the preliminary data using descriptive statistics, including frequency and percentage.

Conclusion

The results of the research on the causal relationship model of factors affecting the effectiveness of World–Class standard schools in the northeastern region. The research results can be summarized as follows.

1. The effectiveness of World–Class standard schools in the northeastern region and the causal factors are as follows. The overall school effectiveness level was at a high level ($\bar{X}$ = 4.25). The causal factors used in the study are as follows. Executive Leadership Variables Overall, the average was at a high level ($\bar{X}$ = 4.28) Organizational culture variables Overall, the average was at a high level ($\bar{X}$= 4.30) Teacher learning management variables Overall, the average was at a high level ($\bar{X}$ = 4.31) and learning organization variables Overall, the average was at a high level ($\bar{X}$ = 4.31).

2. Causal Model of Factors Affecting Effectiveness of World–Class Standard Schools in the Northeast are consistent with empirical data There is a statistical value for measuring the harmony of the pattern, which is a chi-square value of 62.99, a degree of freedom (df) of 47, a probability (p-value) of .05946, a chi-square value. Relative (χ2/df) is 1.34 RMSEA value of .016, GFI value of .99, AGFI value of .97. Latent variable outside executive leadership (K1) had a direct influence .75 Latent variables outside the organizational culture (K2) had a direct influence .05 Latent variables within teacher learning management (E1) had a direct influence -.06 and The latent variable within the learning organization (E2) had a direct influence .19 on the World–Class standard school effectiveness variable (E3).

3. Guidelines for developing factors influencing the effectiveness of international standard schools in the Northeast Experts offer the following. 1) Executive Leadership Development There are development guidelines as follows. Administrators should be aware of the needs of students, teachers and parents, encouraging everyone to be creative by expressing their individuality. have consciousness and awareness of duty of their own, managed with good governance and develop a network of relationships for maximum benefit of the school Give importance to the common interests and strive to achieve goals together with personnel in the organization to achieve higher sustainability. 2) Organizational culture development There are development guidelines as follows. Organizational culture development It is like defining an agreement of an organization that everyone should be aware of. And use it as a practice guideline in the organization. by linking leadership with their ideology will make it a living organization Happy with work, administrators, teachers and personnel. Organizational culture should be integrated with the teaching and learning process. working for the effectiveness of the quality of the organization in all dimensions. 3) development of teacher learning management Teachers should have confidence in their abilities. learn all the time Adaptable and flexible to changes in the content of the subjects being taught. Including integrating other subjects with the subjects taught in accordance with the current learning management guidelines. Include skills for understanding and using digital technology in teaching and learning. By emphasizing on the participation and interaction of learners in learning activities through various forms of practice. 4) Learning Organization Development The important thing that is fundamental to the development of a learning organization is that the organization must have a link between personnel and various knowledge bodies both inside and outside the organization together. along with having to clearly and efficiently set goals, directions, organizational forms, and operational methods of personnel of the organization. It also requires visionary leaders to support change.

Discussion

From the research on Causal Model of Factors Affecting Effectiveness of International Standard Schools in the Northeast The researcher has presented as an issue for discussion according to the assumptions of the research as follows.

1. School effectiveness of international standards and causal factors studied were at the high average level. The results can be discussed as follows. 1) Latent variables within the effectiveness of international standard schools The mean was at a high level, consisting of 3 variables that could be observed: Management with quality system and satisfaction of teachers, students and parents, which were also at a high level. It is a good thing that teachers and educational personnel can develop students to achieve important and necessary competencies at a high level. The parents have confidence in the quality of the international standard school. Including the ability of the administrators to manage the school to achieve the goals effectively, it shows that the international standard school is a school that achieves the goals of the established agency. The results of this research are consistent with Tawatchai Tang-uthairuang (2014, page 28). Said that the school was able to produce students with high academic achievement. Develop students' ability to adapt to their surroundings. and solve the problem In education management, educational strategic plans must be prepared in order to truly achieve the goals of education. There is an education plan in line with the government's policy. School administration must consist of teachers, students and parents. All activities must be handled with a system without gaps that can be implemented and without implacable. 2) Latent variables outside executive leadership The average is at a high level. and the 3 observational variables were the vision change leadership and building relationships between schools and communities. The average is also at a high level. School administrators can be regarded as the highest commander in the school would have a role in the management of things to meet the set goals. If the management has a good vision Being a change leader and having the potential to build relationships between the school and the community would make working in different fields. success both in and out of school It is an incentive for school personnel and those involved in various fields, including the community, to be willing to work. This corresponds to Anucha Ngernphaet (2016, page 95) that the leadership of school administrators It is important to help promote school performance. In addition, at present, schools have been decentralized to more administrative powers to schools, requiring executives with high abilities and leadership and a good atmosphere. which is a factor that affects the performance of personnel that will affect school effectiveness especially the administration of international standard schools to meet the objectives. 3) latent variables outside organizational culture The average is at a high level. and the four observed variables were personnel management organizational values behavior and teamwork The average is also at a high level. The organizational culture is like defining an organizational agreement that everyone should be aware of. And use it as a practice guideline in the organization. Therefore, an appropriate organizational culture will help the organization achieve its goals easily. Consistent with Piyamas Wongsaen (2017, page 132), stating that organizational culture is the guideline

The practice of people in the organization who adhere to the mission to lead to efficiency, whether they

Will be responsible for work or work in any mission must always take into account the results of the work.

4) latent variables within teacher learning management The average was at a high level and all 5 variables were observed: knowledge and understanding of learning standards. techniques and teaching methods Use of media/learning resources Assessment of learning skills and professional development The average is also at a high level. Teacher learning management is a learner development process by allowing learners to participate in learning activities. To develop learners in terms of intellectual, physical, emotional and social skills, as well as to enable students to learn happily. This is in line with Punya Chanthamat (2015, page 613), saying that teachers are important mechanisms that drive learners from the classroom. There will be adaptation, application, exchange of knowledge to enable responsive learning between learners and teachers. And 5) latent variables within the learning organization Overall, the average was at a high level. and the 5 observational variables were shared vision team learning systems thinking knowledge of oneself and having a pattern of thinking The average is also at a high level. Therefore, when the above average is at a high level, it is a factor that promotes international standard schools in the northeastern region as an organization that strives for excellence. The competence of personnel, comprising teachers and educators, is continuously promoted and developed in terms of knowledge, skills and

attitudes. By the management of the executives who are leaders and all members to change behaviors, ways of thinking, working methods to achieve change. Within the international standard school organization simultaneously to achieve the goal effectively. Consistent with Warattharee Praking (2018, page 5) that educational institutions can be effective learning organizations, they must seek ways to strengthen the structure of educational institutions. can help support teaching and learning continuously It also helps educational institutions to adapt to change. There is a development of the culture and atmosphere of the school itself. to look open cause cooperation and help each other.

2. Causal Model of Factors Affecting Effectiveness of International Standard Schools in the Northeast are consistent with empirical data which is in accordance with the assumptions set, namely latent variables outside executive leadership latent variables outside organizational culture latent variables within teacher learning management and latent variables within the learning organization have a direct influence on the effectiveness of international standard schools The latent variable outside executive leadership had the highest total influence, followed by the latent variable within the learning organization. latent variables outside organizational culture and latent variables within teacher learning management, respectively can be discussed as follows. 1) Executive Leadership which consists of having a vision change leadership and building relationships between schools and communities have a direct influence on school effectiveness Due to the fact that the school administrator is the highest commander within the school, there would be a role in managing things in accordance with the requirements set. If executives have high leadership Will inevitably cause subordinates to develop their own leadership and as a result, various tasks are effective at the school. This is consistent with the research of Jaturaphat Prathum (2016, page 124), which found that the direct influence of factors affecting school effectiveness was leadership factors. The displayed leadership behavior will result in a good atmosphere that is satisfactory. Causes good cooperation in the operation of the organization management to be effective. 2) organizational culture which consists of personnel management organizational values conduct and teamwork There was a direct influence on the effectiveness of international standard schools in the northeastern region. Due to shared beliefs and values, cooperation and bonds are enhanced. have a friendship with each other which is an important indicator for school effectiveness which is consistent with Pakkaphon Charoenlak (2019, page 7). stated that organizational culture is what helps to clarify the characteristics of an organization, and

concrete through the history, actions, beliefs, goals, values, norms and communications of the organization Schools are important organizations in human resource development with teachers as key personnel in driving various operations. In the organization, such educational goals can be achieved or not depending on the teacher because the teacher is the one who determines the future of the nation, therefore it is necessary to encourage teachers to be able to work effectively work with full responsibility full of intelligence and ability to achieve maximum efficiency. 3) teacher learning management which consists of knowledge and understanding of learning standards techniques and teaching methods Use of media/learning resources Assessment of learning skills and professional development It is a variable directly influencing the effectiveness of international standard schools in the northeastern region. Because all 5 observational variables are what the learners can truly learn about things. Consistent with the Bureau of Educational Quality Assurance and Planning (2015, page 3), it states that the direct influence of factors affecting school effectiveness is the learning management factor. so that all learners receive quality educational services from educational institutions to develop knowledge ability and desirable characteristics of learners. 4) learning organization which consists of shared vision team learning systems thinking knowledge of oneself and having a pattern of thinking It is a variable that has a direct influence on the efficiency of international standard schools in the northeastern region. Because all 5 observational variables are what enable students to learn effectively. by an organization that strives for excellence Promote and develop the competence of personnel consisting of teachers and educational personnel. in knowledge, skills and attitudes consistently. This is in line with Jirawan Sengyong (2018, page 3) stating that schools are educational units or educational institutes that will be developed into learning organizations that must focus on all members. person Stakeholder students Parents, school administrators at all

levels teachers and educational personnel enthusiastic to learn and develop oneself all the time in order to develop the potential of oneself and the organization.

3. Guidelines for developing factors influencing the effectiveness of international standard schools in the Northeast Experts offer the following. 1) Executive Leadership Development Administrators should be aware of the needs of students, teachers and parents, encouraging everyone to be creative by expressing their individuality. have consciousness and awareness of duty of their own, managed with good governance and develop a network of relationships for maximum benefit of the school Give importance to the common interests and strive to achieve goals together with personnel in the organization to achieve higher sustainability. 2) Organizational culture development It is like defining an agreement of an organization that everyone should be aware of. And use it as a practice guideline in the organization. by linking leadership with their ideology will make it a living organization Happy with work, administrators, teachers and personnel. Organizational culture should be integrated with the teaching and learning process. working for the effectiveness of the quality of the organization in all dimensions. 3) development of teacher learning management Teachers should have confidence in their abilities. learn all the time Adaptable and flexible to changes in the content of the subjects being taught. Including integrating other subjects with the subjects taught in accordance with the current learning management guidelines. Include skills for understanding and using digital technology in teaching and learning. By emphasizing on the participation and interaction of learners in learning activities through various forms of practice. 4) Learning Organization Development An international standard school that can be an effective learning organization There must be a way to strengthen the school structure system that can help promote Continuous support for teaching and learning and helping schools adapt to change The culture and atmosphere of the school are developed to be open. cause cooperation and mutual assistance Regulations can be set together. It also requires visionary leaders who support change. Strategies are planned that are in line with international standard school policies. And encourage personnel to have the courage to think and dare to do. In addition, personnel must also have to think outside the box, ready to learn and develop continuously.

Recommendation

This research yielded a causal relationship model of factors affecting school effectiveness with international standards. That has been validated by a research process and confirmed by experts. that the results are consistent with empirical data The direct influence of the variables can be used to develop school effectiveness. There are suggestions for use as follows. 1) agencies at the policy level, especially the Office of the Basic Education Commission Person in charge of the International Standard School Project Should encourage and develop and encourage executives to make personnel have a good common vision. Promote a good organizational culture Support effective learning management and fostering a learning organization to occur in international standard schools. 2) Organizations at the educational service area level must strengthen and develop school curriculums of international standards. The school's organizational culture that contributes to happy work practices leads to the development of learning management. There is supervision, monitoring, evaluation and morale building. This will lead to sustainable development of the school's effectiveness with international standards. 3) School administrators with international standards must strengthen the school structure system to help promote Continuous support for teaching and learning and helping schools adapt to change Encourage everyone to cooperate and help each other, be sincere and ready to change. There is a joint sharing of ideas to make decisions. This will be a mechanism to promote learning organization in international standard schools. All teachers and educators need to change their roles from being a teller. Become a facilitator of learning for students. Bringing technology into learning management to enable learners to achieve their full potential.

Developing Guidelines to Enhance Curriculum and Learning Management Competency of English Teachers

Jarunya Chaisol[1]
Vijittra Vonganusith[2]
Brendan D. McKell[3]
Yatawee Chaiyamat[4]

Abstract

The study was a preliminary study from a larger research project to investigate the characteristics for developing guidelines to enhance curriculum and learning management competency of English teachers. The data collection steps consisted of four steps: 1) synthesizing 15 academic documents, and papers, for the English teacher competency and research related to components of competency of English teachers; and 2) determining the indicators of competency of English teachers by using the content analysis method. The finding revealed that the competency indicators of English teachers comprised of three core components, including: 1) Knowledge; 2) Skills; 3) Characteristics; steps: 2.1) synthesizing 20 academic documents, and papers, for developing guidelines to enhance curriculum and learning management competency of teachers and research related to developing guidelines to enhance curriculum and learning management competency of teachers; and 2) determining the indicators of developing guidelines by using the content analysis method. The guidelines for enhancing curriculum and learning management competency of teachers comprised of 5 elements, including : 1) Curriculum construction and development; 2) Learning design; 3) Student-centered learning management; 4) Use and development of media Innovation; 5)Learning Measurement and Evaluation; steps: 3) The relationship between English teacher competencies and guidelines to enhance curriculum and learning management competency; steps: 4) Summary of knowledge related to English teacher competencies and guidelines to enhance curriculum and learning management competency.

Keywords: Guidelines Development, Competency of English teachers, Curriculum and Learning Management

Introduction

The current conditions of human life are changing rapidly both socially and economically, politics and governance can be said that the direction of the country is rooted in education, which is in line with the basic policies formulated by the state according to the 2017-2036 National Education Plan, which outlines the goals and direction of national education management and aims to develop an effective education management system and develop human resources so that they can work according to the needs of the job market and develop on an equal footing with international countries on the global stage In the midst of the rapidly changing tides of the world, the 21st century (Office of the Secretary-General of the Council on Education, 2560). Learning and communication with people around the world will be more extensive and will continue to increase without borders. English plays an important role as a tool for pursuing knowledge, a career, and negotiating for economic and social competition on the international stage. Therefore, Thailand should urgently increase the potential and

upgrade the ability to use English for people at all levels. The results of the Basic National Educational Test (O-NET) of Prathom Suksa 6 students in the academic year 2021, the students received a national average English score of only 39.22 (National Institute of Educational Testing Service, 2021). It can be seen that the level of English proficiency of the students. There is an urgent need to upgrade your ability to use the English language to be used as a tool to communicate and access information sources in various forms to improve the English proficiency of the students. Teachers play an important role in driving English proficiency enhancement. Teachers must adapt their teaching and learning process to keep up with the changes in the digital age, from being a "Teacher" to a "Coach" or "Learning Facilitator" and must learn the skills of learning in the 21st century (Panich, 2012).

Teacher competency is an important variable that can predict the quality of reform learners. Education, therefore, emphasizes teacher reform by considering teachers to be professional practitioners, emphasizing professional standards and ethics, and developing teachers with an emphasis on continuous improvement. (Office of Teacher Development and Basic Education Personnel, 2010) has determined the professional competencies of teachers to be used to assess the performance of educational personnel, namely core competencies and professional competencies. It is the combined competency that all teachers and educational personnel must have. This competency is important for the performance of teaching and learning management to be efficient and effective directly to students, which will directly affect the development of learners to have higher potential and raise quality. better education (Committee on Basic Education, 2005)

From the aforementioned background and importance, the researcher concluded that the study of English teacher competency development approaches in curriculum administration and learning management—which is the ability to create and develop curriculum Systematic integrated learning activities are designed to be suitable for the age and needs of the learners, with a focus on the learners. The results of the learning design are used in learning management and adaptation, according to the situation, to affect the learners as expected. There are various assessments of learners' learning according to real-world conditions. Research has been conducted on the core competency components of English teachers and on the development of curriculum administration and learning management competencies. What are the results or useful findings, and how can they be used in a concrete way? In order to answer the aforementioned question, the researcher considers that it is necessary to synthesize 15 research papers related to English teacher competency core components and guidelines for the development of teachers' competency in curriculum administration and learning management in order to obtain conclusions and knowledge from 20 different research papers, which will be especially useful in studying and setting guidelines for teachers to perform their duties. in teaching and learning to create efficiency and effectiveness for students. This will result in the development of students to have higher potential and elevate the quality of education, which will affect the prosperity of the nation in the future.

Research Objective

1. To synthesize the main components of English teacher competency.
2. To synthesize the components of the concept of competency development in curriculum administration and learning management of English teachers.
3. To study the relationship between English teacher competencies and Guidelines to Enhance Curriculum and Learning Management Competency

Research Methodology

The synthesis of related research was divided into 2 parts, the first part was to synthesize 15 research papers for the English teacher competency core component and the second part conducted a synthesis of 20

research papers for the study of teacher competency development approaches in curriculum administration and teacher learning management. The research is divided into 4 steps as follows.

Step 1: Synthesis of English teacher competencies components. The data source is Research and articles. The selection criteria were searched from various databases: 1) from the Google Scholar website 2) from the TDC (Thai Digital Collection) http://tdc.thailis.or.th., a total of 15 stories. The tools used in this step are English teacher competence components synthesis record form using percentage frequency define the criterion for selecting elements with frequencies from 5 or more.

Step 2. Composition synthesis and enrichment approaches. teacher competencies in curriculum administration and manage learning. The data source is research and articles. The selection criteria were searched from various databases: 1) from the Google Scholar website 2) from the TDC (Thai Digital Collection) http://tdc.thailis.or.th. A total of 20 stories. The tools used in this step are Composition synthesis record form and enhancement guidelines teacher competencies in curriculum administration and manage learning. Using percentage frequency define the criterion for selecting elements with frequencies from 5 or more.

Step 3: Study the relationship between English teacher competency component with curriculum and learning management competency of English teachers.

Step 4: Summary of knowledge related to English teacher competency component with curriculum and learning management competency of English teachers.

Conclusion

Table 1 Results of the synthesis of the components of English teacher competency.

Table 1 presents the results of the synthesis of English teacher competency core components, the researcher identified high-frequency English teacher competency components, frequency of 5 or more or representing 33.3 percent or more. It was found that English teacher competency had 3 components: 1) Knowledge (93.3 %) 2) Skills (73.3%) and 3) Personal Characteristic (66.6%). Each component has the following meanings.

1) Knowledge means that teachers must know and understand the techniques and methods for teaching English, as well as know and understand their students, the curriculum for teaching English, linguistics, culture, and the relationship between language and culture.

2) Skills means that to achieve maximum efficiency for students, teachers must have self-development skills, technology media skills, listening, speaking, reading, and writing skills, working with others measurement and evaluation skills, communication skills, and learning management skills.

3) Personal characteristics mean that students must be encouraged to love learning and have good personality, motivated, love learning and have morality

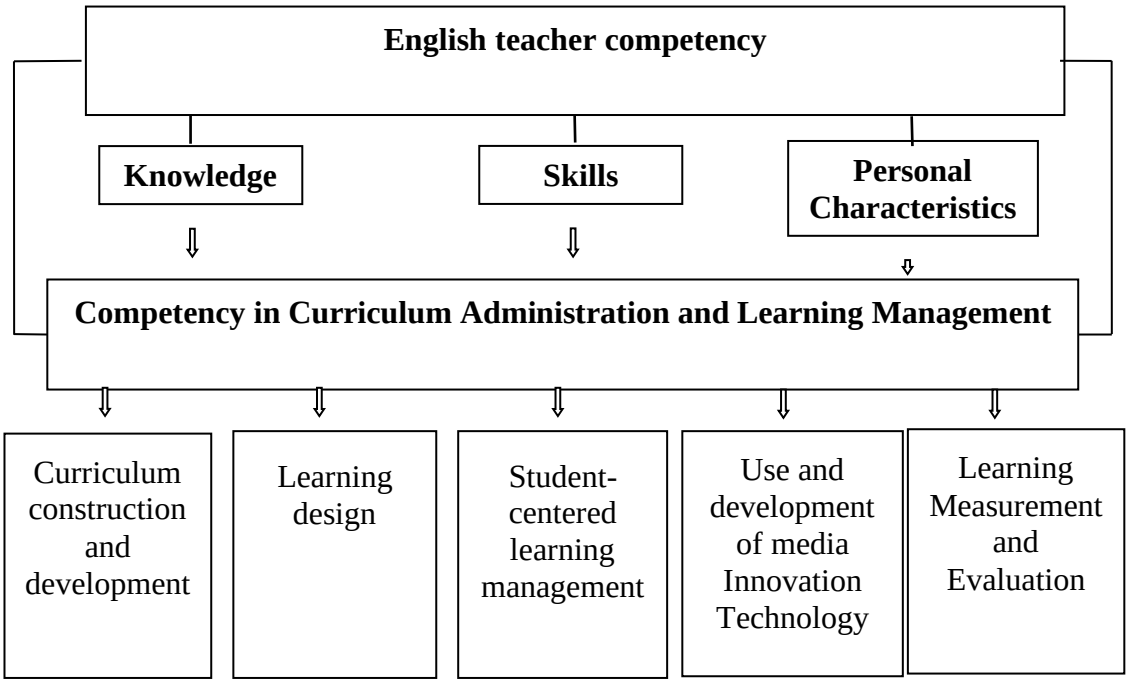
Table 2 illustrates the constituent synthesis results and enrichment guidelines teacher competencies in curriculum administration and learning management. The composition, results of synthesis of components, and guidelines for enhancing teacher competencies in curriculum administration and managing learning were defined and selected among the components with a high frequency of 5 or more, or 33.3 percent or more, it was found that the elements of approaches to enhance teacher competencies in curriculum administration and management consisted of 5 components: 1) Curriculum creation and development (45%), 2) Learning design (40%), 3) Student-centered learning management (45%), 4) Use and development of media, innovation, and technology (45%), 5) Learning management measure and evaluate learning outcomes (45%), Each component has the following meanings.

1) Curriculum construction and development mean that teachers in educational institutions can create or develop learning theme group courses that are compatible with the core curriculum.

2) Learning design means school teachers can determine learner's learning results, focusing on comprehensive analysis, active application, suitable learning materials, differences, and various learning activities designed according to student's age and community needs. Provide students with opportunities to participate in learning design, activities, and learning evaluation, and formulate a systematic learning management plan through the following ways: Consistent consolidation apply the results of learning design to learning management, and apply them appropriately according to the situation, and produce the expected effect for students and evaluate the design of learning partners for improvement development.



3) Student-centered learning management means that teachers in schools can create a database to design student-centered learning. Use a variety of teaching styles or techniques to maximize student's potential. Organize learning activities to cultivate or promote learner's ideal characteristics and performance. Use psychology to manage learning, so that students can learn happily and give full play to their potential. Use the learning resources in the community and local wisdom to manage and develop the learning network between the school and parents and the community.

4) Use and development of media Innovation Technology means teachers in educational institutions can use media, innovation and technology to manage learning in a variety of ways, suitable for content and learning activities. Computer technology can be used to produce media/innovations used in learning management.

5) Learning Measurement and Evaluation refers to the process of collecting evidence, empirical data at the end of the learning process to determine the value of achieving objectives or learning outcomes. Learners as well use it to improve curriculum and instruction.

From research synthesis of the relationship between English teacher competencies and the concept of competency enhancement in curriculum administration and learning management.

The body of knowledge related to English teacher competency development in curriculum administration and learning management can be summarized as follows:

Discussion

Conclusion and Discussion

The synthesis of English teacher competency elements consists of 3 components: 1) knowledge, 2) skills and 3) Personal Characteristic, which demonstrates that English teachers should have competencies that cover knowledge, abilities, skills, and desirable attributes. Learn English and become a role model for communicating with native speakers. Understanding multiculturalism, including the effective use of technology in teaching and learning. This is in line with the idea of Richards (2001) said that English teachers must have the ability to use English well as be a good role models for students. Knowledge of the subjects taught. Ability in pedagogical skills. It has the attributes of being an English teacher. It consists of five components: 1) curriculum creation and development, 2) learning design, 3) learner-centered learning management, 4) use and development of media, innovation, technology, 5) measurement and evaluation of learning outcomes. The competency of teachers in curriculum administration and learning management in these 5 areas is an important part that makes teachers have the quality of work and the quality of learning management. This is in line with the research of Chainat Ploybutr (2016) who studied the development of teacher competency building programs in curriculum administration and learning management for educational institutions. Under the Office of Secondary Education Service Area 30. It was found that there are 5 components of teacher competence in curriculum management: curriculum creation and development; Learning design, learner-focused learning management, use and development of innovative technology materials for learning management, and learning measurement and evaluation are in line with the research of Siriporn Sripanya (2017) that has studied the subject. Developing a learner-centered learning management competency-building approach for teachers in educational institutions. Affiliations with the District Bueng Kan Elementary Education It was found that learner-focused learning management competencies are the priority of teachers. There are 5 components: learning management, learning management plan, learning management materials. Teacher role Measuring learning outcomes

Recommendation

Research studies should be conducted to develop models or approaches for improving English teacher competency in curriculum management and learning management using other methods for data collection, such as focus groups or connoisseurship, to use the data to create guidelines or patterns for improving English teacher competency in curriculum management and learning management.

Using Storytelling Practice to Improve Grade 7 Thai Students' Vocabulary Knowledge Involving Word Meaning, Aural Word Recognition and Pronunciation

Amornrat Wanpimai[1]
Tikamporn Wuttipornpong[2]

Abstract

The present study investigated whether teaching through the PPP method with storytelling practice can improve knowledge of English vocabulary in terms of word meaning, aural word recognition and word pronunciation better than that with the conventional vocabulary exerises, focusing mainly on word memorization. The participants were 64 7th-grade students from a secondary school in Ubon Ratchathani, Thailand. They were divided into two groups: those who predominantly learned by memorization and those who learned by storytelling. The sample group took three sets of identical pretest and posttest, including a word meaning test, a pronunciation test, and a dictation test, each of 25 words from the same tests before and after the intervention. The statistical results showed that both methods could significantly improve English vocabulary ($p<0.01$). However, the group that learned through the practice of storytelling had scores on the posttest that were significantly ($p<0.01$) better than those who learned through memorization practice or conventional practice.

Keywords: English vocabulary knowledge, storytelling, word meaning, aural word recognition, pronunciation

Introduction

Basically, language acquisition requires a strong vocabulary knowledge as it is a fundamental knowledge required to achieve all of the required language skills (Joshi, 2006; Kame'enui &Baumann, 2012; Nation, 2001). Therefore, words are crucial in communication because even if there is some grammatical error, the message may be delivered (Wilkins, 1972). In contrast, if there are no words to transmit the knowledge, it cannot be delivered. Unfortunately, several prior research studies have found that Thai learners struggle with vocabulary learning (Chanphet, 2004; Kuntung, 2007; Saenpakdeejit, 2014; and Srihasarn & Wuttipornpong 2013).

According to Saenpakdeejit (2014), students in Thailand frequently have difficulty learning English, and this might be due to a lack of lexical knowledge. Apart from having difficulty in recognizing words' meanings, a common and serious issue with vocabulary is that most Thai students are unable to pronounce nor do they understand the pronunciation of the words they hear. Thus, if students have difficulty pronouncing the words, they are inclined to not recognize the words' aural forms, and their vocabulary acquisition will suffer. Hence, pronunciation is part of vocabulary knowledge that should not be overlooked when teaching vocabulary to non-native speakers.

In actual fact, relevant prior studies have indicated that employing storytelling as a language teaching technique can help students enhance their vocabulary knowledge, in terms of words' meanings (e.g. Chanphet, 2003; Srihasarn and Wuttipornpong, 2013; Sudathip et al, 2017), and words' meanings, spelling, pronunciation and parts of speech (Kunthung, 2007). In addition, Yang et al. (2016) reported that using storytelling and retelling and requiring students to compose higher-order thinking questions enhanced the oral proficiency of both the Mainland

Chinese and Taiwanese elementary students. Afshar and Mojavezi (2017) found that visual storytelling was more effective than aural storytelling at helping intermediate level Iranian EFL learners to remember the language.

Research Objective

The present study aimed to investigate whether storytelling as a teaching practice implemented as part of the PPP method could improve grade-7 Thai students' vocabulary knowledge, involving word meaning, aural word recognition and word pronunciation.

The Information Processing Theory and Vocabulary Learning

The information processing theory focuses on the mental processes, which are involved in interpreting and processing the information that humans have received.

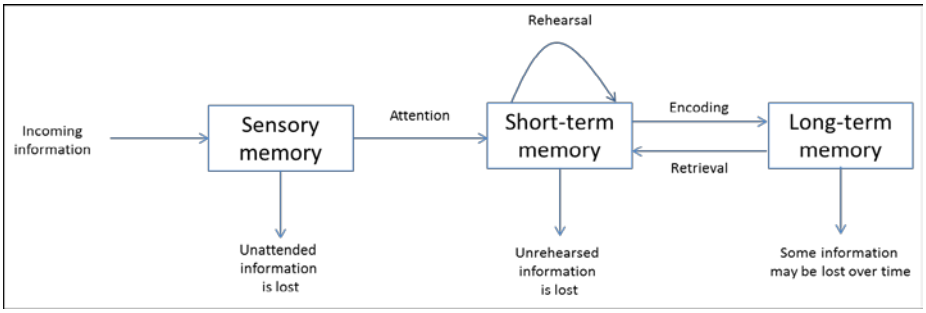

Figure 1 Atkinson and Shiffrin's information processing model

Source: Atkinson and Shiffrin (1968)

Atkinson and Shiffrin (1968) proposed that the information processing model be divided into different stages with different perspectives on memory related to the three types of memory that support the learners' ability to notice, be aware, and learn new things. Firstly, sensory memory is the memory related to the five perceptual senses, seeing, hearing, touching, tasting, and smelling. Sensory memory receives incoming information or input. However, if the information is not noticed, it is lost from this memory. On the contrary, if the information is noticed, it will be passed to short-term memory. Short-term memory, or working memory, is the capacity for holding information for further manipulation, storage, and retrieval and retains the information for 15–30 seconds. The information input can be held in short-term memory through rehearsing or repeating. At this stage, rehearsal or repetition is an important part of short-term memory. If the information is not rehearsed adequately, it will not be transferred to the long-term memory storage. In contrast, if the information is rehearsed several times, it is likely to be transferred to the long-term memory storage, where the information is stored in our conscious mind and can be retrieved when we need to use it. In other words, once the information is stored in the long-term memory, it will remain there as long as it is used.

The Noticing Hypothesis

As mentioned above, if the information or input is not noticed, it will be lost and not transferred to the long-term storage for use later. Thus, the importance of noticing should be briefly discussed following the Noticing Hypothesis. Schmidt (1990, 2001, 2010) proposes the Noticing Hypothesis as a hypothesis in second-language acquisition holding that input cannot turn into intake if it is not noticed, either explicitly or implicitly. He also emphasizes that noticing is the critical starting point for acquiring language features and adds further whether the input will be noticed also depends on the individual learner's internal factors, for example, learning motivation,

aptitude, existing L2 knowledge and processing ability, as well as the external factors such as input characteristics, teaching management, and task characteristics (ibid., 2010).

The Noticing Hypothesis comprises three components: input, intake, and output (Schmidt, 1990). Input is the language that learners are exposed to while intake refers to what learners have noticed or have noticed and learned. Output is the language that learners produce after noticing and learning. Second language learners will acquire a language feature when they have an awareness of the input that they have noticed. That is, the learners will learn new knowledge only when it is noticed.

Schmidt (1990) also asserts that noticing depends on six influencing factors as follows. First, the frequency of input is the number of times that learners encounter the language. Second, perceptual salience is the noticeable feature that makes learners take notice, i.e., adding –ing, es, s, etc. Third, instructional strategies are the ways that used to draw a learner's attention to the input. Fourth, individual processing ability is referred to as a component of aptitude that allows an individual to learn something new. The individual processing ability is dependent on the learner's skill at clarifying and managing information. Fifth, the readiness to notice is the learner's being ready or prepared to notice an input. It is a mechanism to promote learners' ability to be directed to input. Finally, the task demands are the way learners see the target feature through the instructional tasks which are designed to help learners learn new things.

Storytelling as a teaching technique

In terms of language teaching, storytelling is a technique or strategy amongst many in the English language teaching field (Morgan & Rinvolucri, 1983). It is also a vehicle for expanding children's listening, speaking, and writing skills and enhancing their vocabulary knowledge. Through the process of telling a story, learners have chances to improve their vocabulary knowledge and understand new words in the language input they notice. Indeed, in the process, learners are directed to listen to, and perhaps also read, orally use, rehearse and recall words in the story. That is, they are prompted to 'notice' words as they have to use them for retelling, i.e. making output, all of which promote L2 learning and intake. Thus, storytelling is a teaching technique to effectively improve students' vocabulary learning (Maldelez, 2010).

When second language learners listen to a story, they try to guess the meaning of new words and grasp the main idea of the story. In this way, it promotes students' generating more vocabulary storage from listening to and retelling the story (Robinson, 2008). Listening to stories, again and again, supports students with acquiring and reinforcing language items, such as lexical items (Ellis and Brewster, 1991). Despite the advantages, storytelling has some disadvantages. The time in preparation is one such disadvantage (Rosen, 1988). Another disadvantage is students' learning styles. Some students need more time to listen and practice retelling the story while some of them do not need it (Davidson, 2003).

Research Methodology

Participants

Since the present study aimed to improve the vocabulary knowledge of the students at one of researchers' school, the population was grade-7 students at a Thai secondary school. The participants were purposive sampling of 64 grade-7 students at the aforementioned school. These 64 students came from two classes, out of four, with similar scores based on the pretest group mean scores. To find out whether the two selected groups were similar in terms of their knowledge of the target words prior to the intervention, an independent t-test was performed on both groups' pretest mean scores, and the result showed that there was not a significant difference between the conventional group (M = 2.06, SD = 2.05) and the storytelling group (M = 2.36, SD = 2.64); t (1) = -0.402, p = 0.689, which was greater than 0.05. Therefore, the two selected groups' performance on the posttest could be statistically compared. The participants were divided into a conventional group and a storytelling group. The conventional group learned the target words through the PPP method with

conventional vocabulary practice, predominantly made up of vocabulary exercises, asking students to do word-picture matching and given the meaning in Thai, while the storytelling group was taught using the PPP method with storytelling activities in the practice sessions.

Variables

The independent variables were the PPP method with conventional vocabulary practice and the PPP method with storytelling activities. The dependent variables comprised group mean scores from the three measures obtained from the pretests and posttests on word meaning, aural word recognition and word pronunciation. The statistics used were paired-sample t-tests and independent sample t-tests.

Research Instrument

The pretests and posttests were the same set of tests, including a pronunciation test, a word meaning test, and a dictation test used to test the students' ability to recognize the pronunciation of the words, i.e. aural word recognition. The themes of the words were smart animals and food. These 25 words, shown in Table 1 below, had not been previously taught to the participants.

Table 1 List of the 25 target words

The twenty-five target words				
garden	get	clever	ice cream	vegetable
cheese	healthy	have	pet	hate
smart	flavor	tomato	intelligent	say
fruit	problem	flower	chocolate	friend
favorite	eat	stupid	salad	like

The researchers performed test reliability by asking students from two non-selected classes to take the test. When the 75 test items were analyzed to identify the overall test's reliability using Kuder Richardson's KR-20 formula, the confidence value was 0.71.

Data Collection

All the pretests, the posttests, and the treatment sessions were completed during the self-learning hours outside the class time, 50 minutes for each session, and eight sessions in total, that is two sessions per learning passage/story. The pretests were tried out one week before the treatment and the posttest one week after it. The participants were given as much time as they needed for each test, and all of them finished them within an hour.

During the treatment sessions, the participants in the storytelling group received the PPP method with storytelling practice while those in the conventional group received the PPP method with conventional vocabulary practice, mainly matching pictures and words, and putting the words in the correct groups or themes.

In the presentation session, students from both groups did the same learning activities, that is, they learned new words from flash cards with pictures on them, listened to the teacher's pronunciation of the words, then each student was asked to pronounce the words after the teacher. In the practice session, the students in the conventional group matched the words and the pictures that were related to each other. Later, they did the conventional exercises, predominantly matching pictures with words and give the words' meanings in Thai, and ended this session by pronouncing the words again. As for those in the storytelling group, they listened to the story with the pictures presented to them. Then, they listened to the story again and filled in the blanks with the target words. After that, they read the story together before receiving the correct answers from the teacher.

In the language production session, the conventional group worked in groups of three to categorize the words into topics. Then, they spent the rest of the session time memorizing the words individually. In this same session, the storytelling group took turns retelling the story in groups of three. Then, two students were randomly selected to retell the story individually in front of the class, and the teacher provided feedback to the participants when they made a mistake.

Data Analysis

As described earlier, the pretests and posttests were the same set of three tests, including a pronunciation test, a word meaning test, and a dictation test. Each test consisted of 25 items. The students would receive one mark for each correct item, and zero mark for each wrong item. Minor misspelling of an English word would not be counted as wrong, e.g. *chees* for *cheese*. The statistics used were paired sample t-tests to compare within group mean scores and independent sample t-tests to compare between group mean scores.

Research Results

A. Within group results on the three aspects of vocabulary knowledge

The conventional group

To determine whether the PPP method with conventional vocabulary practice and the PPP method with storytelling practice effectively helped students in each group, paired sample t-tests were calculated on the pretests' and posttests' scores from the three vocabulary aspects: word meaning, aural word recognition and word pronunciation. The within group results for the conventional group receiving the PPP method with conventional vocabulary practice are summarized in Table 2 below.

Table 2 Paired sample t-test results on the three aspects of vocabulary knowledge for the conventional group

Aspect	Test	Mean	Std. Deviation	Mean Differences	T-Value	Sig. (2-tailed)
word meaning	Pretest	0.58	0.88	-2.32	-8.67	0.000**
	Posttest	2.90	1.35			
aural word recognition	Pretest	0.93	1.03	0.03	0.14	0.887*
	Posttest	0.90	0.83			
word pronunciation	Pretest	0.55	0.81	-3.87	-13.41	0.000**
	Posttest	4.42	1.54			

*p>0.05, **p<0.001

Based on the results in Table 2, overall, results from the pretest and posttest mean scores on the three aspects revealed that there were significant differences between the pretest and posttest mean scores on two aspects, that is, word meaning aspect ($p<0.001$) and word pronunciation aspect ($p<0.001$) while that of the aural word recognition aspect did not reach a significant difference ($p>0.05$). These results can be interpreted that the PPP method with vocabulary practice, the conventional instruction, could help the participants to significantly improve their vocabulary knowledge in terms of word meaning and word pronunciation, but not aural word recognition.

The storytelling group

The within group results for the storytelling group receiving the PPP method with storytelling are summarized in Table 3 below.

Based on the results in Table 3, overall, results from the pretest and the posttest mean scores showed that there were significant differences between the pretest and the posttest mean scores in all three aspects, namely word meaning aspect ($p<0.001$), word pronunciation aspect ($p<0.001$), and to a lesser extent, aural word recognition aspect ($p<0.01$).

Table 3 Paired sample t-test results on the three aspects of vocabulary knowledge for the storytelling group

Aspect	Test	Mean	Std. Deviation	Mean Differences	T-Value	Sig. (2-tailed)
word meaning	Pretest	0.51	1.23	-4.09	-6.45	0.000**
	Posttest	4.61	4.26			
Aural word recognition	Pretest	1.39	2.39	-1.12	-3.81	0.001*
	Posttest	2.51	3.79			
word pronunciation	Pretest	0.45	0.83	-6.94	-8.86	0.000**
	Posttest	7.39	4.76			

*p>0.01, **p<0.001

These results indicated that the PPP method with storytelling practice could help the students significantly learn the meaning of the target words, recognize the aural target words, and pronounce the target words. Interestingly, the PPP method with storytelling practice could significantly enhance the storytelling group's ability to recognize the sounds or the pronunciation of the target words whereas the PPP method with conventional vocabulary practice did not.

B. Between group results on the three aspects of vocabulary knowledge

This section presents the results from the scores on the three aspects for both groups to determine whether any one of the two methods was more effective than the other. The results are shown in Table 4.

Table 4 Results from independent sample t-tests on the posttest scores on the three aspects

Aspect	Group	N	Mean	Std. Deviation	T-Value	Sig. (2-tailed)
word meaning	Conventional	31	2.90	1.35	-2.18	0.035**
	Storytelling	33	4.61	4.26		
aural word recognition	Conventional	31	0.90	0.83	-2.38	0.023**
	Storytelling	33	2.51	3.79		
word pronunciation	Conventional	31	4.42	1.54	-3.41	0.002*
	Storytelling	33	7.39	4.76		

*p<0.01, **p<0.05

Based on the result from Table 4, there was a significant difference in scores on each of the three aspects between the conventional group and the storytelling group. Concerning word meaning aspect, the storytelling group ($M = 4.61$, $SD = 4.26$) outperformed the conventional group ($M = 2.90$, $SD = 1.35$) at $p = 0.035$, which is smaller than 0.05. Regarding aural word recognition aspect, there was also a significant difference in scores between the storytelling group ($M = 2.51$, $SD = 3.79$) outperformed the conventional group ($M = 0.90$, $SD = 0.83$) at $p = 0.002$, which is smaller than 0.01. As for the last aspect, word pronunciation, the storytelling group ($M = 7.39$, $SD =$

4.76) significantly did better than the conventional group (M = 4.42, SD = 1.54) at p = 0.002, which is smaller than 0.01. These results pointed out that the PPP method with storytelling practice was more effective than the PPP method with conventional vocabulary practice.

All in all, results from Table 4 indicate that the PPP method with storytelling practice was more effective than that with conventional vocabulary practice in that the former could enhance the students' performance on all vocabulary aspects, particularly on word pronunciation aspect, the one that the convention group' mean score did not reach significance. This may be so because this aspect was in favor of the students in the storytelling group who had far more chances to practice word pronunciation.

Conclusion

The conclusion was drawn in relation to the present study's objective, which was to determine whether storytelling as a teaching practice implemented in the PPP method could enhance grade-7 Thai students' target vocabulary knowledge aspects, namely word meaning, aural word recognition and word pronunciation. Clearly, statistical results have shown that storytelling as a language practice could help the students significantly improve their vocabulary knowledge in all three aspects.

Despite the significant results, as a matter of fact, the two groups' mean scores on all aspects were still very low, that is, below 8 marks (out of 25). This pointed out that much more time for more practice should be provided for the students.

Discussion

According to the results from Table 2, the PPP method with conventional vocabulary practice could significantly help the students learn words' meanings and word pronunciation but not aural word recognition. This may be because in the presentation, practice and production sessions, the students were exposed to the target words several times through various learning activities, where they were trained to remember words' spelling and meanings on flash cards with pictures, did word-picture matching activities, and completed conventional exercises prompting them to provide words' meanings in Thai. These students also practiced pronouncing the words after the teacher. These classroom activities and exercises in the textbook directed the students to notice and rehearse the words repeatedly, allowing the noticed information input to be transferred from short-term memory to long-term memory storage to be retrieved later when needed (Atkinson & Shiffrin, 1968; Schmidt, 1990, 2001, 2010). Regarding the fact that their result on the aural word recognition did not reach significant level although they listened to the teacher's pronunciation of the words, this may be because the practice was not adequate.

According to the results from Table 3, the PPP method with storytelling practice could significantly help the students improve their vocabulary knowledge regarding all of the three target aspects, including the aural word recognition aspect the other method was unsuccessful in so doing. The most likely explanation may be because storytelling activity permitted the students to get exposed to the aural form of those words when they were listening to the same words in the same story by the teacher as well as by their classmates when taking turns to retell and, inevitably, attend the retelling of the story. Apparently, storytelling activity prompted the students to lend their ears to the words better than conventional vocabulary practice or exercises.

Based on the between group results from Table 4, the storytelling group significantly surpassed the conventional group in all vocabulary aspects. This could be explained that the processes in storytelling activity promote noticing. The need to retell the story urged the students to have to learn about the words in the story. To be able to retell the story, they needed to know several things about the words, including the words' meanings and how they were pronounced. Then, they needed to train themselves to pronounce those words. When listening to the story, the students were trying to guess the meaning of new words and understand the storyline, all of

which helped acquire more vocabulary from listening to and retelling the story (Robinson, 2008). Through repeatedly listening to the story, the words were reinforced (Ellis & Brewster, 1991).

Recommendation

The present study has demonstrated that storytelling as a language teaching practice can be introduced to the PPP method and is effective in enhancing L2 learners' vocabulary knowledge in terms of word meaning, aural word recognition and word pronunciation. It is even more effective than the conventional vocabulary practice in the same amount of time. Thus, it is highly recommended that language teachers should bring it into their class. Future research may wish to explore effects on fully implementing storytelling in the class as the sole teaching method, not just for practice, possibly in comparison to the conventional method, which is common in the Thai context.

Education Network Management in a VUCA World

Supakit Wittayasin[1]
Chadaporn Chaiwungrach[2]
Sarawut Poca[3]
Chuankid Masena[4]
Pongthorn Singpan[5]

Abstract

Current state of the world is called VUCA. It is an acronym that stands for Volatility, Uncertainty, Complexity, and Ambiguity. VUCA affects all aspects in the world, particularly in the business and strategic planning contexts. People have to be aware of and response to its effect. Education is also changed by VUCA condition. Especially, the latest COVID-19 pandemic causes a serious educational problem which all stakeholders need to resolve it in order to develop education continuously and effectively. Education network is considered as one of effective tools to support education management.

This article aims at presenting characteristics of VUCA world, VUCA Prime as a tool to deal with VUCA world, agile leadership, educational network management. Guidelines for managing educational networks in a VUCA World are also proposed.

Keywords: VUCA World, VUCA Prime, Agile Leadership, Education Network Management,

Introduction

Caused by three important elements which are globalization, big bang of technology, and financialization, nowadays, the world has changed dramatically in all aspects (Wattanaporn Rangaptook, 2020). Norarat Fanchian (2019) elaborated that globalization is the fusion for global society by connecting every conner of the world together. People can communicate and travel throughout the world in a short time. Big bang of technology is the rapid advancement of technology in recent years. This leads to innovations in various industries and fosters the world to change more rapidly. Financialization is a capitalism trend that financial transaction plays a vital role in economic system. This makes financial innovation that converts assets into capital.

Rapid changes in various fields also affect the state of mind of people, including the way of life that has changed (Shliakhovchuk, 2021). Many incidents occur without foreseeing. COVID-19 is one of examples that many organizations have to adapt to internal and external changes. Several firms changed their organizational structure or working process in order to be able to continue operating in this condition.

The current state of the world with volatility, uncertainty, complexity, and ambiguity is referred to VUCA or VUCA world (Bywater and Lewis, 2019; Hadar, 2020). An acronym “VUCA” was firstly used by Warren Bennis and Burt Nanus in 1987. This concept was also used in US Army War College before spreading all over the world during the Cold War (de Wet, 2019). Subsequently, VUCA was used in business by strategic leaders in an attempt to explain the condition of complex, chaotic, volatile, and rapidly changing of business environment.

[5] Ed.D. lecturer in Educational Administration, Faculty of Education, Ubon Ratchathani Rajabhat University

VUCA is an acronym that stands for Volatility, Uncertainty, Complexity, and Ambiguity. It is used to describe the current state of the world, particularly in the business and strategic planning contexts. Volatility refers to the rapid and high level of changes in the environment. It cannot be predictable such as disruptive innovation. Uncertainty refers to the lack of clarity because today's world is highly unstable. Therefore, it is difficult to know what the future holds or to make a decision. Complexity refers to the number of systematic factors and variables that affects decision-making. This can make it difficult to predict outcomes or identify cause-and-effect relationships. Ambiguity is the lack of clear meaning or definition in a given situation or environment. Ambiguity can make it difficult to understand the implications of a situation or to make decisions (Sasima Suksawang, 2017).

To sum up, VUCA world is the global situation with volatility, uncertainty, complexity, and ambiguity. It highlights rapid change of today's environment, which can make it challenging to make decisions, predict outcomes, and plan for the future. It is a world where traditional ways of thinking and problem-solving may no longer be effective, and where organizations and individuals must be able to adapt to change and make decisions.

VUCA vs. Education

Since VUCA was introduced to the world, it has affected all sectors such as military, business, technology, politics, heath, education, and etc. In an aspect of education, educational organizations, educators, students, and stakeholders cannot avoid the effect of it. Pultoo and Oojorah (2020) provided that COVID-19, one of VUCA phenomena, causes learning loss of 1.5 billion students throughout the world.

VUCA can affect education in several ways.

Volatility: The rapid changes in technology, demographics, and global economic and political conditions can make it difficult for educators to anticipate and respond to the needs of students.

Uncertainty: With so much change happening, educators may find it difficult to predict what skills and knowledge students will need in the future. This can make it challenging to design curriculum and assessments that are relevant and useful.

Complexity: The interconnectedness and interdependence of various factors in education can make it difficult to understand and address problems or opportunities. For example, social and economic factors can affect student achievement, but it can be difficult to address those factors.

Ambiguity: The lack of clear definitions and understanding of the goals and objectives of education can make it difficult for educators to make decisions and measure progress.

In Thailand, an urgent education problem is learning loss. Thai students have experienced a decline in their academic progress as a result of the disruptions caused by the COVID-19 pandemic. This could be due to a variety of factors, such as a lack of access to technology, disruptions to routine and support systems, and changes in teaching and evaluation methods. Office of the Education Council (2022) stated that COVID-19 gives both positive and negative impacts on education in Thailand. Positive impacts are the acceleration in educational technology development and the increase of the use of technology in teaching. On the other hand, negative impacts are the decrease of teaching and learning quality, lack of opportunity to practice operational skills, lack of internet network, and the increase of expense of learning.

According to the National education plan 2017-2036, a problem requiring urgent development of Thai education is education quality. Education management in Thailand is not correspond to VUCA. For example, the quality of the workforce does not match the demands of the job market. Learning achievement at the basic level of education is much lower than the average. The proportion of students in vocational education is less than that of general education students that leads to the shortage of middle-level workforce. There is also a problem of managing a small educational institution that lacks resources (Office of the Education Council, 2017).

As mentioned, current education is influenced by the condition of VUCA. Although there are some advantages, various education problems caused by VUCA occurred such as learning loss, lack of suitable learning resources, out of date learning management, and etc. Thus, educators must be able to adapt to change, think strategically and creatively, and make decisions. They need to be flexible and open to new ideas and approaches in order to maintain and enhance education quality in a VUCA world.

Dealing with VUCA

Dealing with a VUCA (volatility, uncertainty, complexity, and ambiguity) world can be challenging, but there are several strategies that leaders and organizations can employ to navigate this type of environment effectively. Two notions that can be adopted to cope with VUCA are VUCA Prime and agile leadership.

The notion of VUCA Prime was firstly introduced in 2007 by Robert Johansen. It is a model for behavioral leadership against VUCA. VUCA Prime consists of four positive responses to VUCA which are Vision, Understanding, Clarity, and Agility.

Vision rises above Volatility. Leaders should maintain attention on new strategy objectives and the desired target state when conditions are changing abruptly. A compelling future vision that unites stakeholders around the goal of the transformation, the scope of the ambition, and the type of rewards should be presented here.

Understanding reduces Uncertainty. When facing uncertainty, study and experiment gradually to better comprehend external political, economic, social, technological, legislative, and environmental aspects.

Clarity counters Complexity. Simplification is required when encountering with the unknown and unpredictable situation. Clarity will lead to decisions and effective implementation.

Agility overcomes Ambiguity. Be prepared to modify your strategy when there are several possible outcomes in the future. Adopting the heart of agile practice which are collaborate, deliver, reflect, and improve to produce better results together is necessary to foster organizational agility (DiBartolomeo, 2022).

In educational context, VUCA Prime highlights the importance of preparing students with skills and knowledge that allow them to navigate the rapidly changing and uncertain nature of the 21st century world. Therefore, it is challenging for educational administrators and teachers to promote VUCA Prime to students. Facilitate them to acquire ability to see and create a desired future, ability to comprehend the complexity of the environment, ability to simplify complexity, and ability to adapt and respond quickly to changing circumstances.

In addition to the VUCA Prime concept, another concept that organizations used to cope with the world of VUCA is agile leadership. Based on its name, agile leadership firstly focus on “agile” or “agility” in a rapid changing world. It emphasizes the capacity of a leader to make sensible choices in a complicated, volatile, and constantly changing environment (Joiner and Joseph, 2007 cited in Akkaya and Sever, 2022).

Focus on the characteristics of agile leaders, they are able to adjust an organization properly to changing external conditions by thinking flexibly about such changes. These leaders are able to identify the workers' capabilities, leverage their perceptions to transition the organization's desired change, and seize the possibilities presented by change while attempting to reduce its negative effects on the business. Agile leaders help organizations integrate agile into their processes so that they can more quickly adapt to change and provide higher commercial value to their stakeholders. Organizations that have agile leadership will be better able to swiftly spot changes in the business environment and achieve agility with less resources (Akkaya and Sever, 2022).

In educational circumstance, Pattanasak Aphaisom et al. (2022) provided that school leaders with agile leadership must 1) Identify goals clearly and coordinate operations with teachers and school personnel in order to understand the same goals and objectives 2) build trust and show empathy brings teachers and staff into harmony by communicating with true and reliable information 3) Empower others by giving responsibility for making decisions and develop the capabilities of teachers and personnel to have the ability to achieve goals 4) work

together and emphasize that teachers and personnel have to work efficiently together and 5) develop learning agility by encouraging teachers and personnel to learn from their own mistakes and develop their own skills.

In an aspect of principles, Parker et al. (2015) guided that principles of agile leadership are intrinsic ability, analytical perspective, provide self-organization management, humanistic, problem-solving mechanism, proactive, decision-making mechanism, managing for outcome products, and removes many difficulties that prevent from achieving the targets. The agile leader who realizes these principles can guide the organization and effect employee behaviour by determining, spreading, and sustaining the mission.

Masgo (2021) provided that benefits of agile leadership are 1) more reactivity throughout the board, 2) more vigor for the most difficult and fulfilling tasks, 3) improved communication inside and between teams, 4) an increase in self- and other-confidence, 5) more engaged and inspired workers, 6) employees with more freedom, 7) develop personal connections between coworkers and recognize their significance, 8) ongoing learning, and 9) a stronger organization with more empowered executives.

In the authors' opinion, the concepts of VUCA Prime (vision, understanding, clarity, and agility) and agile leadership can be applied to deal with the VUCA world. It is a challenge for education administrators, educators and stakeholders to adopt these concepts and operate effectively. However, operating alone or by a single agency is not an easy task. Building an education network is another way of educational management that will help us cope with the world of volatility, uncertainty, complexity, and ambiguity.

Education Network in VUCA

One way to help improve the quality of education management during VUCA is the integration of educational cooperation networks. Ramírez-Verdugo (2021) defined the meaning of the network and educational networks that network refers to a group of individuals or institutions that are related to each other or are interested in working together in a systematic way while education network refers to the use of social networks for educational purposes. Mainly, networks reduce the alienation of teachers, schools, administrators and educators through working system professional exchange, professional development, and opportunities creation. O'Hara et al (2021) stated that education network will be an important driving force for education development amid times of crisis and rapid changes.

According to Saman Asawapoom and Pongsak Thonpanchang (2022), in the past, collaborations were often focused on internal management. But now it has expanded to create cooperation between external organizations and networks between organizations. After the outbreak of the COVID-19 epidemic, networks have become more essential to enterprise management than ever before without aiming for competition but for the survival of the organization itself. The characteristics of a good network starting from having good networking objectives. Good purpose of the network will benefit all sectors including all network members. The network will be operated smoothly and sustainably if all members of the sector adhere to the same purpose of the network. Each member gives what he has and gets what he wants. However, a better network atmosphere is where individuals exchange what they have rather than take what they want. Honor and trust are also desirable traits in network characters, particularly in alliance networks. We must remember that networks are created by shared goals, consensus across unorganized structures, or even outsourcing by organizations. Therefore, the strong links that bind network parties are trust and honor. The network's ability to regularly update network relationships and operations is another positive trait. In addition to network activities that are part of strategic plans, network parties and members should communicate often through both onsite and online platforms. The final positive trait of a network is that its parties and members are of higher quality than its overall membership. Therefore, focus on the correct parties and members rather than having a large number of network parties and members.

Academics have discussed the benefit of educational networks as follows.

Chusak Ekpetch (2019) pointed out that benefits of a collaborative network include: 1) quick decision making, solve problems quickly amid the uncertainty and complexity of problems; 2) reduce the cost of government management and service users; 3) provide services to target groups that meet their needs; 4) create social capital for agencies and countries; 5) produces more sources of information; 6) produces more sources of knowledge exchange; 7) makes work flexible by relying on expertise from many departments to help offer; and 8) produces in-depth knowledge directly from those experts.

In a complex education system, European Commission (2018) stated that education networks have the following benefits: 1) promote horizontal decision-making process, 2) help solve complex problems, 3) distribute responsibility, 4) create collaboration among stakeholders, 5) promote exchange of knowledge and practice, 6) create innovations faster, 7) promote professional development of teachers, 8) promote capacity building in schools, 9) enable more efficient use of time and resources, and 10) intermediate between systems with different levels.

Elements of Education Network Management

Management of educational networks is a necessity of administrators in modern times. Various scholars proposed it as follows:

Suda Mongkolsit (2019) studied the strategy of collaboration network for the development of educational management of private schools in Chonburi. The findings indicated that six processes were involved in cooperative network building strategies for educational advancement in private schools in the province of Chonburi: 1) awareness of network building; 2) coordination of network organization; 3) commitment creation; 4) network management; 5) follow-up and network development; and 6) maintenance of ongoing networking.

Sutum Thummatassananon (2019) studied the strategies used to manage the Office of the Basic Education Commission's network of collaboration for the growth of small schools. It was discovered that the small school development cooperation network's administrative components were made up of five components: 1) selection of network participants, 2) involvement in network operation, 3) engagement and communication, 4) direction of network coordinators, and 5) assessment and improvement.

Krich Theerangsu (2020) studied the development guideline of a network of cooperation for schools the Secondary Educational Service Area Office 24. It was discovered that the four components of a network of collaboration are as follows: 1) a shared vision, which included five indicators; 2) participation, which included eleven indicators; 3) interaction, which included ten indicators; and 4) network management, which included eight indicators.

Wanjai Veangying (2021) conducted the research study on strategies on the academic cooperation network management of primary schools under the office of the Basic Education Commission in the Northeast. The outcome included seven network management strategies, including 1) developing an academic cooperation network, 2) establishing a vision for target achievement, 3) creating a strategic plan for the network, 4) bolstering member participation, 5) improving the network's operational results, 6) promoting the process of knowledge sharing and communication, and 7) strengthening internal and external agencies for academic cooperation.

Thasanee Trisayaluk (2021) studied the network management for nursing education of the faculty of nursing under Rajabhat University. There were nine elements of network management, 1) network leadership, 2) a common vision and objectives, 3) network management tools and technologies, 4) similar viewpoints, 5) producing Win-Win situations, 6) increasing network member engagement, 7) mutually reinforcing synergies, 8) upholding a long-lasting partnership, and 9) effective communication.

Kajornwan Pookajorn (2021) studied a model of cooperation in educational organizations for improving Chinese language teaching in Private schools. It was discovered that a model of network consists of three parts: 1)

inputs, such as collaboration network agency, network features, budget, and cooperation scope, 2) procedures, involving cooperation planning, cooperation implementation, cooperation monitoring, cooperation evaluation, and use of evaluation outcomes to enhance cooperation, 3) results, which incorporate Chinese teachers and students.

Chusak Ekpetch (2019) listed eight processes of network management in his presentation slides on educational network management, starting with 1) a need and situational evaluation of the network. 2) Identify important network players. 3) Develop and communicate a shared vision and a plan of action. 4) Express and make clear the joint vision and strategies of the network. 5) Activate the network of other organizations to solve any associated issues. 6) Celebrate whatever successes networks have and keep working to get better. 7) Combine success with change-mobilization. 8) Create a culture and standard for the network.

According to Saman Asawapoom and Pongsak Thonpanchang (2022), the network management steps are as follows: 1) identify stakeholders 2) define rules, guidelines and directives to drive the network, 3) define formal and informal network organizational structures, 4) formulate a strategic plan, project, activity to be implemented, 5) implement the plan, and 6) evaluate and continually improve.

The authors have synthesized and summarized the components of education network administration in attempting to set guidelines for managing educational networks in a VUCA world as follows: 1) identifying network stakeholders, 2) establishing a shared vision, 3) network coordination, 4) participation of network members, and 5) evaluation of the network.

Guidelines for Managing Educational Networks in a VUCA World

Education network management refers to the leadership and management of an education network, which includes the coordination and oversight of resources, programs, and activities that support student learning and the education system. From the benefits and necessity of having an educational network to cope with the VUCA world, the authors propose five educational network management concepts according to the components of the educational network.

Identifying network stakeholders refers to the process of identifying the individuals or organizations that have a vested interest in the success of the network and are impacted by its actions. Stakeholders can be internal or external to the network, and can include individuals or groups. The process of identifying network stakeholders can involve several steps such as defining the scope of the network, identifying potential stakeholders, and prioritizing stakeholders.

It's important to note that the list of stakeholders may change over time as the network evolves and new opportunities or challenges arise. Therefore, it is important to periodically review and update the list of stakeholders.

Establishing shared vision refers to creating collective understanding and agreement among a group of people or an organization about their desired future state and the actions needed to achieve it. It can also refer to a vision that is shared among different organizations or groups that work together towards a common goal. A shared vision can serve as a guide for decision making and can help to align the actions of individuals and groups. It can also help to create a sense of purpose and direction for an organization or group. Building a shared vision involves several steps:

Clearly define the desired outcome: Identify the specific goals and objectives that the organization or group wants to achieve. Be as specific and clear as possible.

Involve key stakeholders: Gather input from a diverse group of stakeholders, including employees, customers, partners, and other relevant parties.

Communicate the vision: Clearly communicate the shared vision to all members of the organization or group. This can be done through meetings, presentations, and written materials.

Create a sense of ownership: Encourage individuals and teams to take ownership of the shared vision and make it their own. This can be done by involving them in the process of creating the vision and giving them opportunities to contribute.

Align strategies and actions: Ensure that the shared vision is reflected in the organization's or group's strategies and actions. This includes aligning resources, processes, and systems to support the vision.

Monitor progress: Regularly track progress and make adjustments as needed. Keep the shared vision alive and relevant by regularly communicating it and reminding everyone of its importance.

Celebrate successes: Acknowledge and celebrate small and big successes along the way, that will help to maintain motivation and engagement.

It's important to note that creating a shared vision is an ongoing process and requires continuous effort to maintain alignment and engagement among the group or organization.

Network coordination refers to the process of coordinating and aligning the actions of individuals or organizations that are connected in some way, typically through a network structure. This can include coordinating activities, sharing resources, and aligning goals and objectives. Network coordination is important in situations where multiple actors are working towards a common goal, but may have different perspectives, resources, and decision-making processes.

Examples of network coordination include: coordinating the activities of multiple organizations working on a joint project, collaborating among different departments within a company to achieve a common goal, coordinating the actions of a group of suppliers, distributors, and customers in a supply chain, effective network coordination requires clear communication, trust and mutual understanding among the parties involved. It can be facilitated through the use of shared tools, platforms, and frameworks.

Participation of network members refers to the active involvement and engagement of individuals or organizations that are part of a network in the coordination and decision-making processes. This can include participating in meetings, providing input and feedback, and taking ownership of specific tasks and responsibilities.

The participation of network members is important for several reasons. For example, it allows for diverse perspectives and ideas to be shared, which can lead to better decision-making and problem-solving. It also builds trust and relationships among network members and encourages ownership and commitment to the network's goals and objectives.

There are several ways to encourage participation among network members such as 1) clearly communicating the goals and objectives of the network, and how each member's participation will contribute to achieving them, 2) providing opportunities for members to share their thoughts and ideas, such as through meetings or online forums. 3) giving members a sense of ownership and decision-making power by involving them in the planning and implementation of network activities, and 4) recognizing and rewarding participation and contributions.

It's important to note that participation can take on different forms and levels, and that not all network members may be able or willing to participate in the same way. It is crucial to find the right balance and ensure that all members feel heard and valued.

Evaluation of an education network refers to the process of measuring and assessing the effectiveness of the network in achieving its goals and objectives. It can involve collecting data, analyzing results, and making recommendations for improvement. Evaluation can help the network to identify what is working well and what needs to be improved, and can inform decisions about future direction and resource allocation.

There are several steps involved in evaluating an education network. Firstly, define the evaluation goals and objectives. Secondly, clearly define what the evaluation is trying to accomplish and what questions it will

answer. Thirdly, identify specific evaluation indicators that will be used to measure the network's progress and success, such as student achievement, teacher retention, or community engagement. Fourthly, collect data from a variety of sources, such as surveys, interviews, and observations, to measure the network's progress against the identified indicators. Fifthly, analyze the data using appropriate statistical techniques to identify patterns and trends, and to draw conclusions about the network's effectiveness. Then, make recommendations for improvement based on the evaluation results, and develop an action plan for implementing changes. Finally, monitor progress and evaluate the impact of changes made based on the evaluation results.

Conclusion

The VUCA world is a term that refers to the current global environment characterized by volatility, uncertainty, complexity, and ambiguity. These conditions make it difficult for organizations and individuals to predict and plan for the future, and require a new approach to decision making and problem solving.

To thrive in a VUCA world, organizations and individuals need to develop a new set of skills, such as critical thinking, problem solving, creativity, emotional intelligence and flexibility. They also need to be proactive in identifying and addressing potential challenges and opportunities, and be able to work in cross-functional and diverse teams.

Two main concepts provided that could deal with VUCA are VUCA Prime and agile leadership. VUCA Prime is a modified version of the original VUCA, which emphasizes the need for vision, understanding, clarity, and agility in order to navigate and succeed in the current complex and rapidly changing environment. Agile leadership refers to a leadership approach that emphasizes flexibility, adaptability, and the ability to respond quickly to changing circumstances. Agile leaders focus on creating an environment that is conducive to innovation and continuous improvement.

Education network management in VUCA refers to the process of leading and coordinating a group of educational institutions or organizations in an environment characterized by unpredictability and rapid change. Some strategies for education network management in a VUCA world include identifying network stakeholders, establishing a shared vision, network coordination, participation of network members, and evaluation of the network.

To manage education network in a VUCA is not an easy concept to implement, it requires a change in the mindset and culture of the institution. It is necessary the participation of the whole educational community, including the students, teachers, and administrators, and stakeholders to work together to create a culture that is open to change and innovation.

Uncertainty is the most certain thing in the world. This is an undeniable truth. The world has changed. VUCA will never end. Collaboration through an education network with vision, understanding, clarity, agility, and agile leadership will help all education stakeholders strong and ready for this endless changing world.

บทคัดย่อ

การวิจัยครั้งนี้มีวัตถุประสงค์เพื่อปรับปรุงกระบวนการผลิตมะพร้าวน้ำหอมควั่นของโรงงาน SMZ Coconut โดยศึกษาความสูญเปล่าในการผลิตจำนวน 5 เรื่อง ได้แก่ การรอคอย จำนวนคน เวลา ระยะทาง และความผิดพลาดที่พบในกระบวนการผลิต โดยนำวงจรเดมมิ่ง มากำหนดขั้นตอนการวิจัยจำนวน 5 ขั้นตอน ประกอบด้วย (1) การวางแผนโดยสำรวจสภาพปัจจุบันและวิเคราะห์ข้อมูล (2) ค้นหาปัญหาและวางแผนปฏิบัติ (3) นำสู่การปฏิบัติโดยดำเนินการตามแผน (4) ติดตามผลและเปรียบเทียบผล และ (5) การกำหนดมาตรฐาน เครื่องมือที่ใช้ในการวิจัย ได้แก่ ผังการไหลของกระบวนการ และแผนภูมิกระบวนการ ผลการวิจัยพบว่า กระบวนการผลิตก่อนปรับปรุงมี 16 กิจกรรม ประกอบด้วย การทำงาน 8 กิจกรรม การเคลื่อนย้าย 4 กิจกรรม การรอคอย 3 กิจกรรม และการเก็บรักษา 1 กิจกรรม ใช้ระยะทางในการเคลื่อนย้าย 15 เมตร ใช้เวลาในการผลิต 94 นาที พนักงานในการผลิตทั้งหมด 14 คน หลังการปรับปรุงกระบวนการผลิตโดยลดความสูญเปล่าด้านการรอคอยและด้านการขนส่งเคลื่อนย้าย พบว่า กระบวนการผลิตคงเหลือ 12 กิจกรรม หรือลดลง 4 กิจกรรม คิดเป็นร้อยละ 25.00 ระยะทางที่ใช้ในการขนส่งหรือเคลื่อนย้าย 14 เมตร ลดลง 1 เมตร หรือลดลงร้อยละ 6.67 และเวลาที่ใช้ในการผลิต 86 นาที ลดลง 8 นาที หรือลดลงร้อยละ 8.51 ใช้พนักงานในการผลิตทั้งหมด 14 คนคงเดิม

คำสำคัญ: การปรับปรุงกระบวนการ, กระบวนการผลิต, ความสูญเปล่า

Abstract

The purpose of this research was to improve the production process of stranded aromatic coconuts of SMZ Coconut factory by studying 5 production wastes: waiting, number of people, time, distance, and mistake in production process. The Deming cycle (PDCA cycle) was used to define the research process in 5 steps, consisting of (1) planning by exploring current conditions and analyzing data, (2) finding problems and planning actions, (3) implementing by conducting the plan, (4) monitoring and comparing results, and (5) setting standards. The research instrument were flow process charts and flow charts. The results showed that: The production process before improvement consisted of 16 activities, consisting of 8 operation activities, 4 moving activities, 3 delay activities, and 1 storage activity. The distance to move or transport was 15 meters, production time was 94 minutes, and there were 14 employees in total production. After improving the production process by reducing waste in delays and transportation, it was found that the production process remained 12 activities or 4 activities decreased, representing 25.00%. The distance used in transportation or moving was 14 meters, decreased by 1 meter or decreased by 6.67 percent, and the time spent in production was 86 minutes, decreased by 8 minutes or decreased by 8.51 percent, using all 14 employees in production unchanged.

Keywords: Process improvement, Production process, Wastes

บทนำ

การเปลี่ยนแปลงสภาพวัตถุดิบ โดยอาศัยทรัพยากรสนับสนุนต่าง ๆ เช่น ทักษะความสามารถของคน เครื่องมือ อุปกรณ์ เทคโนโลยีที่ทันสมัย เป็นต้น เพื่อให้ได้เป็นผลผลิตตอบสนองความต้องการของมนุษย์ เป็นความหมายของ “การผลิต” ซึ่งกิจกรรมดังกล่าวข้างต้นเป็นกระบวนการเพิ่มคุณค่าหรือประโยชน์ทางเศรษฐกิจ (Economic utility) ให้กับปัจจัยการผลิตต่าง ๆ เพื่อตอบสนองความต้องการของมนุษย์ให้สูงที่สุด ซึ่งในการผลิตตั้งแต่อดีตจวบจนปัจจุบันการดำเนินธุรกิจที่เข้มงวด เคร่งครัด เพื่อให้องค์กรหรือธุรกิจสามารถอยู่รอดในสถานการณ์ที่มีปัญหาและการแข่งขันที่รุนแรงมีมาอย่างต่อเนื่อง ปัญหาที่แต่ละองค์กรพบมีมาทั้งจากสถานการณ์ภายนอก เช่น การถดถอยทางเศรษฐกิจในภาพรวม โรคติดต่อร้ายแรง ภัยพิบัติทางธรรมชาติ สงคราม และราคาพลังงาน เป็นต้น รวมทั้งปัญหาที่เกิดขึ้นจากภายในองค์กร เช่น ความรู้ความสามารถของพนักงาน เทคโนโลยี วิธีการผลิต และแนวทางการบริหารที่องค์กรใช้งาน เป็นต้น ซึ่งสถานการณ์ที่เป็นปัญหาจากภายนอกองค์กรไม่สามารถแก้ไขได้ จะทำได้เพียงการเตรียมพร้อมรับความเสี่ยงที่อาจเกิดขึ้น แต่สำหรับปัญหาที่เกิดขึ้นภายในองค์กร เป็นสิ่งที่แต่ละองค์กรต้องค้นหาเพื่อแก้ไขปัญหานั้น ๆ เป็นการจัดการต้นทุนที่มีประสิทธิภาพเพื่อเพิ่มผลกำไรต่อองค์กรและมีผลประกอบการที่ดีขึ้น

การจัดการทรัพยากรในการผลิต เป็นปัจจัยหนึ่งที่สำคัญที่จะช่วยลดความสูญเสียต้นทุนทางด้านวัตถุดิบ แรงงาน หรือสิ่งอำนวยความสะดวกที่เกี่ยวข้องกับการสิ้นเปลืองพลังงาน ให้มีปริมาณการใช้งานเป็นไปตามกำลังการผลิตที่วางแผนไว้ ไม่ให้เกิดการสูญเสียโดยเปล่าประโยชน์ เป็นการกำจัดต้นทุนส่วนเกินที่ไม่จำเป็น ด้วยการตรวจสอบหรือศึกษากระบวนการผลิต เพื่อค้นหาจุดบกพร่องและนำสู่การปรับปรุงแก้ไขให้ดีขึ้น หรือเรียกว่า “การปรับปรุงกระบวนการผลิต (Production process improvement)” เพราะการปรับปรุงการดำเนินกิจกรรมเป็นกิจกรรมพื้นฐานในการพัฒนาประสิทธิภาพและคุณภาพของการดำเนินงาน ส่งผลให้การดำเนินงานมีประสิทธิภาพและมีคุณภาพเพิ่มขึ้น การปรับปรุงกระบวนการผลิตทำได้หลายวิธี หากแต่ดำเนินการอย่างเป็นขั้นตอนตามขั้นตอนการศึกษาการทำงาน (Work study) หรือตามวงจรคุณภาพ (PDCA cycle) รวมทั้งอาจใช้ขั้นตอนการแก้ปัญหา (QC story) เป็นต้น โดยการนำแนวคิดหรือเทคนิคต่าง ๆ มาใช้ในการปรับปรุงกระบวนการผลิตตามลักษณะหรือสภาพที่แตกต่างกัน ดังเช่น การลดความสูญเปล่า 7 ประการ (7 Wastes) โดยใช้แนวคิดแบบลีน (Lean) (นนทิยา เทพพรมมา และปิ่นมณี อินเสือ, 2562) การนำเครื่องมือคุณภาพ (7 QC tools) ที่เกี่ยวข้องมาใช้งาน (คลอเคลีย วจนะวิชากร, 2563) รวมทั้งแนวคิดการปรับปรุงกระบวนการผลิตโดยใช้แผนภูมิสายธารแห่งคุณค่า (Value stream mapping; VSM) (กังวาล ศรีโนนโคตร, 2561) ใช้เทคนิคตั้งคำถาม 5W1H หลักการ ECRS (นพมณี วัฒนสังสุทธิ์ และวรพจน์ มีถม, 2564) ใช้แนวคิดห่วงโซ่คุณค่า (Value chain) (ฤดี นิยมรัตน์, สมเกียรติ กอบัวแก้ว และไสว ศิริทองถาวร, 2564) เป็นต้น

การปรับปรุงกระบวนการผลิตที่มีจุดมุ่งหมายเพื่อการลดความสูญเสียหรือความสูญเปล่าในกระบวนการผลิต (Production wastes) เป็นเป้าหมายสำคัญของแนวคิดการปรับปรุง ซึ่งความสูญเสียหรือความสูญเปล่าในกระบวนการผลิตนี้เกิดขึ้นจำนวนมากและจากหลายสาเหตุ แต่ความสูญเปล่านี้เป็นเหตุให้ต้นทุนการผลิตสูงเกินความจำเป็น รวมไปถึงประสิทธิภาพและประสิทธิผลของกระบวนการผลิตต่ำ ต้องใช้เวลาในการผลิตนาน ได้สินค้าคุณภาพต่ำ เป็นต้น ดังนั้นเพื่อพัฒนาวิธีการทำงานจึงมีความจำเป็นอย่างยิ่งที่จะต้องเรียนรู้ว่าองค์กรมีความสูญเปล่าใดบ้างอยู่ในกระบวนการผลิต เพื่อสามารถกำจัดความสูญเปล่าเหล่านั้นให้หมดไป แนวคิดหนึ่งที่คิดค้นโดย Mr. Shigeo Shingo และ Mr. Taiichi Ohno คือระบบการผลิตแบบโตโยต้า (Toyota production system; TPS) (สมเกียรติ นินถึก, 2559) โดยมีวัตถุประสงค์เพื่อขจัดความสูญเปล่า 7 ประการ (7 wastes) ได้แก่ (1) ความสูญเปล่าจากการผลิตมากเกินไป (Overproduction) (2) ความสูญเปล่าจากการเก็บวัสดุคงคลัง (Inventory) (3) ความสูญเปล่าจากการขนส่ง (Transportation) (4) ความสูญเปล่าจากการเคลื่อนไหวมากเกินไป (Motion) (5) ความสูญเปล่าจากกระบวนการผลิต (Processing) (6) ความสูญเปล่าจากการรอคอย (Delay) และ (7) ความสูญเปล่าจากการผลิตของเสีย (Defect)

ประเทศไทยเป็นประเทศเกษตรกรรม ซึ่งการพัฒนาการเกษตรที่ดีที่สุดจำเป็นต้องสร้างธุรกิจการแปรรูปผลผลิตทางเกษตรร่วมกับธุรกิจบริการ (สำนักงานส่งเสริมวิสาหกิจขนาดกลางและขนาดย่อม, 2561) ซึ่งการแปรรูปผลผลิตทางการเกษตรเป็นการนำผลผลิตทางการเกษตรมาผ่านกระบวนการที่เปลี่ยนแปลงสภาพของผลผลิตทาการเกษตรให้เป็นผลิตภัณฑ์อาหารที่อยู่ในสภาพที่เหมาะสม สะดวกและปลอดภัย ตรงกับความต้องการของผู้บริโภค ทำให้ผลิตภัณฑ์มีความหลากหลาย เพิ่มทางเลือกให้ผู้บริโภค และเพิ่มมูลค่าให้ผลผลิตทางการเกษตร (กรมส่งเสริมการเกษตร กระทรวงเกษตรและสหกรณ์, 2563, น.1) “มะพร้าวน้ำหอมควั่น (Stranded aromatic coconut)” สินค้าที่ได้จากกระบวนการแปรรูปผลผลิตทางการเกษตรชนิดหนึ่ง โดยการนำผลมะพร้าวน้ำหอมมาตัดแต่งเปลือกให้เป็นรูปทรงเพชร ที่เกิดจากความต้องการของผู้บริโภคในการบริโภคน้ำมะพร้าวสดจากลูกมะพร้าว เป็นแนวคิดที่นำสู่การพัฒนาผลิตภัณฑ์ให้อยู่ในรูปแบบสวยงาม เหมาะสมสำหรับการให้บริการบนโต๊ะ ลดพื้นที่ในการจัดเก็บและขนส่ง สามารถเก็บรักษาได้ในอุณหภูมิและบรรยากาศที่ช่วยยืดอายุของมะพร้าว เป็นการเพิ่มมูลค่าของมะพร้าวน้ำหอม และสามารถจำหน่ายได้ทั้งในประเทศ และต่างประเทศ

มะพร้าวน้ำหอมของไทยนิยมปลูกในภาคกลาง จากความเหมาะสมของสภาพแวดล้อมที่มีผลทำให้คุณภาพความหอมของน้ำมะพร้าว โดยเฉพาะในเขตอำเภอนครชัยศรี จังหวัดนครปฐม รวมทั้งจังหวัดสมุทรสาคร ฉะเชิงเทรา ราชบุรี และสมุทรสงคราม ซึ่งโรงงาน SMZ Coconut เป็นสถานประกอบการหนึ่งทำธุรกิจผลิตมะพร้าวน้ำหอมควั่น ตั้งอยู่ในเขตอำเภอดำเนินสะดวก จังหวัดราชบุรี มีกำลังการผลิตประมาณ 2,000-10,000 ลูกต่อวันขึ้นอยู่กับปริมาณมะพร้าวตามฤดูกาล ดำเนินธุรกิจมานานกว่า 5 ปี มีคนงานทั้งหมด 14 คน และด้วยลักษณะของการผลิตจำเป็นต้องพึ่งพาทักษะของคนเป็นหลัก เพื่อให้เกิดความรวดเร็ว ลดระยะทางการเคลื่อนที่ เพื่อช่วยเพิ่มเวลาการปฏิบัติงาน หรือเป็นการลดความสูญเปล่าในกระบวนการผลิต ที่นำมาสู่แนวคิดของการวิจัยที่มีเป้าหมายเพื่อปรับปรุงกระบวนการผลิตมะพร้าวน้ำหอมควั่น โรงงาน SMZ Coconut โดยค้นหาสาเหตุของความสูญเปล่าของกระบวนการผลิต ได้แก่ การรอคอย จำนวนคน เวลา ระยะทาง และข้อผิดพลาดในกระบวนการผลิต เครื่องมือที่ใช้ในการวิจัย ได้แก่ ผังการไหลของกระบวนการ (Flow process chart) และแผนภูมิกระบวนการ (Flow chart) ตามขั้นตอนการแก้ปัญหาอย่างเป็นระบบตามวงจรเดมมิง (Deming cycle หรือ PDCA cycle) ผลที่ได้จากการปรับปรุงกระบวนการผลิตคือสามารถลดความสูญเปล่าโดยการลดขั้นตอนการทำงาน ลดเวลาในการทำงาน ลดระยะทางในการเคลื่อนย้าย รวมทั้งการแก้ปัญหาในกระบวนการผลิต นำไปสู่การเพิ่มผลกำไรและเพิ่มขีดความสามารถในการทำงานของพนักงาน

วัตถุประสงค์ของการวิจัย

เพื่อปรับปรุงกระบวนการผลิตมะพร้าวน้ำหอมควั่นของโรงงาน SMZ Coconut

วิธีการดำเนินการวิจัย

1. งานวิจัยครั้งนี้เป็นงานวิจัยปฏิบัติการ (Action research) ที่ดำเนินงานวิจัยร่วมกับสถานประกอบการผลิตมะพร้าวน้ำหอมควั่น โรงงาน SMZ Coconut อำเภอดำเนินสะดวก จังหวัดราชบุรี โดยมีกลุ่มผู้ให้ข้อมูลได้แก่ ผู้บริหารและพนักงานผลิตมะพร้าวน้ำหอมควั่นของโรงงาน รวมจำนวน 15 คน

2. การวิจัยเรื่อง การปรับปรุงกระบวนการผลิตมะพร้าวน้ำหอมควั่นของโรงงาน SMZ Coconut ใช้ PDCA เป็นหลักการในการกำหนดขั้นตอนการวิจัย จำนวน 5 ขั้นตอนดังนี้ การวางแผน (Plan; P) ได้แก่ขั้นตอนที่ (1) สำรวจสภาพปัจจุบันและวิเคราะห์ข้อมูล และ (2) ค้นหาปัญหาและวางแผนปฏิบัติ การนำสู่การปฏิบัติ (Do; D) ได้แก่ขั้นตอนที่ (3) ดำเนินการตามแผน การติดตามตรวจสอบ (Check; C) ได้แก่ขั้นตอนที่ (4) ติดตามผลและเปรียบเทียบผล และขั้นตอนที่ (5) การกำหนดมาตรฐาน (Action; A) ที่มีรายละเอียดของการดำเนินงานแต่ละขั้นตอนดังนี้

2.1 สำรวจสภาพปัจจุบันและวิเคราะห์ข้อมูล โดยศึกษาข้อมูลที่นำสู่ความสูญเปล่าในกระบวนการผลิตจำนวน 5 ประการ ได้แก่ (1) การรอคอย (2) จำนวนคน (3) เวลา (4) ระยะทาง และ (5) ข้อผิดพลาดในกระบวนการผลิต โดยการสังเกตและบันทึกข้อมูลลงในแบบบันทึกการสังเกตกระบวนการผลิตมะพร้าวน้ำหอมควั่น จำนวน 2 วัน วันละ 2 รอบกระบวนการผลิต นำข้อมูลมาวิเคราะห์ด้วยการหาค่าเฉลี่ยของระยะทางและเวลาของแต่ละกิจกรรม พิจารณาข้อมูลด้านการปฏิบัติงาน (Operation) การขนย้าย (Transportation) ความล่าช้า (Delay) การตรวจสอบ (Inspection) และการเก็บรักษา (Storage) นำมาเขียนเป็นผังการไหลของกระบวนการ (Flow process chart)

2.2 ค้นหาปัญหาและวางแผนปฏิบัติ โดยค้นหาปัญหาจากการวิเคราะห์ เพื่อนำไปใช้ในการออกแบบ วางแผนการปรับปรุงกระบวนการผลิตมะพร้าวน้ำหอมควั่น

2.3 ดำเนินการตามแผน นำกระบวนการผลิตที่ได้รับการปรับปรุงมาสู่การปฏิบัติ ด้วยการอธิบายกระบวนการผลิตใหม่ให้เจ้าของโรงงานได้รับทราบ และอบรมพนักงานฝ่ายผลิตเรื่องการเปลี่ยนแปลงวิธีการทำงาน เพื่อให้พนักงานได้ทราบถึงการทำงานที่เปลี่ยนแปลง พนักงานนำกระบวนการไปใช้ในทำงานเป็นเวลา 2 วัน วันละ 2 รอบกระบวนการผลิต

2.4 ติดตามผลและเปรียบเทียบผล นำเสนอด้วยผังการไหลของกระบวนการ จากนั้นเปรียบเทียบข้อมูลก่อนปรับปรุงและหลังปรับปรุง นำเสนอด้วยแผนภูมิกระบวนการ (Flow chart) และผังการไหลของกระบวนการ

2.5 กำหนดมาตรฐาน โดยการจัดทำวิธีการทำงาน (Work instruction) เป็นคู่มือมอบให้สถานประกอบการ

สรุปผลการวิจัย

1. สำรวจสภาพปัจจุบันและวิเคราะห์ข้อมูล

จากการศึกษากระบวนการผลิตมะพร้าวน้ำหอมควั่นของโรงงาน SMZ Coconut จำนวน 2 วัน วันละ 2 รอบกระบวนการผลิต พบว่าการผลิตมะพร้าวน้ำหอมควั่น มีกิจกรรมทั้งหมด 16 กิจกรรม หรือ 16 ขั้นตอนมีรายละเอียดของแต่ละขั้นตอนการผลิตมะพร้าวน้ำหอมควั่นแสดงตามผังการไหลของกระบวนการดังตารางที่ 1

ตารางที่ 1 แสดงผังการไหลของกระบวนการผลิตน้ำหอมควั่นก่อนปรับปรุง

ผลการศึกษากระบวนการผลิตมะพร้าวน้ำหอมควั่นตามตารางที่ 1 มีข้อค้นพบดังนี้

1) กระบวนการผลิตมะพร้าวน้ำหอมควั่นจำนวน 16 กิจกรรม ประกอบด้วยกิจกรรมที่ไม่สร้างมูลค่า (Non-value added; NVA) จำนวน 5 กิจกรรมได้แก่ การรอคอย 3 กิจกรรมได้แก่ กิจกรรมที่ 5 รอใส่โฟมกันกระแทก กิจกรรมที่ 7 รอหุ้มด้วยฟิล์มหด และกิจกรรมที่ 9 รอส่งไปคัดแยกขนาด การตรวจสอบ 1 กิจกรรม (กิจกรรมที่ 13) และการเก็บรักษา 1 กิจกรรม (กิจกรรมที่ 16)

2) พนักงานมีจำนวน 14 คนในกระบวนการผลิตมะพร้าวน้ำหอมควั่น

3) เวลาที่ใช้ในการผลิตเฉลี่ยรวม 94 นาที

4) ระยะทางเคลื่อนย้ายในกระบวนการผลิตรวม 15 เมตร

5) ข้อผิดพลาดในกระบวนการผลิต ได้แก่ ในกิจกรรมที่ 3 ปอกเปลือกหรือควั่นให้ได้ทรงเพชร เป็นขั้นตอนที่ต้องใช้เวลาในการทำงานนาน 15 นาที แต่มีพนักงานเพียง 2 คน

2. ค้นหาปัญหาและวางแผนปฏิบัติ

โดยการลดกิจกรรมรอคอยทั้ง 3 กิจกรรม ด้วยการรวมกิจกรรมดังนี้

1) รวมกิจกรรมที่ 5 รอใส่โฟมกันกระแทก กับกิจกรรมที่ 6 ใส่โฟมกันกระแทก

2) รวมกิจกรรมที่ 7 รอหุ้มด้วยฟิล์มหด กับกิจกรรมที่ 8 หุ้มด้วยฟิล์มหด

3) รวมกิจกรรมที่ 9 รอส่งไปคัดแยกขนาด กับกิจกรรมที่ 10 ส่งไปคัดแยก

รวมทั้งรวมกิจกรรมที่ 11 คัดแยกขนาดใส่กล่องบรรจุ กับกิจกรรมที่ 12 ส่งไปตรวจสอบ

3. ดำเนินการตามแผน

เมื่อนำผลการปรับปรุงกระบวนการผลิตไปใช้งานผลิตมะพร้าวน้ำหอมควั่นของโรงงาน SMZ Coconut จำนวน 2 วัน วันละ 2 รอบกระบวนการผลิต พบว่าการผลิตมะพร้าวน้ำหอมควั่น มีกิจกรรมทั้งหมด 12 กิจกรรม หรือ 12 ขั้นตอนมีรายละเอียดของแต่ละขั้นตอนแสดงตามผังการไหลของกระบวนการดังตารางที่ 2

ตารางที่ 2 แสดงผังการไหลของกระบวนการผลิตมะพร้าวน้ำหอมควั่นหลังปรับปรุง

ผลการศึกษากระบวนการผลิตมะพร้าวน้ำหอมควั่นหลังการปรับปรุงกระบวนการตามตารางที่ 2 มีข้อค้นพบดังนี้

1) จากกระบวนการผลิต 12 กิจกรรม ลดกิจกรรมที่ไม่สร้างมูลค่า (Non-value added; NVA) คงเหลือ 2 กิจกรรม ได้แก่การตรวจสอบ 1 กิจกรรม (กิจกรรมที่ 9) และการเก็บรักษา 1 กิจกรรม (กิจกรรมที่ 12) และไม่มีกิจกรรมการรอคอย

2) เวลาที่ใช้ในการผลิตเฉลี่ยรวม 86 นาที จากเดิมก่อนปรับปรุง 94 นาที

3) ระยะทางเคลื่อนย้ายในกระบวนการผลิตรวม 14 เมตร จากเดิมก่อนปรับปรุง 15 เมตร

4. ติดตามผลและเปรียบเทียบผล

ผลการปรับปรุงกระบวนการผลิตมะพร้าวน้ำหอมควั่นของโรงงาน SMZ Coconut สามารถเปรียบเทียบแผนภูมิกระบวนการผลิต ผังการไหลของกระบวนการผลิตก่อนและหลังปรับปรุงดังตารางที่ 3

ตารางที่ 3 แสดงการเปรียบเทียบกระบวนการผลิตมะพร้าวน้ำหอมควั่นก่อนและหลังปรับปรุง

เมื่อเปรียบเทียบขั้นตอนการผลิตพบว่าหลังการปรับปรุงกระบวนการมีขั้นตอนลดลงจาก 16 กิจกรรม เหลือ 12 กิจกรรม โดยขั้นตอนที่ลดลงเป็นขั้นตอนการรอคอยลดลง 3 กิจกรรม และขั้นตอนการขนส่งลดลง 1 กิจกรรม เป็นผลให้ระยะทางที่ใช้ในการ

เคลื่อนย้ายลดลง 1 เมตร และเวลาการผลิตลดลง 8 นาทีต่อ 1 รอบกระบวนการผลิต ดังแสดงการเปรียบเทียบผลการปรับปรุงกระบวนการผลิตมะพร้าวน้ำหอมควั่น ตามตารางที่ 4

ตารางที่ 4 เปรียบเทียบผลการปรับปรุงกระบวนการผลิตมะพร้าวน้ำหอมควั่น

สิ่งที่พิจารณา	ก่อนการปรับปรุง	หลังการปรับปรุง	ลดลง (ร้อยละ)
ขั้นตอน	16	12	4 (25.00)
การปฏิบัติงาน	7	7	0

ระยะทาง (เมตร)	15	14	1 (6.67)
เวลา (นาที)	94	86	8 (8.51)

5. กำหนดมาตรฐาน

นำกระบวนการผลิตมะพร้าวน้ำหอมควั่นหลังการปรับปรุงที่ผ่านการทดลองใช้ มาทำวิธีการทำงาน (Work instruction) แสดงในรูปแบบของแผนภูมิกระบวนการผลิต (Flow chart) ขั้นตอนกิจกรรม และมาตรฐานควบคุมแต่ละขั้นตอน รวบรวมเป็นคู่มือการปฏิบัติงานมอบให้สถานประกอบการ

อภิปรายผลการวิจัย

1. จากการวิจัยพบว่าการลดขั้นตอนที่เป็นการรอคอยจำนวน 3 กิจกรรมช่วยให้เวลาของกระบวนการผลิตลดลง 8 นาที หรือร้อยละ 8.51 ซึ่งการรอคอย (Delay/idle time) ในกระบวนการผลิตเมีหลายลักษณะ เช่น พนักงานรอเครื่องจักรทำงาน หรือรองานของขั้นตอนก่อนหน้า เครื่องจักรรอการมาถึงของวัตถุดิบที่ต้องป้อนเข้าเครื่อง รวมทั้งเครื่องจักรเสียรอการซ่อมแซม การรอคอยเกิดจากการขาดความสมดุลในกระบวนการผลิต ที่ทำให้เกิดความสูญเสียด้านเวลา ด้านต้นทุน รวมถึงขวัญกำลังใจของผู้ปฏิบัติงานจากความไม่แน่นอนในกระบวนการผลิต (ดวงรัตน์ ชีวะปัญญาโรจน์ และศุภศักดิ์ พงษ์อนันต์, 2544, น.4-22) สอดคล้องกับการวิจัยของจารุวรรณ พรหมเงิน (2564) ที่ค้นหาความสูญเปล่าและลดความสูญเปล่าที่เกิดขึ้นในกระบวนการบรรจุก้อนเชื้อเห็ดนางฟ้าในถุงพลาสติก โดยใช้แผนผังสายธารคุณค่า วิเคราะห์กิจกรรมที่เพิ่มมูลค่าและกิจกรรมที่ไม่ก่อให้เกิดมูลค่าเพิ่ม และใช้หลักการ ECRS มาปรับแผนผังการทำงาน รวมกระบวนการทำงานเข้าด้วยกัน ส่งผลให้พื้นที่ในการทำงานลดลง และระยะทางในการเคลื่อนย้ายลดลง 4 เมตร และงานวิจัยของอัจฉรา ผ่องพิทยา (2560) ที่ใช้การปรับปรุงกระบวนการผลิตผ้าดิบ ผลการวิจัยสามารถลดเวลาความสูญเปล่าของเวลาในการทำงานจาก 20.28 นาที/ชิ้น เหลือ 12.61 นาที/ชิ้น เวลาการทำงานลดลง 6.67 นาที/ชิ้น คิดเป็นเวลาที่ลดลงร้อยละ 5.94

2. จากการวิจัยพบว่าการลดขั้นตอนการเคลื่อนย้ายขนส่งจำนวน 1 กิจกรรม ช่วยลดระยะทางการเคลื่อนที่ของกระบวนการผลิตลง 1 เมตร หรือร้อยละ 6.67 เป็นการลดความสูญเปล่าที่เกิดจากการขนส่ง (Transportation) ซึ่งการขนส่งนี้เป็นกิจกรรมการเคลื่อนย้ายวัสดุเปลี่ยนแปลงสถานที่ในระหว่างกระบวนการผลิต (Work in process; WIP) ที่ทำให้เกิดต้นทุนในการขนส่งเคลื่อนย้าย ได้แก่ ต้นทุนแรงงาน ต้นทุนพลังงาน ค่าเครื่องจักรอุปกรณ์เพื่อการขนย้ายและค่าบำรุงรักษาเครื่องจักรอุปกรณ์นั้น ๆ นอกจากนี้การเคลื่อนย้ายขนส่งยังอาจนำมาซึ่งความสูญเสียและสูญเปล่าอื่น ๆ ได้แก่ วัสดุเสียหาย สูญหาย เกิดอุบัติเหตุ และสูญเสียเวลา (ดวงรัตน์ ชีวะปัญญาโรจน์ และศุภศักดิ์ พงษ์อนันต์, 2544, น.4-22) การปรับปรุงกระบวนการโดยการลดขั้นตอนการผลิตสอดคล้องกับหลักการ ECRS ในส่วนของการรวมบางขั้นตอนเข้าด้วยกัน (Combine) ช่วยลดความสูญเปล่าเนื่องจากกระบวนการผลิต (Processing) ที่เกิดจากกระบวนการผลิตมีการทำงานซ้ำซ้อนกันในหลายขั้นตอน ที่สอดคล้องกับการวิจัยของปฐมพงษ์ หอมศรี (2564) ได้นำหลักการ ECRS มาใช้ปรับปรุงโรงงานผลิตโคมไฟดาวน์ไลท์ ที่พบว่าโรงงานมีระยะทางและเวลาในการขนย้ายวัสดุเป็นเวลานาน มีขั้นตอนที่เป็นคอขวด ในกระบวนการทำให้เกิดความสูญเปล่าเนื่องจากการรอคอย เมื่อปรับปรุงกระบวนการพบว่าสามารถลดระยะทางในการขนย้ายวัสดุได้ 33 เมตร หรือร้อยละ 27.04 และลดเวลาลงได้ 43 นาที หรือร้อยละ 24.57

ข้อเสนอแนะ

1. จากการวิจัยพบว่าการปรับปรุงกระบวนการตามขั้นตอนวงจรเดมมิง (PDCA cycle) ที่ใช้การศึกษาข้อมูลการทำงานด้วยผังการไหลของกระบวนการ (Flow process chart) ช่วยให้รู้ขั้นตอนการทำงานที่ครอบคลุมด้านเวลา ระยะทาง รวมทั้งการพิจารณาได้ถึงลักษณะของแต่ละกิจกรรม ที่ช่วยให้วิเคราะห์ว่ากิจกรรมใดเป็นกิจกรรมที่เพิ่มมูลค่า (Value added; VA) กิจกรรมใดที่**ไม่เพิ่มคุณค่า (Non-value added; NVA) และกิจกรรมใดที่ไม่ได้เพิ่มคุณค่าแต่จำเป็น (Necessary non-value added; NNVA)** ก่อนพิจารณาปรับปรุงกระบวนการต่อไป ดังนั้นโรงงานสามารถนำวิธีการจัดเก็บข้อมูลนี้ไปปรับใช้กับกระบวนการทำงานอื่น รวมทั้งใช้ตรวจสอบว่ากระบวนการผลิตมะพร้าวน้ำหอมควั่นยังคงทำงานได้ตามมาตรฐาน

2. จากการศึกษาในครั้งนี้มุ่งเน้นที่การปรับปรุงกระบวนการของโรงงาน *จัดให้มีการอบรมเกี่ยวกับการดำเนินงานตามกระบวนการผลิตที่ปรับปรุง ซึ่งพบว่าพนักงานสามารถดำเนินงานได้อย่างคล่องแคล่ว มีการโต้ตอบและมีปฏิสัมพันธ์ที่ดีกับทิศทางงาน ดังนั้นโรงงานอาจพัฒนาแนวทาง วิธีการเพื่ออบรมพนักงาน อาจใช้รูปแบบการพูดคุยแบบไม่เป็นทางการเกี่ยวการทำงานกับพนักงาน ให้รับรู้ถึงปัญหาและสาเหตุที่ทำให้เกิดของเสียในกระบวนการผลิต เพื่อที่จะทำให้มีการทำงานอย่างมีประสิทธิภาพและมีประโยชน์สูงสุดด้วยการสังเกตุและวิเคราะห์ปัญหาด้วยตนเอง*

ระบบจองคิวร้านตัดผมผ่านไลน์บอท

Barber shop queue reservation system by Linebot

ยิ่งคุณ เสนชัย, Yingkun senchai[1]
ฐาปนพงศ์ บุญใจ, Tahpanaphong boonjig[2]
รติวัฒน์ ปารีศรี, Ratiwat paris[3]

บทคัดย่อ

งานวิจัยฉบับนี้มีวัตถุประสงค์เพื่อ 1) นำเทคโนโลยีมาประยุกต์ใช้กับธุริกิจร้านตัดผม 2) จัดทำแบบสอบถามความพึงพอใจ ซึ่งระบบจองคิวร้านตัดผมผ่านไลน์บอท ถูกจัดทำมาเพื่อแก้ปัญหาการเสียลูกค้าของทางร้านเนื่องจาก การใช้บริการแต่ละครั้งจำเป็นต้องเดินทางเพื่อตรวจสอบ และอาจจะเสียลูกค้าเนื่องจากไม่มีคิวว่าง ทางผู้วิจัยจึงได้จัดทำระบบจองคิวร้านตัดผมขึ้นเพื่อให้มีการเช็คสถานะคิวว่าง และเวลาร้านเปิดปิดของร้านตัดผมผ่านทางไลน์ ซึ่งเวลาใช้งานจำเป็นจะต้องเพิ่มเพื่อนทางไลน์ของร้านตัดผม และกดจองคิวผ่านหน้าเมนูของทางไลน์บอท โดยระบบจะเด้งหน้าต่างขึ้นมาในแอพพลิเคชั่นไลน์เพื่อให้ลูกค้าสามารถกรอกข้อมูล และเวลาในการจองคิวได้ โดยเมื่อจองคิวเสร็จสิ้นระบบจะส่งข้อมูลเข้าไปเก็บไว้ในฐานข้อมูลโดยผู้วิจัยได้ใช้ Google Sheet เป็นฐานข้อมูลในการเก็บข้อมูลของลูกค้า ซึ่งเจ้าของร้านสามารถตรวจสอบสถานะคิวผ่าน Google Sheet ได้เลย โดยตัวระบบถูกพัฒนาด้วย ภาษา Html, Css, Javascript ควบคู่ไปกับโปรแกรม DialogFlow, LineDeveloper, Appscript และ Line ในการพัฒนา และมีการจัดทำแบบสอบถามความพึงพอใจ โดยแบ่งออกเป็น 2 กลุ่ม ได้แก่ กลุ่มผู้เชี่ยวชาญ จำนวน 3 คน และกลุ่มผู้ใช้งาน จำนวน 20 คน โดยผลการประเมินความพึงพอใจของผู้เชี่ยวชาญ อยู่ในระดับ ดี โดยมีค่าเฉลี่ย เท่ากับ 4.37 และผลการประเมินความพึงพอใจจากผู้ใช้งานอยู่ในระดับ ดี โดยมีค่าเฉลี่ย เท่ากับ 4.01

คำสำคัญ : ไลน์บอท, ระบบจองคิว, ร้านตัดผม

Abstract

This research has a purpose 1) Apply technology to the barber shop business 2) Prepare a example satisfaction which the system for booking a barber shop queue through line bot was prepared to solve the problem of losing customers because of the shop each use of the service requires a trip for verification and maybe lose customers because no empty queue Therefore, the researcher has created a system for booking a barber shop queue in order to check the status of the queue availability and the opening and closing times of the barbershop line when using it, it is necessary to add friends the barber shop's line And press to reserve the queue through the menu page of the line bot The system will pop up a window in the LINE application so that customers can fill out and time to reserve the queue when the booking is complete, the system will send the information to be stored in the database by the researcher using Google Sheet as a database to collect customer data The shop owner can check the queue status Google Sheet. The system is developed with the languages Html, Css, Javascript. Along with DialogFlow, LineDeveloper, Appscript and Line programs in the development and a satisfaction questionnaire was created They are separate into 2 groups: 3 experts and 20 users The satisfaction assessment results of the experts were at a good level with an average of 4.37 and the results of the satisfaction assessment from the users were at a good level with an average of 4.01

Keywords: Line Bot, Queue Booking System,Barber Shop

บทนำ

ทรงผมเป็นสิ่งที่บอกถึงสไตล์และตัวตนของเรา รวมถึงเป็นสิ่งที่ทำให้เราดูดีขึ้น ซึ่งทรงผมได้ถูกคิดค้นขึ้นมามากมายเพื่อให้เข้ากับโครงหน้าของคนนั้น ๆ ไม่ว่าจะเป็น เด็ก วัยรุ่น หรือ ผู้ใหญ่ ก็ต่างให้ความสำคัญกับทรงผม ด้วยเหตุการตัดผมในปัจจุบันการตัดผมจึงเป็นอีกหนึ่งสิ่งที่เป็นที่นิยมเป็นอย่างมากเนื่องจากทรงผมที่มีมากมายหลากหลายให้เลือกตัด โดยเมื่อต้องการใช้บริการร้านตัดผมลูกจำเป็นต้องเดินทางมาที่ร้านเพื่อตรวจสอบ คิว เวลาร้านเปิดปิด เพื่อเลือกเวลาที่ลูกค้าต้องการใช้บริการ แล้วจึงสามารถใช้บริการตามลำดับ

ผู้วิจัยเล็งเห็นว่าเวลาที่ต้องการใช้บริการแต่ละครั้งลูกค้าจะต้องเสียเวลาเดินทางเพื่อมาตรวจเวลาร้านเปิดปิด และคิวของทางร้านตัดผม ซึ่งในขณะเดียวกันถ้าร้านตัดผมเลือกวันปิดร้านในวันที่ลูกค้าหลาย ๆ คนต้องการตัดพอดีก็จะเป็นการเสียลูกค้าโดยใช่เหตุ

จากสาเหตุข้างต้นผู้วิจัยจึงจัดทำระบบจองคิวร้านตัดผมผ่านไลน์บอทเพื่อให้ทางร้านสามารถจัดคิวในการตัดผมแบบออนไลน์ได้ โดยระบบจะถูกออกแบบมา 2 ส่วนคือหน้าร้าน และ หลังร้าน โดยในส่วนของหน้าร้าน เป็นหน้าแสดงผลในแอพพลิเคชั่นไลน์เพื่อให้บริการลูกค้า ซึ่งมีหน้าเมนูอยู่ทั้งหมด 2 ส่วนได้แก่ จองคิว และ ตำแหน่งของร้าน ซึ่งในวันใดที่ลูกค้าต้องการตัดผมก็สามารถจองคิวออนไลน์ได้โดยไม่ต้องเสียเวลาเดินทางไปเช็คที่ทางร้าน หรือเมื่อลูกค้าติดธุระกระทันหันลูกค้าสามารถโทรหรือทักแชทบอกเจ้าของร้านเพื่อยกเลิกการจองคิวได้เลย และ ในส่วนของหลังร้านจะเป็นตัวจัดการกับระบบภายใน โดยใช้ Google Sheet และมีการตรวจสอบสถานะการจองคิว ซึ่งทางเจ้าของร้านจะเป็นคนจัดการว่าคิวไหนได้รับอนุมัติให้จอง หรือ ยกเลิกคิว เมื่อตัดผมเสร็จก่อนเวลาหรือคิวถูกยกเลิก เจ้าของร้านจะสามารถแจ้งลูกค้าที่รอต่อคิวสามารถเลื่อนคิวมาใช้บริการในคิวที่ถูกลูกค้าคนก่อนหน้ายกเลิกได้เลย ซึ่งระบบหลังร้าน คือการเก็บข้อมูลของลูกค้าด้วย Google Sheet เพื่อการตรวจสอบในเรื่องของสถิติช่วงเวลาใดของเดือนเป็นช่วงเวลาที่ลูกค้าเยอะที่สุด โดยระบบถูกพัฒนา และตั้งค่าด้วย DialogFlow, LineDeveloper, Appscript และ Line

วัตถุประสงค์ของงานวิจัย

1. จัดทำเพื่อนำเทคโนโลยีมาประยุกต์ใช้กับธุรกิจร้านตัดผม
2. จัดทำแบบประเมินความพึงพอใจ

เอกสารและงานวิจัยที่เกี่ยวข้อง

1. แนวคิดทฤษฎีและงานวิจัยที่เกี่ยวข้อง

1.1 การพัฒนาระบบจองคิวงานผ่านไลน์บอท โดยสามารถโต้ตอบอัตโนมัติผ่าน ไลน์บอท ทำให้ประหยัดเวลามีการทำงานที่หลากหลายและสะดวกมากยิ่งขึ้น [1]

1.2 ไลน์ได้เปิดตัวเวอร์ชัน Developer Trial ซึ่งรองรับให้ Bot สามารถส่งข้อความได้หลากหลายรูปแบบ ตั้งแต่ Text, Image, Video, Audio, Location, Sticker และ Rich message[5]

2. กรอบแนวคิด

ภาพประกอบที่ 1 แสดงการทำงานของระบบ

3. สมมติฐานการวิจัย

3.1 การทำงานของระบบสามารถทำงานได้เต็มประสิทธิภาพ โดยสามารถจองคิว และสามารถแสดงผลได้

3.2 ผู้ใช้งานมีความพึงพอใจต่อระบบ

วิธีดำเนินงานวิจัย

1. ประชากรและตัวอย่าง

กลุ่มเป้าหมายถูกแบ่งออกเป็น 2 กลุ่มได้แก่ กลุ่มผู้ใช้งาน และกลุ่มผู้เชี่ยวชาญ

กลุ่มผู้ใช้งาน ได้แก่ ลูกค้าร้านตัดผม จำนวน 20 คน ใช้วิธีการเลือกแบบสุ่ม

กลุ่มผู้เชี่ยวชาญ ได้แก่ บุคลากรผู้เชี่ยวชาญด้านไลน์บอท จำนวน 3 คน ใช้วิธีการเลือกแบบเจาะจง

2. เครื่องมือวิจัย

ซอฟต์แวร์

1. Google Sheet ฐานข้อมูล หรือที่เก็บข้อมูลของลูกค้า
2. Dialogflow ตัวตั้งค่าการตอบกลับอัตโนมัติ
3. LineDeveloper เป็นตัวสร้างหน้าริชเมนู และเชื่อมต่อกับฐานข้อมูล
4. Appscript เป็นตัวใส่โค้ดเพื่อให้ระบบสามารถใช้งานได้ตามที่ต้องการ
5. Line หน้าแสดงผล

ภาษาที่ใช้ในงานวิจัย

1. Html
2. Css
3. Javascript

3. การเก็บรวมรวบข้อมูล แบบแผนการวิจัย และการวิเคราะห์ข้อมูล

ผู้วิจัยได้นำ SDLC (System Development Life Cycle) หรือ วงจรการพัฒนาระบบ มาประยุกต์ใช้ในงานวิจัย ซึ่งมีทั้งหมด 6 ข้อ ได้แก่

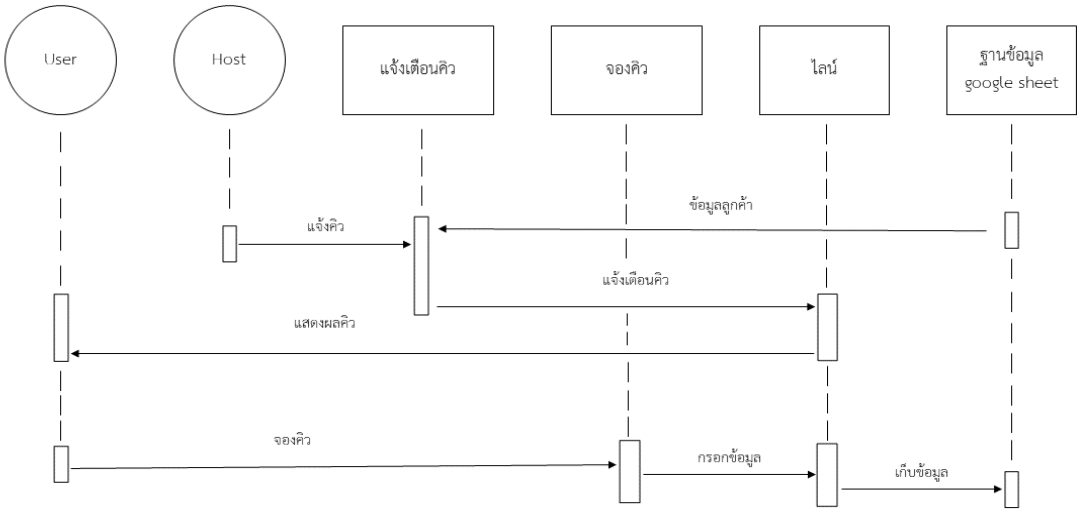
3.1 ศึกษาระบบงานเดิม จากการศึกษาพบว่าเวลาใช้บริการร้านตัดผม ลูกค้าจะต้องเดินทางเพื่อตรวจสอบว่าทางร้านเปิดหรือไม่ คิวว่างหรือไม่ หรือใช้เวลาตัดนานหรือไม่

3.2 วิเคราะห์ปัญหาของระบบ จากการวิเคราะห์ถึงปัญหาพบว่าการเดินทางมาตรวจสอบทำให้เสียผลประโยชน์ต่อลูกค้าและช่างตัดผมเนื่องจากทางลูกค้าต้องเสียเวลา และค่าเดินทางเพื่อมาตรวจสอบ และเมื่อทางร้านมีลูกค้าเยอะ หรือปิด เหตุการนี้ทำให้ทางร้านเสียลูกค้าไปโดยเปล่าประโยชน์

3.3 ออกแบบระบบ ผู้วิจัยทำการออกแบบระบบโดยคำนึงถึงความสะดวกและง่ายต่อการใช้งานเป็นหลัก และวิธีนี้ยังช่วยแก้ปัญหาการเสียลูกค้าให้กับร้านตัดผมเนื่องจากทางร้านสามารถแจ้งวันเวลาปิดร้านจากทางแอพพลิเคชั่นไลน์ได้ และลูกค้าก็สามารถตรวจสอบข้อมูล วัน เวลา ร้านเปิดปิดหรือคิวร้านได้จากทางแอพพลิเคชั่นไลน์

3.4 พัฒนาและทดสอบระบบ จากระบบเดิมและปัญหาของระบบทำให้ผู้วิจัยได้จัดทำระบบการจองคิวอัตโนมัติผ่านแอพพลิเคชั่นไลน์เพื่อนำเทคโนโลยีมาประยุกต์ใช้กับธุรกิจร้านตัดผม วิธีนี้นอกจากจะช่วยแก้ปัญหาไม่ให้ทางร้านเสียลูกค้าแล้วยังสามารถเพิ่มลูกค้าให้กับทางร้านได้เนื่องจากลูกค้าที่เคยใช้บริการอาจแชร์ไลน์บอทของร้านตัดผมให้กับเพื่อน หรือ คนรู้จักที่สนใจตัดผมและไม่จำเป็นต้องเสียเวลาถามทางเนื่องจากสามารถตรวจสอบผ่านทางแอพพลิเคชั่นไลน์ได้เลย

3.5 ติดตั้งระบบ ทำการติดตั้งระบบโดยนำตัวไลน์บอทเข้ามาให้เจ้าของร้านใช้งานพร้อมอธิบายวิธีการดูข้อมูลของลูกค้า



3.6 ประเมิน จัดทำแบบประเมินความพึงพอใจให้กับผู้เชี่ยวชาญด้านการทำระบบไลน์บอท จำนวน 3 คน และลูกค้าซึ่งเป็นผู้ใช้งานระบบ จำนวน 20 คน

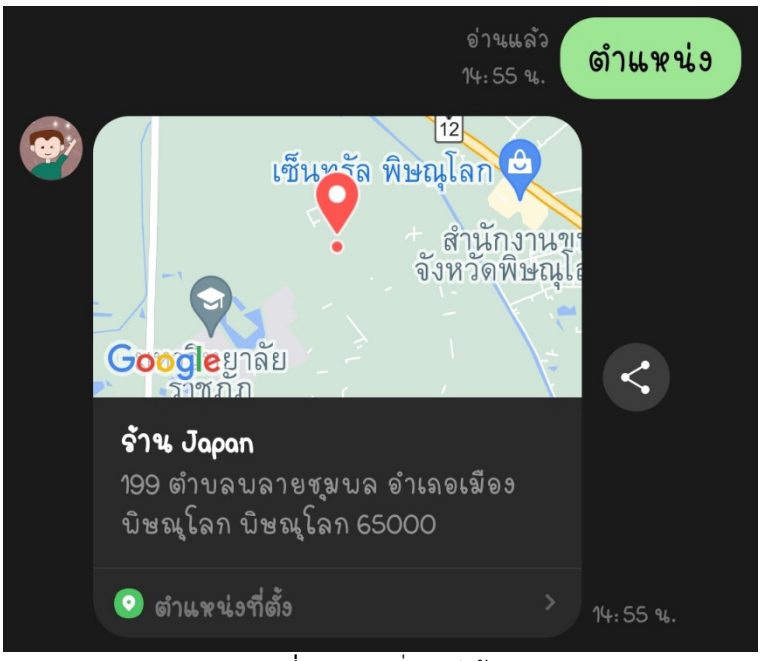
การวิเคราะห์ข้อมูลและสถิติที่ใช้

วิเคราะห์การใช้ข้อมูลด้วยสถิติ และส่วนเบี่ยงเบนมาตรฐาน (S.D.)

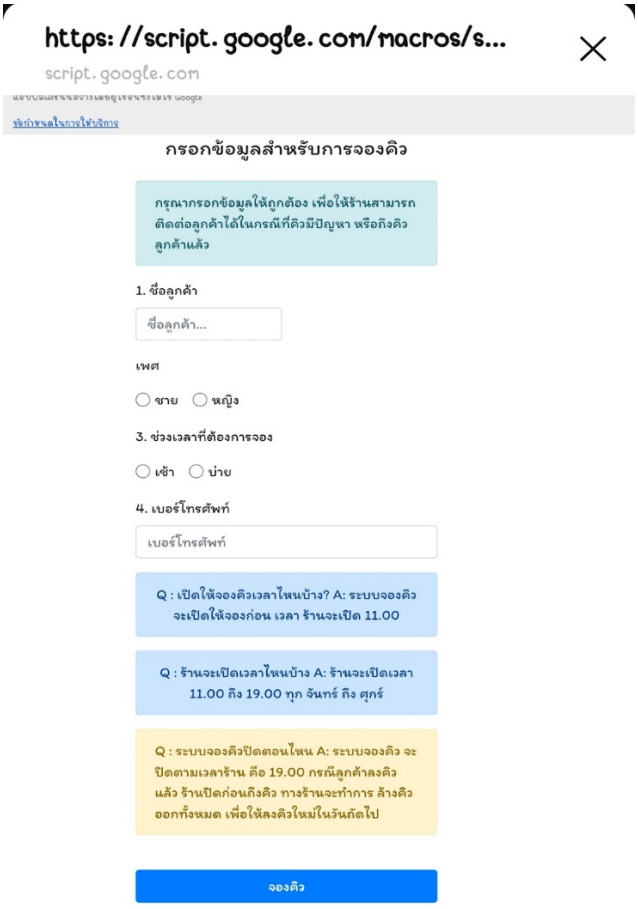
ผลการวิจัย

ผู้วิจัยได้จัดทำ Sequence Diagram ดังรูปที่ 1

ภาพประกอบที่ 2 แสดงผลการออกแบบระบบด้วย Sequence diagram



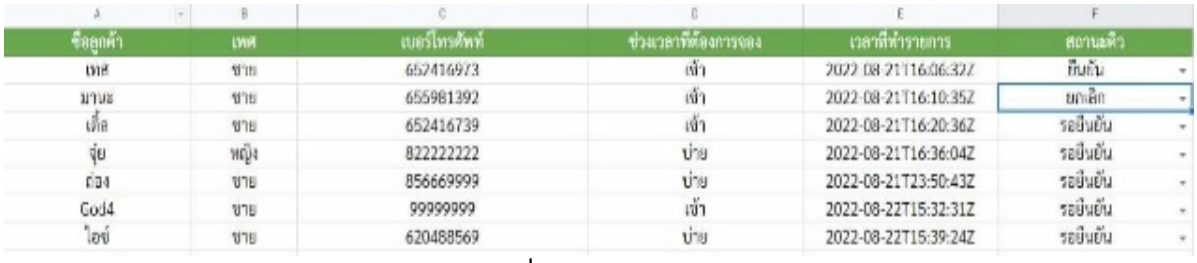
จากภาพประกอบที่ 2 ผู้วิจัยได้ทำการอธิบายรูปแบบการทำงานของระบบเป็น Sequence Diagram โดยระบบถูกแบ่งเป็นผู้ใช้งาน และ ผู้ดูแลระบบ



ภาพประกอบที่ 3 แสดงหน้าริชเมนูของไลท์บอท

ภาพประกอบที่ 3 หน้าริชเมนู

ภาพประกอบที่ 3 รูปหน้าริชเมนูของไลน์บอท ซึ่งจะมีทั้งหมด 2 เมนู คือ จองคิว และ ตำแหน่งของร้าน โดยเมื่อกดเมนูตำแหน่งของร้านตัวระบบจะส่ง GoogleMap เข้าไปในแชท แสดงดังภาพประกอบที่ 4 และในส่วนของเมนูจองคิวตัวระบบจะเด้งหน้าต่างขึ้นมา โดยมีหน้าตาดังภาพประกอบที่ 5



ภาพประกอบที่ 4 แสดงตำแหน่งร้าน

ภาพประกอบที่ 5 แสดงหน้ากรอกข้อมูล

จากภาพประกอบที่ 5 หน้ากรอกข้อมูล โดยจะมีรายละเอียดย่อยดังนี้ คือ ชื่อลูกค้า เพศ ช่วงเวลาการจองคิว เบอร์โทรศัพท์ และคำอธิบายเกี่ยวกับร้านตัดผม หลังจากกรอกข้อมูลเสร็จหมดแล้วระบบจะทำการส่งข้อมูลไปบันทึกไว้ในฐานข้อมูล GoogleSheet แสดงดังภาพประกอบที่ 5

A	B	C	D	E	F
ชื่อลูกค้า	เพศ	เบอร์โทรศัพท์	ช่วงเวลาที่ต้องการจอง	เวลาที่ทำรายการ	สถานะคิว
เพช	ชาย	652416973	เช้า	2022-08-21T16:06:32Z	ยืนยัน

ไอซ์	ชาย	620488569	บ่าย	2022-08-22T15:39:24Z	รอยืนยัน

ภาพประกอบที่ 6 ฐานข้อมูล GoogleSheet

จากภาพประกอบที่ 6 โดยในส่วนของฐานข้อมูลจะประกอบไปด้วย ชื่อ เพศ เบอร์โทรศัพท์ ช่วงเวลาการจอง เวลาที่ทำรายการ และสถานะคิว

ผลการประเมินความพึงพอใจ

ผลการประเมินความพึงพอใจจะแบ่งความพึงพอใจต่อคะแนนค่าเฉลี่ยเป็นระดับดังนี้

5 คือ ดีมาก, 4 คือ ดี, 3 คือ พอใช้, 2 คือ แย่, 1 คือ แย่มาก

ตารางที่ 1 ผลการประเมินระบบจองคิวร้านตัดผมผ่านไลน์บอท จากกลุ่มผู้ใช้งาน จำนวน 20 คน ใช้วิธีการเลือกแบบสุ่ม

รายงาน	ความพึงพอใจ		
	$\bar{x}$	S.D	ระดับ
ด้านการออกแบบ			
ความง่ายในการใช้ระบบ	4.00	0.85	ดี
ความเร็วของระบบ	4.00	0.79	ดี
ค่าเฉลี่ยน	4.00	0.82	ดี
ด้านการออกแบบ			
ความสวยงามการออกแบบ	3.95	0.75	พอใช้
. ความง่ายต่อการดูและอ่าน	4.00	0.85	ดี
ปุ่มเมนูดูง่ายต่อการใช้งาน	4.10	0.85	ดี
ค่าเฉลี่ยน	4.01	0.81	ดี
ค่าเฉลี่ยนรวม	4.01	0.82	ดี

จากตารางที่ 1 ผลการประเมินจาก กลุ่มผู้ใช้งาน จำนวน 20 คน มีค่าเฉลี่ยทั้งหมด ในส่วนของค่าเฉลี่ย เท่ากับ (x = 4.01) และในส่วนของค่าเบี่ยงเบนมาตรฐาน เท่ากับ (S.D. = 0.82) ซึ่งอยู่ในระดับ ดี โดยมีรายละเอียดดังต่อไปนี้

ด้านเนื้อหามีค่าเฉลี่ย (X = 4.00) และ (S.D. = 0.82) ซึ่งอยู่ในระบบ ดี

ด้านการออกแบบมีค่าเฉลี่ย (X = 4.01) และ (S.D. = 0.81) ซึ่งอยู่ในระบบ ดี

ตารางที่ 2 ผลการประเมินระบบจองคิวร้านตัดผมผ่านไลน์บอท จากกลุ่มผู้เชี่ยวชาญ จำนวน 3 คน ใช้วิธีการแบบเจาะจง

รายงาน	ความพึงพอใจ		
	$\tilde{\chi}$	S.D	ระดับ
ด้านการออกแบบ			
ความง่ายในการใช้ระบบ	4.00	0.85	ดี
ความเร็วของระบบ	4.00	0.79	ดี
ค่าเฉลี่ยน	4.00	0.70	ดี
ด้านการออกแบบ			
ความสวยงามการออกแบบ	4.66	0.57	พอใช้
. ความง่ายต่อการดูและอ่าน	4.00	1.00	ดี
ปุ่มเมนูดูง่ายต่อการใช้งาน	4.33	0.57	ดี
ค่าเฉลี่ยน	4.33	0.24	ดี
ด้านประสิทธิภาพของระบบ			
ระบบทำงานได้อย่างถูกต้อง	4.33	0.57	ดี
ภาพรวมการทำงานของระบบ	5.00	0.00	ดีมาก
ความรวดเร็วการรับส่งข้อมูล	4.33	0.57	ดี
รายละเอียดข้อมูลครบถ้วน	4.66	0.57	ดี
ค่าเฉลี่ยน	4.58	0.28	ดี
ค่าเฉลี่ยนรวม	4.37	0.35	ดี

*

จากตารางที่ 2 ผลการประเมินจาก กลุ่มผู้เชี่ยวชาญ จำนวน 3 คน มีค่าเฉลี่ยทั้งหมด ในส่วนของค่าเฉลี่ย เท่ากับ 4.37 (x = 4.37) และในส่วนของมีค่าเบี่ยงเบนมาตรฐาน เท่ากับ 0.35 (S.D. = 0.35) ซึ่งอยู่ในระดับ ดี โดยมีรายละเอียดดังต่อไปนี้

ด้านการใช้งานมีค่าเฉลี่ย (X = 4.00) และ (S.D. = 0.70) ซึ่งอยู่ในระบบ ดี

ด้านการออกแบบมีค่าเฉลี่ย (X = 4.33) และ (S.D. = 0.24) ซึ่งอยู่ในระบบ ดี

อภิปรายผล

งานวิจัยเรื่อง ระบบจองคิวร้านตัดผมผ่านไลน์บอท ถูกจัดทำมาเพื่อนำเทคโนโลยีมาประยุกต์ใช้กับร้านตัดผมเพื่อแก้ไขปัญหาและพัฒนาธุรกิจให้รู้จักได้อย่างแพร่หลายด้วยแอพพลิเคชั่นไลน์ โดยตัวระบบถูกออกแบบมาเพื่อให้ทางร้านสามารถจัดคิวการใช้บริการ ประกาศเวลาร้านเปิดปิด และสนทนาผ่านแอพพลิเคชั่นไลน์ โดยวิธีการใช้งานระบบ คือ ทางลูกค้าต้องทำการเพิ่มเพื่อนของทางร้าน เมื่อเข้าสู่หน้าต่างแชทจะมีเมนูให้เลือกทั้งหมด 2 เมนูด้วยกัน ได้แก่ เมนูจองคิว และเมนูตำแหน่งร้าน เมื่อกดเมนูจองคิวระบบจะเด้งหน้าต่างขึ้นบนแอพพลิเคชั่นไลน์ โดยจะให้กรอกข้อมูลของลูกค้าที่ต้องการจอง อทิเช่น ชื่อ เบอร์โทรศัพท์ ช่วงเวลาที่ต้องการจอง เมื่อกรอกเสร็จระบบจะนำข้อมูลไปเก็บไว้ที่ ฐานข้อมูลGoogleSheet เพื่อรอให้เจ้าของร้านอนุมัติ และเมื่อกดในส่วนของเมนูตำแหน่งร้าน ระบบจะส่งตำแหน่งร้านจาก GoogleMap เข้ามาที่หน้าต่างแชทของลูกค้าทันที

ผู้จัดทำได้ทำแบบประเมินความพึงพอใจให้คนทั้ง 2 กลุ่มประเมิน ได้แก่ กลุ่มผู้เชี่ยวชาญหรือบุคคลากรที่มีความเชี่ยวชาญระบบไลน์บอท โดยมีคะแนนเฉลี่ยอยู่ที่ 4.37 ซึ่งตรงกับงานวิจัยของ [1]สกล ดำมินเศก & รติวัฒน์ ปารีศรี. ที่จัดทำระบบไลน์บอท โดยตัวระบบสามารถโต้ตอบกลับอัตโนมัติได้อย่างเสถียร จากคะแนนเฉลี่ยในส่วนของผู้ใช้งานทำให้ทราบได้ว่าระบบสามารถทำงานได้เป็นอย่างดี โดยในส่วนของกลุ่มผู้ใช้งานหรือลูกค้า มีคำแนนเฉลี่ยอยู่ที่ 4.01 ซึ่งตรงกับงานวิจัยของ [2]นาง กาญจนา คำสมบัติ. ที่จัดทำระบบไลน์บอท โดยนำการลงทะเบียนร้าน การให้ข้อมูลการให้บริการของร้าน การบริหารจัดการคิวลูกค้า และการสนทนาผ่านห้องสนทนามาใช้ในระบบ จากผลสำรวจแบบประเมินทำให้ทราบว่าระบบจองคิวร้านตัดผมผ่านไลน์บอท สามารถใช้งานได้ตรงตามจุดประสงค์ที่ตั้งไว้ทุกประการ

ข้อเสนอแนะ

ข้อเสนอแนะทั่วไป

จากภาพประกอบที่ 5 ฐานข้อมูลควรมีการจัดทำหน้าแสดงผลเป็นเว็บไซต์เพื่อความเป็นระเบียบและความสบายตาของเจ้าของร้าน

ข้อเสนอแนะในการวิจัยครั้งต่อไป

ระบบจองคิวร้านตัดผมผ่านไลน์บอทสามารถนำไปพัฒนาได้ โดยทำระบบแจ้งเตือนลูกค้าด้วย Line Notify โดยจัดทำระบบให้สามารถประกาศ เปิดปิดร้านหรือจองคิวได้ด้วยการตั้งเวลาไว้

กิตติกรรมประกาศ

งานวิจัยฉบับนี้สามารถสำเร็จลุล่วงด้วยความช่วยเหลือจากท่านอาจารย์ รติวัฒน์ ปารีศรี ที่ได้เสียสละเวลาอันมีค่ามาเพื่อให้คำแนะนำและแก้ไขข้อบกพร่องของงานวิจัยจนงานวิจัยเสร็จสมบูรณ์ และขอขอบคุณเจ้าของร้านตัดผมที่ทำให้ผู้วิจัยมีโอกาสเริ่มทำงานวิจัยเรื่องระบบจองคิวร้านตัดผมผ่านไลน์บอทนี้ และได้ทดสอบระบบจากทางร้านของท่าน ขอกล่าวขอบคุณทุกท่านเป็นอย่างสูง

การพัฒนาผลิตภัณฑ์นมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงา

Development of Sweetened Condensed Milk Product from Rai Dok Kha Phang Nga Rice

จรรยา คงแก้ว Janya Khongkaew[1]
น้อมจิตต์ สุธีบุตร Nomjit Suteebut[2]

บทคัดย่อ

การศึกษาเรื่องการพัฒนาผลิตภัณฑ์นมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงา มีวัตถุประสงค์เพื่อ 1) ศึกษาความเข้มข้นของน้ำนมข้าวไร่ดอกข่าพังงาสำหรับการผลิตนมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงา และ 2) ศึกษาคุณค่าทางโภชนาการของผลิตภัณฑ์นมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงา จากผลการทดลองพบว่าปริมาณของข้าวไร่ดอกข่าที่บดผสมกับน้ำเพื่อเตรียมเป็นน้ำนมข้าวมีผลต่อลักษณะทางกายภาพและคะแนนความชอบทางประสาทสัมผัสของผลิตภัณฑ์ โดยผลิตภัณฑ์นมข้าวข้นหวานที่ผลิตได้มีลักษณะสีน้ำตาลอ่อนค่อนไปทางสีแดง อัตราส่วนที่มีปริมาณของข้าวไร่ดอกข่าสูงขึ้นมีผลให้นมข้าวข้นหวานมีสีเข้มขึ้น และมีความข้นหนืดสูงขึ้น จากผลการทดสอบชิมพบว่าอัตราส่วนข้าวไร่ดอกข่า:น้ำ:น้ำตาลทรายที่ 10:40:50 โดยน้ำหนัก เป็นอัตราส่วนที่เหมาะสมที่ทำให้นมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงาได้รับคะแนนความชอบทางประสาทสัมผัสสูงกว่าอัตราส่วน 15:35:50 และ 5:45:50 ผลวิเคราะห์คุณค่าทางโภชนาการของผลิตภัณฑ์นมข้าวข้นหวานจากข้าวไร่ดอกข่าที่พัฒนาได้ ในปริมาณ 100 กรัม มีปริมาณโปรตีน 0.54 กรัม ไขมัน 0.42 กรัม คาร์โบไฮเดรต 61.19 กรัม ให้พลังงาน 250.7 Kcal ซึ่งเป็นปริมาณโปรตีนต่ำกว่านมข้นหวานทางการค้าแต่เป็นผลดีกับสุขภาพด้วยมีปริมาณไขมันและพลังงานที่ต่ำกว่านมข้นหวานทางการค้า

คำสำคัญ: ข้าวไร่ดอกข่าพังงา; นมข้าวข้นหวาน; ผลิตภัณฑ์เลียนแบบนม

Abstract

This research study on the development of sweetened condensed milk products from Rai Dok Kha Phang Nga rice aims to 1) study the concentration of rice milk from Rai Dok Kha Phang Nga rice for sweetened condensed milk production and 2) study the nutritional value of sweetened condensed milk from Rai Dok Kha Phang Nga rice. From the experimental results, it was found that the amount of rice that is crushed and mixed with water to prepare them as rice milk, affects the physical characteristics and sensory preference scores of the product. The milk products are characterized by light brown color, squinting towards red. The ratio with higher amounts of rice has resulted in darker milk and more increased viscous thickening. According to the preference test results, the ratio of Rai Dok Kha rice:water: granulated sugar at 10:40:50 by weight is the appropriate ratio that makes the condensed rice milk from the Kha Phang Nga rice receive a higher sensory preference score than the ratios of 15:35:50 and 5:45:50. The nutritional value of developed sweetened condensed Rai Dof Kha rice in the amount of 100 grams, it contained 0.54 grams of protein, 0.42 grams of fat, 61.19 grams of carbohydrates, and 250.7 Kcal of energy, which is a lower protein content than commercial condensed milk, but it is good for health with a lower fat content and energy content than commercial condensed milk. .

Keywords: Rai Dok Kha Phang Nga Rice; sweetened condensed milk products;Milk imitation products.

บทนำ

อาหารที่ผู้บริโภคมีอาการแพ้บ่อยที่สุดในประเทศไทยคือนมวัวและโปรตีนจากนมสัตว์ ซึ่งจากรายงานการศึกษาเกี่ยวกับการมีภาวะพร่องเอนไซม์แลคเตสของประชากรในประเทศไทยมีมากกว่าร้อยละ 98 (อรลัดา เจือจันทร์, 2556) นอกจากนี้ยังพบว่าสถิติของประชากรในประเทศไทยมีเพียงแค่ร้อยละ 10 เท่านั้น ที่ไม่มีภาวะพร่องเอนไซม์แลคเตสและสามารถดื่มนมวัวได้ (กนกพรรณ อรรัตนสกุล, 2563) ทำให้ผู้บริโภคที่มีอาการแพ้นมวัวจะไม่สามารถรับประทานนมได้ (ศิริราชพยาบาล, 2562) ปกติโปรตีนในนมวัวจะมี

[1] สาขาวิชาคหกรรมศาสตร์ คณะเทคโนโลยีคหกรรมศาสตร์ มหาวิทยาลัยเทคโนโลยีราชมงคลพระนคร
(หมายเลขโทรศัพท์ 087-085-0042 E-mail JANYA-K@rmutp.ac.th)
[2] สาขาวิชาเทคโนโลยีอาหาร คณะเทคโนโลยีคหกรรมศาสตร์ มหาวิทยาลัยเทคโนโลยีราชมงคลพระนคร

ประมาณร้อยละ 3-3.5 โปรตีนในนมวัวมีหลากหลายชนิดและมีคุณสมบัติก่อให้เกิดอาการแพ้ที่เกี่ยวข้องกับระบบภูมิคุ้มกัน ที่สำคัญ คือ เคซีน แอลฟา-แลคตาบูมิน และเบต้าแลคโตโกลบูลิน ซึ่งเป็นโปรตีนหลักที่เป็นสารก่อภูมิแพ้ในนม (วิภา สุโรจนะเมธากุล, 2554). การใช้วัตถุดิบอื่นทดแทนการใช้วัตถุดิบที่มีส่วนผสมของนมวัวในกระบวนการผลิตนมข้นหวานจึงเป็นแนวทางหนึ่งที่สามารถตอบสนองความต้องการของผู้บริโภคที่แพ้นมวัวได้ จึงมีการใช้วัตถุดิบอื่นมาทดแทนการใช้นมวัว เช่น การใช้ธัญพืช เช่น ข้าวโพด ลูกเดือย และข้าวมาผลิตเป็นผลิตภัณฑ์เลียนแบบนม นมเปรี้ยว โยเกิร์ต เป็นต้น น้ำนมจากข้าวพันธุ์ที่มีสีเป็นวัตถุดิบที่น่าสนใจซึ่งอุดมด้วยคุณค่าทางโภชนาการ มีโปรตีนสูง มีปริมาณสารต้านอนุมูลอิสระสูง โดยเฉพาะในส่วนของเยื่อหุ้มเมล็ดที่เป็นสีม่วงซึ่งมีสารประกอบกลุ่มฟลาโวนอยด์ เช่น แอนโทไซยานิน ไซยานิดินพีโอนิดิน และโพรแอนโทไซยานิดิน เป็นต้น (จุฑามาศ ถิระสาโรช และ เฉลิมพล ถนอมวงค์, 2558)

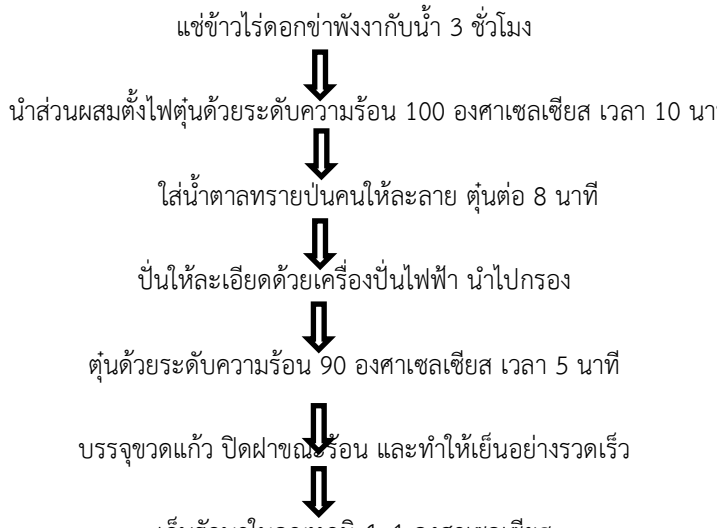
ข้าวไร่ดอกข่าพังงา คือ ข้าวไร่พันธุ์ดอกข่า 50 เป็นข้าวไร่พันธุ์พื้นเมืองที่มีสีน้ำตาลแดงอมม่วง สีแดง หรือสีแดงแกมขาว เมื่อหุงสุกจะมีกลิ่นหอมคล้ายใบเตย ได้รับการขึ้นทะเบียนเป็นสิ่งบ่งชี้ทางภูมิศาสตร์ (GI) ของจังหวัดพังงา เมื่อปีพ.ศ. 2557 (กรมทรัพย์สินทางปัญญา, 2563) ในพื้นที่จังหวัดพังงามีการส่งเสริมการปลูกข้าวไร่ดอกข่าพังงาเป็นผลิตภัณฑ์ชุมชน มีการแปรรูปจำหน่ายเป็นข้าวกล้อง ชา และจมูกข้าว ซึ่งได้รับความนิยมในหมู่ผู้รักสุขภาพ คุณค่าทางโภชนาการของข้าวกล้องพันธุ์ดอกข่า 50 เปรียบเทียบกับพันธุ์อื่นๆ พบว่ามีปริมาณโอเมก้า 9 เท่ากับ 1.22 กรัมต่อ 100 กรัม วิตามินชนิดอัลฟาโทโคฟีรอลและแกมม่าโทโคฟีรอล 12.15 และ 13.90 มิลลิกรัมต่อกิโลกรัม ตามลำดับ ซึ่งสูงกว่าพันธุ์เปรียบเทียบทุกพันธุ์ นอกจากนี้พบว่ามีปริมาณไฟเตทต่ำ (2,390 มิลลิกรัมต่อกิโลกรัม) (ชูชาติ สวยนกุล และคณะ, 2561) มีการนำข้าวไร่ดอกข่ามาแปรรูปเป็นผลิตภัณฑ์เจลโลส ขนมจีนอบแห้งจากข้าวไร่ดอกข่าทดแทนการใช้แป้งข้าวเจ้าเพื่อเพิ่มมูลค่าผลิตภัณฑ์ชุมชนในท้องถิ่นออกสู่ตลาด (นันทนา บำรุงชาติ, 2564) ผลิตภัณฑ์นมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงาที่ผู้วิจัยพัฒนาขึ้น ประกอบไปด้วยส่วนประกอบหลักคือ น้ำนมจากข้าวไร่ดอกข่าพังงา ซึ่งนำมาใช้ทดแทนน้ำนมที่มาจากวัวซึ่งจะเป็นผลิตภัณฑ์ที่สามารถเพิ่มมูลค่าของข้าวไร่ดอกข่าพังงาให้มีมูลค่าสูงขึ้น รวมถึงสร้างความแปลกใหม่ให้กับอุตสาหกรรมนมข้นหวานและกลุ่มลูกค้า จากส่วนประกอบของนมข้นหวานที่มาจากข้าวและมีประโยชน์ อีกทั้งผู้บริโภคที่แพ้นมวัวสามารถรับประทานได้ตอบโจทย์กับการที่ผู้บริโภคต้องการบริโภคอาหารเพื่อสุขภาพเช่นเดียวกัน

วัตถุประสงค์

1. ศึกษาความเข้มข้นของน้ำนมข้าวไร่ดอกข่าพังงาสำหรับการผลิตนมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงา
2. ศึกษาคุณค่าทางโภชนาการของผลิตภัณฑ์นมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงา

วิธีการดำเนินการวิจัย

1. ศึกษาศึกษาความเข้มข้นของน้ำนมข้าวไร่ดอกข่าพังงา



ศึกษาความเข้มข้นของน้ำนมข้าวไร่ดอกข่าพังงา โดยแปรอัตราส่วนของข้าวไร่ดอกข่าพังงาบดผสมกับน้ำที่ต่างกัน และใช้น้ำตาลทรายเท่ากันที่ร้อยละ 50 ในสูตรการผลิตใช้อัตราส่วนข้าวไร่ดอกข่า:น้ำ:น้ำตาลทรายที่ต่างกัน 3 ระดับ คือ 5:45:50 10:40:50 และ 15:35:50 โดยน้ำหนัก ดังแสดงในตารางที่ 1 เพื่อผลิตเป็นนมข้าวข้นหวานซึ่งมีกรรมวิธีการผลิตดังแผนภูมิที่ 1

ตารางที่ 1 ส่วนผสมของนมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงา

ส่วนผสม	ข้าวไร่ดอกข่า:น้ำ:น้ำตาลทราย					
	5:45:50		10:40:40		15:35:50	
	กรัม	ร้อยละ	กรัม	ร้อยละ	กรัม	ร้อยละ
ข้าวไร่ดอกข่า	50	5	100	10	150	15
น้ำ	450	45	400	40	350	35
น้ำตาลทราย	500	50	500	50	500	50
รวม	1,000	100	1,000	100	1,000	100

บดข้าวไร่ดอกข่าพังงาให้ละเอียด

⇩

แผนภูมิที่ 1 กรรมวิธีการผลิตนมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงา

นำนมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงา ที่ได้ไปวิเคราะห์คุณภาพต่างๆ ดังนี้

1) วิเคราะห์คุณภาพทางกายภาพและเคมี

โดยวางแผนการทดลองแบบสุ่มอย่างสมบูรณ์ นำผลที่ได้มาวิเคราะห์ค่าความแปรปรวนทางสถิติ และเปรียบเทียบความแตกต่างค่าเฉลี่ยของสิ่งที่ทดลองด้วยวิธี Duncan' New Multiple Range Test (DMRT) กำหนดนัยสำคัญทางสถิติที่ระดับ 0.05 วิเคราะห์ผลด้วยโปรแกรมสำเร็จรูปทางสถิติ

- การวัดค่าสี แสดงผลในรูปค่าความสว่าง (L*) (0-100) ค่าความเป็นสีแดง (a* ค่าบวก) และค่าความเป็นสีเหลือง (b* ค่าบวก) ด้วยเครื่องวัดค่าสี KONICA MINOLTA รุ่น 35000D

- วัดค่าความหนืด ด้วยเครื่องวัดค่าความหนืด Brookfield Viscometer (RVDV-II+PRO, USA) โดยใช้หัวเข็มขนาด No. 1 ปริมาณตัวอย่าง 250mL ต่อการวัดแต่ละครั้ง อ่านค่าที่ระดับความเร็วรอบ 50 rpm บันทึกค่าในหน่วยเซนติพอยด์ (cP) วัดซ้ำ 3 ครั้ง

2) ประเมินคุณภาพทางประสาทสัมผัส โดยนำนมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงาที่ผลิตได้ทดสอบชิมแบบให้คะแนนความชอบ 9 ระดับ ประเมินผลทางด้านลักษณะปรากฏ สี กลิ่น รสชาติ เนื้อสัมผัส และความชอบโดยรวม โดยใช้ผู้ทดสอบชิมจำนวน 30 คน เป็นนักศึกษาสาขาวิชาอาหารและโภชนาการ วิทยาลัยเทคนิคพังงา วางแผนการทดลองแบบสุ่มในบล็อกสมบูรณ์ (Randomized Complete Block Design , RCBD) นำผลที่ได้มาวิเคราะห์ความแปรปรวนทางสถิติ และเปรียบเทียบความแตกต่างค่าเฉลี่ยของสิ่งที่ทดลองด้วยวิธี Duncan' New Multiple Range Test (DMRT) กำหนดนัยสำคัญทางสถิติที่ระดับ 0.05 วิเคราะห์ผลด้วยโปรแกรมสำเร็จรูปทางสถิติ เพื่อคัดเลือกสูตรที่ได้รับการยอมรับมากที่สุด นำไปศึกษาปริมาณสารให้ความหวานทดแทนน้ำตาลทรายที่เหมาะสม

2. ศึกษาคุณค่าทางโภชนาการของผลิตภัณฑ์นมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงา

นำผลิตภัณฑ์นมข้าวข้นหวานที่ผ่านการคัดเลือกจากข้อ 1 ทำการวิเคราะห์คุณค่าทางโภชนาการได้แก่ ปริมาณความชื้น ไขมัน โปรตีน เถ้า คาร์โบไฮเดรต และคำนวณพลังงานทั้งหมด (AOAC, 2012)

ผลการวิจัย

1. ผลการศึกษาอัตราส่วนข้าวไร่ดอกข่าพังงาต่อน้ำในการเตรียมผลิตภัณฑ์นมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงา

จากการศึกษาความเข้มข้นที่เหมาะสมของน้ำนมข้าว โดยใช้ปริมาณข้าวไร่ดอกข่าพังงาบดผสมกับน้ำที่แตกต่างกันในอัตราส่วนร้อยละ 15:35 10:40 และ 5:45 โดยน้ำหนัก นมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงาที่ได้มีลักษณะเป็นของเหลวข้นสีน้ำตาลเข้มอมแดง ความเข้มข้นของนมข้าวข้นหวานจะลดลงเมื่อใช้น้ำในปริมาณมากขึ้น ผลการวิเคราะห์คุณภาพแสดงดังภาพที่ 1 และตารางที่ 2

ภาพประกอบที่ 1 ผลิตภัณฑ์นมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงาที่อัตราส่วนข้าวไร่ดอกข่าต่อน้ำต่อน้ำตาลทรายร้อยละ 5:45:50 10:40:50 และ 15:35:50 โดยน้ำหนัก

ตารางที่ 2 คุณภาพทางกายภาพของนมข้าวข้นหวานที่มีอัตราส่วนข้าวไร่ดอกข่าพังงา:น้ำ:น้ำตาลทรายต่างกัน

คุณภาพทางกายภาพ	อัตราส่วนข้าวไร่ดอกข่าพังงา : น้ำ : น้ำตาลทราย		
	5:45:50	10:40:50	15:35:50
ค่าสี L*	35.72±0.62^{a}	35.66±0.15^{a}	33.91±0.21^{b}
a*	8.96±0.35^{c}	13.35±0.13^{b}	15.57±0.07^{a}
b*	10.04±0.08^{c}	13.91±0.28^{b}	15.45±0.06^{a}
ความข้นหนืด (cP)	4,480±323^{c}	5,300±210^{b}	6,550±180^{a}

หมายเหตุ : ตัวอักษร $^{a\,b\,c}$ ที่แตกต่างกันในแนวนอนเดียวกัน หมายถึง ค่าที่มีความแตกต่างกันอย่างมีนัยสำคัญทางสถิติ ($p \leq 0.05$)

ตารางที่ 3 คะแนนความชอบทางประสาทสัมผัสของนมข้าวข้นหวานที่มีอัตราส่วนข้าวไร่ดอกข่าพังงา:น้ำ:น้ำตาลทรายต่างกัน

คุณลักษณะทางประสาทสัมผัส	คะแนนความชอบ (ค่าเฉลี่ย±SD)		
	5:45:50	10:40:50	15:35:50
ด้านสี	4.30±0.60^{c}	7.73±1.28^{a}	5.10±0.76^{b}
ด้านกลิ่น	4.73±1.01^{c}	7.17±1.39^{a}	5.73±0.91^{b}
ด้านรสชาติ	5.80±1.24^{b}	7.20±1.10^{a}	5.67±0.84^{b}
ด้านลักษณะเนื้อสัมผัส	5.87±1.14^{b}	7.47±1.04^{a}	5.43±0.68^{b}
ด้านความชอบโดยรวม	5.80±0.81^{b}	7.43±1.10^{a}	4.90±0.92^{c}

หมายเหตุ: ตัวอักษร $^{a\,b\,c}$ ที่แตกต่างกันในแนวนอนเดียวกัน หมายถึง ค่าที่มีความแตกต่างกันอย่างมีนัยสำคัญทางสถิติ ($p \leq 0.05$)

2. ผลการศึกษาคุณค่าทางโภชนาการของผลิตภัณฑ์นมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงา

ผลการศึกษาคุณค่าทางโภชนาการของผลิตภัณฑ์นมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงาจากการตรวจวิเคราะห์ในห้องปฏิบัติการ และคุณค่าโภชนาการของนมข้นหวานทางการค้าจากเอกสารอ้างอิง เปรียบเทียบปริมาณไขมัน โปรตีน คาร์โบไฮเดรต พลังงานทั้งหมด (AOAC 2012) แสดงดังตารางที่ 4

ตารางที่ 4 คุณค่าทางโภชนาการของผลิตภัณฑ์นมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงาและนมข้นหวานทางการค้า

คุณค่าทางโภชนาการ ต่อ 100 กรัม	นมข้าวข้นหวาน จากข้าวไร่ดอกข่าพังงา	นมข้นหวานทางการค้า ยี่ห้อ A*	นมข้นหวานทางการค้า ยี่ห้อ B*
พลังงาน (Kcal,คำนวณ)	250.7	320	350
โปรตีน (กรัม)	0.54	8	5
คาร์โบไฮเดรต (กรัม)	61.19	54	60
ไขมัน (กรัม)	0.42	9	10

หมายเหตุ: ที่มา * https://www.calforlife.com/

สรุปผลการวิจัย

1. ผลการศึกษาความเข้มข้นของน้ำนมข้าวไร่ดอกข่าพังงา โดยแปรอัตราส่วนข้าวไร่ดอกข่าพังง : น้ำ : น้ำตาลทรายที่ต่างกันพบว่าอัตราส่วน 10:40:50 โดยน้ำหนัก เป็นอัตราส่วนที่เหมาะสมทำให้นมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงาได้รับคะแนนความชอบทางประสาทสัมผัสสูงกว่าอัตราส่วน 15:35:50 และ 5:45:50

2. คุณค่าทางโภชนาการของผลิตภัณฑ์นมข้าวข้นหวานจากข้าวไร่ดอกข่าปริมาณ 100 กรัม มีปริมาณโปรตีน 0.54 กรัม ไขมัน 0.42 กรัม คาร์โบไฮเดรต 61.19 กรัม ให้พลังงาน 250.7 Kcal

อภิปรายผลการวิจัย

1. ผลการศึกษาความเข้มข้นของน้ำนมข้าวไร่ดอกข่าพังงา จากผลการวิเคราะห์คุณภาพทางกายภาพของผลิตภัณฑ์นมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงา (ตารางที่ 2) พบว่าอัตราส่วนของข้าวไร่ดอกข่าพังงาต่อน้ำที่ต่างกันมีผลต่อค่าสี L* a* และ b* โดยปริมาณของข้าวที่สูงขึ้นมีผลต่อความเข้มข้นของผลิตภัณฑ์ที่มากขึ้น สีของผลิตภัณฑ์จะเข้มขึ้น ซึ่งสอดคล้องกับงานวิจัยของจุฑามาศ และ เฉลิมพล (2558) ที่ได้ศึกษาเรื่องการผลิตเครื่องดื่มเพื่อสุขภาพจากข้าวหอมนิล พบว่า เมื่อปริมาณน้ำลดลง น้ำนมข้าวมีความเข้มข้นสูงขึ้น สีสีเข้มขึ้น ค่า L* ของเครื่องดื่มจากข้าวมีค่าลดลง การใช้น้ำในปริมาณที่มากมีผลทำให้สีของผลิตภัณฑ์อ่อนลง ค่า L* เพิ่มขึ้น สำหรับค่าสีแดง (a*) และ ค่า สีเหลือง (b*) ของผลิตภัณฑ์นมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงาพบว่า การมีปริมาณข้าวไร่ดอกข่าพังงาในปริมาณที่สูงส่งผลให้มีค่า a* และค่า b* ที่สูงขึ้น เนื่องจากข้าวไร่ดอกข่าพังงามีปริมาณแอนโทไซยานิน (Anthocyanin) เป็นรงควัตถุหรือสารสี ที่ให้สีแดง ม่วง และน้ำเงิน ทั้งนี้สารแอนโทไซยานินละลายได้ดีในน้ำไม่เสถียร สลายตัวได้ง่ายด้วยความร้อน ออกซิเจน แสง เมื่อโครงสร้างเปลี่ยนแปลงไป สีจะเปลี่ยนไปด้วย (พิมพ์เพ็ญ พรเฉลิมพงศ์, 2565)

สำหรับค่าความข้นหนืดของผลิตภัณฑ์นมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงา พบว่า อัตราส่วนของข้าวไร่ดอกข่าพังงากับน้ำที่อัตราส่วน 15:35 10:40 และ 5:45 โดยน้ำหนัก มีค่าความข้นหนืดแตกต่างกันอย่างมีนัยสำคัญทางสถิติ ($p \leq 0.05$) ซึ่งเป็นผลมาจากปริมาณข้าวและน้ำที่ต่างกัน โดยถ้าใช้ข้าวปริมาณมากและน้ำปริมาณน้อยมีผลทำให้นมข้าวข้นหวานที่ได้มีความเข้มข้นสูง ค่าความข้นหนืดที่วัดได้มีค่าสูง โดยอัตราส่วนข้าวไร่ดอกข่าต่อน้ำที่ 15:35 โดยน้ำหนัก มีผลทำให้ค่าความข้นหนืดสูงที่สุด ที่ (6,550 เซนติพอยต์) สอดคล้องกับงานวิจัยของจุฑามาศ และเฉลิมพล (2558) ที่ได้ทำการผลิตเครื่องดื่มเพื่อสุขภาพจากข้าวหอมนิล พบว่า เมื่อปริมาณน้ำเพิ่มขึ้นทำให้ค่าความข้นหนืดของผลิตภัณฑ์ลดลงตามลำดับ และงานวิจัยของสุรีย์ แถวเที่ยง (2552) ที่ได้ทำการศึกษาเครื่องดื่มน้ำนมถั่วเหลืองผสมแครอท พบว่า การใช้น้ำปริมาณน้อยในการสกัดจะทำให้ได้น้ำนมถั่วเหลืองที่มีความเข้มข้นสูง และมีผลต่อความข้นหนืด แต่เมื่อใช้น้ำปริมาณมากขึ้นในการสกัดทำให้ค่าความหนืดของผลิตภัณฑ์ลดลงได้ และสอดคล้องกับงานวิจัยธนาภรณ์ รติธรรมธร (2559) ซึ่งได้ทำการศึกษาเรื่องผลของการให้ความร้อนและการทำให้เย็นที่มีต่อการเปลี่ยนแปลงโครงสร้างและการย่อยของแป้ง พบว่า แป้งถูกกระทำโดยการเพิ่มหรือลดอุณหภูมิ โดยเมื่อให้ความร้อนแป้งดิบกลายเป็นแป้งสุกโดยผ่านกระบวนการเจลาติไนซ์เซชัน ทำให้โครงสร้างเม็ดแป้งเปลี่ยนแปลงไปและมีผลให้ความหนืดสูงขึ้น เช่นเดียวกับการเตรียมเครื่องดื่มจากข้าวหอมนิลที่มีความเข้มข้นมากขึ้น ค่าความหนืดสูงขึ้นเมื่อปริมาณของข้าวหอมนิลมากขึ้น (จุฑามาศ ถิระสาโรช และ เฉลิมพล ถนอมวงค์, 2558)

จากตารางที่ 3 ผลการประเมินคุณภาพทางประสาทสัมผัสของนมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงา พบว่าอัตราส่วนของข้าวไร่ดอกข่าพังงาต่อน้ำที่แตกต่างกันมีผลทำให้คุณภาพทางประสาทสัมผัสมีความแตกต่างกันอย่างมีนัยสำคัญทางสถิติ โดยพบว่าสูตรที่ใช้ข้าวไร่ดอกข่าพังงาและน้ำ อัตราส่วน 10:40 โดยน้ำหนักมีผู้ทดสอบให้คะแนนความชอบเฉลี่ยสูงสุดในทุกด้าน ($p \leq 0.05$) มากกว่าอัตราส่วน 5:45 และ 15: 35 โดยมีค่าเฉลี่ยอยู่ในระดับความชอบปานกลาง ได้คะแนนความชอบอยู่ในระดับที่ผู้บริโภคยอมรับได้ เนื่องจากผลิตภัณฑ์มีความข้นหนืดที่พอดีไม่เจือจางหรือข้นหนืดเกินไป สอดคล้องกับค่าความข้นหนืดในตารางที่ 2 ซึ่งการใช้ข้าวไร่ดอกข่าพังงาและน้ำในอัตราส่วน 15:35 มีความเข้มข้นเกินไป ผู้ทดสอบให้ข้อเสนอแนะว่ารับประทานแล้วรู้สึกฝืดคอลักษณะคล้ายเม็ดแป้งดิบที่ไม่ละลายน้ำ

2. ผลการวิเคราะห์คุณค่าทางโภชนาการของนมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงาในปริมาณ 100 กรัม มีปริมาณโปรตีน 0.54 กรัม ไขมัน 0.42 กรัม คาร์โบไฮเดรต 61.19 กรัม ให้พลังงาน 250.7 Kcal ซึ่งเป็นปริมาณโปรตีนต่ำกว่านมข้นหวานทางการค้าแต่เป็นผลดีกับสุขภาพด้วยมีปริมาณไขมันและพลังงานที่ต่ำกว่านมข้นหวานทางการค้า จึงเหมาะที่จะเป็นอาหารสำหรับทุกช่วงวัย โดยเฉพาะผู้ที่แพ้นมวัวและโปรตีนจากนมสัตว์ มีรายงานการวิจัยว่าน้ำนมเลียนแบบสามารถทดแทนในด้านคุณค่าทางโภชนาการในนมวัวได้ ดื่มแล้วไม่ทำให้เกิดผลข้างเคียง เหมาะสำหรับผู้บริโภคทุกเพศทุกวัย และผู้ที่มีอาการแพ้นมวัวก็สามารรับประทานได้ (ราณี และคณะ, 2549) ทั้งนี้สามารถเพิ่มปริมาณโปรตีนในนมข้าวข้นหวานได้โดยการเพิ่มโปรตีนทดแทนจากวัตถุดิบอื่น เช่น โปรตีนจากข้าวหรือธัญพืชอื่นๆ และถั่วเหลืองในผลิตภัณฑ์เพื่อให้มีคุณค่าโภชนาการเพิ่มขึ้นได้

ข้อเสนอแนะ

1. ผลิตภัณฑ์นมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงามีอายุการเก็บรักษาที่สั้นควรมีการศึกษากระบวนการผลิต และกระบวนการเก็บรักษาเพื่อยืดระยะเวลาการเก็บให้มีระยะเวลาที่นานขึ้น

2. ผลิตภัณฑ์นมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงา ควรเติมสารอาหารอื่นๆเ พื่อให้ผลิตภัณฑ์มีคุณค่าทางโภชนาการมากยิ่งขึ้น เช่น โปรตีนจากข้าวหรือธัญพืช และถั่วเหลือง

3. ผลิตภัณฑ์นมข้าวข้นหวานจากข้าวไร่ดอกข่าพังงามีน้ำตาลปริมาณสูง ควรศึกษาการใช้สารให้ความหวานทดแทนน้ำตาลเพื่อให้มีพลังงานลดลงและเหมาะสมกับผู้บริโภคที่ต้องการลดการบริโภคน้ำตาล

การพัฒนาผลิตภัณฑ์ขนมเปี๊ยะกุหลาบแป้งมันม่วง

Product Development of Purple Sweet Potato Flour in Chinese Pastry Product (Kha-Nom Pia Kularb)

พิศมัย กรุดพิศมัย Pitsamai Grutpitsamai[1]
น้อมจิตต์ สุธีบุตร Nomjit Suteebut[2]

บทคัดย่อ

การศึกษาเรื่องการพัฒนาผลิตภัณฑ์ขนมเปี๊ยะกุหลาบแป้งมันม่วง มีวัตถุประสงค์เพื่อ (1) ศึกษาปริมาณการทดแทนแป้งสาลีด้วยแป้งมันม่วงที่เหมาะสมในส่วนแป้งชั้นในของผลิตภัณฑ์ขนมเปี๊ยะกุหลาบ และ (2) ศึกษาการยอมรับของผู้บริโภคที่มีต่อผลิตภัณฑ์ขนมเปี๊ยะกุหลาบแป้งมันม่วง ผลการศึกษาพบว่าเมื่อใช้แป้งมันม่วงทดแทนแป้งสาลีในปริมาณสูงขึ้นส่งผลให้สีแป้งชั้นในของขนมเปี๊ยะกุหลาบมีสีม่วง-แดงเพิ่มขึ้น และลักษณะเนื้อสัมผัสที่เกาะตัวกันลดลง การใช้แป้งมันม่วงทดแทนแป้งสาลีร้อยละ 50 ในส่วนแป้งชั้นในของขนมเปี๊ยะกุหลาบ ได้รับคะแนนความชอบทางประสาทสัมผัสสูงกว่าการทดแทนแป้งสาลี ร้อยละ 35 และ 75 ทั้งในด้านกลิ่น รสชาติ เนื้อสัมผัส และความชอบโดยรวม ผลการศึกษาการยอมรับของผู้บริโภคทั่วไปจำนวน 120 คน พบว่าผู้ตอบแบบสอบถามให้ความสนใจต่อผลิตภัณฑ์ขนมเปี๊ยะกุหลาบที่ใช้แป้งสาลีผสมแป้งมันม่วงร้อยละ 92.50

คำสำคัญ: แป้งมันม่วง, ขนมเปี๊ยะกุหลาบ, ทดแทนแป้งสาลี

Abstract

The purpose of using purple sweet potato flour in Chinese pastry wear is to (1) study the amount of wheat flour substitution with purple sweet potato flour suitable in the inner flour section of Chinese pastry and (2) to study the acceptance of consumers toward purple sweet potato flour in Chinese pastry. The study found that when using purple potato flour as a substitute for wheat flour in higher quantities, the inner starch color of Chinese pastry increases in purple-red color and reduces the texture of the sticking texture. The use of purple sweet potato flour replaced 35 % of wheat flour in the inner flour section giving a higher sensory favor score than wheat flour substitution of 50% and 75 % in terms of smell, taste, texture, and overall preference. A study of 120 consumers found that 92.50 % of respondents were interested in Chinese pastry products that used wheat flour with purple sweet potato flour.

Keywords: purple sweet potato flour, Chinese pastry, wheat flour substitute

บทนำ

ขนมเปี๊ยะเป็นผลิตภัณฑ์ขนมอบชนิดหนึ่งที่ได้รับความนิยม เป็นขนมที่ได้รับอิทธิพลจากชาวจีนที่อพยพมาอาศัยอยู่ในประเทศไทย ซึ่งชาวจีนเป็นชนชาติที่มีวิถีชีวิตและวัฒนธรรมในการกินที่เป็นเอกลักษณ์เฉพาะตัว ปัจจุบันผลิตภัณฑ์ขนมเปี๊ยะมีการผลิตหลากหลายรูปแบบ ทำด้วยแป้งมีไส้บรรจุอยู่ มีขนาดต่าง ๆ กัน ไส้ขนมเปี๊ยะส่วนใหญ่นิยมใช้ถั่วหลายชนิด เช่น ถั่วเขียวซีก ถั่วแดง ถั่วดำ โดยการนำไปกวนกับน้ำตาล อาจมีการเติมเมล็ดธัญพืชลงไปเพื่อเพิ่มคุณค่าทางโภชนาการให้สูงขึ้น ส่วนที่เป็นแป้งประกอบด้วยแป้งสาลี ไขมันหรือน้ำมัน น้ำ น้ำตาล เกลือ หรือส่วนประกอบอื่นที่เหมาะสม อาจมีไข่ผสมอยู่ด้วยก็ได้ (มาตรฐานผลิตภัณฑ์ชุมชน, 2555) ในส่วนตัวแป้งขนมเปี๊ยะมีสองชนิด คือ เปลือกแป้งชั้นในที่มีลักษณะนิ่ม และเปลือกแป้งชั้นนอกที่มีลักษณะกรอบร่วนเป็นชั้น ๆ เกิดจากการรีดพับทบตัวแป้งให้เกิดเป็นชั้น ด้วยแป้งที่ใช้ทำขนมเปี๊ยะใช้แป้งสาลีเป็นองค์ประกอบหลัก ซึ่งเป็นแป้งที่นำเข้าจากต่างประเทศ แป้งสาลีมีโปรตีนกลูเตนเป็นองค์ประกอบช่วยเก็บก๊าซคาร์บอนไดออกไซด์ที่ผลิตขึ้นโดยยีสต์หรือผงฟู ทำให้รักษารูปทรงของผลิตภัณฑ์ขนมอบไว้ แต่ข้อเสียของกลูเตน คือ ผู้บริโภคบางส่วนมีอาการแพ้ เช่น มีผื่นแดง คัน น้ำมูกไหล จาม คันตา ใบหน้าบวม และหายใจลำบาก ส่วนใหญ่อาการแพ้จะเกิดทันทีหลังจากรับประทานอาหารที่มีกลูเตนเป็นส่วนประกอบ เช่น ข้าวสาลี ข้าวบาร์เลย์ และข้าวไรย์ จึงมีการพัฒนาผลิตภัณฑ์อาหารหลายชนิดโดยการใช้แป้งชนิดอื่นที่ปราศจากกลูเตนมาใช้ทดแทนแป้งสาลีในผลิตภัณฑ์ขนมอบ เช่น แป้งข้าว ข้าวโพด แป้งถั่ว ธัญพืชอื่นๆ แป้งเผือก แป้งมันสำปะหลัง แป้งมันเทศ เป็นต้น

มันเทศเป็นพืชที่ใช้หัวบริโภค แถบเอเชียนิยมรับประทานเป็นอาหารว่าง บางประเทศรับประทานเป็นอาหารหลัก องค์ประกอบของหัวมันเทศเป็นแป้ง เป็นแหล่งคาร์โบไฮเดรต อีกทั้งยังเป็นแหล่งของเกลือแร่ และเส้นใยอาหารที่มีราคาถูก เป็นวัตถุดิบในการแปรรูปเป็นผลิตภัณฑ์อาหารชนิดต่าง ๆ อีกทั้งยังเป็นวัตถุดิบหลักในการสกัดแป้ง และสตาร์ช การผลิตสารให้ความหวานและการหมักแอลกอฮอล์ นอกจากนี้ มันเทศยังเป็นแหล่งของสารพฤกษเคมี (phytochemicals) ที่สำคัญหลายชนิด โดยกลุ่มของสารที่พบจะมีความแตกต่างกันไปตามสีของเนื้อมันเทศ เช่น มันม่วง (Purple Sweet Potato) มีสารสำคัญชื่อว่าแอนโทไซยานิน (anthocyanin) เป็นสารที่ให้สีม่วงและยังช่วยปกป้องผักผลไม้จากการทำลายของรังสีอัลตร้าไวโอเลต จึงทำให้มันม่วงมีฤทธิ์ต้านอนุมูลอิสระได้ดีกว่าผักสีอื่น ๆ (Chen et al., 2019) การนำแป้งมันม่วงซึ่งเป็นวัตถุดิบที่หาได้ง่ายในท้องถิ่น ราคาถูก มาแปรรูปเป็นแป้งเพื่อทดแทนการใช้แป้งสาลี นอกจากจะช่วยลดต้นทุนการผลิตยังเป็นการเพิ่มคุณค่าทางโภชนาการให้กับผลิตภัณฑ์ขนมเปี๊ยะได้

ดังนั้น ผู้วิจัยจึงมีความสนใจที่จะผลิตขนมเปี๊ยะที่ทดแทนแป้งสาลีด้วยแป้งมันม่วง นอกจากจะสามารถลดปริมาณกลูเตนในผลิตภัณฑ์ขนมเปี๊ยะกุหลาบได้แล้ว ยังสามารถเพิ่มคุณค่าทางโภชนาการให้กับผลิตภัณฑ์มากยิ่งขึ้น เพื่อเป็นอีกทางเลือกหนึ่งของผู้บริโภคที่ใส่ใจในเรื่องสุขภาพ รวมทั้งยังได้ผลิตภัณฑ์ขนมเปี๊ยะกุหลาบที่แปลกใหม่ และยังช่วยลดต้นทุนในการผลิตขนมเปี๊ยะกุหลาบ เนื่องจากมันม่วงมีราคาถูก อีกทั้งยังเป็นการส่งเสริมการใช้ประโยชน์ของมันม่วงให้มากขึ้น เพิ่มมูลค่าผลผลิตทางการเกษตรให้แก่เกษตรกรชาวไทยอีกด้วย

วัตถุประสงค์

1. เพื่อศึกษาปริมาณการใช้แป้งมันม่วงทดแทนแป้งสาลีที่เหมาะสมสำหรับทำแป้งชั้นในของผลิตภัณฑ์ขนมเปี๊ยะกุหลาบ
2. เพื่อศึกษาการยอมรับของผู้บริโภคที่มีต่อผลิตภัณฑ์ขนมเปี๊ยะกุหลาบแป้งมันม่วง

วิธีการดำเนินการวิจัย

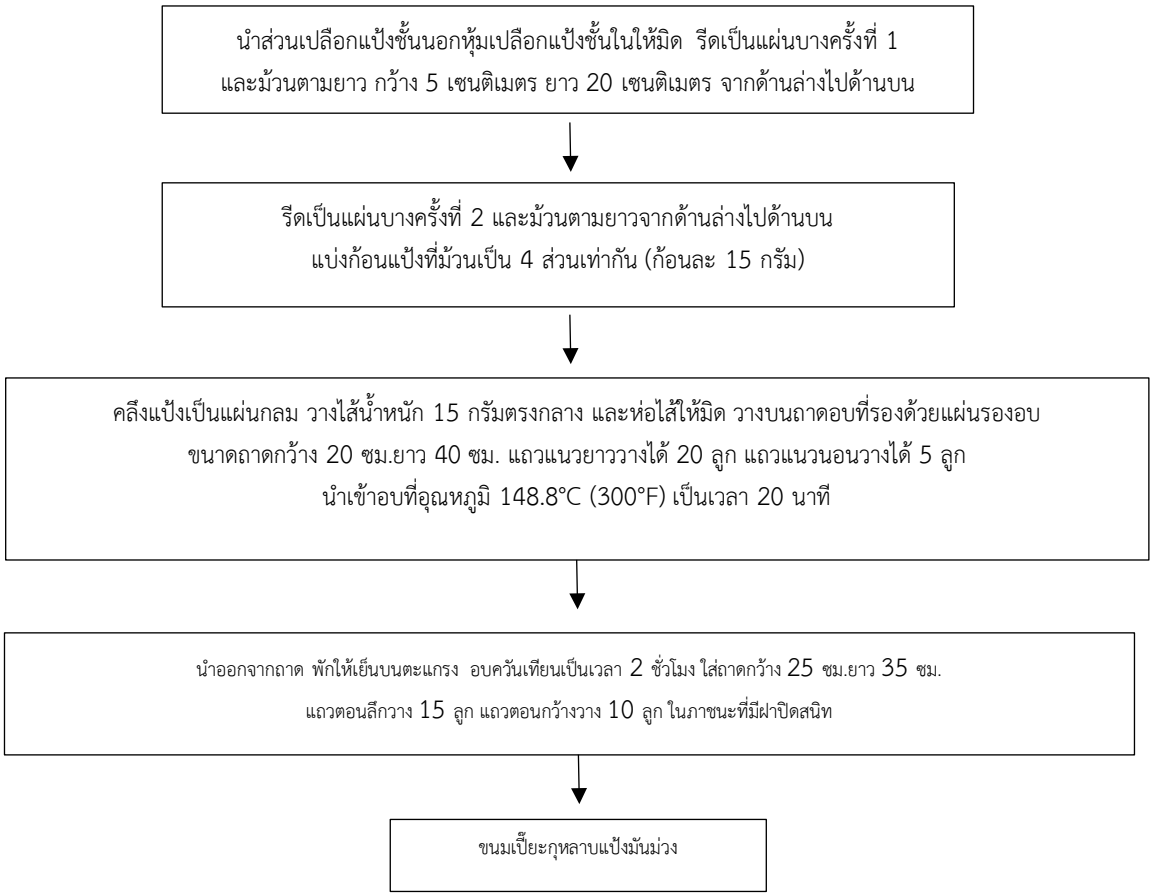
1. การศึกษาอัตราส่วนของแป้งสาลีกับแป้งมันม่วงที่เหมาะสมสำหรับทำแป้งชั้นในผลิตภัณฑ์ขนมเปี๊ยะ

ศึกษาปริมาณการใช้แป้งมันม่วงทดแทนแป้งสาลีที่เหมาะสมสำหรับทำแป้งชั้นในผลิตภัณฑ์ขนมเปี๊ยะกุหลาบ โดยใช้สูตรขนมเปี๊ยะกุหลาบของวิทยาลัยอาชีวศึกษานครปฐมมาดัดแปลงเป็นสูตรขนมเปี๊ยะกุหลาบแป้งมันม่วงโดยทดแทนแป้งสาลีในสูตรพื้นฐานเดิมด้วยแป้งมันม่วงในแป้งชั้นใน ในปริมาณการทดแทนที่ต่างกัน 4 ระดับ คือ 0 (สูตรพื้นฐาน), ร้อยละ 35, 50 และ 75 ส่วนผสมในสูตรขนมเปี๊ยะกุหลาบ ดังตารางที่ 1 และขั้นตอนการผลิตขนมเปี๊ยะกุหลาบ ดังภาพที่ 1 และภาพที่ 2 และตารางที่ 4 เปรียบเทียบคะแนนความชอบทางประสาทสัมผัสต่อไป

ตารางที่ 1 สูตรขนมเปี๊ยะที่ทดแทนแป้งสาลีด้วยแป้งมันม่วงในส่วนแป้งชั้นในปริมาณที่ต่างกัน 4 ระดับ คือ 0 (สูตรพื้นฐาน), ร้อยละ 35, 50 และ 75

ส่วนผสม	ปริมาณส่วนผสม							
	สูตรพื้นฐาน (แป้งสาลี)		ทดแทนแป้งสาลี ร้อยละ 35		ทดแทนแป้งสาลี ร้อยละ 50		ทดแทนแป้งสาลี ร้อยละ 75	
	กรัม	ร้อยละ	กรัม	ร้อยละ	กรัม	ร้อยละ	กรัม	ร้อยละ
แป้งชั้นใน								
แป้งสาลี	150	62.50	100	41.67	75	31.25	50	20.83
แป้งมันม่วง	-	-	50	20.83	75	31.25	100	41.67
เนยขาว	90	37.50	90	37.50	90	37.50	90	37.50
แป้งชั้นนอก								
แป้งสาลี	175	48.08	175	48.08	175	48.08	175	48.08
เนยขาว	50	13.72	50	13.72	50	13.72	50	13.72
น้ำตาลทราย	45	12.35	45	12.35	45	12.35	45	12.35
น้ำ	60	16.47	60	16.47	60	16.47	60	16.47
ไข่แดง	30	8.23	30	8.23	30	8.23	30	8.23
เกลือ	1	0.27	1	0.27	1	0.27	1	0.27
แบะแซ	3.3	0.91	3.3	0.91	3.3	0.91	3.3	0.91

วิธีการเตรียมแป้งมันม่วง



ล้างมันม่วงให้สะอาด ปอกเปลือกแล้วสไลด์บางๆ ขนาด 0.3 มม. ยาว 0.4 มม. แช่แผ่นมันม่วงในน้ำเกลือ ความเข้มข้นร้อยละ 3 นาน 10 นาที นำขึ้น พักให้สะเด็ดน้ำไว้ 5 นาที อบมันม่วงที่ 60 °C (180°F) นาน 5 ชั่วโมง แล้วนำมาบดให้เป็นผงละเอียดด้วยเครื่องบด ใช้เวลา 3 นาที จำนวน 2 รอบ และร่อนด้วยที่ร่อนแป้งขนาด 60 เมช จำนวน 3 รอบ ได้ผลผลิตแป้งมันม่วงร้อยละ 30 (30 % yield)

การเตรียมแป้งชั้นในของขนมเปี๊ยะกุหลาบแป้งมันม่วง

ผสมแป้งสาลีกับแป้งมันม่วงตามสูตร ใส่เนยขาว นวดผสมให้เข้ากัน พักไว้ 10 นาที แบ่งเป็นก้อน ก้อนละ 20 กรัม

การเตรียมแป้งชั้นนอกของขนมเปี๊ยะกุหลาบแป้งมันม่วง

ผสมแป้งสาลี เนยขาว และน้ำตาลในเครื่องผสม ใส่น้ำเปล่า เกลือ แบะแซ ไข่แดง ในเครื่องผสมตามสูตร ตีผสมด้วยหัวตีใบไม้ ระดับความเร็วปานกลาง (เบอร์ 3-5) ประมาณ 3 นาที จนส่วนผสมเป็นเนียนเนื้อเดียวกัน นำแป้งมาแบ่งเป็นก้อน น้ำหนักก้อนละ 50 กรัม พักไว้ 15 นาที

ภาพที่ 1 ขั้นตอนการผลิตขนมเปี๊ยะกุหลาบแป้งมันม่วง

นำขนมเปี๊ยะกุหลาบสูตรพื้นฐานแป้งสาลีและขนมเปี๊ยะกุหลาบสูตรทดแทนแป้งสาลีชั้นในด้วยแป้งมันม่วงทั้ง 3 ระดับ มาประเมินคุณภาพ ได้แก่

1) การวิเคราะห์คุณภาพทางกายภาพ

1.1) ค่าสีของขนมเปี๊ยะกุหลาบ สีแป้งขั้นใน โดยการนำตัวอย่างมา วัดค่าสีด้วยเครื่องวัดค่าสี (KONICA MINOLTA รุ่น CM-3500d) ค่าที่วัด ได้แก่ ค่า L* (ค่าความสว่าง มีค่า 0 ถึง 100 โดย 0 หมายถึงวัตถุที่มีความสว่างสีดำ 100 หมายถึง วัตถุที่มีความสว่างสีขาว) a* (+ หมายถึงวัตถุมีสีแดง, - หมายถึงวัตถุมีสีเขียว) และ b* (+ หมายถึงวัตถุมีสีเหลือง, - หมายถึงวัตถุมีสีน้ำเงิน)

1.2) ค่าที่บอกถึงลักษณะเนื้อสัมผัสของตัวอย่างขนมเปี๊ยะด้วยเครื่องวัดเนื้อสัมผัส โดยใช้ Texture Profile Analysis รุ่น TA. XT2i (Stable Micro System, UK) ตามวิธีของ Lee et al., 1991)

2) คุณภาพทางประสาทสัมผัส

นำขนมเปี๊ยะกุหลาบมาทำการประเมินคุณภาพทางประสาทสัมผัสในด้าน สี กลิ่น รสชาติ เนื้อสัมผัส และความชอบโดยรวม ด้วยวิธีการชิมแบบให้คะแนนความชอบ 9 ระดับ (9 Point Hedonic Scale) ใช้ผู้ทดสอบชิมจำนวน 50 คน ซึ่งเป็นผู้ชิมจากสาขาวิชาอาหารและโภชนาการ วิทยาลัยอาชีวศึกษานครปฐม วางแผนการทดลองแบบสุ่มในบล็อกสมบูรณ์ Randomized Complete Block Design (RCBD) นำค่าเฉลี่ยที่ได้มาวิเคราะห์ความแปรปรวน Analysis of Variances (ANOVA) และเปรียบเทียบความแตกต่างของค่าเฉลี่ยด้วยวิธี Duncan's New Multiple Range Test (DMRT) (Duncan, 1995) โดยกำหนดระดับความเชื่อมั่นที่ระดับ ร้อยละ 95 เพื่อคัดเลือกสูตรที่ได้คะแนน ความชอบสูงที่สุด

2. ศึกษาการยอมรับของผู้บริโภคที่มีต่อผลิตภัณฑ์ขนมเปี๊ยะกุหลาบแป้งมันม่วง

ทดสอบการยอมรับของผู้บริโภคที่มีต่อผลิตภัณฑ์ขนมเปี๊ยะกุหลาบแป้งมันม่วงที่พัฒนาได้ โดยใช้วิธีการ Accidental Sampling การวางแผนการทดลองการสุ่มแบบไม่เจาะจง ใช้กลุ่มผู้บริโภคทั่วไป จำนวน 120 คน เป็นบุคลลทั่วไปในเขตอำเภอเมือง จ.นครปฐม โดยใช้แบบสอบถามซึ่งจะแบ่งออกเป็น 3 ส่วน คือ ส่วนที่ 1 ข้อมูลพื้นฐานส่วนบุคคลของผู้บริโภค และส่วนที่ 2 ทัศนคติที่มีต่อขนมเปี๊ยะแป้งมันม่วง ส่วนที่ 3 ข้อมูลการยอมรับของผู้บริโภคที่มีต่อผลิตภัณฑ์ขนมเปี๊ยะแป้งมันม่วง จากนั้นทำการเก็บข้อมูลทางสถิติ วิเคราะห์ผลค่าเฉลี่ยและคำนวณร้อยละ เพื่อศึกษาทัศนคติและสรุปการยอมรับของผู้บริโภคที่มีต่อผลิตภัณฑ์ เพื่อนำข้อมูลที่ได้เป็นแนวทางในการพัฒนาผลิตภัณฑ์และความเป็นไปได้ในการจำหน่าย โดยมีการวิเคราะห์ผลข้อมูลพื้นฐานส่วนบุคคลของผู้บริโภคและระดับความสำคัญที่ให้กับผลิตภัณฑ์ โดยใช้มาตราส่วนประเมินค่า (Likert's Scale) แบ่งออกเป็น 5 ระดับคือ มากที่สุด มาก ปานกลาง น้อย น้อยที่สุด ในการแปลความหมายของคะแนนดังนี้

ค่าเฉลี่ย 1.00 - 1.80 ระดับความสำคัญ = น้อยที่สุด
1.81 – 2.60 ระดับความสำคัญ = น้อย
2.61 – 3.40 ระดับความสำคัญ = ปานกลาง
3.41 - 4.20 ระดับความสำคัญ = มาก
4.21 – 5.00 ระดับความสำคัญ = มากที่สุด

ผลการวิจัย

1. ผลการศึกษาอัตราส่วนของแป้งสาลีกับแป้งมันม่วงที่เหมาะสมสำหรับทำแป้งชั้นในผลิตภัณฑ์ขนมเปี๊ยะกุหลาบ

จากการดัดแปลงเป็นสูตรแป้งขนมเปี๊ยะกุหลาบโดยทดแทนแป้งสาลีด้วยแป้งมันม่วงในส่วนแป้งชั้นในปริมาณที่ต่างกัน 4 ระดับ คือ 0 (สูตรพื้นฐาน), ร้อยละ 35, 50 และ 75 แล้วนำตัวอย่างที่ได้ไปประเมินคุณภาพ ได้แก่ การวัดค่าสี ลักษณะเนื้อสัมผัส และประเมินคุณภาพทางประสาทสัมผัสในด้านลักษณะปรากฏ สี กลิ่น รส เนื้อสัมผัส และความชอบโดยรวม ผลประเมินคุณภาพ ดังภาพที่ 2 ตารางที่ 2 และตารางที่ 3

ภาพประกอบที่ 2 ผลิตภัณฑ์ขนมเปี๊ยะกุหลาบสูตรแป้งสาลีล้วน (สูตรพื้นฐาน) (A) และสูตรใช้แป้งมันม่วงทดแทนแป้งสาลีร้อยละ 35 (B) ร้อยละ 50 (C) และ ร้อยละ 75 (D)

ตารางที่ 2 คุณภาพทางกายภาพของผลิตภัณฑ์ขนมเปี๊ยะกุหลาบที่ใช้แป้งสาลี และสูตรทดแทนแป้งสาลีด้วยแป้งมันม่วงในส่วนแป้งชั้นในปริมาณที่แตกต่างกัน

คุณภาพทางกายภาพ	สูตรพื้นฐาน แป้งชั้นใน	ปริมาณการทดแทนแป้งสาลีด้วยแป้งมันม่วง

ท่านทราบหรือไม่ว่าแป้งมันม่วง	ทราบ	31	25.83
มีปริมาณของคอเลสเตอรอลต่ำ	ไม่ทราบ	89	74.17
ท่านสนใจที่จะทดลองบริโภค	สนใจ	111	92.50
ขนมเปี๊ยะแป้งมันม่วงหรือไม่	ไม่สนใจ	9	7.50

จากตารางที่ 5 ผู้บริโภคมีความคิดเห็นและแนวคิดต่อผลิตภัณฑ์ขนมเปี๊ยะกุหลาบแป้งมันม่วง โดยผู้บริโภคส่วนใหญ่เคยรับประทานหรือรู้จักแป้งมันม่วง ร้อยละ 75.00 ส่วนใหญ่เคยรับประทานหรือรู้จักขนมเปี๊ยะกุหลาบ ร้อยละ 81.67 และส่วนใหญ่ไม่ทราบว่าแป้งมันม่วงเป็นแป้งที่ไม่มีกลูเตน ร้อยละ 73.33 ผู้บริโภคไม่ทราบว่าแป้งมันม่วงมีสารอาหารที่สำคัญหลายชนิด ทั้งสารแอนโทไซยานิน วิตามิน ร้อยละ 63.33 ผู้บริโภคไม่ทราบว่าแป้งมันม่วงมีคอเลสเตอรอลต่ำ ร้อยละ 74.17 และผู้บริโภคสนใจที่จะทดลองบริโภคขนมเปี๊ยะแป้งมันม่วง ร้อยละ 92.50 ผลจากการสำรวจข้อมูล ทำให้เห็นถึงโอกาสในการพัฒนาผลิตภัณฑ์ขนมเปี๊ยะแป้งมันม่วงมากขึ้น ทั้งนี้ต้องส่งเสริมเผยแพร่ความรู้หรือข้อมูลเกี่ยวกับคุณประโยชน์และ คุณค่าทางโภชนาการของแป้งมันม่วงให้ผู้บริโภครับทราบมากขึ้นเพื่อทำให้ผลิตภัณฑ์ขนมเปี๊ยะแป้งมันม่วงได้รับความสนใจจากผู้บริโภคมากขึ้น

ตารางที่ 6 ข้อมูลการยอมรับผลิตภัณฑ์ขนมเปี๊ยะกุหลาบแป้งมันม่วง (n=120)

ลักษณะการยอมรับ	ความรู้สึกต่อผลิตภัณฑ์	จำนวนคน	คิดเป็นร้อยละ
ระดับความชอบ	ชอบมาก	14	11.67
	ชอบ	**86**	**71.67**
	เฉยๆ	0	0
	ไม่ชอบ	8	6.67
	ไม่ชอบมาก	12	10.00
การยอมรับผลิตภัณฑ์	**ยอมรับ**	**120**	**100**
	ไม่ยอมรับ	0	0
เหตุผลในการยอมรับ	สีสวย รูปลักษณ์ดี	8	6.67
	กลิ่นหอม น่ารับประทาน	9	7.50
	เนื้อสัมผัสดี มีความนุ่ม	5	4.17
	รสชาติดี/อร่อย	1	0.83
	มีความแปลกใหม่น่าสนใจ	**48**	**40.00**
	มีสารอาหารที่เป็นประโยชน์ต่อร่างกาย	35	29.17
	เหมาะกับผู้ที่ดูแลเรื่องสุขภาพ	14	11.67
	เหมาะกับผู้บริโภคที่แพ้กลูเตน	0	0
ความสนใจหากมีวางจำหน่าย	**ซื้อ**	**120**	**100**
	ไม่ซื้อ	0	0

ในด้านการยอมรับผลิตภัณฑ์ขนมเปี๊ยะกุหลาบแป้งมันม่วงพบว่าผู้บริโภคส่วนใหญ่ ร้อยละ 71.67 มีความรู้สึกชอบ ร้อยละ 11.67 รู้สึกชอบมาก และร้อยละ 10.00 มีความรู้สึกไม่ชอบมาก โดยผู้บริโภคร้อยละ 100 ให้การยอมรับผลิตภัณฑ์ ซึ่งเหตุผลในการยอมรับเนื่องจาก มีความแปลกใหม่ น่าสนใจ ร้อยละ 40 มีสารอาหารที่เป็นประโยชน์ต่อร่างกาย ร้อยละ 29.17 เหมาะกับผู้ดูแลเรื่องสุขภาพ ร้อยละ 11.67 กลิ่นหอมน่ารับประทานร้อยละ 7.50 สีสวย รูปลักษณ์ดี ร้อยละ 6.67 เนื้อสัมผัสดี มีความนุ่ม ร้อยละ 4.17 และหากมีการวางจำหน่ายผู้บริโภค ร้อยละ 100 ซื้อผลิตภัณฑ์

สรุปผลการวิจัย

1. ผลการศึกษาพบว่าการใช้แป้งมันม่วงทดแทนแป้งสาลีร้อยละ 50 ในส่วนแป้งชั้นในของขนมเปี๊ยะกุหลาบ ได้รับคะแนนความชอบทางประสาทสัมผัสสูงกว่าการทดแทนแป้งสาลี ร้อยละ 35 และ 75 ทั้งในด้านกลิ่น รสชาติ เนื้อสัมผัส และความชอบโดยรวม

2. ผลการศึกษาการยอมรับของผู้บริโภคทั่วไปจำนวน 120 คน พบว่าผู้ตอบแบบสอบถามให้ความสนใจต่อผลิตภัณฑ์ขนมเปี๊ยะกุหลาบที่ใช้แป้งสาลีผสมแป้งมันม่วงร้อยละ 92.50

อภิปรายผลการวิจัย

1. ผลการศึกษาปริมาณการใช้แป้งมันม่วงทดแทนแป้งสาลีที่เหมาะสมสำหรับทำแป้งชั้นในของผลิตภัณฑ์ขนมเปี๊ยะกุหลาบ (ตารางที่ 3) พบว่า ขนมเปี๊ยะกุหลาบสูตรแป้งสาลี (สูตรพื้นฐาน) มีสีเหลืองครีม มีค่า L*และ b* สูงที่สุด ($p>0.05$) ส่วนสีของขนมเปี๊ยะกุหลาบที่ใช้แป้งมันม่วงจะมีสีม่วง-แดงและมีสีเข้มกว่าขนมเปี๊ยะกุหลาบที่ใช้แป้งสาลีอย่างเดียว จากผลที่ได้เมื่อมีปริมาณของแป้งมันม่วงมากขึ้นส่งผลให้สีแป้งชั้นในของขนมเปี๊ยะกุหลาบมีสีม่วง -แดง เพิ่มขึ้น พิจารณาจากค่า a^* เพิ่มขึ้นและค่า L* ลดลง ในส่วนลักษณะเนื้อสัมผัสพบว่าเมื่อปริมาณแป้งมันม่วงเพิ่มขึ้นไม่มีผลต่อค่าความแข็ง (Hardness) และ ค่าความยืดหยุ่น (Springiness) แต่มีผลต่อความสามารถเกาะตัวรวมกัน (Cohesiveness) ความต้านทางการเคี้ยว (Chewiness) และ ความเหนียว (Gumminess) ของผลิตภัณฑ์ขนมเปี๊ยกุหลาบ ($p\leq0.05$) ปริมาณของแป้งมันม่วงที่ทดแทนแป้งสาลีเพิ่มขึ้นส่งผลให้ค่า Cohesiveness Chewiness และ Gumminess มีแนวโน้มลดลง เช่นเดียวกับงานวิจัยของ สุพิชญา (2563) ที่พบว่าลักษณะเนื้อสัมผัสของผลิตภัณฑ์หมั่นโถวที่ทดแทนแป้งสาลีด้วยแป้งมันม่วงร้อยละ 10 ถึง 50 มีค่าความแข็งเพิ่มขึ้นอย่างมีนัยสำคัญทางสถิติ ($p\leq0.05$) แต่มีค่าการเกาะติดและความยืดหยุ่นลดลง อีกทั้งค่าสีของหมั่นโถวที่พบว่า L*และ b* มีค่าลดลง ในขณะที่ค่า a* มีค่าเพิ่มขึ้น เมื่อระดับของแป้งมันเทศสีม่วงใน

ส่วนผสมเพิ่มขึ้น เช่นเดียวกับรายงานวิจัยของนรินทร์ (2561) ที่ได้พัฒนาผลิตภัณฑ์คุกกี้จากมันเทศ พบว่าสีของคุกกี้จะมีสีเข้มขึ้นเมื่อใช้มันเทศสีม่วงทดแทนแป้งสาลีในผลิตภัณฑ์คุกกี้ และผลของหทัยชนกและสุพิชญา (2562) ที่รายงานว่าเอแคลร์ที่ทดแทนแป้งสาลีด้วยแป้งมันม่วงในส่วนของเปลือกหุ้มมีค่า L* และ b* ลดลง ในขณะที่ค่า a* มีค่าเพิ่มขึ้น เมื่อระดับของแป้งมันม่วงเพิ่มขึ้นจากร้อยละ 0 ถึง 50 ผู้ทดสอบชิมให้การยอมรับผลิตภัณฑ์เอแคลร์ที่ทดแทนด้วยแป้งมันม่วงที่ร้อยละ 30

จากตารางที่ 3 ผลการทดสอบทางประสาทสัมผัสขนมเปี๊ยะสูตรพื้นฐานที่ใช้แป้งสาลี และขนมเปี๊ยะสูตรที่ส่วนแป้งชั้นในใช้แป้งมันม่วงทดแทนแป้งสาลีร้อยละ 35 50 และ 75 มีคะแนนความชอบด้านรสชาติแตกต่างกันอย่างไม่มีนัยสำคัญ ($p>0.05$) ส่วนคะแนนความชอบด้านกลิ่น เนื้อสัมผัสและความชอบโดยรวม มีคะแนนความชอบแตกต่างกัน ($p\leq0.05$) และมีคะแนนสูงกว่าสูตรพื้นฐานที่ใช้แป้งสาลีอย่างมีนัยสำคัญ ($p\leq0.05$) ส่วนคะแนนด้านสีขนมเปี๊ยะสูตรที่ใช้แป้งมันม่วงทดแทนแป้งสาลีร้อยละ 35 และ 50 มีคะแนนความชอบสูงกว่าสูตรพื้นฐานและสูตรที่ทดแทนแป้งสาลีร้อยละ 75 ($p\leq0.05$) จากข้อเสนอแนะของผู้ทดสอบชิมพบว่าการเพิ่มปริมาณแป้งมันม่วงทดแทนแป้งสาลีในส่วนแป้งชั้นในมีผลให้ขนมเปี๊ยะมีกลิ่นของมันม่วงที่ชัดขึ้นและมีม่วงสีเข้มขึ้น แต่การทดแทนในระดับร้อยละ 75 แป้งจะไม่เกาะตัวกัน ทำให้ปั้นก่อนและรีดเป็นแผ่นบางสำหรับห่อหุ้มไส้ค่อนข้างยาก ดังนั้นจากผลการทดสอบชิมจึงเลือกปริมาณการทดแทนแป้งสาลีด้วยแป้งมันม่วงในส่วนแป้งชั้นขนมเปี๊ยะที่ร้อยละ 50 สอดคล้องกับญานิล และคณะ (2557) ศึกษาปริมาณแป้งมันเทศสีม่วงในการทำหมั่นโถว พบว่าหมั่นโถวที่ทำจากแป้งมันเทศสีม่วงทดแทนแป้งสาลีในปริมาณร้อยละ 15 และ 30 มีคะแนนความชอบรวมสูงกว่าร้อยละ 60 และดุลย์จิรา และคณะ (2560) ที่พบว่าสามารถใช้แป้งมันเทศทดแทนแป้งสาลีในผลิตภัณฑ์คุกกี้ได้ถึงร้อยละ 30 โดยคะแนนการทดสอบทางประสาทสัมผัสไม่แตกต่างจากสูตรควบคุมที่ใช้แป้งสาลี ผลิตภัณฑ์คุกกี้แป้งมันเทศที่มีแป้งมันเทศทดแทนแป้งสาลีร้อยละ 50 ประกอบด้วย แป้งมันม่วง แป้งสาลี เนยชนิดเค็ม ไข่ ผงฟู วนิลา และน้ำตาลไอซิ่ง ปริมาณ 30 30 40 15 0.5 0.2 และ 30 กรัม ตามลำดับ ซึ่งเป็นสูตรที่ขึ้นรูปได้ง่าย ให้ลักษณะปรากฏ กลิ่น รสชาติ เนื้อสัมผัสที่ดี

2. ผลการศึกษาการยอมรับของผู้บริโภคที่มีต่อผลิตภัณฑ์ขนมเปี๊ยะกุหลาบแป้งมันม่วง พบว่า ในด้านการยอมรับผลิตภัณฑ์ขนมเปี๊ยะกุหลาบแป้งมันม่วงพบว่าผู้บริโภคส่วนใหญ่ ร้อยละ 71.67 มีความรู้สึกชอบ ร้อยละ 11.67 รู้สึกชอบมาก และร้อยละ 10.00 มีความรู้สึกไม่ชอบมาก โดยผู้บริโภคร้อยละ 100 ให้การยอมรับผลิตภัณฑ์ ซึ่งเหตุผลในการยอมรับเนื่องจาก มีความแปลกใหม่น่าสนใจ ร้อยละ 40 มีสารอาหารที่เป็นประโยชน์ต่อร่างกาย ร้อยละ 29.17 เหมาะกับผู้ดูแลเรื่องสุขภาพ ร้อยละ 11.67 กลิ่นหอมน่ารับประทานร้อยละ 7.50 สีสวย รูปลักษณ์ดี ร้อยละ 6.67 เนื้อสัมผัสดี มีความนุ่ม ร้อยละ 4.17 และหากมีการวางจำหน่ายผู้บริโภคร้อยละ 100 ซื้อผลิตภัณฑ์ ทั้งนี้ ศศิธร (2557) ได้รายงานว่าพฤติกรรมการบริโภคขนมเปี๊ยะในอำเภอเมือง จังหวัดนครศรีธรรมราช พบว่าผู้บริโภคมีวัตถุประสงค์ในการซื้อขนมเปี๊ยะเพื่อเป็นของฝาก โดยสถานที่ซื้อคือร้านขายส่ง-ขายปลีกทั่วไป ซื้อช่วงเทศกาลปีใหม่ แหล่งข้อมูลที่มีผลต่อการซื้อคือจากคำบอกเล่า ผู้มีอิทธิพลต่อการเลือกซื้อ คือ ตัวเอง โดยมีค่าเฉลี่ยในการซื้อแต่ละครั้ง 101-500 บาท มีการซื้อจำนวน 1 ครั้งต่อเดือน

ข้อเสนอแนะ

1. ควรมีการศึกษาการทำผลิตภัณฑ์ขนมอบ หรือขนมไทยประยุกต์ชนิดอื่นที่ใช้แป้งมันม่วง
2. ควรมีการศึกษาการทำขนมอบหรือขนมไทยชนิดอื่นที่ใช้ไขมันจากธรรมชาติอื่นทดแทนเนยขาวในผลิตภัณฑ์ขนมเปี๊ยะกุหลาบ
3. ควรมีการศึกษาระยะเวลาในการเก็บรักษาของผลิตภัณฑ์ขนมเปี๊ยะกุหลาบแป้งมันม่วง

การศึกษาสมุนไพรแก้พิษงูและสัตว์มีพิษกัด

A study of herbal plants used to treat snake bites and venomous animals

โชติกา เทียบคำ Chotika tiabkum[1]

ธนิสร์ ปทุมานนท์ Tanit Padumanonda[2]

บทคัดย่อ

การวิจัยนี้มีวัตถุประสงค์ 1. เพื่อรวบรวมตำรายาที่กล่าวถึงการใช้สมุนไพรแก้พิษงูและสัตว์มีพิษกัด และ 2. เพื่อศึกษาสมุนไพรและการนำไปใช้แก้พิษงูและสัตว์มีพิษกัด พบว่า ตำราที่กล่าวถึงสมุนไพรแก้พิษงูและสัตว์มีพิษกัดมี 4 ชุด ได้แก่ 1) คัมภีร์แพทย์แผนโบราณ ขุนโสภิตบรรณาลักษณ์ เล่ม 3 (10 ขนาน) 2) ตำรายาศิลาจารึกในวัดพระเชตุพนวิมลมังคลาราม (4 ขนาน) 3) ตำรายาสมุนไพรตำรับเก่าดั้งเดิมหลวงปู่ศุข (14 ขนาน) และ 4) คัมภีร์ยาสมุนไพรตำรับหมอพร กรมหลวงชุมพรเขตอุดมศักดิ์ (19 ขนาน) รวมเป็นยาทั้งหมด 47 ขนาน ซึ่งมีสมุนไพรรวม 43 ชนิด สมุนไพรทั้งหมดอยู่ใน 26 วงศ์ ซึ่งวงศ์ที่พบมากที่สุด คือ ACANTHACEAE สมุนไพรที่ใช้ซ้ำในหลายขนานพบมากที่สุด คือ เสลดพังพอน ส่วนของพืชที่ใช้มากที่สุด คือ ราก รสของตัวยามีทั้งหมด 24 รส พบมากที่สุด คือ รสเย็น กระสายยามี 8 อย่าง ที่ใช้มากที่สุด คือ สุรา วิธีเตรียมยาที่ใช้มากที่สุด คือ การตำยา วิธีการใช้ยามากที่สุด คือ การกินและพอก ซึ่งควรนำสมุนไพรดังกล่าวไปพัฒนาเป็นผลิตภัณฑ์ในรูปแบบพร้อมใช้ต่อไป

คำสำคัญ: สมุนไพร, งูกัด, แมลงสัตว์กัดต่อย

Abstract

The objectives of this research were to collect used as antivenom/ antitoxin from textbooks and study herbal plant and their use. Studies have shown that was herbs used as antivenom/ antitoxin from four Thai traditional textbooks include: 1) Khun Sophisbunnarak text volume 3 (10 formulas) 2) Stone inscription from Wat Phra Chetuphon Wimonmangkhalaram (4 formulas) 3) A collection of herbal formula from Vemerable Phra Ajarn Sook (14 formulas) and 4) A scripture herbal of Prince Chumphon (19 formulas). The total complied formulas were 47 consisted of 43 herbs. All herbs from the review are from 26 Families. The most frequently found Family are ACANTHACEAE. The most frequently used herbs were *Clinacanthus nutans*. Part used with the most formula is root. Tastes of herbal are classified into 24 types and the most repetitive is cold. Vehicle for herbal preparation were classified into 8 types and the most used vehicle is alcohol. The most prepared technique is pounding. Dosage administration of the prepared herbs the most applied ones are orally drug and poultice. Therefore, such herbs should be used for further development as ready to use products.

Keywords: Herbal, Snake bite, animal or insect-bite

บทนำ

สถานการณ์ผู้ถูกงูพิษกัดจากข้อมูลรายงานองค์การอนามัยโลก (WHO) พบว่า ในแถบเอเชียมีผู้ป่วยถูกงูพิษกัดมากถึง 2 ล้านคนต่อปี กลุ่มที่มีความเสี่ยงสูง ได้แก่ เกษตรกรในชนบท คนเลี้ยงสัตว์ ชาวประมง พรานล่าสัตว์ แรงงานเด็ก ประชาชนที่อาศัยในบ้านที่ก่อสร้างไม่ดี รวมถึงผู้ที่เข้าถึงการดูแลสุขภาพได้อย่างจำกัด ในประเทศไทยระหว่างปี พ.ศ. 2544-2562 พบว่า มีผู้ถูกงูกัดรวม 123,428 ราย เฉลี่ยปีละ 6,496 ราย โดยมีรายงานสูงสุดช่วงปลายฤดูร้อนต่อเนื่องถึงช่วงฤดูฝน และลดลงในช่วงฤดูหนาว ภูมิภาคที่มีอัตราการถูกงูพิษกัดมากที่สุด คือ ภาคใต้ ซึ่งจังหวัดตรังเป็นจังหวัดที่พบการถูกงูพิษกัดมากที่สุด (กรมควบคุมโรค, 2564)

สัตว์และแมลงหลายชนิดมีพิษโดยธรรมชาติในตัวมันเอง ซึ่งเป็นสิ่งที่ต้องระวังและหลีกเลี่ยงเป็นอย่างยิ่งเนื่องจากสามารถทำให้เกิดอันตรายกับมนุษย์ได้ทั้งแบบมีอาการเพียงเล็กน้อยจนถึงขั้นร้ายแรงที่ทำให้เสียชีวิตได้ สัตว์และแมลงที่มีพิษ ได้แก่ ผึ้ง จัดอยู่ในอันดับ Hymenoptera วงศ์ APIDAE ผึ้งที่มีความสำคัญทางการแพทย์และมักรุมต่อยมนุษย์ในประเทศไทย ได้แก่ ผึ้งหลวง (*Apis*

dorsata) ผึ้งมิ้ม (*Apis florae*) ผึ้งมิ้มเล็ก (*Apis andreniformis*) ผึ้งโพรง (*Apis cerana*) และผึ้งพันธุ์ (*Apismellifera* L.) ตัวต่อและแตนจัดอยู่ในอันดับ Hymenoptera วงศ์ VESPIDAE ตัวต่อที่พบในประเทศไทย ได้แก่ ต่อหัวเสือแถบใหญ่ (*Vespa tropica*) ต่อหัวเสือยักษ์ (*Vespa mandarinia*) ต่อหัวเสือดำ (*Vespa basalis*) ต่อหัวเสือเหลือง (*Vespa bicolor*) ต่อหัวเสือบ้าน(*Vespa affinis*) เป็นต้น ส่วนแตนที่พบได้ในประเทศไทย ได้แก่ แตนบัว แตนฝักบัว แตนลิ้นหมา เป็นต้น พิษของผึ้ง ต่อและแตนมีหลายประเภท ได้แก่ สารประเภทเอมีน เช่น histamine, serotonin, dopamine, noradrenalin, acetylcholine เป็นต้น สารประเภทโปรตีนและโพลีเปปไทด์ เช่น mellitin, apamin และ kinin เป็นต้น และเอนไซม์ ได้แก่ phospholipase A, phospholipase B และ Hyaluronidase เป็นต้น (กมลวรรณ ตั้งวรพงศ์ชัย, 2558) นอกจากนี้มีสัตว์และแมลงที่มีพิษ ได้แก่ ตะขาบ แมงป่อง แมงมุม ด้วงก้นกระดก ด้วงน้ำมัน มด มวนเพชฌฆาต แมลงวันตา หมัด เห็บ แมลงบุกบ้านหรือแมลงกระเบื้อง และผีเสื้อกลางคืน ซึ่งพิษจากแมลงจะทำให้เกิดมีอาการ ดังนี้ ผิวหนังมีอาการบวมแดง เกิดความเจ็บปวดหรือปวดแสบปวดร้อน เกิดผื่นคันระคายเคือง เป็นแผลพุพอง มีเลือดออกเล็กน้อย มีอาการลมพิษมีเลือดออกที่อวัยวะภายในของร่างกาย เช่น ที่กระเพาะอาหารเนื่องจากได้รับพิษ นอกจากนี้อาจทำให้เกิดอาการแพ้จากพิษของสัตว์และแมลงมีพิษ ดังนี้ เกิดอาการไอ ชาหรือบวมตามอวัยวะต่างๆสูญเสียความสามารถในการรับรสชาติอาหาร ลิ้นและหลอดอาหารบวม กลืนอาหารลำบาก คลื่นไส้ อาเจียน กระวนกระวาย เป็นลม ปวดท้องเนื่องจากกระเพาะอาหารหดเกร็ง ท้องเสีย ความดันโลหิตลดลงอย่างรวดเร็ว หายใจไม่สะดวก จนถึงอาการช๊อกแบบรุนแรง และเสียชีวิตได้ (สถาบันวิจัยวิทยาศาสตร์สาธารณสุข, 2559) จากข้อมูลการบาดเจ็บและเสียชีวิตจากการสัมผัสสัตว์มีพิษของกองป้องกันการบาดเจ็บ กรมควบคุมโรค ตั้งแต่วันที่ 1 มกราคม - 20 ตุลาคม 2564 ส่วนใหญ่พบการบาดเจ็บและเสียชีวิตจากสัตว์มีพิษจำพวกแตน ต่อ และผึ้ง จำนวน 1,177 ราย รองลงมา คือ ตะขาบและกิ้งกือมีพิษ จำนวน 794 ราย (กรมควบคุมโรค, 2564)

การรักษาผู้ป่วยที่ถูกงูพิษกัดในปัจจุบัน คือ ฉีดเซรุ่มแก้พิษงู ซึ่งมีข้อจำกัดหลายอย่าง เช่น ขั้นตอนการผลิต ควรมีการควบคุมด้านความสะอาดเป็นพิเศษ มีผู้เชี่ยวชาญในการดำเนินงาน มีการเก็บรักษาในสถานที่ที่มีสภาพแวดล้อมเหมาะสมทั้งอุณหภูมิและความชื้นทำให้เกิดปัญหาต่อผู้ป่วยที่อยู่ห่างไกลสถานพยาบาล ซึ่งต้องใช้เวลาในการเดินทาง ปัญหาที่สำคัญอีกประการของการใช้เซรุ่มแก้พิษงู คือ ผู้ป่วยที่ได้รับการฉีดเซรุ่มมีความเสี่ยงที่อาจจะเกิดภาวะการแพ้เซรุ่ม (serum sickness) ส่วนการรักษาพิษจากสัตว์และแมลงกัดต่อยมีสมุนไพรในงานสาธารณสุขมูลฐานและสมุนไพรที่ใช้ตามภูมิปัญญาของแต่ละท้องถิ่นที่ช่วยแก้พิษจากสัตว์และแมลงกัดต่อย ดังนั้นการใช้สมุนไพรในการแก้พิษงูกัดและสัตว์มีพิษกัด จึงเป็นอีกทางเลือกหนึ่งในการรักษาผู้ป่วย

วัตถุประสงค์ของการวิจัย

1. เพื่อรวบรวมตำรายาไทยที่กล่าวถึงการใช้สมุนไพรแก้พิษงูและสัตว์มีพิษกัด
2. เพื่อศึกษาสมุนไพรและการนำไปใช้แก้พิษงูและสัตว์มีพิษกัด

วิธีการดำเนินการวิจัย

1. วิจัยนี้เป็นการวิจัยเอกสาร (Documentary research) ซึ่งคัดเลือกเอกสาร หนังสือ และตำราต่างๆ จากประกาศกระทรวงสาธารณสุข เรื่องประกาศกำหนดตำราการแพทย์แผนไทยของชาติและตำรับยาแผนไทยของชาติ รวมทั้งตำรายาที่ประชาชนทั่วไปรู้จักและเป็นที่ยอมรับทางเภสัชกรรมไทย

2. เก็บรวบรวมข้อมูลจากหนังสือและตำราต่างๆ ที่ผ่านการคัดเลือกแล้ว ซึ่งได้มีการบันทึกเกี่ยวกับสมุนไพรที่แก้พิษงูและสัตว์มีพิษกัด

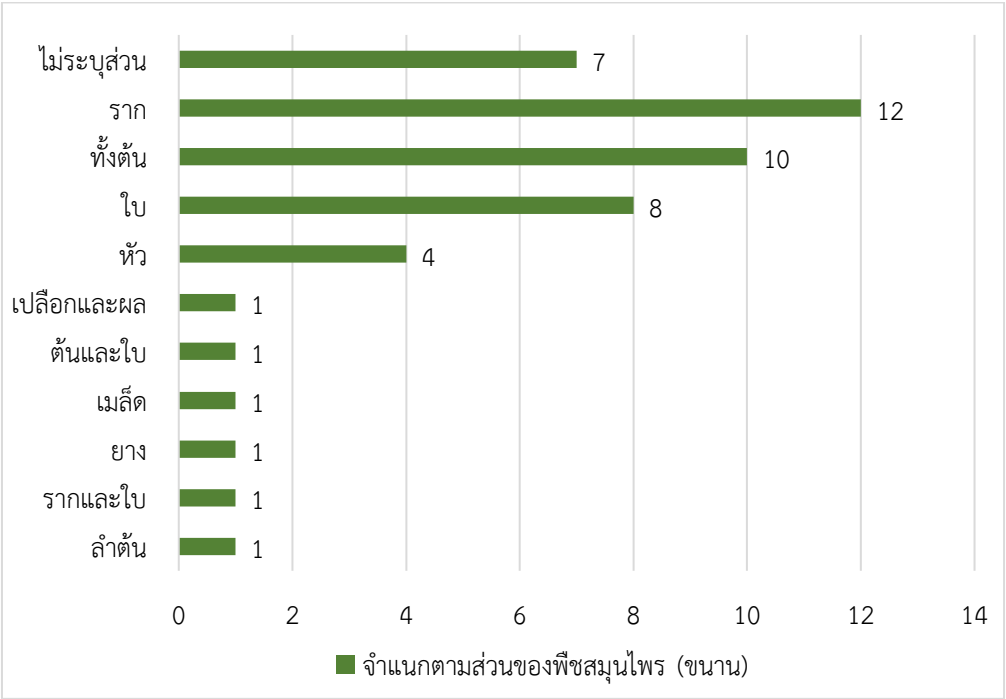
3. วิเคราะห์ข้อมูลโดยการจำแนกพืชและจัดกลุ่มการนำไปใช้ แล้วบรรยายเชิงพรรณนา

สรุปผลการวิจัย

จากการสืบค้นตำราที่บันทึกเกี่ยวกับการใช้สมุนไพรแก้พิษงูและสัตว์มีพิษกัด พบว่า มีจำนวน 4 ชุด (ขุนโสภิตบรรณลักษณ์, 2504), (โรงเรียนแพทย์แผนโบราณ, 2505), (ส.ธรรมภักดี, 2538), (ธรรมนิตย์ ชำนาญ, 2556), (เวนิสา เสนีวงศ์, 2545), (ธรรมนิตย์, 2552) ดังนี้

1. คัมภีร์แพทย์ไทยแผนโบราณ เล่ม 3
2. ตำรายาศิลาจารึกในวัดพระเชตุพนวิมลมังคลาราม (วัดโพธิ์) ฉบับสมบูรณ์
3. ตำรายาสมุนไพรตำรับเก่าดั้งเดิมหลวงปู่ศุข
4. คัมภีร์ยาสมุนไพรไทย ตำรับหมอพร กรมหลวงชุมพรเขตรอุดมศักดิ์

สมุนไพรที่ใช้แก้พิษงูและสัตว์มีพิษกัดที่บันทึกในตำราทั้ง 4 ชุดนี้ มีสมุนไพร จำนวน 47 ขนาน ซึ่งสมุนไพรมีทั้งหมดรวม 43 ชนิด ได้แก่ 1) กระดูกไก่ดำ 2) กะเพราแดง 3) กำจัดเถา 4) กำจาย 5) เขยตาย 6) โคกกระออม 7) จักรนารายณ์ 8) ตำแยตัว



ผู้ 9) เถามวก 10) นมสวรรค์ 11) น้อยหน่า 12) นาคราช 13) นุ่น 14) บุนนาค 15) โปร่งฟ้า 16) ผักขวง 17) ผักคราดทะเล 18) ผักบุ้ง 19) ผักเสี้ยนผี 20) พนมสวรรค์ 21) พริกขี้หนู 22) ฟ้าทะลายโจร 23) มะขาม 24) มะละกอ 25) แมงลัก 26) โมก 27) ยาสูบ 28) ลิ้นงูเห่า 29) ลูกใต้ใบ 30) โลดทะนงแดง 31) ว่านเพชรหึง 32) ว่านศรนารายณ์ 33) เสมา 34) เสลดพังพอนตัวผู้ 35) เสลดพังพอนตัวเมีย 36) หญ้าชันกาด 37) หญ้าตะขาบ 38) หมาตาย 39) หอม 40) หอมแดง 41) หางกระรอก 42) เหงือกปลาหมอ 43) อุตพิต จัดอยู่ในวงศ์พืช 26 วงศ์ ได้แก่ ACANTHACEAE (7 ชนิด) AGAVACEAE (1 ชนิด) AIZOACEAE (1 ชนิด) ALLIACEAE (1 ชนิด) ANNONACEAE (1 ชนิด) APOCYNACEAE (2 ชนิด) ARACEAE (1 ชนิด) BIGNONIACEAE (1 ชนิด) BOMBACACEAE (1 ชนิด) CACTACEAE (2 ชนิด) CAESALPINIOIDEAE (1 ชนิด) CAPPARACEAE (1 ชนิด) CARICACEAE (1 ชนิด) COMPOSITAE (2 ชนิด) CONNARACEAE (1 ชนิด) CONVOLVULACEAE (1 ชนิด) EUPHORBIACEAE (4 ชนิด) GUTTIFERAE (1 ชนิด) IRIDACEAE (1 ชนิด) LABIATAE (3 ชนิด) LEGUMINOSAE (1 ชนิด) ORCHIDACEAE (1 ชนิด) RUTACEAE (3 ชนิด) SAPINDACEAE (1 ชนิด) SOLANACEAE (2 ชนิด) และ VERBENACEAE (1 ชนิด) โดยพืชสมุนไพรที่นำมาใช้แก้พิษงูและสัตว์มีพิษกัดพบมากที่สุดอยู่ในวงศ์ ACANTHACEAE ดังตารางที่ 1

ตารางที่ 1 พืชสมุนไพรที่ใช้แก้พิษงูและสัตว์มีพิษกัด

ลำดับ	พืชสมุนไพร	ชื่อวิทยาศาสตร์	วงศ์
1	กระดูกไก่ดำ	*Justicia valida* Ridl. var. glandulosa Fisch	ACANTHACEAE

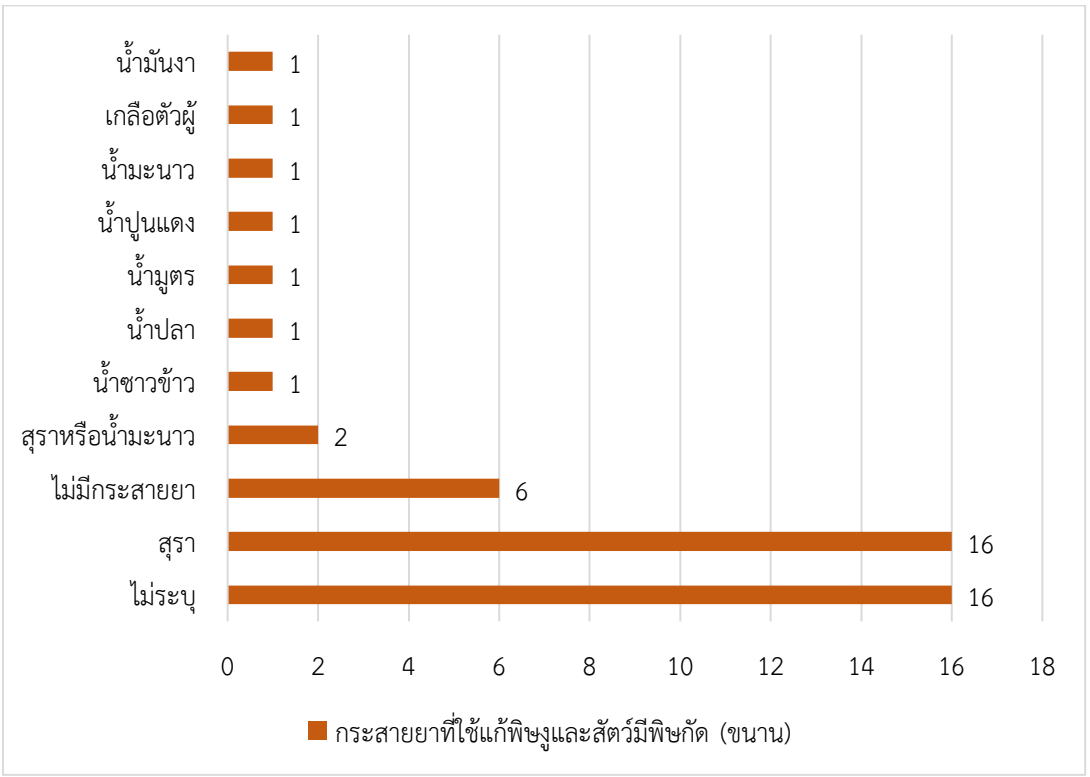
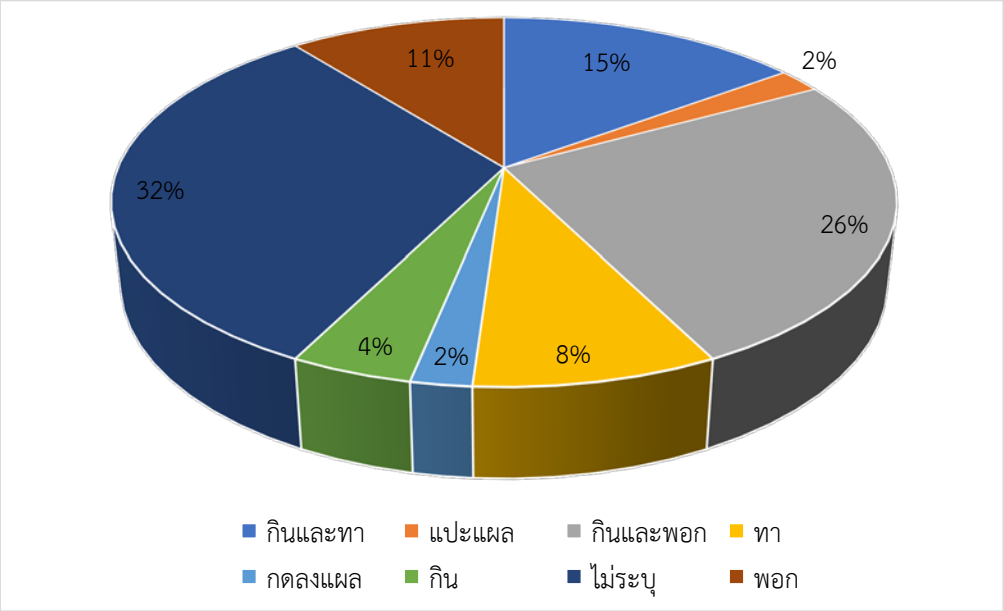
ส่วนของพืชสมุนไพร ที่ใช้แก้พิษงูและสัตว์มีพิษกัดมีการนำส่วนของพืชไปใช้ 10 รูปแบบ ได้แก่ ราก ทั้งต้น ใบ หัว เปลือกและผล ต้นและใบ เมล็ด ยาง รากและใบ และลำต้น โดยส่วนของพืชที่ใช้มากที่สุด คือ ราก และรองลงมา คือ ใช้ทั้งต้น ดังภาพที่ 1



ภาพประกอบที่ 1 การจำแนกตามส่วนของพืชสมุนไพรที่ใช้เป็นยาแก้พิษงูและสัตว์มีพิษกัด

วิธีการเตรียมยา แก้พิษงูและสัตว์มีพิษกัดมี 9 วิธี ได้แก่ การตำยา การฝนยา เคี้ยวกิน การบดยา การเผายา การขยำยา การขยี้ยา การผ่ายา และการต้มยา ซึ่งการตำยาเป็นวิธีใช้เตรียมยามากที่สุด ดังภาพที่ 2



ภาพประกอบที่ 2 การจำแนกวิธีเตรียมยาที่ใช้แก้พิษงูและสัตว์มีพิษกัด

กระสายยา ที่ใช้แก้พิษงูและสัตว์มีพิษกัดมี 9 อย่าง ได้แก่ สุรา สุราหรือน้ำมะนาว น้ำซาวข้าว น้ำปลา น้ำมูตร น้ำปูนแดง น้ำมะนาว เกลือตัวผู้ และน้ำมันงา โดยกระสายยาที่ใช้มากที่สุด คือ สุรา ดังภาพที่ 3

ภาพประกอบที่ 3 การจำแนกกระสายยาที่ใช้แก้พิษงูและสัตว์มีพิษกัด

วิธีการใช้ยาสมุนไพร แก้พิษงูและสัตว์มีพิษกัดมี 7 วิธี ได้แก่ การกินและทา การแปะแผล การกินและพอก การทา การกิน การกดลงแผล และการพอก โดยวิธีการกินและพอกใช้มากที่สุด ดังภาภที่ 4

ภาพประกอบที่ 4 การจำแนกวิธีการใช้ยาสมุนไพรแก้พิษงูและสัตว์มีพิษกัด

จากตำราที่กล่าวถึงสมุนไพรแก้พิษงูและสัตว์มีพิษกัดทั้ง 4 ชุด ได้แก่ 1) คัมภีร์แพทย์แผนโบราณ ขุนโสภิตบรรณาลักษณ์ เล่ม 3 2) ตำรายาศิลาจารึกในวัดพระเชตุพนวิมลมังคลาราม 3) ตำรายาสมุนไพรตำรับเก่าดั้งเดิมหลวงปู่ศุข และ 4) คัมภีร์ยาสมุนไพรตำรับหมอพร กรมหลวงชุมพรเขตอุดมศักดิ์ จำแนกข้อมูล ส่วนที่ใช้ รสยา กระสายยา วิธีเตรียมยา และวิธีใช้ยา ดังตารางที่ 2

ตารางที่ 2 พืชสมุนไพรและการประกอบเป็นยาเพื่อแก้พิษงูและสัตว์มีพิษกัด

ลำดับ	พืชสมุนไพร	ส่วนที่ใช้	รสยา	กระสายยา	วิธีการเตรียมยา	วิธีการใช้ยา

อภิปรายผลการวิจัย

ประเทศไทยมีลักษณะภูมิอากาศแบบร้อนชื้น ซึ่งเป็นภูมิอากาศที่เหมาะสมต่อการอาศัยของงูและสัตว์มีพิษหลายชนิด ได้แก่ งู การรักษาผู้ป่วยที่ถูกงูพิษกัดในปัจจุบันใช้เซรุ่มแก้พิษซึ่งบางรายเกิดผลข้างเคียง ส่วนสัตว์และแมลงมีพิษ เช่น ตัวต่อ แตน ตะขาบ แมงป่อง แมงมุม ด้วงก้นกระดก ด้วงน้ำมัน มด มวนเพชฌฆาต หมัด แมลงวันตา เห็บ แมลงบุกบ้านหรือแมลงกระเบื้อง และผีเสื้อกลางคืน การรักษาผู้ป่วยที่ถูกสัตว์มีพิษกัดหรือสัมผัสแล้วเกิดพิษต่างๆ ปัจจุบันมีการใช้สมุนไพรในการบรรเทาอาการตลอดจนรักษาจากพิษเหล่านั้นได้ รวมถึงมีการใช้สมุนไพรในการปฐมพยาบาลเมื่อถูกงูพิษและสัตว์มีพิษกัดมากขึ้น การวิจัยนี้จึงได้รวบรวมพืชสมุนไพรที่ใช้ในการแก้พิษงูและสัตว์มีพิษกัด โดยตำราที่ใช้ในการสืบค้นข้อมูลได้คัดเลือกจากประกาศกระทรวงสาธารณสุข เรื่องกำหนดตำราการแพทย์แผนไทยของชาติและตำรับยาแผนไทยของชาติและจากตำรายาที่ประชาชนทั่วไปรู้จักและเป็นที่ยอมรับทางเภสัชกรรมไทย ซึ่งตำราที่ใช้ในการรวบรวมและมีการบันทึกเกี่ยวกับการใช้สมุนไพรแก้พิษงูและสัตว์มีพิษกัด จำนวน 4 ชุด ดังนี้ 1) คัมภีร์แพทย์แผนโบราณ ขุนโสภิตบรรณาลักษณ์ เล่ม 3 (10 ขนาน) 2) ตำรายาศิลาจารึกในวัดพระเชตุพนวิมลมังคลาราม (4 ขนาน) 3) ตำรายาสมุนไพรตำรับเก่าดั้งเดิมหลวงปู่ศุข (14 ขนาน) และ 4) คัมภีร์ยาสมุนไพรตำรับหมอพร กรมหลวงชุมพรเขตอุดมศักดิ์ (19 ขนาน) รวม

สมุนไพรแก้พิษงูและสัตว์มีพิษกัดทั้งหมด จำนวน 47 ขนาน ซึ่งมีสมุนไพร จำนวน 43 ชนิด โดยสมุนไพรส่วนใหญ่มีรสเย็น จึงมีสรรพคุณระงับอาการปวดแสบปวดร้อน ช่วยดับพิษ และลดบวมลงได้ สมุนไพรทั้งหมดจัดอยู่ในวงศ์พืช 26 วงศ์ ซึ่งวงศ์ที่พบมากที่สุด คือ ACANTHACEAE และรองลงมา คือ วงศ์ EUPHORBIACEAE จากความถี่ที่มีการนำไปใช้แก้พิษงูและสัตว์มีพิษกัด พบว่า ใช้มากที่สุด คือเสลดพังพอน (4 ขนาน) และรองลงมา คือ ผักเสี้ยนผี (2 ขนาน) สอดคล้องกับการศึกษาพืชสมุนไพรแก้พิษงูเห่าและสมุนไพรต้านพิษงู ที่ใช้เสลดพังพอนตัวผู้ เขยตาย และนาคราช ซึ่งสารสกัดของนาคราชด้วยเอทานอลสามารถป้องกันการอักเสบจากพิษงูเห่าได้อย่างมีนัยสำคัญ (เจนยุทธ ไชยสกุล, 2549) อีกทั้งมีสมุนไพรในงานสาธารณสุขมูลฐานที่ช่วยรักษาอาการแพ้อักเสบของผิวหนังจากแมลงสัตว์กัดต่อยได้ คือ เสลดพังพอนตัวผู้ และเสลดพังพอนตัวเมีย (อรมณี ประจวบจินดา และคณะ (2563) ได้ศึกษา) นอกจากนี้ยังสอดคล้องกับการใช้สมุนไพรโลดทะนงแดง สูตรหมอเอี๊ยะ สายกระสุน ที่นำมาใช้รักษาผู้ที่ถูกสัตว์พิษกัดและงูกัดในโรงพยาบาลกาบเชิงจังหวัดสุรินทร์ และโรงพยาบาลพนมดงรักเฉลิมพระเกียรติ 80 พรรษา (สำนักการแพทย์พื้นบ้านไทย, 2554) ได้วิจัยพืชสมุนไพรที่มีฤทธิ์ยับยั้งหรือต่อต้านพิษจากแมลง สัตว์ กัด ต่อย ได้แก่ เสลดพังพอนตัวผู้ เสลดพังพอนตัวเมีย ฟ้าทะลายโจร โลดทะนงแดง พญานาคราช (นาคราช) โดยนำไปสกัดด้วยน้ำ 0.2% Triton X-100 และ 10% alcohol ในอัตราส่วนของพืชสมุนไพรปริมาณ 15 กรัม ต่อตัวทำละลายปริมาณ 30 มิลลิลิตร แล้วศึกษาเปรียบเทียบแบบแผนโปรตีนจากส่วนต่างๆ เช่น ใบ ทั้งต้น หัวและรากของพืชสมุนไพร พบว่า สมุนไพรดังกล่าวมีฤทธิ์ยับยั้งหรือต่อต้านพิษจากแมลง สัตว์ กัด ต่อย (พรพิมล พลคำ และคณะ, 2561) ส่วนภูมิปัญญาของหมอพื้นบ้านในการรักษาผู้ป่วยที่ถูกงูกัดในภาคใต้ของประเทศไทย ซึ่งมีสมุนไพรแก้พิษงูที่สอดคล้องกับการวิจัยนี้ ได้แก่ ตะขาบบิน (หญ้าตะขาบ) เสลดพังพอนตัวผู้ รากโลดทะนง รากเขยตาย (สิริรัตน์ เลาหประภานนท์ และคณะ, 2562) นอกจากนี้ มีรายงานสมุนไพรที่แก้พิษงูและสัตว์มีพิษกัดสอดคล้องกับการศึกษานี้ โดยพบว่า หัวหอมแดงซึ่งมีน้ำมันระเหยง่ายที่มีกำมะถัน (diallyl disulfide) เป็นองค์ประกอบและมีธาตุฟอสฟอรัสสูง และเสลดพังพอนตัวเมีย ส่วนใบช่วยดับพิษร้อนและถอนพิษ จึงบรรเทาอาการอักเสบจากพิษแมลงกัดต่อย เช่น ตะขาบ แมงป่อง ผึ้ง ต่อ แตน ได้ อีกทั้งโลดทะนงแดงใช้ร่วมกับเนื้อหมากทำเป็นยาสำหรับดื่มและพอกแผล ซึ่งตัวยาสามารถสลายโปรตีนของพิษงูได้ (กรมการแพทย์แผนไทยและการแพทย์ทางเลือก, 2561)

ส่วนของพืช มีการใช้ 10 รูปแบบ ซึ่งที่ใช้มากที่สุด คือ ส่วนราก รองลงมา คือ ใช้ทั้งต้น วิธีการเตรียมยา มีทั้งหมด 9 วิธี การตำเป็นวิธีใช้เตรียมยามากที่สุด รองลงมา คือ การฝนยา กระสายยา ที่ใช้แก้พิษงูและสัตว์มีพิษกัด มี 9 อย่าง โดยกระสายยาที่ใช้มากที่สุด คือ สุรา ซึ่งกระสายยานี้ช่วยให้ยาออกฤทธิ์เร็วและช่วยเสริมฤทธิ์ยาทำให้มีสรรพคุณแก้พิษงูและสัตว์มีพิษกัดได้รวดเร็วและทันต่อพิษและบรรเทาอาการ การใช้ยาแก้พิษงูและสัตว์มีพิษกัด มี 7 วิธี ซึ่งวิธีการกินและพอกใช้มากที่สุด รองลงมา คือ การกินและทายา จากการใช้ยาสมุนไพรแก้พิษทั้งการรับประทานเพื่อดับพิษภายในแล้ว การพอกหรือการทายังเป็นการรรักษาพิษของบาดแผลภายนอก ซึ่งจะช่วยบรรเทาอาการปวดแสบปวดร้อนและลดบวมได้

การรวบรวมสมุนไพรจากตำราที่มีการบันทึกการใช้สมุนไพรแก้พิษงูและสัตว์มีพิษกัดนี้จะเป็นประโยชน์ในการนำความรู้เกี่ยวกับสมุนไพรแก้พิษไปใช้ในชุมชนและพื้นที่ที่ห่างไกลโรงพยาบาล ซึ่งหากใช้สมุนไพรในการปฐมพยาบาลเบื้องต้นจะช่วยลดความเจ็บปวดจากบาดแผลและลดการเสียชีวิตได้ อีกทั้งการรู้ใช้สมุนไพรยังสอดคล้องกับนโยบายของกระทรวงสาธารณสุขที่ส่งเสริมการใช้สมุนไพรและลดการใช้ยาแผนปัจจุบันในการดูแลสุขภาพ

ข้อเสนอแนะ

การใช้สมุนไพรแก้พิษงูและสัตว์มีพิษกัดเป็นภูมิปัญญาที่มีการใช้มาตั้งแต่โบราณ โดยสามารถสืบค้นได้จากตำราต่างๆ ที่บันทึกไว้ จากการวิจัยนี้สมุนไพรที่มีความถี่ในการใช้แก้พิษงูและสัตว์มีพิษกัดมากที่สุด คือ เสลดพังพอน ซึ่งสอดคล้องกับการวิจัยที่เกี่ยวข้อง ปัจจุบันมีการเผยแพร่และวิจัยประสิทธิผลของสมุนไพรที่ใช้แก้พิษงูและสัตว์มีพิษกัดมากขึ้น ซึ่งนับเป็นหลักฐานเชิงประจักษ์ที่แสดงให้เห็นถึงสรรพคุณตลอดจนการนำไปใช้ประโยชน์ ซึ่งช่วยเพิ่มคุณค่าของสมุนไพรมากขึ้นไปอีกด้วย เสลดพังพอนและสมุนไพรหลายชนิดได้เผยแพร่ข้อมูลการใช้อยู่ในประกาศกระทรวงสาธารณสุข เรื่องยาสามัญประจำบ้านแผนโบราณ พ.ศ. 2556 และสมุนไพรในงานสาธารณสุขมูลฐาน ซึ่งทำให้ประชาชนเข้าถึงข้อมูลง่ายขึ้น เป็นการพึ่งพาตนเองในด้านยาได้อีกด้วย อีกทั้งควรนำสมุนไพรดังกล่าวไปพัฒนาเป็นผลิตภัณฑ์ในรูปแบบที่ทันสมัยและพร้อมใช้ต่อไป

บทคัดย่อ

การพัฒนาระบบการแนะนำพิพิธภัณฑ์ กรณีศึกษาเขตสัมพันธวงศ์ และเขตบางกอกน้อย มีเทคนิคที่ใช้สำหรับการพัฒนาระบบ คือ วิธีการพัฒนาระบบเชิงโครงสร้าง ซึ่งเครื่องมือที่ใช้ในการพัฒนา ได้แก่ โปรแกรมภาษาเอชทีเอ็มแอล, ภาษาพีเอชพี, ภาษาซีเอสเอส, ภาษาจาวาสคริปต์ และโปรแกรมสำหรับจัดการฐานข้อมูล ได้แก่ MySQL โดยกลุ่มตัวอย่างของโครงงานการวิจัยนี้คือ บุคคลภายนอกที่สามารถเข้าถึงการเชื่อมต่อเครือข่ายอินเตอร์เน็ตได้ และสามารถเข้าถึงระบบการแนะนำพิพิธภัณฑ์ผ่าน http://4564.website/museum อีกทั้งมีความสนใจที่จะศึกษารายละเอียดเกี่ยวกับความเป็นมาของพิพิธภัณฑ์ในกรุงเทพมหานคร โดยใช้วิธีการสุ่มตัวอย่างตามสะดวกหรือสมัครใจสำหรับการประเมินประสิทธิภาพของระบบสารสนเทศที่พัฒนาขึ้น

ผลการประเมินความพึงพอใจของระบบการแนะนำพิพิธภัณฑ์โดยกลุ่มตัวอย่างจำนวน 50 คน ด้านการออกแบบมีความพึงพอใจอยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.1 และค่าส่วนเบี่ยงเบนมาตรฐานเท่ากับ 0.08 ด้านคุณภาพของเนื้อหาแบ่งเป็น 2 กรณี ได้แก่ คุณภาพของเนื้อหาพิพิธภัณฑ์ท้องถิ่นกรุงเทพมหานคร เขตสัมพันธวงศ์มีความพึงพอใจอยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.12 และค่าส่วนเบี่ยงเบนมาตรฐานเท่ากับ 0.15 และพิพิธภัณฑ์ท้องถิ่นกรุงเทพมหานคร เขตบางกอกน้อย มีความพึงพอใจอยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.12 และค่าส่วนเบี่ยงเบนมาตรฐานเท่ากับ 0.14

คำสำคัญ: เทคโนโลยีสารสนเทศ, อินเตอร์เน็ต

Abstract

Development of Museum Guide: Case Study Samphanthawong district and Bangkok-noi district there are techniques used in system development is a structured system development method. The development tools include HTML language programs, PHP, CSS, JavaScript, and MySQL database management programs. The third party can access the Internet connection and the museum introduction system through the follow: http://4564.website/museum. They are also interested in studying the details of the history of the museum in Bangkok by using convenient or voluntary random sampling methods for evaluating the efficiency of the developed information system.

The results of the satisfaction assessment of the museum recommendation system by a sample group of 50 people were satisfied with the design aspect at a high level. The average was 4.1 and the standard deviation was 0.08. The quality of the content was divided into 2 cases: the quality of the content of the Bangkok local museum at Samphanthawong district was satisfied at a high level. The average was 4.12 and the standard deviation was 0.15. And the Bangkok local museum at Bangkok-noi district Satisfaction was at a high level. The average of 4.12 and the standard deviation of 0.14.

บทนำ

พิพิธภัณฑ์เป็นสถานที่รวบรวม เก็บรักษา และจัดแสดงสิ่งของต่าง ๆ ที่เป็นโบราณวัตถุหรือเป็นศิลปวัตถุของประเทศ เป็นสิ่งที่มีคุณค่าหรือที่หายาก ไม่ว่าจะเป็น ผลงานประดิษฐ์ของมนุษย์หรือวัตถุต่าง ๆ ที่เกิดขึ้นตามธรรมชาติ เพื่อประโยชน์ให้บุคคลเข้ามาศึกษาหาความรู้หรือชมเพื่อความเพลิดเพลินใจ (ราชบัณฑิตยสภา, 2554) พิพิธภัณฑ์จะมีขนาดที่แตกต่างกันออกไปตามสถานที่และความแตกต่างตามประเภทของวัตถุที่จัดแสดง เช่น พิพิธภัณฑ์ศิลปะหรือหอศิลป์จะมีการจัดแสดงเกี่ยวกับงานศิลปะหลายรูปแบบ พิพิธภัณฑ์ขนาดย่อมหรือพิพิธภัณฑ์ท้องถิ่นที่กระจายอยู่ตามพื้นที่เฉพาะ จัดแสดงผลงานทางประวัติศาสตร์ของท้องถิ่นนั้น ๆ เช่น พิพิธภัณฑ์เมืองหาดใหญ่ ตั้งอยู่ที่มหาวิทยาลัยหาดใหญ่ อ.หาดใหญ่ จ.สงขลา เป็นสถานที่ให้ความรู้กับ ชีวประวัติ.ประวัติศาสตร์และโบราณคดีของเมืองหาดใหญ่และจังหวัดสงขลา ที่มีการจำลองภาพเสมือนจริง (Virtual Reality) ที่จำลองแบบจำลองข้อมูลของสถานที่ในรูปแบบจำลองสามมิติของพิพิธภัณฑ์ของเมืองหาดใหญ่ ให้สัมพันธ์กับพื้นที่ใช้งานจริง โดยสร้างทางเลือกใหม่ให้ผู้สนใจสามารถใช้งานผ่านทางเว็บไซต์เพื่อง่ายต่อการเข้าชมโดยไม่จำเป็นต้องไปสถานที่จริง (เจริญ รุ่งกลิ่น, 2562)

เทคโนโลยีเว็บแอปพลิเคชัน (Web application) เป็นเทคโนโลยีที่ได้รับความนิยมเป็นอย่างสูงเนื่องจากสามารถตอบสนองความต้องการในการใช้งานของผู้ใช้ได้อย่างมีประสิทธิภาพ เว็บแอปพลิเคชันทำงานในรูปแบบของไคลเอนต์/เซิร์ฟเวอร์ (Client/Server) โปรแกรมจะถูกติดตั้งไว้ที่เครื่องเซิร์ฟเวอร์ เครื่องของผู้ใช้หรือเครื่องไคลเอนต์ที่เชื่อมต่อกับระบบเครือข่ายจะสามารถเรียกใช้งานโปรแกรมผ่านเว็บเบราว์เซอร์ (Web browser) ได้ทันที โดยไม่จำเป็นต้องติดตั้งโปรแกรมเพิ่มเติม ไม่มีข้อจำกัดในเรื่องของความหลากหลาย และความแตกต่างกันของคอมพิวเตอร์แต่ละเครื่อง จึงทำให้สามารถใช้งานเว็บแอปพลิเคชันจากอุปกรณ์ต่าง ๆ ได้ทันที ไม่ว่าจะเป็นคอมพิวเตอร์สมาร์ตโฟน แท็บเล็ต เพียงเชื่อมต่อกับเครือข่ายอินเทอร์เน็ต (วุฒิพงษ์ ชินศรี,ศิริวรรณ วาสุกรี, 2558) ดังนั้นเทคโนโลยีเว็บแอปพลิเคชันจึงเป็นเครื่องมือในการเรียนรู้ และประชาสัมพันธ์อีกประเภทหนึ่งที่มีบทบาทสำคัญในปัจจุบัน ซึ่งวิธีการประชาสัมพันธ์ เป็นการสร้างความเข้าใจอันดีของหน่วยงาน การให้ข้อมูลเพื่อเลือกใช้บริการได้ถูกต้อง และสร้างความศรัทธาค่านิยมให้เกิดขึ้นกับองค์กร อำนวยความสะดวกในการติดต่อสื่อสารระหว่างองค์กรกับสถาบันและหน่วยงานต่างๆ ให้เป็นไปอย่างมีประสิทธิภาพ (เสาวณีย์ สิกขาบัณฑิต, 2533)

จากความสำคัญของพิพิธภัณฑ์ดังที่กล่าวไว้ข้างต้นจึงนำไปสู่การพัฒนาระบบการแนะนำพิพิธภัณฑ์ เพื่อนำเสนอข้อมูลของพิพิธภัณฑ์ของเขตในกรุงเทพมหานครทั้ง 26 เขตผ่าน http://4564.website/museum ในระบบมีการทำงานหลากหลายซึ่งพัฒนาโดยใช้ภาษเอชทีเอ็มแอล, ภาษาพีเอชพี, ภาษาซีเอสเอส, ภาษาจาวาสคริปต์ และโปรแกรมสำหรับจัดการฐานข้อมูล ได้แก่ MySQL การทำงานหลักจะเป็นการให้ผู้เยี่ยมชมเข้าไปอ่านบทความเกี่ยวกับพิพิธภัณฑ์ท้องถิ่นของกรุงเทพฯ และผู้เยี่ยมชมยังสามารถเข้ามามีส่วนร่วมในการแบ่งปันพิพิธภัณฑ์ที่น่าสนใจ อาจเป็นภายในประเทศหรือต่างประเทศได้แบบไม่เปิดเผยตัวตน

วัตถุประสงค์ของการวิจัย

1) เพื่อออกแบบและพัฒนาระบบการแนะนำพิพิธภัณฑ์

2) เพื่อประเมินความพึงพอใจของบุคคลทั่วไปที่มีต่อระบบการแนะนำพิพิธภัณฑ์

วิธีการดำเนินการวิจัย

1) ขอบเขตการวิจัย

การพัฒนาระบบการแนะนำพิพิธภัณฑ์ กรณีศึกษาเขตสัมพันธวงศ์ และเขตบางกอกน้อยได้มีการกำหนดขอบเขตด้านประชากรและกลุ่มตัวอย่าง รวมถึงฟังก์ชันการทำงานตามขอบเขตของผู้ใช้งานดังนี้

1.1 ประชากรและกลุ่มตัวอย่าง

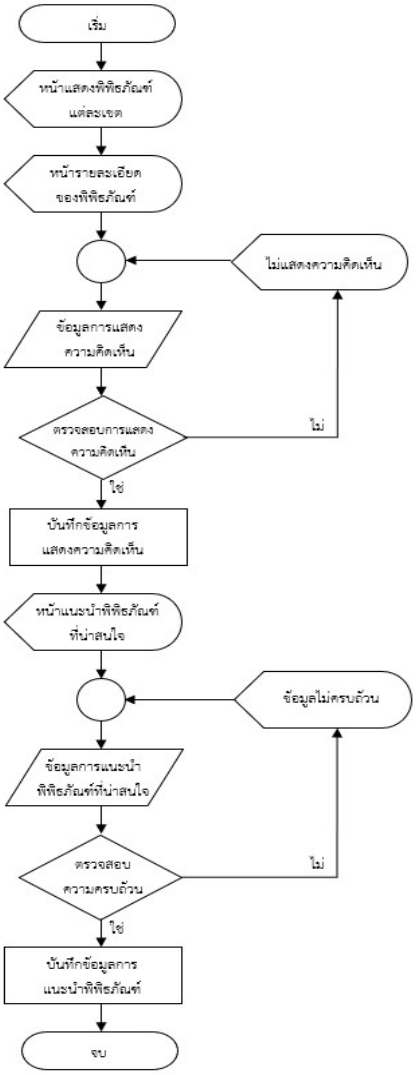
ประชากร คือ บุคคลภายนอกที่สามารถเข้าถึงการเชื่อมต่อเครือข่ายอินเตอร์เน็ตได้ และสามารถเข้าถึงระบบการแนะนำพิพิธภัณฑ์ http://4564.website/museum ได้ อีกทั้งมีความสนใจที่จะศึกษารายละเอียดเกี่ยวกับความเป็นมาของพิพิธภัณฑ์ในกรุงเทพมหานคร

กลุ่มตัวอย่าง คือ บุคคลภายนอกที่สามารถเข้าถึงการเชื่อมต่อเครือข่ายอินเตอร์เน็ตได้ และสามารถเข้าถึงระบบการแนะนำพิพิธภัณฑ์ http://4564.website/museum ได้ อีกทั้งมีความสนใจที่จะศึกษารายละเอียดเกี่ยวกับความเป็นมาของพิพิธภัณฑ์ในกรุงเทพมหานครโดยใช้วิธีการสุ่มตัวอย่างตามสะดวกหรือสมัครใจ (บุญเรียง ขจรศิลป์, 2543) สำหรับประเมินประสิทธิภาพของระบบสารสนเทศที่พัฒนาขึ้น จำนวน 50 คน

1.2 ฟังก์ชันการทำงานตามขอบเขตของผู้ใช้งาน

- สามารถเข้าใช้เพื่อศึกษารายละเอียดของพิพิธภัณฑ์แต่ละเขตได้
- สามารถแสดงความคิดเห็นได้

- สามารถแนะนำพิพิธภัณฑ์ที่น่าสนใจเพิ่มเติมได้



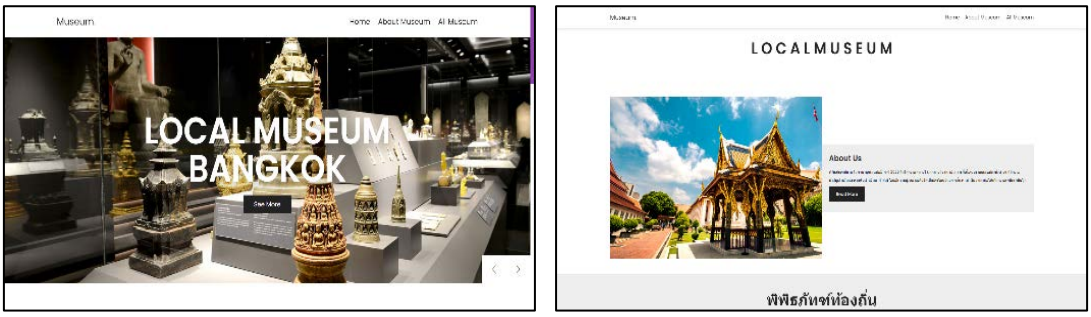
2) เครื่องมือที่ใช้ในการวิจัย

2.1 เครื่องมือที่ใช้ในการเก็บรวมรวมข้อมูล คือ แบบสอบถามความพึงพอใจของบุคคลทั่วไปที่มีต่อระบบการแนะนำพิพิธภัณฑ์ กรณีศึกษาเขตสัมพันธวงศ์ และเขตบางกอกน้อย

2.2 เครื่องมือที่พัฒนาขึ้น คือ เว็บไซต์พิพิธภัณฑ์ท้องถิ่นกรุงเทพมหานคร (http://4564.website/museum)

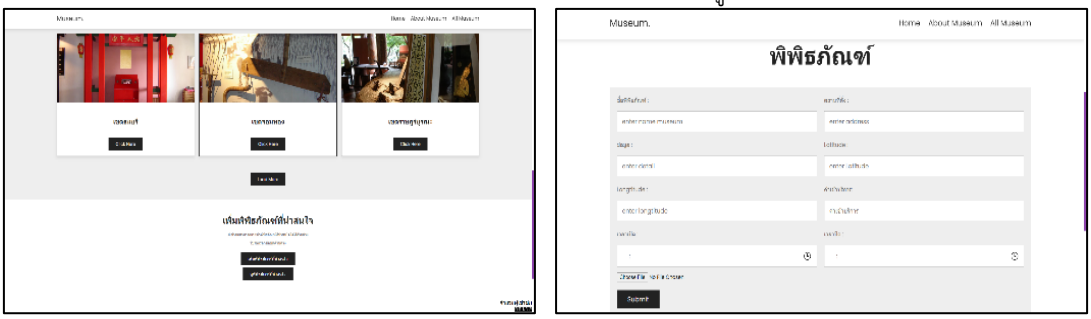
3) ขั้นตอนในการวิจัย

3.1 ผังงานกระบวนการ (Process Flowchart)



ภาพประกอบที่ 1 ผังงานการพัฒนาระบบการแนะนำพิพิธภัณฑ์

3.2 การดำเนินงานของการวิจัย

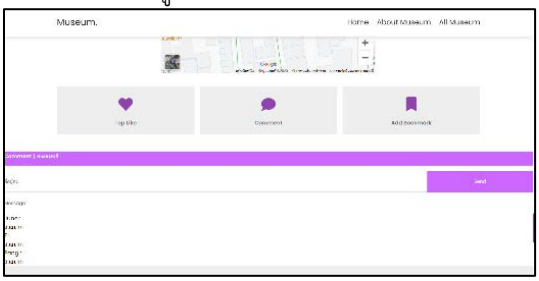


ระบบการแนะนำพิพิธภัณฑ์จัดทำขึ้นเพื่อเป็นสื่อสำหรับรวบรวมรายละเอียดข้อมูลของพิพิธภัณฑ์ท้องถิ่นในเขตของกรุงเทพมหานครโดยผู้ใช้งานสามารถเข้าเยี่ยมชมได้โดยไม่ต้องทำการสมัครสมาชิก

1) หน้าแรกแสดงข้อมูลแบนเนอร์, เมนูเชื่อมไปยังหน้ารวมพิพิธภัณฑ์ และส่วนการเชื่อมไปยังหน้าแนะนำพิพิธภัณฑ์ที่น่าสนใจ ดังภาพประกอบที่ 2

ภาพประกอบที่ 2 หน้าแรกของเว็บไซต์

2) หน้าแนะนำพิพิธภัณฑ์ที่น่าสนใจเพิ่มเติม จะเป็นหน้าให้กรอกข้อมูลรายละเอียดของพิพิธภัณฑ์ ดังภาพที่ 3



ภาพประกอบที่ 3 หน้าแนะนำพิพิธภัณฑ์ที่น่าสนใจเพิ่มเติม

3) หน้ารายละเอียดของพิพิธภัณฑ์แสดงเป็นรูปแบบของบทความ มีรายละเอียด และรูปภาพ ดังภาพที่ 4

ภาพประกอบที่ 4 หน้ารายละเอียดของพิพิธภัณฑ์

4) ส่วนของการแสดงความคิดเห็นของผู้เยี่ยมชม ดังภาพที่ 5

ภาพประกอบที่ 5 รายละเอียดความคิดเห็นของผู้เยี่ยมชม

ผลการดำเนินงาน

ผลการทดลองใช้ระบบการแนะนำพิพิธภัณฑ์ ผู้จัดทำได้ทำการทดลองให้กลุ่มตัวอย่างที่เป็นบุคคลทั่วไปที่สามารถเข้าถึงการเชื่อมต่อเครือข่ายสัญญาณอินเตอร์เน็ตได้ และสามารถเข้าถึงระบบการแนะนำพิพิธภัณฑ์ผ่าน http://4564.website/museum ได้ อีกทั้งมีความสนใจที่จะศึกษารายละเอียดเกี่ยวกับความเป็นมาของพิพิธภัณฑ์ท้องถิ่นในกรุงเทพมหานคร โดยใช้วิธีการสุ่มตัวอย่างตามสะดวกหรือสมัครใจ (บุญเรียง ขจรศิลป์, 2543) จำนวน 50 คนได้ทดลองใช้ระบบที่ได้พัฒนาขึ้น และให้กลุ่มตัวอย่างทำแบบประเมิน

ความพึงพอใจระบบการแนะนำพิพิธภัณฑ์ จากนั้นนำผลที่ได้มาทำการวิเคราะห์โดยใช้วิธีทางสถิติ ได้แก่ ค่าเฉลี่ย ส่วนเบี่ยงเบนมาตรฐาน และแปลผล ดังตารางที่1 - ตารางที่2

ตารางที่ 1 ค่าเฉลี่ยและส่วนเบี่ยงเบนมาตรฐานของระดับความพึงพอใจในด้านการออกแบบโดยผู้ใช้งาน จำนวน 50 คน

รายการ	ค่าเฉลี่ย	ส่วนเบี่ยงเบนมาตรฐาน	ระดับความพึงพอใจ
ความพึงพอใจในด้านการออกแบบ			
1. มีความสวยงาม ทันสมัย และมีความหน้าสนใจ	4	0.63	มาก
2. การจัดรูปแบบเว็บไซต์ง่ายต่อการอ่าน และการใช้งาน	4.02	0.89	มาก
3. ความเหมาะสมของสีที่ใช้ในการออกแบบ	4.14	0.85	มาก
4. เมนูดูง่ายต่อการใช้งาน	4.16	0.79	มาก
5. ขนาดรูป และแบบตัวอักษรอ่านง่าย	4.2	0.78	มาก
ค่าเฉลี่ยรวม	**4.1**	**0.08**	**มาก**

จากตารางที่ 1 ผลการประเมินความพึงพอใจในด้านการออกแบบโดยผู้ใช้งาน จำนวน 50 คน พบว่า ความพึงพอใจอยู่ในระดับมาก โดยมีค่าเฉลี่ยอยู่ที่ 4.1 และค่าส่วนเบี่ยงเบนมาตรฐานอยู่ที่ 0.08

ตารางที่ 2 ค่าเฉลี่ยและส่วนเบี่ยงเบนมาตรฐานของระดับความพึงพอใจในด้านคุณภาพของเนื้อหาโดยผู้ใช้งาน จำนวน 50 คน

รายการ	ค่าเฉลี่ย	ส่วนเบี่ยงเบนมาตรฐาน	ระดับความพึงพอใจ
ความพึงพอใจในด้านคุณภาพของเนื้อหา กรณีศึกษา เขตสัมพันธวงศ์			
1. เกิดประโยชน์แก่ผู้ใช้งาน	4.14	0.83	มาก
2. ความถูกหลักไวยากรณ์ และครบถ้วนของเนื้อหา	3.96	0.87	มาก
3. ความสอดคล้องของเนื้อหากับเว็บไซต์	4.26	0.80	มาก
ค่าเฉลี่ยรวม	**4.12**	**0.15**	**มาก**
ความพึงพอใจในด้านคุณภาพของเนื้อหา กรณีศึกษา เขตบางกอกน้อย			
1. เกิดประโยชน์แก่ผู้ใช้งาน	3.96	0.85	มาก
2. ความถูกหลักไวยากรณ์ และครบถ้วนของเนื้อหา	4.22	0.76	มาก
3. ความสอดคล้องของเนื้อหากับเว็บไซต์	4.20	0.80	มาก
ค่าเฉลี่ยรวม	**4.12**	**0.14**	**มาก**

จากตารางที่ 2 ผลการประเมินความพึงพอใจในด้านคุณภาพของเนื้อหา กรณีศึกษา เขตสัมพันธวงศ์ โดยผู้ใช้งาน จำนวน 50 คน พบว่า ความพึงพอใจอยู่ในระดับมาก โดยมีค่าเฉลี่ยอยู่ที่ 4.12 และค่าส่วนเบี่ยงเบนมาตรฐานอยู่ที่ 0.15 และผลการประเมินความพึงพอใจในด้านคุณภาพของเนื้อหา กรณีศึกษา เขตบางกอกน้อย โดยผู้ใช้งาน จำนวน 50 คน พบว่า ความพึงพอใจอยู่ในระดับมาก โดยมีค่าเฉลี่ยอยู่ที่ 4.12 และค่าส่วนเบี่ยงเบนมาตรฐานอยู่ที่ 0.14

สรุปผลการวิจัย

โครงการวิจัยนี้เป็นการพัฒนาระบบการแนะนำพิพิธภัณฑ์สารมารถสรุปผลการวิจัย ได้ดังนี้

1) ระบบการแนะนำพิพิธภัณฑ์ที่พัฒนาขึ้นสามารถใช้เป็นแหล่งศึกษาออนไลน์ที่สามารถอธิบายรายละเอียดของพิพิธภัณฑ์ท้องถิ่นภายในกรุงเทพมหานครทั้ง 26 แห่งโดยผ่านการพัฒนาระบบในกรณีศึกษา 2 แห่ง ดังนี้ เขตสัมพันธวงศ์ และเขตบางกอกน้อย http://4564.website/museum และยังสามารถสร้างแรงจูงใจให้ผู้คนหันมาสนใจพิพิธภัณฑ์มากขึ้น

2) คุณภาพการทำงานของระบบการแนะนำพิพิธภัณฑ์เป็นเว็บไซต์ที่มีคุณภาพทั้ง 2 ด้าน ได้แก่ ด้านการออกแบบ และด้านคุณภาพของเนื้อหาอยู่ในระดับมาก ซึ่งในด้านการออกแบบได้นำหลักการทางศิลปะมาใช้โดยพิจารณาจาก การใช้รูปแบบตัวอักษรที่เหมาะสมกับงาน การจัดวางตำแหน่งของตัวอักษร รูปภาพ และการกำหนดโครงสร้างของสีให้มีความโดดเด่น ชัดเจน (วรพงศ์ วรชาติอุดมพงศ์, 2540) ทำให้สามารถสร้างแรงจูงใจให้ผู้คนมาเยี่ยมชมยังสถานที่จริง เนื่องจากทางเว็บไซต์ได้มีการแนะนำสถานที่ตั้งของพิพิธภัณฑ์ทั้ง 26 แห่งไว้อย่างชัดเจน

3) ความพึงพอใจของผู้ใช้งานที่มีต่อระบบการแนะนำพิพิธภัณฑ์อยู่ในระดับความพึงพอใจมาก กล่าวคือ ระบบการแนะนำพิพิธภัณฑ์ที่สามารถให้ผู้เยี่ยมชมได้ศึกษารายละเอียดของพิพิธภัณฑ์ท้องถิ่น ค้นหาเส้นทางในการเดินทางที่สะดวกรวดเร็ว และแบ่งปันข้อมูลพิพิธภัณฑ์ที่น่าสนใจ เว็บไซต์ที่พัฒนาขึ้นสร้างแรงจูงใจให้ผู้คนมาเยี่ยมชมยังสถานที่จริง เนื่องจากการนำเสนอของทางเว็บไซต์มีการนำเสนอเนื้อหาที่มีความน่าสนใจ รายละเอียดต่าง ๆ มีความชัดเจนทำให้สามารถเข้าใจถึงบริบทของพิพิธภัณฑ์ท้องถิ่นอย่างชัดเจน

อภิปรายผลการวิจัย

การพัฒนาระบบการแนะนำพิพิธภัณฑ์ผู้จัดทำได้ทำการศึกษาการสร้าง และออกแบบระบบแนะนำพิพิธภัณฑ์ทำตามวัตถุประสงค์ทั้ง 2 ข้อด้วยวิธีต่างกัน ดังนี้

วัตถุประสงค์ข้อที่ 1 เพื่อออกแบบและพัฒนาระบบการแนะนำพิพิธภัณฑ์ ในการทำตามวัตถุประสงค์ข้อที่ 1 ได้ทำการศึกษาองค์ประกอบของจากเว็บไซต์ของพิพิธภัณฑ์ต่าง ๆ โดยตัวอย่างเว็บไซต์ที่ได้นำมาใช้ศึกษา ได้แก่ พิพิธภัณฑ์พระรามเก้า และพิพิธภัณฑสถานธรรมชาติวิทยา ๕๐ พรรษา สยามบรมราชกุมารี จากนั้นได้ร่างแบบของระบบการแนะนำพิพิธภัณฑ์ ซึ่งพัฒนาระบบโดยใช้โปรแกรมพัฒนาระบบ Brackets อีกทั้งยังใช้ภาษาเอชทีเอ็มแอล, ภาษาพีเอชพี, ภาษาซีเอสเอส, ภาษาจาวาสคริปต์ รวมถึงโปรแกรมสำหรับจัดการฐานข้อมูล ได้แก่ MySQL ในการพัฒนา

วัตถุประสงค์ข้อที่ 2 เพื่อประเมินความพึงพอใจของบุคคลทั่วไปที่มีต่อระบบการแนะนำพิพิธภัณฑ์ ในการทำตามวัตถุประสงค์ข้อที่ 2 ได้ทำการสอบถามผู้ใช้งานทั่วไปจำนวน 50 คน โดยใช้แบบสอบถามประเมินความพึงพอใจรูปแบบออนไลน์แบ่งออกเป็นด้านการออกแบบที่มีค่าเฉลี่ยเท่ากับ 4.1 และค่าส่วนเบี่ยงเบนมาตรฐานเท่ากับ 0.08 โดยประเด็นที่สำคัญที่ได้การยอมรับจากผู้ประเมินในระดับมากคือ ความสามารถในการใช้งานเว็บไซต์ง่าย และความเหมาะสมของการเลือกใช้สีบนหน้าเว็บไซต์สอดคล้องกับหลักปฏิสัมพันธ์ระหว่างมนุษย์กับคอมพิวเตอร์ เรื่องการสร้างเว็บไซต์ต้องคำนึงถึงหลักทางด้านจิตวิทยา และผลกระทบของสีต่ออารมณ์ความรู้สึกของผู้ใช้งาน (สุรีรัตน์ อินทร์หม้อ, 2552) และด้านคุณภาพของเนื้อหา แบ่งเป็น 2 กรณี ได้แก่ คุณภาพของเนื้อหาพิพิธภัณฑ์ท้องถิ่นกรุงเทพมหานคร เขตสัมพันธวงศ์มีความพึงพอใจอยู่ในระดับมากมีค่าเฉลี่ยเท่ากับ 4.12 และค่าส่วนเบี่ยงเบนมาตรฐานเท่ากับ 0.15 และพิพิธภัณฑ์ท้องถิ่นกรุงเทพมหานคร เขตบางกอกน้อย มีความพึงพอใจอยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.12 และค่าส่วนเบี่ยงเบนมาตรฐานเท่ากับ 0.14

ข้อเสนอแนะ

งานวิจัยนี้จัดทำขึ้นเพื่อการพัฒนาระบบการแนะนำพิพิธภัณฑ์กรณีศึกษาเขตสัมพันธวงศ์ และเขตบางกอกน้อยโดยระบบที่พัฒนาขึ้นมิใช่ระบบที่เป็นทางการโดยตรง จึงมิได้มีการขอความอนุเคราะห์ในด้านคำแนะนำ คำปรึกษาจากผู้ดูแลพิพิธภัณฑ์หรือบุคคลที่เกี่ยวข้อง ดังนั้นหากมีการทำการวิจัยในครั้งถัดไปจำเป็นต้องทำการศึกษาบริบทของพิพิธภัณฑ์เพิ่มเติม และสอบถามเพื่อขอคำแนะนำจากผู้ดูแลพิพิธภัณฑ์หรือบุคคลที่เกี่ยวข้อง อีกทั้งทำการสอบถามความต้องการของเจ้าหน้าที่เพื่อนำมาพัฒนาระบบการแนะนำต่อไป

บทคัดย่อ

งานวิจัยนี้มีวัตถุประสงค์ 1) เพื่อศึกษาและวิเคราะห์ความพึงพอใจของบุคคลทั่วไปที่มีต่อเว็ปไซต์ 2) เพื่อออกแบบและพัฒนาเว็บไซต์ประชาสัมพันธ์พิพิธภัณฑ์ท้องถิ่นกรุงเทพมหานคร 3) เพื่อศึกษาและวิเคราะห์การใช้งานเว็ปไซต์แนะนำพิพิธภัณฑ์ท้องถิ่นกรุงเทพมหานคร ผู้วิจัยใช้เทคนิควิธีการพัฒนาระบบเชิงโครงสร้าง ในการพัฒนาระบบใช้โปรแกรม Visual Studio Code โดยใช้ภาษา PHP CSS เป็นการพัฒนาเว็บแอปพลิเคชัน และโปรแกรมฐานข้อมูลได้แก่ MySQL กลุ่มตัวอย่างคือบุคคลภายนอกที่เชื่อมเครือข่ายสัญญาณอินเตอร์เน็ตได้ ผู้ใช้สามารถเข้าถึงข้อมูลสารสนเทศของพิพิธภัณฑ์ได้อย่างรวดเร็ว ผลการประเมินความพึงพอใจของเว็ปไซต์ของผู้ใช้งานจำนวน 50 คน แบ่งออกเป็นด้านการออกแบบมีความพึงพอใจอยู่ดับมาก คิดเป็นค่าเฉลี่ย 4.11 และค่าเบี่ยงเบนมาตรฐาน
อยู่ที่ 1.01 ด้านคุณภาพเนื้อหา มีความพึงพอใจอยู่ในระดับมาก คิดเป็นค่าเฉลี่ย 4.2 และค่าเบี่ยงเบนมาตรฐานอยู่ที่ 0.95 และ ด้านประสิทธิภาพการทำงาน มีความพึงพอใจอยู่ในระดับมาก คิดเป็นค่าเฉลี่ย 4.18 และค่าเบี่ยงเบนมาตรฐานอยู่ที่ 0.88 ภาพรวมของการใช้งานระบบอยู่ในระดับดี ระบบสามารถให้ข้อมูลที่สำคัญของพิพิธภัณฑ์ท้องถิ่นกรุงเทพมหานครได้เป็นอย่างดี
คำสำคัญ: พัฒนาเว็ปไซต์,พัฒนาระบบ,พัฒนาเว็ปแอบพิเคชั่น

Abstract

The objectives of this research are 1) to study and analyze the general public's satisfaction towards the website, 2) to design and develop a website to publicize the Bangkok Local Museum, 3) to study and analyze the use of the website recommending local museums. Bangkok There are techniques used in system development, namely, structural system development methods. The tools used were Visual Studio Code program using PHP CSS language to develop web applications and database programs such as MySQL. The sample group was outsiders who could connect to the internet network. Users can quickly access museum information. Satisfaction evaluation results of the website of 50 people in terms of design are very satisfied. The mean was 4.11 and the standard deviation was 1.01 for content quality. Satisfaction was at a high level. Representing a mean of 4.2 and a standard deviation of 0.95 and performance Satisfaction was at a high level. The mean was 4.18 and the standard deviation was 0.88.
Keywords: Website development, system development, web application development

บทนำ

ในปีพ.ศ. 2530 ที่เทคโนโลยีและอินเตอร์เน็ตเข้ามามีบทบาทในชีวิตประจำวันและเป็นสื่อการเรียนการสอนอย่างในศตวรรษที่ 21 ก่อนผู้คนจะเริ่มใช้อินเตอร์เน็ต ผู้คนในสมัยก่อนจะใช้พิพิธภัณฑ์เป็นสถานที่ศึกษาการดำรงชีวิตของคนสมัยก่อน ซึ่ง

พิพิธภัณฑ์ มีเป้าหมายในการเก็บรักษาและดูแลสิ่งของที่สำคัญทั้งในด้านประวัติศาสตร์ วิทยาศาสตร์ วัฒนธรรม และศิลปะ เพื่อจัดแสดงต่อสาธารณชน พิพิธภัณฑ์ขนาดใหญ่มักจะตั้งอยู่ภายในเมืองใหญ่ที่สำคัญของโลกซึ่งมักจะมีผลงานแสดงที่หลากหลาย ในขณะที่พิพิธภัณฑ์ขนาดย่อมที่กระจายอยู่ตามทั่วโลกมักจะจัดแสดงผลงานของท้องถิ่นนั้น หรือเฉพาะวัตถุที่เกิดจากความสนใจของเจ้าของพิพิธภัณฑ์ ยกตัวอย่าง เช่น พิพิธภัณฑ์ท้องถิ่นกรุงเทพมหานคร เขตบางกอกใหญ่ มีการจัดแสดงภายในพิพิธภัณฑ์ได้จัดแสดงนิทรรศการ มีทั้งภาพที่สวยงาม การจำลองตัวอย่างจริงอันอลังการและข้อมูลทางประวัติศาสตร์ที่สำคัญๆ นอกจากนี้ภายหลังจากการเติบโตของอินเทอร์เน็ต ได้มีพิพิธภัณฑ์เสมือนจริงเกิดขึ้นมากมายในลักษณะของเว็บไซต์ที่มีการจัดแสดงภาพ และเสียงให้ผู้เข้าชมได้ดูและฟัง

ในศตวรรษที่ 21 สังคมมีการเปลี่ยนแปลง แน่นอนว่าบทบาทของพิพิธภัณฑ์ไม่ใช่เป็นแหล่งความรู้เพียงอย่างเดียว ด้วยเหตุผลที่ว่า ผู้คนสามารถค้นคว้าข้อมูลผ่านอินเตอร์เน็ตได้ตลอดเวลา โดยไม่ต้องเดินทาง ทำให้พิพิธภัณฑ์กลายเป็นสถานที่ท่องเที่ยว

จากข้างต้นเห็นได้ว่า พิพิธภัณฑ์ท้องถิ่น ต่างๆในกรุงเทพฯ ได้รับอิทธิพลจากการที่มีอินเตอร์เน็ตเข้ามาเป็นสื่อความรู้ โดยพิจารณาจากปัญหาที่เกิดขึ้นกับพิพิธภัณฑ์ท้องถิ่น ต่างๆในกรุงเทพฯ จึงพบว่า วิธีแก้ปัญหาที่เหมาะสม คือ การสร้างเว็บไซต์หรือสื่อออนไลน์ขึ้นมาเพื่อเป็นช่องทางในการประชาสัมพันธ์ให้กับพิพธภัณฑ์ ในเว็บไซต์หรือสื่อออนไลน์ที่ทำมาเพื่อประชาสัมพันธ์มีการเลือกใช้โปรแกรมต่างๆ ในการสร้างเว็บไซต์หรือออนไลน์ ให้มีความน่าสนใจและมีประสิทธิภาพมากที่สุด วิจัยที่เกี่ยวข้อง สโรชา เมฆอรุณ. (2557). กล่าวถึง การจัดการพิพิธภัณฑ์ในสถานศึกษาเพื่อเป็นแหล่งเรียนรู้ : กรณีศึกษา พิพิธภัณฑ์การศึกษาไทย โรงเรียนสวนกุหลาบวิทยาลัยและพิพิธภัณฑ์เพื่อการศึกษาโรงเรียนเทพศิรินทร์ เป็นการศึกษาเพื่อศึกษาการจัดการพิพิภัณฑ์ในสถานศึกษา เพื่อนำรูปแบบการจัดการมาพัฒนาพิพิธภัณฑ์ของมหาวิทยาลัยศรีนครินทรวิโรฒ รวมถึงพิพิธภัณฑ์ต่างๆ ที่มีข้อจ ากัดทางด้านงบประมาณ เพื่อเป็นแนวทางในการบริหารจัดการพิพิธภัณฑ์ คาเมร่า เจราหวัง. (2557). กล่าวถึง การจัดการพิพิธภัณฑ์ท้องถิ่นกับการมีส่วนร่วมและพัฒนาชุมชน กรณีศึกษา พิพิธภัณฑ์ท้องถิ่นขุนละหาร โดยการวิจัยครั้งนี้มีวัตถุประสงค์เพื่อศึกษาถึงการมีส่วนร่วมกับชุมชนท้องถิ่นของพิพิธภัณฑ์ท้องถิ่นขุนละหารในฐานะพิพิธภัณฑ์เอกชน อีกทั้งศึกษาบทบาทในการช่วยส่งเสริมพัฒนาชุมชนของพิพิธภัณฑ์ท้องถิ่นขุนละหาร วรินทร พลขัน. (2559). กล่าวถึง วิจัยเรื่อง การวิเคราะห์ลักษณะการเข้าเยี่ยมชมพิพิธภัณฑ์เมืองพิษณุโลกและศูนย์วัฒนธรรมและการท่องเที่ยวกลุ่มจังหวัดภาคเหนือตอนล่าง 1 มีวัตถุประสงค์เพื่อวิเคราะห์ลักษณะการเข้าเยี่ยมชมพิพิธภัณฑ์พิพิธภัณฑ์เมืองพิษณุโลกและศูนย์วัฒนธรรมและการท่องเที่ยวกลุ่มจังหวัดภาคเหนือตอนล่าง 1 ผุสดีคุ้มรักษา. (2563). กล่าวถึง การศึกษาพฤติกรรมการท่องเที่ยวพิพิธภัณฑ์ของนักท่องเที่ยวกลุ่มเจเนอเรชั่นวาย พบว่าพฤติกรรมก่อนการเดินทาง นักท่องเที่ยวส่วนใหญ่เดินทางท่องเที่ยวพิพิธภัณฑ์ช่วงวันหยุดสุดสัปดาห์ (เสาร์-อาทิตย์) โดยมีวัตถุประสงค์ในการเดินทางเพื่อเรียนรู้ประวัติศาสตร์ศิลปะวัฒนธรรม สันทัด ทองรินทร์และศิริวรรณ อนันต์โท. (2561). กล่าวถึง การออกแบบพิพิธภัณฑ์การ์ตูน จากผลการศึกษากลุ่มผู้ทรงคุณวุฒิพบว่า การออกแบบพิพิธภัณฑ์การ์ตูน ด้านการดำเนินงานควรมีลักษณะเป็นภาคีการมีส่วนร่วมของหน่วยงานหรือองค์กรจากทั้งภาครัฐ ภาคเอกชน นักวิชาชีพการ์ตูนนักวิชาการ

วัตถุประสงค์ของการวิจัย

1. เพื่อศึกษาและวิเคราะห์ความพึงพอใจของบุคคลทั่วไปที่มีต่อเว็ปไซต์
2. เพื่อออกแบบและพัฒนาเว็บไซต์ประชาสัมพันธ์พิพิธภัณฑ์ท้องถิ่นกรุงเทพมหานคร
3. เพื่อศึกษาและวิเคราะห์การใช้งานเว็ปไซต์แนะนำพิพิธภัณฑ์ท้องถิ่นกรุงเทพมหานคร

วิธีการดำเนินการวิจัย

1. งานวิจัยนี้ได้ดำเนินการพัฒนาเว็ปไซต์ทั้งหมด 4 ขั้นตอน โดยขั้นตอนนี้

1.1 แผนภาพขั้นตอนการดำเนินการเข้าชม ผู้วิจัยดำเนินการเก็บรวบรวมข้อมูลพิพิธภัณฑ์ทั้งหมด 26 แห่ง ในกรุงเทพมหานครได้แก่ เขตบางกอกใหญ่ เขตธนบุรี เขตคลองสาน เขตจอมทอง เขตราษฎร์บูรณะ เขตหนองแขม เขตทวีวัฒนา เขตบางเขน เขตดอนเมือง เขตวังทองหลาง เขตหนองจอก เขตสวนหลวง เขตลาดกระบัง เขตพระนคร เขตดุสิต เขตบางซื่อ เขตดินแดง เขตพญาไท เขตบางกอกน้อย เขตบางขุนเทียนเขตบางนา เขตบางรัก เขตยานนาวา เขตพระโขนง เขตสัมพันธ์วงศ์ เขตวัฒนา และทำการจัดเก็บฐานข้อมุล ได้แก่ คำอธิบาย ภาพประกอบ แผนที่ พิกัดสถานที่

2. เครื่องมือการวิจัย

2.1 แบบสอบถามความพึงพอใจ เป็นแบบสอบถามแบบมาตราส่วน 5 ระดับ

2.2 เว็ปไซต์พิพิธภัณฑ์ท้องถิ่นกรุงเทพมหานคร

3. กลุ่มเป้าหมาย

3.1 กลุ่มตัวอย่าง คือ บุคคลภายนอกที่มีความสนใจที่จะศึกษาพิพิธภัณฑ์ท้องถิ่นกรุงเทพมหานคร โดยใช้วิธีการสุ่มตัวอย่างตามสะดวกสำหรับการประเมินประสิทธิภาพของระบบสารสนเทศที่พัฒนาขึ้น จำนวน 50 คน

4. สถิติที่ใช้ในการวิจัย การจัดทำแบบประเมินความพึงพอใจของเว็บแอปพลิเคชันระบบสื่อสังคมออนไลน์พิพิธภัณฑ์ในกรุงเทพฯ ได้นำเอาหลักสถิติมาใช้ ได้แก่ ร้อยละ ค่าเฉลี่ย ส่วนเบี่ยงเบนมาตรฐาน และเปรียบเทียบค่าสถิติ โดยใช้ข้อมูลได้มาจากกลุ่มตัวอย่างทั้ง 50 คน ซึ่งใช้วิธีการสุ่มกลุ่มตัวอย่างอย่างเป็นอิสระ (Independent T-Test) เกณฑ์การกำหนดค่าระดับคะแนนความพึงพอใจ ดังนี้

ค่าเฉลี่ยเท่ากับ 4.51 – 5.00 หมายถึงระดับมากที่สุด
ค่าเฉลี่ยเท่ากับ 3.51 – 4.50 หมายถึงระดับมาก
ค่าเฉลี่ยเท่ากับ 2.51 – 3.50 หมายถึงระดับปานกลาง
ค่าเฉลี่ยเท่ากับ 1.51 – 2.50 หมายถึงระดับน้อย
ค่าเฉลี่ยเท่ากับ 1.01 – 1.50 หมายถึงระดับน้อยที่สุด

สรุปผลการวิจัย

งานวิจัยการพัฒนาเว็ปไซต์พิพิธภัณฑ์ท้องถิ่นกรุงเทพมหานครเพื่อกระตุ้นการท่องเที่ยวในประเทศ

1. ส่วนของผู้ใช้งานทั่วไปโดยมีฟังก์ชันดังนี้ สามารถเพิ่มพิพิธภัณฑ์ โลเคชั่น รายละเอียด แผนที่ ค่าเข้า เวลาเปิด เวลาปิด และ รูปภาพ และ ภายในเว็บไซต์ได้อย่างมีประสิทธิภาพโดยรวมเว็บไซต์ใช้งานได้อย่างมีประสิทธิภาพและไม่มีข้อติดขัดใดๆ

2. ส่วนของผู้ดูแลระบบมีฟังก์ชัน ที่สามารถเพิ่ม ลบ แก้ไข ข้อมูลโพสต์ต่างๆภายในเว็บไซต์ได้

3. เว็ปไซต์สามารถเก็บข้อมูลความคิดเห็นของผู้เข้าชมเว็ปไซต์ได้เพื่อจะได้นำมาปรับปรุงเว็ปไซต์มีความประสิทธิภายมากยิ่งขึ้น

อภิปรายผลการวิจัย

ผลการทดลองใช้ระบบเว็บแอปพลิเคชันการพัฒนาเว็ปไซต์พิพิธภัณฑ์ท้องถิ่นกรุงเทพมหานครเพื่อกระตุ้นการท่องเที่ยวในประเทศ ผู้วิจัยดำเนินการทดลองให้กลุ่มตัวอย่าง ที่เป็นบุคคลทั่วไปที่สามารถเข้าถึงอินเตอร์เน็ตได้และมีความต้องการที่จะเผยแพร่สถานที่ท่องเที่ยว ทั้ง 50 คน ได้ทดลองใช้ระบบที่ผู้จัดทำ ได้พัฒนาขึ้น และได้สอบถามความพึงพอใจของผู้ใช้งานที่มีต่อระบบ จากนั้นนำผลมาวิเคราะห์ด้วยหลักสถิติสำหรับใช้ในการวิจัย ได้แก่ ร้อยละ ค่าเฉลี่ย ส่วนเบี่ยงเบนมาตรฐาน เทียบกับเกณฑ์และสรุปผล แสดงดังตารางที่ 1 - ตารางที่ 3 ดังนี้

ตารางที่ 1 ด้านการออกแบบและการจัดรูปแบบ (Design)

รายการ	$\overline{x}$	SD	ระดับความพึงพอใจ
1. มีความสวยงาม ทันสมัย และมีความหน้าสนใจ	4.06	1.02	มาก
2. การจัดรูปแบบเว็บไซต์ง่ายต่อการอ่าน และการใช้งาน	4.16	.99	มาก
3. ความเหมาะสมของสีที่ใช้ในการออกแบบ	4.14	1.01	มาก
4. เมนูดูง่ายต่อการใช้งาน	4.12	1	มาก
5. ขนาดรูป และแบบตัวอักษรอ่านง่าย	4.08	1.05	มาก
โดยรวม	4.11	1.01	มาก

จากตารางที่ 1 ผลการประเมินความพึงพอใจด้านการออกแบบและการจัดรูปแบบ (Design) โดยผู้ใช้งานทั่วไป พบว่า อยู่ในระดับพึงพอใจมากมีค่าเฉลี่ยอยู่ที่ 4.11 และมีค่าเบี่ยงเบนมาตรฐานอยู่ที่ 1.01 โดยแบ่งเป็น 1) มีความสวยงาม ทันสมัย และมีความหน้าสนใจ มีค่าเฉลี่ยอยู่ที่ 4.06 และมีค่าเบี่ยงเบนมาตรฐานอยู่ที่ 1.02 มีระดับความพึงพอใจอยู่ในระดับ พึงพอใจมาก 2) สีสันที่ใช้ในการออกแบบมีความเหมาะสม มีค่าเฉลี่ยอยู่ที่ 4.16 และมีค่าเบี่ยงเบนมาตรฐานอยู่ที่ 0.99 มีระดับความพึงพอใจอยู่ในระดับ พึงพอใจมาก 3) ขนาดและรูปแบบของตัวอักษรอ่านได้ง่ายและสวยงาม มีค่าเฉลี่ยอยู่ที่ 4.14 และมีค่าเบี่ยงเบนมาตรฐานอยู่ที่ 1.01 มีระดับความพึงพอใจอยู่ในระดับ พึงพอใจมาก 4) สีพื้นหลังกับตัวอักษรภายในเว็บไซต์มีความหมาะสมในการอ่าน มีค่าเฉลี่ยอยู่ที่ 4.12 และมีค่าเบี่ยงเบนมาตรฐาน อยู่ที่ 1 มีระดับความพึงพอใจอยู่ในระดับ พึงพอใจมาก 5) เมนูง่ายต่อการใช้งาน มีค่าเฉลี่ยอยู่ที่ 4.08 และมีค่าเบี่ยงเบนมาตรฐานอยู่ที่ 1.05 มีระดับความพึงพอใจอยู่ในระดับ พึงพอใจมาก

ตารางที่ 2 ด้านคุณภาพของเนื้อหา (Content)

รายการ	$\overline{x}$	SD	ระดับความพึงพอใจ
1. เกิดประโยชน์แก่ผู้ใช้งาน	4.24	.96	มาก
2. ความถูกหลักไวยากรณ์ และครบถ้วนของเนื้อหา	4.14	.93	มาก
3. ความสอดคล้องของเนื้อหากับเว็บไซ	4.22	.95	มาก
โดยรวม	4.2	.95	มาก

จากตารางที่ 2 ผลการประเมินความพึงพอใจด้านคุณภาพของเนื้อหา (Content) โดยผู้ใช้งานทั่วไป พบว่า ผลการ อยู่ในระดับพึงพอใจมากมีค่าเฉลี่ยอยู่ที่ 4.2 และมีค่าเบี่ยงเบนมาตรฐานอยู่ที่ 0.95 โดยแบ่งเป็น 1) เกิดประโยชน์แก่ผู้ใช้งาน มีค่าเฉลี่ยอยู่ที่ 4.24 และมีค่าเบี่ยงเบนมาตรฐานอยู่ที่ 0.96 มีระดับความพึงพอใจอยู่ในระดับ พึงพอใจมาก 2) ความถูกหลักไวยากรณ์ และครบถ้วนของเนื้อหา มีค่าเฉลี่ยอยู่ที่ 4.14 และมีค่าเบี่ยงเบนมาตรฐานอยู่ที่ 0.93 มีระดับความพึงพอใจอยู่ในระดับ พึงพอใจมาก 3) ความสอดคล้องของเนื้อหากับเว็บไซต์ มีค่าเฉลี่ยอยู่ที่ 4.22 และมีค่าเบี่ยงเบนมาตรฐานอยู่ที่ 0.95 มีระดับความพึงพอใจอยู่ในระดับ พึงพอใจมาก

ตารางที่ 3 ความพึงพอใจในด้านประสิทธิภาพการทำงาน (Performance)

รายการ	$\bar{x}$	SD	ระดับความพึงพอใจ
1. เว็บไซต์มีความถูกต้อง และครบถ้วนของข้อมูล	4.14	.88	มาก
2. ระบบสามารถแสดงผลได้อย่างถูกต้อง	4.1	.99	มาก
3. ระบบมีการตอบสนองการใช้งานอย่างดี	4.22	.76	มาก
4. ระบบมีความรวดเร็วในการดาวน์โหลด/อัปโหลดข้อมูล	4.28	.88	มาก
โดยรวม	4.18	.88	มาก

จากตารางที่ 3 ผลการประเมินความพึงพอใจด้านประสิทธิภาพการทำงานของระบบ (Performance) โดยผู้ใช้งานทั่วไป พบว่า ผลการประเมินความพึงพอใจด้านการทำงานได้ตามฟังก์ชันของระบบ อยู่ในระดับความพึงพอใจมากมีค่าเฉลี่ยอยู่ที่ 4.18 และมีค่าเบี่ยงเบนมาตรฐานอยู่ที่ 0.88 โดยแบ่งเป็น 1) เว็บไซต์มีความถูกต้อง และครบถ้วนของข้อมูล มีค่าเฉลี่ยอยู่ที่ 4.14 และมีค่าเบี่ยงเบนมาตรฐาน อยู่ที่ 0.88 มีระดับความพึงพอใจอยู่ในระดับ พึงพอใจมาก 2) ระบบสามารถแสดงผลได้อย่างถูกต้อง มีค่าเฉลี่ยอยู่ที่ 4.1 และมีค่าเบี่ยงเบนมาตรฐานอยู่ที่ 0.99 มีระดับความพึงพอใจอยู่ในระดับ พึงพอใจมาก 3) ระบบมีการตอบสนองการใช้งานอย่างดี มีค่าเฉลี่ยอยู่ที่ 4.22 และมีค่าเบี่ยงเบนมาตรฐานอยู่ที่ 0.76 มีระดับความพึงพอใจอยู่ในระดับ พึงพอใจมาก 4) ระบบมีความรวดเร็วในการดาวน์โหลด/อัปโหลดข้อมูล มีค่าเฉลี่ยอยู่ที่ 4.28 และมีค่าเบี่ยงเบนมาตรฐานอยู่ที่ 0.88 มีระดับความพึงพอใจอยู่ในระดับ พึงพอใจมาก

สรุปผลการวิจัย

งานวิจัยนี้ได้ทำการพัฒนาระบบที่สามารถให้ข้อมูลเกี่ยวกับพิพิธภัณฑ์ของกรุงเทพมหานครทั้ง 26 แห่ง ผลการประเมินความพึงพอใจด้านการทำงานได้ตามฟังก์ชันของระบบ อยู่ในระดับความพึงพอใจมาก การใช้งานโปรแกรมเพื่อใช้ในการพัฒนาระบบผู้พัฒนาระบบ ควรมีความรู้พื้นฐานก่อน จึงจะสามารถดึงศักยภาพของโปรแกรมพัฒนาออกมาได้อย่างมีประสิทธิภาพ จากระบบที่ผู้จัดทำได้พัฒนาขึ้นมาระบบยังสามารถพัฒนาต่อยอดฟังก์ชั่นในการทำงานของระบบได้ เพื่อให้ระบบมีความสามารถและครอบคลุมการทางานในส่วน ต่างๆได้มากขึ้น ประโยชน์จากการพัฒนาระบบจะเป็นการสร้างแรงจูงใจให้แก่ผู้ใช้งานหรือลูกค้า ซึ่งจะเป็นการส่งเสริมการเรียนรู้จากพิพิธภัณฑ์ของกรุงเทพมหานครได้อีกทางหนึ่งด้วย

การศึกษาภูมิปัญญาหมอพื้นบ้านด้านการรักษาโรคเบาหวาน เพื่อการพัฒนาตำรับยารักษาโรคเบาหวาน: กรณีศึกษาหมอพื้นบ้าน จังหวัดสุรินทร์

A study of the wisdom of folk healers on diabetes treatment for the development of diabetic drug formulas: A case study of folk healers, Surin province

อาทิตย์ ลีประโคน (Artit Leeprakhon)[1]
สุธีรา อินทเจริญศานต์ (Sutheera Intajarurnsan)[2]

บทคัดย่อ

โรคเบาหวานเกิดจากการทำงานของฮอร์โมนอินซูลินของร่างกายผิดปกติ ส่งผลให้กระบวนการนำน้ำตาลในกระแสเลือดเข้าสู่เซลล์ได้ไม่เต็มประสิทธิภาพทำให้น้ำตาลในกระแสเลือดสูงกว่าปกติ และหากมีน้ำตาลในกระแสเลือดสูงติดต่อกันเป็นระยะเวลานานจะส่งผลให้เกิดอาการแทรกซ้อนได้ การรักษาโรคเบาหวานของชุมชนยังมีความเชื่อทางการแพทย์พื้นบ้านแต่ยังขาดการบันทึกให้เป็นลายลักษณ์อักษร และขาดผู้สืบทอดและอาจสูญหายไปจากสังคมไทย ผู้วิจัยจึงทำการศึกษาเพื่อเก็บรวบรวมภูมิปัญญาการใช้สมุนไพรในการรักษาโรคเบาหวานของหมอพื้นบ้านเพื่อพัฒนาเป็นตำรับยา โดยพิจารณาจากหลักการตั้งตำรับที่สอดคล้องกับแพทย์แผนไทย และสมุนไพรต้องมีสรรพคุณในการรักษาโรคเบาหวานเพื่อยืนยันประสิทธิผลและทำการวิจัยทดลองในต่อไปในอนาคต

ผลการศึกษาพบว่าตำรับยาของหมออุดม แก่นเพชร ถือเป็นตำรับยาที่เหมาะสมในการศึกษาวิจัย เนื่องจากว่ามีสมุนไพรที่หาได้ง่ายในชุมชน อีกทั้งสมุนไพรต่าง ๆ ล้วนมีสรรพคุณลดระดับน้ำตาลในกระแสเลือดและบำรุงธาตุ ซึ่งประกอบไปด้วยรากสามสิบ รากปลาไหลเผือก ขิง ต้นครอบจักรวาล และต้นลูก ใต้ใบ ตามลำดับ โดยมีสมุนไพร 3 ชนิด ที่มีสรรพคุณในการลดระดับน้ำตาลในกระแสเลือด คือ รากปลาไหลเผือก ต้นครอบจักรวาล และต้นลูกใต้ใบ และมี 2 ชนิด ที่ช่วยขับลม บำรุงธาตุ บำรุงกำลัง คือ ขิงและรากสามสิบ

คำสำคัญ: เบาหวาน, ภูมิปัญญา, หมอพื้นบ้าน

Abstract

Diabetes is caused by an abnormal function of the body's hormone insulin. As a result, the process of bringing sugar in the bloodstream into the cells is not effective, causing the blood sugar to be higher than normal and if there is high blood sugar for a long time, it will result in various complications. The treatment of diabetes among the people in the community also has folk medical beliefs, but the wisdom still lacks written records and lack of successors, it's may be lost from Thai society. The researcher therefore conducted a study to collect the wisdom of using herbs in the treatment of diabetes by folk healers to develop a medicinal formula by based on the principles of drug formulation consistent with Thai traditional medicine and herbs in the formulation must have properties in the treatment of diabetes to confirm their effectiveness and conduct future trials.

The results found that the drug recipe of Dr.Udom Kaenphet was considered an appropriate drug recipe for research, because there were herbs that easy to find in the community. In addition, various herbs were properties to reduce blood sugar levels and nourish the elements which consists of *Asparagus racemosus* Willd., *Eurycoma longifolia* Jack, *Zingiber officinale* Roscoe, *Abutilon hirtum* (Lam.) Sweet and, *Phyllanthus niruri* L., respectively. There were 3 herbs that have properties to reduce blood sugar levels, *Eurycoma longifolia* Jack. *Abutilon hirtum* (Lam.) Sweet and *Phyllanthus niruri* L. and there were 2 herbs that help distribution air in body, nourish the elements and energy were *Zingiber officinale* Roscoe. and *Asparagus racemosus* Willd.

Keywords: Diabetes, Wisdom, Folk healers

บทนำ

โรคเบาหวาน (Diabetes mellitus; DM) เกิดจากการทำงานของฮอร์โมนอินซูลิน (Insulin) ของร่างกายผิดปกติ ส่งผลให้กระบวนการนำน้ำตาลในกระแสเลือดเข้าสู่เซลล์ได้ไม่เต็มประสิทธิภาพ ทำให้น้ำตาลในกระแสเลือดสูงกว่าปกติ ร่างกายจึงมีกลไกขับน้ำตาลออกทางปัสสาวะมากขึ้น ทำให้มีอาการปัสสาวะบ่อย หิวน้ำบ่อย น้ำหนักลด และหากมีน้ำตาลในกระแสเลือดสูงติดต่อกันเป็นระยะเวลานานจะส่งผลให้เกิดอาการแทรกซ้อนต่อระบบต่าง ๆ เช่น ไขมันในเลือดสูง ความดันโลหิตสูง หลอดเลือดตีบ เป็นต้น[6] นอกจากฮอร์โมนอินซูลินจะมีผลต่อระดับน้ำตาลในกระแสเลือดแล้ว ยังมีผลต่อการเผาผลาญไขมันในร่างกายอีกด้วย โดยมีฤทธิ์ยับยั้งการสลายไขมันในร่างกาย ดังนั้นผู้ป่วยเบาหวานจึงพบความผิดปกติของไขมันในเลือดได้มากกว่าคนทั่วไป ซึ่งโรคเบาหวานสามารถแบ่งได้ 2 ชนิด คือ Type 1 Diabetes (เบาหวานชนิดที่ 1) พบได้น้อยประมาณ 5% ของโรคเบาหวานทั้งหมด เกิดจากตับอ่อนสร้างฮอร์โมนอินซูลินได้น้อยกว่าปกติ หรือสร้างไม่ได้ ผู้ป่วยจึงต้องได้รับการรักษาด้วยการฉีดยาอินซูลิน (Insulin–dependent diabetes mellitus) และ Type 2 Diabetes (เบาหวานชนิดที่ 2) เป็นเบาหวานที่มักพบในผู้ใหญ่อายุมากกว่า 40 ปีขึ้นไป โดยเป็นเบาหวานชนิดที่ไม่จำเป็นต้องพึ่งการฉีดอินซูลิน (Non-Insulin–dependent diabetes mellitus) ซึ่งเบาหวานชนิดนี้พบได้สูงสุดประมาณ 90-95% ซึ่งมีโอกาสเกิดภาวะแทรกซ้อนเรื้อรัง เช่น โรคหัวใจ ไตวาย ตาบอด ต้องตัดเท้าหรือขา ทำให้ผู้ป่วยเกิดความทุกข์ทรมานและมักจะวินิจฉัยไม่ได้ในระยะแรก[5] การตรวจคัดกรองเบาหวานในผู้ใหญ่ที่ไม่มีอาการ หรือคัดกรองกลุ่มเสี่ยง จึงเป็นหนทางที่ป้องกันโรคได้ดีกว่าการรักษา ซึ่งโรคไม่ติดต่อนี้เป็นโรคที่พบได้ทั่วโลก และมีแนวโน้มที่จะเพิ่มมากขึ้นเรื่อย ๆ[1] ดังนั้นการควบคุมระดับน้ำตาลในเลือดให้อยู่ในเกณฑ์ปกติ อาจเป็นวิธีหนึ่งที่ช่วยลดความชุกของผู้ป่วยโรคเบาหวานให้มีจำนวนลดลงได้ ซึ่งจากรายงานของสำนักนโยบายและยุทธศาสตร์ สำนักงานปลัดกระทรวงสาธารณสุข พบว่า ความชุกของโรคเบาหวาน เพิ่มสูงขึ้นเป็นร้อยละ 8.9 คิดเป็นจำนวนมากถึง 4.8 ล้านคน เทียบกับปี 2552 ซึ่งพบเพียงร้อยละ 6.9 หรือ มีคนเป็นโรคเบาหวาน 3.3 ล้านคน[4]

การแพทย์พื้นบ้านนับเป็นภูมิปัญญาอันล้ำค่าของท้องถิ่นซึ่งมีมาตั้งแต่โบราณกาล โดยเฉพาะอย่างยิ่งความเชื่อหรือประสบการณ์ที่มีการสืบทอดหลากหลายกระบวนการ ทั้งการถ่ายทอดโดยตรงระหว่างครูกับศิษย์ และการถ่ายทอดกันภายในครอบครัวจากบรรพบุรุษสู่ลูกหลาน ภูมิปัญญาการแพทย์พื้นบ้านจึงถือเป็นศาสตร์การแพทย์แผนไทยที่อยู่คู่คนไทยมาช้านาน เพื่อใช้ในการดำรงชีวิตและการดูแลสุขภาพเบื้องต้น โดยมีการเก็บสั่งสมประสบการณ์ต่าง ๆ จากการเรียนรู้หรือได้รับการถ่ายทอดและมีการสืบทอดองค์ความรู้นี้จากคนรุ่นก่อนมาสู่คนรุ่นหลังเรื่อยมา จนกลายเป็นรากฐานในการดูแลสุขภาพจนถึงปัจจุบัน[7] กระบวนการรักษาด้วยภูมิปัญญาหมอพื้นบ้านจึงเป็นอีกทางเลือกหนึ่งสำหรับผู้ที่มีรายได้น้อยมีความเชื่อด้านการรักษาโดยอาศัยภูมิปัญญาของหมอพื้นบ้านที่มีมาแต่ดั้งเดิม แต่องค์ความรู้ภูมิปัญญาและประสบการณ์ดังกล่าวยังขาดการบันทึกให้เป็นลายลักษณ์อักษร ประกอบกับในปัจจุบันหมอพื้นบ้านที่มีความสามารถและมีประสบการณ์เชี่ยวชาญในการรักษามีอายุค่อนข้างมาก และขาดผู้สืบทอดองค์ความรู้หรือภูมิปัญญาอันทรงคุณค่าดังกล่าว อาจทำให้ภูมิปัญญาเหล่านั้นเกิดการสูญหายไปจากสังคมไทยได้

จากการลงพื้นที่พบว่ากลุ่มผู้สูงอายุในชุมชนตำบลบ้านยะยาน อำเภอศีขรภูมิ จังหวัดสุรินทร์ ทำให้ทราบว่ายังมีความเชื่อและความต้องการในการรับการรักษาด้วยภูมิปัญญาหมอพื้นบ้านโดยอาศัยหลักความเชื่อและความศรัทธาอยู่มาก แต่ตำรับยาในการรักษายังคงขาดการทำวิจัยเพื่อยืนยันประสิทธิผลของตำรับยารักษาโรคเบาหวานที่ได้มาจากภูมิปัญญาอันทรงคุณค่าของหมอพื้นบ้าน ซึ่งถ้าหากมีการเก็บรวบรวมภูมิปัญญาการใช้สมุนไพรในการรักษาโรคเบาหวานของหมอพื้นบ้านและพัฒนาตำรับยาดังกล่าวได้รับการทำวิจัยเพื่อยืนยันประสิทธิผล และทำการวิจัยทดลองในต่อไปในอนาคต โดยการคัดเลือกจากการพิจารณา วิเคราะห์ สังเคราะห์ และการจัดเสวนากลุ่มเพื่อถอดบทเรียนด้านการรักษาโรคเบาหวานจนตกผลึกได้เป็นตำรับยารักษาโรคเบาหวานจากภูมิปัญญาหมอพื้นบ้านจำนวน 3 คน และสอดคล้องกับการตั้งตำรับยาของแพทย์แผนไทย ร่วมกับการมีส่วนร่วมของชุนชน โดยหมอพื้นบ้านดังกล่าวต้องมีความรู้และความเชี่ยวชาญในการรักษาโรคเบาหวานมาไม่น้อยกว่า 10 ปี และมีผู้ป่วยมารับบริการการรักษาอย่างต่อเนื่อง (มีผู้ป่วยโรคเบาหวานมารับการรักษาอย่างต่อเนื่อง) แล้วนั้น อาจทำให้ประชาชนในชุมชนมีทางเลือกในการรักษาและอาจลดค่าใช้จ่ายในการรักษาทางการแพทย์แผนปัจจุบันได้ ค่าใช้จ่ายในการรักษาพยาบาลเหล่านี้จะสามารถลดลงได้หากสามารถป้องกันไม่ให้จำนวนผู้ป่วยเบาหวานเพิ่มขึ้น ผู้ป่วยได้รับการรักษาและมีการใช้ยารักษาโรคเบาหวานที่ถูกต้องเหมาะสม เพื่อควบคุมระดับน้ำตาลในเลือดให้ได้ตามเป้าหมายซึ่งจะชะลอการเกิดโรคแทรกซ้อนจากเบาหวานในอนาคต

ดังนั้นผู้วิจัยจึงมีความสนใจที่จะศึกษาภูมิปัญญาการใช้สมุนไพรในการรักษาโรคเบาหวานของหมอพื้นบ้าน เพื่อการพัฒนาตำรับยารักษาโรคเบาหวานจากภูมิปัญญาหมอพื้นบ้าน โดยการมีส่วนร่วมของชุมชน อำเภอศีขรภูมิ จังหวัดสุรินทร์ โดยทำการพิจารณา วิเคราะห์ สังเคราะห์ คัดเลือกตำรับยาที่โดนเด่นที่สุดของหมอพื้นบ้านทั้ง 3 คน มาเป็นตำรับยารักษาโรคเบาหวาน 1 ตำรับ ซึ่งต้องถึงคำนึงถึงตำรับมีฤทธิ์ในการลดระดับน้ำตาลในเลือดและมีหลักการในการตั้งตำรับยาโดยคำนึงถึงความเป็นไปได้และความสอดคล้องหรือใกล้เคียงกับการตั้งตำรับยาตามศาสตร์การแพทย์แผนไทยมากที่สุด เช่น มีตัวยาหลัก ตัวยารอง เป็นต้น จำนวน 1 ตำรับ เพื่อนำมาศึกษาวิจัยในกลุ่มเสี่ยงโรคเบาหวานชนิดไม่พึ่งอินซูลินต่อไป

วัตถุประสงค์ของการวิจัย

1. เพื่อศึกษาภูมิปัญญาการใช้สมุนไพรในการรักษาโรคเบาหวานของหมอพื้นบ้าน
2. เพื่อต่อยอดภูมิปัญญาสู่งานวิจัยผลของตำรับยารักษาโรคเบาหวาน

วิธีการดำเนินการวิจัย ระเบียบวิธีศึกษา

การศึกษาครั้งนี้เป็นการวิจัยเชิงคุณภาพ (Qualitative Research Design) แบบกรณีศึกษาหมอพื้นบ้านอำเภอ ศีขรภูมิ จังหวัดสุรินทร์ จำนวน 3 คน โดยประสานงานสำนักงานสาธารณสุขจังหวัดสุรินทร์เพื่อขอทราบรายชื่อหมอพื้นบ้าน ทำการศึกษาภูมิปัญญาการใช้สมุนไพรในการรักษาโรคเบาหวานของหมอพื้นบ้านเพื่อต่อยอดภูมิปัญญาสู่งานวิจัยผลของตำรับยารักษาโรคเบาหวาน สัมภาษณ์แบบเจาะลึก โดยคัดเลือกหมอพื้นบ้านแบบเจาะจงตามเกณฑ์กการคัดเลือกหมอพื้นบ้าน

ประชากรและกลุ่มตัวอย่าง

ติดต่อประสานงานสำนักงานสาธารณสุขจังหวัดสุรินทร์เพื่อขอทราบรายชื่อหมอพื้นบ้านที่ผ่านการคัดเลือกและได้รับการขึ้นทะเบียนเป็นหมอพื้นบ้านจากกรมการแพทย์แผนไทยและการแพทย์ทางเลือกในปี 2563 และทำการคัดเลือกหมอพื้นบ้าน จำนวน 3 คน ตามเกณฑ์ดังนี้

1. เป็นหมอพื้นบ้านที่มีภูมิลำเนาในเขตพื้นที่อำเภอศีขรภูมิ จังหวัดสุรินทร์
2. เป็นหมอพื้นบ้านที่มีองค์ความรู้และภูมิปัญญาการใช้สมุนไพรรักษาโรคเบาหวาน
3. มีประสบการณ์ในการรักษาไม่ต่ำกว่า 10 ปี และมีการรักษาอย่างต่อเนื่อง
4. อยู่ในศีลธรรมอันดีและเป็นที่เคารพนับถือของคนในชุมชน
5. ยินยอมให้ข้อมูลอย่างเต็มใจและสามารถสื่อสารได้

เครื่องมือที่ใช้ในการศึกษา

เครื่องมือที่ใช้ในการเก็บรวบรวมข้อมูลในการวิจัย คือ แบบสัมภาษณ์หมอพื้นบ้าน ซึ่งดัดแปลงจากแบบสัมภาษณ์หมอพื้นบ้านของกรมการแพทย์แผนไทยและการแพทย์ทางเลือกในการเก็บรวบรวมข้อมูลประวัติส่วนตัวและภูมิปัญญาการใช้สมุนไพรในการรักษาโรคเบาหวานของหมอพื้นบ้าน

การตรวจสอบคุณภาพเครื่องมือ

การตรวจสอบความตรงของเนื้อหา (Content validity) โดยผู้วิจัยได้นำแบบสัมภาษณ์ที่ดัดแปลงจาก ตรวจสอบความตรงของเนื้อหา (IOC) ประกอบด้วยความถูกต้องเหมาะสมของภาษาความสอดคล้องกับวัตถุประสงค์และความครอบคลุมของเนื้อหาโดยถือเกณฑ์ความสอดคล้องมาปรับปรุงแก้ไขก่อนที่จะนำไปใช้

การเก็บรวบรวมข้อมูล

การดำเนินการเก็บรวบรวมข้อมูลผู้วิจัยทำการเก็บข้อมูลด้วยตนเอง ณ ตำบลบ้านยะยาน อำเภอศีขรภูมิ จังหวัดสุรินทร์ โดยมีขั้นตอนการดำเนินงาน ดังนี้

1. จัดทำหนังสือไปที่สาธารณสุขจังหวัดสุรินทร์เพื่อขอทราบรายชื่อหมอพื้นบ้านที่ผ่านการคัดเลือกและได้รับการขึ้นทะเบียนเป็นหมอพื้นบ้านจากกรมการแพทย์แผนไทยและการแพทย์ทางเลือกในปี 2563
2. คัดเลือกหมอพื้นบ้านที่ผ่านเกณฑ์การคัดเข้า
3. ติดต่อประสานงานกับหมอพื้นบ้าน แนะนำตัว ทำความรู้จักพร้อมทั้งชี้แจงรายละเอียดต่าง ๆ ที่เกี่ยวข้องกับงานวิจัยและขออนุญาตที่จะทำการศึกษา
4. ลงพื้นที่เพื่อสัมภาษณ์เชิงลึกหมอพื้นบ้าน เน้นการสัมภาษณ์แบบไม่เป็นทางการและพูดคุยแบบเป็นกันเอง โดยมีเป้าหมายและวัตถุประสงค์ในการพูดคุยครอบคลุมประเด็นที่ต้องการศึกษาตามแนวคำถามการสัมภาษณ์ โดยใช้แบบสัมภาษณ์หมอพื้นบ้าน ซึ่งดัดแปลงจากแบบสัมภาษณ์หมอพื้นบ้านของกรมการแพทย์แผนไทยและการแพทย์ทางเลือกการสัมภาษณ์แต่ละครั้งจะใช้เวลาในการสัมภาษณ์ 1-3 ชั่วโมง ที่บ้านหมอพื้นบ้านแต่ละท่าน การลงเก็บข้อมูลของหมอแต่ละทางจะเก็บข้อมูล จำนวนท่านละ 3 ครั้ง

5. การบันทึกภาคสนาม ทำการจดบันทึกจากสิ่งที่สังเกตเห็น เช่น สถานที่ ลักษณะทางสถานภาพ บทสนทนา พฤติกรรมของผู้ให้ข้อมูล เพื่อทำให้ได้ข้อมูลการศึกษาที่สมบูรณ์ยิ่งขึ้น การศึกษาครั้งนี้ผู้ทำการศึกษาได้บันทึกภาคสนามไปพร้อมกับการสนทนา

6. ทำการขออนุญาตการบันทึกเทปและบันทึกภาพก่อนการสัมภาษณ์ทุกครั้ง เพื่อให้ได้ข้อมูลครบถ้วนและป้องกันการคลาดเคลื่อนของข้อมูล และดำเนินการถอดเทปหลังจากการสัมภาษณ์เชิงลึกเสร็จทุกครั้ง

7. นำข้อมูลที่ได้มาวิเคราะห์โดยการจัดเสวนากลุ่มร่วมกับชุมชนเพื่อพัฒนาเป็นตำรับยารักษาโรคเบาหวาน โดยพิจารณาจากสมุนไพรในตำรับที่มีฤทธิ์หรือสรรพคุณในการลดระดับน้ำตาลในกระแสเลือดและมีหลักการในการตั้งตำรับยาที่คำนึงถึงความเป็นไปได้และความสอดคล้องหรือใกล้เคียงกับการตั้งตำรับยาตามศาสตร์การแพทย์แผนไทยมากที่สุด เช่น มีตัวยาหลัก ตัวยารอง เป็นต้น

การวิเคราะห์ข้อมูล

การวิเคราะห์ข้อมูลนั้นผู้วิจัยใช้การวิเคราะห์เนื้อหา (Content Analysis) โดยพิจารณาความสัมพันธ์เชิงเหตุผลและนำมาอภิปรายผล

จริยธรรมในการวิจัย

การศึกษาวิจัยครั้งนี้เป็นส่วนหนึ่งของโครงการวิจัย เรื่อง “การพัฒนาตำรับยารักษาโรคเบาหวานจากภูมิปัญญาหมอพื้นบ้านโดยการมีส่วนร่วมของชุมชน อำเภอศีขรภูมิ จังหวัดสุรินทร์” ปีงบประมาณ 2564 ได้ผ่านการรับรองจากคณะกรรมการจริยธรรมการวิจัยในมนุษย์มหาวิทยาลัยราชภัฏสุรินทร์ โดยยึดหลักเกณฑ์ตามคำประกาศเฮลซิงกิ (Declaration of Helsinki) และแนวทางการปฏิบัติการวิจัยทางคลินิกที่ดี (ICH GCP) เลขที่ HE 641004

ผลการศึกษา

ข้อมูลหมอพื้นบ้านจังหวัดสุรินทร์ที่ผ่านการคัดเลือกและได้รับการขึ้นทะเบียนเป็นหมอพื้นบ้านจากกรมการแพทย์แผนไทยและการแพทย์ทางเลือกในปี 2563 มีจำนวนทั้งสิ้น 150 คน โดยแบ่งออกเป็นเขตอำเภอต่าง ๆ ในจังหวัดสุรินทร์ ซึ่งในเขตพื้นที่อำเภอศีขรภูมิมีหมอพื้นบ้านที่ได้รับการขึ้นทะเบียนจำนวน 16 คน และมีหมอพื้นบ้านจำนวน 3 คน ได้ผ่านการคัดเลือกเป็นหมอพื้นบ้านที่มีองค์ความรู้และภูมิปัญญาการรักษาโรคเบาหวานตามเกณฑ์การคัดเข้าหมอพื้นบ้าน ได้แก่ หมออุดม แก่นเพชร หมอพุด วิชุมา และหมอสุพรรณ นุสกรรม

1. ผลการศึกษาภูมิปัญญาการรักษาโรคเบาหวาน หมออุดม แก่นเพชร

ด้านประวัติและการปฏิบัติตน

หมออุดม แก่นเพชร เริ่มต้นการเป็นหมอพื้นบ้านเมื่ออายุ 35 ปี โดยได้รับการสืบทอดจากบิดา ซึ่งเกิดจากการครูพักลักจำและค่อย ๆ เรียนรู้จากการสังเกตการรักษาของบิดา แต่ไม่ได้มีความสนใจที่จะเป็นหมอพื้นบ้านมากนัก บิดาได้สอบถามอยู่หลายครั้งแต่นายอุดม แก่นเพชร ก็ปฏิเสธทุกครั้ง ต่อมาเมื่อบิดาเริ่มมีอาการป่วยจึงเริ่มสนใจมีความคิดอยากจะสืบทอดองค์ความรู้และภูมิปัญญาอันทรงคุณค่าจากบิดาของตน จึงเริ่มจากการท่องจำบทสวดหรือคาถาในการรักษาโรคจากบิดาเป็นระยะ ๆ จนในที่สุดก็สามารถจดจำคาถาได้เป็นอย่าง เมื่อบิดาเสียชีวิตตนจึงได้ทำหน้าที่ต่อเนื่องจากบิดามาโดยตลอด อีกทั้งยังได้หาความรู้เพิ่มเติมด้านการรักษาด้วยสมุนไพรอย่างต่อเนื่อง จนมีความรู้ความเชี่ยวชาญด้านการรักษาด้วยสมุนไพรทั้งโรคเบาหวานและโรคงูสวัด เมื่อมีผู้มารับการรักษา หมอจะใช้เหล้าขาวรินลงพื้นดินเพื่อเป็นการขอขมากรรมและบอกกล่าวบิดาก่อนทำการรักษา โดยบอกกล่าวบิดาว่าขอให้ผู้ที่มารับการรักษาหายจากโรคจากนั้นจึงทำการรักษา ซึ่งถือเป็นการระลึกถึงคุณบิดาหรือคุณของยาที่ใช้ในการรักษาด้วย ในระหว่างการรักษาจะสวดมนต์ก่อนนอนเป็นประจำโดยเฉพาะอย่างยิ่ง วันพระ วันที่มีสุริยุปราคาหรือจันทรุปราคา จะทำการสวดมนต์และถือศีลอย่างเคร่งครัด โดยมีบทสวดที่ท่องเป็นประจำ คือ บทสวดคำอธิฐานเข้าพรรษาและคำอธิฐานออกพรรษา ซึ่งบทสวดนี้เป็นบทสวดมนต์ที่ใช้ประกอบการทำพิธีในระหว่างการรักษาอีกด้วย โดยมีข้อห้ามในระหว่างการรักษา คือ ห้ามดื่มสุราและห้ามลอดราวตากผ้า และนำเหล้าที่ผู้รับการรักษามายกครูเพื่อแซน (คำว่า “แซน” เป็นภาษาเขมร หมายถึง พิธีกรรมท้องถิ่นที่ใช้เหล้าเป็นสื่อกลางในการบอกกล่าวบรรพบุรุษที่ล่วงลับไปแล้วและเป็นการขอขมากรรมและขอพรในการรักษา) บอกกล่าวกับบิดาเพื่อขออนุญาตใช้คาถาและยาสมุนไพรในการรักษาผู้ป่วย และขอให้ผู้ป่วยที่มารับการรักษามีอาการดำเนินโรคที่ดีขึ้นและหายจากโรคโดยเร็วประกอบกับการบูชาครูด้วยกรวยดอกไม้ 5 อัน ธูป 1 ห่อ (ใช้ทั้งห่อ) เทียน 1 กล่อง (เทียนกล่องเล็กที่มีขายทั่วไปและไม่ระบุสี) เหล้าขาวขวดเล็ก 1 ขวด และเงินค่าครู 24 บาท ส่วนผู้ที่มารับการรักษาเมื่อหายแล้วต้องกลับมายกครู (เหมือนตอนบูชาครู) หากไม่กลับมายกครูอาจส่งผลให้คาถาเสื่อม และเพื่อเป็นการป้องกันเหตุการณ์ดังกล่าวหมอจึงต้องหมั่นสวดมนต์อยู่เป็นประจำ โดยเฉพาะอย่างยิ่งในวันที่เกิดสุริยุปราคาหรือจันทรุปราคาเพื่อให้คาถากลับมาแข็งและเกิดประสิทธิภาพสูงสุดในการรักษาเหมือนเดิม และภูมิปัญญาการใช้สมุนไพรในการรักษาโรค

นั้นยังไม่มีผู้สืบทอด จากการสัมภาษณ์เชิงลึกเรื่องการถ่ายทอดองค์ความรู้และภูมิปัญญาในการรักษาโรค พบว่า บุคคลที่จะได้รับการถ่ายทอดจะเป็นผู้ใดก็ได้ ไม่จำกัดว่าต้องเป็นบุคคลในสายเลือด แต่ต้องมีจิตวิญญาณของความเป็นหมอและที่สำคัญต้องสามารถจำจดบทสวดได้เป็นอย่างดี (บทสวดเข้าพรรษาและออกพรรษา) รวมถึงการปฏิบัติตนและครองตนให้อยู่ในกฎเกณฑ์ของการเป็นหมอพื้นบ้านที่ดีจึงจะทำการไหว้ครูและยกครูเพื่อรับการถ่ายทอดต่อไป

ด้านองค์ความรู้และภูมิปัญญาการรักษาโรคเบาหวาน

หมออุดม แก่นเพชร อธิบายสาเหตุและกลไกการเจ็บป่วยหรือลักษณะของโรคผู้มารับการรักษา โดยให้ข้อมูลว่าผู้ที่มารับการรักษาจะไปพบแพทย์แผนปัจจุบันและได้รับการเจาะเลือดตรวจหาระดับน้ำตาลในกระแสเลือดมาก่อนเพื่อเป็นการยืนยันการเป็นโรคให้กับหมอพื้นบ้านก่อน หลังจากนั้นจะเริ่มทำการรักษาโดยท่องคาถาโดยการตั้งนะโม 3 จบ หมอพื้นบ้านจะท่องบทคำอธิฐานเข้าพรรษาหรือเรียกว่าคาถาเป่าเปิดและเป่าไปตามศีรษะของผู้มารับการรักษาจำนวน 3 ครั้ง หลังจากนั้นจะแนะนำตัวยาสมุนไพรที่ใช้ในการรักษาโรคเบาหวานรวมถึงคำแนะนำด้านการรับประทานตำรับยาสมุนไพรรักษาโรคเบาหวานและการปฏิบัติตนในระหว่างรับการรักษาให้กับผู้ที่มารับการรักษา หลังจากนั้นจะตั้งนะโม 3 จบ แล้วท่องบทคำอธิฐานออกพรรษาหรือเรียกว่าคาถาเป่าปิด โดยมีสมุนไพรที่ใช้ในการรักษาโรคเบาหวาน ดังนี้

1. รากสามสิบ 2. รากปลาไหลเผือก 3. ขิง
4. ต้นครอบจักรวาล 5. ต้นลูกใต้ใบ

วิธีการ

นำสมุนไพรรากสามสิบและรากปลาไหลเผือกอย่างละประมาณ 1 กำมือ (ประมาณ 100 กรัม) ขิง ต้นครอบจักรวาลและต้นลูกใต้ใบ อย่างละประมาณครึ่งกำมือ (ประมาณ 50 กรัม) มาต้มดื่ม โดยเติมน้ำสะอาดให้ท่วมยา (หมอพื้นบ้านไม่ได้กำหนดปริมาณของน้ำที่แน่นอน แต่ระบุว่าให้เติมน้ำให้ท่วมตัวยา) แล้วต้มให้เดือดประมาณ 10 นาที พักไว้ให้อุ่นแล้วรับประทานก่อนอาหารเช้าและเย็น ประมาณ 1 แก้ว (ประมาณ 200 มิลลิลิตร) เป็นระยะเวลาประมาณ 7-10 วัน (มื้อเย็นให้ใช้วิธีอุ่นยา) หากน้ำแห้งให้เติมน้ำให้ท่วมยาและต้มจนเดือดอีกครั้ง แล้วดื่มแทนน้ำจนกว่ายาจะจืด ในระหว่างการรักษาผู้ที่มารับการรักษาต้องห้ามดื่มสุรา ห้ามรับประทานเนื้อสัตว์ใหญ่ เช่น เนื้อวัว เนื้อควาย และปลาร้า โดยเชื่อว่าหากรับประทานสัตว์ใหญ่จะทำให้เกิดอาการแสลงต่อโรคได้และอาจทำให้มีผลการรักษาไม่เป็นที่พึงพอใจ

2. ผลการศึกษาภูมิปัญญาการรักษาโรคเบาหวาน หมอพุด วิชุมา

ด้านประวัติและการปฏิบัติตน

หมอพุด วิชุมา เริ่มต้นการเป็นหมอพื้นบ้านเมื่ออายุ 25 ปี คือ ได้เริ่มต้นเรียนรู้จากบิดาของตนเอง (นายรอง วิชุมา เสียชีวิตแล้ว) ซึ่งเป็นหมอพื้นบ้านที่มีความเชี่ยวชาญด้านการรักษากระดูกและไฟไหม้น้ำร้อนลวก อีกทั้งยังมีความรู้ด้านการรักษาโรคเบาหวานโดยสืบทอดจากหมอธรรมที่จังหวัดศรีสะเกษ (ไม่สามารถให้รายละเอียดเกี่ยวกับหมอธรรมท่านนั้นได้) โดยจะทำพิธีท่องคาถาอยู่ด้านบนของตัวบ้าน (บ้านที่พิธีถ่ายทอดวิชาต้องเป็นบ้านชั้นเดียวยกพื้นสูงและมีรูของช่องไม้กระดาน) แล้วให้ผู้รับสืบทอดนั่งสวดมนต์เริ่มพิธีอยู่ด้านล่างของตัวบ้าน (ใต้ถุนบ้าน) และต้องจำคาถาที่ได้ยินจากบิดาที่อยู่ด้านบน (ไม่สามารถเปิดเผยบทสวดได้) โดยการจดจำและท่องคาถาที่ได้ยินผ่านทางช่องของไม้กระดาน ซึ่งเรียกว่า คาถาลอดป่อง (ภาษาอีสาน) ถ้าจำคาถาได้แสดงว่าได้รับการสืบทอดแล้ว อีกวิธีหนึ่งคือในกรณีที่กำลังจะสิ้นลมหายใจจะทำการถ่ายทอดวิชาโดยการให้ผู้รับการถ่ายทอดต้องอมนิ้วโป้งเท้าข้างใดข้างหนึ่งและตั้งจิตอธิฐานรับเป็นหมอพื้นบ้านสืบทอดต่อไป หลังจากนั้นหมอจะกล่าวว่าได้ให้เป็นหมอพื้นบ้านแล้ว นอกจากนี้ยังต้องทำพิธีการตั้งขันธ์ยกครู คือ ต้องมีการยกพาน ซึ่งประกอบด้วย การยกขันธ์ 5 หรือ ขันธ์ 8 ธูป 1 ห่อ เทียน 1 ห่อ จำนวนเงิน 524 บาท (จำนวนเงินดังกล่าวมีความหมาย คือ 500 บาท หมายถึง ความขลังและความเชื่อที่หนักแน่นในการรักษาหายจากโรคภัยไข้เจ็บ ส่วนอีก 24 บาท หมายถึง ค่ายกครูและระลึกถึงพระคุณของครูยาและครูธรรมที่ได้ถ่ายทอดวิชาให้) หลังจากนั้นตั้งจิตอธิษฐานถึงครูบาอาจารย์ และเมื่อบิดารับพานพร้อมกล่าวอวยพรให้รักษาผู้ป่วยให้หายทุกราย ภายหลังที่ได้รับการสืบทอดจากบิดาก็ได้ทำการรักษาผู้ป่วยควบคู่กับบิดามาโดยตลอด จนกระทั่งบิดาได้เสียชีวิตลง นอกจากนี้ยังมีความกระตือรือร้นในการเป็นหมอพื้นบ้านที่ดี คือ มีการสังเกตการรักษาจากและเทคนิคต่าง ๆ จากบิดาอย่างสม่ำเสมอ จนได้รับคำชมจากผู้ป่วยที่เคยได้รับการรักษาโดยดีมาตลอด นอกจากนี้ยังมีข้อปฏิบัติที่เคร่งครัด คือ ต้องสวดมนต์ทุกวันพระ ห้ามลอดราวตากผ้า ห้ามรับประทานที่เป็นเครื่องเซ่นไหว้ แต่ถ้าหากว่าตกอยู่ในสถานการณ์ที่หิวอย่างรุนแรงและไม่มีอาหารในการรับประทานก็สามารถรับประทานเพื่อประทังชีวิตได้ แต่ต้องไม่กล่าวถึงเรื่องอาหารที่เป็นเครื่องเซ่นไหว้นั้น ๆ อย่างเด็ดขาด และหากว่ามีคนกล่าวถึงต้องเดินออกจากวงรับประทานอาหารนั้นอย่างรวดเร็ว โดยไม่พูดจาถึงเรื่องการรับประทานครั้งนั้นอีกเลย

ด้านองค์ความรู้และภูมิปัญญาการรักษาโรคเบาหวาน

หมอพุด วิชุมา ไม่อธิบายถึงสาเหตุและกลไกของการเป็นโรคเบาหวานและได้ให้ข้อมูลเพียงว่าหากผู้ป่วยมารับการรักษาจะต้องไปพบแพทย์แผนปัจจุบันและได้ตรวจว่าเป็นโรคเบาหวานแล้วมาก่อน ถึงจะทำการรักษาโดยการบริกรรมคาถาแล้วเป่าไปที่ผู้

ที่มารับการรักษาจำนวน 3 ครั้ง และแนะนำตัวยาสมุนไพรที่ใช้ในการรักษาโรคเบาหวาน แล้วให้ผู้ที่มารับการรักษากลับไปหาสมุนไพรรับประทาน โดยมีสมุนไพรที่ใช้ในการรักษาโรคเบาหวาน ดังนี้

1. ขิง 2. มะขามป้อม

วิธีการ

นำสมุนไพรทั้ง 2 ชนิดข้างต้น อย่างละประมาณ 1 กำมือ ใส่หม้อแล้วเติมน้ำเปล่าให้ท่วมยา ต้มให้เดือด แล้วนำมาดื่มตอนเช้าและตอนเย็น (ไม่ได้ระบุช่วงเวลาที่แน่นอน) หากน้ำลดให้เติมน้ำเปล่าให้ท่วมยาและต้มจนเดือดอีกครั้ง แล้วดื่มแทนน้ำจนกว่ายาจะจืด โดยใช้ตำรับยาเดียวกันและปริมาณเท่ากันในทุกรายที่มารับการรักษา ในระหว่างการรักษาต้องห้ามรับประทานไก่ ไข่ ของทอด ของที่มีน้ำมัน เนื้อวัว หรือเนื้อควาย หลังจากรับประทานแล้วจะมีอาการของการผิดสำแดง คือ มีอาการคันตามแผลหรือแผลหายช้ากว่าปกติ แต่ไม่สามารถอธิบายถึงเหตุผลในการทำให้เกิดอาการดังกล่าวหลังจากรับประทานได้ กล่าวเพียงว่าจะทำให้ผิดสำแดงและแผลหายช้า ห้ามรับประทานอาหารที่มีรสหวาน และให้งดเครื่องดื่มพวกชา กาแฟ

3. ผลการศึกษาภูมิปัญญาการรักษาโรคเบาหวาน หมอสุพรรณ นุสกรรม

ด้านประวัติและการปฏิบัติตน

หมอสุพรรณ นุสกรรม เริ่มต้นเป็นหมอพื้นบ้านเมื่ออายุ 20 ปี โดยได้รับการสืบทอดจากบิดา ซึ่งเป็นหมอพื้นบ้านที่มีองค์ความรู้และภูมิปัญญาการรักษาพิษงูมาก่อน โดยได้รับการสืบทอดมาจากบรรพบุรุษสืบทอดจากรุ่นสู่รุ่นเป็นทอดกันมาจนถึงปัจจุบัน โดยวิธีการเรียนรู้และจดจำรวมถึงคอยสังเกตกระบวนการรักษาของบิดาในขณะนั้นซึ่งได้รับการถ่ายทอดวิชาการเป่าพิษงูและการรักษาโรคเบาหวานจากบิดาซึ่งมีผู้มารับการรักษาด้านพิษงูมากกว่าโรคเบาหวาน เมื่อมีผู้มารับการรักษาบิดาจะให้หมอสุพรรณ นุสกรรม เป็นผู้รักษาโดยอยู่ในความดูแลของบิดาด้วย เมื่อทำการรักษารายแรกอาการจากพิษงูก็หายทันที หมอสุพรรณ นุสกรรม จึงทำการยกขันธ์และทำการรักษาตลอดมา หลังจากบิดาเสียชีวิต ก่อนที่จะทำการรักษาจะต้องยกพานบูชาครูและบิดาเพื่อระลึกถึงพระคุณของบิดาที่ได้เคยสั่งสอนในการรักษา โดยยกพานขึ้นเหนือศีรษะแล้วกล่าวถึงบิดาก่อนจะทำการรักษา โดยผู้ที่มาทำการรักษาต้องทำการยกขันธ์ 5 ขึ้นเหนือศีรษะและหมอพื้นบ้านจะบริกรรมคาถาร่วมกับดึงเส้นผมของผู้ที่มารับการรักษาออกมา 1 กระจุก (ไม่ได้กำหนดจำนวนเส้นผม กล่าวเพียงว่าเป็นการดึงออกมาประมาณ 1 กระจุก) และเป่าจากส่วนบนของร่างกายลงมาข้างล่างแล้วทิ้งผมลงไป นอกจากนี้มักสวดมนต์ไหว้พระก่อนนอนเป็นประจำทุกวัน เพื่อระลึกถึงคุณพระคุณเจ้า รวมถึงพระคุณของบิดาที่ได้เคยถ่ายทอดวิชาความรู้และภูมิปัญญาให้กับตน โดยบทสวดที่สวดเป็นประจำคือ บทสวดอิติปิโส และไม่มีบทสวดเฉพาะของหมอพื้นบ้าน นอกจากนี้ยังมีข้อห้าม คือ ห้ามดื่มสุราในขณะทำการรักษา ซึ่งปกติแล้วหมอพื้นบ้านเองก็ไม่ได้ดื่มสุรา ซึ่งในระหว่างการรักษาหมอพื้นบ้านจะมีการบูชาครู คือ การยกพาน ซึ่งประกอบไปด้วยกรวยดอกไม้ 5 คู่ (ดอกไม้สีเหมือนแต่ต่างกันก็ได้) ธูป 1 ห่อ เทียน 1 กล่อง เหล้าขาวขวดเล็ก 1 ขวด น้ำหวาน เช่น น้ำส้ม น้ำแดงเป็นต้น 1 ขวด ส่วนผู้ที่มารับการรักษาเมื่อหายแล้วจะกลับมาปลงคายหรือยกครู ประกอบไปด้วยอุปกรณ์ที่เหมือนกันกับการบูชาครูของหมอพื้นบ้านและเงินตามศรัทธาของผู้นั้น แต่หากไม่มายกครูหมอพื้นบ้านก็ไม่มีอาการผิดปกติใด ๆ

ด้านองค์ความรู้และภูมิปัญญาการรักษาโรคเบาหวาน

หมอสุพรรณ นุสกรรม กล่าวว่าจะรู้ว่าผู้ที่มารับบริการเป็นโรคเบาหวานก็ต่อเมื่อมีการบอกกล่าวของผู้ที่มาทำการรักษาว่าตนเองป่วยเป็นโรคเบาหวาน ไม่มีการตรวจร่างกายแต่มีการซักประวัติเล็กน้อย เช่น เป็นมานานแล้วหรือยัง หรือชอบรับประทานอาหารที่มีรสหวานหรือไม่ หลังจากนั้นจะทำการแนะนำตำรับยาที่ใช้ในการรักษาโรคเบาหวานต่อไป โดยมีสมุนไพรที่ใช้ในการรักษาโรคเบาหวาน ดังนี้

1. ดีปลี 2. กระชาย 3. มะขามป้อม

วิธีการ

นำสมุนไพรทั้ง 3 ชนิดอย่างละประมาณเท่ากันมาต้มดื่ม โดยเติมน้ำสะอาดให้ท่วมยาแล้วต้มให้เดือด เปิดไฟกลางต้มจนกว่าจะเดือด หากน้ำแห้งให้เติมน้ำเพิ่มและต้มจนเดือดอีกครั้งแล้วดื่มแทนน้ำจนกว่ายาจะจืด ดื่มเป็นประจำจนกว่าจะรู้สึกว่าดีขึ้น

ตารางที่ 1 แสดงข้อมูลภูมิปัญญาหมอพื้นบ้านในการรักษาโรคเบาหวาน

หมอพื้นบ้าน	รูปแบบการรักษา		ยาสมุนไพรในตำรับ	วิเคราะห์สรรพคุณสมุนไพร
	ใช้สมุนไพร	ใช้มนต์คาถา		
หมออุดม แก่นเพชร	✓	✓	รากสามสิบ	แก้กระษัย แก้ขัดเบา ขับปัสสาวะ บำรุงกำลัง แก้กระษัย
			รากปลาไหลเผือก	ถ่ายพิษต่างๆ ขับถ่ายน้ำเหลือง แก้ท้องผูก ลดน้ำตาลในเลือด
			ขิง	เป็นยาขับลม กระจายลม แก้จุกเสียด แก้ไข้ตรีโทษ บำรุงธาตุ ขับลมในลำไส้และกระเพาะอาหาร
			ต้นครอบจักรวาล	แก้เบาหวาน บำรุงธาตุ บำรุงกำลัง ขับปัสสาวะ แก้ไตพิการ
			ต้นลูกใต้ใบ	ช่วยควบคุมและลดระดับน้ำตาลในเลือด ช่วยลดความดันโลหิต แก้ไข้ ลดความร้อน
หมอพุด วิชุมา	✓	✓	ขิง	เป็นยาขับลม กระจายลม แก้จุกเสียด แก้ไข้ตรีโทษ บำรุงธาตุ ขับลมในลำไส้และกระเพาะอาหาร
			มะขามป้อม	แก้ไอ ละลายเสมหะ แก้ตานซางในเด็ก แก้กระหายน้ำ ช่วยขับปัสสาวะ ลดระดับคอเลสเตอรอลในเลือด
หมอสุพรรณ นุสกรรม	✓	✓	ดีปลี	ขับลม ลดอาการไอ ระคายคอจากเสมหะ ลดอาการท้องอืดท้องเฟ้อแน่นจุกเสียด บำรุงธาตุไฟ แก้ปวดท้อง แก้คลื่นไส้อาเจียน แก้ตับพิการ บำรุงธาตุ
			กระชาย	บำรุงธาตุ แก้ไข้สันนิบาต แก้เลือด เสมหะ แก้กามตายด้าน
			มะขามป้อม	แก้ไอ ละลายเสมหะ แก้ตานซางในเด็ก แก้กระหายน้ำ ช่วยขับปัสสาวะ ลดระดับคอเลสเตอรอลในเลือด

จากตาราง พบว่า หมออุดม แก่นเพชร มีตำรับยารักษาโรคเบาหวานที่น่าสนใจเป็นอย่างมากและเหมาะกับการนำมาศึกษาวิจัยด้านประสิทธิผลของตำรับรักษาโรคเบาหวาน เนื่องจากว่ามีสมุนไพรที่หาได้ง่ายในชุมชน อีกทั้งสมุนไพรต่าง ๆ ล้วนเป็นสมุนไพรที่มีสรรพคุณลดระดับน้ำตาลในกระแสเลือด บำรุงธาตุ และช่วยเรื่องระบบขับถ่ายปัสสาวะและขับลม นอกจากนี้ยังมีหลักการในการตั้งตำรับยาที่สอดคล้องกับการตั้งตำรับยาของแพทย์แผนไทยอีกด้วย กล่าวคือ มีตัวยาที่รักษาโรคโดยตรงและมีตัวยาที่เป็นตัวยาเสริม แต่ยังไม่สามารถอธิบายเชิงลึกได้ว่าสมุนไพรตัวใดมีหน้าที่อย่างไรในตำรับ จากการวิเคราะห์ของผู้วิจัยโดยให้หมอพื้นบ้านทดสอบหยิบสมุนไพรในแต่ละชนิดจำนวน 3 ครั้ง แล้วหาค่าเฉลี่ยปริมาณสมุนไพร พบว่าสามสิบและรากปลาไหลเผือกอาจเป็นตัวยาหลักเนื่องจากมีปริมาณในตำรับมากกว่าตัวยาอื่น ส่วนตัวยารองอาจเป็นต้นครอบจักรวาลและต้นลูกใต้ใบซึ่งมีปริมาณเท่า ๆ กัน ส่วนขิงอาจเป็นตัวยาประกอบ แต่งรส หรืออาจเป็นตัวยารองก็ได้เช่นเดียวกัน โดยมีข้อคิดเห็นตรงกับประชาชนในชุมชนบ้านยะยาน ที่ได้จัดกิจกรรมเสวนากลุ่มเพื่อถอดองค์ความรู้และภูมิปัญญาในการรักษาโรคเบาหวานร่วมกับชุมชน ในวันที่ 28 เมษายน 2564 ณ โรงพยาบาลส่งเสริมสุขภาพตำบลบ้านยะยาน อำเภอศีขรภูมิ จังหวัดสุรินทร์

อภิปรายผล

จากการศึกษาภูมิปัญญาการใช้สมุนไพรในการรักษาโรคเบาหวานของหมอพื้นบ้านทั้ง 3 คน ทำให้ทราบรูปแบบและกระบวนการรักษาโรคของหมอพื้นบ้านที่หลากหลาย อีกทั้งยังมีแบบฉบับเฉพาะที่แสดงถึงวิถีชีวิตและตัวตนรวมถึงวัฒนธรรมชุมชนผ่านการรักษาซึ่งต้องอาศัยความเชื่อและความศรัทธาที่มีต่อหมอพื้นบ้าน โดยตำรับยารักษาโรคเบาหวานของหมอพื้นบ้านของหมออุดม แก่นเพชร เป็นตำรับยาที่มีความที่น่าสนใจเป็นอย่างมากและเหมาะกับการนำมาศึกษาวิจัยด้านประสิทธิผลของตำรับยารักษาโรคเบาหวาน ซึ่งประกอบไปด้วย รากสามสิบ รากปลาไหลเผือก ขิง ต้นครอบจักรวาล และต้นลูกใต้ใบ โดยมีสมุนไพรจำนวน 3 ชนิด คือ รากปลาไหลเผือก ต้นครอบจักรวาลและต้นลูกใต้ใบที่มีสรรพคุณหลักในการลดระดับน้ำตาลในกระแสเลือด ซึ่งสอดคล้องกับข้อมูลสรรพคุณสมุนไพรของฐานข้อมูลเครื่องยาสมุนไพร คณะเภสัชศาสตร์ มหาวิทยาลัยอุบลราชธานี[3] นอกจากนี้ยังมีสมุนไพรอีก 2 ชนิด คือ ขิงและรากสามสิบที่ช่วยขับลม บำรุงธาตุ บำรุงกำลังอีกด้วย อีกทั้งยังสอดคล้องกับงานวิจัยก่อนหน้าของกัญญารัตน์ จันทร์โสมและคณะ (2553) ด้านการอนุรักษ์และการสืบทอดประสบการณ์ พบว่า ได้สืบทอดภูมิปัญญาพื้นบ้านด้านการรักษาโรคต่าง ๆ ด้วยยาสมุนไพรมาจากบรรพบุรุษที่ได้จากการสังเกต การจดจำ และการปฏิบัติประกอบกับการสั่งสมเรียนรู้จากประสบการณ์การรักษาเป็นระยะเวลายาวนานและการหมั่นศึกษาหาความรู้ด้วยตนเอง

ข้อสรุป

จากการศึกษาวิจัยครั้งนี้ทำให้ทราบว่าวัฒนธรรมการดูแลสุขภาพเบื้องต้นของประชาชนในชุมชนนั้นยังมีความเชื่อในการรักษากับหมอพื้นบ้านอยู่มาก ซึ่งแต่ละหมอพื้นบ้านจะมีตำรับยาที่ใช้ในการรักษาโรคหวานที่แตกต่างกันออกไปเฉพาะตัว แต่ล้วนแล้วเป็นตำรับที่ช่วยเหลือผู้ป่วยเบาหวานให้หายจากโรคหรือมีอาการดำเนินโรคที่ดีขึ้นได้ โดยเฉพาะอย่างยิ่งตำรับยารักษาโรคเบาหวานของหมออุดม แก่นเพชร เป็นตำรับยาที่น่าสนใจเป็นอย่างมาก เนื่องจากตำรับยามีสมุนไพรที่สามารถรักษาโรคเบาหวานได้ อีกทั้งยังมีรูปแบบของตำรับยาสอดคล้องกับการตั้งตำรับยาของแพทย์แผนไทยและสอดคล้องกับความต้องการของประชาชนในชุมชนจากการจัดเสวนากลุ่มอีกด้วย หากนำตำรับยาดังกล่าวไปทำเป็นตำรับยารักษาโรคเบาหวานก็อาจช่วยดูแลสุขภาพให้กับประชาชนที่เป็นกลุ่มเสี่ยงโรคเบาหวานได้ นอกจากนี้อาจช่วยลดค่าใช้จ่ายในการรักษาทางการแพทย์แผนปัจจุบันได้ ซึ่งค่าใช้จ่ายในการรักษาพยาบาลเหล่านี้จะสามารถลดลงได้หากสามารถป้องกันไม่ให้จำนวนผู้ป่วยเบาหวานเพิ่มขึ้น ผู้ป่วยได้รับการรักษาและมีการใช้ยารักษาโรคเบาหวานที่ถูกต้องเหมาะสม เพื่อควบคุมระดับน้ำตาลในเลือดให้ได้ตามเป้าหมายซึ่งจะชะลอการเกิดโรคแทรกซ้อนจากเบาหวานในอนาคต

กิตติกรรมประกาศ

ขอขอบคุณทุนอุดหนุนการทำวิจัยจากโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏสุรินทร์เพื่อการพัฒนาท้องถิ่น ประจำปีงบประมาณ พ.ศ. 2564 ที่ได้สนับสนุนทุนอุดหนุนการวิจัยในโครงการ ซึ่งเป็นโอกาสที่ทำให้คณะผู้วิจัยได้ดำเนินการศึกษาวิจัย ซึ่งการศึกษาวิจัยครั้งนี้เป็นส่วนหนึ่งของโครงการวิจัย เรื่อง “การพัฒนาตำรับยารักษาโรคเบาหวานจากภูมิปัญญาหมอพื้นบ้านโดยการมีส่วนร่วมของชุมชน อำเภอศีขรภูมิ จังหวัดสุรินทร์” ปีงบประมาณ 2564 ขอขอบคุณมา ณ โอกาสนี้

ณัฐรี ศรีดารานนท์, (Nattaree Sridaranon)[2]
โสภา วิศิษฎ์ศักดิ์, (Sopa Visitsak)[3]

บทคัดย่อ

งานวิจัยนี้มีวัตถุประสงค์การพัฒนาวัสดุฉนวนกันความร้อนและดูดซับเสียงจากเศษหนังเทียมอุตสาหกรรมในการกระบวนการผลิตเฟอร์นิเจอร์ โดยการนำเศษหนังเทียมจากอุตสาหกรรมที่นำมาคัดแยกตัดเป็นชิ้นเล็ก และปั่นละเอียดจากเครื่องปั่นมาขึ้นรูปด้วยการอัดความร้อนเป็นแผ่นขนาด100X100มิลลิเมตร หนา10มิลลิเมตร โดยใช้เศษหนังเทียมอัดความร้อนเป็นตัวประสาน แบ่งเป็น 4ชุดการทดลอง ชุดที่1-4ความหนาแน่น 400,500,600 และ700กิโลกรัมต่อลูกบาศก์เมตร อัดด้วยเครื่องอัดร้อนที่อุณหภูมิ 200 องศาเซลเซียส การขึ้นรูปวัสดุฉนวนกันความร้อนและดูดซับเสียงจากเศษหนังเทียมที่มีความหนาแน่นจากน้อยไปมากจากชุดทดลอง ค่าสัมประสิทธิ์การนำความร้อนโดยเฉลี่ยเท่ากับ 0.05259,0.05726,0.06517และ0.07520W/m.K ตามลำดับ ค่าการนำความร้อนแปรผันตามมวล เมื่อมีมวลมากค่าการนำความร้อนมาก แต่ค่าการดูดซับเสียงได้ทำการทดลองทั้งขรุขระ และด้านเรียบของชุดทดลอง มีค่าสัมประสิทธิ์การดูดซับเสียงโดยเฉลี่ยเท่ากับ 0.43/0.24,0.34/0.20,0.26/0.16และ0.23/0.13ตามลำดับ การดูดซับเสียงแปรผกผันกับค่าการนำความร้อน เมื่อมีมวลน้อยในการดูดซับเสียงจะมีค่ามาก มีแนวโน้วที่จะพัฒนาต่อเพื่อสามารถเทียบเท่าวัสดุในท้องตลาดได้ซึ่งจะส่งผลให้เศษหนังเทียมอุตสาหกรรมสามารถใช้เป็นวัสดุทางเลือกที่เป็นมิตรกับสิ่งแวดล้อม และยังช่วยเพิ่มมูลค่าให้แก่ขยะเหลือใช้ได้เป็นอย่างดี

คำสำคัญ: หนังเทียม ,วัสดุฉนวนกันความร้อน ,วัสดุดูดซับเสียง

Abstract

The purpose of this research is the development of heat-insulating and sound-absorbing materials from industrial artificial leather scraps in the furniture production process. By bringing artificial leather scraps from the industry to be sorted and cut into small pieces and finely spun from a blender to form a sheet of100X100mm. in size10mm. thick, by using heat-compressed artificial leather scraps as a binder ,divided into 4sets of experiments, set1-4,density400,500,600 and700kilograms per cubic meter. Compressed by a hot press at 200 degrees Celsius , the forming of thermal insulation and sound absorbing materials from artificial leather scraps with a low to high density from the experimental set. The average thermal conductivity coefficients were 0. 05259,0. 05726,0. 06517 and0. 07520W/ m. K respectively. Thermal conductivity varies with mass. When there is a large mass, the thermal conductivity is high. But the sound absorption value has been tested both rough. and the smooth side of the experimental set The average sound absorption coefficient was 0. 43/ 0. 24,0. 34/ 0. 20,0. 26/ 0. 16and0. 23/ 0. 13respectively. Sound absorption is inversely proportional to thermal conductivity. When there is a small mass to absorb sound, it has a large value. There is a tendency to continue to develop to be comparable to materials in the market, which will result in industrial artificial leather scraps being used as an alternative material that is environmentally friendly. It also adds value to the waste as well.

Keywords: Artificial Leather, Insulation Material ,Sound Absorption Material

บทนำ

ประเทศไทยมีการเจริญเติบโตทางเศรษฐกิจ และจำนวนประชากรที่เพิ่มสูงขึ้นอย่างต่อเนื่อง ในเขตเมืองเริ่มมีการขยายตัวไปในชานเมือง และชนทบ จึงเป็นผลทำให้เกิดการใช้ทรัพยากรธรรมชาติเป็นจำนวนมากทั้งทางด้านอุปโภค และบริโภค วัสดุที่มีบทบาทในชีวิตประจำวัน และมีส่วนทำให้ทรัพยากรธรรมชาติมีปริมาณลดลง หนึ่งในนั้นคือหนังสัตว์ ในอดีตหนังสัตว์มีความจำเป็นและมีการนำไปใช้ในชีวิตประจำวัน เช่นใช้ในการนุ่งห่ม ตลอดจนการบุ หรือห่อหุ้มเฟอร์นิเจอร์ในบ้านพักอาศัยเพื่อทำความอบอุ่นต่อร่างกาย และเพื่อความสวยงามตลอดมา ความต้องการใช้หนังสัตว์จึงเพิ่มขึ้นอย่างต่อเนื่อง ส่งผลทำให้ปริมาณสัตว์บางชนิดลดลง และสูญพันธุ์ พร้อมทั้งยังเป็นสาเหตุให้เกิดการทารุณกรรมสัตว์ วิกฤตการณ์ดังกล่าวจึงทำให้เกิดกระแสการอนุรักษ์สัตว์ทั่วโลก ผลักดันให้เกิดการออกกฎหมายการอนุรักษ์พันธุ์สัตว์ และต่อต้านการทารุณกรรมสัตว์ของแต่ละประเทศ จึงทำให้เกิดวัสดุทดแทนจากหนังสัตว์เป็นหนังเทียม หรือหนังสังเคราะห์ซึ่งคือวัสดุที่เกิดจากการสังเคราะห์ด้วยกระบวนการทางเคมี หรือเรียกว่า โพลิเมอร์ (Polymer) โดยการนำพลาสติกที่ผลิตขึ้นจากสารประกอบ มาผลิตเป็นพลาสติกตัวใหม่ที่มีคุณสมบัติแตกต่างกันออกไป (กรีนพีช, 2004) มีขนาดเส้นเล็ก ๆ เรียงตัวกัน ในการผลิตจะมีชั้นล่างเป็นวัสดุจากผ้าสิ่งทอ และเททับด้วยโพลิเมอร์ที่มีส่วนผสมหลายอย่างกดทับเป็นลายหนัง กระบวนการผลิตในอุตสาหกรรมสิ่งทอคือ PU ,PVC และอื่น ๆ องค์ประกอบในการผลิตหนังเทียมนั้น คือพลาสติกซึ่งเป็นวัสดุทดแทนที่ใช้งานได้อย่างกว้างขวาง อย่างไรก็ตามเศษหนังเทียมจากขบวนการผลิตที่เกี่ยวข้องซึ่งส่งผลกระทบต่อสิ่งแวดล้อมมีเพิ่มขึ้นอย่างต่อเนื่อง เช่นในกระบวนการผลิตของโรงงานเฟอร์นิเจอร์แห่งหนึ่ง มีเศษหนังเทียมเกิดขึ้นที่ต้องนำไปกำจัด หรือทิ้ง หลังจากการผลิตเฟอร์นิเจอร์ประมาณ 3-5% ต่อการสั่งวัตถุดิบหนังเทียม ทำให้เกิดของเสียที่เป็นภาระในการจัดเก็บ และทำลาย การกำจัดเศษหนังเทียมจากอุตสาหกรรมก็ยิ่งก่อปัญหาขึ้นไปอีก หากนำไปเผาสารพิษจากหนังเทียมซึ่งมีส่วนประกอบของพลาสติกเป็นการปล่อยมลภาวะอันร้ายแรงสู่ชั้นบรรยากาศ หรือนำไปฝังกลบ สารพิษจากส่วนผสมของสารเติมแต่งจะหลุดออกมาปนเปื้อนแหล่งน้ำใต้ดินได้ ที่สำคัญคุณสมบัติของการย่อยสลายยาก และต้องจะใช้เวลานานนับหลายศตวรรษกว่าจะย่อยสลายได้ในธรรมชาติ กำลังเป็นปัญหาต่อสิ่งแวดล้อมที่รุนแรง (สิตาวีร์, 2560) ความกังวลของสาธารณชนเกี่ยวกับผลกระทบทางด้านลบของมลภาวะต่อสิ่งแวดล้อมยังทำให้ผู้บริโภคหันมานิยมวัสดุที่เป็นมิตรกับสิ่งแวดล้อม และผลิตภัณฑ์ที่นำกลับมาใช้ใหม่ เนื่องจากการนำกลับมาใช้ใหม่ช่วยป้องกันไม่ให้เกิดขยะหนังเทียมในระบบ จากผลกระทบต่อสิ่งแวดล้อม และชุมชนได้เป็นอย่างดี

แนวคิดที่จะนำกระบวนการที่ใช้เทคโนโลยีที่เหมาะสมแปรรูป สิ่งที่ใช้แล้ว เพื่อกลับมาเป็นผลิตภัณฑ์ใหม่ ทั้งที่อยู่ในรูปแบบเดิม หรืออาจอยู่ในรูปแบบใหม่ที่แตกต่างไปอย่างสิ้นเชิง จำเป็นที่จะต้องอาศัยกระบวนการคัดแยกโดยเฉพาะการคัดแยกตั้งแต่ต้นทาง จึงจะทำให้อุตสาหกรรมรีไซเคิลในประเทศไทยประสบผลสำเร็จ เพราะปริมาณวัสดุที่นำกลับมาใช้ใหม่จะช่วยทำ ให้ภาคธุรกิจหันมาลงทุนในอุตสาหกรรมนี้มากขึ้นในอนาคต มีการศึกษาวิจัยด้านการนำวัสดุเส้นใยธรรมชาติ เส้นใยสังเคราะห์ เส้นใยลิกโนเซลลูโลสทางการเกษตร และเศษผ้าที่ผลิตจากเส้นใยธรรมชาติกลับมาใช้ใหม่ โดยนำมาผสมกับเส้นใยสังเคราะห์เป็นวัตถุดิบในการผลิตวัสดุดูดซับเสียงที่มีต้นทุนต่ำ น้ำหนักเบา และสามารถย่อยสลายได้ทางชีวภาพ (Seddeq Hoda Soliman, Aly Nermin M, Marwa A Ali, & Elshakankery MH, 2013) นอกจากนั้นแล้วยังมีการศึกษาวิจัยด้านการนำเศษกระดาษภายในสำนักงานที่ใช้แล้วนำมากลับมาใช้ใหม่ การใช้ของเสียที่มาจากวงจรการผลิต โดยมุ่งเน้นไปที่การประเมินคุณสมบัติการดูดซับเสียงเช่นกันของแผ่นที่ทำจากกระดาษนำกลับมาใช้ใหม่ และเศษวัสดุอื่น ๆทดสอบให้ได้ค่าตามมาตรฐานสากล เพื่อผลประโยชน์ด้านสิ่งแวดล้อม และวัฏจักรชีวิตของเศษวัสดุที่นำมาทดแทนให้เป็นศูนย์ การทดสอบของวัสดุดูดซับเสียงที่เป็นนวัตกรรมใหม่เพื่อปรับปรุงประสิทธิภาพเสียงของห้องบรรยาย โดยใช้แบบจำลองอะคูสติก การเปรียบเทียบกับวัสดุแบบดั้งเดิมสำหรับทั้งด้านเสียง และด้านสิ่งแวดล้อม ในคลื่นการดูดซับเสียงในช่วงความถี่ 100-5000 Hz ดังกล่าวได้ดี (Buratti Cinzia, Belloni Elisa, Lascaro Elisa, Lopez Giovanna Anna, & Ricciardi Paola, 2016) ซึ่งแตกต่างจากการผลิตแผ่นดูดซับเสียงในท้องตลาดโดยทั่วไปที่มีรูพรุน ผลิตจากหินใยแก้วโพลียูรีเทนโพลีเอสเตอร์ ณ ปัจจุบันมีราคาค่อนข้างสูง รวมทั้งใช้พลังงานในการผลิต และมีผลกระทบต่อสิ่งแวดล้อมสูง การนำวัสดุนำกลับมาใช้ใหม่กลายเป็นทางเลือกที่น่าสนใจอีกทั้งยังเป็นการลดผลกระทบต่อสิ่งแวดล้อม

ดังนั้น งานวิจัยนี้จึงมุ่งเน้นการนำเศษหนังเทียมจากโรงงานอุตสาหกรรมกลับมาใช้ใหม่ โดยการใช้เทคโนโลยีที่เหมาะสมพัฒนาด้านการดูดซับเสียง เพื่อให้เกิดวัสดุใหม่ ที่จะช่วยส่งเสริมสภาวะแวดล้อม (ด้านเสียง) ที่ดีภายในอาคาร ตลอดจนช่วยเพิ่มมูลค่าให้กับวัสดุเหลือใช้ลดปริมาณขยะในระบบ และลดผลกระทบต่อสิ่งแวดล้อมได้

วัตถุประสงค์ของการวิจัย

1) พัฒนาวัสดุแผ่นฉนวนกันความร้อน และดูดซับเสียงจากเศษหนังเทียมอุตสาหกรรม

2) ทดสอบคุณสมบัติทางกายภาพด้านความหนาแน่น ,การนำความร้อน (ค่า k) ,การดูดซับเสียง (ค่า SAC และ NRC) และการลามไฟของแผ่นวัสดุที่ผลิตจากเศษหนังเทียม

3) เสนอแนวทางการนำไปใช้อย่างเหมาะสม

วิธีการดำเนินการวิจัย

ขอบเขตการวิจัย

1) วัสดุที่ใช้ในงานวิจัยเป็นเศษหนังเทียม PVC จากโรงงานอุตสาหกรรมการผลิตเฟอร์นิเจอร์

2) กรรมวิธีในการผลิตใช้เครื่องอัดความร้อนที่อุณหภูมิ 200 องศาเซลเซียส และกำลังอัดที่ 80 ปอนด์ต่อตารางนิ้ว เป็นเวลา 15 นาที

3) ความหนาแน่นตามมาตรฐานผลิตภัณฑ์อุตสาหกรรม (มอก.486/2527) ของแผ่นชิ้นงาน ที่มีความหนาแน่น 100 กิโลกรัมต่อลูกบาศก์เมตร สำหรับใช้งานในสภาวะแห้ง โดยงานวิจัยนี้ใช้ค่าความหนาแน่นมากกว่า 100 กิโลกรัมต่อลูกบาศก์เมตร (เป็นความหนาแน่นที่ใช้คำนวณหาปริมาณวัสดุก่อนการผลิต)

4) การผลิตตัวอย่าง ที่ใช้ในการทดลองหาค่า SAC และ NRC ขนาด 100 X 100 X 10 มิลลิเมตร

5) แผ่นวัสดุตัวอย่างที่ใช้ในการทดลองหาค่าการลามไฟขนาด 100 X 100 X 10 มิลลิเมตร

เครื่องมือที่ใช้ในการวิจัย

1.วัสดุ

1.1 เศษหนังเทียม PVC

(a) Cut Artificial Leather Scraps (b) Artificial Leather Scraps Taken in a blender (c) Molded by Digital Scale

ขั้นตอนในการวิจัย

1. การจัดเตรียมวัสดุ

โดยการจัดเตรียมวัสดุเศษหนังเทียมอุตสาหกรรมที่ได้จากร้านเฟอร์นิเจอร์

1.1 คัดแยกเศษหนังเทียม เพื่อคัดแยกลักษณะเศษหนังเทียม เพื่องานต่อการตัดเป็นชิ้นเล็กต่อไป

1.2 ตัดเป็นชิ้นขนาดเล็กขนาดประมาณ 10 X 10 มิลลิเมตร นำหนังเทียมที่ตัดเรียบร้อยแล้ว นำมาย่อยโดยการเอาเข้าเครื่องปั่นผัก และผลไม้ ระยะประมาณ 3 – 5 นาที

1.3 เตรียมแม่พิมพ์เหล็ก โดยการตัด และเชื่อมต่อเหล็กกล่องสีเหลี่ยม ขนาด 200 X 200 มิลลิเมตร ให้เป็นสี่เหลี่ยมระยะภายใน ขนาด 100 X 100 หนา 20 มิลลิเมตร

1.4 แผ่นเหล็ก ขนาด 100X100 หนา 10 มิลลิเมตร เพื่อนำมาประกบด้านบน ณ ขณะขึ้นรูปชิ้นงาน โดยเครื่องอัดแผ่นขึ้นรูปร้อนให้เป็นไปตามขนาดที่ต้องการนำมาทดสอบ

2. ออกแบบการทดลอง และการผลิต

2.1 ออกแบบการทดลอง โดยเศษหนังเทียมโดยการสับย่อยละเอียดผสมผ้าพื้นหลังหนังเทียม

2.2 ทำการผลิต โดยแบ่งเป็น 4 ชุดการทดลอง

- ชุดการทดสอบ 1 นำแบบแม่พิมพ์เหล็กขนาด 100 X 100 มิลลิเมตร หนา 20 มิลลิเมตร ใส่เศษหนังเทียมน้ำหนัก 40 กรัม (400 กก./ลบ.ม) และกดทับด้วยแผ่นเหล็ก ขนาด 100 X 100 หนา 10 มิลลิเมตร พร้อมเครื่องกดทับความร้อนอุณหภูมิ 200 องศาเซลเซียส ระยะเวลา 15 นาที พร้อมถอดแบบของชุดการทดลองที่ 1

- ชุดการทดลอง 2 นำแบบแม่พิมพ์เหล็กขนาด 100 X 100 มิลลิเมตร หนา 20 มิลลิเมตร ใส่เศษหนังเทียมน้ำหนัก 50 กรัม (500 กก./ลบ.ม) และกดทับด้วยแผ่นเหล็ก ขนาด 100 X 100 หนา 10 มิลลิเมตร พร้อมเครื่องกดทับความร้อนอุณหภูมิ 200 องศาเซลเซียส ระยะเวลา 15 นาที พร้อมถอดแบบของชุดการทดลองที่ 2

- ชุดการทดลอง 3 นำแบบแม่พิมพ์เหล็กขนาด 100 X 100 มิลลิเมตร หนา 20 มิลลิเมตร ใส่เศษหนังเทียมน้ำหนัก 60 กรัม (600 กก./ลบ.ม) และกดทับด้วยแผ่นเหล็ก ขนาด 100 X 100 หนา 10 มิลลิเมตร พร้อมเครื่องกดทับความร้อนอุณหภูมิ 200 องศาเซลเซียส ระยะเวลา 15 นาที พร้อมถอดแบบของชุดการทดลองที่ 3

- ชุดการทดลอง 4 นำแบบแม่พิมพ์เหล็กขนาด 100 X 100 มิลลิเมตร หนา 20 มิลลิเมตร ใส่เศษหนังเทียมน้ำหนัก 70 กรัม (700 กก./ลบ.ม) และกดทับด้วยแผ่นเหล็ก ขนาด 100 X 100 หนา 10 มิลลิเมตร พร้อมเครื่องกดทับความร้อนอุณหภูมิ 200 องศาเซลเซียส ระยะเวลา 15 นาที พร้อมถอดแบบของชุดการทดลองที่ 4

Table 1 Set of Experiments 1, 2, 3 and 4 Industrial Artificial Leather Scraps (Unit : Gram)

Set of Experiments	Size millimeter	Density (kg./m³)	Dry Material Weight (gram)	Hot Press (C°)	Time (minute)	Unit (sheet)
1	100 X 100 X 10	400	40	200	15	15
2	100 X 100 X 10	500	50	200	15	15
3	100 X 100 X 10	600	60	200	15	15
4	100 X 100 X 10	700	70	200	15	15

3 ขั้นตอนการขึ้นรูปแผ่นวัสดุตัวอย่าง

- นำเศษหนังเทียมที่ได้คัดแยก ,ตัด และเข้าเครื่องปั่นเป็นที่เรียบร้อยแล้ว

- นำเศษหนังเทียมใส่แม่พิมพ์เหล็กตามขนาดที่ต้องการทดสอบ โดยมีขนาดแม่พิมพ์ทรงสี่เหลี่ยม 100 X 100 X 20 มิลลิเมตร เพื่อกำหนดอัตราความหนาแน่นของแผ่นในการทดลองการนำความร้อน การทดลองการดูซับเสียง และการทดลองการลามไฟ

- นำเข้าเครื่องอัดความร้อน และใช้แผ่นเหล็กกดทับเพิ่มเติม ขนาด 100 X 100 X 10 มิลลิเมตร เพื่อกำหนดอัตราความหนาแน่นของแผ่นของแต่ละชุดการทดสอบ ซึ่งอุณหภูมิที่ใช้ เท่ากับ 200 องศาเซลเซียส และกำลังอันที่ 80 ปอนด์ต่อตารางนิ้ว ระยะเวลาที่ใช้ในการอัด 15 นาที

- นำเศษหนังเทียบที่อัดแล้ว ทิ้งไว้ให้หายร้อน และรอเศษหนังเทียมให้เกาะตัวกันประมาณ 3 – 5 นาที แล้วถึงนำเศษหนังเทียมออกจากแม่แบบ และนำไปทดสอบในกระบวนการทดสอบที่ได้กำหนดไว้ต่อไป

(a) Hot Press (b) Thermal Insulation and Sound Absorption Board

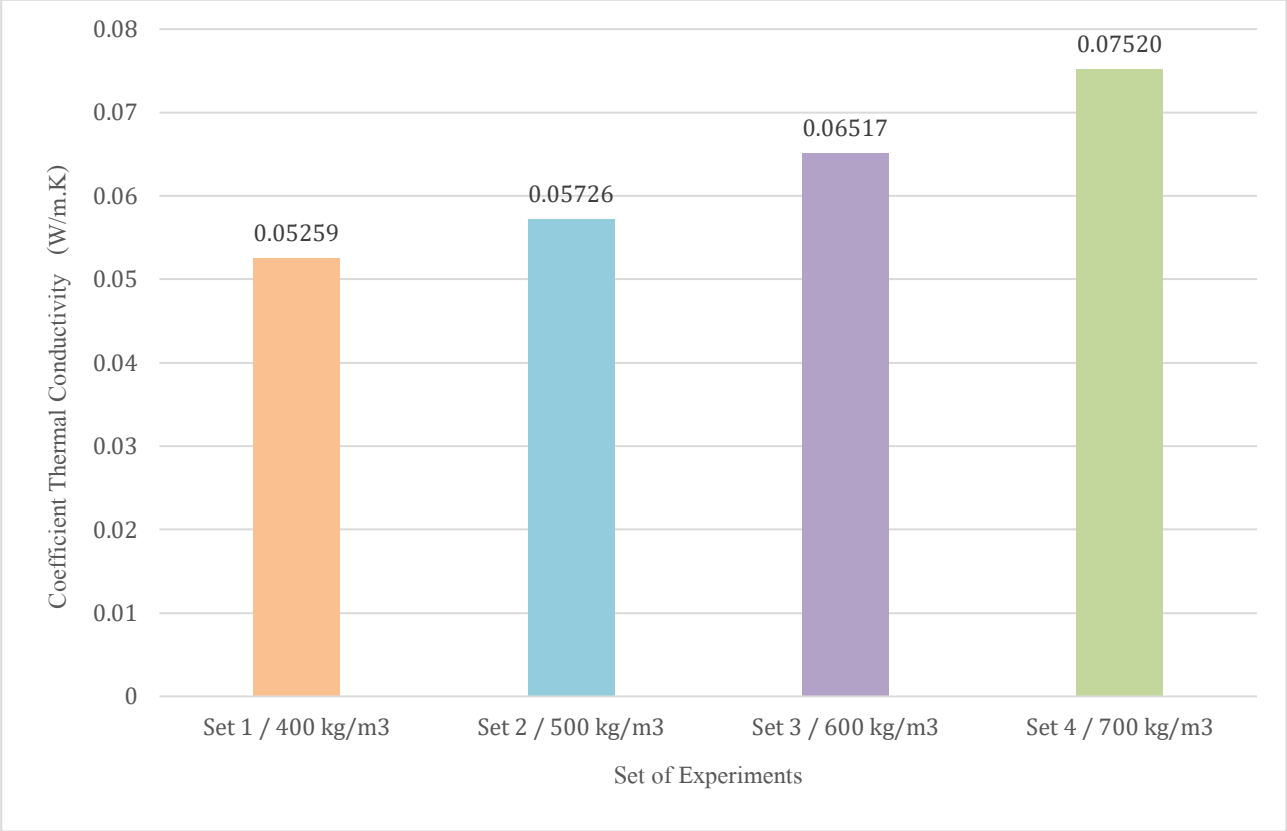
Figure 3 Molded using Hot Press

หลังจากการขึ้นรูปแผ่นฉนวนกันความร้อน และดูดซับเสียงจากเศษหนังเทียมอุตสาหกรรม การทดลองด้านกายภาพไปชั่งน้ำหนัก และวัดขนาดของแผ่น เพื่อคำนวณหาความหนาแน่นที่ผลิตได้จริง นำเข้าเครื่องทดลองการนำความร้อน (Heat Flow Meter Instrument) เพื่อนำหาค่าสัมประสิทธิ์การนำความร้อน การทดลองด้านดูดซับเสียง โดยชุดทดลองคุณสมบัติทางเสียงของวัสดุ (Impedance Tube) ในคลื่นความถี่ต่าง ๆ ของแต่ละความถี่ของคลื่นเสียงตั้งแต่ 1 - 5000 Hz และท้ายสุดนำเข้าเครื่องทดลองการลามไฟ ของแต่ละชุดการทดลอง หลังจากนั้นจึงนำตัวเลขแสดงผลของการทดลองต่าง ๆ มาสรุปหาประสิทธิ์ภาพ เพื่อการพัฒนานำไปใช้งานต่อไป

สรุปผลการวิจัย

ผลการขึ้นรูปแผ่นตัวอย่าง

การทดลองขึ้นรูปการณ์ขึ้นแผ่นดูดซับเสียงจากเศษหนังเทียมอุตสาหกรรม ขนาด 100 X 100 X 10 มิลลิเมตร ความหนาแน่นที่ใช้เริ่มตั้งแต่ 400 ,500 ,600 และ 700 กิโลกรัมต่อลูกบาสก์เมตร แผ่นตัวอย่างพบว่าขึ้นรูป และมีความคงรูปได้ ทั้ง 4 ชุดการทดลอง หลังจากได้นำชุดทดสอบออกจากแม่พิมพ์ จากการได้สังเกตุทางกายพบว่าไม่มีการหลุดลุ่ย ผิวด้านบนของชุดทดลองจะมีลักษณะเป็นรูพรุน ส่วนผิวด้านล่างจะมีลักษณะค่อนข้างเรียบ หลังจากที่ได้นำชุดทดลองออกจากเครื่องแผ่นขึ้นรูปร้อน และเมื่อปล่อยให้แผ่นชุดทดสอบดังกล่าวคลายความร้อนตามอุณหภูมิห้อง พบว่าแผ่นสามารถหักงอได้



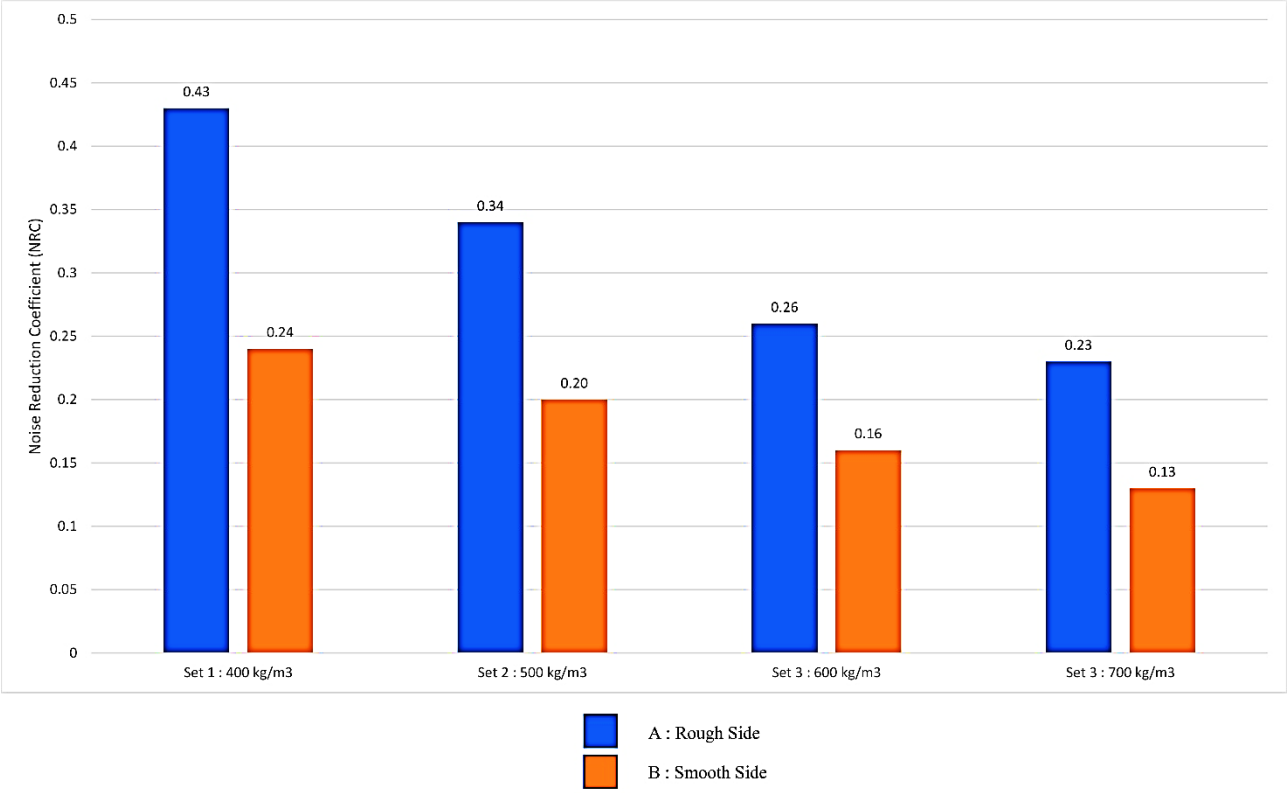
ผลการทดลองความหนาแน่น

ลักษณะทางกายภาพหลังจากได้ทำการทดลองขึ้นรูปแผ่นดูดซับเสียงเศษหนังเทียมจากอุตสาหกรรม ตามชุดทดลอง ขนาด 100 X 100 X 10 มิลลิเมตร ทั้งหมด 4 ชุด แต่ละชุดทดลองจำนวน 6 แผ่น /ชุด ได้แก่ชุดการทดลอง 1 ความหนาแน่น 400 กก./ลบ.ม. ,ชุดการทดลอง 2 ความหนาแน่น 500 กก./ลบ.ม. ,ชุดการทดลอง 3 ความหนาแน่น 600 กก./ลบ.ม. และชุดการทดลอง 4 ความหนาแน่น 700 กก./ลบ.ม. โดยแผ่นมีน้ำหนัก และความหนาแน่นเฉลี่ย 39.27 กรัม /384.43 กก/ลบ.ม., 49.13 กรัม /483.19 กก/ลบ.ม., 59.44 กรัม /587.04 กก/ลบ.ม. และ 69.62 กรัม /683.79 กก/ลบ.ม. ตามลำดับ ได้ทำการคัดเลือกทางกายภาพภายนอกของชุดทดสอบดังกล่าว โดยคำนึงถึงความสวยงาม แข็งแรง มีความคงรูปได้ ของชุดทดลอง เพื่อง่ายต่อการใช้ในการพัฒนางานวิจัยของวัสดุดูดซับเสียงจากเศษหนังเทียมจากอุตสาหกรรมต่อไป

ผลการทดลองการนำความร้อน (k)

จาการนำชุดทดลองแผ่นบุผนังวัสดุดูดซับเสียงเศษหนังเทียมจากอุตสาหกรรม ขนาด 100 X 100 X 10 มิลลิเมตร แต่ละชุดทดลองจำนวน 3 แผ่น / ชุด ชุดทดลอง 1 ,2 ,3 และ 4 ผลการทดลองค่าสัมประสิทธิ์การนำความร้อน (k) จากชุดทดลองทั้ง 4 ชุด พบว่า

Table 2 Compare the Thermal Conductivity Test Results of The Experimental Set.



จากการทดลองตามมาตรฐาน ASTM C518 เปรียบเทียบผลการทดสอบค่าการนำความร้อนของชุดทดลอง 1 ,2 ,3 และ 4 การนำความร้อนของแผ่นชุดทดลองทั้ง 4 ความหนาแน่นที่ต่างกัน มีค่าสัมประสิทธิ์การนำความร้อนโดยเฉลี่ยเท่ากับ 0.05259 ,0.05726 ,0.06517 และ 0.07520 W/m.K ตามลำดับ

ผลการทดลองค่าการดูดซับเสียง

จากการนำชุดทดลองแผ่นบุผนังวัสดุดูดซับเสียงเศษหนังเทียมจากอุตสาหกรรม ขนาดเส้นผ่านศูนย์กลาง 98 มิลลิเมตร หนา 10 มิลลิเมตร จำนวน 3 แผ่น/ชุด และขนาดเส้นผ่านศูนย์กลาง 28 มิลลิเมตร หนา 10 มิลลิเมตร จำนวน 3 แผ่น/ชุด ชุดทดลอง 1 ,2 ,3 และ 4 ทั้งผิวด้าน A ของชุดทดลองจะมีลักษณะเป็นรูพรุน ส่วนผิวด้าน B จะมีลักษณะค่อนข้างเรียบ ผลการทดลองค่าสัมประสิทธิ์ของการลดเสียง จากชุดทดลองทั้ง 4 ชุด พบว่า

Table 3 Compare the Test Results of The Noise Reduction Coefficient.

ผลการทดลองค่าการลดเสียงของชุดทดลอง 1 ,2 ,3 และ 4 การดูดซับเสียงของแผ่นชุดทดลองทั้ง 4 ความหนาแน่นที่ต่างกัน มีค่าสัมประสิทธิ์การลดเสียงโดยเฉลี่ยทั้งด้าน A และด้าน B เท่ากับ 0.43 /0.24 ,0.34 /0.20 ,0.26 /0.16 และ 0.23 /0.13 ตามลำดับ

ผลการทดลองการลามไฟ

แผ่นทดลอง ขนาด 100 X 100 X 10 มิลลิเมตร ตามอัตราความหนาแน่นของแผ่นทดลองทั้งหมด 4 ชุดทดสอบ ได้แก่ ชุดทดลอง 1 ความหนาแน่น 400 กก./ลบ.ม. ,ชุดทดลอง 2 ความหนาแน่น 500 กก./ลบ.ม. ,ชุดทดลอง 3 ความหนาแน่น 600 กก./ลบ.ม. และชุดทดลอง 4 ความหนาแน่น 700 กก./ลบ.ม. โดยแต่ละชุดได้มีการแบ่งเป็นชุดการทดลองย่อย ชุดการทดลองที่ไม่ได้ผสมสารหน่วงไฟ ผลการลามไฟจากชุดทดสอบทั้ง 4 ชุด ผลการทดลอง จะเห็นได้ว่าแผ่นชุดทดสอบ 1 ,2 ,3 และ 4 ผลการทดสอบ Positive หรือ ชุดทดสอบลามไฟตามมาตรฐาน ISO 11925 เนื่องจากชุดทดลองเกิดการเผาไหม้ และปล่อยสาร CO2 (คาร์บอนไดออกไซด์) อย่างต่อเนื่อง จึงทำการหยุดการทดสอบ เพราะมีการเผาไหม้อย่างต่อเนื่อง โดยไม่มีทีท่าจะหยุดเผาไหม้เอง จึงไม่สามารถระบุ เวลาทั้งหมด ในการทดสอบทั้งหมดได้

อภิปรายผลการวิจัย

สรุปผลการขึ้นรูปแผ่นตัวอย่าง

จากการทดลองขึ้นรูปการณ์ขึ้นแผ่นดูดซับเสียงจากเศษหนังเทียมอุตสาหกรรมทั้ง 4 ชุดการทดลอง ขนาด 100 X 100 X 10 มิลลิเมตร ได้ทำการคัดเลือกทางกายภาพภายนอกของชุดทดลองดังกล่าว โดยคำนึงถึงความสวยงาม แข็งแรง มีความคงรูปได้ ของชุดทดลอง เพื่อง่ายต่อการใช้ในการพัฒนางานวิจัยของวัสดุฉนวนกันความร้อน และดูดซับเสียงจากเศษหนังเทียมจากอุตสาหกรรมต่อไปได้ทั้ง 4 ชุดทดลอง ของแต่ละความหนาแน่น

สรุปผลการทดลองค่าความหนาแน่น

จากการนำแผ่นตัวอย่างไปหาค่าความหนาแน่น พบว่าทุกชุดทดลองทั้ง 4 ชุดการทดลอง การทดลองค่าความหนาแน่นตามมาตรฐานผลิตภัณฑ์อุตสาหกรรม (มอก. 486-2527 มอก. 487-2526) ของแผ่นวัสดุดูดซับเสียง ที่มีความหนาแน่น 32 ,48 และ 100 กก./ลบ.ม. ของผลิตภัณฑ์ในท้องตลาด สำหรับใช้งานทั่วไปในสภาวะแห้ง โดยแต่ละชุดการทดลองมีค่าความหนาแน่นมากกว่ามาตรฐานผลิตภัณฑ์อุตสาหกรรม และผลิตภัณฑ์ในท้องตลาด โดยใช้ความหนาแน่นตั้งแต่ 400 ,500 ,600 และ 700 กก./ลบ.ม. นำมา

ผลิตเป็นชุดทดลองตามลำดับ เนื่องจากได้ทำการทดลองขึ้นรูปตัวอย่างตั้งแต่ความหนาแน่น 50 ,100 ,150 ,200 ,300 ,400 ,500 ,600 และ 700 กก./ลบ.ม.

จากการทดลองการขึ้นรูปแผ่นวัสดุฉนวนกันความร้อน และดูดซับเสียงจากเศษหนังเทียมอุตสาหกรรม ขนาด 100 X 100 X 10 มิลลิเมตร ได้ทำการคัดเลือกทางกายภาพภายนอกของชุดทดสอบดังกล่าว โดยคำนึงถึงความสวยงาม แข็งแรง มีความคงรูปได้ของชุดทดลอง เพื่อง่ายต่อการใช้ในการพัฒนางานวิจัยของวัสดุฉนวนกันความร้อน และดูดซับเสียงจากเศษหนังเทียมจากอุตสาหกรรมต่อไป

สรุปผลการทดลองการนำความร้อน (k)

จากการทดสอบตามมาตรฐาน ASTM C518 ชุดทดลอง A ,B ,C และ D การนำความร้อนของแผ่นชุดทดสอบทั้ง 4 ความหนาแน่นที่ต่างกัน มีค่าสัมประสิทธิ์การนำความร้อนโดยเฉลี่ยเท่ากับ 0.05259(± 0.00718) ,0.05726(± 0.00129) ,0.06517(± 0.00129) และ 0.07520(± 0.01110) W/m.K ตามลำดับ โดยการนำความร้อนของชุดการทดสอบ D มีค่าการนำความร้อนสูงสุด ซึ่งเกิดจากการมีมวล และความหนาแน่นมากที่สุด พร้อมทั้งแผ่นวัสดุดังกล่าว ไม่มีการหลุดลุ่ย มีความแข็งมากจากชุดทดสอบอื่น ๆ มาก มีรูพรุนเริ่มลดน้อยลงมาก หรือแถบจะไม่มีรูพรุน จึงเป็นสามเหตุที่ทำให้ชุดทดสอบ D มีค่าการนำความร้อนสูงสุด และชุดทดสอบ A มีมวล และความหนาแน่นน้อยที่สุด พร้อมทั้งแผ่นวัสดุดังกล่าว ไม่มีการหลุดลุ่ย มีความเป็นรูพรุนมากที่สุด มีค่าการนำความร้อนต่ำที่สุด แต่อย่างไรก็ตาม พบว่าแผ่นทดสอบของทั้ง 4 ชุด มีค่าการนำความที่ใกล้เคียงกัน โดยสัมประสิทธิ์การนำความร้อนแปรผันตามมวล และความหนาแน่นของแผ่นทดสอบ ซึ่งแผ่นชุดทดสอบทั้ง 4 ชุด นำค่าการนำความร้อนมาเปรียบเทียบกับค่ามาตรฐานของแผ่นฉนวนป้องกันความร้อน ซึ่งมาตรฐานดังกล่าวให้ค่าไว้ที่ระหว่าง 0.02 – 0.40 W/m.K ชุดทดสอบทั้ง 4 อยู่ในเกณฑ์ดังกล่าว การทดสอบมีค่าการนำความร้อนเฉลี่ยที่ต่ำ จึงสามารถเป็นฉนวนในการกันความร้อนได้

สรุปผลการทดลองค่าการดูดซับเสียง

จากการทดลองตามมาตรฐาน ISO 10534-2 ผลการดูดซับเสียงของชุดทดลอง 1 ,2 ,3 และ 4 การดูดซับเสียงของแผ่นชุดทดลองทั้ง 4 ความหนาแน่นที่ต่างกัน มีค่าสัมประสิทธิ์การลดเสียงโดยเฉลี่ยทั้งด้านบน และด้านหลังเท่ากับ 0.43 / 0.24 ,0.34 / 0.20 ,0.26 / 0.16 และ 0.23 / 0.13 ตามลำดับ โดยการดูดซับเสียงของชุดการทดลองที่ 1 มีค่าการดูดซับเสียง ซึ่งเกิดจากการมีมวล และความหนาแน่นน้อยที่สุด พร้อมทั้งแผ่นวัสดุดังกล่าว ไม่มีการหลุดลุ่ย มีความอ่อนนุ่มมากกว่าชุดทดสอบอื่น ๆ แผ่นทดสอบมีรูพรุนเป็นจำนวนมาก จึงเป็นสาเหตุที่ทำให้ชุดทดลองที่ 1 มีค่าสัมประสิทธิ์การดูดซับเสียงมากที่สุด ส่วนชุดทดลองที่ 4 มีมวล และความหนาแน่นมากที่สุด พร้อมทั้งแผ่นวัสดุดังกล่าว ไม่มีการหลุดลุ่ย มีความเป็นรูพรุนน้อยที่สุด หรือแถบจะไม่มีรูพรุน มีค่าสัมประสิทธิ์การดูดซับเสียงต่ำที่สุด แต่อย่างไรก็ตาม พบว่าแผ่นทดสอบของทั้ง 4 ชุด มีค่าการนำความที่ใกล้เคียงกัน โดยค่าสัมประสิทธิ์การดูดซับเสียงแปรผันตามมวล ,ความหนาแน่น และความมีรูพรุนของแผ่นทดสอบ ซึ่งแผ่นชุดทดสอบทั้ง 4 ชุด ค่าสัมประสิทธิ์การลดเสียงมาเปรียบเทียบกับค่ามาตรฐานของแผ่นวัสดุลดเสียง โดยทั่วไปจะต้องมีค่ามากกว่า 0.40 ซึ่งชุดทดสอบดังกล่าวทั้ง 4 มีชุดทดสอบที่ 1 ด้าน A อยู่ในเกณฑ์มาตรฐานของวัสดุดูดซับเสียงในท้องตลาด ส่วนชุดทดสอบที่ 1 ด้าน B และชุดทดสอบที่ 2 ,3 และ 4 ทั้งด้าน A และ B ไม่อยู่ในเกณฑ์ดังกล่าว การทดสอบมีค่าสัมประสิทธิ์การลดเสียงเฉลี่ยที่ต่ำ จึงควรมีการพัฒนาต่อยอดงานวิจัยดังกล่าวให้ได้ค่าสัมประสิทธิ์การลดเสียงตามผลิตภัณฑ์อุตสาหกรรม และผลิตภัณฑ์ในท้องตลาดต่อไป

สรุปผลการทดสอบการลามไฟ

จากการนำแผ่นตัวอย่างไปหาค่าการลามไฟ ของแผ่นชิ้นตัวอย่างทั้งหมด 4 ชุดการทดสอบที่ใช้เศษหนังเทียมที่ไม่ได้ผสมสารกันไฟ

โดยมีผลการทดสอบที่ใช้เศษหนังเทียมที่ไม่ได้ผสมสารกันไฟ มีค่าการลามไฟของแผ่นทดสอบทั้งหมด ชุดการทดสอบ ซึ่งแผ่นทดสอบตัวอย่างทั้ง 4 ชุดติดไฟตั้งแต่ 1 วินาทีแรก จากผลการทดสอบ Positive หรือ ชุดทดสอบลามไฟตามมาตรฐาน ISO 11925 เนื่องจากชุดทดสอบเกิดการเผาไหม้ และปล่อยสาร CO2 (คาร์บอนไดออกไซด์) อย่างต่อเนื่อง จึงทำการหยุดการทดสอบ ไม่สามารถระบุ เวลาทั้งหมด ในการทดสอบทั้งหมดได้

ข้อเสนอแนะ

งานวิจัยนี้ได้ศึกษาเบื้องต้น ในการนำเศษหนังเทียมจากอุตสาหกรรมจากร้านเฟอร์นิเจอร์ ที่เป็นวัสดุเหลือใช้ มาผลิตแผ่นเศษหนังเทียมในอัตารส่วนที่เหมาะสม เพื่อผลิตเป็นแผ่นเศษหนังเทียมจากอุตสาหกรรมต้นแบบ ผู้ที่สนใจสามารถนำไปพัฒนาเพื่อต่อยอดแผ่นผนังเศษหนังเทียมจากอุตสาหกรรม ในรูปแบบอื่น ๆ เพื่อที่จะนำไปใช้ได้จริง ซึ่งมีผลการศึกษา และทดลองนี้มีข้อเสนอแนะดังนี้

1. จากการทดสอบการที่ได้เศษหนังเทียมจากร้านเฟอร์นิเจอร์ ทำให้ได้เศษผ้าที่มีลักษณะสีตามการจ้างของผู้ว่าจ้าง ไม่สามารถเลือกตามผู้วิจัยต้องการได้ จึงเห็นสมควรหาเศษหนังเทียมจากแห่งอื่น นำมาผสมในการผลิต

2. จากผลการชุดทดสอบการดูดซับเสียง ขนาด 10.0 X 10.0 X 1.0 เซนติเมตร ซึ่งความหนา 1 เซนติเมตร ความสามรถในการดูดซับเสียงไม่ถึงเกินมาตรฐาน จึงเห็นสมควรเพิ่มความหนาของชุดทดสอบ โดยที่น่าจะมีการทดสอบเพื่อหาค่าการดูดซับเสียง อาจเป็นการเพิ่มความสามารถในการดูดซับเสียงให้ถึงมาตรฐานในท้องตลาดได้

3. พัฒนารูปแบบของแผ่นในลักษณะต่าง ๆ ในเรื่องของขนาด และการติดตั้งในการนำไปใช้

บทคัดย่อ

งานวิจัยนี้ได้ศึกษาสังเคราะห์พัฒนาการเตรียมน้ำแป้งที่มีอนุภาคนาโนซิงค์ออกไซด์เป็นตัวออกฤทธิ์ต้านเชื้อราบนผ้าไทย อนุภาคนาโนซิงค์ออกไซด์เตรียมด้วยวิธีการด้วยวิธีตกตะกอน เพราะเป็นวิธีที่ง่าย และไม่ต้องอาศัยเครื่องมือทางวิทยาศาสตร์มาก โดยวิธีการตกตะกอนจะใช้ซิงค์ไนเตรทเป็นสารตั้งต้น ใช้โซเดียมไฮดรอกไซด์เป็นสารตกตะกอนร่วม และใช้น้ำแป้งเป็นสารช่วยความเสถียร โดยมีปริมาณซิงค์ออกไซด์ ที่ศึกษา ได้แก่ 35 %wt, 50 %wt และ 65 %wt ผล FTIR SEM XRD ช่วยยืนว่าสามารถสังเคราห์น้ำแป้งนาโนซิงค์ออกไซด์ได้เป็นผลสำเร็จ จากการทดสอบการยับยั้งการเจริญของจุลินทรีย์โดย broth microdilution method โดยหาค่า MIC (minimum inhibitory concentration) และ MBC (minimum bactericidal concentration) พบว่าน้ำแป้งนาโนซิงค์ออกไซด์ทั้งสามอัตราส่วนสามารถยับยั้งการเจริญเติบโตของเชื้อ ***Candida albicans ATCC 10231*** ได้อย่างมีประสิทธิภาพ และการทดสอบการยับยั้งการเจริญของเชื้อ ***Candida albicans ATCC 10231*** โดย agar diffusion method พบว่าผ้าไหมผ่านการทาเส้นยืนด้วยน้ำแป้งนาโนซิงค์ออกไซด์ก็สามารถยับยั้งการเจริญเติบโตของเชื้อ ***Candida albicans ATCC 10231*** ได้อย่างมีนัยสำคัญ วิธีนี้จึงเป็นวิธีที่มีประสิทธิภาพนอกจากจะทำให้เส้นยืนมีการยึดติดกันแล้วยังสามารถยับยั้งการเจริญเติบโตของเชื้อราได้อีกด้วย

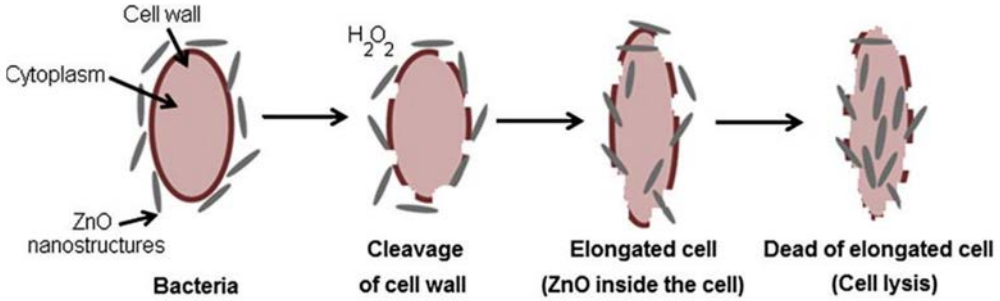
คำสำคัญ : นาโนซิงค์ออกไซด์, น้ำแป้ง, คุณสมบัติต้านเชื้อรา, ผ้าไทย, ***Candida albicans ATCC 10231***

Abstract

In this research, we have been synthesized and developed the starch water containing zinc oxide nanoparticles as an antifungal agent on Thai fabrics. Zinc oxide nanoparticles were prepared by sedimentation method. Because it is a simple method and does not require many scientific tools. By the precipitation method, zinc nitrate is used as a substrate, Sodium hydroxide was used as a co-coagulant and starch water was used as a stabilizer. For testing, the amount of zinc oxide was 35 %wt, 50 %wt and 65 %wt. The FTIR SEM XRD results confirmed the successful synthesis of starch water containing zinc oxide nanoparticles. Microbial growth inhibition test by broth microdilution method by finding MIC (minimum inhibitory concentration) and MBC (minimum bactericidal concentration). It was found that starch water containing zinc oxide nanoparticles all three ratios it can effectively inhibit the growth of *Candida albicans ATCC 10231*. For growth inhibition test of *Candida albicans ATCC 10231* by agar diffusion method, it was found that the silk painted on the warp with starch water containing zinc oxide nanoparticles was able to significantly inhibit the growth of *Candida albicans ATCC 10231*. This method is effective to make the silk threads stick together and inhibits the growth of fungi.

Keywords: nano zinc oxide, starch water, antifungal properties, Thai fabrics, ***Candida albicans ATCC 10231***

บทนำ



ผ้าไทย อาทิเช่น ผ้าฝ้าย ผ้าไหม หรือลินิน เป็นมรดกอันทรงคุณค่าทางวัฒนธรรมและทางภูมิปัญญาของคนไทยที่ได้มีการพัฒนาขั้นตอนการผลิตและสร้างสรรค์ลวดลายที่บ่งชี้ถึงความงดงามของวัฒนธรรมและประเพณีของแต่ละท้องถิ่น มรดกนี้ได้มีการ

ถ่ายทอดและพัฒนาอย่างต่อเนื่องสืบต่อกันมาจากรุ่นสู่รุ่นจนถึงปัจจุบัน อีกทั้งผ้าไทยเหล่านี้ยังได้รับความนิยมและความสนใจจากชาวต่างชาติและทำรายได้ให้กับประเทศไทยมากกว่าพันล้านบาทต่อปี โดยผ้าไทยที่มีการถักทอแบบดั้งเดิมและทำจากเส้นใยธรรมชาติ จำพวกไหม (silk) และฝ้าย (cotton) ได้รับความนิยมมากที่สุด นอกจากนี้แล้ว งานด้านศิลปหัตถกรรมไทยยังเป็นที่สนพระทัยของสมเด็จพระเจ้าลูกเธอเจ้าฟ้าสิริวัณณวรี นารีรัตนราชกัญญา ที่ทรงให้ความสำคัญการอนุรักษ์ภูมิปัญญาท้องถิ่นในด้านหัตถศิลป์สืบทอดเจตนารมณ์ของสมเด็จพระพันปีหลวง ทรงให้การสนับสนุน ส่งเสริมและอนุรักษ์ศิลปหัตถกรรมไทยของกลุ่มทอผ้าไทยในทุกภาค ยังผลให้เกิดเป็นรายได้แก่ชาวบ้านและสามารถประกอบเป็นอาชีพที่ยั่งยืน และสานต่อด้านการอนุรักษ์ผ้าทอพื้นเมือง อันทรงคุณค่ายิ่งไว้บนผืนแผ่นดินไทยสืบต่อไป

ผ้าไหมเป็นตัวอย่างหนึ่งของผ้าไทยที่ได้รับความนิยมและถูกใช้กันอย่างแพร่หลาย ครูศิลป์ ครูช่างได้นำผ้าไหมมาประดิษฐ์เป็นเครื่องนุ่งห่ม เช่น เสื้อ กางเกง กระโปรง และเครื่องใช้ในชีวิตประจำวัน เช่น กระเป๋า ผ้าพันคอ เป็นต้น ในกระบวนการทอผ้าไหมต้องอาศัยครูศิลป์ ครูช่างที่มีความประณีตและความชำนาญในการทอ เพื่อให้ได้ผ้าไหมที่มีคุณภาพและลวดลายที่วิจิตรสวยงามโดยลวดลายจะสะท้อนวิถีชีวิตและการดำรงชีพของแต่ละท้องถิ่น ในขั้นตอนการทอผ้าไหมตามกระบวนการดั้งเดิมนั้น ผู้ทอจะหวีเส้นยืนด้วยน้ำแป้งหรือน้ำข้าวที่ได้จากการแช่ข้าวสวยในน้ำ ซึ่งจะทำหน้าเป็นกาวเพื่อยึดเส้นยืนให้เป็นเส้นเดียวกัน ทำให้ง่ายต่อการทอและได้ผ้าไหมหลังจากทอเสร็จที่มีความหนาและแน่น หลังจากทอเสร็จ ผู้ทอจะนำผ้าไหมที่ทอได้ไปซักด้วยน้ำเปล่าหรือน้ำยาปรับผ้านุ่มเพื่อกำจัดแป้งออกจากผ้าไหม แต่เนื่องจากแป้งเป็นพอลิแซ็กคาไรด์ที่ละลายน้ำได้น้อยมากๆ ทำให้การล้างด้วยน้ำหรือแช่ด้วยน้ำยาปรับผ้านุ่มไม่สามารถกำจัดออกได้หมด ทำให้ผ้าไหมที่ทอได้มีความแข็งกระด้าง และเมื่อมีการนำผ้าไหมที่ทอโดยกระบวนการใช้น้ำแป้งไปเก็บในตู้เสื้อผ้าที่มีความชื้นสูงเป็นเวลานานแป้งที่ติดอยู่ในเส้นไหมจะเหนี่ยวนำให้เกิดเชื้อราบนผ้าไหม โดยแป้งที่อยู่ในผ้าจะเป็นแหล่งอาหารให้ และเชื้อจุลชีพอื่นๆ ในการเติบโต ซึ่งจะทำให้ผ้าไหมเสื่อมราคา และคุณภาพ

ดังนั้น ผู้วิจัยจึงมองเห็นความสำคัญในการพัฒนาน้ำแป้งที่ใช้หวีเส้นยืนในกระบวนการทอผ้าไหมให้มีคุณสมบัติในการต้านหรือป้องกันหรือเชื้อจุลชีพอื่นๆ ทั้งนี้เพื่อให้ผ้าไหมสามารถเก็บไว้ได้เป็นเวลานานโดยไม่เกิดเชื้อราและเพื่อเพิ่มมูลค่าของผ้าไหมไทย ซึ่งการพัฒนาการเตรียมน้ำแป้งที่มีคุณสมบัติต้านในผ้าไหมไทยนี้เป็นงานวิจัยใหม่ ไม่มีการวิจัยมาก่อน โดยผู้วิจัยจะพัฒนาการเตรียมน้ำแป้งที่มีอนุภาคนาโนซิงค์ออกไซด์เป็นตัวออกฤทธิ์ต้านและเชื้อจุลชีพ เหตุผลที่ผู้วิจัยเลือกอนุภาคนาโนซิงค์ออกไซด์เป็นตัวออกฤทธิ์ต้านและเชื้อจุลชีพ เพราะซิงค์ออกไซด์ (ZnO) ของอนุภาคนาโนจะเกิดการแตกตัวให้อนุมูลอิสระของ $^{\bullet}O_2^-$ และ $^{\bullet}OH$ ซึ่งอนุมูลอิสระเหล่านี้จะทำปฏิกิริยากับสารอินทรีย์สารบนผนังเซลล์ของหรือจุลชีพ ทำให้เกิดการตายของเซลล์หรือจุลชีพ กลไกการทำลายผนังเซลล์ของจุลชีพ แสดงดังใน**รูปที่ 1**

รูปที่ 1 กลไกการต้านการเจริญจุลชีพโดยอนุภาคนาโนซิงค์ออกไซด์

การสังเคราะห์อนุภาคนาโนซิงค์ออกไซด์ด้วยวิธีตกตะกอนเป็นวิธีที่นิยม เพราะเป็นวิธีที่ง่าย และไม่ต้องอาศัยเครื่องมือทางวิทยาศาสตร์มาก โดยวิธีการตกตะกอนจะใช้ซิงค์ไนเตรท (Zinc nitrate) เป็นสารตั้งต้นใช้โซเดียมไฮดรอกไซด์ เป็นสารตกตะกอนร่วมและใช้น้ำแป้งเป็นสารช่วยความเสถียร (Stabilizing agent) สมการการเกิดอนุภาคเป็นดังสมการที่ 1.1 และ 1.2

$$Zn(NO_3)_2\ (aq) + 2NaOH\ (aq) \longrightarrow Zn(OH)_2\ (aq) + 2NaNO_3(aq) \quad \text{..... 1.1}$$

$$Zn(OH)_2\ (aq) \longrightarrow ZnO(s) + H_2O(g) \quad \text{..... 2.2}$$

นำตะกอนของอนุภาคนาโนซิงค์ออกไซด์ที่ได้ไปอบให้แห้งที่ 80 องศาเซลเซียส เป็นเวลา 12 ชั่วโมงเพื่อกำจัดน้ำออกจากผลึกของแข็ง จนในที่สุดได้เป็นอนุภาคนาโนซิงค์ออกไซด์ (ZnO) [1]

ก่อนหน้าได้มีการนำเอาอนุภาคนาโนซิงค์ออกไซด์ไปเคลือบบนผ้า ผลการทดลองพบว่าอนุภาคนาโนซิงค์ออกไซด์สามารถยับยั้งการทำงานของแบคทีเรียแกรมบวก Staphylococcus aureus ได้ 94 % และแบคทีเรียแกรมลบ Escherichia coli ได้ 86%

และนอกจากนั้นยังพบอีกว่าอนุภาคนาโนซิงค์ออกไซด์มีประสิทธิภาพในการยับยั้งแบคทีเรียมากกว่าซิงค์ออกไซด์ เนื่องจากอนุภาคนาโนซิงค์ออกไซด์มีขนาดที่เล็กกว่า จึงทำให้สามารถเข้าไปในเซลล์ของแบคทีเรียได้ง่ายและเร็วกว่า ส่งผลให้มีประสิทธิภาพในการยับยั้งแบคทีเรียได้ดีกว่า [1] นอกจากสมบัติการยับยั้งแบคทีเรียแล้ว อนุภาคนาโนซิงค์ออกไซด์ยังสามารถต้านรังสีอัลตราไวโอเลตหรือรังสียูวีได้อีกด้วย อนุภาคนาโนซิงค์ออกไซด์มีความสามารถในการต้านรังสียูวีได้ทั้งรังสียูวีเอ (UV-A) และ รังสียูวีบี (UV-B) ในช่วงความยาวคลื่น 290-400 นาโนเมตร อนุภาคซิงค์ออกไซด์ที่มีขนาดใหญ่กว่านาโนเมตรเมื่อนำไปเคลือบบนวัสดุสิ่งทอ เพื่อช่วยในการยับยั้งแบคทีเรียและต้านรังสียูวี พบว่าอนุภาคนาโนซิงค์ออกไซด์ขนาดเล็กจะสามารถต้านรังสียูวีได้เพราะมีพื้นที่ผิวมาก สามารถเคลือบบนผ้าได้ดีกว่า จึงทำให้อนุภาคนาโนซิงค์ออกไซด์มีประสิทธิภาพในการต้านรังสียูวีได้ดีกว่า [2]

วัตถุประสงค์

1. เพื่อศึกษาวิธีเตรียมน้ำแป้งที่มีอนุภาคนาโนซิงค์ออกไซด์เป็นสารออกฤทธิ์ต้านเชื้อราบนผ้าไหม
2. เพื่อหาแนวทางในการแก้ปัญหาที่เกิดจากการทอผ้าไหมที่ใช้น้ำแป้งเป็นกาวยึดติดของเส้นยืน
3. เพื่อเป็นแนวทางในการประยุกต์ให้องค์ความรู้ทางด้านวิทยาศาสตร์และนาโนเทคโนโลยีในการเพิ่มมูลค่างานศิลปหัตถกรรมไทย

อุปกรณ์และสารเคมี

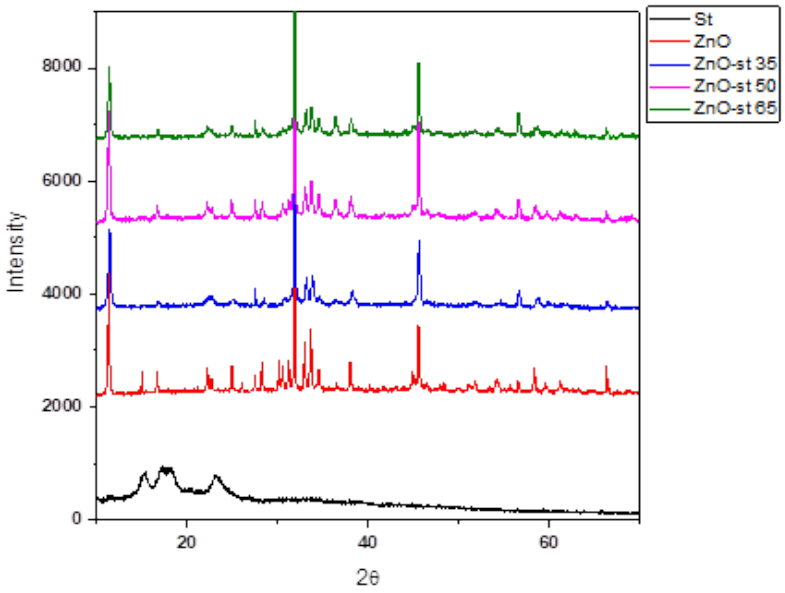
1) น้ำกลั่น
2) ซิงค์คลอไรด์ ($ZnCl_2$) Laboratory reagent, KEMAUS, 136.28 g mol^{-1}
3) โซเดียมไฮดรอกไซด์ (NaOH) pellets, Analytical reagent, Ajax Finechem, 40 g mol^{-1}
4) แป้งมันสำปะหลัง Native tapioca starch จากบริษัท Asia modified starch co.ltd. (AMSCO)
5) เครื่องกวนสารให้ความร้อน Hotplate Magnetic Stirrer IKA C-MAG HS7
6) เครื่องปั่นสาร CAT R17 M. Zipperer GmbH D-79219 Staufen
7) Attenuated total reflectance Fourier transform infrared spectroscopy (ATR-FTIR) (Tensor 27, Bruker)
8) X-Ray diffraction analysis (XRD) advance d8 bruker
9) Scanning electron microscope (SEM) (LEO 01455VP, Cambridge, England)

ขั้นตอนการทดลอง

1 การเตรียมน้ำแป้งนาโนซิงค์ออกไซด์ ZnO-st 35 %wt

1) ละลายแป้งมันสำปะหลัง 5 กรัม ในสารละลาย $ZnCl_2$ ที่ความเข้มข้น 35 %wt
2) กวนแป้งเข้ากันกับสารละลายพอประมาณ แล้วนำไปให้ความร้อนคงที่ ที่อุณหภูมิ 80 องศาเซลเซียสเป็นเวลา 1 ชั่วโมง
3) ปรับ pH ด้วยสารละลาย NaOH 15 wt% จนค่า pH ถึง 8 โดยในขณะที่หยด ให้ความร้อนคงที่ พร้อมทั้งกวนอย่างต่อเนื่อง
4) หลังจากปรับ pH เรียบร้อยแล้ว กวนและให้ความร้อนต่อเนื่องไปอีก 30 นาที แล้วเก็บใส่ภาชนะที่มีฝาปิด
5) การเตรียมน้ำแป้งนาโนซิงค์ออกไซด์ ZnO-st 50 %wt และ ZnO-st 65 %wt ก็ทำเหมือนกับ ZnO-st 35 %wt

2 การเตรียมอนุภาคนาโนซิงค์ออกไซด์ ZnO

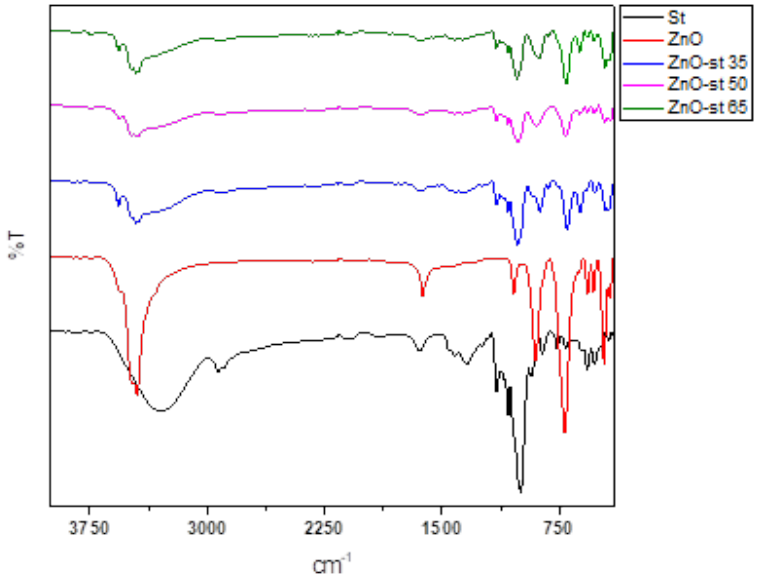


1) เตรียม $ZnCl_2$ 65 wt%
2) ปรับ pH ด้วยสารละลาย NaOH 15 wt% จนค่า pH ถึง 8 พร้อมทั้งกวนอย่างต่อเนื่อง
3) หลังจากปรับ pH เรียบร้อยแล้ว กวนต่อเนื่องไปอีก 30 นาที แล้วเก็บใส่ภาชนะที่มีฝาปิด

3 การศึกษาคุณสมบัติของน้ำแป้งนาโนซิงค์ออกไซด์ ZnO-st

1) นำตัวอย่างมาอบที่อุณหภูมิ 80 องศาเซลเซียส จนกระทั่งตัวอย่างแห้ง
2) บดตัวอย่างพอประมาณ แล้วนำไปศึกษาด้วย SEM, FTIR spectrometer และ X-ray diffractometer

ศึกษาหาคุณลักษณะของน้ำแป้งที่มีอนุภาคนาโนซิงค์ออกไซด์

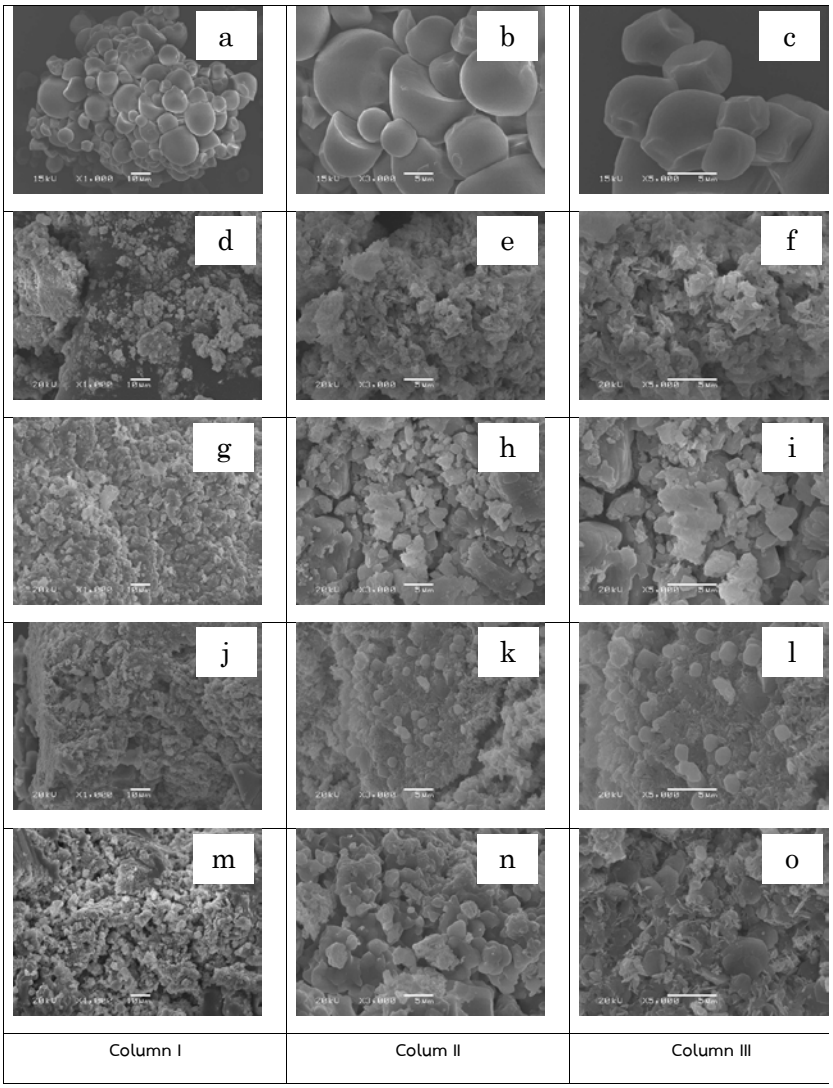


1 ผลการวิเคราะห์ความเป็นผลึกด้วย XRD

รูปที่ 2 X-ray diffraction patterns ของแป้งมันสำปะหลัง (St), อนุภาคนาโนซิงค์ออกไซด์ (ZnO), น้ำแป้งนาโนซิงค์ออกไซด์ 35, 50 และ 65 ของ แป้งมันสำปะหลัง (St), อนุภาคนาโนซิงค์ออกไซด์ (ZnO), น้ำแป้งนาโนซิงค์ออกไซด์ 35, 50 และ 65 (ZnO-st 35, 50 และ 65) (ZnO-st 35, 50 และ 65)

จากรูปที่ 2 แสดง X-ray diffraction patterns ของแป้งมันสำปะหลัง (St), อนุภาคนาโนซิงค์ออกไซด์ (ZnO), น้ำแป้งนาโนซิงค์ออกไซด์ 35, 50 และ 65 (ZnO-st 35, 50 และ 65) พบว่า แป้งมันสำปะหลัง (St) ที่ยังไม่ผ่านขั้นตอนการสังเคราะห์มีโครงสร้างเป็นอสัณฐาน และอนุภาคนาโนซิงค์ออกไซด์(ZnO) มีความเป็นผลึกสูง มีพีค (100), (002), (101) และ (102) ที่เป็น X-ray diffraction patterns ของ ZnO (JCPDS, No. 89-1397) ซึ่งผลึกที่เกิดขึ้นคือ ZnO ที่ได้จากการตกตะกอน $ZnCl_2$ ด้วยสารละลาย NaOH และพบว่าความเป็นเมื่อนำอนุภาคนาโนมาสังเคราะห์ในน้ำแป้ง โดยใช้อัตราส่วน $ZnCl_2$ ต่างกัน พบว่าเกิด X-ray diffraction patterns ที่ตำแหน่งใกล้เคียงกันกับ ZnO ซึ่งบ่งชี้ว่า การทดลองนี้สามารถเกิด ZnO-st nanocomposite ขึ้นได้

2 ผลการวิเคราะห์หมู่ฟังก์ชันด้วย ATR-FTIR



รูปที่ 3 ATR-FTIR สเปกตรา ของแป้งมันสำปะหลัง (St), อนุภาคนาโนซิงค์ออกไซด์ (ZnO), น้ำแป้งนาโนซิงค์ออกไซด์ 35, 50 และ 65 (ZnO-st 35, 50 และ 65)

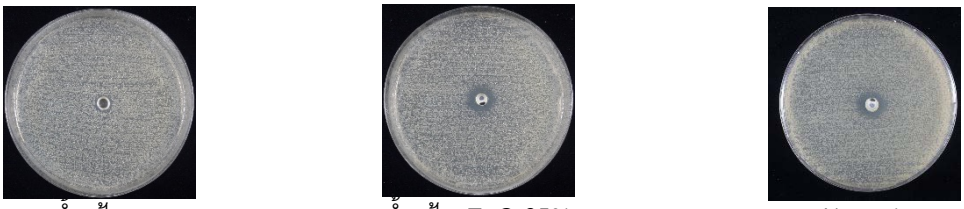
จากรูปที่ 3 พบว่าสเปกตราของ St พบพีคการสั่นของ O-H stretching ที่ตำแหน่ง 3303 cm^{-1}, C-H stretching ที่ตำแหน่ง 2931 cm^{-1}, C-H bending ที่ตำแหน่ง 1453 cm^{-1}, O-H bending ที่ตำแหน่ง 1337 cm^{-1} และ C-O stretching ที่ตำแหน่ง 1149 cm^{-1} ซึ่งสอดคล้องกับโครงสร้างของแป้งที่มีหน่วยย่อยเป็น glucose โดยมีหมู่ฟังก์ชัน hydroxyl (-OH) เป็นจำนวนมาก

สเปกตราของ ZnO พบพีคการสั่นของ O-H stretching 3476-3449 cm^{-1} และพีคการสั่นของ ZnO ที่ตำแหน่ง 463 cm^{-1} ซึ่ง ZnO จะเกิดที่บริเวณ Wavenumber ต่ำ ๆ ในช่วงไม่เกิน 600 cm^{-1} ซึ่งใกล้เคียงกับผลการวิเคราะห์จากงานวิจัยที่เคยมีมา [3-14]

สเปกตราของ ZnO-st 35, 50 และ 65 พบการสั่นที่บริเวณเดียวกัน โดยที่ ตำแหน่ง 3449 cm^{-1} เป็นพีคการสั่นของ O-H stretching, ตำแหน่ง 2932 cm^{-1} เป็นพีคการสั่นของ C-H stretching และ พีคการสั่นที่ตำแหน่ง 458 cm^{-1} สอดคล้องกับตัวอย่าง St และ ZnO

3 ผลการวิเคราะห์พื้นผิวด้วย SEM

รูปที่ 4 ภาพถ่ายด้วยกล้องจุลทรรศน์อิเล็กตรอนชนิดส่องกราด SEM ที่กำลังขยาย 1000 (**Column I**), 3000 (**Colum II**) และ 5000 (**Column III**) เท่า ของตัวอย่าง St (a, b, c), ZnO (d, e, f), ZnO-st 35 (g, h, i), ZnO-st 50 (j, k, l) และ ZnO-st 65 (m, n, o)



จากรูปที่ 4 ภาพถ่ายของตัวอย่างแป้งมันสำปะหลังหรือ Tapioca จะมีลักษณะเป็นกรานูล (granules) [15] ZnO มีลักษณะเป็นเกล็ดขนาดเล็กแต่เมื่อสังเคราะห์แป้งด้วยซิงค์ออกไซด์จะเห็นว่ามีรูปร่างทั้งแบบทรงกลมและเกล็ดเล็ก ๆ ซึ่งเกิดจากการจับตัวกันของแป้งและซิงค์ออกไซด์ ซึ่งมีการจับตัวกับเป็นแผ่นและเป็นก้อน มีขนาดใหญ่กว่า ZnO เนื่องจากขนาดของแป้งค่อนข้างใหญ่ เมื่อจับตัวกันจึงทำให้ขนาดของ ZnO-st มีขนาดใหญ่กว่า ZnO ซึ่งแสดงให้เห็นได้ชัดว่ามีซิงค์ออกไซด์อยู่บนแป้ง

ตารางที่ 1 การทดสอบการยับยั้งการเจริญของจุลินทรีย์โดย broth microdilution method

Item	Sample code	Replicate	Final concentration (%w/v)

คุณสมบัติการยับยั้งการเจริญของจุลินทรีย์ การแสดงขอบเขตความสามารถยับยั้งการเจริญของจุลินทรีย์ ของน้ำแป้ง และน้ำแป้งที่มีส่วนผสมของ ZnO ที่ปริมาณต่างๆ สรุปไว้ในตารางที่ 1 โดยพบว่า น้ำแป้งที่ไม่มีส่วนผสมของ ZnO ไม่สามารถยับยั้งการเจริญของจุลินทรีย์ได้ แตกต่างจาก น้ำแป้งที่มีส่วนผสมของ ZnO โดยมีปริมาณ ZnO 35%, 50%, 65% ตามลำดับ ทำการเจือจางให้ได้ความเข้มข้น 20, 10, 5, 2.5, 1.25, 0.625, 0.313, 0.156, 0.078 และ 0.039 %w/v ก่อนไปทดสอบพบว่าค่า MIC (minimum inhibitory concentration)ค่าความเข้มข้นต่ำสุด ของสารสกัดที่สามารถยับยั้งเชื้อ สังเกตสารละลายจะเริ่มใส อยู่ที่ 0.039 %w/v แสดงว่าที่ความเข้มข้น 0.039 %w/v เริ่มมีการยับยั้งการเจริญของจุลินทรีย์ และพบว่าค่า MBC (minimum bactericidal concentration)ความเข้มข้นต่ำสุดของสารสกัดที่สามารถฆ่าเชื้อ ที่เมื่อนำสารละลายไปเลี้ยงบนอาหารเลี้ยงเชื้อแล้วไม่พบการเจริญของจุลินทรีย์อยู่ที่ 0.078, 0.039, 0.039 %w/v ตามลำดับ เนื่องจากทุกอัตราส่วนมีค่าความเข้มข้นต่ำสุดที่สามารถยับยั้งอยู่ที่ 0.039 %w/v ดังนั้นจึงนำน้ำแป้งที่มีส่วนผสมของ ZnO 35% มาทำการทดลองต่อไป

เมื่อพิจารณาฤทธิ์ต้าน C.albicans โดยใช้วิธี Well diffusion method แสดงดังตาราง โดยนำน้ำแป้งที่มีส่วนผสมของ ZnO 35% มาทดสอบ 2 รอบพบว่ามีค่า Zone diameter เท่ากับ 12.10, 11.48 มิลลิเมตร ตามลำดับ และยังพบว่าแป้งที่มีส่วนผสมของ ZnO มีฤทธิ์ต้านคล้าย Nystatin (ไนสแตติน) ซึ่งยาต้านที่มีกลไกการออกฤทธิ์โดยช่วยยับยั้งการเจริญเติบโตของ C.albicans ได้

น้ำแป้ง น้ำแป้ง+ZnO 35% Nystatin

รูปที่ 5 การทดสอบฤทธิ์การต้าน (Candida albicans ATCC 10231) โดยใช้วิธี Well diffusion method ของน้ำแป้ง น้ำแป้ง+ZnO 35% และสารมาตรฐาน Nystatin

รูปที่ 5 A.) B.) C.) ฤทธิ์ต้าน (*Candida albicans ATCC 10231*) ของผ้าไหมที่ทาด้วยน้ำแป้ง D.) E.) F.) ฤทธิ์ต้าน (*Candida albicans ATCC 10231*) ของผ้าไหมที่ทาด้วยน้ำแป้งที่มีส่วนผสมของ ZnO 35 %wt

คุณสมบัติต้านเชื้อแบคทีเรียของผ้าผ้าไหม

ศึกษาความสามารถในการต้านเชื้อแบคทีเรียของผ้าไหมทาด้วยน้ำแป้งที่มีส่วนผสมของ ZnO 35 %wt โดยสังเกตการเจริญเติบโตของ *Candida albicans ATCC 10231* ในระยะฟักตัว ดังแสดงในรูปที่ 5 ผลการศึกษาพบว่าผ้าไหมทาด้วยน้ำแป้งที่มีส่วนผสมของ ZnO 35 %wt สามารถยับยั้งการเจริญเติบโตของ *Candida albicans ATCC 10231* นอกจากนี้ จำนวนของ *Candida albicans ATCC 10231* ยังมีการลดลงอย่างมีนัยสำคัญ ผลลัพธ์นี้ยังแสดงให้เห็นว่าอนุภาค ZnO มีการกระจายตัวภายในน้ำแป้งที่ใช้ทาบนผ้าไหม และทำหน้าที่เป็นสารต้านสำหรับผลิตภัณฑ์สิ่งทอ โดยเฉพาะอย่างยิ่งในการยับยั้งการเจริญเติบโตของ *Candida albicans ATCC 10231*

สรุป

ในงานวิจัยนี้สามารถเตรียมน้ำแป้งที่มีอนุภาคนาโนซิงค์ออกไซด์ ซึ่งเป็นสารที่มีความสามารถออกฤทธิ์ต้านบนผ้าไหม โดยการนำเอาน้ำแป้งที่มีอนุภาคนาโนซิงค์ออกไซด์มีหวีเส้นยืน คุณสมบัติการยับยั้งการเจริญของจุลินทรีย์ น้ำแป้งที่มีส่วนผสมของ ZnO โดยมีปริมาณ ZnO 35%, 50%, 65% ตามลำดับ ทำการเจือจางให้ได้ความเข้มข้น 20, 10, 5, 2.5, 1.25, 0.625, 0.313, 0.156, 0.078 และ 0.039 %w/v พบว่าที่ปริมาณและความเข้มข้นต่ำสุด น้ำแป้งที่มีส่วนผสมของ ZnO ยังสามารถยับยั้งการเจริญของจุลินทรีย์ เมื่อพิจารณาฤทธิ์ต้าน C.albicans โดยใช้วิธี Well diffusion method โดยนำน้ำแป้งที่มีส่วนผสมของ ZnO 35% มาทดสอบ 2 พบว่าแป้งที่มีส่วนผสมของ ZnO มีฤทธิ์ต้านคล้าย Nystatin (ไนสแต-ติน) ซึ่งยาต้านที่มีกลไกการออกฤทธิ์โดยช่วยยับยั้งการเจริญเติบโตของ การต้านเชื้อแบคทีเรียของผ้าไหมทาด้วยน้ำแป้งที่มีส่วนผสมของ ZnO 35 %wt ของ*Candida albicans ATCC 10231* ในระยะฟักตัว ผ้าไหมที่ทาด้วยน้ำแป้งที่มีส่วนผสมของ ZnO 35 %wt สามารถยับยั้งการเจริญเติบโตของ *Candida albicans ATCC 10231* น้ำแป้งที่มีส่วนผสมของ ZnO นอกจากทำให้เส้นไหมลื่น แข็งแรง ไม่ขาดง่าย ไม่เป็นขุย ยังทำหน้าที่เป็นสารต้านสำหรับผลิตภัณฑ์สิ่งทอ โดยเฉพาะอย่างยิ่งในการยับยั้งการเจริญเติบโตของ *Candida albicans ATCC 10231*

กิตติกรรมประกาศ

คณะผู้วิจัยขอขอบคุณ สถาบันส่งเสริมศิลปหัตถกรรมไทย (องค์กรมหาชน) ที่สนับสนุนงบประมาณโครงการการนำนวัตกรรมนาโนเทคโนโลยีมาพัฒนาผลิตภัณฑ์ผ้าไทยเพื่อเพิ่มมูลค่าภายใต้โครงการพัฒนาผลิตภัณฑ์เพื่อการตลาดเชิงรุก และขอขอบคุณภาควิชาเคมี คณะวิทยาศาสตร์ มหาวิทยาลัยมหาสารคาม ที่เอื้อเฟื้ออุปกรณ์ เครื่องมือและสถานที่ในการวิจัย

ข้อเสนอแนะ

1. ทดสอบสอบสมบัติอื่นๆของเส้นยืนที่ทาด้วยน้ำแป้งที่มีส่วนผสมของ ZnO เช่น สมบัติการป้องกันรังสียูวี สมบัติการซึมผ่านไอน้ำ เป็นต้น

2.พัฒนาขบวนการผลิตและการใช้งานของน้ำแป้งที่มีส่วนผสมของ ZnO สู่กระบวนการในการผลิตแบบอุตสาหกรรม

กระบวนการทำงานอัตโนมัติโดยหุ่นยนต์ในการบริหารจัดการเอกสาร กรณีศึกษาธนาคารออมสิน

Robotic Process Automation for Document Management case study in The Government Saving Bank

กมลชนก จิตตานันทกุล, (Kamonchanok Jitanuntakul)[1]

บทคัดย่อ

ปัจจุบันธนาคารออมสิน มีระบบจัดการส่งเอกสารภายในหน่วยงานด้วยระบบงานสารบรรณอิเล็กทรอนิกส์ แต่ยังมีงานที่ไม่มีผู้รับผิดชอบโดยตรง ทำให้เจ้าหน้าที่ต้องตรวจสอบเอกสาร แต่ปริมาณงานจำนวนมาก ทำให้เกิดความผิดพลาด ในการศึกษาครั้งนี้จึงมีวัตถุประสงค์ เพื่อพัฒนาระบบจัดการเอกสารด้วยกระบวนการทำงานอัตโนมัติโดยหุ่นยนต์ใช้โปรแกรม UiPath เป็นเครื่องมือ ขั้นตอนการดำเนินการเริ่มจากการคัดแยกไฟล์เอกสารตามหน่วยงานที่ส่งมา ทำการแปลงข้อมูลจากไฟล์ pdf ให้เป็นข้อความโดยการใช้ Google Cloud Vision OCR ในโปรแกรม UiPath และตรวจสอบความถูกต้องก่อน จะดำเนินการทดลองส่งไฟล์ที่ถูกคัดแยกแล้วไปยังอีเมลที่กำหนด จัดเก็บไฟล์เอกสารที่ถูกคัดแยกแล้ว ผลจากการศึกษา พบว่า ระบบการทำงานอัตโนมัติโดยหุ่นยนต์ สามารถการอ่านและจัดเก็บไฟล์จากอีเมลได้ถูกต้องร้อยละ 100 และการใช้ Optical Character Recognition (OCR) ผ่านฟังก์ชัน Google Cloud Vision OCR ในการแปลงข้อมูลจากไฟล์ pdf ให้เป็นข้อความถูกต้องร้อยละ 78.20 เนื่องจากเอกสารเป็นภาษาไทย ส่งผลต่อความถูกต้อง กล่าวโดยสรุป โปรแกรม UiPath ช่วยในการบริหารจัดการเอกสาร ได้แก่ จัดการอีเมล จัดไฟล์เอกสาร และส่งเอกสารไปหน่วยงานที่เกี่ยวข้องได้รวดเร็ว อย่างไรก็ตามยังคงต้องใช้มนุษย์ในการเพิ่มความแม่นยำเนื่องจากเอกสารมีความหลากหลายรูปแบบ ทั้งนี้ระบบสามารถช่วยเพิ่มประสิทธิภาพและประสิทธิผลในการทำงานเป็นอย่างมาก สำหรับการศึกษาต่อไป เป็นการพัฒนาโปรแกรมในการจัดการเอกสารที่มีความหลากหลายและรูปแบบที่แตกต่าง

คำสำคัญ: การทำงานอัตโนมัติโดยหุ่นยนต์

Abstract

Currently, Government Savings Bank already sets up a document delivery system within the department with an electronic document system. However, there are also jobs that do not have direct responsibility that leads to the officers check the documents. Moreover, a large amount of work make a mistake. The main objective of this study aims to develop a document management system with robotic process automation (RPA) using UiPath as a tool. The procedure starts from the sorting of documents according to the submitted departments. The data from the PDF file converted to text using Google Cloud Vision OCR in UiPath and validated before trial delivery of the extracted file to the specific email. The results of the study can demonstrate that the robotic process automation (RPA) using UiPath program to read and store files from emails was 100 percent, and the use of Optical Character Recognition (OCR) through Google Cloud Vision OCR to convert data from pdf files to text with accuracy 78.20%. In a nutshell, UiPath manages email, organize documents and send documents to relevant agencies quickly. In addition, it still requires a human to increase the accuracy due to the variety of document formats. However, this system can greatly increase the efficiency and productivity of work. Further study is the development of a program to manage documents with a variety and different formats.

Keywords: Robotic Process Automation.

บทนำ

ปัจจุบันธนาคารออมสินมีรูปแบบการระบบจัดการส่งเอกสารภายในหน่วยงานด้วยระบบงาน สารบรรณอิเล็กทรอนิกส์ของธนาคาร และการรับส่งเอกสารผ่านทางอีเมลของธนาคาร ซึ่งงานธุรการนับได้ว่ามีปริมาณงานมาก นอกจากจะมีหน้าที่รับผิดชอบลักษณะประจำ ซึ่งได้จากงานรับ – ส่งงานจัดเก็บงานพิมพ์ งานร่าง โต้ตอบงานจัดทำสำเนาเอกสาร และงานทั่วไปรวมทั้งงานอื่นที่ยังไม่มีผู้รับผิดชอบโดยตรง เป็นศูนย์กลางการติดต่อและประสานระหว่างภายในและภายนอกธนาคารออมสิน ปัญหาที่เกิดขึ้น คือ ต้องใช้เวลาในการคัดกรองเอกสาร เพื่อส่งไปหน่วยงานที่เกี่ยวข้อง การจัดการข้อมูลเอกสารไปยังหน่วยงานที่เกี่ยวข้องให้มีประสิทธิภาพ ทำให้เกิดความผิดพลาดและต้องเสียเวลาในการตรวจสอบเอกสาร ซึ่งในแต่ละวันจะมีเอกสารจำนวนมากที่ต้องดำเนินการแจ้งหน่วยงานที่เกี่ยวข้อง เมื่อพิจารณามิติของกระบวนการทำงานภายในขององค์กร พบว่าปริมาณงานจำนวนมหาศาลสะสมอยู่ในส่วนของหน่วยงานสนับสนุน ซึ่งงานส่วนใหญ่มีลักษณะเป็นงานที่ต้องทำซ้ำๆ ต้องเสียเวลาในการตรวจสอบเอกสาร ส่งผลให้ศูนย์กลางการติดต่อและประสานระหว่างภายในและภายนอกธนาคารออมสิน การจัดการข้อมูลเอกสารไปยังหน่วยงานที่เกี่ยวข้อง มีประสิทธิภาพต่ำ ผู้รับผิดชอบถึงแม้ว่าจะทำงานอย่างเต็มที่ แต่ก็มีโอกาสเกิดความผิดพลาดได้ ซึ่งส่งผลกระทบต่อการดำเนินงานทั้งระยะสั้นและระยะยาว จนอาจจะทำให้ไม่สามารถแข่งขันกับธนาคารอื่นได้

วัตถุประสงค์

เพื่อพัฒนาระบบจัดการเอกสารด้วยกระบวนการทำงานอัตโนมัติโดยหุ่นยนต์ (Robotic Process Automation : RPA)

(1) แนวคิด ทฤษฎีและงานวิจัยที่เกี่ยวข้อง

แนวคิดเกี่ยวกับระบบงานสารบรรณ

ระบบสารบรรณ เป็นกระบวนการจัดการเอกสารที่ต้องการการตรวจสอบ ทั้งนี้ถึงแม้ว่าจะมีการพัฒนาเป็นระบบสารบรรณอิเล็กทรอนิกส์แล้วก็ตาม ก็ยังต้องเสียเวลาในการทำงานที่ไม่เพิ่มมูลค่าให้องค์กร ดังนั้น จึงเกิดแนวคิดในการพัฒนาระบบจัดการเอกสารด้วยกระบวนการทำงานอัตโนมัติโดยหุ่นยนต์ (Robotic Process Automation : RPA) มาเพิ่มประสิทธิภาพงานสารบรรณมากขึ้น

การวิเคราะห์แผนผังก้างปลา

ผังก้างปลา (fishbone diagram) เป็นผังที่แสดงถึงความสัมพันธ์ระหว่างปัญหากับสาเหตุของปัญหาทั้งหมด ชื่อเรียกผังก้างปลานี้เนื่องจากเป็นผังที่มีลักษณะคล้ายปลาที่ประกอบด้วย หัวปลา โครงร่างกระดูกแกนกลาง และก้างปลา โดยระบุปัญหาที่หัวปลา ระบุสาเหตุหลักของปัญหาเป็นลูกศรเข้าสู่กระดูกแกนกลางและระบุสาเหตุย่อยที่เป็นไปได้ที่ส่งผลกระทบให้เกิดปัญหานี้เป็นลูกศรเข้าสู่สาเหตุหลัก นอกจากนี้ผังก้างปลามีชื่อเรียกอีกชื่อหนึ่งว่า แผนผังอิชิกาว่า (Ishikawa Diagram) ผังก้างปลา ประกอบด้วยส่วนต่างๆ ดังต่อไปนี้

1.ส่วนปัญหาหรือผลลัพธ์ (Problem or Effect) ซึ่งจะแสดงอยู่ที่หัวปลา

2. ส่วนสาเหตุ (Causes) จะสามารถแยกย่อยออกได้อีกเป็น ปัจจัย (Factors) ที่ส่งผลกระทบต่อปัญหา (หัวปลา) สาเหตุหลัก สาเหตุย่อย ซึ่งสาเหตุของปัญหา จะเขียนไว้ในก้างปลาแต่ละก้าง ก้างย่อยเป็นสาเหตุของก้างรองและก้างรองเป็นสาเหตุของก้างหลัก

การวิเคราะห์และออกแบบระบบ

กระบวนการพัฒนาระบบงาน หรือระบบเทคโนโลยีสารสนเทศด้วย “วงจรการพัฒนาระบบ (System Development Life Cycle : SDLC)” คือ การแบ่งขั้นตอนเพื่อช่วยแก้ปัญหาทางธุรกิจหรือตอบสนองความต้องการขององค์กร โดยระบบที่จะพัฒนานั้นอาจเป็นการพัฒนาระบบใหม่หรือการปรับปรุงระบบเดิมให้ดีขึ้นก็ได้ การพัฒนาระบบแบ่งออกเป็น 7 ขั้นตอนดังนี้

1. การค้นหาปัญหาขององค์กร (Problem Recognition)
2. การศึกษาความเหมาะสม (Feasibility Study) ว่าเหมาะสมหรือไม่ที่จะปรับเปลี่ยนระบบ
3. การวิเคราะห์ (Analysis) เป็นการรวบรวมข้อมูลปัญหาความต้องการที่มีเพื่อนำไปออกแบบระบบ
4. การออกแบบ (Design) นำผลการวิเคราะห์มาออกแบบเป็นแนวคิด (Logical Design)
5. การพัฒนาและทดสอบ (Development & Test)
6. การติดตั้ง (Implementation)
7. การซ่อมบำรุงระบบ (System Maintenance)

กระบวนการทำงานอัตโนมัติโดยหุ่นยนต์ (Robotic Process Automation : RPA)

Asatiani & Penttinen (2016) กล่าวว่า ระบบซอฟต์แวร์อัตโนมัติ หรือ RPA (Robotic Process Automation) เป็นเทคโนโลยีที่สามารถทำงานแทนมนุษย์ได้อย่างรวดเร็วและคุ้มค่า ณัฐวุฒิ พงศ์สิริ (2561) กล่าวว่า ระบบซอฟต์แวร์อัตโนมัติ หรือ

Robotic Process Automation (RPA) คือเทคโนโลยีที่มีความสามารถในการทำงานที่ต้องทำซ้ำ ๆ ภายใต้กระบวนการต่าง ๆ ที่เป็นมาตรฐาน โดยเฉพาะระบบงานคอมพิวเตอร์ที่หลากหลาย แบบซ้ำ ๆ แทนมนุษย์ได้รวดเร็ว แม่นยำ และคุ้มค่า

เครื่องมือในการวิเคราะห์ที่เกี่ยวข้อง

UiPath เป็นซอฟต์แวร์กลุ่ม Robotic Process Automation (RPA) โครงสร้างการทำงาน (UiPath Platform in action) ประกอบด้วย 3 ส่วน ได้แก่ 1. UiPath Studio จะทำหน้าที่ออกแบบ และพัฒนาคำสั่งตามที่ต้องการ 2. UiPath Orchestrator จะทำหน้าที่ควบคุมการทำงาน 3. UiPath Robots จะทำหน้าที่ทำงานตามคำสั่งที่ได้รับและถูกกำหนดมา

Google Cloud Vision คือ แพลตฟอร์ม Public Cloud ที่พัฒนาโดย Google รวบรวมบริการทั้ง Cloud Computing, Cloud Storage, Database, Network, Data Analytics, AI & Machine learning และบริการอื่นๆ อีกมากมาย ด้วยมาตรฐานความปลอดภัยระดับสากล ที่มีความน่าเชื่อถือ

Cloud Vision ของ Google Cloud Platform ช่วยวิเคราะห์ภาพ ใช้ความสามารถของ Machine Learning ซึ่ง Cloud Vision API สามารถวิเคราะห์ได้ทั้ง ใบหน้าของคน ประเภทของวัตถุ โลโก้ ข้อความ สถานที่สำคัญ ภาพที่ไม่เหมาะสม สามารถวิเคราะห์ได้พร้อมๆ กัน

Optical Character Recognition หรือ OCR การอ่านอักขระด้วยแสง คือกระบวนการในการเปลี่ยนข้อความที่อยู่ในรูปให้อยู่ในรูปแบบของข้อความ หรือกล่าวได้ว่าเป็นการสร้างข้อความ หรือไฟล์เอกสารจากไฟล์สแกนเอกสารทั้งในรูปแบบการพิมพ์ หรือลายมือ เช่น โค้ด หรือ Serial number ที่มีทั้งตัวเลข และตัวหนังสือ ที่อยากเก็บข้อมูลให้อยู่ในรูปแบบดิจิทัล เทคโนโลยี OCR ช่วยเก็บข้อมูลเหล่านี้ให้อยู่ในรูปแบบของดิจิทัลโดยการประมวลผลจากรูปภาพและ ดึงข้อมูลตัวอักษรมาทำการจำแนกตัวอักษรเก็บไว้ในระบบ จากเดิมที่เมื่อต้องการใช้ข้อมูลจากเอกสาร ต้องใช้วิธีพิมพ์ข้อมูลตามเอกสารต้นฉบับ

งานวิจัยที่เกี่ยวข้อง

Willcock, Lacity & Craig (2015) ได้กล่าวว่า หน่วยงานสนับสนุนที่มีผลการดำเนินงานต่ำสามารถปรับเปลี่ยนเป็นหน่วยงานสนับสนุนที่มีผลการดำเนินงานสูงได้ จากการปฏิรูปองค์กร 6 แนวทาง คือ 1) การรวมศูนย์การปฏิบัติงาน 2) การสร้างมาตรฐานในการปฏิบัติงาน 3) การเพิ่มประสิทธิภาพการปฏิบัติงานโดยลดข้อผิดพลาด และความสูญเปล่า 4) การย้ายฐานการผลิตหรือที่ตั้ง 5) การใช้เทคโนโลยีเข้ามาช่วย และ 6) การใช้ระบบอัตโนมัติ สำหรับระบบอัตโนมัตินั้น มีอยู่ด้วยกัน 3 ระดับ ได้แก่ ระดับที่ 1 กระบวนการทำงานแบบอัตโนมัติ (Robotic Process Automation: RPA) ระดับที่ 2 กระบวนการประมวลผลอัจฉริยะแบบอัตโนมัติ (Intelligent Process Automation: IPA) และระดับที่ 3 กระบวนการรับรู้และเข้าใจแบบอัตโนมัติ (Cognitive Automation: CA) (วิไลพร ทวีลาภพันทอง, 2560) ในปี พ.ศ. 2561 ประเทศไทยเริ่มมีการนำ RPA ไปใช้ในธุรกิจ เช่น บริษัท เมืองไทยประกันชีวิต จำกัด (มหาชน) ใช้ในแผนกทรัพยากรบุคคล ทดลอง RPA ทำหน้าที่ตรวจสอบเอกสาร แก้ไขข้อมูล ออกจดหมายแจ้งเตือนลูกค้าขอใบรับรองวีซ่า และพิจารณารับประกันภัย ได้ผลค่อนข้างดี ช่วยจัดการข้อผิดพลาดได้อย่างรวดเร็วและแม่นยำ (ประชาชาติธุรกิจ, 2561)

Anagnoste (2017) ศึกษาเรื่อง “Robotic Automation Process - The Next Major Revolution in Terms of Back Office Operations Improvement” โดยวิเคราะห์ข้อมูลเกี่ยวกับ RPA จากรายงานของ Forrester Institute, Everest Group, Outsourcing Report และงานวิจัยที่เกี่ยวข้อง พบว่า RPA สามารถใช้กับลักษณะงานที่มีโครงสร้างในการทำงานแบบซ้ำๆ ช่วยลดระยะเวลาในการทำงาน ลดข้อผิดพลาดในการเก็บข้อมูลการใช้งาน นอกจากนั้นสามารถทำงานได้แบบ 24/7 ลดต้นทุนในการบันทึกข้อมูลร้อยละ 70 ลดต้นทุนลงร้อยละ 30 เมื่อเทียบกับการทำงานของพนักงานแบบเต็มเวลา สร้างผลตอบแทนให้องค์กรได้อย่างรวดเร็ว และเพิ่มขีดความสามารถในการแข่งขันได้ดีขึ้น

(2) วิธีการศึกษา

การเก็บข้อมูลในการศึกษา

ข้อมูลไฟล์เอกสารรับส่งข้อมูลผ่านทางอีเมลของธนาคารออมสินเขตราชวัตรปี 2564 คัดแยกไฟล์เอกสารตามหน่วยงานที่ส่งมา

เครื่องมือที่ใช้ในการศึกษา

การจัดการเอกสารด้วยกระบวนการทำงานอัตโนมัติโดยหุ่นยนต์ (Robotic Process Automation : RPA) โดยการใช้โปรแกรม UiPath เป็นเครื่องมือ และการแปลงข้อมูลจากไฟล์ pdf ให้เป็นข้อความโดยการใช้ Google Cloud Vision OCR

การวิเคราะห์ข้อมูล

- การวิเคราะห์ข้อมูลเชิงคุณภาพ คือ การที่องค์กรมีการดำเนินการตามแนวทางวงจรการพัฒนาระบบจะช่วยให้สามารถดำเนินการได้อย่างมีประสิทธิภาพ มีแนวทางและขั้นตอนในการดำเนินงานที่ชัดเจน สามารถควบคุมเวลาและงบประมาณได้ง่าย
- การวิเคราะห์สาเหตุของปัญหา คือ การใช้แผนผังก้างปลา ในการกำหนดปัจจัย สาเหตุต่างๆ

- แนวทางการแก้ไขปัญหา

กระบวนการบริหารจัดการเอกสารของธนาคารออมสินเขตราชวัตรด้วยกระบวนการทำงานอัตโนมัติโดยหุ่นยนต์ (Robotic Process Automation : RPA) มีรายละเอียด ดังนี้

1.) ศึกษาความเป็นไปได้ในการพัฒนาระบบจัดการเอกสารด้วยกระบวนการทำงานอัตโนมัติโดยหุ่นยนต์ (Robotic Process Automation : RPA) พิจารณาใน 5 ด้าน ได้แก่ บุคลากร งบประมาณ เทคโนโลยี เวลาในการพัฒนา และข้อกฎหมาย

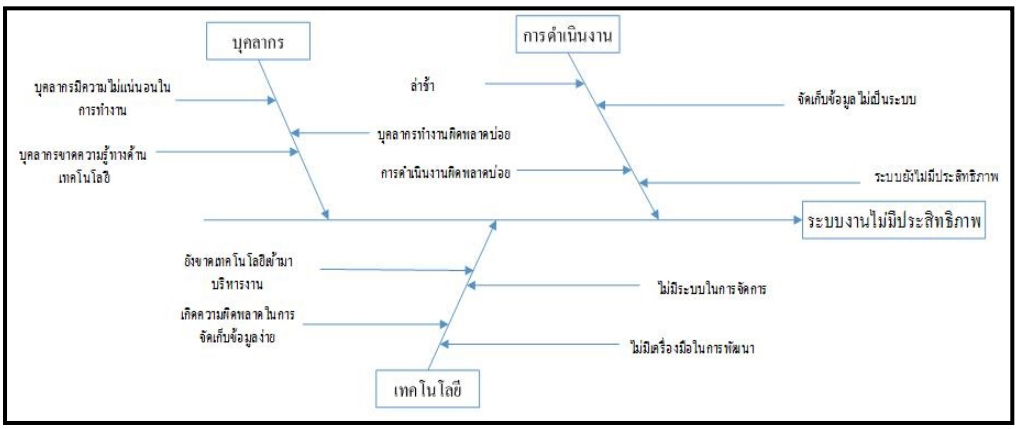
2.) การวิเคราะห์และออกแบบระบบจัดการเอกสารด้วยกระบวนการทำงานอัตโนมัติโดยหุ่นยนต์ (Robotic Process Automation : RPA) ตามหลักของ Object-oriented Approach ตัวอย่างเช่น use case diagram และ sequence diagram เป็นต้น

3.) การพัฒนาระบบจัดการเอกสารด้วยกระบวนการทำงานอัตโนมัติโดยหุ่นยนต์ ใช้ UiPath เป็นเครื่องมือ เพื่อให้สามารถการบริหารจัดการเอกสารได้มีประสิทธิภาพ มีรายละเอียด ดังนี้

- การคัดแยกไฟล์เอกสารตามหน่วยงานที่ส่งมา แปลงข้อมูลจากไฟล์ pdf ให้เป็นข้อความโดยใช้ Google Cloud Vision OCR ในโปรแกรม UiPath
- ตรวจสอบความถูกต้องของการไฟล์ pdf
- การกำหนดโครงสร้างข้อมูลเพื่อส่งไฟล์ที่ถูกคัดแยกแล้วไปยังอีเมลที่กำหนด
- การจัดเก็บไฟล์เอกสารที่ถูกคัดแยกแล้ว จำแนกตามชื่อหน่วยงานที่ส่งเข้ามา

4.) การทดสอบ ภายหลังการพัฒนาระบบ ต้องทดสอบความถูกต้องในแต่ละขั้นตอน

5.) การประเมินประสิทธิภาพการใช้งาน ด้วยการนำไปใช้งานจริง



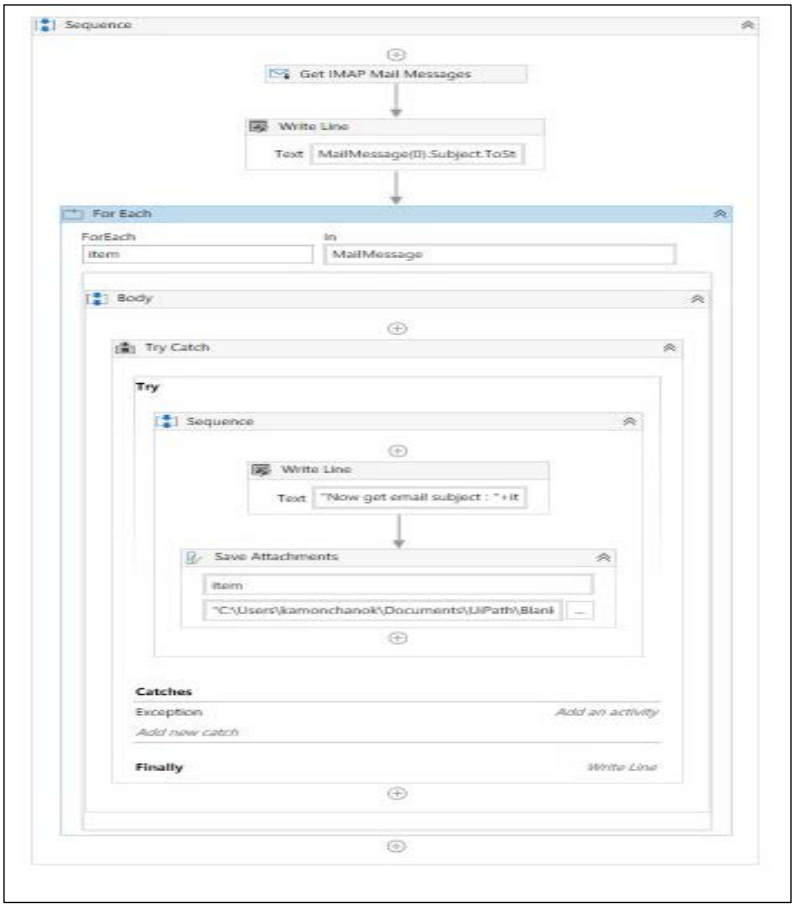
6.) การบำรุงรักษาระบบ พิจารณาระบบสามารถปรับเปลี่ยนได้ในอนาคต

- วิธีการประเมินทางเลือก

ในการประเมินทางเลือกของผู้ศึกษาใช้การทดสอบระบบจัดการเอกสารด้วยกระบวนการทำงานอัตโนมัติโดยหุ่นยนต์ (Robotic Process Automation : RPA) โดยการใช้โปรแกรม UiPath เป็นเครื่องมือ

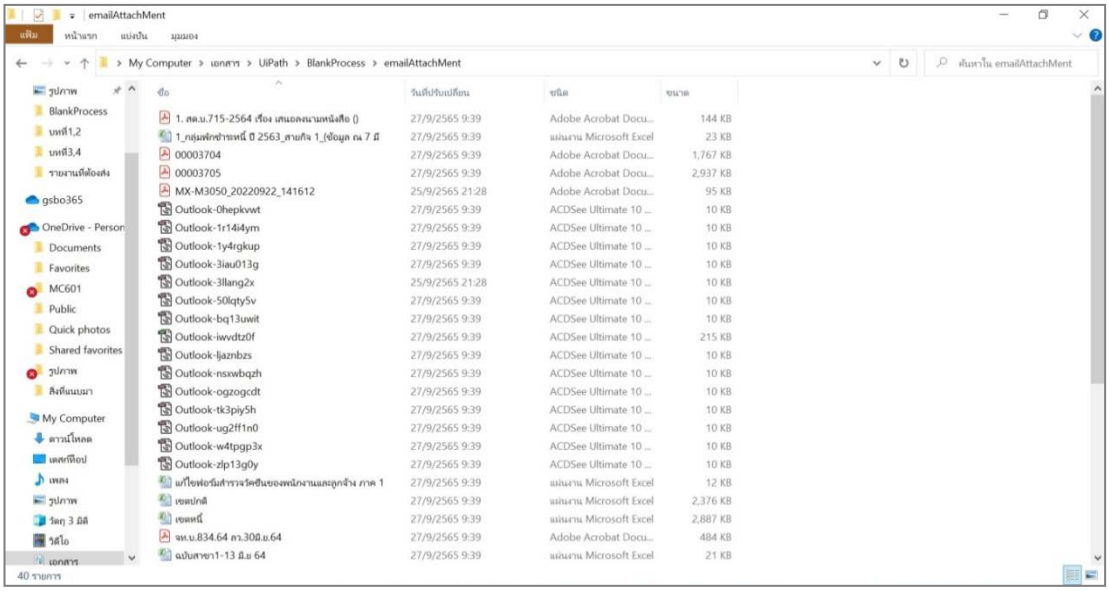
ผลการศึกษา

ผลจากการเก็บรวบรวมข้อมูลและทดสอบกระบวนการทำงานอัตโนมัติโดยหุ่นยนต์ (Robotic Process Automation : RPA) โดยใช้โปรแกรม UiPath เป็นเครื่องมือ สามารถสรุปปัญหาได้ตามผังก้างปลา



ภาพที่ 1 แสดงการวิเคราะห์ปัญหาการจัดการเอกสารของธนาคารออมสินเขตราชวัตร

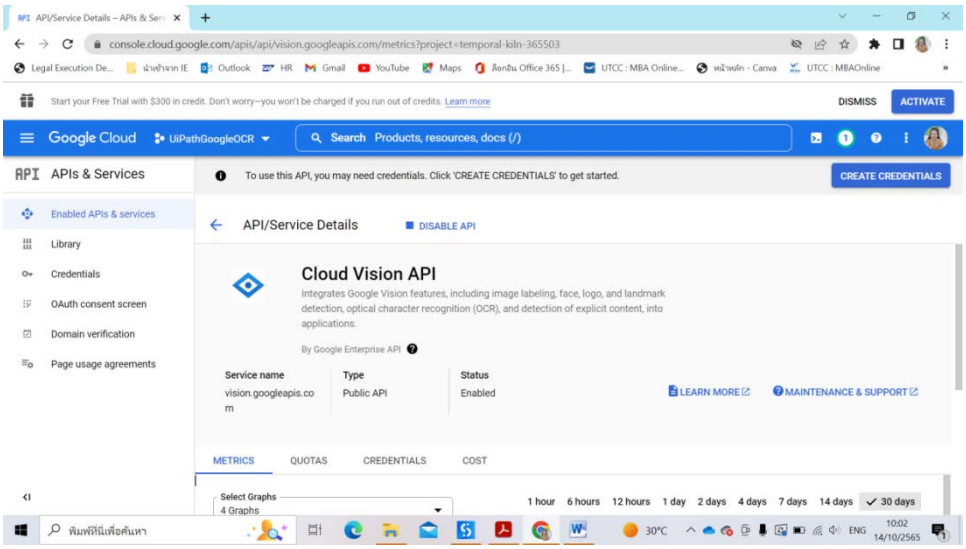
จากภาพที่ 1 แสดงการวิเคราะห์ปัญหาการจัดการเอกสารของธนาคารออมสินเขตราชวัตร ที่มีปัญหาทางด้านบุคคลการมีความไม่แน่นอนในการทำงาน และต้องทำงานเดิมซ้ำๆ ขาดความรู้ทางด้านเทคโนโลยี ส่วนการดำเนินงานมีความล่าช้า จัดเก็บข้อมูลไม่เป็นระบบ ไม่มีประสิทธิภาพ ทำให้การดำเนินงานเกิดความผิดพลาดบ่อย และทางปัญหาทางด้านเทคโนโลยี คือ ขาดเทคโนโลยีที่ทันสมัยมาบริหารงาน ไม่มีเครื่องมือในการพัฒนา ไม่มีระบบในการจัดการ ทำให้เกิดความผิดพลาดในการจัดเก็บข้อมูล



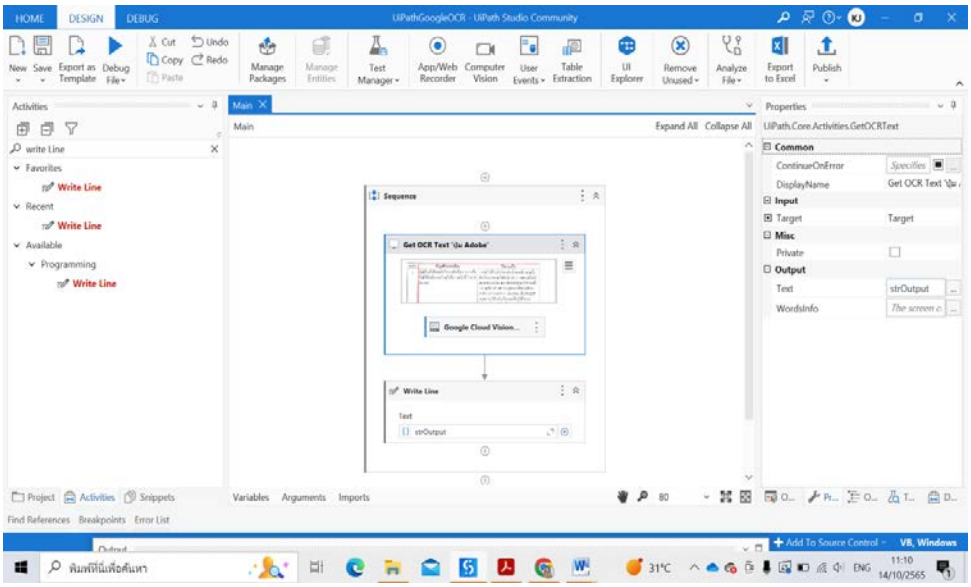
ผลการศึกษาความเป็นไปได้ในการพัฒนาระบบจัดการเอกสารด้วยกระบวนการทำงานอัตโนมัติโดยหุ่นยนต์ (Robotic Process Automation : RPA) ด้วยการสร้างแบบจำลองระบบอัตโนมัติแบบหุ่นยนต์จากโปรแกรม UiPath รวมถึงจำลองสิ่งแวดล้อม

ให้เหมือนสถานการณ์จริงของธนาคาร โดยการนำข้อมูลในอีเมลหน่วยงาน ส่งไปยังอีเมลส่วนบุคคลที่ทดสอบกับระบบ UiPath และระบบจัดเก็บออนไลน์จากโปรแกรม Google Drive จากนั้นทดสอบแบบจำลองที่สร้างขึ้นด้วยวิธีการทดสอบ โดยกำหนดกรณีตรวจสอบ (Test Case) ดังนี้

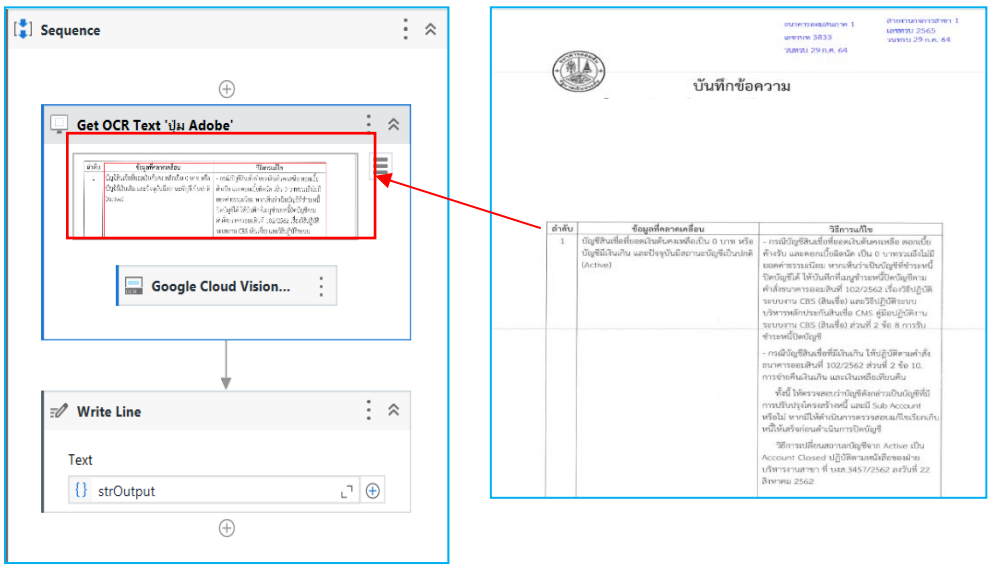
1.) เริ่มจากการใช้ UiPath ในการอ่านอีเมลแล้วคัดแยกไฟล์เอกสารตามหน่วยงานที่ส่งมาพร้อมทำการบันทึกไฟล์เอกสาร โดยกระบวนการทำงานอัตโนมัติด้วยฟังก์ชันหลักๆ เริ่มต้นด้วย Get IMAP Mail Massages การเข้าอ่านอีเมล แสดงผลในภาพที่ 2 และ Save Attachments ฟังก์ชันบันทึกไฟล์แนบ แสดงผลในภาพที่ 3



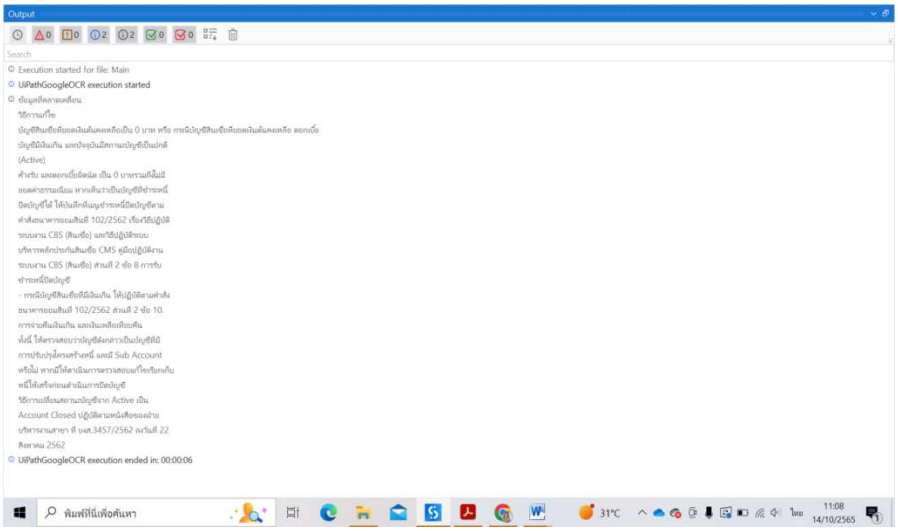
ภาพที่ 2 แสดงลำดับขั้นตอนการทำงานการสร้าง Workflow



ภาพที่ 3 ไฟล์แนบที่ถูกคัดแยกและจัดเก็บ

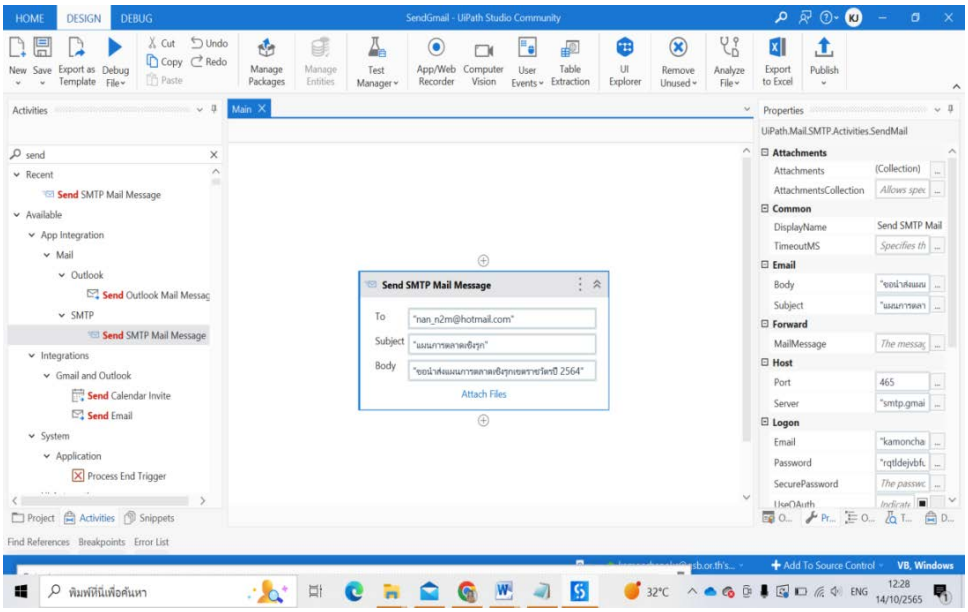


2.) การแปลงข้อมูลจากไฟล์ pdf ให้เป็นข้อความโดยการใช้ Google Cloud Vision OCR (ภาพที่ 4) ในโปรแกรม UiPath ลำดับขั้นตอนการทำงานการสร้าง Workflow ในการแปลงไฟล์ pdf ด้วย Google Cloud Vision OCR ในโปรแกรม UiPath แสดงขั้นตอนในภาพที่ 5 การกำหนดข้อความในไฟล์ pdf ที่ทำการแปลงข้อมูล (ภาพที่ 6) แสดงผลการแปลงข้อมูล ในภาพที่ 7

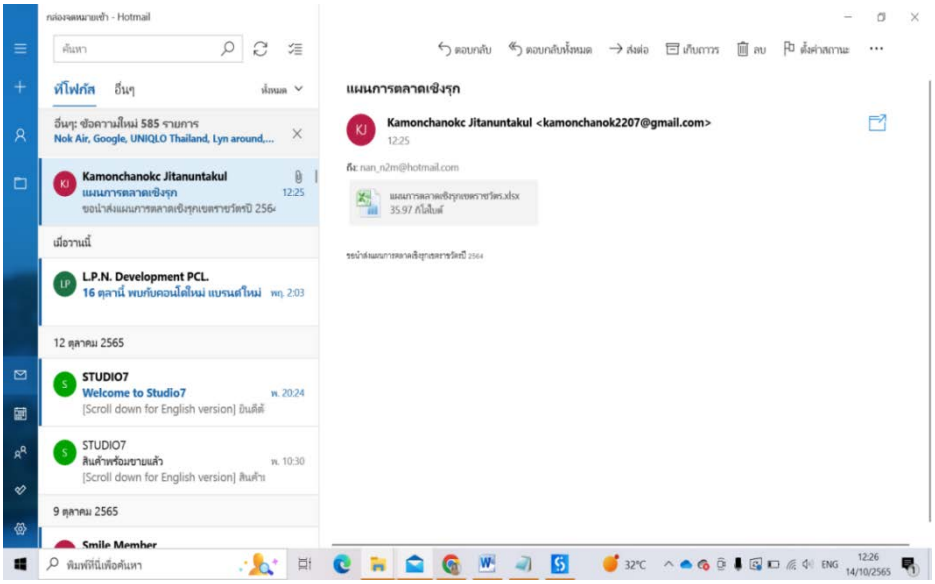


ภาพที่ 4 Google Cloud Vision

ภาพที่ 5 Workflow การแปลงไฟล์ pdf ด้วย Google Cloud Vision OCR



ภาพที่ 6 การกำหนดข้อความในไฟล์ pdf ที่ทำการแปลงข้อมูล



ภาพที่ 7 ผลลัพธ์ของแปลงไฟล์ pdf ด้วย Google Cloud Vision OCR

3.) การจัดส่งไฟล์ที่ถูกคัดแยกแล้วไปยังอีเมลที่กำหนด แสดงลำดับขั้นตอนการทำงานการสร้าง Workflow ในการส่งไฟล์ที่ถูกคัดแยกแล้วไปยังอีเมลที่กำหนด โดยใช้คำสั่ง Send SMTP Mail Message ระบุ email ผู้รับ ชื่อเรื่อง และรายละเอียดของข้อความที่จัดส่ง แสดงลำดับขั้นตอนการทำงานการสร้าง Workflow ในการส่งไฟล์ที่ถูกคัดแยกแล้วไปยังอีเมลที่กำหนด ในภาพที่ 8 แสดงผลส่งข้อมูลไปยังอีเมลที่กำหนด ในภาพที่ 9

ภาพที่ 8 Workflow ในการส่งไฟล์ที่ถูกคัดแยกแล้วไปยังอีเมลที่กำหนด

ภาพที่ 9 แสดงผลลัพธ์จากการทดสอบส่งไฟล์ที่ถูกคัดแยกแล้วไปยังอีเมลที่กำหนด

4.) การทดสอบ

- ระบบจัดการเอกสารด้วยกระบวนการทำงานอัตโนมัติโดยหุ่นยนต์ (Robotic Process Automation : RPA) สามารถการแปลงข้อมูลจากไฟล์ pdf ให้เป็นข้อความโดยการใช้ Google Cloud Vision OCR ในโปรแกรม UiPath ได้ถูกต้องร้อยละ 78.20
- สามารถส่งไฟล์ที่ถูกคัดแยกแล้วไปยังอีเมลที่กำหนด ได้ถูกต้องร้อยละ 100
- การจัดเก็บไฟล์เอกสารที่ถูกคัดแยกแล้ว โดยจำแนกตามชื่อหน่วยงานที่ส่งเข้ามา ได้ถูกต้องร้อยละ 100

5.) ผลการประเมินประสิทธิภาพการใช้งาน

กระบวนการทำงานอัตโนมัติโดยหุ่นยนต์ อ่านและจัดเก็บไฟล์ข้อมูลจากอีเมลได้ถูกต้องร้อยละ 100 ในการแปลงข้อมูลจากไฟล์ pdf ให้เป็นข้อความถูกต้องร้อยละ 78.20 กล่าวโดยสรุป โปรแกรม UiPath ช่วยจัดการอีเมล จัดไฟล์เอกสาร และส่งเอกสารไปหน่วยงานที่เกี่ยวข้องได้รวดเร็ว แต่ยังคงต้องใช้มนุษย์ในการเพิ่มความแม่นยำเนื่องจากเอกสารมีความหลากหลายรูปแบบ อย่างไรก็ตาม ระบบนี้สามารถช่วยเพิ่มประสิทธิภาพและประสิทธิผลในการทำงานมาก สำหรับการศึกษาต่อไป เป็นการพัฒนาโปรแกรมในการจัดการเอกสารที่มีความหลากหลายและรูปแบบที่แตกต่าง

สรุป

หลังจากที่ดำเนินการสร้างและพัฒนากระบวนการทำงานอัตโนมัติโดยหุ่นยนต์ (Robotic Process Automation : RPA) ในการบริหารจัดการเอกสารของธนาคารออมสิน ได้ผลลัพธ์ตรงกับความต้องการ (Requirement) ที่ได้รับมา คือ สามารถอ่านและบันทึกไฟล์เอกสารแนบ จากอีเมล และการจัดการส่งไฟล์เอกสารหรือข้อมูลไปยังหน่วยงานที่เกี่ยวข้องผ่านทางอีเมลได้อย่างดีเยี่ยม ได้ผลร้อยละ 100 และแปลงข้อมูลจากไฟล์ pdf ให้เป็นข้อความโดยการใช้ Google Cloud Vision OCR ในโปรแกรม UiPath ได้ถูกต้องร้อยละ 78.20 ซึ่งจากตัวอย่างการทดสอบในส่วนของการแปลงข้อมูลจากไฟล์ pdf ผู้ศึกษาได้ทดสอบจากข้อมูลที่มีความผิดพลาดบ่อยๆ ซึ่งเกิดขึ้นในทุกๆเดือน แต่ยังไม่สามารถทำได้ทั้งหมด และยังไม่สมบูรณ์ เนื่องจากความหลากหลายของรูปแบบเอกสาร กล่าวโดยสรุป โปรแกรม UiPath ช่วยจัดการอ่านอีเมล จัดเก็บไฟล์เอกสาร และส่งเอกสารไปยังหน่วยงานที่เกี่ยวข้องได้รวดเร็ว แต่ยังคงต้องใช้มนุษย์ในการเพิ่มความแม่นยำ

การพัฒนากระบวนการทำงานอัตโนมัติโดยการใช้โปรแกรม UiPath Studio เป็นโปรแกรมที่ใช้งานง่ายและปรับปรุงแก้ไขได้ง่าย มีคำสั่งหลากหลายช่วยลดขั้นตอนของการทำงานได้อย่างมาก แต่ปัญหาที่พบระหว่างการพัฒนา คือ ตัวกระบวนการทำงานอัตโนมัติไม่สามารถทำงานได้ทุกระดับ ซึ่งอาจส่งผลเสียต่อระบบขององค์กร ในการศึกษาวิจัยที่จะดำเนินต่อไป คือการพัฒนาโปรแกรมในการจัดการเอกสารที่มีความหลากหลายและรูปแบบที่แตกต่าง

จากการทำการทดลองนำเอาเทคโนโลยี RPA มาทำงานแทนงานประจำบางอย่าง สามารถสรุปได้ว่า กระบวนการทำงานอัตโนมัติโดยหุ่นยนต์ (RPA) เหมาะกับงานที่มีปริมาณมาก มีลักษณะการทำซ้ำ ค่อนข้างเยอะ และรูปแบบของเอกสารต้องไม่มีการเปลี่ยนแปลง

ข้อเสนอแนะ

สำหรับปัญหาในการศึกษาครั้งนี้ คือ ไฟล์เอกสารมีความหลากหลายของข้อมูล ทำให้ผลที่ได้จาการแปลงข้อมูลจากไฟล์ pdf ให้เป็นข้อความโดยการใช้ Google Cloud Vision OCR ในโปรแกรม UiPath OCR มีดัชนีชี้วัดความสำเร็จของการแก้ไขปัญหาได้ถูกต้องร้อยละ 78.20 จึงควรศึกษาและเลือกใช้เครื่องมือที่สามารถแปลงข้อมูลได้ถูกต้อง และนอกจากจากปัญหาที่กล่าวมา ยังพบว่าเอกสารที่นำเข้าข้อมูล ต้องมีจัดเตรียมข้อมูล (data cleansing) ก่อน ซึ่งเป็นขั้นตอนที่ใช้เสียเวลา เนื่องจากยังต้องใช้มนุษย์ในการจัดเตรียมข้อมูล

อาภาภรณ์ จอมหล้าพีรติกุล, (Apaporn Jomlaperatikul)[3]
ประยูร จอมหล้าพีรติกุล, (Prayoon Jomlapeeratikul)[4]

บทคัดย่อ

เครื่องวัดความหนืดและเครื่องกวนสารแม่เหล็กเป็นเครื่องมือที่มีความจำเป็นสำหรับงานอุตสาหกรรมหลายประเภทในกระบวนการผลิต การวิจัยและการทดลอง ซึ่งการกวนสารละลายต้องได้รับการควบคุมอุณหภูมิและความหนืดอย่างสม่ำเสมอเพื่อลดการเกิดความเสียหายของสารละลายและอันตรายต่อผู้ปฏิบัติ โดยมีองค์ประกอบหลักคือ ชุดมอเตอร์ ชุดควบคุมอุณหภูมิ ชุดควบคุมความเร็วรอบและวงจรไมโครคอนโทรลเลอร์ ซึ่งใช้มอเตอร์กระแสตรงขนาด 12 โวลต์ ที่ความเร็วรอบ 150 รอบต่อนาที โดยใช้กลีเซอรีนในการทดสอบที่อุณหภูมิช่วง 25-70 องศาเซลเซียส โดยการทดสอบวัดค่ากระแสไฟฟ้าจากการกวนด้วยเครื่องวัดความหนืดอเนกประสงค์ โดยนำค่าที่ได้คำนวณเพื่อหาค่าคงที่ K ผลที่ได้คือกระแสจะลดลงตามอุณหภูมิที่เพิ่มขึ้นและสามารถหาค่าความหนืดของของเหลวได้จากสมการ η = (72.10 x I) โดยใช้วงจรไมโครคอนโทรลเลอร์นี้ประมวลผลและแสดงผลค่าความหนืดที่วัดได้ เมื่อเปรียบเทียบเครื่องวัดความหนืดจากค่ามาตรฐาน เครื่องวัดความหนืดอเนกประสงค์สามารถให้ผลการวัดที่ใกล้เคียง มีค่าเปอร์เซ็นต์ความคลาดเคลื่อนในช่วง 0.37-1.04 อีกทั้งใช้กวนสารละลาย ทำความร้อน ควบคุมอุณหภูมิ ควบคุมความเร็วรอบและวัดความหนืดของสารละลาย ซึ่งสะดวกและไม่เป็นอันตรายต่อผู้ปฏิบัติงาน

คำสำคัญ: เครื่องกวนสารแม่เหล็ก, เครื่องวัดความหนืด, ควบคุมอุณหภูมิ

Abstract

Viscometers and magnetic stirrers are essential tools for many industrial applications in production, research and experimentation. In which stirring the solution must be controlled to control the temperature and viscosity regularly to reduce the damage of the solution and harm to operators, the main components are motor, temperature control unit, speed control unit and microcontroller circuit. By using electric direct current motor 12 volt at speed of 150 rpm and glycerin was found tested at temperatures in the range of 25-70 degrees Celsius. Moreover the agitation current was measured with a universal viscometer using the calculated values to find the constant K. The result was that the current decreased with increasing temperature. The viscosity of the liquid could be determined from Equation η = (72.10 x I) using this microcontroller circuit processes and displays the measured viscosity. When comparing viscometers from standard values versatile viscometers provide close measurement results, there is a percentage error in the range of 0.37-1.04. the versatile viscosity meter machine can also be used to stir the solution, heat, control the temperature, control the speed and measure the viscosity of the solution, which is convenient and does not harm the operator.

Keywords: Magnetic stirrer, Viscosity meter, Temperature control

ความหนืดเป็นคุณสมบัติที่สำคัญอย่างหนึ่งของของเหลว การวัดและควบคุมความหนืดจึงเป็นสิ่งที่จำเป็นสำหรับงานอุตสาหกรรมหลายประเภท นอกจากนี้หลักการหาค่าความหนืดยังสามารถนำไปใช้ประโยชน์ในศาสตร์ด้านวิศวกรรมเพื่อการประดิษฐ์เครื่องมือวัดความหนืดของของเหลว การวัดความหนืดจะเป็นการควบคุมคุณภาพและประสิทธิภาพของผลิตภัณฑ์ เครื่องวัดความหนืดเป็นส่วนสำคัญของการพัฒนาและควบคุมกระบวนการ การวัดความหนืดเป็นวิธีที่รวดเร็ว แม่นยำส่งผลต่อประสิทธิภาพของผลิตภัณฑ์ (Neonics ,2564) เครื่องวัดความหนืด (Viscometer) คือเครื่องมือที่ใช้สำหรับวัดของเหลวทุกชนิดที่มีค่าความหนืดแตกต่างกันไปตามสภาพของการไหล เช่น กาว แอลกฮอล์ สีน้ำมัน สบู่เหลว น้ำยาล้างจาน เครื่องสำอาง รวมถึงผลิตภัณฑ์ทางด้านอาหาร เป็นต้น ซึ่งหลักการวัดนั้นเครื่องวัดจะสามารถบ่งบอกถึงความต้านทานการไหลหรือความหนืดภายในของของเหลวได้ละเอียด จึงทำให้สามารถกำหนดคุณภาพมาตรฐานที่เหมาะสมกับกระบวนการผลิตได้อย่างมีประสิทธิภาพ (Misumi, 2565)

กิตติศักดิ์ รอดเริง (2554) ได้สร้างเครื่องวัดความหนืดแบบหมุนโดยใช้วัสดุที่หาได้ง่ายเพื่อลดต้นทุนการผลิต โดยใช้หลักการทำงานของเครื่องวัดความหนืดแบบหมุนด้วยซุปเปอร์ลีนทรงกระบอก โดยได้หาความหนืดของกลีเซอรีนที่อุณหภูมิ 25-70 องศาเซลเซียส นาไปเปรียบเทียบกับความหนืดที่ได้จากเครื่องวัดความหนืดมาตรฐาน พบว่ามีความคาดเคลื่อนน้อยกว่า 0.4% นภัสดล สิงหะตา (2555) ได้นำเสนอวิธีการประมาณค่าความหนืดโดยใช้มอเตอร์กระแสตรงร่วมกับการชดเชยแรงบิดแบบปรับตัวได้ ซึ่งแบ่งออกเป็น 2 การทดสอบ โดยทดสอบประสิทธิภาพการประมาณค่าของตัวสังเกตร่วมกับตัวชดเชยแรงบิด ตัวชดเชยแรงบิดในสภาวะต่าง ๆ โดยจำลอง 3 กรณีคือ 1) ไม่มีแรงบิดเข้ามารบกวนระบบ 2) ถูกรบกวนด้วยแรงบิดภายนอกแบบคงที่ 3) ถูกรบกวนด้วยแรงบิดภายนอกแบบเปลี่ยนแปลง พบว่าเมื่อมีแรงบิดเข้ามารบกวนแบบคงที่และแบบเปลี่ยนแปลงก็สามารถหาความหนืดได้อย่างมีประสิทธิภาพและทำการทดสอบประมาณค่าความหนืดของของเหลวโดยนำของเหลวหลายชนิดที่มีความหนืดอยู่ในช่วง 80-320 เซนติพอยซ์ มาทดสอบหาความสัมพันธ์ระหว่างความหนืดของเครื่องมาตรฐานกับความหนืดที่แปลงจากแรงบิดของเครื่องต้นแบบ พบว่าแรงบิดสามารถใช้ในการประมาณค่าความหนืดแบบสถานะคงตัวและความหนืดสถานะชั่วครู่ได้

ในวงการวิทยาศาสตร์และการวิจัยรวมทั้งอุตสาหกรรมการผลิต มีความจำเป็นต้องใช้สารละลายในกระบวนการผลิต การวิจัยและการทดลอง ซึ่งในอดีตจะใช้แรงงานคน โดยใช้แท่งแก้วคนสารจากเตาให้ความร้อน (Hot plate) แต่ด้วยข้อจำกัดในการกวนสารละลายที่มีปริมาณน้อย รวมทั้งยังเป็นอันตรายต่อผู้ปฏิบัติงาน สยาม ดิลกธรรมานุกูล (2555) ได้ออกแบบและสร้างเครื่องกวนสารละลายด้วยพลังแม่เหล็กขึ้นมา โดยประกอบด้วย ระบบควบคุมความเร็วรอบ ระบบการทำงานของมอเตอร์และจอแสดงผลการทำงาน ซึ่งสามารถกวนสารละลายด้วยแม่เหล็กโดยไม่มีการปนเปื้อนของสารหล่อลื่นและสามารถทำความสะอาดตัวเครื่องได้ง่ายรวมทั้งในการทำงานตัวมอเตอร์ โดยสามารถใช้ในการกวนสารละลายที่มีความหนืด 1- 62.30 เซนติพอยซ์ สุวัฒน์ วงษ์จำปา (2546) ได้พัฒนาเครื่องกวนสารเคมีด้วยแรงแม่เหล็ก สำหรับปฏิบัติการทางวิทยาศาสตร์ เป็นการพัฒนาเครื่องกวนสารเคมีจากแบบเดิมที่ใช้วิธีการกวนด้วยมือ โดยใช้แท่งแก้วคนสารจากเตาให้ความร้อน มาใช้วิธีการกวนแบบอัตโนมัติ โดยใช้แรงแม่เหล็กถาวร 2 อัน ระบบการทำงานของเครื่องประกอบด้วย ระบบการควบคุมความเร็วรอบ ระบบควบคุมเวลาการทำงานและระบบควบคุมอุณหภูมิของเตาให้ความร้อน ซึ่งทั้ง 3 ระบบนี้ควบคุมการทำงานโดยชุดอิเล็กทรอนิกส์และใช้โปรแกรมคอมพิวเตอร์ภาษาเบสิกสำหรับสั่งการระบบการทำงาน การวิจัยนี้เพื่อพัฒนาเครื่องกวนสารเคมีด้วยแรงแม่เหล็กโดยทำการประเมินใน 3 ด้านคือด้านความเที่ยงตรง ด้านสมรรถนะของเครื่องและด้านกายภาพ พบว่าอยู่ในเกณฑ์ที่ดีและสอดคล้องกับสมมุติฐานที่ตั้งไว้ทั้ง 3 ด้าน ปัจจุบันได้มีการพัฒนากระบวนการผลิตอย่างรวดเร็วทั้งในภาคการศึกษาและโรงงานอุตสาหกรรม จึงทำให้มีความต้องการเครื่องมือที่สะดวกและใช้งานได้ง่ายขึ้น หากสารบางชนิดต้องการกวนสารละลาย ควบคุมทั้งอุณหภูมิและความหนืดของสารละลายในเวลาเดียวกัน ปัญหาที่พบในกระบวนการผลิตและการทดลอง โดยการกวนสารละลายด้วยเตาให้ความร้อน โดยขั้นตอนการกวนสารละลายนั้นยังไม่สามารถตรวจสอบอุณหภูมิและความหนืดในเวลาเดียวกัน จึงเป็นลักษณะที่ไม่ต่อเนื่อง ซึ่งได้มีการหยุดกวนสารละลายเพื่อทำการวัดอุณหภูมิและวัดความหนืด หากความหนืดของสารละลายยังไม่เพียงพอตามมาตรฐานของสารละลาย ต้องนำสารละลายมาทำการทดลองใหม่ ซึ่งอาจส่งผลกระทบต่อการนำสารละลายไปใช้งานต่อทำให้กระบวนการนั้นเกิดความเสียหายและเป็นอันตรายต่อผู้ปฏิบัติงาน จึงได้พัฒนาให้มีขีดความสามารถในการทำงานเพิ่มขึ้นและเพื่อเป็นการป้องกันอันตรายจากสารละลาย ดังนั้นเครื่องวัดความหนืดอเนกประสงค์จึงมีความจำเป็นอย่างยิ่งต่อกระบวนการผลิตและสารละลายที่ต้องการทำละลายด้วยความร้อนตามอุณหภูมิที่ต้องการและการกวนผสมกันอย่างต่อเนื่อง ซึ่งได้รับการควบคุมโดยการตรวจสอบอุณหภูมิและความหนืดอย่างสม่ำเสมอ ขณะทำการกวนสารละลาย

โครงงานนี้จึงนำเสนอเครื่องวัดความหนืดอเนกประสงค์ สามารถใช้ในการกวนสารละลาย ทำความร้อนด้วยเตาให้ความร้อน ควบคุมอุณหภูมิและวัดความหนืดได้เวลาเดียวกัน

วัตถุประสงค์ของการวิจัย

1 เพื่อสร้างและพัฒนาเครื่องวัดความหนืดอเนกประสงค์

2 เพื่อเปรียบเทียบเครื่องวัดความหนืดที่สร้างขึ้นกับเครื่องวัดความหนืดมาตรฐาน

ขอบเขต

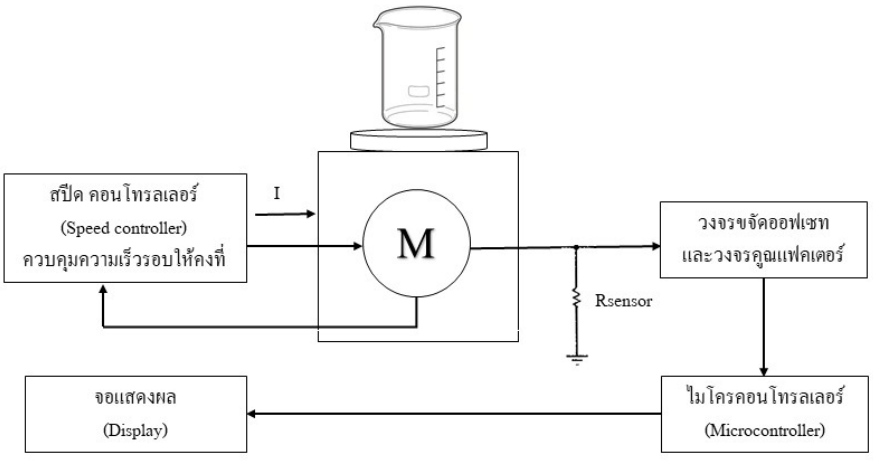
1. ใช้มอเตอร์กระแสตรงขนาด 12 โวลต์ กระแสไฟฟ้า 0.6 แอมป์ ความเร็วรอบ 0-1,000 รอบต่อนาที
2. ใช้กลีเซอรีนเป็นสารที่ใช้ทดสอบความหนืดมาตรฐาน
3 ใช้ความเร็วรอบที่ 150 รอบต่อนาที ในการทดสอบ
4. ใช้อุณหภูมิของกลีเซอรีนในช่วง 25-70 องศาเซลเซียส

วิธีการดำเนินการวิจัย

1 หลักการออกแบบและสร้างเครื่อง

ในการทดสอบเครื่องวัดความหนืดอเนกประสงค์นี้ ใช้มอเตอร์กระแสตรงขนาด 12 โวลต์ กระแสไฟฟ้า 0.6 แอมป์ ความเร็วรอบ 1,000 รอบต่อนาที ควบคุมอุณหภูมิตั้งแต่ 20-100 องศาเซลเซียส และใช้แท่งกวนแม่เหล็กขนาดเส้นผ่านศูนย์กลาง 3 มิลลิลิตร ความยาว 8 มิลลิลิตร สารที่ใช้ทดสอบความหนืดเป็นสารเคมีมาตรฐาน คือ กลีเซอรีน ซึ่งใช้สำหรับเปรียบเทียบเครื่องมือวัดความหนืดของของเหลว

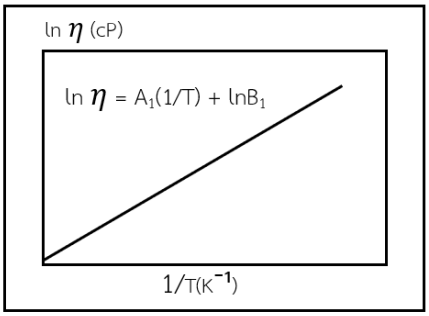
เมื่อแรงบิดของมอเตอร์แปรผันโดยตรงกับค่าความหนืดของของเหลว จึงสามารถวัดค่าความหนืดนี้ได้จากการวัดแรงบิดของมอเตอร์ แต่เนื่องจากแรงบิดนี้แปรผันโดยตรงกับกระแสของมอเตอร์ ดังนั้นจึงสามารถวัดความหนืดได้จากการวัดกระแสของมอเตอร์ ถ้าให้ I เป็นกระแสของมอเตอร์ จะได้



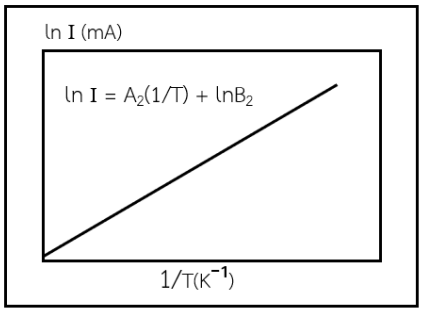
$$\eta = KI \qquad (1)$$

โดยที่ K เป็นค่าคงที่ ซึ่งขึ้นอยู่กับคุณสมบัติของมอเตอร์ แต่ในทางปฏิบัติแล้ว จะหาค่า K นี้โดยตรงจากการปรับเทียบกับเครื่องวัดความหนืดมาตรฐาน (สุขสันติ์ นุ่มงามและคณะ ,2538)

การทำงานของเครื่องวัดความหนืดที่ได้พัฒนาขึ้นจากการศึกษารูปแบบการทำงานของเครื่องวัดความหนืดมาตรฐานและเครื่องกวนสารด้วยแรงแม่เหล็ก จึงมีแผนภาพการทำงานดังภาพที่ 1 โดยจะประกอบด้วย ชุดต้นกำลังมอเตอร์ ชุดควบคุมความเร็วรอบไมโครคอนโทรลเลอร์และจอแสดงผล มอเตอร์จะต่อผ่านความต้านทาน R_{sensor} ซึ่งทำหน้าที่เป็นตัววัดกระแสของมอเตอร์โดยวัดจากแรงดันตกคร่อมความต้านทานนี้ส่งต่อไปให้วงจรขจัดออฟเซทและวงจรอินเทอร์เฟส



โดยทำการวัดความหนืดที่อุณหภูมิต่าง ๆของของเหลว โดยให้มอเตอร์หมุนที่ความเร็วรอบ 150 รอบต่อนาที ใส่แท่งกวนแม่เหล็กลงในบีกเกอร์เปล่า ขนะนี้จะมีกระแสไหลผ่านมอเตอร์จำนวนหนึ่งเรียกว่า กระแสออฟเซท ซึ่งมีค่าเล็กน้อยเท่านั้นเพราะเป็นเพียงกระแสที่ให้มอเตอร์เอาชนะความเสียดทานต่าง ๆ ขณะไม่มีโหลด แต่เมื่อใส่กลีเซอรีนลงในบีกเกอร์เพื่อวัดความหนืด กระแสของมอเตอร์จะมาก ขึ้นตามความหนืด เมื่อเรานำเอากระแสออฟเซทมาหักออกจากค่ากระแสที่วัดได้ ผลที่ได้ก็จะเป็นกระแสมอเตอร์ I ในสมการ 1 ซึ่งเป็นกระแสที่เกิดขึ้นจากผลของความหนืดของของเหลววงจรขจัดออฟเซ็ทจะทำหน้าที่ดังกล่าวเพื่อหากระแส I



วงจรอินเทอร์เฟส จะทำหน้าที่แปลงค่ากระแสที่ได้จากวงจรขจัดออฟเซทให้อยู่ในรูปแบบที่เหมาะสมพร้อมที่จะส่งไปให้ไมโครคอนโทรลเลอร์ประมวลผลและส่งผลที่ได้นี้ไปที่จอแสดงผลเพื่อแสดงค่าความหนืดที่วัดได้

รูปที่ 1 แผนภาพการทำงานของเครื่อง

สมการที่ใช้ในการหาค่าความหนืดของของเหลว (กิตติศักดิ์ รอดเริง ,2554)

(ก) (ข)

รูปที่ 2 (ก) กราฟแสดงความสัมพันธ์ระหว่าง ln η (cP) กับ 1/T(K^{-1})
(ข) กราฟแสดงความสัมพันธ์ระหว่าง ln I (mA) กับ 1/T(K^{-1})

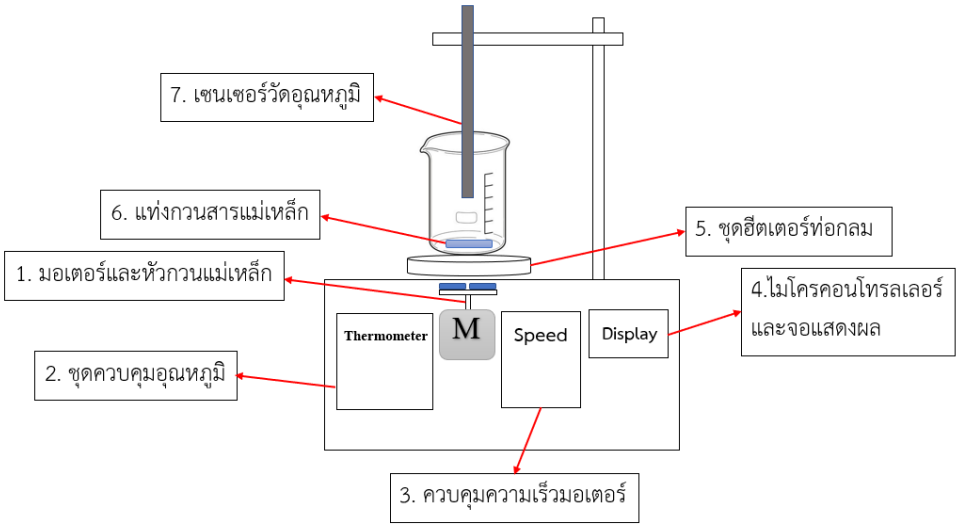
จากรูปที่ 2 จะได้ว่า

$$\ln \eta = A_1(1/T) + \ln B_1 \Rightarrow \eta = B_1 e^{A_1(1/T)} \quad (2)$$

และ $$\ln I = A_2(1/T) + \ln B_2 \Rightarrow I = B_2 e^{A_2(1/T)} \quad (3)$$

เมื่อความชันของกราฟทั้งสองเท่ากัน จะได้ $e^{A_1(1/T)} \approx e^{A_2(1/T)}$

นั่นคือ $$\eta = KI = \frac{B_1}{B_2} I \quad (4)$$



เมื่อ η = ความหนืดของของเหลว (cP)
A_1 และ A_2 = ความชันของกราฟ
ln B_1 และ ln B_2 = จุดตัดบนแกน Y
I = กระแสไฟฟ้า (mA)
T = อุณหภูมิ (K)

นำค่าความหนืดที่คำนวณได้จากสมการที่ (4) ไปเปรียบเทียบกับค่าความหนืดจากเครื่องมาตรฐานที่อุณหภูมิต่าง ๆ ดังแสดงในสมการที่ (5) เพื่อคำนวณหาค่าเปอร์เซ็นต์ความคลาดเคลื่อน

$$\text{เปอร์เซ็นต์ความคลาดเคลื่อน} = \frac{\text{ค่าความหนืดจากเครื่องที่สร้างขึ้น} - \text{ค่าความหนืดที่ได้จากเครื่องมาตรฐาน}}{\text{ค่าความหนืดที่ได้จากเครื่องมาตรฐาน}} \times 100 \quad (5)$$

1.1 การออกแบบเครื่อง เริ่มจากการศึกษารูปแบบการทำงานของเครื่องวัดความหนืดมาตรฐานและเครื่องกวนสารด้วยแรงแม่เหล็ก องค์ประกอบหลักคือ ชุดควบคุมอุณหูภูมิแบบดิจิตอล มอเตอร์พร้อมหัวกวนแบบแม่เหล็ก ชุดควบคุมความเร็วมอเตอร์ และไมโครคอนโทรลเลอร์พร้อมจอแสดงผล ดังรูปที่ 3 มีหลักการทำงานคล้ายครึ่งกับเครื่องวัดความหนืดมาตรฐานและเครื่องกวนสารแบบแม่เหล็กเข้าด้วยกัน โดยใช้แรงแม่เหล็กถาวร 2 อัน แม่เหลีกตัวที่หนึ่งอยู่ด้านในตัวเครื่องเป็นตัวขับส่งแรงขับด้วยมอเตอร์ แม่เหล็กตัวที่สองอยู่ในภาชนะที่ใส่สารเคมีเป็นแม่เหล็กตัวตาม เมื่อแม่เหล็กตัวขับหมุนตามแนวเส้นรอบวง ทำให้แม่เหล็กตัวกวนสารเคมีหมุนตาม ทำให้สารละลายที่อยู่ในภาชนะหมุนวนตามแรงแม่เหล็กที่ขับ การวัดค่าความหนืดจะกระทำโดยการให้มอเตอร์หมุนด้วยความเร็วคงที่ในของเหลวที่ต้องการวัด และแรงบิดของมอเตอร์นี้จะขึ้นอยู่กับความหนืดของของเหลว

ดังนั้น แรงบิดที่เกิดขึ้นในมอเตอร์จึงแปรผันโดยตรงกับค่าความหนืดของของเหลว ในขณะที่กระแสของมอเตอร์ จะแปรผันโดยตรงกับแรงบิด ในระบบนี้เราจะวัดความหนืดด้วยการวัดกระแสที่ไหลผ่านมอเตอร์ค่ากระแสนี้จะถูกแปลงเป็นสัญญาณ ที่เหมาะสมแล้วส่งให้ไมโครคอนโทรลเลอร์ทำการประมวลผลและแสดงผลเป็นค่าความหนืด

รูปที่ 3 แผนภาพการทำงานของเครื่องความหนืดอเนกประสงค์

1.2 การสร้างเครื่องความหนืดอเนกประสงค์ มีอุปกรณ์การสร้าง ดังนี้

1.2.1 มอเตอร์ฟ้าและหัวกวนแม่เหล็ก มอเตอร์ที่ใช้ขับหัวกวนนี้เป็นมอเตอร์กระแสตรงชนิดที่ใช้แม่เหล็กถาวรเป็นตัวกำเนิดสนามแม่เหล็ก พิกัดของมอเตอร์นี้คือ 12 โวลต์, 0.6 แอมป์, ความเร็วรอบ 1,000 รอบต่อนาที

1.2.2 ชุดควบคุมอุณหภูมิแบบดิจิตอล รุ่น Ch702 พิกัดชุดควบคุมอุณหภูมิคือ 220-265 โวลต์ สามารถวัดอุณหภูมิในช่วง 0–400 องศาเซลเซียส

1.2.3 ชุดควบคุมความเร็วมอเตอร์ รุ่น PWM จอแสดงค่าความเร็วรอบในหน่วย เปอร์เซ็นต์ ช่วง 0-100 เปอร์เซ็นต์

1.2.4 ไมโครคอนโทรลเลอร์ ใช้บอร์ด Arduino Mega ควบคุมการทำงานและแสดงผลการทำงานของเครื่องด้วยจอ LCD ขนาด 16 ตัวอักษร 2 บรรทัด

1.2.5 ชุดฮีตเตอร์ท่อกลม ขนาดเส้นผ่านศูนย์กลาง 150 มิลลิเมตร แรงดัน 1200 วัตต์

1.2.6 แท่งกวนสารแม่เหล็ก ที่มีขนาดเส้นผ่านศูนย์กลาง 3 มิลลิเมตร ความยาว 8 มิลลิเมตร ทนความร้อนสูงสุด 270 องศาเซลเซียส

1.2.7 เซนเซอร์วัดอุณหภูมิ ประเภท K-Type สามารถวัดอุณหภูมิได้ตั้งแต่ช่วง 0-400 องศาเซลเซียส

2. ขั้นตอนการทดลอง

อุปกรณ์

- กลีเซอรีน
- บีกเกอร์ ขนาด 250 มิลลิลิตร
- เครื่องวัดความหนืดมาตรฐาน ยี่ห้อ brookfield รุ่น DV-E viscometer
- เครื่องวัดความหนืดอเนกประสงค์

2.1 การทดลองหาค่าความหนืดของของเหลว โดยใช้เครื่องมือวัดค่าความหนืดจากเครื่องมาตรฐาน

2.1.1 นำกลีเซอรีนบรรจุลงในบีกเกอร์ที่ปริมาตร 100 มิลลิลิตร วัดค่าความหนืดจากเครื่องวัดความหนืดมาตรฐาน

2.1.2 วัดความหนืดของกลีเซอรีนที่อุณหภูมิ 25 องศาเซลเซียส อ่านค่าและบันทึกผล จากนั้นเพิ่มอุณหภูมิทุก ๆ 5 องศาเซลเซียส จนถึง 70 องศาเซลเซียส ตามลำดับ อ่านค่าและบันทึกผลการทดลอง โดยทำการทดลองซ้ำ 3 ครั้ง

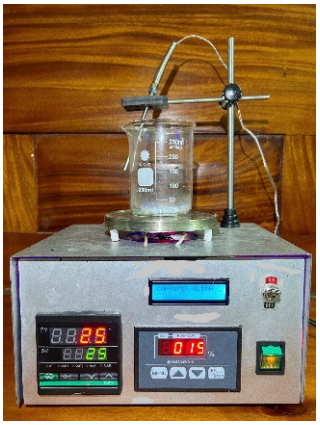
2.1.3 นำค่าความหนืดที่ได้จากข้อ 2.1.2 ไปเขียนกราฟแสดงความสัมพันธ์ระหว่าง 1/T (K^{-1}) บนแกน X และ ln η (cP) บนแกน y ดังรูปที่ 2 (ก) เพื่อดูความสัมพันธ์ของกราฟเชิงเส้น

2.1.4 นำค่าความชันที่ได้จากกราฟที่ได้จากข้อ 2.1.3 ไปคำนวณในสมการที่ (2)

(ก) (ข)

รูปที่ 4 (ก) กลีเซอรีนสารเคมีมาตรฐาน (ข) เครื่องวัดความหนืดมาตรฐานยี่ห้อ brookfield รุ่น DV-E viscometer

2.2 การทดลองหาค่าคงที่ของค่ากระแสจากเครื่องวัดความหนืดอเนกประสงค์



2.2.1 วางบีกเกอร์เปล่าบนเครื่องวัดความหนืดอเนกประสงค์พร้อมใส่แท่งกวนสารแม่เหล็กลงและปรับความเร็วรอบให้มอเตอร์หมุนด้วยความเร็วรอบที่ 150 รอบต่อนาที อ่านค่ากระแสไฟฟ้าและบันทึกผล โดยทำการทดลองซ้ำ 3 ครั้ง

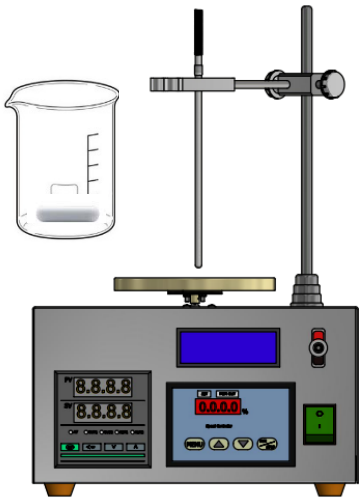
2.2.2 ใส่กลีเซอรีน ปริมาตร 100 มิลลิลิตร บรรจุลงในบีกเกอร์พร้อมใส่แท่งกวนสารแม่เหล็ก ปรับอุณหภูมิที่อุณหภูมิ 25 องศาเซลเซียส อ่านค่าและบันทึกผล จากนั้นเพิ่มอุณหภูมิทุก ๆ 5 องศาเซลเซียส จนถึง 70 องศาเซลเซียส ตามลำดับ อ่านค่ากระแสไฟฟ้าและบันทึกผลการทดลอง โดยทำการทดลองซ้ำ 3 ครั้ง

2.2.3 นำค่ากระแสไฟฟ้าที่ได้จากข้อ 2.2.2 ลบด้วยค่ากระแสไฟฟ้าจากข้อ 2.2.1 นำข้อมูลที่ได้ ไปเขียนกราฟแสดงความสัมพันธ์ระหว่าง 1/T (K^{-1}) บนแกน X และ ln I (mA) บนแกน y ดังรูปที่ 2 (ข) เพื่อดูความสัมพันธ์ของกราฟเชิงเส้น

2.2.4 หลังจากนั้นนำค่าความชันที่ได้จากกราฟไปคำนวณในสมการที่ (3)

2.2.5 เมื่อได้ค่าความชันกราฟจากข้อ 2.1.4 และข้อ 2.2.3 นำไปคำนวณหาค่าความหนืดในสมการที่ (4) และนำไปเปรียบเทียบกับค่าความหนืดจากเครื่องมาตรฐาน ในสมการที่ (5) เพื่อคำนวณหาค่าเปอร์เซ็นต์ความคลาดเคลื่อน

(ก) (ข)



รูปที่ 5 (ก) ทดลองหาค่ากระแสขณะไม่มีของเหลว (ข) ทดลองหาค่ากระแสขณะมีของเหลว

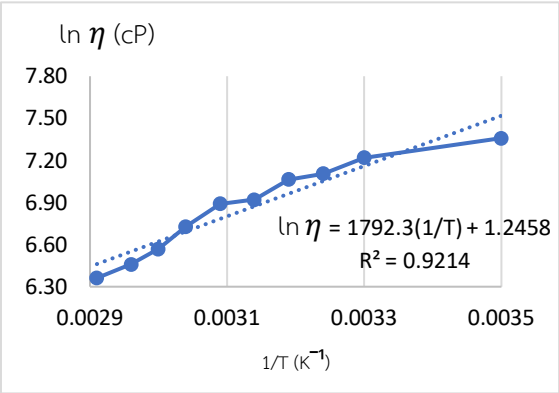
สรุปผลการวิจัย

1. ผลการสร้างและพัฒนาเครื่องวัดความหนืดอเนกประสงค์

เครื่องวัดความหนืดอเนกประสงค์ได้หลักการทำงานของเครื่องวัดความหนืดและเครื่องกวนสารด้วยแม่เหล็กเข้าด้วยกัน โดยใช้แรงแม่เหล็กถาวร 2 อัน ตัวที่หนึ่งอยู่ด้านในตัวเครื่องและแม่เหล็กตัวที่สองอยู่ในภาชนะที่ใส่สารละลาย ดังรูปที่ 6 ซึ่งประกอบด้วย ชุดต้นกำลังมอเตอร์ ชุดควบคุมความเร็วมอเตอร์ ชุดควบคุมอุณหภูมิและไมโครคอนโทรลเลอร์พร้อมจอแสดงผล โดยใช้มอเตอร์กระแสตรงขนาด 12 โวลต์ กระแสไฟฟ้า 0.6 แอมป์ ความเร็วรอบ 0-1,000 รอบต่อนาที ควบคุมอุณหภูมิตั้งแต่ 20-100 องศาเซลเซียส และใช้แท่งกวนแม่เหล็กขนาดเส้นผ่านศูนย์กลาง 3 มิลลิเมตร ความยาว 8 มิลลิเมตร เครื่องวัดความหนืดอเนกประสงค์สามารถกวนสารละลายพร้อมให้ความร้อนจากเตาไฟฟ้าเพลทร้อน ควบคุมอุณหภูมิของสารละลาย ควบคุมความเร็วมอเตอร์และวัด

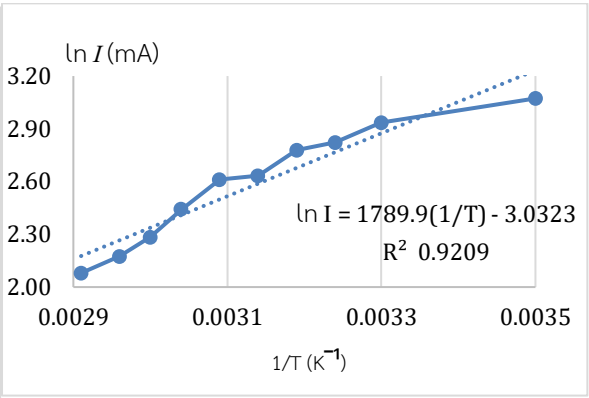
ความหนืดของสารละลาย โดยการวัดความหนืดนี้ เมื่อสั่งมอเตอร์หัวกวนหมุนที่ความเร็วรอบ 150 รอบต่อนาที จะทำให้กระแสไฟฟ้าของมอเตอร์มีขนาดเพิ่มขึ้นตามความหนืด ค่ากระแสนี้จะถูกเปลี่ยนเป็นค่าความหนืดที่วัดค่าได้ตามการเปรียบเทียบกับความหนืดมาตรฐานของกลีเซอรีนและถูกส่งต่อไปที่วงจรไมโครคอนโทรลเลอร์เพื่อทำการนับแล้วแสดงผลความหนืดเป็นเชิงตัวเลข

รูปที่ 6 แสดงภาพออกแบบเครื่องวัดความหนืดอเนกประสงค์



2. ผลการทดลอง

ผลการทดลองหาค่าความหนืดของของเหลวจากเครื่องมาตฐานและหาค่ากระแสไฟฟ้าจากเครื่องวัดความหนืดอเนกประสงค์ ที่อุณหภูมิต่าง ๆ ของของเหลว โดยใช้ความเร็วรอบ 150 รอบต่อนาที ซึ่งกระแสไฟฟ้าขณะไม่มีของเหลว มีค่าคงที่เท่ากับ 120 มิลลิแอมป์



ตารางที่ 1 บันทึกค่าความหนืดจากเครื่องมาตฐานและค่ากระแสไฟฟ้าจากเครื่องวัดความหนืดอเนกประสงค์ ที่อุณหภูมิต่าง ๆ

T (°C)	1/T (K^{-1})	η (cP)	ln η (cP)	$I_{มีของเหลว}$ (mA)	$I_{มีของเหลว-ไม่มีของเหลว}$ (mA)	$ln\ (I_{มีของเหลว-ไม่มีของเหลว})$ (mA)
25	$3.35x10^{-1}$	1,570.18	7.3589	141.2	21.6	3.0727
30	$3.30x10^{-1}$	1,365.78	7.2195	139.2	18.8	2.9339
35	$3.24x10^{-1}$	1,217.12	7.1042	138.5	16.8	2.8214
40	$3.19x10^{-1}$	1,170.67	7.0653	136.9	16.1	2.7788
45	$3.14x10^{-1}$	1,012.72	6.9204	134.7	13.9	2.6319
50	$3.09x10^{-1}$	984.25	6.8919	133.1	13.6	2.6101
55	$3.04x10^{-1}$	836.24	6.7289	132.6	11.5	2.4423
60	$3.00x10^{-1}$	713.38	6.5700	130.9	9.8	2.2824
65	$2.96x10^{-1}$	639.21	6.4602	128.3	8.8	2.1748
70	$2.91x10^{-1}$	579.08	6.3614	127.8	8.0	2.0794

เมื่อได้ค่าความหนืดและค่ากระแสไฟฟ้าของของเหลว นำข้อมูลในตารางที่ 1 มาเขียนกราฟความสัมพันธ์ระหว่าง 1/T (K^{-1}) กับ ln η (cP) และกราฟความสัมพันธ์ระหว่าง 1/T (K^{-1}) กับ ln I (mA) ดังรูปที่ 7 มีความสัมพันธ์ของกราฟแบบเชิงเส้นเหมือนกันและให้ค่าความชันที่ใกล้เคียงกัน นั่นคือค่ากระแสไฟฟ้าที่อุณหภูมิต่าง ๆ มีความสัมพันธ์เช่นเดียวกันกับความหนืดของสารที่อุณหภูมิเดียวกัน นำข้อมูลที่ให้จากกราฟทั้งสองไปหาค่าความหนืดของสารเมื่อความชันของกราฟทั้งสองเท่ากัน

(ก)

(ข)

รูปที่ 7 (ก) กราฟแสดงความสัมพันธ์ระหว่างค่า 1/T(K^{-1}) และ ln η (cP)
(ข) กราฟความสัมพันธ์ระหว่าง 1/T(K^{-1}) กับ ln I (mA)

วิธีหาค่าคงที่ของความหนืดที่อุณหภูมิต่าง ๆ จากรูปที่ 7

จะได้ $\ln \eta = 1{,}792.3(1/T) + 1.2458 \Rightarrow \eta = B_1 e^{1792.3(1/T)}$

$\ln I = 1{,}789.9(1/T) - 3.0455 \Rightarrow I = B_2 e^{1789.9(1/T)}$ (3)

เมื่อความชันของกราฟทั้งสองใกล้เคียงกัน จะได้ $e^{1792.3(1/T)} \approx e^{1789.9(1/T)}$

นั่นคือ $\eta = \frac{B_1}{B_2} I$

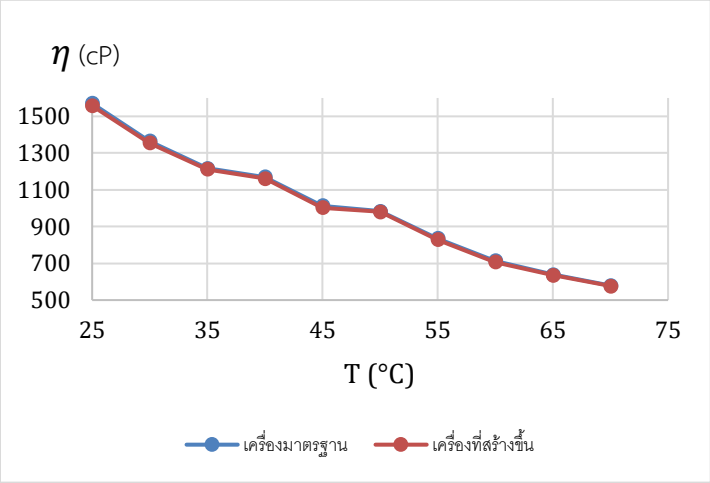
จะได้ $\ln B_1 = 1.2458$

$B_1 = 3.476$

และ $\ln B_2 = -3.0323$

$B_2 = 0.0482$

ซึ่งคือสมการที่ (4) ดังนั้นจะได้



$$\eta = (72.10)\, I \quad (6)$$

สามารถหาค่าความหนืดของของเหลวที่อุณหภูมิต่าง ๆ ได้จากสมการที่ 6 ซึ่งผลที่ได้จากการหาค่าคงที่ของความหนืดที่ความเร็วรอบ 150 รอบต่อนาที จากการหาค่าความหนืดของกลีเซอรีน ด้วยเครื่องวัดความหนืดมาตรฐานกับเครื่องที่สร้างขึ้นมาและได้ค่าเปอร์เซ็นต์ความคลาดเคลื่อน ดังตารางที่ 3

ตารางที่ 3 ตารางแสดงค่าเปอร์เซ็นต์ความคลาดเคลื่อน

อุณหภูมิ (°C)	ค่าความหนืด จากเครื่องมาตรฐาน	ค่าความหนืด จากเครื่องที่สร้างขึ้น	เปอร์เซ็นต์ ความคาดเคลื่อน
25	1,570.18	1,557.36	0.82
30	1,365.78	1,355.48	0.75
35	1,217.12	1,211.28	0.48
40	1,170.67	1,160.81	0.84
45	1,012.72	1,002.19	1.04
50	984.25	980.56	0.37
55	836.24	829.15	0.85
60	713.38	706.58	0.95
65	639.21	634.48	0.74
70	579.08	576.8	0.39

จากตารางแสดงให้เห็นว่า เมื่อสารละลายมีอุณหภูมิสูงขึ้นค่าความหนืดจะมีค่าลดลงและค่าความหนืดของสารละลายที่ได้จากการทดลองที่อุณหภูมิต่าง ๆ เมื่อเปรียบเทียบกับเครื่องวัดความหนืดมาตรฐานแล้ว พบว่ามีค่าเปอร์เซ็นต์ความคลาดเคลื่อนในช่วง 0.37-1.04 ซึ่งมีความคลาดเคลื่อนเพียงเล็กน้อยเท่านั้น

รูปที่ 8 กราฟค่าเปอร์เซ็นต์ความคลาดเคลื่อน

อภิปรายผลการวิจัย

การสร้างและพัฒนาเครื่องวัดความหนืดอเนกประสงค์ โดยใช้พลังแม่เหล็ก สามารถทำงานได้หลากหลายในเวลาเดียวกัน คือ การกวนสารละลายพร้อมให้ความร้อนจากเตาไฟฟ้าเพลทร้อน ควบคุมอุณหภูมิของสารละลาย ควบคุมความเร็วมอเตอร์และวัดความหนืด การวัดความหนืดนี้ เมื่อสั่งให้หัวกวนมีความเร็วรอบที่ 150 รอบต่อนาที จะได้ค่ากระแสไฟฟ้าของมอเตอร์และส่งให้ไมโครคอนโทรลเลอร์เพื่อประมวลผลและส่งต่อไปที่จอแสดงผลค่าความหนืดที่วัดได้

งานวิจัยนี้ได้ทำการหาค่ากระแสไฟฟ้าเพื่อนำไปสู่ขั้นตอนการหาค่าความหนืดของกลีเซอรีนที่อุณหภูมิ 25-70 องศาเซลเซียสที่ความเร็วรอบ 150 รอบต่อนาที โดยที่ความหนืดของกลีเซอรีนแปรผันโดยตรงกับกระแสไฟฟ้าจะเห็นได้ว่าเมื่อสารละลายมีอุณหภูมิสูงขึ้นส่งผลให้ค่ากระแสไฟฟ้าลดน้อยลง ซึ่งสามารถหาค่าความหนืดได้จากสมการ $\eta = (72.10)\,I$ โดยเครื่องมือวัดความหนืดอนกประสงค์ มีเปอร์เซ็นต์ความคลาดเคลื่อนช่วง 0.37-1.04 เนื่องจากเครื่องวัดความหนืดอเนกประสงค์เป็นการทดลองกับความหนืดของกลีเซอรีนเพียงสารเดียวและการวัดความหนืดเป็นแบบแม่เหล็กจึงใช้วัดความหนืดได้อย่างจำกัด ดังนั้นเครื่องวัดความหนืดอเนกประสงค์นี้จึงเป็นการเพิ่มทางเลือกสำหรับการใช้ในการกวนสารละลายพร้อมให้ความร้อนและวัดความหนืดได้ในเวลาเดียวกัน ซึ่งต้นทุนของเครื่องมือในการสร้างไม่สูงมาก สามารถหาซื้อได้ทั่วไปเมื่อเทียบกับเครื่องวัดความหนืดมาตรฐานและเหมาะสำหรับใช้ในภาคการศึกษาหรือห้องปฏิบัติการ

ข้อเสนอแนะ

1. ควรเพิ่มฟังก์ชันในการวัดความหนืดให้สามารถวัดความหนืดของสารละลายได้หลากหลายชนิด

บทคัดย่อ

การศึกษาครั้งนี้เป็นการวิจัยเชิงปฏิบัติการ มีวัตถุประสงค์เพื่อ 1) ศึกษาสภาพปัจจุบันและปัญหาของกระบวนการผลิตอิฐบล็อก และ 2) เพื่อลดของเสียในกระบวนการผลิตอิฐบล็อก ร้านศิลารุ่งเรืองวัสดุก่อสร้าง ผู้ให้ข้อมูล ประกอบด้วย เจ้าของร้านศิลารุ่งเรืองวัสดุก่อสร้าง 1 คน พนักงานผู้ปฏิบัติงานฝ่ายผลิตอิฐบล็อก จำนวน 3 คน โดยใช้หลักการปรับปรุงคุณภาพกระบวนการเพื่อวิเคราะห์หาสาเหตุของปัญหา แก้ไขปัญหาที่ต้นเหตุที่วิเคราะห์มาได้ และนำไปปฏิบัติ ผลการศึกษา พบว่า 1) กระบวนการผลิตก่อนปรับปรุง มีขั้นตอนการดำเนินงาน 10 ขั้นตอน และมีของเสีย คิดเป็นร้อยละ 7.69 จากการวิเคราะห์ปัญหา พบปัญหาของกระบวนการผลิตอิฐบล็อก ในขั้นตอน ก) การคัดเลือกและจัดเตรียมส่วนผสม ข) ขั้นตอนการผสมค) การเทส่วนผสมลงพิมพ์ และ ง) ขั้นตอนการถอดออกจากบล็อก 2) แนวทางในการลดของเสีย คือ การติดต่อไปยังผู้ส่งมอบวัตถุดิบเพื่อแจ้งให้พิจารณาปรับเปลี่ยนแหล่งวัตถุดิบ การกำหนดสูตรสัดส่วนวัตถุดิบให้เป็นมาตรฐานและการจัดหาเครื่องชั่งที่เหมาะสมในจุดที่ผลิต การสร้างด้ามจับแม่พิมพ์และการนำเหล็กมากระทุ้งตัวอิฐลงในแม่พิมพ์ในแน่นขึ้น 3) หลังการปฏิบัติตามแนวทางที่ปรับปรุง ของเสียที่เกิดขึ้นลดลงเหลือ ร้อยละ 3.25

คำสำคัญ: การลดของเสีย, การปรับปรุงกระบวนการ, การผลิต, อิฐบล็อก

Abstract

This study is an action research. The objectives are twofold: 1) to study the current situation and problems of the brick block production process, and 2) to reduce defects in the brick block production process of Sila Rung Rueng Building Material Shop. The informant groups consist of one shop-owner and three brick block production staff of Sila Rung Rueng Building Material Shop. The study used the process improvement concepts to investigate the problems, determine the root causes, and implement the improvement solutions to problems. Results showed as followings: 1) the production process before the improvement included 10 operating procedures and found a defect rate of 7.69%; moreover, problems in the brick block production process were found in the following procedures: a) selection and preparation of the mixture, b) mixing raw material, c) pouring mixture into the molds, and d) block removal; 2) solutions to problems include a) notify the raw material suppliers to adjusting the sources of raw materials. b) standardize raw material proportions and provide suitable scales at the point of production, c) install the mold holder, and d) stab the material mixture with an iron rod thoroughly for reducing air bubble incurred during the process, and 3) after following the improvement solutions, the resulting waste is ratio to 3.25%

Keywords: Defect reduction, Process improvement, Production, Brick block

บทนำ

ปัจจุบันอุตสาหกรรมการผลิตมีการแข่งขันกันทั้งทางด้านราคาและคุณภาพของสินค้า ตลอดจนความต้องการของลูกค้าที่เพิ่มสูงขึ้น ส่งผลให้ธุรกิจจำเป็นต้องมีการปรับปรุงกระบวนการทำงานอย่างต่อเนื่อง เพื่อลดต้นทุนการผลิตให้น้อยลง และเพิ่มโอกาสเชิงการแข่งขันให้มากขึ้น การผลิตอิฐบล็อกเป็นธุรกิจที่ดำเนินการในลักษณะวิสาหกิจขนาดกลางและขนาดเล็กที่ได้รับความนิยมในตลาดท้องถิ่นเพิ่มมากขึ้นเรื่อย ๆ (ณัฏฐา จิระจิตต์มีชัย และคณะ, 2563) มีตลาดที่กว้างขวางและมีการแข่งขันค่อนข้างสูง อิฐบล็อกเป็นวัสดุสำคัญที่ช่วยในการสร้างกำแพงและผนังของอาคารให้แข็งแรงและปลอดภัย นิยมจำหน่ายควบคู่กับวัสดุก่อสร้างชนิดอื่นในร้านจำหน่ายวัสดุก่อสร้าง (วัชรียา ชุมอินทอง และนพปฎล สุวรรณทรัพย์, 2560) เพื่อเพิ่มความสะดวกให้กับลูกค้าให้สามารถซื้อวัสดุก่อสร้างที่ต้องการได้ครบในจุดเดียว และยังถือเป็นการสร้างผลกำไรเพิ่มอีกทางหนึ่งของร้านวัสดุก่อสร้างอีกด้วย โดยในกระบวนการผลิตอิฐบล็อกจำเป็นต้องมีการพัฒนาและปรับปรุงประสิทธิภาพอย่างสม่ำเสมอ

ร้านศิลารุ่งเรืองวัสดุก่อสร้าง ตั้งอยู่ที่บ้านเลขที่ 48 หมู่ 10 ตำบลคลองหาด อำเภอคลองหาด จังหวัดสระแก้ว ประกอบธุรกิจขนาดเล็กจำหน่ายวัสดุก่อสร้างเป็นหลัก สินค้าของร้าน ได้แก่ เสา เหล็ก หิน ปูน ทราย ฯลฯ อีกทั้งยังมีการผลิตอิฐบล็อกเพื่อจำหน่ายเอง โดยจำหน่ายในพื้นที่อำเภอคลองหาดและอำเภอใกล้เคียงในเขตจังหวัดสระแก้ว

ผู้วิจัยได้เข้าสังเกตเบื้องต้นในกระบวนการผลิตอิฐบล็อกของร้านศิลารุ่งเรืองวัสดุก่อสร้าง ระหว่างวันที่ 19 กรกฎาคม ถึง 26 กรกฎาคม 2565 รวม 7 วัน ระหว่างเวลา 08:00 น. – 17:00 น. พบว่า กระบวนการผลิตมีการใช้เครื่องจักรและกำลังคนเป็นฐานการผลิตควบคู่กันไป กล่าวคือ มีการใช้เครื่องจักรในการผสมวัตถุดิบ พร้อมกับใช้แรงงานคนในการควบคุมเครื่องจักร ป้อนวัตถุดิบและขนย้ายผลผลิต ในขั้นตอนการผสมวัตถุดิบและขั้นตอนการอัดขึ้นรูปของอิฐบล็อกนั้น เกิดของเสียในกระบวนการผลิต จำนวน 794 ชิ้น คิดเป็นร้อยละ 7.56 เนื่องจากการผลิตดำเนินการโดยใช้ประสบการณ์หรือความชำนาญของพนักงานผลิต ไม่มีหรือไม่ดำเนินการตามวิธีการปฏิบัติงานมาตรฐาน ส่งผลให้ผลิตภัณฑ์เกิดข้อบกพร่องในกระบวนการผลิต และทำให้อัตราการผลิตลดลง ด้วยปัญหาเหล่านี้ผู้วิจัยจึงมีความสนใจที่จะศึกษาการลดของเสียในกระบวนการผลิตอิฐบล็อกในครั้งนี้

วัตถุประสงค์การวิจัย

1. เพื่อศึกษาสภาพปัจจุบันและปัญหาของกระบวนการผลิตอิฐบล็อกของร้านศิลารุ่งเรืองวัสดุก่อสร้าง
2. เพื่อลดของเสียในกระบวนการผลิตอิฐบล็อกของร้านศิลารุ่งเรืองวัสดุก่อสร้าง

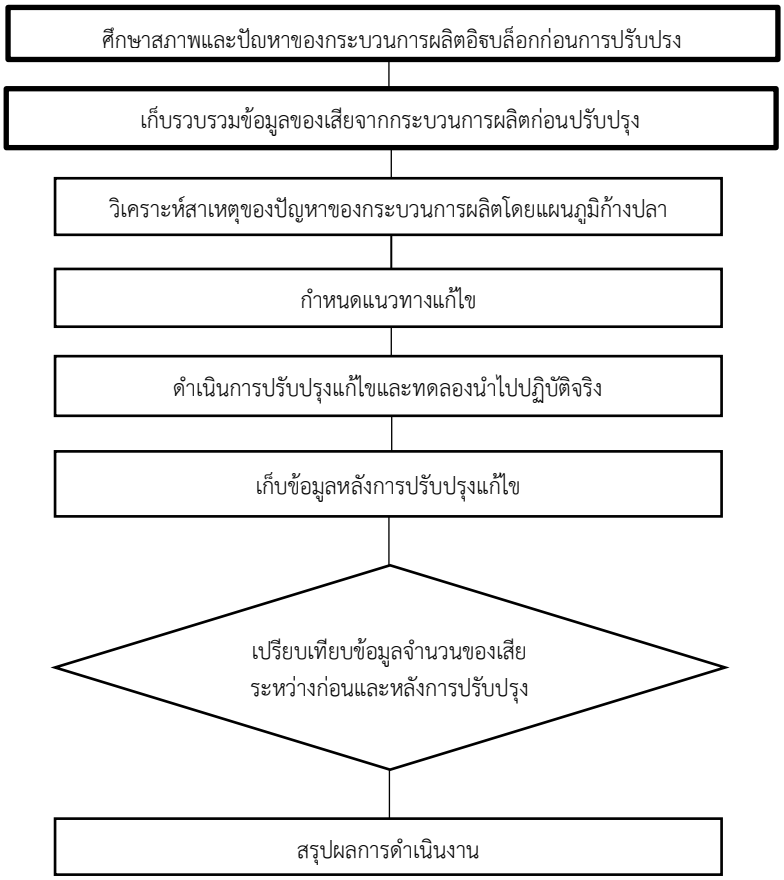
วิธีการดำเนินการวิจัย

1. กลุ่มผู้ให้ข้อมูล

การวิจัยเรื่องการลดของเสียในกระบวนการผลิตอิฐบล็อก ร้านศิลารุ่งเรืองวัสดุก่อสร้าง มีผู้ให้ข้อมูล คือ 1) พนักงานผู้ปฏิบัติงานฝ่ายผลิตอิฐบล็อก ร้านศิลารุ่งเรืองวัสดุก่อสร้าง จำกัด จำนวน 3 คน และ 2) เจ้าของร้านศิลารุ่งเรืองวัสดุก่อสร้าง จำกัด จำนวน 1 คน

2. ขอบเขตการวิจัย

ศึกษากระบวนการผลิตอิฐบล็อกของร้านศิลารุ่งเรืองวัสดุก่อสร้าง โดยใช้หลักการวิเคราะห์ทางคุณภาพ วิเคราะห์หาสาเหตุของปัญหาด้วยผังก้างปลา ปรับแก้ปัญหาที่ต้นเหตุสาเหตุนั้น ๆ



3. เครื่องมือที่ใช้ในการวิจัย

3.1 แบบสังเกตการณ์ โดยการสังเกตทางตรง ผู้วิจัยได้ลงพื้นที่ไปยังโรงงานผลิต เก็บและบันทึกข้อมูลจากการสังเกตกระบวนการทำงานโดยตรง

3.2 แบบสัมภาษณ์ ผู้วิจัยทำการสัมภาษณ์เชิงลึกกับเจ้าของกิจการ และพนักงานที่เกี่ยวข้องในการผลิตอิฐบล็อก โดยเป็นคำถามเกี่ยวกับขั้นตอนการผลิต ปริมาณการผลิต และปัญหาการผลิต

3.3 ผังก้างปลา (Fish bone diagram) รวบรวมข้อมูลเพื่อหาสาเหตุของปัญหา โดยระบุปัญหาหลักไว้ในส่วนของหัวปลา ในส่วนของตัวปลาจะเป็นปัจจัยหรือสาเหตุที่ส่งผลกระทบต่อหัวปลา

4. ขั้นตอนในการวิจัย

ภาพที่ 1 ขั้นตอนการวิจัย

5. การวิเคราะห์ข้อมูล

1. การวิเคราะห์หาสาเหตุของปัญหาของการเกิดของเสียด้วยผังก้างปลา (Fishbone diagram) โดยจำแนกลักษณะของปัญหาคือ ด้านวัตถุดิบ ด้านพนักงาน และด้านเครื่องมือเครื่องจักร ที่เกิดขึ้นในขั้นตอนการทำงานของการผลิตอิฐบล็อก ใช้การวิเคราะห์เนื้อหา (Content analysis) แล้วบันทึกข้อมูลสาเหตุแยกตามหมวดหมู่ของลักษณะปัญหาในผังก้างปลา

2. การวิเคราะห์แนวทางแก้ไขปัญหา โดยหาแนวทางการแก้ไขปัญหาจากสาเหตุ เพื่อนำมาใช้ในการแก้ไขปัญหาของกระบวนการผลิตอิฐบล็อก ใช้การระดมสมองร่วมกับพนักงานฝ่ายผลิต แล้วพิจารณาหาผลสรุปตามมติที่ประชุม

3. ปริมาณของเสียของกระบวนการผลิตอิฐบล็อกก่อนการปรับปรุงและหลังปรับปรุง คำนวณด้วยค่าสถิติ ร้อยละ

สรุปผลการวิจัย

1. ผลการศึกษาสภาพและปัญหาของกระบวนการผลิตอิฐบล็อกก่อนการปรับปรุง

จากการศึกษากระบวนการผลิตอิฐบล็อก เพื่อค้นหาปัญหาของกระบวนการผลิตอิฐบล็อกก่อนการปรับปรุง แสดงกระบวนการผลิตดังนี้

1.1 ส่วนผสมสำหรับการผลิตอิฐบล็อก

จากการศึกษากระบวนการผลิตอิฐบล็อก เพื่อค้นหาปัญหาของกระบวนการผลิตอิฐบล็อกก่อนการปรับปรุง แสดงกระบวนการผลิตดังนี้

ตารางที่ 1 ส่วนผสมสำหรับการผลิตอิฐบล็อก

ส่วนผิวหน้า	ส่วนตัวอิฐ
สีฝุ่น 1 ส่วน	ปูนซีเมนต์พอร์ทแลนด์ 1 ส่วน
ปูนซีเมนต์ขาว 3 ส่วน	หินฝุ่น 6 ส่วน
ทรายละเอียด 6 ส่วน	ทราย 3 ส่วน

1.2 กระบวนการผลิต

จากการสังเกตกระบวนการผลิต พบว่า กระบวนการผลิตประกอบด้วยขั้นตอนดังต่อไปนี้

ขั้นตอนที่ 1 คัดเลือกส่วนผสมและจัดเตรียมส่วนผสม

ขั้นตอนที่ 2 ดำเนินการผสมส่วนผสมลงในเครื่องโม่

ขั้นตอนที่ 3 โม่ผสมส่วนผสม

ขั้นตอนที่ 4 เตรียมพิมพ์อิฐบล็อกและกระเบื้องแช่น้ำเพื่อไม่ให้พิมพ์ดูดซึมน้ำจากส่วนผสม

ขั้นตอนที่ 5 เทส่วนผสมลงพิมพ์ อัดให้แน่น

ขั้นตอนที่ 6 ส่วนผสมของอิฐจะพูนเลยพิมพ์ขึ้นมา ใช้เกรียงโบกปาดให้เสมอ

ขั้นตอนที่ 7 ใส่ส่วนผสมผิวหน้า จากนั้นใช้เกรียงขัดมันปาดอีกครั้งให้เรียบ

ขั้นตอนที่ 8 ใช้กระเบื้องแผ่นเรียบที่แช่น้ำไว้ปิดบนบล็อก พร้อมทั้งคว่ำลงบนพื้น เพื่อป้องกันการแตกของอิฐ

ขั้นตอนที่ 9 การถอดอิฐออกจากบล็อก

ขั้นตอนที่ 10 เมื่ออิฐบล็อกถูกขึ้นรูปได้อย่างสมบูรณ์แล้ว จะถูกลำเลียงไปวางบนชั้นเหล็ก เพื่อไปยังสถานที่สำหรับพักอิฐบล็อก เพื่อพักให้แห้งสนิท โดยใช้เวลา 4 - 6 ชั่วโมง

1.3 สภาพปัญหาของกระบวนการผลิตอิฐบล็อกก่อนการปรับปรุง

ผู้วิจัยได้ทำการศึกษากระบวนการผลิตโดยเข้าสังเกตการปฏิบัติงานจริงของพนักงานฝ่ายผลิต และสัมภาษณ์กับเจ้าของร้านและพนักงานฝ่ายผลิต เพื่อสร้างความเข้าใจถึงบริบทของร้านและสอบถามถึงปัญหาและอุปสรรคจากกระบวนการผลิตที่ทำให้การผลิตขาดประสิทธิภาพ จากนั้นดำเนินการระดมสมองร่วมกับเจ้าของร้านและพนักงานฝ่ายผลิต เพื่อยืนยันปัญหาในแต่ละขั้นตอนตลอดจนหาแนวทางการแก้ไขปัญหาและปรับปรุงการทำงานในขั้นตอนต่าง ๆ ได้ ดังแสดงในตารางที่ 2

ตารางที่ 2 สภาพปัญหาของกระบวนการผลิตอิฐบล็อกก่อนการปรับปรุง

ขั้นตอน	วิธีการ	การพบปัญหาจากการระดมสมอง
ขั้นตอนที่ 1	คัดเลือกส่วนผสมและจัดเตรียมส่วนผสม	มีปัญหา
ขั้นตอนที่ 2	ดำเนินการผสมส่วนผสมลงในเครื่องโม่	มีปัญหา
ขั้นตอนที่ 3	โม่ผสมส่วนผสม	ไม่มีปัญหา
ขั้นตอนที่ 4	เตรียมแม่พิมพ์อิฐบล็อก โดยการใช้กระดาษหนังสือพิมพ์เช็ด น้ำมันที่แบบพิมพ์ให้ สะอาด	ไม่มีปัญหา
ขั้นตอนที่ 5	เทส่วนผสมลงพิมพ์ อัดให้แน่น	มีปัญหา
ขั้นตอนที่ 6	ส่วนผสมของอิฐจะพูนเลยพิมพ์ขึ้นมา ใช้เกรียงโบกปาดให้เสมอ	ไม่มีปัญหา
ขั้นตอนที่ 7	ใส่ส่วนผสมผิวหน้า จากนั้นใช้เกรียงขัดมันปาดอีกครั้งให้เรียบ	ไม่มีปัญหา
ขั้นตอนที่ 8	ใช้กระเบื้องแผ่นเรียบที่แช่น้ำไว้ปิดบนบล็อก พร้อมทั้งคว่ำลงบนพื้น	ไม่มีปัญหา
ขั้นตอนที่ 9	การถอดอิฐออกจากบล็อก	มีปัญหา
ขั้นตอนที่ 10	อิฐบล็อกถูกขึ้นรูปได้อย่างสมบูรณ์แล้ว จะถูกลำเลียงไปด้วยรางเหล็ก เพื่อไปยังสถานที่สำหรับพักอิฐบล็อก เพื่อพักให้แห้งสนิท โดยใช้เวลา 4-6 ชั่วโมง	ไม่มีปัญหา

จากตารางที่ 2 สามารถอธิบายผลการระดมสมองค้นหาปัญหาร่วมกับเจ้าของร้านและทีมผลิต ได้ดังนี้

ขั้นตอนที่ 1 คัดเลือกส่วนผสมและจัดเตรียมส่วนผสม: ในกระบวนการคัดเลือกและจัดเตรียมส่วนผสมส่วนผสม พบว่า หินฝุ่นจากแหล่งรับซื้อมีปริมาณฝุ่นปะปนสูง ซึ่งส่งผลให้การยึดเกาะระหว่างพื้นผิวอิฐบล็อกต่ำ ทำให้อิฐบล็อกเกิดการแตกหักง่าย

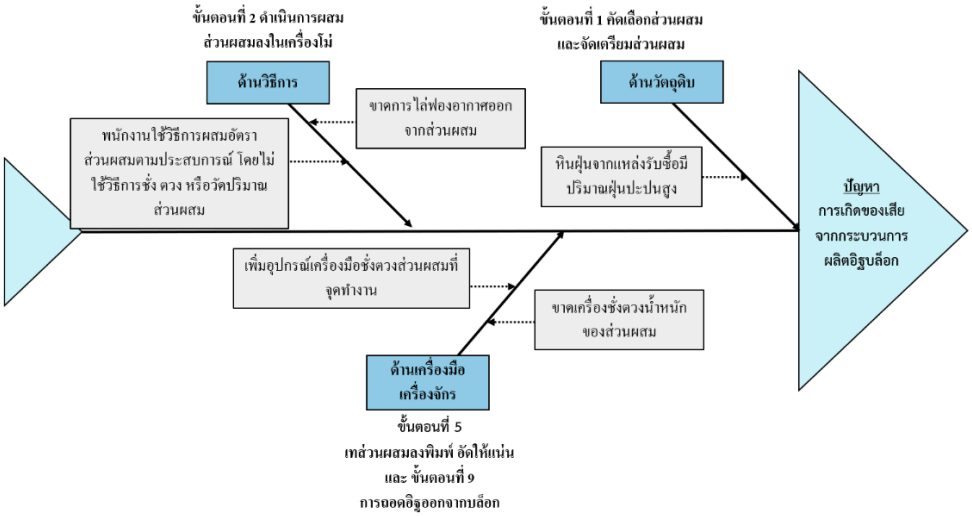
ขั้นตอนที่ 2 ดำเนินการผสมส่วนผสมลงในเครื่องโม่: สำหรับกระบวนการผสมส่วนผสมลงในเครื่องโม่ พบว่า ปัจจุบันพนักงานใช้วิธีการผสมอัตราส่วนผสมตามประสบการณ์โดยไม่ใช้วิธีการชั่ง ตวง หรือวัดปริมาณส่วนผสม ซึ่งจากวิธีการดำเนินการดังกล่าวเมื่อนำไปขึ้นแม่พิมพ์และตากจนแห้ง ส่งผลให้คุณภาพอิฐบล็อกที่ได้นั้นไม่คงที่

ขั้นตอนที่ 5 เทส่วนผสมลงพิมพ์ อัดให้แน่น: พนักงานอัดส่วนผสมตัวอิฐลงในแม่พิมพ์ไม่แน่นพอ ดังนั้น เมื่อนำออกจากแม่พิมพ์ จึงส่งผลให้อิฐบล็อกเกิดการแตกหักง่าย

ขั้นตอนที่ 9การถอดอิฐออกจากบล็อก: สำหรับขั้นตอนการถอดออกจากบล็อกนั้น พบว่า พนักงานขาดความระมัดระวังในการถอดอิฐบล็อกออกจากแม่พิมพ์ จึงทำให้อิฐบล็อกเริ่มมีลักษณะร้าว และแตกหักในขณะที่อิฐบล็อกแห้งแล้วในเวลาต่อมา

2. ผลการเก็บข้อมูลของเสียจากกระบวนการผลิตก่อนปรับปรุง

ผู้ศึกษาดำเนินเก็บรวบรวมข้อมูลของเสียจากกระบวนการผลิตก่อนปรับปรุงด้วยวิธีการโดยลงพื้นที่เพื่อสังเกตการณ์กระบวนการผลิตอิฐบล็อก จากนั้นเก็บข้อมูลของเสียจากกระบวนการผลิตอิฐบล็อก ณ ร้านศิลารุ่งเรือง วัสดุก่อสร้าง ในช่วงวันที่ 19 - 25 เดือนกรกฎาคม 2565 พบว่า ลักษณะของเสียของกระบวนการ คือ อิฐบิ่น ร้าว หรือแตกหัก หากมีลักษณะดังกล่าวในอิฐบล็อกก้อนใด ก็ถือว่าอิฐบล็อกก้อนนั้นเป็นของเสีย แสดงดังตารางที่ 3



ตารางที่ 3 ข้อมูลของเสียจากกระบวนการผลิตก่อนปรับปรุงในเดือนกรกฎาคม 2565

ชนิดของข้อบกพร่อง	จำนวนของเสีย (ก้อน)							
	วันที่ 19	วันที่ 20	วันที่ 21	วันที่ 22	วันที่ 23	วันที่ 24	วันที่ 25	รวม
จำนวนการผลิตต่อ 1 โม่	1,500	1,500	1,500	1,500	1,500	1,500	1,500	10,500
บิ่น/ร้าว/แตกหัก	118	114	106	112	127	120	97	794
คิดเป็นร้อยละ	7.87	7.60	7.07	7.47	8.47	8.00	6.47	**7.69**

จากตารางที่ 3 แสดงข้อมูลของเสียจากกระบวนการผลิตก่อนปรับปรุงในช่วงวันที่ 19 - 25 เดือนกรกฎาคม 2565 พบว่ามีกำลังการผลิตทั้งหมด 10,500 ก้อน โดยมีจำนวนของเสียที่แตกหัก จำนวน 794 ก้อน คิดเป็นร้อยละ 7.69

3. ผลการวิเคราะห์หาสาเหตุของปัญหากระบวนการผลิตโดยแผนภูมิก้างปลา

จากการผลศึกษาสภาพปัญหาของกระบวนการผลิตอิฐบล็อกก่อนการปรับปรุง และเก็บรวบรวมข้อมูลของเสียจากกระบวนการผลิตก่อนปรับปรุง พบว่า จำนวนของเสียที่บิ่น/ร้าว/แตกหัก คิดเป็นร้อยละ 7.69 ผู้ศึกษาจึงดำเนินการวิเคราะห์ข้อมูลปัญหาด้วยผังก้างปลา (Fishbone diagram) โดยแยกลักษณะของปัญหาต่าง ๆ ที่เกิดขึ้นในขั้นตอนการทำงานของการผลิตอิฐบล็อกเพื่อศึกษาปัญหาของกระบวนการผลิต แสดงดังภาพที่ 2

ภาพที่ 2 แผนภาพแสดงสาเหตุและผลของการเกิดของเสีย

4. ผลการวิเคราะห์แนวทางแก้ไขปัญหา ดำเนินการปรับปรุง และทดลองนำไปปฏิบัติจริง

ผู้วิจัยได้นำแนวทางการแก้ปัญหากระบวนการผลิตอิฐบล็อกก่อนการปรับปรุงเพื่อลดของเสีย แสดงผลการวิเคราะห์ ดังนี้

ขั้นตอนที่ 1 ขั้นตอนการคัดเลือกส่วนผสมและจัดเตรียมส่วนผสม: โดยในกระบวนการคัดเลือกและจัดเตรียมส่วนผสม ส่วนผสม พบว่า หินฝุ่นจากแหล่งรับซื้อมีปริมาณฝุ่นปะปนสูง ซึ่งส่งผลให้การยึดเกาะระหว่างพื้นผิวอิฐบล็อกต่ำ ทำให้อิฐบล็อกเกิดการแตกหักง่าย โดยแนวทางการแก้ไขปัญหาคือ ติดต่อไปยังผู้ส่งมอบวัตถุดิบเพื่อแจ้งไปปัญหาด้านคุณภาพวัตถุดิบเพื่อร่วมกันปรับปรุงลดปริมาณฝุ่นปะปนจากแหล่งที่มา ไม่ว่าจะเป็นการคัดเกรดหรือเปลี่ยนแหล่งที่มาของหินฝุ่น (เป็นการแก้ปัญหาจะสาเหตุหมวดวัตถุดิบ)

ขั้นตอนที่ 2 ขั้นตอนการผสมส่วนผสมลงในเครื่องโม่: สำหรับกระบวนการผสมส่วนผสมลงในเครื่องโม่ พบว่า ปัจจุบันพนักงานใช้วิธีการผสมอัตราส่วนผสมตามประสบการณ์โดยไม่ใช้วิธีการชั่ง ตวง หรือวัดปริมาณส่วนผสม ซึ่งจากวิธีการดำเนินการดังกล่าวเมื่อนำไปขึ้นแม่พิมพ์และตากจนแห้ง ส่งผลให้คุณภาพอิฐบล็อกที่ได้นั้นไม่คงที่ โดยแนวทางการแก้ไขปัญหาคือ 1) กำหนดสูตรสัดส่วนวัตถุดิบ พร้อมทั้งจดบันทึกสูตร ติดสูตรส่วนผสม ณ ตำแหน่งที่ทำการผสมให้เห็นได้อย่างชัดเจน (เป็นการแก้ปัญหาจะสาเหตุหมวดวิธีการทำงาน) และ 2) ดำเนินการจัดหาเครื่องชั่งตวงน้ำหนักของส่วนผสมที่ตำแหน่งหน้างานให้ได้ส่วนผสมตรงตามสูตรสัดส่วนวัตถุดิบที่กำหนดสำหรับการผลิตทุกรอบ (เป็นการแก้ปัญหาจะสาเหตุหมวดเครื่องจักร เครื่องมือ และอุปกรณ์)

ขั้นตอนที่ 5 เทส่วนผสมลงพิมพ์ อัดให้แน่น: พนักงานอัดส่วนผสมตัวอิฐลงในแม่พิมพ์ไม่แน่นพอ ทำให้เกิดฟองอากาศในเนื้ออิฐบล็อก ดังนั้น เมื่อนำออกจากแม่พิมพ์ จึงส่งผลให้อิฐบล็อกเกิดการแตกหักง่าย โดยแนวทางการแก้ไขปัญหาคือ นำเหล็กมากระทุ้งตัวอิฐลงในแม่พิมพ์ในแน่นขึ้นเพื่อไล่ฟองอากาศออก (เป็นการแก้ปัญหาจะสาเหตุหมวดวิธีการทำงาน)

ขั้นตอนที่ 9 การถอดอิฐออกจากบล็อก: สำหรับขั้นตอนการถอดออกจากบล็อกนั้น พบว่า พนักงานขาดความระมัดระวังในการถอดอิฐบล็อกออกจากแม่พิมพ์ จึงทำให้อิฐบล็อกเริ่มมีลักษณะร้าว และแตกหักในขณะที่อิฐบล็อกแห้งแล้วในเวลาต่อมา โดยแนวทางการแก้ไขปัญหาคือ สร้างด้ามจับแม่พิมพ์ เพื่อให้พนักงานสามารถถอดอิฐออกจากบล็อกได้สะดวกยิ่งขึ้นเพื่อลดโอกาสการเกิดความผิดพลาดในการถอดออกจากบล็อก พร้อมทั้งเพิ่มกระเบื้องแผ่นเรียบให้มีปริมาณเพียงพอกับจำนวนอิฐบล็อก โดยจะต้องมีขนาดที่สามารถรองรับกับขนาดของบล็อกที่ลงตัวได้ เพื่อลดปัญหาการเกิดของเสียระหว่างการขนย้ายอิฐบล็อกจากการแตกหักในขั้นตอนต่อไป (เป็นการแก้ปัญหาจะสาเหตุหมวดเครื่องจักร เครื่องมือ และอุปกรณ์)

หลังจากนั้น ดำเนินการทดลองปฏิบัติเมื่อวันที่ วันที่ 5-11 สิงหาคม 2565 เป็นเวลา 7 วัน เพื่อเก็บข้อมูลของเสียที่มีแตกหักจากกระบวนการผลิตอิฐบล็อก

5. ผลการเก็บข้อมูลของเสียจากกระบวนการผลิตอิฐบล็อก หลังการปรับปรุง

หลังการปรับปรุงกระบวนการผลิตอิฐบล็อกในเดือนกรกฎาคม 2565 ตั้งแต่วันที่ 5-11 สิงหาคม 2565 เป็นเวลา 7 วัน พบว่าประสิทธิภาพในกระบวนการผลิตได้มีการเปลี่ยนแปลงไปในทางที่ดีขึ้น อิฐบล็อกที่เกิดข้อบกพร่องในกระบวนการผลิตลดลง รายละเอียดดังตารางที่ 4

ตารางที่ 4 ข้อมูลของเสียจากกระบวนการผลิตหลังปรับปรุงในเดือนสิงหาคม 2565

ชนิดของข้อบกพร่อง	จำนวนของเสีย (ก้อน)							
	วันที่ 5	วันที่ 6	วันที่ 7	วันที่ 8	วันที่ 9	วันที่ 10	วันที่ 11	รวม
จำนวนการผลิต ต่อ 1 โม่	1,500	1,500	1,500	1,500	1,500	1,500	1,500	10,500
บิ่น/ร้าว/แตกหัก	56	51	57	49	43	44	41	341
คิดเป็นร้อยละ	3.73	3.40	3.80	3.27	2.87	2.93	2.73	3.25

จากตารางที่ 4 แสดงข้อมูลของเสียจากกระบวนการผลิตหลังปรับปรุงในเดือนสิงหาคม 2565 พบว่า ของเสียตั้งแต่วันที่ 5-11 สิงหาคม 2565 เป็นเวลา 7 วัน มีจำนวนการผลิตทั้งหมด 10,500 ก้อน มีจำนวนของเสียทั้งหมด 341 ก้อน คิดเป็นร้อยละ 3.25

6. ผลการเปรียบเทียบข้อมูลระหว่างก่อนและหลังการปรับปรุง

ตารางที่ 5 ตารางเปรียบเทียบจำนวนของเสียก่อนและหลังการปรับปรุง

เปรียบเทียบ	จำนวน (ก้อน)	ร้อยละ
ก่อนปรับปรุง	794	7.69
หลังปรับปรุง	341	3.25
ปริมาณของเสียที่ถูกลดไป	**273**	**4.44**

จากตารางที่ 5 แสดงเปรียบเทียบจำนวนของเสียสะสมก่อนและหลังการปรับปรุง พบว่า จำนวนของเสียก่อนปรับปรุงมีจำนวน 794 ก้อน คิดเป็นร้อยละ 7.69 จำนวนของเสียหลังการปรับปรุง มีจำนวน 341 ก้อน คิดเป็นร้อยละ 3.25 โดยปริมาณของเสียที่ถูกลดไปหลังปรับปรุงกระบวนการ มีจำนวน 453 ก้อน คิดเป็นร้อยละของของเสียที่ลดลงเท่ากับร้อยละ 4.44

7. ผลการสรุปผลการดำเนินงาน

จากการศึกษาสภาพปัจจุบันและปัญหาของกระบวนการผลิตอิฐบล็อกหลังการปรับปรุง สามารถสรุปขั้นตอนกระบวนการผลิตอิฐบล็อกได้ดังนี้

ขั้นตอนที่ 1 คัดเลือกส่วนผสมมีฝุ่นปะปนน้อยที่สุด เพื่อเพิ่มการยึดเกาะระหว่างพื้นผิวอิฐบล็อก

ขั้นตอนที่ 2 จัดเตรียมส่วนผสม โดยกำหนดสูตรสัดส่วนวัตถุดิบ พร้อมทั้งจดบันทึกสูตร และให้ดำเนินการชั่งตวงน้ำหนักของส่วนผสมให้ตรงตามสูตรสัดส่วนวัตถุดิบที่กำหนดสำหรับการผลิตทุกรอบ จากนั้นดำเนินการผสมส่วนผสมลงในเครื่องโม่

ขั้นตอนที่ 3 โม่ผสมส่วนผสม

ขั้นตอนที่ 4 เตรียมแม่พิมพ์อิฐบล็อก โดยการใช้กระดาษหนังสือพิมพ์เช็ด น้ำมันที่แบบพิมพ์ให้ สะอาด

ขั้นตอนที่ 5 เทส่วนผสมลงพิมพ์ อัดให้แน่น โดยการนำเหล็กมากระทุ้งตัวอิฐลงในแม่พิมพ์ในแน่นขึ้น

ขั้นตอนที่ 6 ส่วนผสมของอิฐจะพูนเลยพิมพ์ขึ้นมา ใช้เกรียงโบกปาดให้เสมอ

ขั้นตอนที่ 7 ใส่ส่วนผสมผิวหน้า จากนั้นใช้เกรียงขัดมันปาดอีกครั้งให้เรียบ

ขั้นตอนที่ 8 ใช้กระเบื้องแผ่นเรียบที่แช่น้ำไว้ปิดบนบล็อก พร้อมทั้งคว่ำลงบนพื้น

ขั้นตอนที่ 9 การถอดอิฐออกจากบล็อก โดยใช้ด้ามจับแม่พิมพ์ เพื่อให้พนักงานสามารถถอดอิฐออกจากบล็อกได้สะดวก

ขั้นตอนที่ 10 เมื่ออิฐบล็อกถูกขึ้นรูปได้อย่างสมบูรณ์แล้ว จะถูกลำเลียงไปวางบนชั้นเหล็ก เพื่อไปยังสถานที่สำหรับพักอิฐบล็อก เพื่อพักให้แห้งสนิท โดยใช้เวลา 4 - 6 ชั่วโมง

อภิปรายผลการวิจัย

1. กระบวนการการลดของเสียในกระบวนการผลิตอิฐบล็อกของร้านศิลารุ่งเรืองวัสดุก่อสร้าง ผู้ศึกษาดำเนินการศึกษาสภาพและปัญหาของกระบวนการผลิตอิฐบล็อกก่อนการปรับปรุง จากนั้นเก็บรวบรวมข้อมูลของเสียจากกระบวนการผลิตก่อนปรับปรุง และวิเคราะห์สาเหตุของปัญหาของกระบวนการผลิตโดยแผนภูมิก้างปลา เพื่อกำหนดแนวทางแก้ไข ดำเนินการปรับปรุงแก้ไขและทดลองนำไปปฏิบัติจริง เก็บข้อมูลหลังการปรับปรุงแก้ไข เปรียบเทียบข้อมูลจำนวนของเสียระหว่างก่อนและหลังการปรับปรุง และสรุปผลการดำเนินงาน ซึ่งสอดคล้องกับการศึกษาของ กฤษดา วรรณภินพงศ์ และปิยะพงษ์ เกิดปิยะ (2547) ศึกษาเรื่องการลดของเสียในกระบวนการผลิตกระสอบสานพลาสติกโดยทำการศึกษาเกี่ยวกับกระบวนการผลิต ซึ่งมีวิธีการศึกษาได้แยกเป็นขั้นตอนการวิจัย ดังนี้ 1) ศึกษากระบวนการผลิตกระสอบสานพลาสติก 2) เก็บรวบรวมข้อมูลของเสียในกระบวนการผลิตกระสอบสานพลาสติก 3) ศึกษาข้อมูลที่เกี่ยวข้องในกระบวนการเคลือบกระสอบสานพลาสติก 4) วิเคราะห์ หาสาเหตุการเกิดของเสียเศษผ้าหัว-ท้าย 5) คิดแนวทางในการลดปริมาณของเสีย และ 6) แก้ปัญหาของเสียในกระบวนการผลิตกระสอบสานพลาสติก

2. ผลการศึกษาการปรับปรุงกระบวนการจากการวิเคราะห์เพื่อแก้ปัญหาที่พบแต่ละขั้นตอนของขั้นตอนที่ 1, 2 และ 5 นั้น สอดคล้องกับการศึกษาของ พรชัย มามี และศศิธร พ่วงจ่าง (2554) ได้จัดทำกรณีศึกษาเกี่ยวกับการลดของเสียในกระบวนการผลิตแผงวงจรอิเล็กทรอนิกส์ พบว่า ปัจจัยที่ส่งผลกระทบต่อกระบวนการผลิตและก่อให้เกิดความแปรปรวน คือ วัตถุดิบที่นำมาใช้ในกระบวนการผลิตและเอกสารการทำงานของฝ่ายผลิต รวมถึงผลการดำเนินการจากการปรับปรุงนั้น สามารถกำจัดต้นเหตุของสิ่งที่ทำให้เกิดของเสียได้สำเร็จตามวัตถุประสงค์ที่ตั้งไว้

3. ผลการดำเนินการเปรียบเทียบจำนวนของเสียสะสมก่อนและหลังการปรับปรุง พบว่า จำนวนของเสียก่อนปรับปรุงมีจำนวน 794 ก้อน คิดเป็นร้อยละ 7.69 จำนวนของเสียหลังการปรับปรุง มีจำนวน 341 ก้อน คิดเป็นร้อยละ 3.25 โดยปริมาณของเสียที่ถูกลดไปหลังปรับปรุงกระบวนการ มีจำนวน 453 ก้อน คิดเป็นร้อยละของของเสียที่ลดลงเท่ากับร้อยละ 4.44 ซึ่งสอดคล้องกับการศึกษาของ พรชัย มามี และศศิธร พ่วงจ่าง (2554) ได้จัดทำกรณีศึกษาเกี่ยวกับการลดของเสียในกระบวนการผลิตแผงวงจรอิเล็กทรอนิกส์ พบว่า ผลของการปรับปรุงกระบวนการแสดงให้เห็นถึงการพัฒนาศักยภาพในการผลิตที่มีประสิทธิภาพเพิ่มขึ้นหลังจากการแก้ไขข้อบกพร่องประสิทธิภาพของการดำเนินงาน โดยผลกระทบที่พบหลังการปรับปรุงแล้วเป็นผลที่เกิดจากปัจจัยใหม่

ข้อเสนอแนะ

1. ข้อเสนอแนะเพื่อการนำผลวิจัยไปใช้งาน

เจ้าของร้านร้านศิลารุ่งเรือง วัสดุก่อสร้าง ควรมีการควบคุมให้พนักงานฝ่ายผลิตปฏิบัติตามกระบวนการใหม่ตลอดเวลา ไม่ละเลยการปฏิบัติ รวมทั้งนำไปใช้ประเมินผลการปฏิบัติงานของพนักงาน นอกจากนี้ การสร้างสภาพความพร้อมทางด้านกายภาพของกระบวนการผลิตให้มีเครื่องมือเครื่องจักรที่มีความพร้อมและเพียงพอ รวมทั้งหมั่นตรวจสอบคุณภาพของแหล่งวัตถุดิบที่มีฝุ่นปนเปื้อนให้ดีสม่ำเสมอ

2. ข้อเสนอแนะเพื่อการวิจัยต่อไป

2.1) ในการวิจัยครั้งต่อไป ควรศึกษาแนวทางการลดต้นทุนของอิฐบล็อกเพื่อนำมาใช้เป็นแนวทางในการลดของเสีย ลดต้นทุน และหาแนวทางการแก้ไข เนื่องจากว่าปัจจุบันการแข่งขันของโรงงานผลิตอิฐบล็อกมีการแข่งขันสูงขึ้น รวมทั้งเปรียบเทียบต้นทุนคุณภาพที่เกิดขึ้นกับรายได้ที่เกิดจากการที่ของเสียลดลง

2.2) ในการวิจัยครั้งต่อไป สามารถนำแนวคิด ทฤษฎีดังกล่าวไปประยุกต์ใช้ในกระบวนการอื่น ๆ เช่น กระบวนการรับคำสั่งซื้อ กระบวนการขนส่ง ฯลฯ ต่อไป

บทคัดย่อ

การศึกษานี้เป็นการวิจัยเชิงปฏิบัติการ เรื่อง การปรับปรุงผังคลังสินค้าโดยใช้หลักการจำแนกสินค้าแบบ ABC ของร้านมีนาโกะ มีวัตถุประสงค์เพื่อ 1) จำแนกประเภทสินค้าแบบ ABC ของร้านมีนาโกะ 2) เพื่อปรับปรุงผังการวางสินค้าในคลังสินค้าของร้านมีนาโกะ กลุ่มผู้ให้ข้อมูลประกอบด้วยพนักงานฝ่ายขาย 1 คน และพนักงานคลังสินค้า 4 คน วิธีการวิจัยมีขั้นตอนดังนี้ 1) ศึกษาสภาพและปัญหาของการจัดวางสินค้าเดิม 2) นำข้อมูลมาจัดแบ่งประเภทสินค้าแบบ ABC 3) จัดผังการวางสินค้าใหม่ตามประเภทของสินค้าที่แบ่งได้ 4) นำผังคลังสินค้าใหม่ไปปฏิบัติ และเปรียบเทียบผังการวางสินค้าและเวลาที่ใช้ในการค้นหาสินค้าระหว่างก่อนและหลังการปรับปรุง ผลการวิจัยมีดังนี้ 1) คลังสินค้ากว้าง 8 เมตร ยาว 13.5 เมตร โซนการวางสินค้ารวมทั้งสิ้นมี 9 โซน แต่ละโซนกว้าง 1 เมตร ยาว 1 เมตร ทางเดินกว้าง 1 เมตร 2) ประเภทสินค้าที่ทำการแบ่งประเภท แบ่งเป็นกลุ่ม A B และ C มีจำนวนรายการอยู่ 12 7 และ 4 รายการ ตามลำดับ 3) เวลาที่ใช้ในการค้นหาสินค้าก่อนการปรับปรุงเฉลี่ยมีค่าเท่ากับ 8.99 นาทีต่อรายการ และหลังการปรับปรุงใช้เวลาในการค้นหาสินค้าเฉลี่ยมีค่าเท่ากับ 6.69 นาทีต่อรายการ ซึ่งเฉลี่ยเวลาที่ลดลงเท่ากับ 2.30 นาทีต่อรายการ

คำสำคัญ: ผัง คลังสินค้า การปรับปรุง การจำแนกสินค้าแบบ ABC ร้านหนังสือ

Abstract

This study is an action research, namely “Warehouse Layout Improvement of Minako Bookstore based on ABC Classification Concept”. The objectives are twofold: 1) to classify the products of Minako Bookstore using ABC classification concept, 2) to improve the warehouse layout of Minako Bookstore. The research informant consists of 1) one sale staff and four warehouse staff. Research procedures include: 1) investigate the existing information and problems of the warehouse layout, 2) categorize the product items according to ABC analysis, 3) rearrange the warehouse layout based on the new product categories, and 4) carry out the new layout setting, record, and compare the product search lead times between those before and after the implementation. Results can be concluded as following: 1) the warehouse is 8 meters wide and 13.5 meters long, with a total of 9 product placement zones, each 1 meter wide by 1 meter long, and the aisle is 1 meter wide; 2) numbers of products in group A, B and C were 12, 7 and 4 items, respectively. 3) for the average time spent for searching product matter, the one before improvement averaged 8.99 minutes per item, while the other (after rearrangement) was 6.69 minutes per item, signifying an average searching time reduction of 2.30 minutes per item.

Keywords: Layout, Warehouse, Improvement, ABC classification, Bookstore

บทนำ

ธุรกิจในปัจจุบันมีการแข่งขันกันรุนแรงมากขึ้น ด้วยสภาพข้อจำกัดของการแข่งขันทางธุรกิจในด้านทำเลที่ตั้งและสภาพภูมิศาสตร์ลดน้อยลง ธุรกิจประเภทร้านหนังสือก็เช่นเดียวกัน มีคู่แข่งร้านจำหน่ายหนังสือมากมายทั้งในกรุงเทพมหานคร ต่างจังหวัดและต่างประเทศ รวมถึงร้านหนังสือที่จำหน่ายทางออนไลน์ นอกจากนี้ ยังมีสินค้าทดแทนประเภทอื่นอีก เช่น e-book รวมทั้ง content ในรูปแบบของสื่ออื่นๆ อีก เป็นต้น ผู้ประกอบการร้านหนังสือจึงจำเป็นต้องศึกษาถึงปัจจัยต่างๆ ที่มีผลต่อพฤติกรรมการซื้อของผู้บริโภค เพื่อให้สามารถสร้างความแตกต่างที่เหนือกว่าคู่แข่งขันและเป็นการจูงใจผู้บริโภคให้ซื้อหนังสือกับร้านจำหน่ายหนังสือนั้นๆ

ธุรกิจร้านหนังสือดำเนินธุรกิจจำหน่ายหนังสือประเภทต่าง ๆ ทั้งจากโรงพิมพ์ภายในประเทศและต่างประเทศ โดยร้านหนังสืออาจแบ่งหนังสือออกเป็นประเภทต่าง ๆ ได้หลายลักษณะ เช่น หนังสือใหม่/เก่า หนังสือใน/ต่างประเทศ หนังสือเชิงวิชาการ/หนังสือเพื่อความบันเทิง ฯลฯ ธุรกิจร้านหนังสือมีประวัติความเป็นมาอันยาวนานนับหลายพันปี โดยเชื่อว่าเริ่มต้นมาจากประเทศในแถบยุโรป และมาสู่ยุคร้านหนังสือสมัยใหม่โดยความก้าวหน้าของเทคโนโลยีการพิมพ์ (วิกิพีเดีย สารานุกรมเสรี, 2558)

ร้านหนังสือมีนาโกะ ตั้งอยู่ที่ 26 ถนนจักรพรรดิพงษ์ แขวงวัดโสมนัส เขตป้อมปราบศัตรูพ่าย กรุงเทพมหานคร 10100 ทางร้านจำหน่ายเฉพาะหนังสือการ์ตูนของสำนักพิมพ์บางแห่ง เช่น HighSchool DxD ศึกษาระบำดายเทวะ เซนต์เซย์ย่า ฯลฯ มีพนักงานจำนวน 7 คน แบ่งเป็น พนังงานเก็บเงิน 1 คน พนักงานดูแลคลังสินค้า 4 คน พนักงานรับคำสั่งซื้อ 2 คน ทางร้านประสบปัญหาเกิดความล่าช้าในการค้นหาสินค้าแต่ละรายการของคำสั่งซื้อ ประกอบกับสินค้าในร้านมีจำนวนมากและจัดวางไม่เป็นหมวดหมู่ ทำให้ใช้เวลาในการจัดหาและบรรจุหีบห่อหนังสือตามคำสั่งซื้อเป็นระยะเวลานานและไม่แน่นอน

ผู้วิจัยได้เห็นถึงความสำคัญของปัญหาการค้นหาสินค้าเพื่อดำเนินการตามคำสั่งซื้อล่าช้าหรือใช้เวลาไม่แน่นอน ซึ่งสาเหตุสำคัญส่วนหนึ่งเกิดจากการจัดเก็บสินค้าในลักษณะที่ชนิดสินค้าและตำแหน่งที่ไม่สัมพันธ์กับความถี่ในการสั่งซื้อของลูกค้า ควรที่จะได้รับการปรับปรุงแก้ไขปัญหาด้วยการปรับปรุงผังคลังสินค้าเพื่อจัดเก็บสินค้าให้มีประสิทธิภาพมากขึ้น พนักงานเกิดความสะดวกในการทำงาน และลดเวลาในการค้นหาสินค้า โดยในการวิจัยครั้งนี้ จะนำหลักการจำแนกสินค้าแบบ ABC มาใช้เป็นแนวคิดหลักในการแบ่งประเภทสินค้า เพื่อนำไปสู่การจัดผังวางของสินค้าที่สัมพันธ์กับกลุ่มประเภทสินค้าต่อไป

วัตถุประสงค์ของการวิจัย

1. เพื่อจำแนกประเภทสินค้าแบบ ABC ของร้านมีนาโกะ
2. เพื่อปรับปรุงผังการวางสินค้าในคลังสินค้าของร้านมีนาโกะ

วิธีการดำเนินการวิจัย

1) กลุ่มผู้ให้ข้อมูลของการวิจัย

ผู้ให้ข้อมูลแบ่งเป็น 2 กลุ่ม ได้ดังนี้

1.1 พนักงานฝ่ายขายของร้านมีนาโกะ จำนวน 1 คน ให้ข้อมูลภาพรวมในการจำหน่ายหนังสือ ได้แก่ จำนวนและราคาหนังสือ เพื่อนำมาหามูลค่าสินค้าคงคลังที่จำหน่าย

1.2 พนักงานคลังสินค้าของร้านมีนาโกะ จำนวน 4 คน ให้ข้อมูลลักษณะคลังสินค้าและการจัดวางหนังสือ และข้อมูลเวลาดำเนินการเฉลี่ยในการค้นหาและจัดสินค้าตามคำสั่งซื้อของลูกค้า

2) ขอบเขตของการวิจัย

การศึกษาครั้งนี้จะทำการปรับปรุงผังการวางสินค้าประเภทหนังสือการ์ตูนที่จัดตามประเภทสินค้าที่จัดกลุ่มโดยใช้หลักการแบ่งประเภทสินค้าแบบ ABC บริเวณเฉพาะคลังสินค้าที่ 3 เท่านั้น ในการวางผังคลังสินค้าใช้แนวทางการกำหนดตำแหน่งของสินค้าของคำนาย อภิปรัชญาสกุล (2553)

3) เครื่องมือที่ใช้ในการวิจัย

3.1 แผ่นตรวจสอบ (check sheet)

3.2 นาฬิกาจับเวลา

3.3 ผังคลังสินค้า

4) ขั้นตอนในการวิจัย

4.1 ศึกษาสภาพและขั้นตอนการดำเนินงานเดิมในการหาสินค้า โดยการสังเกตลักษณะการจัดวางสินค้าแบบเดิม ได้แก่ ขนาดคลังสินค้า ผังการวางสินค้า กระบวนการจัดการคำสั่งซื้อ จำนวนและมูลค่าสินค้าคงคลัง รวมถึงการจับเวลาในการค้นหาสินค้าแต่ละครั้งเพื่อนำมาหาค่าเฉลี่ย โดยในการศึกษาครั้งนี้ ศึกษาเฉพาะในคลังสินค้าที่ 3 เท่านั้น เพื่อควบคุมลักษณะสินค้าประเภทหนังสือ

การ์ตูน และมีมูลค่าสินค้าสูงแต่มีจำนวนรายการสินค้าไม่มาก ส่วนในการศึกษาระยะเวลาในการค้นหาสินค้าคงคลัง จะศึกษาเฉพาะคำสั่งซื้อที่มีลักษณะ 1) มีรายการสินค้าเพียงรายการเดียวต่อคำสั่งซื้อ เพื่อควบคุมระยะเวลาในการค้นหาสินค้าต่อรายการให้คงที่และ 2) ลูกค้าแจ้งความประสงค์มารับสินค้าเอง เนื่องจากเป็นคำสั่งซื้อที่มีการสั่งซื้อและรับสินค้าภายในวันเดียวกัน ไม่มีการเปลี่ยนแปลงรายการสินค้าภายหลังจากการสั่งซื้อ ซึ่งอาจมีผลต่อข้อมูลระยะเวลาในการค้นหาสินค้า

4.2 ศึกษารายการสินค้า จำนวนสินค้า และมูลค่าสินค้าคงคลังในคลังสินค้าที่ 3 คิดรวมที่รอบ 4 สัปดาห์ เพื่อวิเคราะห์และจำแนกสินค้าแบบ ABC

4.3 ปรับปรุงผังการวางสินค้า โดยใช้ประเภทสินค้าที่ถูกจำแนกแบบ ABC ที่มาเป็นฐาน ตรวจสอบจำนวนสินค้าในแต่ละกลุ่ม และทำการวางผังคลังสินค้าใหม่ในการจัดเก็บสินค้าแต่ละกลุ่ม ให้มีระยะห่างจากโต๊ะพนักงานคลังสินค้าไปยังสินค้ากลุ่ม A, B และ C มีระยะจากใกล้ไปถึงไกลตามลำดับ โดยเปลี่ยนเฉพาะตำแหน่งของสินค้าที่นำมาวาง ไม่ได้เปลี่ยนขนาดพื้นที่ที่ใช้สำหรับการวางสินค้า

4.4 ดำเนินการวางสินค้าตามผังคลังสินค้าใหม่ ปฏิบัติการจัดสินค้าแบบเดิมเป็นเวลา 1 สัปดาห์ จับเวลารวมในการค้นหาสินค้าต่อคำสั่งซื้อ จำนวน 20 ครั้ง นำมาหาค่าเฉลี่ย แล้วเปรียบเวลาในการค้นหาสินค้าและผังการวางสินค้า ระหว่างก่อนปรับปรุงและหลังปรับปรุง

สรุปผลการวิจัย

1 ศึกษาสภาพและขั้นตอนการดำเนินงานเดิมในการหาสินค้า (แบบเดิม)

จากการศึกษาขนาดคลังสินค้าและผังการวางสินค้า พบว่า คลังสินค้าที่ 3 มีขนาดความกว้าง 8 เมตร ยาว 13.5 เมตร ในคลังแบ่งเป็น 9 โซน แต่ละโซนมีพื้นที่ยาว 1 เมตร กว้าง 1 เมตร มีทางเดินระหว่างโซนกว้าง 1 เมตร เดิมแต่ละโซนวางสินค้าเรียงตามลำดับพยัญชนะของชื่อเรื่องหนังสือ เวลาเฉลี่ยในการค้นหาสินค้า ก่อนการปรับปรุงมีค่าเท่ากับ 8.99 นาที

ในด้านกระบวนการจัดการคำสั่งซื้อ มีขั้นตอนการปฏิบัติ ดังนี้

1.1 รับคำสั่งซื้อจากลูกค้า

- พนักงานขายรับคำสั่งซื้อจากลูกค้า จัดทำเอกสารใบสั่งสินค้าและอินวอยซ์ ตรวจสอบคำสั่งซื้อของลูกค้า
- พนักงานขายพิมพ์เอกสารใบสั่งสินค้าส่งให้พนักงานคลังสินค้า

1.2 การค้นหาหนังสือ

- พนักงานคลังสินค้าตรวจสอบระดับสินค้าคงคลังในระบบสารสนเทศ
- พนักงานคลังสินค้าค้นหาตำแหน่งที่ตั้งการวางเก็บสินค้าจริง โดยอาศัยความชำนาญจากประสบการณ์ส่วนตัวของพนักงาน

1.3 การตรวจสอบความถูกต้อง

- พนักงานคลังสินค้านำสินค้าที่ได้จากค้นหา ไปวางที่จุดพักสินค้าที่สั่งซื้อ โต๊ะพนักงานเพื่อ
- พนักงานคลังสินค้าทำการตรวจสอบความถูกต้องของรายการสินค้าและจำนวนของสินค้าตามคำสั่งซื้ออีกครั้ง

2 ศึกษามูลค่า และจำนวนรายการสินค้าในรอบ 4 สัปดาห์ เพื่อวิเคราะห์และจำแนกสินค้าแบบ ABC

ผู้วิจัยศึกษารายการ จำนวน และมูลค่าของสินค้าคงคลังในรอบ 4 สัปดาห์ ระหว่างวันที่ 3 – 29 ตุลาคม 2565 โดยขอข้อมูลรายการและจำนวนสินค้าที่ขายได้ในรอบ 4 สัปดาห์ จากพนักงานฝ่ายขาย นำมาคูณราคาสินค้าต่อหน่วย เพื่อหามูลค่าสินค้าแต่ละรายการและมูลค่าสินค้ารวม ซึ่งมีจำนวนรายการสินค้าทั้งสิ้น 23 รายการ หลังจากนั้นนำมาคำนวณหาค่าร้อยละ (%) และร้อยละสะสม (cumulative percentage) ของมูลค่าสินค้า โดยวิธีการหาร้อยละของมูลค่าสินค้า หาจากนำมูลค่าของสินค้าแต่ละรายการ มาหารด้วยมูลค่าของสินค้ารวมทั้งหมด แล้วคูณด้วย 100 ส่วนวิธีการหาร้อยละสะสมของมูลค่าสินค้า หาจากร้อยละของมูลค่าสินค้ารายการนั้นๆ บวกกับร้อยละสะสมของมูลค่าสินค้ารายการก่อนหน้า

ตารางที่ 1 ข้อมูลจำนวนและมูลค่าสินค้าในคลังสินค้าที่ 3 (ก่อนการปรับปรุง)

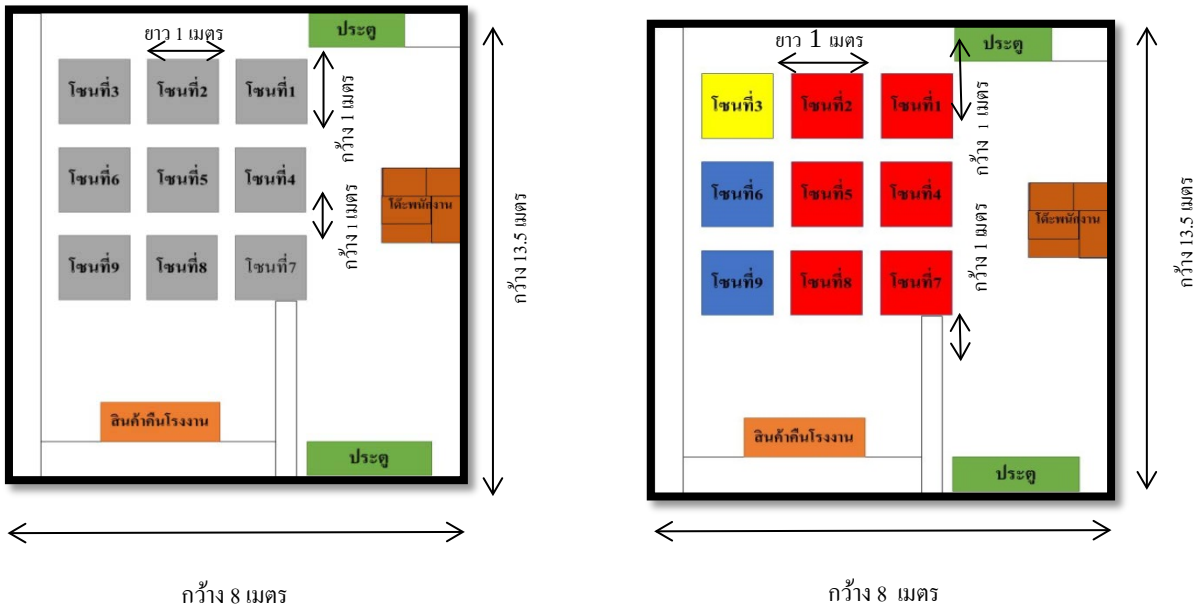
รวม		**4.69 %**		

จำนวน 83,439 เล่ม มาหารด้วย9โซน หลังจากแบ่งประเภทสินค้าตามแบบ ABC แล้วพบว่า จำนวนสินค้าประเภท A มี 12 รายการ คิดเป็นจำนวน 62,130 เล่ม ประเภท B มี 7 รายการ คิดเป็นจำนวน 17,220 เล่ม ประเภท C มี 4 รายการ คิดเป็นจำนวน 4,089 เล่ม พื้นที่ในการวางสินค้ามีทั้งหมด 9 โซน เฉลี่ยโซนละ 9,271 เล่ม จึงควรแบ่งโซนการวางสินค้าโดยประมาณในเบื้องต้นเป็นประเภท A จำนวน 6 โซน ประเภท B จำนวน 2 โซน และประเภท C จำนวน 1 โซน

3 ปรับปรุงการวางผังสินค้า โดยใช้ประเภทสินค้าแบบ ABC



ภาพที่ 1 : แสดงลักษณะของคลังสินค้าร้านมีนาโกะ (หลังปรับปรุง)

4 นำไปทดลองปฏิบัติและเปรียบเวลาในการค้นหาสินค้าและผังการวางสินค้า

4.1 ผลการเปรียบเทียบผังคลังสินค้าก่อนและหลังการปรับปรุง

ผังคลังสินค้าก่อนปรับปรุง **ผังคลังสินค้าหลังปรับปรุง**

ภาพที่ 2: แสดงการเปรียบเทียบผังคลังสินค้าก่อนและหลังปรับปรุง

4.2 การเปรียบเทียบเวลาเฉลี่ยในการค้นหาสินค้าต่อรายการสินค้าระหว่างก่อนและหลังการปรับปรุงผัง

ด้านเวลาเฉลี่ยในการค้นหาสินค้า ก่อนการปรับปรุงมีค่าเท่ากับ 8.99 นาที และหลังการปรับปรุงใช้เวลาในการค้นหาสินค้าเท่ากับ 6.69 นาที ลดลง 2.30 นาที และด้านผังคลังสินค้าสามารถทำให้พนักงานหาสินค้าได้เร็วขึ้นและลดความเมื่อยล้าในการทำงานลง

อภิปรายผลการวิจัย

ผลจากการวิจัยได้ทำการศึกษาเรื่อง การปรับปรุงคลังสินค้าโดยใช้การจำแนกสินค้าแบบ ABC ของร้านมีนาโกะ สามารถอภิปรายผลการวิจัยได้ดังนี้

1. ผลจากการวิจัยเรื่อง การปรับปรุงคลังสินค้าโดยใช้การจำแนกสินค้าแบบ ABC ของร้านมีนาโกะ คลังสินค้ามีการจัดเก็บการจัดวางสินค้าปนกันไม่มีการแยกประเภทสินค้าที่ชัดเจนยากต่อการหยิบทำให้เกิดปัญหาในการค้นหาสินค้าล่าช้าและไม่มีระบบในการบริหารการจัดเก็บสินค้า ผู้วิจัยจึงทำการปรับปรุงแก้ไขโดยใช้หลักการจำแนกสินค้าแบบ ABC แล้วนำมาปรับปรุงผังการจัดวางสินค้า ซึ่งสอดคล้องกับผลงานวิจัยของลักขณา ชัยพัฒนานนท์ (2552) กล่าวว่า การแบ่งประเภทสินค้าคงคลังตามฐานกิจกรรม (ABC Analysis) เป็นวิธีการแบ่งประเภทของสินค้าคงคลังออกเป็น 3 กลุ่มหลักโดยประยุกต์มาจากหลักการของพาเรโตที่มุ่งเน้นให้ความสำคัญกับกลุ่มสินค้าจำนวนสินค้าน้อยที่มีมูลค่ามาก มากกว่ากลุ่มสินค้าจำนวนสินค้ามากที่มีมูลค่าน้อย

2. ผลการปฏิบัติงานหลังการปรับปรุงการวางผังสินค้าตามหลักการแบ่งประเภทสินค้าแบบ ABC มาเป็นเกณฑ์ในการจัดเก็บและจัดวางสินค้าภายในคลังสินค้า พบว่า การปรับปรุงระบบการจัดเก็บสินค้าแบบใหม่ ทำให้สินค้ามีการจัดเก็บอย่างเป็นระเบียบ ดังนี้ 1) สินค้าที่จัดเก็บในโซน A จะเป็นสินค้ากลุ่ม A มีอยู่ 12 รายการ โดยกำหนดตำแหน่งให้อยู่ใกล้กับประตูทางเข้าออกเพื่อความสะดวกในการจัดเก็บและหยิบสินค้า 2) สินค้ากลุ่ม B มีอยู่ 7 รายการ โดยกำหนดตำแหน่งให้อยู่ใกล้กับประตูทางเข้าออกถัดจากสินค้าโซน A เพื่อความสะดวกในการจัดเก็บและหยิบสินค้า 3) สินค้ากลุ่ม C มีอยู่ 4 รายการโดยกำหนดตำแหน่งให้อยู่ห่างจากประตูทางเข้าออกถัดจากสินค้าโซน B ซึ่งเป็นจุดที่ห่างจากประตูเข้าออกมากที่สุด สอดคล้องกับคำนาย อภิปรัชญาสกุล (2553) ที่กล่าวว่าการกำหนดตำแหน่งสินค้าไว้ว่า เกณฑ์พิจารณาในการกำหนดตำแหน่งของสินค้าประเภทต่าง ๆ ในแผนผังพื้นที่เก็บรักษานั้น อาศัยหลักการพื้นฐานเกี่ยวกับปัจจัยพิจารณาในการวางแผนและแบบต่าง ๆ ของการเก็บรักษา

3. ผลการปฏิบัติงานหลังจากการปรับปรุงการวางผังสินค้า ช่วยลดเวลาในการค้นหาสินค้า จากก่อนปรับปรุงซึ่งใช้เวลาในการค้นหาสินค้าก่อนการปรับปรุงเฉลี่ยอยู่ที่ 8.99 นาที ต่อรายการ และหลังการปรับปรุงใช้เวลาในการค้นหาสินค้าเฉลี่ยอยู่ที่ 6.69 นาทีต่อรายการ ซึ่งเฉลี่ยเวลาที่ลดลงอยู่ที่ประมาณ 2.30 นาทีต่อรายการ อาจเป็นเพราะผังคลังสินค้าเป็นระยะทางในแนวราบอย่างเดียว และมีการแบ่งสัดส่วนที่ชัดเจน

ข้อเสนอแนะ

1. ข้อเสนอแนะเพื่อการนำผลการวิจัยไปใช้งาน

1.1 การควบคุมสินค้าคงคลัง ผู้ประกอบการควรให้ความสนใจในการควบคุมสินค้าคงคลังประเภท A มากที่สุด เนื่องจากเป็นสินค้าที่มีมูลค่าสูง ตลอดจนควรตรวจสอบยอดตามรายการกับยอดตรวจนับจริงอย่างสม่ำเสมอ

1.2 กำหนดนโยบายการบริหารสินค้าคงคลังอย่างเป็นรูปธรรม รวมถึงการควบคุมให้เกิดการปฏิบัติตามนโยบายอย่างต่อเนื่อง ซึ่งจะช่วยให้การจัดการคลังสินค้ามีประสิทธิภาพมากขึ้น รวมทั้งตรวจสอบรายการสินค้าที่เป็นกลุ่ม A, B และ C เป็นระยะ ๆ อย่างต่อเนื่อง เนื่องจากหนังสือเป็นสินค้าที่ขึ้นกับความนิยม เมื่อระดับความนิยมเปลี่ยนไป รายการและจำนวนสินค้าที่ขายดีก็จะเปลี่ยนตามไปด้วยเสมอ

2. ข้อเสนอแนะสำหรับงานวิจัยในครั้งต่อไป

ควรศึกษาการใช้เทคนิคการปรับปรุงคลังสินค้าอื่น ๆ เช่น การออกแบบผังโรงงานอย่างเป็นระบบ (Systematic Layout Planning: SLP) หรือแผนภูมิความสัมพันธ์ระหว่างกิจกรรม (Activity Relation Chart หรือ REL Chart) เป็นต้น เพื่อเพิ่มประสิทธิภาพการใช้พื้นที่คลังสินค้าจากการวางผังให้มากยิ่งขึ้น

บทคัดย่อ

งานวิจัยนี้มีวัตถุประสงค์เพื่อศึกษาผลของรูปแบบการเรียงตัวของครีบที่มีต่ออัตราการถ่ายเทความร้อนของครีบ และศึกษาการใช้งานโปรแกรมคำนวณทางพลศาสตร์ของไหล (CFD) สำหรับการไหลของอากาศผ่านครีบ โดยใช้รูปแบบการเรียงตัวของครีบแท่งทรงสี่เหลี่ยม 3 รูปแบบ มีอุณหภูมิฐานครีบ 50 องศาเซลเซียส และความเร็วอากาศเฉลี่ยก่อนผ่านครีบ 1.5 เมตรต่อวินาที ผลการทดลองพบว่า รูปแบบการเรียงตัวของครีบมีผลต่ออัตราการถ่ายเทความร้อนของครีบแท่งทรงสี่เหลี่ยม โดยการเรียงตัวของครีบรูปแบบที่ 1 มีค่าอัตราการถ่ายเทความร้อนของครีบน้อยที่สุด ส่วนการเรียงตัวของครีบรูปแบบที่ 3 มีค่าอัตราการถ่ายเทความร้อนของครีบมากที่สุด ผลจากโปรแกรม CFD พบว่า เมื่ออากาศไหลผ่านครีบแท่งทรงสี่เหลี่ยมแล้วสามารถเห็นการกระจายอุณหภูมิของครีบได้อย่างชัดเจน

คำสำคัญ: การถ่ายเทความร้อน, ครีบแท่งทรงสี่เหลี่ยม, รูปแบบการเรียงตัวของครีบ

Abstract

The purposes of this research were to study the effect of fins arrangement patterns on the heat transfer rate of the fins and to study the use of a computational fluid dynamics (CFD) program for airflow through the fins. Three arrangement patterns of rectangular pin fins were used, with a fin base temperature of 50°C and an average air velocity before passing through the fins of 1.5 m/s. The experimental results found that the fin arrangement patterns affect the heat transfer rate of the rectangular pin fins. The arrangement pattern 1 of the fins had the lowest heat transfer rate of the fins. The arrangement pattern 3 of the fins had the highest heat transfer rate of the fins. Results from the CFD program showed that when the air flowed through the rectangular pin fins, the temperature distribution of the fins could be seen.

Keywords: Heat transfer, Rectangular pin fins, Fins arrangement

บทนำ

ในปัจจุบัน พลังงานความร้อนมีความสำคัญต่อชีวิตมนุษย์ การเพิ่มขึ้นของประชากรโลกทำให้ความต้องการใช้พลังงานเพิ่มขึ้นอย่างรวดเร็ว โดยความต้องการใช้พลังงานที่เพิ่มขึ้นนี้ไม่สอดคล้องกับเชื้อเพลิงฟอสซิลที่ใช้ในการผลิตพลังงาน (น้ำมัน และถ่านหิน) ที่มีราคาแพง และมีปริมาณน้อยลง ดังนั้นจึงมีการนำพลังงานจากแหล่งอื่น ๆ มาใช้ทดแทน และมีการอนุรักษ์พลังงานโดยการผลิตและการใช้พลังงานอย่างมีประสิทธิภาพและประหยัด

กระบวนการถ่ายเทความร้อนนับว่ามีความสำคัญอย่างยิ่งในงานวิศวกรรม โดยเฉพาะวิศวกรเครื่องกลต้องเผชิญกับปัญหาการถ่ายเทความร้อนมากที่สุด เพราะต้องเกี่ยวข้องกับการใช้ความร้อนในการผลิตพลังงานของเครื่องจักรกลต่าง ๆ การพา

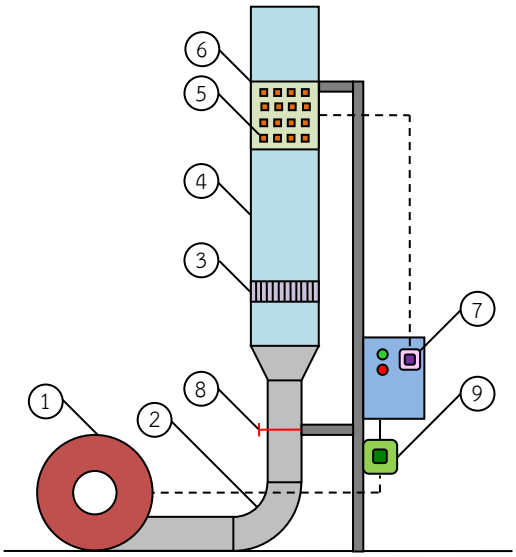
ความร้อนโดยใช้อากาศเป็นขบวนการหนึ่งของการถ่ายเทความร้อน ซึ่งมีความสำคัญในงานวิศวกรรมและการดำรงชีวิตของมนุษย์ เช่น เครื่องจักร รถยนต์ ตู้เย็น คอมพิวเตอร์ และเครื่องปรับอากาศ เป็นต้น ซึ่งต้องอาศัยขบวนการถ่ายเทความร้อนด้วยการพาทั้งสิ้น วิศวกรได้มีการคิดค้นหาวิธีการต่างๆ มาใช้พัฒนาขบวนการให้มีประสิทธิภาพสูงสุด แต่ก็จะประสบกับปัญหาอันมีสาเหตุมาจากขีดจำกัดในการเพิ่มสัมประสิทธิ์ของการพาความร้อน และการที่มีพื้นที่จำกัดของอุปกรณ์แลกเปลี่ยนความร้อน จึงได้ค้นหาวิธีที่จะเพิ่มอัตราการเคลื่อนที่ของความร้อนก็คือ การติดโลหะแผ่นบางๆ เข้ากับผิวโลหะเดิมเพื่อเพิ่มพื้นที่ซึ่งเรียกว่า ครีบ (Fins) การออกแบบรูปทรงของครีบมีความสำคัญเพราะการออกแบบที่ดีทำให้การถ่ายเทความร้อนมีประสิทธิภาพ รูปทรงของครีบมีหลายแบบ เช่น ทรงกรวย ทรงกระบอก ทรงสามเหลี่ยม และทรงสี่เหลี่ยม ทั้งนี้ครีบแท่งทรงสี่เหลี่ยมมีความน่าสนใจ เนื่องจากเป็นครีบที่มีระบายความร้อนได้ดี เนื่องจากสามารถให้พื้นที่ผิวได้มาก มีขนาดเล็กใช้พื้นติดตั้งน้อย และมีการไหลวนของอากาศได้ดี ทำให้การถ่ายเทความร้อนมีประสิทธิภาพสูง นอกจากนี้ครีบแท่งทรงสี่เหลี่ยมมีประสิทธิภาพทางความร้อนมากกว่าครีบแท่งทรงกระบอกและครีบแผ่นทรงสี่เหลี่ยม (อมร วิสิทธิวงศ์, 2548)

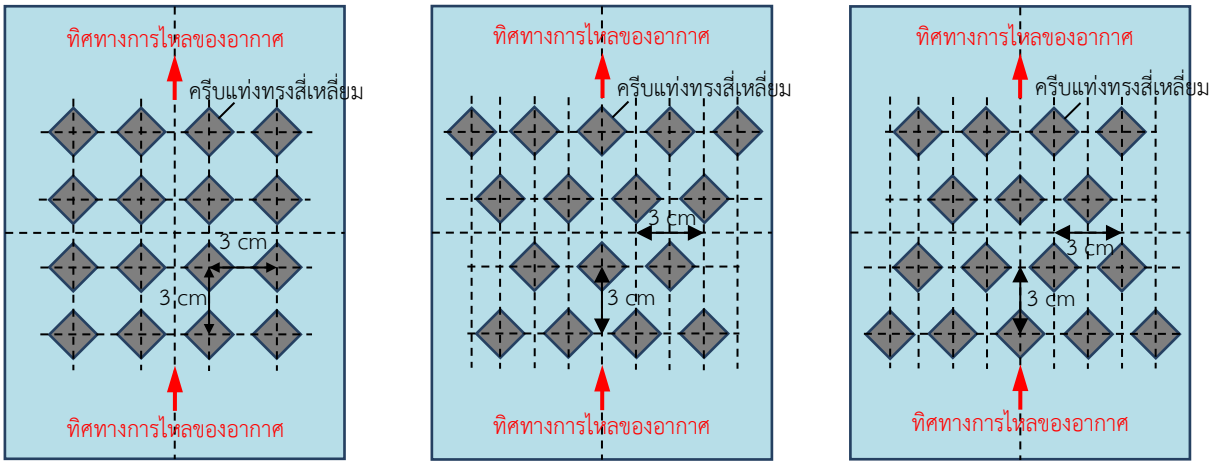
งานวิจัยที่เกี่ยวข้องกับครีบแท่งทรงสี่เหลี่ยม ได้แก่ สุทธิชัย กัดมั่น และคณะ (2563) ได้ศึกษาผลของความเร็วเฉลี่ยของอากาศก่อนผ่านครีบต่อการเปลี่ยนแปลงอุณหภูมิเฉลี่ยของผิวครีบและอัตราการถ่ายเทความร้อนของครีบแท่งทรงสี่เหลี่ยม โดยควบคุมอุณหภูมิฐานครีบ 70 องศาเซลเซียส และความเร็วอากาศเฉลี่ยก่อนผ่านครีบ 1 1.5 และ 2 เมตรต่อวินาที โดยใช้พัดลมแบบหมุนเหวี่ยงเป่าลมเข้าสู่เครื่องทดสอบอัตราการถ่ายเทความร้อนของครีบ โดยใช้อุโมงค์ลมแบบสี่เหลี่ยมมีขนาด 0.15x0.15x1 เมตร มีชุดครีบแท่งอลูมิเนียมทรงสี่เหลี่ยมจำนวน 16 แท่ง (ครีบแต่ละแท่งมีขนาดพื้นที่หน้าตัด 1.5x1.5 เซนติเมตร และความยาว 6.7 เซนติเมตร) ซึ่งมีการเรียงตัวของครีบแบบเรียงแนวเดียวกัน และควบคุมอุณหภูมิฐานครีบที่ 70 องศาเซลเซียส ผลการทดลองพบว่า ความเร็วเฉลี่ยของอากาศก่อนผ่านครีบ 2 เมตรต่อวินาที ทำให้ผิวครีบมีอุณหภูมิเฉลี่ยต่ำกว่าความเร็วเฉลี่ยของอากาศก่อนผ่านครีบ 1.5 และ 1 เมตรต่อวินาที ตามลำดับ และพบว่า อัตราการถ่ายเทความร้อนของครีบมีค่าเพิ่มขึ้นเมื่อความเร็วเฉลี่ยของอากาศก่อนผ่านครีบสูงขึ้น นอกจากนี้ สิริศักดิ์ วิทยัน และคณะ (2563) ได้ทดลองต่อจากสุทธิชัย กัดมั่น และคณะ (2563) โดยศึกษาผลของอุณหภูมิฐานครีบต่อการเปลี่ยนแปลงอุณหภูมิเฉลี่ยของผิวครีบและอัตราการถ่ายเทความร้อนของครีบแท่งทรงสี่เหลี่ยม โดยใช้อุณหภูมิฐานครีบ 50 70 และ 90 องศาเซลเซียส และความเร็วอากาศเฉลี่ยก่อนผ่านครีบ 1.5 เมตรต่อวินาที ผลการทดลองพบว่า อุณหภูมิฐานครีบ 90 องศาเซลเซียส ทำให้ผิวครีบมีอุณหภูมิเฉลี่ยสูงกว่าอุณหภูมิฐานครีบ 70 และ 50 องศาเซลเซียส ตามลำดับ และพบว่า อัตราการถ่ายเทความร้อนของครีบมีค่าเพิ่มขึ้นเมื่ออุณหภูมิฐานครีบสูงขึ้น จากงานวิจัยทั้งสองข้างต้นพบว่า ครีบแท่งทรงสี่เหลี่ยมยังมีตัวแปรบางตัวที่ต้องการศึกษาเพิ่มเติม ได้แก่ รูปแบบการเรียงตัวของครีบที่มีต่ออัตราการถ่ายเทความร้อนของครีบ

วัตถุประสงค์ของการวิจัย



1. เพื่อศึกษาผลของรูปแบบการเรียงตัวของครีบที่มีต่ออัตราการถ่ายเทความร้อนของครีบ
2. เพื่อศึกษาการใช้งานโปรแกรมคำนวณทางพลศาสตร์ของไหล (CFD) สำหรับการไหลของอากาศผ่านครีบแท่งทรงสี่เหลี่ยม

วิธีการดำเนินการวิจัย



1. อุปกรณ์ที่ใช้ในการทดลอง

1.1 เครื่องทดสอบอัตราการถ่ายเทความร้อนของครีบแบบอุโมงค์ลม

เครื่องทดสอบอัตราการถ่ายเทความร้อนของครีบแบบอุโมงค์ลมแสดงดังรูปที่ 1 หลักการทำงานของเครื่องนี้เริ่มจากพัดลมชนิดแรงเหวี่ยงโค้งหน้าซึ่งขับเคลื่อนด้วยมอเตอร์ยี่ห้อ Mitsubishi รุ่น Super line (SCL-KR) ขนาด 1.5 กิโลวัตต์ (หมายเลข 1) เป่าอากาศเข้าสู่ท่อลมสังกะสีขนาดเส้นผ่านศูนย์กลาง 4 นิ้ว (หมายเลข 2) และชุดเรียงกระแสการไหลของอากาศ (ท่อทำจากอลูมิเนียมจำนวน 225 ท่อ แต่ละท่อมีขนาดเส้นผ่านศูนย์กลาง 1 เซนติเมตร ยาว 5 เซนติเมตร) (หมายเลข 3) แล้วไหลผ่านอุโมงค์ลมสี่เหลี่ยมขนาด 0.15x0.15x1 เมตร (หมายเลข 4) และชุดครีบแท่งอลูมิเนียมทรงสี่เหลี่ยมจำนวน 16 แท่ง (ครีบแต่ละแท่งมีขนาดพื้นที่หน้าตัด 1.5x1.5 เซนติเมตร ยาว 6.7 เซนติเมตร) (หมายเลข 5) มีการเรียงตัวของครีบจำนวน 3 รูปแบบ แสดงดังรูปที่ 2 ฐานครีบถูกให้ความร้อนด้วยตัวทำความร้อนแบบแผ่นขนาด 15x20x2 เซนติเมตร กำลังไฟฟ้า 900 วัตต์ (หมายเลข 6) โดยควบคุมอุณหภูมิฐานครีบที่ 50 องศาเซลเซียส ด้วยเทอร์โมคัปเปิลชนิด K ต่อกับเครื่องควบคุมอุณหภูมิแบบพีไอดียี่ห้อ Toho รุ่น TTM-004-PA (หมายเลข 7) เมื่ออากาศไหลผ่านครีบแล้วจึงไหลออกจากอุโมงค์ลม ทั้งนี้ความเร็วอากาศเฉลี่ยก่อนผ่านครีบที่ระยะ 10 เซนติเมตร ถูกควบคุมไว้ที่ 1.5 เมตรต่อวินาที (วัดความเร็วลมด้วยเครื่องวัดความเร็วลมแบบ Hot wire ยี่ห้อ Testo รุ่น 405-V1) ด้วยวาล์วปีกผีเสื้อขนาดเส้นผ่านศูนย์กลาง 4 นิ้ว (หมายเลข 8) และปริมาณการใช้ไฟฟ้าถูกวัดด้วยมิเตอร์วัดไฟฟ้ายี่ห้อ Dai-ichi (หมายเลข 9)

รูปที่ 1 เครื่องทดสอบอัตราการถ่ายเทความร้อนของครีบแบบอุโมงค์ลม

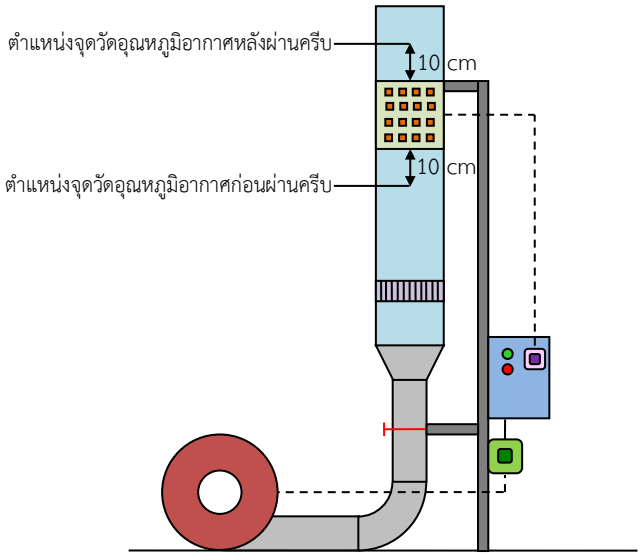
(ก) รูปแบบที่ 1 (ข) รูปแบบที่ 2 (ค) รูปแบบที่ 3

รูปที่ 2 การเรียงตัวของครีบแท่งสี่เหลี่ยมรูปแบบที่ 1 2 และ 3

2. วิธีการทดลอง

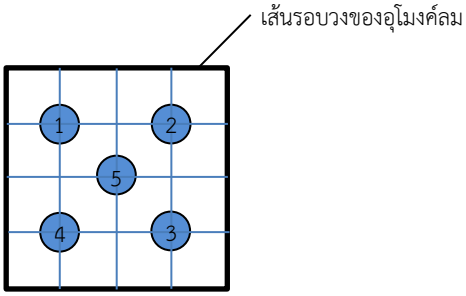
2.1 ประกอบชุดครีบที่ต้องการทดสอบ

2.2 เปิดและปรับชุดควบคุมตัวทำความร้อน (Heater) เพื่อควบคุมอุณหภูมิฐานครีบให้คงที่ที่ 50 องศาเซลเซียส



2.3 เปิดพัดลม และปรับวาล์วปีกผีเสื้อเพื่อควบคุมความเร็วของอากาศที่ 1.5 เมตรต่อวินาที

2.4 บันทึกผลการทดลอง (อุณหภูมิอากาศหลังผ่านครีบ) ที่เวลา 10 นาที



2.5 ทำตามข้อที่ 2.1-2.4 โดยการเปลี่ยนแปลงรูปแบบการเรียงครีบ

2.6 วิเคราะห์ข้อมูลการทดลองโดยหาค่าเฉลี่ย ($\overline{X}$) และค่าส่วนเบี่ยงเบนมาตรฐาน (S.D.)

ตำแหน่งจุดวัดอุณหภูมิอากาศก่อนและหลังผ่านครีบ (มุมมองด้านหน้าเครื่องทดสอบ) แสดงดังรูปที่ 3 โดยอยู่ห่างจากครีบเป็นระยะทาง 10 cm ส่วนตำแหน่งจุดวัดอุณหภูมิอากาศก่อนและหลังผ่านครีบ (มุมมองด้านบนเครื่องทดสอบ) แสดงดังรูปที่ 4 โดยวัด 5 ตำแหน่ง แล้วคำนวณหาอุณหภูมิอากาศเฉลี่ย

รูปที่ 3 ตำแหน่งจุดวัดอุณหภูมิอากาศก่อนและหลังผ่านครีบ (มุมมองด้านหน้าเครื่องทดสอบ)

รูปที่ 4 ตำแหน่งจุดวัดอุณหภูมิอากาศก่อนและหลังผ่านครีบ (มุมมองด้านบนเครื่องทดสอบ)

3. ตัวแปรที่ใช้ในการเก็บข้อมูล

3.1 กลุ่มตัวแปรที่กำหนดให้เปลี่ยนแปลง (ตัวแปรอิสระ) ได้แก่ รูปแบบการเรียงตัวของครีบแท่งสี่เหลี่ยม (รูปแบบที่ 1 2 และ 3)

3.2 กลุ่มตัวแปรตามที่ต้องการวัดค่า (ตัวแปรตาม) ได้แก่ อุณหภูมิอากาศหลังผ่านครีบ และอัตราการถ่ายเทความร้อนของครีบ

4. อัตราการถ่ายเทความร้อนของครีบ

อัตราการถ่ายเทความร้อนของครีบหาได้จากสมการที่ (1) (อนุสรณ์ สุขเกษม, 2550)

$$Q_{fin} = \dot{m}C_{pa}(\overline{T}_{out} - \overline{T}_{in}) \quad (1)$$

เมื่อ Q_{fin} คืออัตราการถ่ายเทความร้อนของครีบ (วัตต์) $\dot{m}$ คืออัตราการไหลของอากาศ (กิโลกรัมต่อวินาที) C_{pa} คือความร้อนจำเพาะของอากาศที่ความดันคงที่ที่อุณหภูมิ $T_a = (\overline{T}_{out} + \overline{T}_{in}) / 2$ (จูลต่อกิโลกรัม·องศาเซลเซียส) $\overline{T}_{out}$ คืออุณหภูมิเฉลี่ยของอากาศหลังผ่านครีบ (องศาเซลเซียส) และ $\overline{T}_{in}$ คืออุณหภูมิเฉลี่ยของอากาศก่อนผ่านครีบ (องศาเซลเซียส)

อัตราการไหลของอากาศหาได้จากสมการที่ (2) (อนุสรณ์ สุขเกษม, 2550)

$$\dot{m} = \rho A u \quad (2)$$

เมื่อ $\dot{m}$ คืออัตราการไหลของอากาศ (กิโลกรัมต่อวินาที) ρ คือความหนาแน่นของอากาศก่อนผ่านครีบ (กิโลกรัมต่อลูกบาศ์กเมตร) A คือพื้นที่หน้าตัดของอุโมงค์ลม (ตารางเมตร) และ u คือความเร็วเฉลี่ยของอากาศก่อนผ่านครีบ (เมตรต่อวินาที)

5. การศึกษาการใช้งานโปรแกรมคำนวณทางพลศาสตร์ของไหล

การศึกษาการใช้งานโปรแกรมคำนวณทางพลศาสตร์ของไหล (CFD) สำหรับการไหลของอากาศผ่านครีบแท่งทรงสี่เหลี่ยมใช้โปรแกรม Solidworks flow simulation 2022 โดยพิจารณาเฉพาะการกระจายอุณหภูมิของครีบ (Temperature profile)

ผลการทดลอง และการวิจารณ์ผล

1. ผลของรูปแบบการเรียงตัวของครีบต่ออัตราการถ่ายเทความร้อน

อุณหภูมิเฉลี่ยของอากาศก่อนและหลังผ่านครีบ ที่เวลา 10 นาที แสดงดังตารางที่ 1 และ 2 ตามลำดับ พบว่า อุณหภูมิเฉลี่ยของอากาศก่อนผ่านครีบมีค่าเท่ากับ 28.33±0.01 องศาเซลเซียส ซึ่งมีค่าค่อนข้างคงที่ เนื่องจากอากาศยังไม่ไหลผ่านครีบ ทำให้ไม่เกิดการถ่ายเทความร้อนจากครีบไปยังอากาศ และพบว่า อุณหภูมิเฉลี่ยของอากาศหลังผ่านครีบมีค่าสูงขึ้น เนื่องจากครีบมีการระบายความร้อน และเกิดการถ่ายเทความร้อนแบบการพาความร้อนจากผิวครีบไปยังอากาศ

รูปแบบการเรียงตัวของครีบมีผลต่ออุณหภูมิเฉลี่ยของอากาศหลังผ่านครีบ โดยการเรียงตัวของครีบรูปแบบที่ 1 มีอุณหภูมิเฉลี่ยของอากาศหลังผ่านครีบต่ำที่สุด เนื่องจากรูปแบบที่ 1 ได้วางครีบแบบเรียงแนวเดียวกัน อากาศจึงไหลผ่านครีบได้อย่างรวดเร็ว ทำให้เกิดการถ่ายเทความร้อนแบบการพาความร้อนจากผิวครีบไปยังอากาศได้ไม่มาก ส่วนการเรียงตัวของครีบรูปแบบที่ 3 มีอุณหภูมิเฉลี่ยของอากาศหลังผ่านครีบสูงที่สุด เนื่องจากรูปแบบที่ 3 ได้วางครีบแบบเรียงสลับกัน อากาศจึงไหลผ่านครีบได้ค่อนข้างช้า ทำให้เกิดการถ่ายเทความร้อนแบบการพาความร้อนจากผิวครีบไปยังอากาศได้เพิ่มขึ้น และรูปแบบที่ 3 ได้วางครีบแถวแรกที่สัมผัสอากาศจำนวน 5 แท่ง ทำให้เกิดการถ่ายเทความร้อนแบบการพาความร้อนจากผิวครีบไปยังอากาศได้ดีกว่ารูปแบบที่ 2 ซึ่งได้วางครีบแถวแรกที่สัมผัสอากาศจำนวน 4 แท่ง

ตารางที่ 1 อุณหภูมิเฉลี่ยของอากาศก่อนผ่านครีบ ($\overline{T}_{in}$) ที่เวลา 10 นาที

รูปแบบการเรียงตัวของครีบ	อุณหภูมิเฉลี่ยของอากาศก่อนผ่านครีบ ($\overline{T}_{in}$) ที่เวลา 10 นาที (องศาเซลเซียส)						
	จุด 1	จุด 2	จุด 3	จุด 4	จุด 5	ค่าเฉลี่ย	S.D.
1	28.4	28.4	28.5	28.2	28.2	28.34	0.13

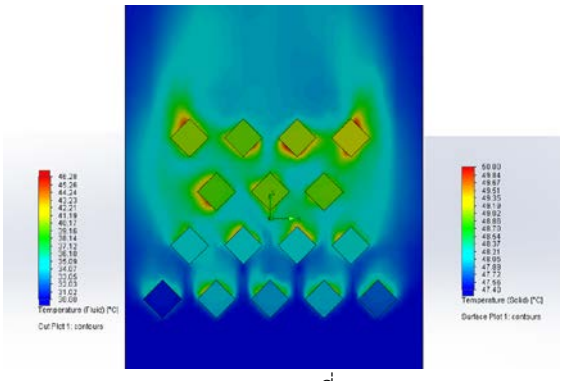
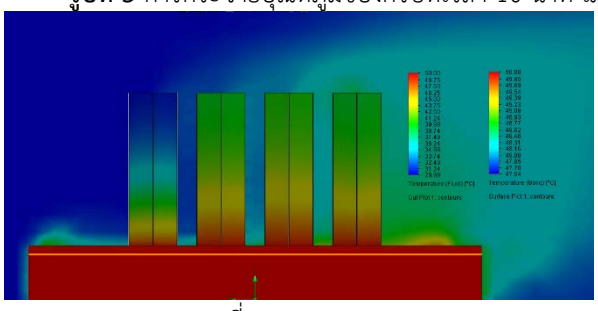
2. การศึกษาการใช้งานโปรแกรมคำนวณทางพลศาสตร์ของไหลสำหรับการไหลของอากาศผ่านครีบแท่งทรงสี่เหลี่ยม

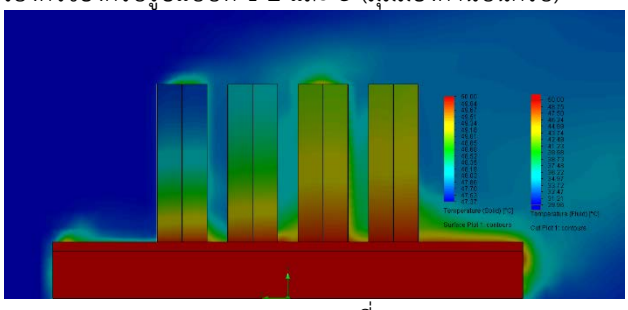


การกระจายอุณหภูมิของครีบที่เวลา 10 นาที เมื่อการเรียงตัวของครีบรูปแบบที่ 1 2 และ 3 แสดงดังรูปที่ 5 และ 6 ซึ่งพบว่า เมื่ออากาศไหลผ่านครีบแท่งทรงสี่เหลี่ยมแล้วสามารถเห็นการกระจายอุณหภูมิของครีบได้อย่างชัดเจน โดยการเรียงตัวของครีบรูปแบบที่ 1 มีอุณหภูมิของครีบต่ำที่สุด ส่งผลให้อุณหภูมิเฉลี่ยของอากาศหลังผ่านครีบน้อยที่สุด ส่วนการเรียงตัวของครีบรูปแบบที่ 3 มีอุณหภูมิของครีบสูงที่สุด ส่งผลให้อุณหภูมิเฉลี่ยของอากาศหลังผ่านครีบมากที่สุด ซึ่งสอดคล้องกับผลการทดลองในหัวข้อที่ 1 (ผลของรูปแบบการเรียงตัวของครีบต่ออัตราการถ่ายเทความร้อน)

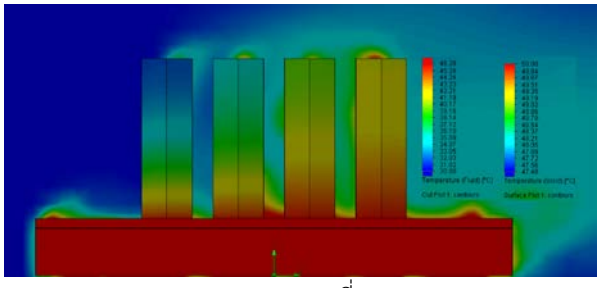
(ก) รูปแบบที่ 1



(ข) รูปแบบที่ 2



(ค) รูปแบบที่ 3



รูปที่ 5 การกระจายอุณหภูมิของครีบที่เวลา 10 นาที เมื่อการเรียงตัวของครีบรูปแบบที่ 1 2 และ 3 (มุมมองด้านบนครีบ)

(ก) รูปแบบที่ 1

(ข) รูปแบบที่ 2

(ค) รูปแบบที่ 3

รูปที่ 6 การกระจายอุณหภูมิของครีบที่เวลา 10 นาที เมื่อการเรียงตัวของครีบรูปแบบที่ 1 2 และ 3 (มุมมองด้านข้างครีบ)

สรุปผลการวิจัย

จากผลการวิจัยพบว่า รูปแบบการเรียงตัวของครีบมีผลต่ออัตราการถ่ายเทความร้อนของครีบแท่งทรงสี่เหลี่ยม โดยการเรียงตัวของครีบรูปแบบที่ 1 มีค่าอัตราการถ่ายเทความร้อนของครีบน้อยที่สุด ส่วนการเรียงตัวของครีบรูปแบบที่ 3 มีค่าอัตราการถ่ายเทความร้อนของครีบมากที่สุด การศึกษาการใช้งานโปรแกรมคำนวณทางพลศาสตร์ของไหล (CFD) พบว่า เมื่ออากาศไหลผ่านครีบแท่งทรงสี่เหลี่ยมแล้วสามารถเห็นการกระจายอุณหภูมิของครีบได้อย่างชัดเจน

ข้อเสนอแนะ

ข้อเสนอแนะสำหรับงานวิจัยครั้งต่อไปควรควบคุมอุณหภูมิฐานครีบให้มีความสม่ำเสมอทั่วทั้งแผ่น เพื่อทำให้ได้การทดลองที่มีความถูกต้องและแม่นยำมากขึ้น และควรศึกษาถึงผลของระดับอุณหภูมิของครีบที่เหมาะสมที่สุดต่อการใช้งานด้านต่าง ๆ

ปิยภรณ์ คล้ายเกิด, (Piyaphon Klaykerd)[3]

บทคัดย่อ

งานวิจัยนี้มีวัตถุประสงค์เพื่อพัฒนาผลิตภัณฑ์พุดดิ้งดิ้งอัลมอนด์ผสมข้าวไรซ์เบอร์รี่รสโก้ โดยการแปรผันอัตราส่วนอัลมอนด์ต่อข้าวไรซ์เบอร์รี่ 2 อัตราส่วนคือ 80:20 และ 50:50 และโกโก้ 2 ระดับ คือ 1 และ 3 กรัม แล้วนำไปทดสอบทางประสาทสัมผัสกับผู้ทดสอบชิมจำนวน 25 คน พบว่า อัตราส่วนของอัลมอนด์ต่อข้าวไรซ์เบอร์รี่ 80:20 และโกโก้ 3 กรัมเป็นสูตรที่ได้คะแนนการยอมรับมากที่สุด แล้วนำสูตรพื้นฐานไปศึกษาชนิดของสารไฮโดรคลอลอยด์ที่เหมาะสมในผลิตภัณฑ์พุดดิ้งอัลมอนด์ผสมข้าวไรซ์เบอร์รี่รสโกโก้ โดยการแปรผันอัตราส่วนของสารไฮโดรคอลลอยด์ 3 ชนิด ได้แก่ ผงวุ้น เจลาติน และคาราจีแนน โดยใช้การออกแบบ Mixture Design ซึ่งเป็นแผนการทดลองหาส่วนผสมของสูตรอาหารได้ทั้งหมด 7 สูตร แล้วทดสอบทางประสาทสัมผัสด้านสี กลิ่น รสชาติ เนื้อสัมผัส และความชอบโดยรวม โดยใช้ผู้ทดสอบชิมจำนวน 30 คน พบว่าสูตรที่ได้การยอมรับด้านประสาทสัมผัสมากที่สุดคือ สูตรที่ 7 การทดสอบการเกิดซิเนอรีซิส พบว่าสูตรที่ใช้สารคาราจีแนนมีการซิเนอรีซิสมากกว่าสูตรอื่น และสูตรที่ใช้สารเจลาตินมีการซิเนอรีซิสน้ำน้อยที่สุด การทดสอบความคงตัวต่อการเก็บรักษา พบว่าผลิตภัณฑ์สูตรที่ 6 มีร้อยละความคงตัวต่อการเก็บรักษาสูงที่สุด เมื่อเก็บรักษา 5 วัน
คำสำคัญ: พุดดิ้ง, สารไฮโดรคลอลอยด์, ซินเนอเรซิส, ความคงตัว

Abstract

The objective of this study was to develop almond mixed with rice berry cocoa-flavored pudding. Two ratios of almonds to rice berry are 80:20 and 50:50 and 2 levels of cocoa: 1 and 3 grams. The pudding was studied the sensory acceptability. The ratio of almonds to rice berry is 80:20 with 3 grams of cocoa powder was the optimized formular. Therefore, this formula was selected to studied the ratio of 3 hydrocolloids (agar, gelatin ant carrageenan) on sensory acceptability, product syneresis and shelf life by using mixture design. Pudding from carrageenan had syneresis more than agar and gelatin respectively ($p<0.05$). Sensory evaluation was tested by using 9- point hedonic scale in aspects of color, odor, flavor, texture and overall liking. The result showed pudding mixture of 3 hydrocolloids had the highest overall liking score. The pudding containing carrageenan-type hydrocolloids had the highest percentage of syneresis and pudding containing gelatin-type hydrocolloids had the lowest percentage of syneresis. The pudding containing hydrocolloid agar powder had the highest storage stability when stored at 4°C for 5 days.
Keywords: pudding, hydrocolloid, syneresis, stability

บทนำ

การรับประทานอาหารที่ไม่เหมาะสม ส่งผลให้เกิดโรคชนิดต่างๆ ได้ เช่น โรคไม่ติดต่อเรื้อรัง ซึ่งถือเป็นปัญหาสุขภาพที่สำคัญ ในปัจจุบันมีแนวโน้มอัตราการเจ็บป่วยในประชากรของประเทศต่างๆ เพิ่มมากขึ้นอย่างต่อเนื่อง เป็นที่ทราบกันดีว่าปัจจัยสำคัญที่ก่อให้เกิดโรคไม่ติดต่อเรื้อรัง ได้แก่ พฤติกรรมการรับประทานอาหารที่ไม่ถูกสุขลักษณะเป็นเวลานานๆ โดยเฉพาะอย่างยิ่งอาหารที่มีปริมาณไขมันและน้ำตาลในปริมาณสูง ประกอบกับการที่ไม่ค่อยได้เคลื่อนไหวร่างกาย ส่งผลให้มีพลังงานส่วนเกินสะสมอยู่ในร่างกาย

นำมาซึ่งภาวะน้ำหนักเกินและเพิ่มความเสี่ยงต่อการเกิดภาวะแทรกซ้อนในที่สุด (อลงกต สิงห์โต, และคนอื่นๆ, 2561) ปัจจุบันกระแสรักษาสุขภาพของคนไทยมีแนวโน้มที่เพิ่มมากขึ้น โดยเฉพาะในกลุ่มวัยรุ่น วัยทำงานและผู้สูงอายุ ซึ่งให้ความสำคัญกับเรื่องการบริโภคอาหารมากที่สุด อาหารที่ผู้บริโภคทุกเลือกรับประทานจะต้องมีคุณภาพ ไม่เป็นอันตรายต่อสุขภาพ และมีคุณค่าทางสารอาหารครบถ้วน เพื่อให้มีสุขภาพที่ดีและร่างกายแข็งแรง ทั้งนี้อาหารที่นิยมเป็นอาหารปลอดกลูเตน และ Functional foods ซึ่งเป็นกลุ่มอาหารที่ตอบโจทย์ผู้บริโภคทุกกลุ่มวัย คือ เน้นความเป็นธรรมชาติ และดีแก่สุขภาพมากที่สุด พุดดิ้งเป็นอาหารที่อุดมไปด้วยสารอาหารต่างๆ ซึ่งมีส่วนประกอบหลักคือ นม น้ำตาล และสารก่อเจล โดยพุดดิ้งจะมีเนื้อสัมผัสที่นุ่มและสามารถกลืนได้ง่าย ซึ่งเหมาะกับคนทุกกลุ่มวัย

อัลมอนด์เป็นถั่วเปลือกแข็ง ที่เป็นแหล่งของโปรตีนที่มีประโยชน์ในเรื่องการซ่อมแซมส่วนที่สึกหรอของร่างกาย มีกรดไขมันไม่อิ่มตัว มีไฟโตสเตอรอลซึ่งมีส่วนช่วยในการลดคอเลสเตอรอลชนิดความหนาแน่นต่ำ (LDL-C) รวมทั้งยังมีวิตามินอีที่มีฤทธิ์ในการต้านอนุมูลอิสระ นอกจากนี้อัลมอนด์ยังอุดมไปด้วยแมงกานีส แมกนีเซียม ทองแดง ฟอสฟอรัส ไรโบฟลาวิน ใยอาหารทั้งที่สามารถละลายและไม่ละลายน้ำ รวมทั้งยังมีสารต้านอนุมูลอิสระในกลุ่มสารประกอบฟีนอลิกและโพลีฟีนอล และสารกลุ่มฟลาโวนอยด์ที่ช่วยส่งเสริมสุขภาพ สามารถป้องกันโรคไม่ติดต่อเรื้อรังได้ (Chung-Yen, et al., 2006) จากคุณประโยชน์ดังกล่าวจึงนิยมเอาอัลมอนด์มาแปรรูปเป็นนมเพื่อเป็นทางเลือกให้กับผู้ที่ต้องการดูแลสุขภาพและผู้ที่บริโภคมังสวิรัติ (ฉัตรภา หัตถโกศล, และคนอื่นๆ, 2563) และข้าวไรซ์เบอร์รี่เป็นข้าวพันธุ์ผสมระหว่างข้าวเจ้าหอมนิลและข้าวขาวดอกมะลิ 105 ประกอบไปด้วยธาตุเหล็ก สารต้านอนุมูลอิสระ และมีใยอาหารสูง จึงช่วยชะลอการดูดซึมน้ำตาล ทำให้ระดับน้ำตาลในเลือดขึ้นช้ากว่าการบริโภคข้าวกล้องและข้าวขาวขัดสีทั่วไป เหมาะสำหรับผู้ป่วยเบาหวาน มีสรรพคุณช่วยลดระดับไขมันและคอเลสเตอรอล ช่วยทำให้ระบบขับถ่ายทำงานได้อย่างมีประสิทธิภาพมากขึ้น (กฤติยา เขื่อนเพชร, และคนอื่นๆ, 2562) ดังนั้นงานวิจัยนี้มีวัตถุประสงค์เพื่อพัฒนาผลิตภัณฑ์พุดดิ้งจากอัลมอนด์ผสมข้าวไรซ์เบอร์รี่พลังงานต่ำที่มีคุณค่าทางโภชนาการจากถั่วอัลมอนด์และข้าวไรซ์เบอร์รี่ เพื่อเป็นอาหารสุขภาพทางเลือกสำหรับผู้บริโภคที่ใส่ใจในสุขภาพ

วัตถุประสงค์ของการวิจัย

1. เพื่อศึกษาสูตรพื้นฐานของพุดดิ้งอัลมอนด์ผสมข้าวไรซ์เบอร์รี่รสโก้ต่อการยอมรับทางประสาทสัมผัส
2. เพื่อศึกษาอัตราส่วนของสารไฮโดรคลอลอยด์ที่ใช้ในผลิตภัณฑ์พุดดิ้งอัลมอนด์ผสมข้าวไรซ์เบอร์รี่รสโกโก้ต่อการยอมรับทางประสาทสัมผัส
3. เพื่อศึกษาผลของการเก็บรักษาต่อคุณภาพของผลิตภัณฑ์พุดดิ้งอัลมอนด์ผสมข้าวไรซ์เบอร์รี่รสโกโก้

วิธีการดำเนินการวิจัย

1. การศึกษาสูตรพื้นฐาน โดยศึกษาอัตราส่วนอัลมอนด์ต่อข้าวไรซ์เบอร์รี่และปริมาณโกโก้ในการผลิตพุดดิ้งอัลมอลด์ผสมข้าวไรซ์เบอร์รี่รสโกโก้ต่อการยอมรับด้านประสาทสัมผัส

ศึกษาสัดส่วนอัลมอนด์ต่อข้าวไรซ์เบอร์รี่ 2 อัตราส่วนคือ 80:20 และ 50:50 และศึกษาระดับโกโก้ 2 ระดับคือ ใช้โกโก้ 1 กรัม และ 3 กรัม แสดงดังตารางที่ 1

ตารางที่ 1 อัตราส่วนของอัลมอนด์ต่อข้าวไรซ์เบอร์รี่ และปริมาณโกโก้

สูตรที่	อัตราส่วนอัลมอนด์ : ข้าวไรส์เบอร์รี่	โกโก้
1	80 : 20	1
2	80 : 20	3
3	50 : 50	1
4	50 : 50	3

ผลิตพุดดิ้งโดยต้มน้ำ 1,000 มิลลิลิตร และใช้หญ้าหวานเป็นสารให้ความหวาน 2.9 กรัม เป็นเวลา 30 นาที จากนั้นนำมากรองโดยใช้ผ้าข้าวบาง และใส่ผงโกโก้ตามอัตราส่วนที่กำหนด ใช้เจลาติน 1.5 กรัมเป็นสารให้ความคงตัว (กู้เกียรติ ทุดปอ, และคนอื่นๆ , 2564) จากนั้นนำพุดดิ้งมาใส่ภาชนะสำหรับชิมโดยชั่งปริมาณพุดดิ้ง 50 กรัม แล้วนำไปเก็บในตู้เย็น และนำไปทดสอบทางประสาทสัมผัสโดยใช้วิธีทดสอบแบบ 9-point Hedonic Scale เพื่อประเมินคุณลักษณะด้านสี กลิ่น รสชาติ เนื้อสัมผัส และความชอบโดยรวม โดยใช้ผู้ทดสอบชิมจำนวน 25 คน เปรียบเทียบความแตกต่างของค่าเฉลี่ยโดยวิธี Duncan’s New Multiple Range Test (DMRT)

2. การศึกษาอัตราส่วนของสารไฮโดรคลอลอยด์ที่ใช้ในผลิตภัณฑ์พุดดิ้งอัลมอนด์ผสมข้าวไรซ์เบอร์รี่รสโกโก้

ศึกษาอัตราส่วนของสารไฮโดรคลอลอยด์ โดยทำการแปรผันสัดส่วนของสารไฮโดรคอลลอยด์ 3 ชนิด ได้แก่ ผงวุ้น เจลาติน และ คาราจีแนน โดยใช้การออกแบบ Mixture Design แสดงดังตารางที่ 2

ตารางที่ 2 อัตราส่วนของสารไฮโดรคอลลอยด์ที่ใช้ในผลิตภัณฑ์พุดดิ้ง

สูตรที่	ผงวุ้น (ร้อยละโดยปริมาตร)	เจลาติน (ร้อยละโดยปริมาตร)	คาราจีแนน (ร้อยละโดยปริมาตร)
1	100	0	0
2	0	100	0
3	0	0	100
4	50	50	0
5	0	50	50
6	50	0	50
7	33.33	33.33	33.33

นำผลิตภัณฑ์พุดดิ้งที่ได้ไปทดสอบทางประสาทสัมผัสโดยใช้วิธีทดสอบแบบ 9-point Hedonic Scale เพื่อประเมินคุณลักษณะด้านสี กลิ่น รสชาติ เนื้อสัมผัส และความชอบโดยรวม โดยใช้ผู้ทดสอบชิมจำนวน 30 คน เปรียบเทียบความแตกต่างของค่าเฉลี่ยโดยวิธี Duncan's New Multiple Range Test (DMRT)

3. การทดสอบร้อยละการซิเนอรีซิสของผลิตภัณฑ์พุดดิ้งอัลมอนด์ผสมข้าวไรซ์เบอร์รี่รสโกโก้ (Moin, et al., 2017)

การทดสอบของเหลวที่แยกตัวจากพุดดิ้งโดยใช้สารไฮโดรคลอลอยด์ต่างกัน โดยนำพุดดิ้ง 15 กรัม ไปเซนตริฟิวส์ที่ 4,000 รอบต่อนาที เป็นเวลา 10 นาที จากนั้นชั่งน้ำหนักของน้ำที่แยกออกมาจากพุดดิ้ง และคำนวณการเกิดซิเนอรีซีสตามสูตร

$$\text{Syneresis (\%)} = \frac{\text{Weight of water separated (g)}}{\text{Sample weight (g)}} \times 100$$

4. การทดสอบความคงตัวต่อการเก็บรักษา (Moin, et al., 2017)

เก็บตัวอย่างพุดดิ้งในตู้เย็น 5 วัน ทำการวิเคราะห์ความคงตัวโดยการชั่งน้ำหนักตัวอย่างเริ่มต้น และน้ำหนักตัวอย่างหลังจากการเก็บรักษา

สรุปผลการวิจัย

1. ผลการศึกษาอัตราส่วนอัลมอนด์ต่อข้าวไรซ์เบอร์รี่และปริมาณโกโก้ในการผลิตพุดดิ้งอัลมอลด์ผสมข้าวไรซ์เบอร์รี่รสโกโก้ต่อการยอมรับด้านประสาทสัมผัส

การศึกษาสูตรพื้นฐานของพุดดิ้งอัลมอนด์ผสมข้าวไรซ์เบอร์รี่รสโก้ต่อการยอมรับด้านประสาทสัมผัส โดยการแปรผันสัดส่วนอัลมอนด์ต่อข้าวไรซ์เบอร์รี่ในปริมาณ 80 : 20 กรัม และ 50 : 50 และศึกษาโกโก้ที่ 2 ระดับคือ 1 กรัม และ 3 กรัม แล้วนำไปทดสอบทางประสาทสัมผัสด้วยวิธี 9-point Hedonic Scale ด้านสี กลิ่น รสชาติ เนื้อสัมผัส และความชอบโดยรวม โดยใช้ผู้ทดสอบชิมจำนวน 25 คน ผลการทดสอบแสดงดังตารางที่ 3

ตารางที่ 3 ผลการทดสอบทางประสาทสัมผัสผลิตภัณฑ์พุดดิ้งอัลมอลด์ผสมข้าวไรซ์เบอร์รี่รสโกโก้สูตรพื้นฐานที่มีอัตราส่วนของน้ำอัลมอนด์ต่อข้าวไรซ์เบอร์รี่ต่างกัน

สูตรที่	คุณลักษณะ				
	สี^{ns}	กลิ่น	รสชาติ^{ns}	เนื้อสัมผัส	ความชอบโดยรวม
1	6.42 ± 1.47	6.00 ± 1.69^{bc}	6.17 ± 1.95	6.83 ± 1.49^{a}	6.63 ± 1.24^{ab}
2	6.83 ± 1.52	6.75 ± 1.59^{a}	6.17 ± 1.61	6.75 ± 1.29^{ab}	6.92 ± 1.44^{a}
3	6.29 ± 1.33	5.42 ± 1.79^{c}	6.17 ± 1.31	6.00 ± 1.62^{bc}	6.33 ± 0.96^{b}
4	6.42 ± 1.91	6.33 ± 1.71^{ab}	5.58 ± 1.82	5.75 ± 1.80^{c}	6.49 ± 1.35^{b}

หมายเหตุ ตัวอักษรที่ต่างกันตามแนวตั้ง มีความแตกต่างกันอย่างมีนัยสำคัญทางสถิติ ($p \leq 0.05$)
ตัวอักษร ns คือ ไม่มีความแตกต่างกันอย่างมีนัยสำคัญทางสถิติ (non-significant) ($p \leq 0.05$)

จากการทดสอบทางประสาทสัมผัสผลิตภัณฑ์พุดดิ้งที่แปรอัตราส่วนอัลมอนด์ต่อข้าวไรซ์เบอร์รี่ด้านสี และด้านรสชาติ พบว่าไม่แตกต่างกันอย่างมีนัยสำคัญทางสถิติ คุณลักษณะด้านเนื้อสัมผัสพบว่าสูตรที่ 1 มีคะแนนสูงที่สุดแต่ไม่แตกต่างกันอย่างมีนัยสำคัญทางสถิติกับสูตรที่ 2 และคุณลักษณะด้านกลิ่น และความชอบโดยรวม พบว่าสูตรที่ 2 มีคะแนนความชอบโดยรวมสูงที่สุด ดังนั้นสูตรที่ 2 จึงเป็นที่มาในการนำไปใช้เป็นสูตรพื้นฐานของผลิตภัณฑ์พุดดิ้ง

2. ผลการศึกษาอัตราส่วนของสารไฮโดรคอลลอยด์ที่ใช้ในผลิตภัณฑ์พุดดิ้งอัลมอนด์ผสมข้าวไรซ์เบอร์รี่รสโกโก้

การศึกษาอัตราส่วนของสารไฮโดรคลอลอยด์ที่ใช้ในผลิตภัณฑ์พุดดิ้งอัลมอนด์ผสมข้าวไรซ์เบอร์รี่รสโกโก้ทั้งหมด 7 สูตรโดยผลการทดสอบทางประสาทสัมผัสแสดงค่าดังตารางที่ 4

ตารางที่ 4 ผลการทดสอบทางประสาทสัมผัสผลิตภัณฑ์พุดดิ้งอัลมอลด์ผสมข้าวไรซ์เบอร์รี่รสโกโก้ที่มีต่ออัตราส่วนของสารไฮโดรคอลลอยด์ที่แตกต่างกัน

สูตรที่	คุณลักษณะ				
	สี^{ns}	กลิ่น	รสชาติ	เนื้อสัมผัส	ความชอบโดยรวม
1	6.77 ± 1.28	6.47 ± 1.38^{ab}	5.33 ± 1.45^{bc}	5.60 ± 1.48^{cd}	6.03 ± 1.45^{ab}
2	6.63 ± 1.43	6.60 ± 1.35^{a}	6.20 ± 1.54^{ab}	6.07 ± 1.51^{bcd}	6.43 ± 1.41^{ab}
3	6.63 ± 1.56	6.27 ± 1.51a^{ab}	5.20 ± 1.79^{c}	5.27 ± 1.93^{d}	5.80 ± 1.69^{b}
4	6.67 ± 1.58	5.77 ± 1.74^{b}	5.53 ± 1.93^{bc}	6.30 ± 1.49^{abc}	6.27 ± 1.44^{ab}
5	7.06 ± 1.26	6.40 ± 1.40^{ab}	6.03 ± 1.59^{abc}	6.97 ± 1.35^{a}	6.70 ± 1.49^{a}
6	6.63 ± 1.30	6.53 ± 1.25^{ab}	6.47 ± 1.50^{a}	6.73 ± 1.48^{ab}	6.73 ± 1.31^{a}
7	7.20 ± 1.13	6.53 ± 1.20^{ab}	6.20 ± 1.58^{ab}	6.67 ± 1.56^{ab}	6.73 ± 1.26^{a}

หมายเหตุ ตัวอักษรที่ต่างกันตามแนวตั้ง มีความแตกต่างกันอย่างมีนัยสำคัญทางสถิติ ($p \leq 0.05$)
ตัวอักษร ns คือ ไม่มีความแตกต่างกันอย่างมีนัยสำคัญทางสถิติ (non-significant) ($p \leq 0.05$)

จากผลการทดสอบทางประสาทสัมผัสผลิตภัณฑ์พุดดิ้งอัลมอลด์ผสมข้าวไรซ์เบอร์รี่รสโกโก้ที่มีต่ออัตราส่วนของสารไฮโดรคอลลอยด์ที่แตกต่างกันพบว่า ผู้ทดสอบชิมให้การยอมรับผลิตภัณฑ์ด้านสีทุกสูตรไม่แตกต่างกันอย่างมีนัยสำคัญทางสถิติ ด้านกลิ่นสูตรที่ 2 สูงที่สุดแตกต่างอย่างไม่มีนัยสำคัญทางสถิติกับสูตรที่ 1, 3, 5, 6 และ 7 ด้านรสชาติสูตรที่ 6 สูงที่สุดแตกต่างอย่างไม่มีนัยสำคัญทางสถิติกับสูตรที่ 2, 5 และ 7 ด้านเนื้อสัมผัสสูตรที่ 5 สูงที่สุดแตกต่างอย่างไม่มีนัยสำคัญทางสถิติกับสูตรที่ 4, 6 และ 7 และความชอบโดยรวมสูตรที่ 5, 6 และ 7 สูงที่สุดแตกต่างอย่างไม่มีนัยสำคัญทางสถิติกับสูตรที่ 1, 2 และ 4

3. ผลการทดสอบร้อยละการซิเนอรีซิสของผลิตภัณฑ์พุดดิ้งอัลมอนด์ผสมข้าวไรซ์เบอร์รี่รสโกโก้

ผลการทดสอบร้อยละการซิเนอรีซิสของผลิตภัณฑ์พุดดิ้งอัลมอนด์ผสมข้าวไรซ์เบอร์รี่รสโกโก้ แสดงดังตารางที่ 5

ตารางที่ 5 ร้อยละการซิเนอรีซิสของผลิตภัณฑ์พุดดิ้งอัลมอลด์ผสมข้าวไรซ์เบอร์รี่รสโกโก้

สูตรที่	ร้อยละการซิเนอรีซิส
1	20.12 ± 2.78^{b}
2	2.24 ± 0.81^{b}
3	51.64 ± 7.28^{a}
4	6.80 ± 1.16^{b}
5	12.29 ± 4.70^{b}
6	48.68 ± 3.07^{a}
7	17.88 ± 7.26^{b}

หมายเหตุ ตัวอักษรที่ต่างกันตามแนวตั้ง มีความแตกต่างกันอย่างมีนัยสำคัญทางสถิติ ($p \leq 0.05$)

จากตารางผลการทดสอบร้อยละซิเนอรีซิสของผลิตภัณฑ์พุดดิ้งอัลมอลด์ผสมข้าวไรซ์เบอร์รี่รสโกโก้พบว่า ผลิตภัณฑ์พุดดิ้งสูตรที่มีส่วนผสมของไฮโดรคอลลอยด์ชนิดคาราจีแนน มีค่าร้อยละซิเนอรีซิสสูงกว่าไฮโดรคอลลอยด์ชนิดอื่น และผลิตภัณฑ์พุดดิ้งสูตรที่มีส่วนผสมของไฮโดรคอลลอยด์ชนิดเจลาตินมีค่าร้อยละซิเนอรีซิสต่ำที่สุด

4. ผลการทดสอบความคงตัวต่อการเก็บรักษา

ผลการทดสอบความคงตัวต่อการเก็บรักษา 5 วัน แสดงดังตารางที่ 6

ตารางที่ 6 ร้อยละการสูญเสียน้ำหนักหลักการเก็บรักษาของผลิตภัณฑ์พุดดิ้งอัลมอนด์ผสมข้าวไรซ์เบอร์รี่รสโกโก้

สูตรที่	ร้อยละการสูญเสียน้ำหนัก
1	4.43 ± 2.67^{bc}
2	5.97 ± 0.32^{abc}
3	5.42 ± 1.48^{bc}
4	6.85 ± 0.42^{ab}
5	6.03 ± 1.90^{abc}
6	3.69 ± 1.98^{c}
7	8.54 ± 1.66^{a}

หมายเหตุ ตัวอักษรที่ต่างกันตามแนวตั้ง มีความแตกต่างกันอย่างมีนัยสำคัญทางสถิติ ($p \leq 0.05$)

จากตารางผลการทดสอบความคงตัวต่อการเก็บรักษาของผลิตภัณฑ์พุดดิ้งพบว่าผลิตภัณฑ์สูตรที่ 7 มีร้อยละการสูญเสียน้ำหนักสูงที่สุด ซึ่งแตกต่างอย่างไม่มีนัยสำคัญกับสูตรที่ 2, 4 และ 5 ส่วนผลิตภัณฑ์สูตรที่ 6 มีร้อยละการสูญเสียน้ำหนักต่ำที่สุด แสดงว่ามีความคงตัวต่อการเก็บรักษาสูงที่สุด

อภิปรายผลการวิจัย

ผลิตภัณฑ์พุดดิ้งอัลมอนด์ผสมข้าวไรซ์เบอร์รี่รสโกโก้มีคุณสมบัติทางประสาทสัมผัสด้านสีไม่แตกต่างกันอย่างมีนัยสำคัญทางสถิติเนื่องจากปริมาณโกโก้ที่เติมลงไปในผลิตภัณฑ์แตกต่างกันไม่มากจึงทำให้ผู้บริโภคไม่เห็นถึงความแตกต่างกัน

สารไฮโดรคอลลอยด์ชนิดคาราจีแนนส่งผลทำให้ผลิตภัณฑ์เกิดซิเนอรีซิสสูงที่สุด เนื่องจากสารคาราจีแนนเป็นเจลที่มีลักษณะเปราะ แตกได้ง่าย และสามารถเกิดซิเนอรีซิสจากการหดตัวเข้าใกล้กันของร่างแหพอลิเมอร์ในโครงสร้างของเจล ทำให้น้ำที่อยู่ภายในถูกขับออกจากโครงสร้าง (นิธิยา รัตนาปนนท์, 2553) และเมื่อเก็บรักษาผลิตภัณฑ์ผลิตภัณฑ์พุดดิ้งอัลมอนด์ผสมข้าวไรซ์เบอร์รี่รสโกโก้

นานขึ้นส่งผลทำให้เกิดการแยกน้ำของผลิตภัณฑ์เพิ่มมากขึ้น เนื่องจากเกิดการหดตัวของร่างแหพอลิเมอร์ ช่องว่างที่กักเก็บน้ำในผลิตภัณฑ์ลดน้อยลง จึงเกิดการแยกน้ำออกมา และมีแนวโน้มเพิ่มมากขึ้นตามระยะเวลาการเก็บรักษา

เจลาตินเป็นสายพอลิเมอร์ของโปรตีนที่ประกอบด้วยกรดอะมิโนชนิดต่างๆ มาต่อกันเป็นสายยาว จึงสามารถทำปฏิกิริยากับโปรตีนในผลิตภัณฑ์พุดดิ้งได้ดีและเกิดเจลที่ดี เมื่อเจลาตินจับตัวเป็นโครงสร้าง 3 มิติ โพลิเมอร์แต่ละสายรวมกันและสามารถจับกับน้ำไว้ได้ (สายสมร พูลพันธ์,2547) ส่งผลให้ผลิตภัณฑ์พุดดิ้งที่มีส่วนผสมของเจลาตินเกิดซินเนอรีซีสน้อยกว่าสูตรอื่น

จากผลการทดสอบทางประสาทสัมผัส การทดสอบร้อยละการซิเนอรีซิส และความคงตัวต่อการเก็บรักษา ผลิตภัณฑ์พุดดิ้งอัลมอนด์ผสมข้าวไรส์เบอร์รี่รสโกโก้ที่ใช้ไฮโดรคอลลอยด์ชนิดผงวุ้นมีความเหมาะสมในการนำไปผลิตเป็นผลิตภัณฑ์พุดดิ้งมากที่สุด

บทคัดย่อ

ข้อมูลดิจิทัลมีผลต่อการสร้างการเปลี่ยนแปลงรูปแบบการดำเนินงานขององค์กรทั้งภาครัฐและเอกชน ดังนั้นงานวิจัยนี้จึงมีวัตถุประสงค์เพื่อ 1) พัฒนารูปแบบการจัดการความรู้สำหรับงานโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อการพัฒนาท้องถิ่น ของมหาวิทยาลัยราชภัฏนครราชสีมาโดยใช้เทคโนโลยีดิจิทัล 2) ประเมินประสิทธิภาพและประสิทธิผลของระบบสารสนเทศการจัดการความรู้ของโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อพัฒนาท้องถิ่น มหาวิทยาลัยราชภัฏนครราชสีมา ทั้งนี้งานวิจัยดังกล่าวเป็นงานวิจัยเชิงคุณภาพด้วยการจัดประชุมกลุ่มย่อยสำหรับสองส่วนงาน คือ กลุ่มย่อยสำหรับงานการจัดการความรู้และกลุ่มย่อยสำหรับงานระบบสารสนเทศ ด้วยกลุ่มผู้เชี่ยวชาญแต่ละด้าน จำนวนด้านละ 5 ท่าน ผลการวิจัยพบว่า ระบบสารสนเทศ มีประสิทธิภาพด้วยค่าเฉลี่ยเท่ากับ 4.52 (S.D.=0.57) อยู่ในระดับดีมาก แสดงให้เห็นว่า ระบบสารสนเทศมีความสอดคล้องกับรูปแบบการจัดการความรู้ สามารถจัดเก็บ สืบค้น จัดกลุ่มโครงการ และเป็นแหล่งเผยแพร่ผลการดำเนินงานโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อพัฒนาท้องถิ่น มหาวิทยาลัยราชภัฏนครราชสีมา นอกจากนี้ ผลการประเมินผลตอบแทนจากการพัฒนาระบบ พบว่า ผลประโยชน์สุทธิจากการดำเนินงานเท่ากับร้อยละ 13.39 อย่างไรก็ตาม ระบบสารสนเทศที่พัฒนาขึ้นตามรูปแบบการจัดการความรู้สามารถสร้างคุณค่าให้กับองค์กรได้ทั้งเรื่องของภาพลักษณ์การเป็นองค์กรดิจิทัลสามารถคืนข้อมูลสู่ชุมชนและจัดเก็บเผยแพร่องค์ความรู้ได้อย่างเป็นระบบ

คำสำคัญ: การจัดการความรู้, ข้อมูลดิจิทัล, องค์กรดิจิทัล, รูปแบบการจัดการความรู้

Abstract

Digital data has the effect of creating a change in the government and business organization. The objectives of this research were 1) develop knowledge management model for Strategy Project Rajabhat University for Local development of Nakhon Ratchasima Rajabhat University using digital technology and 2) evaluating the efficiency and effectiveness of the Information system. This research is a qualitative research based on focus group techniques for two sections such as (1) knowledge management and (2) group of information system around five expertise. Experimental result shows that the proposed system was efficient excellent level with mean 4.52 (S.D.=0.57). That means the information system is consistency with the knowledge management model. Moreover, the information system is used as a tool to storing, sharing and searching, and grouping the project. Interestingly, the proposed system is a source of information for disseminating the results of the Rajabhat University Strategic Project for Local Development Nakhon Ratchasima Rajabhat University. Finally, the value of ROI is equal to 13.39 percent. However, the information system can help to create a value adding of organization in terms of good appearance for the digital organization, able to return knowledge to the community and disseminating knowledge systematically.

Keywords: Knowledge Management, Digital Data, Digital Organization, Knowledge Management Model

บทนำ

การเปลี่ยนแปลงทางเทคโนโลยีดิจิทัล (Digital Transformation) ส่งผลให้เกิดการเปลี่ยนแปลงกระบวนการการทำงานของทั้งองค์กรภาครัฐและเอกชนเพื่อปรับเปลี่ยนให้องค์กรก้าวสู่การเป็นองค์กรดิจิทัล (Digital Organization) แต่อย่างไรก็ตาม การดำเนินการดังกล่าวยังต้องอาศัยการปรับตัวของบุคลากรซึ่งเป็นปัจจัยสำคัญสำหรับการสร้างองค์กรดิจิทัล ซึ่งองค์กรบางองค์กรยังพบกับปัญหาด้านงบประมาณและทักษะความรู้ของบุคลากร ทั้งนี้ ปัจจัยความสำเร็จของการจัดการความรู้ของหน่วยงานรัฐ คือ บุคลากร โดยเฉพาะทักษะของบุคลากร (วัชรพจน์ ทรัพย์สงวนบุญ และ เวทยา ใฝ่ใจดี, 2563; สุภาภรณ์ สีสุพรรณ์ และ อจิรภาส์ เพียรขุนทด, 2565) มหาวิทยาลัยราชภัฏทั่วประเทศมีการจัดทำแผนยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อการพัฒนาท้องถิ่น ระยะ 20 ปี (พ.ศ. 2560-2579) โดยมุ่งเน้นการพัฒนาท้องถิ่นทั้งด้านเศรษฐกิจ สังคม สิ่งแวดล้อม และการศึกษา เพื่อยกระดับคุณภาพชีวิตของประชาชนอย่างยั่งยืน ทั้งนี้ วิสัยทัศน์ (Vision) “มหาวิทยาลัยราชภัฏเป็นสถาบันที่ผลิตบัณฑิตที่มีอัตลักษณ์มีคุณภาพ มีสมรรถนะ และเป็นสถาบันหลักที่บูรณาการองค์ความรู้สู่นวัตกรรมในการพัฒนาท้องถิ่นเพื่อสร้างความมั่นคงให้กับประเทศ” ประกอบด้วย 4 ประเด็นยุทธศาสตร์ ได้แก่ (1) การพัฒนาท้องถิ่น (2) การผลิตและพัฒนาครู (3) การยกระดับคุณภาพการศึกษา และ (4) การพัฒนาระบบบริหารจัดการ

มหาวิทยาลัยราชภัฏนครราชสีมาขับเคลื่อนการดำเนินงานตามแผนยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อการพัฒนาท้องถิ่น ระยะ 20 ปี (พ.ศ. 2560-2579) โดยเริ่มตั้งแต่ ปีพ.ศ.2562 เป็นต้น การจัดสรรงบประมาณเพื่อดำเนินงานโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อการพัฒนาท้องถิ่น เพื่อให้คณะหรือหน่วยงานนำองค์ความรู้ทางวิชาการไปใช้ประโยชน์ในการพัฒนาชุมชนท้องถิ่น ผู้รับผิดชอบโครงการจะต้องจัดทำเป็นรายงานเพื่อนำเสนอต่อมหาวิทยาลัยฯ ในรูปแบบของเอกสาร ยังไม่มีการจัดหมวดหมู่ของโครงการ และยังไม่มีระบบการจัดเก็บหรือรูปแบบการนำเสนอผลงานออนไลน์ ซึ่งจะทำให้ผู้ที่สนใจหรือหน่วยงานที่จะต้องนำข้อมูลไปใช้ประโยชน์ต่อการดำเนินงาน เข้าถึงได้ยาก ประกอบกับมหาวิทยาลัยราชภัฏนครราชสีมาจัดทำแผนการจัดการความรู้ : การพัฒนาองค์กรแห่งนวัตกรรม มหาวิทยาลัยราชภัฏนครราชสีมา ประจำปีงบประมาณ พ.ศ. 2565 โดยมีเป้าหมายของการจัดการความรู้ มหาวิทยาลัยราชภัฏนครราชสีมา ได้แก่ (1) มหาวิทยาลัยมี Best Practice ด้านการเรียนการสอน การวิจัย การบริหารจัดการ การบริการวิชาการ หรือการพัฒนาท้องถิ่น และด้านอื่นๆ (2) บุคลากรของมหาวิทยาลัยสามารถบูรณาการการจัดการความรู้กับงานประจำ (3) บุคลากรของมหาวิทยาลัยมีส่วนร่วมในการเรียนรู้ การใช้ และสะท้อนผลลัพธ์จากการใช้งานความรู้ในระดับ Best Practice และ (4) มหาวิทยาลัยมีระบบสารสนเทศเพื่อเผยแพร่องค์ความรู้ ด้านการเรียนการสอน การวิจัย การบริหารจัดการ การบริการวิชาการ หรือการพัฒนาท้องถิ่น และด้านอื่นๆ (แผนการจัดการความรู้ : การพัฒนาองค์กรแห่งนวัตกรรม มหาวิทยาลัยราชภัฏนครราชสีมา ประจำปีงบประมาณ พ.ศ. 2565, 2565)

จากแผนการจัดการความรู้ : การพัฒนาองค์กรแห่งนวัตกรรม มหาวิทยาลัยราชภัฏนครราชสีมา ประจำปีงบประมาณ พ.ศ. 2565 และแนวคิดการการเปลี่ยนแปลงทางดิจิทัล (Digital Transformation) เพื่อการพัฒนาองค์กรให้เป็นองค์กรดิจิทัล (Digital Organization) กองนโยบายและแผนของมหาวิทยาลัยราชภัฏนครราชสีมา ซึ่งเป็นหน่วยงานที่ทำหน้าที่วิเคราะห์และพัฒนาแผนงานเพื่อการพัฒนาโดยมีการจัดทำการจัดการความรู้เพื่อการพัฒนางานอย่างต่อเนื่อง ดังนั้น ด้วยบริบทการดำเนินงานการจัดการความรู้ที่มีการใช้งานอย่างกว้างขวางด้วยแนวคิดของ SECI Model และ กระบวนการจัดการความรู้เจ็ดขั้นตอน งานวิจัยนี้จึงนำเสนอแนวคิดการพัฒนารูปแบบการจัดการความรู้ (Knowledge Management Model) ที่เหมาะสมกับวัฒนธรรมการจัดการความรู้ขององค์กรของมหาวิทยาลัยราชภัฏนครราชสีมา หลังจากนั้นจึงมีการการประยุกต์ใช้เทคโนโลยีดิจิทัลมาใช้เป็นเครื่องมือในการจัดเก็บ ค้นหา จัดหมวดหมู่ของโครงการดำเนินงานที่สามารถนำมาใช้เป็นแหล่งรวบรวมองค์ความรู้ แบ่งปัน และแลกเปลี่ยนองค์ความรู้ไม่ให้สูญหาย มีการนำเสนอผลงานผ่านระบบเครือข่ายอินเตอร์เน็ต ผ่านช่องทางการสื่อสารที่เหมาะสม โดยผ่านการพัฒนาเป็นระบบสารสนเทศการจัดการความรู้ที่ให้บริการสำหรับผู้ที่เกี่ยวข้อง โดยผู้ที่เกี่ยวข้องสามารถนำไปใช้ประโยชน์และเป็นแนวทางในการพัฒนาท้องถิ่นต่อไป

วัตถุประสงค์ของการวิจัย

1. เพื่อศึกษาและพัฒนารูปแบบการจัดการความรู้โครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏ เพื่อการพัฒนาท้องถิ่นของมหาวิทยาลัยราชภัฏนครราชสีมา โดยใช้เทคโนโลยีดิจิทัล

2. เพื่อประเมินประสิทธิภาพ และประสิทธิผลของระบบสารสนเทศการจัดการความรู้ของโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อพัฒนาท้องถิ่น มหาวิทยาลัยราชภัฏนครราชสีมา

วิธีการดำเนินการวิจัย

1. ขอบเขตการวิจัย

ขอบเขตด้านเนื้อหา

1) เนื้อหาที่ต้องการเผยแพร่ในระบบการจัดการความรู้ คือ ผลการดำเนินโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อพัฒนาท้องถิ่น ของมหาวิทยาลัยราชภัฏนครราชสีมา จากปีงบประมาณ 2562 - 2565

2) เนื้อหาด้านรูปแบบการจัดการความรู้ประกอบการออกแบบและพัฒนารูปแบบการจัดการความรู้สำหรับการดำเนินโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อพัฒนาท้องถิ่น ของมหาวิทยาลัยราชภัฏนครราชสีมา ประกอบด้วย 2 แนวคิด คือ

(2.1) ทฤษฎีการจัดการความรู้ที่ชื่อว่า SECI Model กระบวนการการดำเนินงานประกอบด้วย 4 กระบวนการ คือ (1) การแลกเปลี่ยนเรียนรู้ (Socialization) เป็นการดำเนินร่วมกัน การสังเกตุ การเลียนแบบ การเข้าไปมีส่วนร่วมถึงจะเข้าใจ เนื่องจากเป็นข้อมูลฝังลึกยากต่อการเข้าใจ (2) การสกัดความรู้ออกจากตัวคน (Externalization) เป็นลักษณะการถ่ายทอดแบบเล่าเรื่อง การตั้งสมมุติฐาน การพูดคุยเพื่อสร้างความรู้ใหม่จากความรู้ที่ฝังลึกแสดงออกมาเป็นความรู้ที่ชัดแจ้ง (3) การควบรวมหรือผนวกความรู้ (Combination) กระบวนการที่ทำให้เกิดความรู้ที่จับต้องได้ สามารถนำไปใช้ประโยชน์ เผยแพร่ แบ่งประเภท ทำเป็นเอกสารได้ และ (4) การฝังหรือผนึกความรู้ (Internalization) เป็นกระบวนการจากความรู้ชัดแจ้งไปเป็นความรู้แบบฝังลึกในตัวบุคคล เกิดเป็นความรู้ใหม่ที่มาจากการกระตุ้นให้ทั้ง 4 ส่วนมีการทำงานแบบต่อเนื่องตามวงล้อของกระบวนการ SECI Model (Samina Nawab and et al., 2015; Rosalba Frias-Navarro and Luz Alexandra Montoya-Restrepo, 2020)

(2.2) ทฤษฎีการจัดการความรู้ 7 ขั้นตอน ซึ่งสอดคล้องกับสำนักงาน ก.พ.ร. กำหนด ได้แก่ การบ่งชี้ความรู้ การสร้างและแสวงหาความรู้ การจัดความรู้ให้เป็นระบบ การประมวลและกลั่นกรองความรู้ การเข้าถึงความรู้ การแบ่งปันแลกเปลี่ยนเรียนรู้ และการเรียนรู้

ขอบเขตด้านเทคโนโลยี

เทคโนโลยีสารสนเทศการจัดการความรู้ โดยมีการประยุกต์ใช้เทคโนโลยีสารสนเทศ ที่เกี่ยวข้องกับการจัดการความรู้ประกอบด้วย (1) เทคโนโลยีการสื่อสาร (Communication Technology) (2) เทคโนโลยีสนับสนุนการทำงานร่วมกัน (Collaboration Technology) และ (3) เทคโนโลยีในการจัดเก็บความรู้ (Storage Technology) หรือการจัดการเนื้อหา โดยมักนิยมใช้ WordPress เป็นเครื่องมือในการพัฒนาระบบการจัดการความรู้ในรูปแบบของเทคโนโลยีดิจิทัล

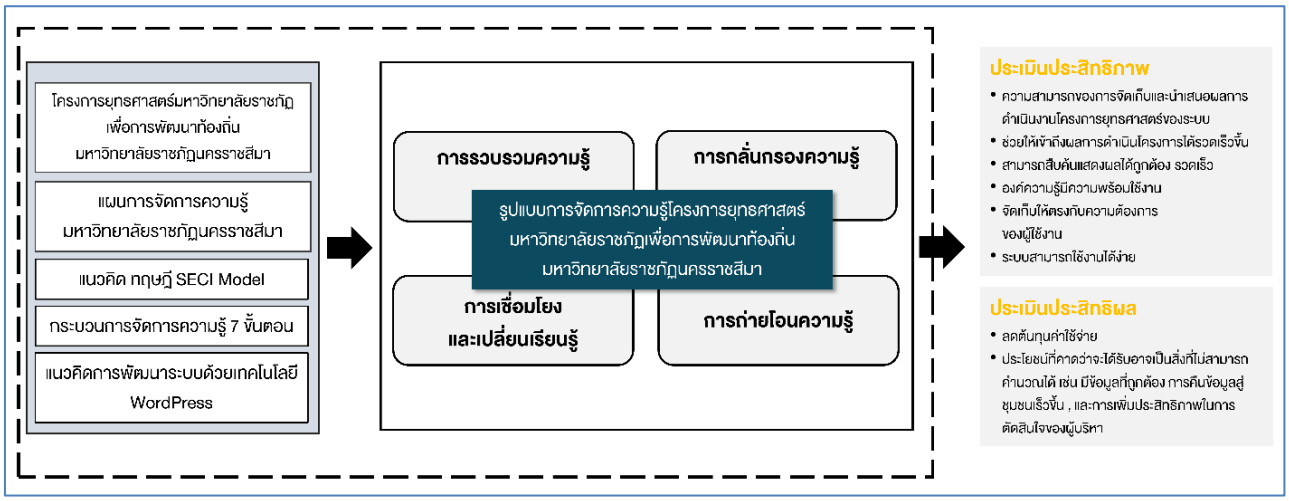
ขอบเขตด้านประชากรและกลุ่มตัวอย่าง

1) ประชากร ได้แก่ บุคลากรในมหาวิทยาลัยราชภัฏนครราชสีมา ที่ได้รับจัดสรรงบประมาณ เพื่อดำเนินโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อพัฒนาท้องถิ่น ของมหาวิทยาลัยราชภัฏนครราชสีมา จำนวน 80 คน

2) กลุ่มตัวอย่าง ได้แก่ ผู้บริหารและบุคลากรที่ใช้สำหรับการประชุมกลุ่มย่อย (Focus Group) จำนวน 5 คน โดยการใช้การเลือกแบบเจาะจง (Purposive Sampling)

3) ผู้เชี่ยวชาญ ได้แก่ ผู้เชี่ยวชาญด้านเทคโนโลยีสารสนเทศ จำนวน 5 คน โดยการใช้การเลือกแบบเจาะจง (Purposive Sampling)

2. เครื่องมือที่ใช้ในการวิจัย



1) แบบสอบถามเพื่อประเมินรูปแบบการจัดการความรู้โครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏ เพื่อการพัฒนาท้องถิ่นของมหาวิทยาลัยราชภัฏนครราชสีมา โดยใช้เทคโนโลยีดิจิทัล

2) แบบสอบถามเพื่อประเมินประสิทธิภาพของระบบสารสนเทศการจัดการความรู้ของโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อพัฒนาท้องถิ่น มหาวิทยาลัยราชภัฏนครราชสีมา

3) ระบบสารสนเทศการจัดการความรู้ของโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อพัฒนาท้องถิ่น มหาวิทยาลัยราชภัฏนครราชสีมา

3. กรอบการดำเนินงานวิจัย

งานวิจัยนี้เป็นการศึกษาการประยุกต์ใช้เทคโนโลยีดิจิทัลในการจัดการความรู้โครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อการพัฒนาท้องถิ่น ของมหาวิทยาลัยราชภัฏนครราชสีมา โดยทำการรวบรวมข้อมูลโครงการ และศึกษาเกี่ยวกับการจัดการความรู้ และเทคโนโลยีที่เหมาะสมในการสนับสนุนการจัดการความรู้ เพื่อมาพัฒนารูปแบบการจัดการความรู้โครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อการพัฒนาท้องถิ่น ของมหาวิทยาลัยราชภัฏนครราชสีมา โดยใช้เทคโนโลยีดิจิทัล จากนั้นจึงพัฒนาระบบสารสนเทศการจัดการความรู้ของโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อพัฒนาท้องถิ่น มหาวิทยาลัยราชภัฏนครราชสีมา แสดงดังภาพที่ 1

ภาพที่ 1 กรอบการดำเนินงานวิจัย

จากภาพที่ 1 การพัฒนาโมเดลการจัดการความรู้ดำเนินการจากการศึกษารูปแบบการดำเนินงานของอาจารย์และบุคลากรที่ดำเนินโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อการพัฒนาท้องถิ่น ของมหาวิทยาลัยราชภัฏนครราชสีมา เพื่อให้สอดคล้องกับทักษะของบุคคลและงบประมาณขององค์กร แต่องค์กรมีความต้องการการเปลี่ยนแปลงทางดิจิทัล (Digital Transformation) ซึ่งการพัฒนาระบบดิจิทัลเพื่อสร้างการเปลี่ยนแปลงทางดิจิทัลขององค์กร ผู้พัฒนาต้องมีการศึกษาและวิเคราะห์พฤติกรรมหรือกระบวนการ/ความต้องการของผู้ใช้งาน ดังนั้นการพัฒนาระบบดิจิทัลของการจัดการความรู้จึงถูกพัฒนาในกระบวนการการจัดการความรู้ ระบบดิจิทัลที่พัฒนาขึ้นจึงกลายเป็นส่วนหนึ่งของกระบวนการการัดการความรู้

4. ขั้นตอนในการวิจัย

ขั้นตอนที่ 1 ศึกษาเก็บรวบรวมข้อมูล

ข้อมูลปฐมภูมิ (Primary Data) การรวบรวมข้อมูลจากการศึกษาระบบงานเดิม พบว่า ข้อมูลผลของการดำเนินโครงการนั้นไม่ได้มีการจัดเก็บอย่างเป็นระบบ และไม่สามารถเข้าถึงข้อมูลได้ทุกที่ ระบบดังกล่าวจะต้องรองรับการเก็บบันทึกข้อมูลของผู้รับผิดชอบโครงการที่มีความรู้ในด้านต่างๆได้ และสามารถทำการแลกเปลี่ยนความคิดเห็นของแต่ละบุคคลได้ สามารถเข้าถึงได้ทุกที่ทุกเวลา อันทำให้เกิดการตกผลึกทางความคิด ได้องค์ความรู้แบบใหม่เกิดขึ้น และนำข้อมูลไปใช้ประโยชน์ในด้านต่างๆ

ข้อมูลทุติยภูมิ (Secondary Data) การเก็บรวบรวมข้อมูลจากการศึกษางานวิจัย เอกสาร ทฤษฎี แนวคิดการจัดการความรู้ และเทคโนโลยีสารสนเทศกับการจัดการความรู้

ขั้นตอนที่ 2 วิเคราะห์ข้อมูลในการจัดกลุ่มโครงการ

จากการศึกษาข้อมูลปฐมภูมิ ผู้วิจัยทำการศึกษาคุณลักษณะของโครงการโดยมีปัจจัยคุณลักษณะของโครงการ ได้แก่ ด้านเนื้อหาของโครงการ ประกอบด้วย ผู้รับผิดชอบโครงการ หน่วยงานของผู้รับผิดชอบโครงการ ปีที่ดำเนินโครงการ ที่มาและความสำคัญ วัตถุประสงค์ เป็นต้น พบว่าโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อพัฒนาท้องถิ่น มหาวิทยาลัยราชภัฏนครราชสีมา สามารถจัดกลุ่มโครงการได้ 4 กลุ่ม ได้แก่ (1) กลุ่ม ปี พ.ศ. (2) กลุ่มโครงการ (3) กลุ่มผลผลิต และ (4) พื้นที่ดำเนินโครงการ

ขั้นตอนที่ 3 พัฒนารูปแบบการจัดการความรู้โครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏ เพื่อการพัฒนาท้องถิ่นของมหาวิทยาลัยราชภัฏนครราชสีมา โดยใช้เทคโนโลยีดิจิทัล

ประยุกต์ใช้ทฤษฎี SECI Model และ ทฤษฎีการจัดการความรู้ 7 ขั้นตอน นอกจากนี้ยังมีการนำเทคโนโลยี Word Press Framework ใช้ในการพัฒนาระบบ โดยลักษณะของระบบจะประกอบด้วยคุณสมบัติตามที่ผู้ใช้งานต้องการ คือ 1) ผู้ใช้หรือผู้ดูแลระบบสามารถเข้าถึงระบบได้อย่างสะดวกทุกที่ ทุกเวลา โดยบริหารจัดการระบบได้ทันที 2) ผู้ใช้งานสามารถเข้าถึงระบบได้ในทุกรูปแบบเครื่องมือหรือแพลตฟอร์มที่หลากหลาย เพียงแค่เชื่อมต่อระบบอินเทอร์เน็ตก็สามารถเข้าถึงระบบได้ทันที เช่น สมาร์ทโฟน แท็บเล็ต และคอมพิวเตอร์ เป็นต้นๆ 3) ง่ายต่อการใช้งาน ทั้งผู้ใช้งานและผู้ดูแลระบบ ฐิติยา เนตรวงษ์ (2563) พบว่า ไอซีทีสามารถนำมาใช้ในกระบวนการจัดการความรู้ได้ทุกกระบวนการ ไอซีทีแต่ละรูปแบบที่นำมาใช้สามารถประยุกต์ใช้ในการจัดการความรู้ได้มากกว่าหนึ่งกระบวนการ สอดคล้องกับ สิธิชัย แพงทิพย์ และ มธุสร จงชัยกิจ (2562) การนำเทคโนโลยีสารสนเทศเข้ามาใช้ในการ

จัดการความรู้ มาพัฒนาระบบการจัดการความรู้ในรูปแบบเว็บไซต์ เพื่อให้ผู้ใช้ความรู้เข้าถึงแหล่งข้อมูลองค์ความรู้ได้ โดยไม่มีข้อจำกัดทั้งในเรื่องสถานที่และเวลา

ขั้นตอนที่ 4 การพัฒนาระบบสารสนเทศการจัดการความรู้ของโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อพัฒนาท้องถิ่น มหาวิทยาลัยราชภัฏนครราชสีมา

พัฒนาระบบสารสนเทศการจัดการความรู้ของโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อพัฒนาท้องถิ่น มหาวิทยาลัยราชภัฏนครราชสีมา ตามแนวคิดการวิเคราะห์และออกแบบระบบของ ADDIE model ซึ่งมีขั้นตอนสำคัญ 5 ขั้นตอน ดังนี้

1) การวิเคราะห์ (Analysis) ดำเนินการวิเคราะห์ระบบด้วยการศึกษาข้อมูลและกระบวนการการดำเนินงานการจัดการความรู้โครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อการพัฒนาท้องถิ่นของมหาวิทยาลัยราชภัฏนครราชสีมา ซึ่งที่เป็นผลผลิต (Output) ตามวัตถุประสงค์ของที่ 1 ของรายงานวิจัยฉบับนี้ ซึ่งการดำเนินงานจัดการความรู้ตามแนวคิดของ SECI Model (จงกล จันทร์เรือง และคณะ , 2565; Rosalba Frias-Navarro and Luz Alexandra Montoya-Restrepo, 2020) กล่าวถึงการนำความรู้มาสร้างเป็นนวัตกรรมโดยอาศัยวงล้อของ SECI Model มาสร้างเป็นนวัตกรรม และปัจจัยความสำเร็จของการจัดการความรู้ของหน่วยงานรัฐ คือ บุคลากร โดยเฉพาะทักษะของบุคลากร (วัชรพจน์ ทรัพย์สงวนบุญ และ เวทยา ใฝ่ใจดี, 2563; สุภาภรณ์ สีสุพรรณ์ และ อจิรภาส์ เพียรขุนทด, 2565) ดังนั้นการออกแบบระบบสารสนเทศในครั้งนี้จึงเลือกใช้ WordPress มาเป็นเครื่องมือในการพัฒนาระบบสารสนเทศ อีกทั้งลักษณะการทำงานของระบบสารสนเทศต้องเน้นการนำเสนอข้อมูลที่โดดเด่น เช่น กลุ่มของข้อมูล ผลผลิตของโครงการ ข้อมูลเชิงพื้นที่ของโครงการ การนำเสนอข้อมูลเน้นการประชาสัมพันธ์ผลผลิตของโครงการและการกระจายตัวเชิงพื้นที่ของโครงการ ทั้งนี้พื้นที่ดำเนินงานสามารถนำมาใช้ในการวิเคราะห์การประจายตัวเชิงพื้นที่ของโครงการที่รับผิดชอบ

2) การออกแบบ (Design) ออกแบบและจัดทำโครงสร้างเนื้อหา จากผลการวิเคราะห์ข้อมูลในการจัดกลุ่มโครงการประกอบด้วย ปีการดำเนินงานโครงการ พื้นที่ดำเนินงานโครงการ กลุ่มโครงการ (กลุ่มงานยกระดับมาตรฐานผลิตภัณฑ์ชุมชน กลุ่มงานสังคม กลุ่มงานสิ่งแวดล้อม กลุ่มงานการศึกษา กลุ่มงานผลิตครูและพัฒนาครู กลุ่มงานยกระดับคุณภาพการศึกษา กลุ่มงานพัฒนาระบบบริหารจัดการ) กลุ่มผลผลิต (กลุ่มกระบวนการ, กลุ่มนวัตกรรม, กลุ่มผลิตภัณฑ์ชุมชน, กลุ่มองค์ความรู้) โดยมีการออกแบบให้สามารถนำเข้าข้อมูลและแสดงผลข้อมูลผ่านฟังก์ชันการทำงานของ WordPress

3) การพัฒนา (Development) ดำเนินการพัฒนาระบบสารสนเทศการจัดการความรู้ของโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อพัฒนาท้องถิ่น มหาวิทยาลัยราชภัฏนครราชสีมา โดยการใช้งานฟังก์ชันการทำงานของ WordPress ประกอบด้วย การค้นหา การแสดงความคิดเห็น การแชร์เนื้อหา การเผยแพร่เอกสาร การจัดหมวดหมู่ การสร้างลิ้ง การอัพโหลดไฟล์ การอัพโหลดสื่อมีเดียร์ เช่น รูป วีดีโอคลิป นอกจากนี้ยังมีการเพิ่มส่วนของการเชื่อมต่อกับ Google Map

4) การนำไปใช้ (Implementation) มีการนำระบบดิจิทัลที่พัฒนาไปใช้สำหรับจัดเก็บข้อมูลโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อพัฒนาท้องถิ่น มหาวิทยาลัยราชภัฏนครราชสีมา

5) ประเมินผล (Evaluation) การประเมินคุณภาพของระบบที่พัฒนาขึ้น โดยแบ่งการทดสอบการทำงานของระบบออกเป็น 2 ส่วน คือ (1) ประสิทธิภาพการทำงานของระบบ ดำเนินการทดสอบโดยกลุ่มผู้ทรงคุณวุฒิด้านเทคโนโลยีดิจิทัล จำนวน 5 ท่าน และ (2) ประเมินประสิทธิผลการทำงานของระบบ ดำเนินการทดสอบด้วยการคำนวนค่าตอบแทนจากการพัฒนาระบบ (Return on Investment Analysis: ROI) ร่วมกับการจัดประชุมกลุ่มย่อยโดยอาจารย์ผู้เชี่ยวชาญด้านการจัดการความรู้และนักวิจัยของมหาวิทยาลัยราชภัฏนครราชสีมา จำนวน 5 ราย

ขั้นตอนที่ 5 ประเมินรูปแบบการจัดการความรู้โครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อการพัฒนาท้องถิ่น ของมหาวิทยาลัยราชภัฏนครราชสีมา โดยใช้เทคโนโลยีดิจิทัล

โดยผู้วิจัยจัดการประชุม Focus Group ร่วมกับกลุ่มตัวอย่าง ได้แก่ ผู้บริหารและบุคลากร เพื่อประเมิน อภิปราย สรุปรูปแบบการจัดการความรู้โครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อการพัฒนาท้องถิ่น ของมหาวิทยาลัยราชภัฏนครราชสีมา โดยใช้เทคโนโลยีดิจิทัล

สรุปผลการวิจัย

การดำเนินงานวิจัยนี้มีวัตถุประสงค์เพื่อพัฒนารูปแบบการจัดการความรู้โครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อการพัฒนาท้องถิ่น ของมหาวิทยาลัยราชภัฏนครราชสีมา โดยใช้เทคโนโลยีดิจิทัล และประเมินประสิทธิภาพ และประสิทธิผลของระบบสารสนเทศการจัดการความรู้ของโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อพัฒนาท้องถิ่น มหาวิทยาลัยราชภัฏนครราชสีมา โดยผลการดำเนินงานวิจัยมีรายละเอียดดังต่อไปนี้

1) ผลพัฒนารูปแบบการจัดการความรู้โครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อการพัฒนาท้องถิ่น ของมหาวิทยาลัยราชภัฏนครราชสีมา โดยใช้เทคโนโลยีดิจิทัล

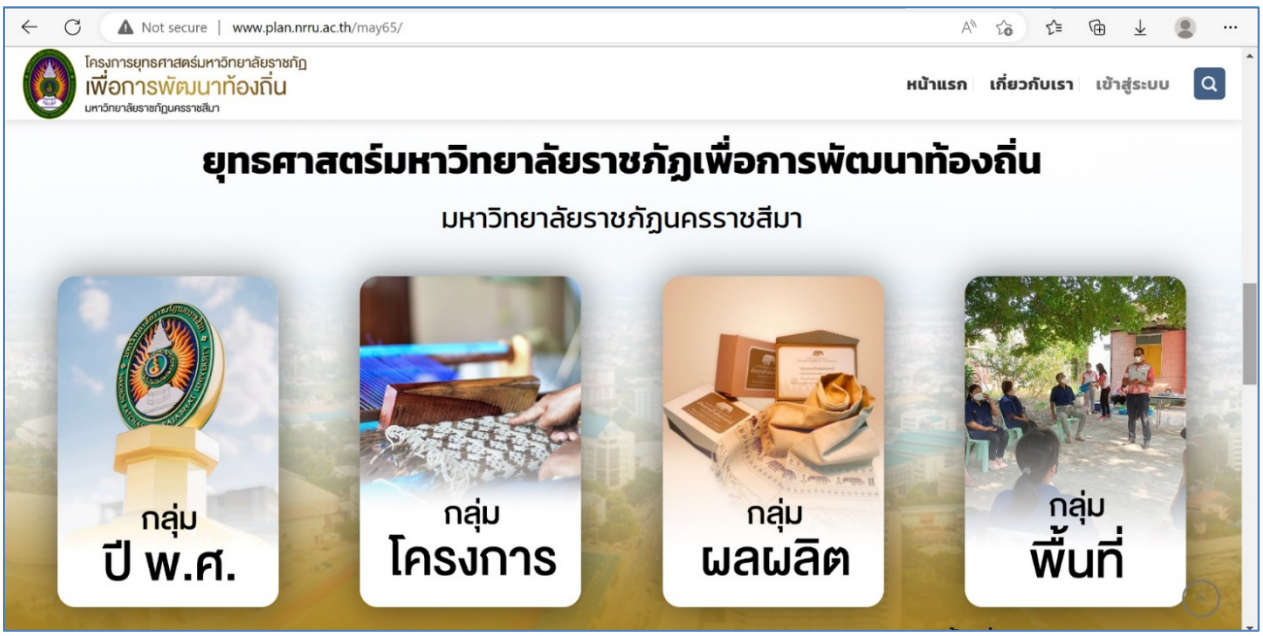
รูปแบบการจัดการความรู้ของโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อพัฒนาท้องถิ่น มหาวิทยาลัยราชภัฏนครราชสีมา โดยใช้เทคโนโลยีดิจิทัล ประกอบด้วย 4 กระบวนการตามแนวคิดทฤษฎี SECI Model และประกอบด้วยการจัดการความรู้ทั้ง 7 ขั้นตอน แสดงดังภาพที่ 2

ภาพที่ 2 รูปแบบการจัดการความรู้โครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อการพัฒนาท้องถิ่น ของมหาวิทยาลัยราชภัฏนครราชสีมา โดยใช้เทคโนโลยีดิจิทัล

จากรูปภาพที่ 1 สามารถอธิบายรูปแบบการจัดการความรู้โครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อการพัฒนาท้องถิ่น ของมหาวิทยาลัยราชภัฏนครราชสีมา โดยใช้เทคโนโลยีดิจิทัล ได้ดังนี้

1) กระบวนการรวบรวมความรู้ ประกอบด้วย 3 ขั้นตอน คือ (1) การกำหนดความรู้ (Knowledge Identification) รายงานผลการดำเนินโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อการพัฒนาท้องถิ่น ของมหาวิทยาลัยราชภัฏนครราชสีมา ประกอบกับการบรรลุตามเป้าหมายแผนการจัดการความรู้ : การพัฒนาองค์กรแห่งนวัตกรรม มหาวิทยาลัยราชภัฏนครราชสีมา (2) รวบรวมความรู้ที่ผู้รับผิดชอบโครงการนำไปใช้ประโยชน์ต่อการพัฒนาท้องถิ่น นำมารวบรวม และ (3) จัดกลุ่มความรู้ (Grouping) ศึกษาคุณลักษะโครงการด้านเนื้อหานำมาเชื่อมโยงกับเป้าหมายหลักของยุทธศาสตร์ฯ เพื่อทำการจัดหมวดหมู่กลุ่มโครงการ

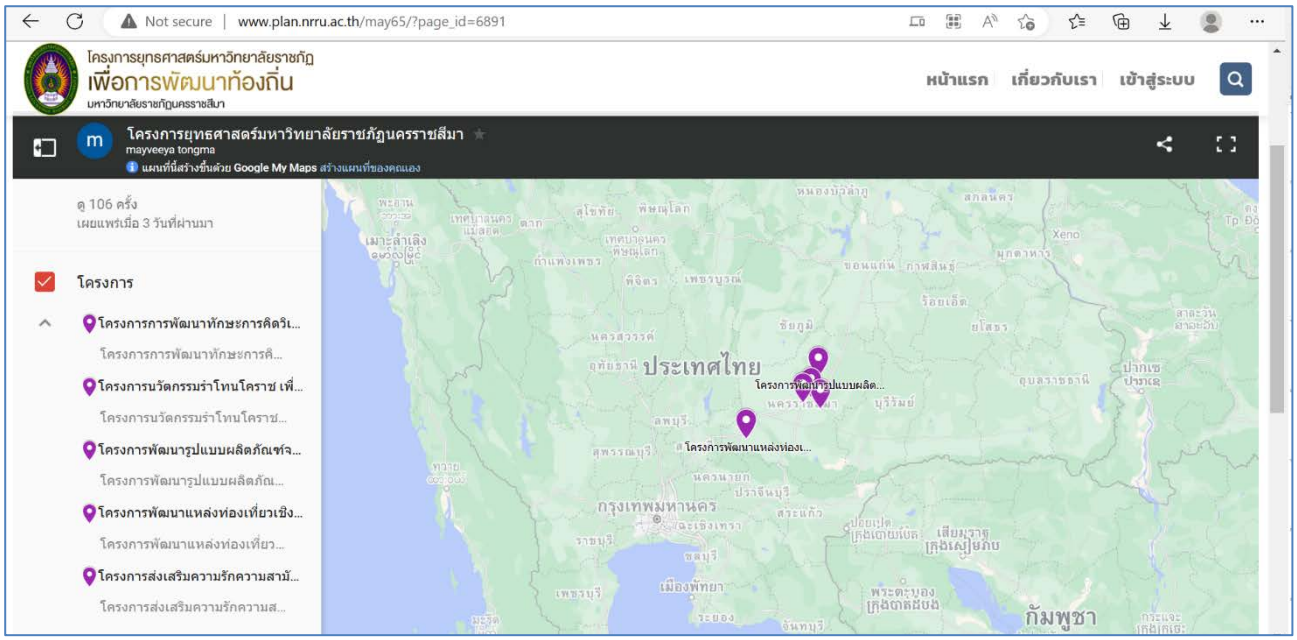
2) กระบวนการกลั่นกรองความรู้ (Content/Media) มุ่งเน้นปรับปรุงรูปแบบการนำเสนอองค์ความรู้ให้เป็นมาตรฐานที่เน้นความถูกต้องของเนื้อหา อยู่ในรูปแบบการนำเสนอที่เข้าใจง่าย และสามารถนำองค์ความรู้ไปใช้งานได้อย่างสะดวก



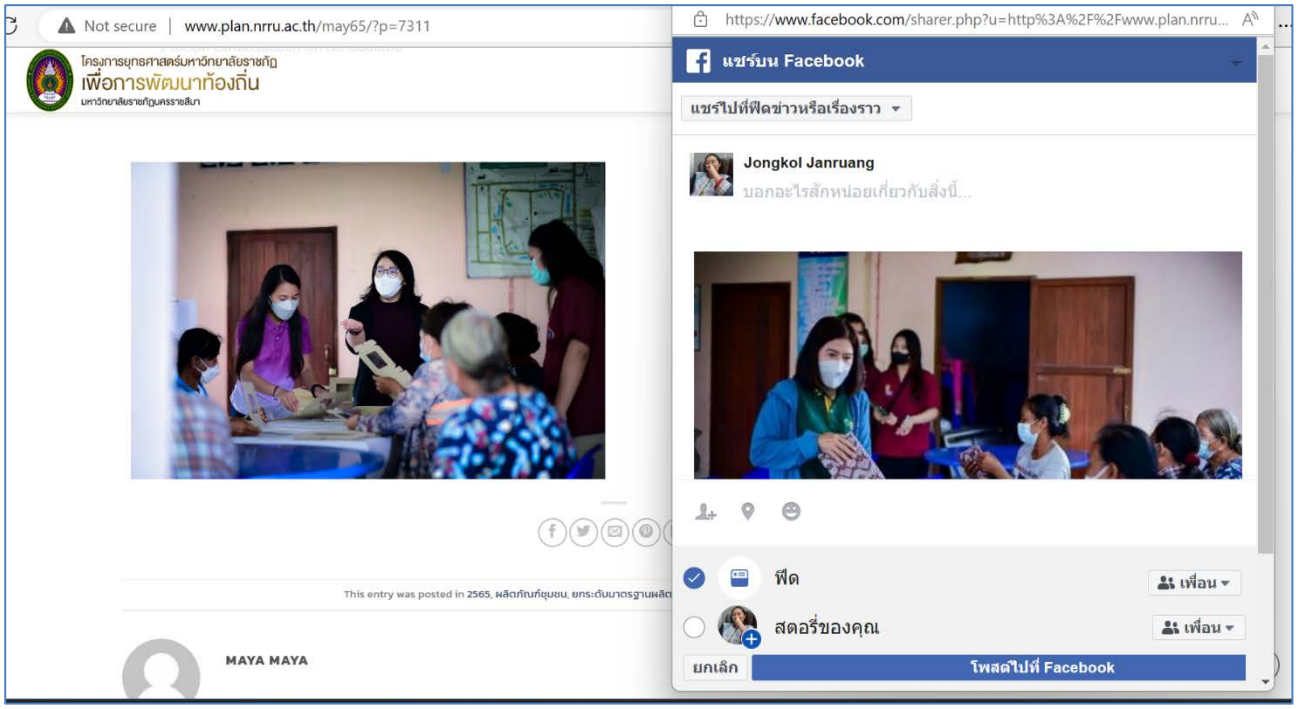
3) กระบวนการถ่ายโอนความรู้ ประกอบด้วย 2 ขั้นตอน ดังนี้

(3.1) พัฒนาระบบโดยเทคโนโลยี WordPress พัฒนาระบบการจัดการความรู้โครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อการพัฒนาท้องถิ่น ของมหาวิทยาลัยราชภัฏนครราชสีมา เพื่อให้บุคลากรสามารถเข้าถึงความรู้ที่ต้องการได้ง่าย และสะดวกด้วยเทคโนโลยีดิจิทัล โดยระบบสามารถจัดเก็บ สืบค้น และนำเสนอองค์ความรู้ได้อย่างมีประสิทธิภาพ การทำงานของระบบการจัดการความรู้โครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อการพัฒนาท้องถิ่น ของมหาวิทยาลัยราชภัฏนครราชสีมา แสดงดังภาพที่ 3 – 5

จากภาพที่ 3- 5 ผู้รับผิดชอบโครงการสามารถนำองค์ความรู้ มาจัดเป็นหมวดหมู่ เพื่อสะดวกต่อการสืบค้นหา องค์ความรู้ของโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อการพัฒนาท้องถิ่น ของมหาวิทยาลัยราชภัฏนครราชสีมา



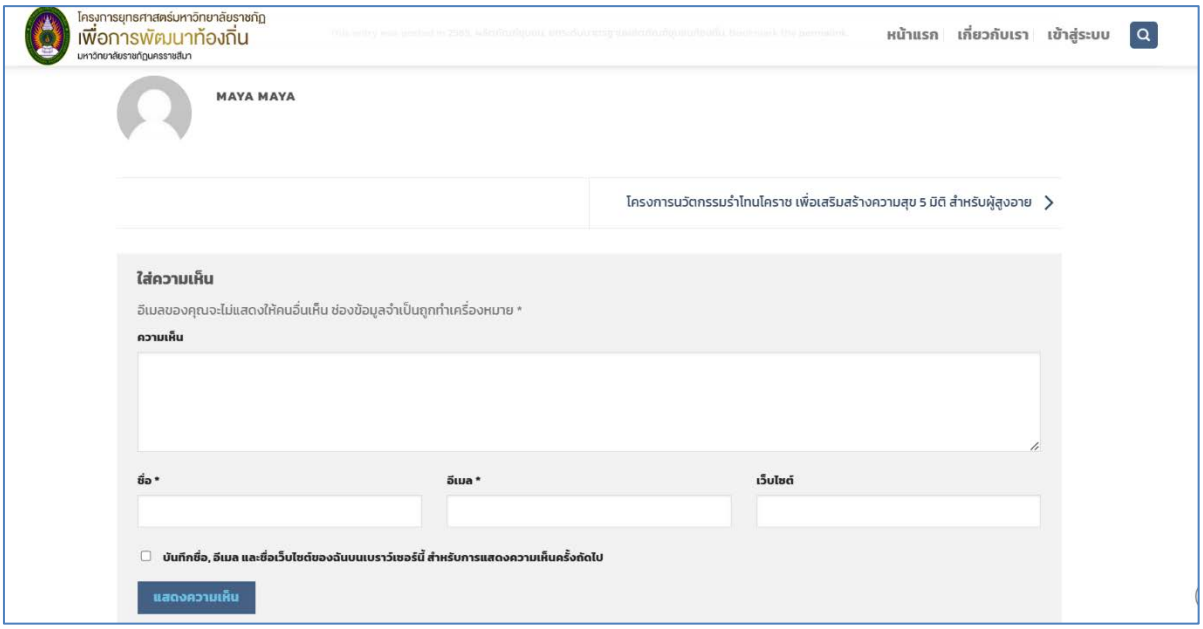
รูปภาพที่ 3 ระบบการจัดการความรู้โครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อการพัฒนาท้องถิ่น ของมหาวิทยาลัยราชภัฏนครราชสีมา



รูปภาพที่ 4 ตัวอย่างการแสดงผลข้อมูลตามกลุ่มโครงการ (http://www.plan.nrru.ac.th/may65/)

(3.2) การถ่ายโอนความรู้ (Share) การถ่ายโอนองค์ความรู้ ผ่านช่องทางการสื่อสารต่างๆ ระหว่างสื่อกับสื่อ คือ ระบบการจัดการความรู้โครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อการพัฒนาท้องถิ่น ของมหาวิทยาลัยราชภัฏนครราชสีมา กับสื่อสังคมต่างๆ (Social Media) เช่น Facebook Twitter เป็นต้น แสดงดังภาพที่ 6

รูปภาพที่ 5 ตัวอย่างการแสดงผลข้อมูลเชิงพื้นที่การดำเนินโครงการ (http://www.plan.nrru.ac.th/may65/?page_id=6891)



รูปภาพที่ 6 การถ่ายโอนความรู้ไปยังสื่อสังคมออนไลน์

4) กระบวนการเชื่อมโยงแลกเปลี่ยนเรียนรู้ (Community)

เป็นกระบวนการที่เน้นการเชื่อมโยงแลกเปลี่ยนเรียนรู้ จากการถ่ายโอนองค์ความรู้ไปยังสื่อออนไลน์ต่างๆ โดยที่ผู้ใช้องค์ความรู้นั้น สามารถนำองค์ความรู้ไปใช้ประโยชน์ หรือประยุกต์ใช้กับความรู้เดิมที่ตนเองมีอยู่ ผู้ใช้สามารถแลกเปลี่ยนเรียนรู้ความรู้กลับยังผู้รับผิดชอบโครงการผ่านช่องทางกล่องแสดงความคิดเห็น การดำเนินการดังกล่าวเป็นการแลกเปลี่ยนความรู้ระหว่างผู้ใช้ความรู้และ

ผู้รับผิดชอบโครงการ หรือผู้ที่เกี่ยวข้อง ก่อให้เกิดการเรียนรู้ และประสบการณ์ใหม่ และนำมาปรับปรุงก่อนเสนอผ่านระบบให้หมุนเวียนต่อเนื่อง แสดงดังภาพที่ 7

ภาพที่ 7 ตัวอย่างการแลกเปลี่ยนเรียนรู้ผ่านกล่องแสดงความคิดเห็น

2) ผลประเมินประสิทธิภาพ และประสิทธิผลของระบบสารสนเทศการจัดการความรู้ของโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อพัฒนาท้องถิ่น มหาวิทยาลัยราชภัฏนครราชสีมา

2.1) ผลประเมินประสิทธิภาพของระบบสารสนเทศการจัดการความรู้ของโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อพัฒนาท้องถิ่น มหาวิทยาลัยราชภัฏนครราชสีมา

ผู้วิจัยดำเนินการพัฒนาระบบสารสนเทศการจัดการความรู้ของโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อพัฒนาท้องถิ่น มหาวิทยาลัยราชภัฏนครราชสีมา และทดลองการใช้งานและประเมินประสิทธิภาพจากผู้เชี่ยวชาญด้านเทคโนโลยีสารสนเทศ จำนวน 5 คน ดังตารางที่ 1

ตารางที่ 1 สรุปผลการประเมินประสิทธิภาพของระบบ

หัวข้อประเมิน	ค่าเฉลี่ย	ส่วนเบี่ยงเบน	ผลการประเมิน
1. ด้านความสามารถตรงตามความต้องการของผู้ใช้	4.64	0.49	ระดับดีมาก
2. ด้านการทำงานได้ตามฟังก์ชันงานของระบบ	4.73	0.45	ระดับดีมาก
3. ด้านความง่ายต่อการใช้งานระบบ	4.53	0.51	ระดับดีมาก
4. ด้านความรวดเร็วในการทำงานของระบบ	4.60	0.50	ระดับดีมาก
5. ด้านความปลอดภัยของข้อมูลในระบบ	3.95	0.69	ระดับดี
รวม	**4.52**	**0.57**	**ระดับดีมาก**

จากตารางที่ 1 พบว่าผลประเมินประสิทธิภาพของระบบสารสนเทศการจัดการความรู้ของโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อพัฒนาท้องถิ่น มหาวิทยาลัยราชภัฏนครราชสีมา โดยภาพรวมมีค่าเฉลี่ยเท่ากับ 4.52 (S.D.=0.57) อยู่ในระดับ “ดีมาก” เมื่อพิจารณาเป็นรายข้อ พบว่า ด้านการทำงานได้ตามฟังก์ชันงานของระบบ มีค่าเฉลี่ยเท่ากับ 4.73 (S.D.=0.45) อยู่ในระดับ “ดีมาก” รองลงมาคือ ด้านความสามารถตรงตามความต้องการของผู้ใช้ มีค่าเฉลี่ยเท่ากับ 4.64 (S.D.=0.49) อยู่ในระดับ “ดีมาก” ด้านความรวดเร็วในการทำงานของระบบ มีค่าเฉลี่ยเท่ากับ 4.60 (S.D.=0.50) อยู่ในระดับ “ดีมาก” ด้านความง่ายต่อการใช้งานระบบ มีค่าเฉลี่ย

เท่ากับ 4.53 (S.D.=0.51) อยู่ในระดับ “ดีมาก” และน้อยที่สุด ด้านความปลอดภัยของข้อมูลในระบบ มีค่าเฉลี่ยเท่ากับ 3.95 (S.D.= 0.69) อยู่ในระดับ “ดี”

2.2) ประสิทธิผลของระบบสารสนเทศการจัดการความรู้ของโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อพัฒนาท้องถิ่น มหาวิทยาลัยราชภัฏนครราชสีมา

ดำเนินการประเมินผลตอบแทนจากการพัฒนาระบบ (Return on Investment Analysis : ROI) โดยการวิเคราะห์ต้นทุนค่าใช้จ่ายการลงทุนพัฒนาระบบ วิเคราะห์ผลประโยชน์ที่คาดว่าจะได้รับ ทั้งผลประโยชน์ที่จับต้องได้ คือ สามารถคำนวณออกมาเป็นตัวเงินได้ และผลประโยชน์ที่ไม่สามารถคำนวณออกมาเป็นตัวเงินได้ ดังแสดงในตารางที่ 2

ตารางที่ 2 ตารางสรุปค่าใช้จ่ายและผลประโยชน์ที่คาดว่าจะได้รับ

ค่าใช้จ่ายในการพัฒนาระบบ		**ผลประโยชน์ที่คาดว่าจะได้รับ**	
รายการค่าใช้จ่าย	**จำนวนเงิน**	**รายการ**	**จำนวนเงิน**
1. พัฒนาระบบ	34,800.00	1. ลดค่าใช้จ่ายในการพัฒนาระบบ (ค่าใช้จ่ายประมาณการ)	44,800.00
2. ค่าบำรุงรักษาฮาร์ดแวร์และระบบ	10,000.00	2. ลดค่าใช้จ่ายกระดาษ หมึกพิมพ์	6,000.00
		3. ภาพลักษณ์ที่ดีขึ้นขององค์กร	
		4. การคืนข้อมูลสู่ชุมชน	
		5. จัดเก็บ เผยแพร่องค์ความรู้ได้อย่างเป็นระบบ	
รวม	**44,800.00**	**รวม**	**50,800.00**

จากตารางที่ 2 การวิเคราะห์ค่าใช้จ่ายในการพัฒนาระบบ และผลประโยชน์ที่คาดว่าจะได้รับจากการพัฒนาระบบ จะเป็นตัวชี้วัดผลกำไรหรือขาดทุน (Mariana ZAMFIR, Marinela Daniela and MANEALuiza IONESCU, 2016) ระบบสารสนเทศการจัดการความรู้ของโครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อพัฒนาท้องถิ่น มหาวิทยาลัยราชภัฏนครราชสีมา สามารถคำนวณตามสูตร ดังนี้

$$ROI = \frac{(\text{ผลประโยชน์ที่คาดว่าจะได้รับ} - \text{ค่าใช้จ่ายในการพัฒนาระบบ})}{\text{ค่าใช้จ่ายในการพัฒนาระบบ}} \times 100$$

$$ROI = \frac{(50{,}800 - 44{,}800)}{44{,}800} \times 100$$

ROI = ร้อยละ 13.39

สรุปค่าใช้จ่ายในการพัฒนาระบบ เป็นจำนวนเงิน 44,800 บาท และผลประโยชน์ที่คาดว่าจะได้รับ เป็นจำนวนเงิน 50,800 บาท ซึ่งถ้าเปรียบเทียบการลงทุนจะได้ผลประโยชน์จากการดำเนินงาน ร้อยละ 13.39 สามารถบ่งบอกได้ว่าระบบที่พัฒนาสามารถลดค่าใช้จ่ายในการจ้างพัฒนาระบบ นอกจากนี้ผลประโยชน์ที่คาดว่าจะได้รับ ที่ไม่สามารถประเมินค่าเป็นจำนวนเงินได้ แต่สามารถสร้างคุณค่าให้กับระบบได้ ดังนี้ 1) ภาพลักษณ์ที่ดีขึ้นขององค์กร มหาวิทยาลัยราชภัฏนครราชสีมา 2) การคืนข้อมูลสู่ชุมชน 3) การจัดเก็บเผยแพร่องค์ความรู้ได้อย่างเป็นระบบ

อภิปรายผลการวิจัย

การนำแนวคิดทฤษฎี SECI Model และการจัดการความรู้ 7 ขั้นตอน มาใช้เป็นพื้นฐานการพัฒนารูปแบบการจัดการความรู้ตามความรู้โครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อการพัฒนาท้องถิ่น ของมหาวิทยาลัยราชภัฏนครราชสีมา ร่วมกับแนวคิดการเปลี่ยนแปลงทางดิจิทัล พบว่า รูปแบบการจัดการความรู้โครงการยุทธศาสตร์มหาวิทยาลัยราชภัฏเพื่อการพัฒนาท้องถิ่นของมหาวิทยาลัยราชภัฏนครราชสีมา มีความสามารถในการใช้เป็นเครื่องมือและตัวอย่างการดำเนินงานตามกระบวนการจัดการความรู้ โดยเครื่องมือดังกล่าวประกอบด้วย (1) รูปแบบการจัดการความรู้ (2) ระบบสารสนเทศสำหรับการจัดการความรู้ โดยทั้งสองเครื่องมือสามารถนำไปใช้สำหรับเป็นตัวอย่างในการขับเคลื่อนองค์กรไปสู่องค์กรแห่งการจัดการความรู้อย่างเป็นระบบ ซึ่งสอดคล้องกับงานวิจัยของ กษิด์เดช เนื่องจำนง (2562) ที่ได้นำเอาเทคโนโลยีมาสนับสนุนในการจัดการองค์ความรู้มรดกภูมิปัญญาทางวัฒนธรรม เพื่อให้

สะดวกต่อการใช้งาน ทั้งนี้เนื่องจากเครื่องมือที่ใช้ในการขับเคลื่อนองค์กรมีทั้งเครื่องมือที่เป็นกระบวนการและระบบดิจิทัล ทำให้สามารถนำมาลดค่าใช้จ่ายแต่เพิ่มมูลค่าด้านภาพลักษณ์และการขับเคลื่อนองค์กรด้วยการจัดการความรู้

ความสุขในการทำงานของบุคลากรสำนักงานคณะกรรมการส่งเสริมวิทยาศาสตร์ วิจัยและนวัตกรรม (สกสว.)

Happiness at Thailand Science Research and Innovation (TSRI)

ประภัสสร แก้วแสงแจ่ม, (Prapatsorn Kaewsangjam)[1]
วัลลภ รัฐฉัตรานนท์, (Wanlop Rathachatranon)[2]

บทคัดย่อ

บทความวิจัยนี้มีวัตถุประสงค์เพื่อ (1) ศึกษาระดับความสุขในการทำงานของบุคลากรสำนักงานคณะกรรมการส่งเสริมวิทยาศาสตร์ วิจัยและนวัตกรรม (สกสว.) (2) เปรียบเทียบปัจจัยความสุขในการทำงานของบุคลากร สกสว. จำแนกตามปัจจัยส่วนบุคคล (3) ศึกษาความสัมพันธ์ระหว่างบรรยากาศองค์การกับความสุขในการทำงานของบุคลากร สกสว. การวิจัยในครั้งนี้ใช้ระเบียบวิธีวิจัยเชิงปริมาณ กลุ่มตัวอย่างที่ใช้ในการศึกษา คือ บุคลากร สกสว. จำนวน 152 คน โดยเครื่องมือที่ใช้ในการวิจัย เป็นแบบสอบถาม ซึ่งวิเคราะห์ข้อมูลโดยใช้โปรแกรมคอมพิวเตอร์สำเร็จรูป สถิติที่ใช้ในการวิเคราะห์ข้อมูล ได้แก่ ค่าสถิติร้อยละ ค่าเฉลี่ย ค่าส่วนเบี่ยงเบนมาตรฐาน การทดสอบค่าที การวิเคราะห์ความแปรปรวนทางเดียว และค่าสัมประสิทธิ์สหสัมพันธ์แบบเพียร์สัน โดยมีค่านัยสำคัญทางสถิติที่ใช้ในการวิเคราะห์ครั้งนี้ กำหนดไว้ที่ระดับ 0.05 ผลการวิจัยพบว่า (1) ความสุขในการทำงานของบุคลากร สกสว. อยู่ในระดับสูง (2) บุคลากร สกสว. ที่มีปัจจัยส่วนบุคคลด้านระดับการศึกษา สถานภาพ และรายได้ต่อเดือน ที่ต่างกัน มีความสุขในการทำงานแตกต่างกัน ส่วนปัจจัยส่วนบุคคลด้านอายุ และอายุงาน ที่ต่างกัน มีความสุขในการทำงาน ไม่แตกต่างกัน (3) ปัจจัยด้านบรรยากาศองค์การมีความสัมพันธ์กับความสุขในการทำงานของบุคลากร สกสว. อยู่ในระดับสูง ในทิศทางเดียวกันและมีค่าสัมประสิทธิ์สหสัมพันธ์ (r) เท่ากับ 0.563 ซึ่งสอดคล้องกับสมมติฐานที่ตั้งไว้

คำสำคัญ: ความสุขในการทำงาน ,บุคลากร ,สกสว.

Abstract

This study aims to (1) analyze the job satisfaction of Thailand Science Research and Innovation (TSRI) personnel and (2) compare the happiness elements at work based on personal aspects. (3) To investigate the connection between corporate climate and employee health. 152 NSTDA employees comprised the study's sample. A questionnaire was utilized for the research. Utilize easily available computer programs to perform data analysis. Included in the statistics used to examine data are percentage and average statistics. Standard deviation, T-test, one-way ANOVA, and Pearson correlation The statistical significance value used in this analysis is set at 0.05. The study concluded that (1) staff job satisfaction and (2) people with varying degrees of education, position, and monthly income are pleased at work. Variable degrees of job satisfaction are influenced by factors such as personal age and working age. (3) The organization's environment has a bearing on the job satisfaction of its employees. The assumption is supported by the fact that the relative coefficient (R) in the same direction is 0.563

Keywords: Happiness at work, Personnel, TSRI

บทนำ

World Happiness Report 2022 หรือ “รายงานความสุขโลก 2022” ได้ทำการศึกษาสำรวจประเมินระดับความสุขของประชาชนหลายล้านคนใน 146 ประเทศทั่วโลกในช่วงตั้งแต่ 2019 - 2021 บนแนวคิดหลัก 2 ประการ คือ ระดับความสุขหรือการประเมินชีวิตสามารถวัดผลได้ผ่านการสำรวจความคิดเห็น และสามารถระบุปัจจัยกำหนดหลัก ๆ ของความเป็นอยู่ที่ดีได้ ผลจากการจัดอันดับพบว่าไทยอยู่ในอับดับ ที่ 61 จากทั้งหมด 146 ประเทศทั่วโลก (ศูนย์วิจัยและสนับสนุนเป้าหมายการพัฒนาที่ยั่งยืน, 2565) ซึ่งวัดจากปัจจัยรอบด้านที่ส่งผลให้เกิดความสุขของประชากรในประเทศนั้น ไม่ว่าจะเป็นปัจจัยทางด้านเศรษฐกิจ ข้อมูลทางสถิติประชากร ข้อมูลทางจิตวิทยา การทำวิจัยเชิงสำรวจ รวมไปถึง ดัชนีชี้วัดความเป็นอยู่ที่ดีและมีประสิทธิภาพของประชากรที่ใช้ในการประเมิน

ความก้าวหน้าของประเทศ เช่น ความสัมพันธ์ที่ดี ความไว้วางใจกันในชุมชน การมีค่านิยมที่เอื้อต่อความสุขและศาสนา สุขภาพกาย สุขภาพจิต ความสัมพันธ์ในครอบครัว การศึกษา เสรีภาพทางการเมืองความเข้มแข็งของเครือข่ายสังคม และความเท่าเทียมทางเพศ และสังคม จะเห็นได้ว่าคะแนนเฉลี่ยความสุขของคนไทยมีและอันดับที่ลดลงลดลงเรื่อยมา โดยในช่วงปี 2557 ไทยได้อันดับที่ 34 ก่อนที่จะขยับขึ้นไปที่อันดับ 33 ในปี 2558 และ อันดับ 32 ในปี 2559 หลังจากนั้น ในปี 2560 อันดับของประเทศไทยตกลงมาที่อันดับ 46 และตกลงอยากมากในปี 2561 ในอันดับที่ 52 และลดลงอีกเล็กน้อยในปี 2562 ด้วยอันดับที่ 54 ซึ่งเท่ากับปี 2563 และ 2564 (กฤตพล สุธีภัทรกุล, 2565)

จากการเปลี่ยนแปลงไปอย่างรวดเร็วของสภาพเศรษฐกิจ สังคม เทคโนโลยี การแข่งขันและสภาพแวดล้อมต่าง ๆ ทั้งปัจจัยภายในและปัจจัยภายนอกของชีวิตมนุษย์นี้เอง ทำให้คนทำงานได้รับผลกระทบจากการเปลี่ยนแปลงที่เกิดขึ้นอย่างหลีกเลี่ยงไม่ได้ การปรับตัวให้ทันกับการเปลี่ยนแปลงจึงจำเป็นอย่างยิ่งในสังคมปัจจุบัน นอกจากนี้สภาพเศรษฐกิจที่ทดถอย สถานการณ์การเมืองปัญหาความไม่สงบ รวมทั้งสถานการณ์การแพร่ระบาดของโรคติดเชื้อไวรัสโคโรนา 2019 (Covid 19) ทำให้คนทำงานเกิดความเครียด วิตกกังวล และไม่มีความสุขในการทำงานเพิ่มขึ้นเป็นทวีคูณ โดยมนุษย์ทุกคนอยากมีความสุขและแสวงหาหนทางที่จะนำไปสู่ความสุข ความสุข (Gavin and Mason, 2004) ซึ่งความสุขของคนเรานั้นมีหลายรูปแบบ ความสุขตอนที่เรายังเป็นเด็ก คือ การได้เล่น ได้เรียนรู้สิ่งใหม่ ๆ และได้อยู่กับเพื่อน เมื่อเราเติบโตมาแล้วได้ทำงาน สิ่งที่คนทำงานต้องการ นั่นก็คือ “ความสุขในการทำงาน” Happy at work, Workplace Happiness หรือในปัจจุบัน คือ Work-Life Balance การปรับสมดุลชีวิตทำงาน ซึ่งการทำงานอย่างมีความสุขนั้นเป็นสิ่งที่บุคลากรทุกคนในองค์กรต้องการ หากได้ทำงานในที่ทำงานที่มีอิสระ ได้มีเวลาให้กับชีวิต รู้สึกว่ามีความสุข จะรู้สึกสนุกและผูกพัน หากองค์กรใดที่สามารถทำให้บุคคลากรมีความสุขในการทำงานได้มาก โอกาสที่องค์กรนั้นจะประสบผลสำเร็จก็มากขึ้นตามมา แต่ด้วยปัจจัยทั้งภายในและภายนอกที่ได้กล่าวมาแล้วข้างต้นทำให้ความสุขของคนทำงานเริ่มลดน้อยถอยลงไป ส่งผลกระทบต่อองค์กรทั้งภาครัฐและภาคเอกชนต้องวิธีการและแนวทางในการแก้ไข ปรับปรุง พัฒนาประสิทธิภาพในการทำงานของบุคลากร และหันมาให้ความสำคัญกับการสร้างความพึงพอใจให้กับบุคลากรในองค์กรของตน เพื่อให้บุคลากรมีทัศนคติที่ดี สุขภาพจิตดี สามารถปรับตัวให้เข้ากับ ค่านิยม วัฒนธรรมองค์กร เพื่อนร่วมงาน และมีแรงจูงใจในการทำงานอย่างมีความสุข

สำนักงานคณะกรรมการส่งเสริมวิทยาศาสตร์ วิจัยและนวัตกรรม (สกสว.) แต่เดิมเคยเป็น “สำนักงานกองทุนสนับสนุนการวิจัย (สกว.)” เนื่องด้วยรัฐบาลเร่งเห็นความสำคัญในการเร่งพัฒนาขีดความสามารถด้านวิทยาศาสตร์ วิจัยและนวัตกรรม จึงได้มีการเปลี่ยนแปลงโครงสร้างหน่วยงานและจัดตั้งหน่วยงานขึ้นใหม่ตามพระราชบัญญัติสภานโยบายการอุดมศึกษา วิทยาศาสตร์ วิจัยและนวัตกรรมแห่งชาติ พ.ศ. 2562 โดยมีวัตถุประสงค์เพื่อส่งเสริม สนับสนุน และขับเคลื่อนระบบการวิจัยและนวัตกรรมของประเทศด้านวิทยาศาสตร์ เทคโนโลยี สังคมศาสตร์ มนุษยศาสตร์ และสหวิทยาการ เพื่อสร้างองค์ความรู้ พัฒนานโยบายสาธารณะ และสนับสนุนการนำผลงานวิจัยและนวัตกรรมไปใช้ในเชิงเศรษฐกิจและสังคม เพื่อให้เกิดการพัฒนาประเทศอย่างสมดุลและยั่งยืน แต่จะต้องไม่ดำเนินการวิจัยเอง ซึ่งมีบทบาทหน้าที่ที่สำคัญในระดับประเทศ ด้วยเหตุนี้เองทำให้บุคลากรใน สกสว. ทุกคนต้องเผชิญกับการเปลี่ยนแปลงครั้งใหญ่ ทั้งการปรับเปลี่ยนโครงสร้างองค์กร ค่านิยม วัฒนธรรม วิสัยทัศน์ ภาระหน้าที่ การโอนย้ายเปลี่ยนสายงาน เรียกได้ว่าเป็นการเปลี่ยนแปลงใหม่ทั้งหมดเลยก็ว่าได้ อีกทั้งยังมีสถานการณ์การแพร่ระบาด Covid-19 จนทำให้หน่วยงานต้องประกาศมาตรการ Work from Home ซึ่งอาจทำให้บุคลากรในองค์กรเกิดความเครียด ความกดดัน จากภารกิจที่เปลี่ยนแปลงไป มีภาระงานที่เพิ่มขึ้น ค่าใช่จ่ายที่สูงขึ้น ขาดความสัมพันธ์ระหว่างผู้บังคับบัญชา ผู้ใต้บังคับบัญชา และเพื่อนร่วมงาน และด้วยเหตุนี้เองจึงอาจส่งผลทำให้ความสุขในกาทำงานของบุคลากรใน สกสว. ลดลงและนำมาสู่การลาออกได้

ดังนั้น การศึกษาความสุขในการทำงานของบุคลากรสำนักงานคณะกรรมการส่งเสริมวิทยาศาสตร์ วิจัยและนวัตกรรม (สกสว.) จะก่อให้เกิดประโยชน์ทั้งต่อองค์กรและบุคลากร เพราะการทำให้บุคลากรมีความสุข ใช้ชีวิตอย่างเหมาะสม มีความมั่นคง และมีความก้าวหน้าในหน้าที่การงาน จะทำให้บุคลากรรู้สึกว่าตนเป็นบุคคลที่มีคุณค่า มีความสำคัญต่อองค์กร มีความสัมพันธ์ที่ดีกับเพื่อนร่วมงาน มีแรงจูงใจในการทำงานมากยิ่งขึ้น อีกทั้งยังเป็นสิ่งที่ช่วยขับเคลื่อนให้องค์กรสามารถพัฒนาก้าวหน้าขึ้นได้

วัตถุประสงค์ของการวิจัย

1. เพื่อศึกษาระดับความสุขในการทำงานของบุคลากรสำนักงานคณะกรรมการส่งเสริมวิทยาศาสตร์ วิจัยและนวัตกรรม (สกสว.)

2. เพื่อเปรียบเทียบปัจจัยความสุขในการทำงานของบุคลากรสำนักงานคณะกรรมการส่งเสริมวิทยาศาสตร์ วิจัยและนวัตกรรม (สกสว.) จำแนกตามปัจจัยส่วนบุคคล

3. เพื่อศึกษาความสัมพันธ์ระหว่างบรรยากาศองค์การกับความสุขในการทำงานของบุคลากรสำนักงานคณะกรรมการส่งเสริมวิทยาศาสตร์ วิจัยและนวัตกรรม (สกสว.)

วิธีการดำเนินการวิจัย

ประชากรและตัวอย่าง

ประชากรที่ใช้ในการศึกษาครั้งนี้ คือ บุคลากรของสำนักงานคณะกรรมการส่งเสริมวิทยาศาสตร์ วิจัยและนวัตกรรม (สกสว.) จำนวน 152 คน (ข้อมูล ณ วันที่ 8 เดือน สิงหาคม 2565) ซึ่งจะทำการศึกษาจากจำนวนประชากรทั้งหมด

ตัวแปรที่ใช้ในการวิจัย

การกำหนดการใช้ตัวแปรสำหรับการวิจัยในครั้งนี้ เป็นตัวแปรอิสระ (Independent Variables) 2 ตัวแปร คือ ปัจจัยส่วนบุคคล และบรรยากาศองค์การ ซึ่งใช้ทฤษฎีของ Stringer (2002) โดยแบ่งออกเป็น 6 ด้าน ได้แก่ ด้านโครงสร้างองค์การ ด้านมาตรฐานในการปฏิบัติงาน ด้านความรับผิดชอบ ด้านการได้รับการยอมรับ ด้านการสนับสนุน และด้านความเป็นอันหนึ่งอันเดียวกันส่วนตัวแปรตาม (Dependent Variables) ใช้ทฤษฎีเกี่ยวกับความสุขในการทำงานของ Diener, Christie and Richard (2003) โดยแบ่งออกเป็น 4 ด้าน ได้แก่ ความพึงพอใจในชีวิต ความพึงพอใจในงาน อารมณ์ด้านบวก และอารมณ์ด้านลบ

วิธีการและอุปกรณ์

1. การศึกษาค้นคว้า จากเอกสารทางวิชาการต่าง ๆ เช่น หนังสือ สารนิพนธ์ วิทยานิพนธ์ งานวิจัย บทความทางวิชาการ วารสาร เอกสาร และงานวิจัยที่เกี่ยวข้อง เป็นข้อมูลพื้นฐานในการกำหนดขอบเขตการศึกษาและประกอบการสร้างแบบสอบถาม

2. การศึกษาเชิงสำรวจ (Survey Study) โดยการใช้แบบสอบถาม (Questionnaire) เป็นเครื่องมือในการศึกษา ซึ่งเป็นแบบสอบถามปลายปิด (closed-ended questions)

เครื่องมือที่ใช้ในการวิจัย

เครื่องมือที่ใช้ในการวิจัย คือ แบบสอบถามที่ผู้วิจัยสร้างขึ้นจากแนวคิด ทฤษฎีและผลงานวิจัยที่เกี่ยวข้อง โดยแบ่งออกเป็น 3 ส่วน คือ ส่วนที่ 1 ปัจจัยส่วนบุคคลของผู้ตอบแบบสอบถาม ได้แก่ อายุ ระดับการศึกษา สถานภาพ รายได้ต่อเดือน อายุงาน เป็นแบบตรวจรายการ (Check list) ส่วนที่ 2 แบบสอบถามความคิดเห็นเกี่ยวกับบรรยากาศองค์การที่ส่งผลต่อความสุขในการทำงานของบุคลากรสำนักงานคณะกรรมการส่งเสริมวิทยาศาสตร์ วิจัยและนวัตกรรม (สกสว.) ส่วนที่ 3 แบบสอบถามความสุขในการทำงานของบุคลากรสำนักงานคณะกรรมการส่งเสริมวิทยาศาสตร์ วิจัยและนวัตกรรม (สกสว.) โดย ส่วนที่ 2 และ 3 ใช้ลักษณะคำถามเป็นมาตราประมาณค่าของ ลิเคิร์ท (Likert Scale) มีเกณฑ์การให้คะแนน 5 ระดับ คือ เห็นด้วยมากที่สุด เห็นด้วยมาก เห็นด้วยน้อย และเห็นด้วยน้อยที่สุด

การทดสอบเครื่องมือที่ใช้ในการวิจัย

ผู้วิจัยได้นำแบบสอบถามที่ได้สร้างขึ้นเพื่อการศึกษาในครั้งนี้ ไปทดสอบหาความตรง (Validity) โดยได้นำเครื่องมือที่สร้างขึ้นเสนอให้อาจารย์ที่ปรึกษาและผู้ทรงคุณวุฒิ แก้ไขปรับปรุงเพื่อความเหมาะสม แก้ไขภาษาและคำถามให้มีความชัดเจนเข้าใจได้ง่ายสำหรับผู้ตอบแบบสอบถาม อีกทั้งเพื่อให้ข้อคำถามแต่ละข้อตรงตามจุดมุ่งหมายและวัตถุประสงค์ของการศึกษาครั้งนี้ แล้วนำไปหาความเชื่อมั่น (Reliability) ผู้วิจัยได้นำแบบสอบถามที่ปรับปรุงแล้วไปทดสอบ (Try-Out) กับกลุ่มตัวอย่างที่มีลักษณะใกล้เคียงกับกลุ่มที่จะศึกษาโดยทดสอบเก็บข้อมูลจากกลุ่มตัวอย่าง จำนวน 30 ชุด เพื่อหาความเชื่อมั่นเป็นรายข้อ (Item analysis) โดยวิธีการหาค่าความสอดคล้องภายใน (Internal Consistency Method) ผลการทดสอบพบว่าแบบสอบถามข้อมูลเกี่ยวกับบรรยากาศองค์การมีค่าความเชื่อมั่น เท่ากับ 0.918 และแบบสอบถามความสุขในการทำงานของบุคลากรสำนักงานคณะกรรมการส่งเสริมวิทยาศาสตร์ วิจัยและนวัตกรรม (สกสว.) มีค่าความเชื่อมั่น เท่ากับ 0.859

ขั้นตอนในการวิจัย

1. การสำรวจเอกสาร จากการเก็บรวบรวมข้อมูลที่เกี่ยวข้องกับเรื่องที่จะศึกษาค้นคว้า จากหนังสือ ตำรา เอกสาร ผลงานวิจัย ซึ่งสามารถค้นคว้าได้จากแหล่งต่างๆโดยเฉพาะห้องสมุด เพื่อนำมาสร้างแบบสอบถามก่อนที่จะทำการสำรวจภาคสนามต่อไป

2. การสำรวจภาคสนาม นำแบบสอบถามที่สมบูรณ์แล้ว แจกให้บุคลากรใน สกสว.

3. แบบสอบถามมาตรวจสอบความสมบูรณ์แล้วนำไปประมวลผลและวิเคราะห์ผลทางสถิติ

การวิเคราะห์ข้อมูล

การวิจัยครั้งนี้ ผู้วิจัยนำเสนอข้อมูลที่รวบรวมได้จากแบบสอบถามมาตรวจสอบความถูกต้อง และครบถ้วนของข้อมูล แล้วนำไปประมวลผลวิเคราะห์ข้อมูลด้วยคอมพิวเตอร์ โดยใช้โปรแกรมสำเร็จรูปทางสถิติ (Statistical Software) เพื่อให้ผลการวิจัยมีความถูกต้องแม่นยำมากขึ้น และใช่เครื่องมือทางสถิติในการช่วยวิเคราะห์เพื่อใช้ทดสอบสมมติฐาน จัดทำตารางวิเคราะห์ทางสถิติ เพื่อเสนอเป็นผลการวิจัยตามลำดับ

สถิติที่ใช้ในการวิเคราะห์ข้อมูล

สถิติที่ใช้ในการวิเคราะห์ข้อมูล และทดสอบสมมติฐานครั้งนี้ ประกอบด้วย (1) ค่าสถิติร้อยละ (Percentage) ใช้อธิบายลักษณะทั่วไปของกลุ่มตัวอย่างที่ศึกษา (2) ค่าเฉลี่ย (Mean) ใช้อธิบายระดับความคิดเห็นต่อบรรยายกาศองค์การ และความสุขในการทำงานของบุคลากร สกสว. (3) ทดสอบความแตกต่างของค่าเฉลี่ยของกลุ่มตัวอย่าง 2 กลุ่ม ใช้การทดสอบค่าที (t-test) (4) การวิเคราะห์ความแปรปรวนทางเดียว (One-Way ANOVA) ใช้ในการเปรียบเทียบค่าเฉลี่ยของความสุขในการทำงานของบุคลากร สกสว. ซึ่งจำแนกตัวแปรอิสระออกเป็น 3 กลุ่ม ขึ้นไป เมื่อพบความแตกต่าง จึงทำการวิเคราะห์ความแตกต่างของค่าเฉลี่ยโดยวิธีของ LSD (5) ค่าสัมประสิทธิ์สหสัมพันธ์แบบเพียร์สัน (Pearson Product Moment Correlation Coefficient) ใช้อธิบายความสัมพันธ์ระหว่าง บรรยากาศในองค์การและความสุขในการทำงานของบุคลากร สกสว. ซึ่งกำหนดเกณฑ์การแปลความหมายค่าสัมประสิทธิ์สหสัมพันธ์ ตามหลักเกณฑ์ของ Cohen. (1988: 332) ที่กำหนดไว้ดังนี้ค่าสหสัมพันธ์ระหว่าง 0.10 ถึง 0.29 มีความสัมพันธ์น้อย ระหว่าง 0.30 ถึง 0.49 มีความสัมพันธ์ปานกลาง และระหว่าง 0.50 ถึง 1.00 มีความสัมพันธ์สูง โดยมีค่านัยยะสำคัญทางสถิติที่ใช้ในการวิเคราะห์ครั้งนี้กำหนดไว้ที่ระดับ 0.05

ผลการวิจัย

ข้อมูลส่วนใหญ่ของกลุ่มตัวอย่างซึ่งเป็นบุคลากรของ สกสว. ทั้งหมดจำนวน 152 คน พบว่ากลุ่มตัวอย่างส่วนมากประกอบด้วย บุคลากรที่มีช่วงอายุ 25-35 ปี คิดเป็นร้อยละ 61.8 มีระดับการศึกษาระดับปริญญาโท คิดเป็นร้อยละ 62.5 มีสถานภาพโสด คิดเป็นร้อยละ 69.7 มีรายได้ต่อเดือน คิดเป็นร้อยละ 36.8 และมีอายุงาน 5-10 ปี คิดเป็นร้อยละ 42.1

ผลการวิเคราะห์ระดับความคิดเห็นของบุคลากร สกสว. ต่อปัจจัยด้านบรรยากาศองค์การ

จากผลการวิเคราะห์ พบว่า บุคลากร สกสว. มีภาพรวมของระดับความคิดเห็นต่อบรรยากาศองค์การ อยู่ในระดับสูง มีค่าเฉลี่ยรวม 3.76 โดยเมื่อพิจารณาระดับความคิดเห็นต่อบรรยากาศองค์การ ทั้ง 6 ด้าน ตามลำดับได้ดังนี้ ด้านความเป็นอันหนึ่งอันเดียว มีค่าเฉลี่ยสูงที่สุด คือ 4.13 ด้านการสนับสนุน มีค่าเฉลี่ย 3.92 ด้านความรับผิดชอบ มีค่าเฉลี่ย 3.73 ด้านการโครงสร้างองค์การ มีค่าเฉลี่ย 3.67 ด้านการได้รับการยอมรับ มีค่าเฉลี่ย 3.59 และด้านมาตรฐานในการปฏิบัติงาน มีค่าเฉลี่ย 3.53

ผลการวิเคราะห์ระดับความคิดเห็นของบุคลากร สกสว. ต่อความสุขในการทำงาน

จากผลการวิเคราะห์ พบว่า บุคลากร สกสว. มีภาพรวมของความสุขในการทำงาน อยู่ในระดับสูง มีค่าเฉลี่ยรวม 3.73 โดยเมื่อพิจารณาระดับความสุขในการทำงาน ทั้ง 4 ด้าน ตามลำดับได้ดังนี้ ด้านความพึงพอใจในงาน มีค่าเฉลี่ยสูงที่สุด คือ 3.89 ด้านความพึงพอใจในชีวิต มีค่าเฉลี่ย 3.77 ด้านอารมณ์ด้านบวก มีค่าเฉลี่ย 3.66 และด้านอารมณ์ด้านลบ มีค่าเฉลี่ย 3.61

เมื่อทดสอบสมมติฐานที่ผู้วิจัยได้ตั้งไว้ 6 สมมติฐาน โดยทดสอบความสัมพันธ์และเปรียบเทียบความแตกต่างระหว่างตัวแปรอิสระ ได้แก่ อายุ ระดับการศึกษา สถานภาพ รายได้ต่อเดือน อายุงาน และบรรยากาศองค์การ ส่วนตัวแปรตาม ได้แก่ ความสุขในการทำงาน สามารถสรุปได้ดังนี้

ตารางที่ 1 สรุปผลการทดสอบสมมติฐาน

ตัวแปรอิสระ	Sig.	เป็นไปตามสมมติฐาน	ไม่เป็นไปตามสมมติฐาน
1. อายุ	0.477	-	✓
2. ระดับการศึกษา	0.001*	✓	-
3. สถานภาพ	0.016*	✓	-
4. รายได้ต่อเดือน	0.001*	✓	-
5. อายุงาน	0.597	-	✓
6. บรรยากาศองค์การ	0.001*	✓	-

โดยกำหนดระดับนัยสำคัญทางสถิติที่ใช้ในการทดสอบไว้ที่ระดับ 0.05

จากตารางทดสอบสมมติฐานที่ตั้งไว้ 6 สมมติฐาน ผลปรากฏว่า

สมมติฐานที่ 1 บุคลากร ที่มีอายุต่างกัน มีความสุขในการทำงานไม่แตกต่างกัน ซึ่งไม่เป็นไปตามสมมติฐาน

สมมติฐานที่ 2 บุคลากร ที่มีระดับการศึกษาต่างกัน มีความสุขในการทำงานแตกต่างกัน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้

สมมติฐานที่ 3 บุคลากร ที่มีสถานภาพต่างกัน มีความสุขในการทำงานแตกต่างกัน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้

สมมติฐานที่ 4 บุคลากร ที่มีรายได้ต่อเดือนต่างกัน มีความสุขในการทำงานแตกต่างกัน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้

สมมติฐานที่ 5 บุคลากร ที่มีอายุงานต่างกัน มีความสุขในการทำงานไม่แตกต่างกัน ซึ่งไม่เป็นไปตามสมมติฐานที่ตั้งไว้

สมมติฐานที่ 6 บรรยากาศองค์การมีความสัมพันธ์กับความสุขในการทำงาน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้ โดยความสัมพันธ์ดังกล่าวอยู่ในทิศทางเดียวกันในระดับสูง

สรุปผลการวิจัย

การวิจัยเรื่อง ความสุขในการทำงานของบุคลากรสำนักงานคณะกรรมการส่งเสริมทยาศาสตร์ วิจัยและนวัตกรรม (สกสว.) สามารถอภิปรายผลได้ดังนี้

1. ระดับความสุขในการทำงานของบุคลากรสำนักงานคณะกรรมการส่งเสริมวิทยาศาสตร์ วิจัยและนวัตกรรม (สกสว.) พบว่า ความสุขในการทำงานของบุคลากร สกสว. ในภาพรวมอยู่ในระดับสูง มีค่าเฉลี่ยรวม 3.73 โดยเมื่อพิจารณาระดับความสุขในการทำงานทั้ง 4 ด้าน ตามลำดับได้ดังนี้ ด้านความพึงพอใจในงาน มีค่าเฉลี่ยสูงที่สุด คือ 3.89 ด้านความพึงพอใจในชีวิต มีค่าเฉลี่ย 3.77 ด้านอารมณ์ด้านบวก มีค่าเฉลี่ย 3.66 และด้านอารมณ์ด้านลบ มีค่าเฉลี่ย 3.61 ทั้งนี้อาจเนื่องมาจากบุคลากรพอใจในงานที่ได้รับมอบหมายและปฏิบัติงานอยู่ในปัจจุบัน รู้สึกว่างานที่ตนทำนั้นเป็นงานที่มีประโยชน์ต่อสังคมและส่วนร่วมทำให้ตนเองมีคุณค่าและเกิดความภูมิใจในตนเอง ซึ่งเป็นสิ่งที่ทำให้บุคลากรเกิดอารมณ์ความรู้สึกในด้านบวกมากกว่าด้านลบนั้นเอง โดยผลการศึกษาดังกล่าวสอดคล้องกับงานวิจัยของ ชัชฎาภรณ์ ฝูงชมเชย (2559) ศึกษาเรื่อง บรรยากาศในองค์การที่ส่งผลต่อความสุขในการทำงานของพนักงานการไฟฟ้าส่วนภูมิภาคในจังหวัดปทุมธานี และงานวิจัยของ ณัฏยา ผลบุญ (2559) ศึกษาเรื่อง อิทธิพลของบรรยากาศองค์การและการปรับตัวในการทำงานที่มีต่อความสุขในการทำงานของบุคลากรสถาบันอุดมศึกษาเอกชนแห่งหนึ่งในกรุงเทพมหานคร

2. เพื่อเปรียบเทียบปัจจัยความสุขในการทำงานของบุคลากรสำนักงานคณะกรรมการส่งเสริมวิทยาศาสตร์ วิจัยและนวัตกรรม (สกสว.) จำแนกตามปัจจัยส่วนบุคคล

2.1 บุคลากร สกสว. ที่มีอายุต่างกัน มีความสุขในการทำงาน ไม่แตกต่างกัน ซึ่งไม่เป็นไปตามสมมติฐานที่ตั้งไว้ แสดงให้เห็นว่าอายุที่ต่างกันของบุคลากร สกสว. ไม่มีอิทธิพลกับความสุขในการทำงาน อาจเป็นเพราะบุคลากร สกสว. ไม่ว่าจะอยู่ในช่วงอายุใดก็สามารถทำงานที่ตนเองได้รับมอบหมายและเป็นงานที่ตนเองรู้สึกพึงพอใจได้อย่างมีความสุขภายใต้บรรยากาศองค์การที่ดีได้ โดยผลการศึกษาดังกล่าวสอดคล้องกับงานวิจัยของ สุรัสวดี อ่อนอำไพ (2558) ศึกษาเรื่อง ความสุขในการทำงานของพนักงานกองบำรุงรักษาโรงไฟฟ้าเขื่อนภูมิพล จังหวัดตาก และ ณัฐชยา ศรีจันทร์ ศึกษาเรื่อง ความสุขในการทำงานของพนักงาน ช กรณีศึกษา บริษัท เอพี ออโต้ มาสเตอร์ จำกัด

2.2 บุคลากร สกสว. ที่มีระดับการศึกษาต่างกัน มีความสุขในการทำงาน แตกต่างกัน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้ แสดงให้เห็นว่าอายุที่ต่างกันของบุคลากร สกสว. มีอิทธิพลกับความสุขในการทำงาน โดยพบว่าบุคลากร สกสว. ที่มีการศึกษาในระดับปริญญาตรี มีความสุขในการทำงานสูงกว่าระดับปริญญาโทและเอก อาจเนื่องมาจากบุคลากรที่มีการศึกษาในระดับปริญญาตรีนั้นมีภาระงานและหน้าที่ความรับผิดชอบที่ได้รับมอบหมายน้อยกว่าเมื่อเทียบกับบุคลากรที่มีการศึกษาในระดับปริญญาโทและปริญญาเอกที่มีตำแหน่งหน้าที่ ภาระงาน และแรงกดดันในการทำงานที่ค่อนข้างสูง โดยผลการศึกษาดังกล่าวสอดคล้องกับงานวิจัยของ ณภัทร พรศิลปะกุล (2557) ศึกษาเรื่อง ปัจจัยที่ส่งผลต่อความสุขในการทำงานของบุคลากรในสำนักงานใหญ่ และ ทรรศวรรณ ขาวพราย (2560) ศึกษาเรื่อง ความสุขในการทำงานของพยาบาลวิชาชีพ สังกัดสำนักงานสาธารณสุข จังหวัดนครสวรรค์

2.3 บุคลากร สกสว. ที่มีสถานภาพต่างกัน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้ แสดงให้เห็นว่าสถานภาพที่ต่างกันของบุคลากร สกสว. มีอิทธิพลกับความสุขในการทำงาน โดยพบว่าบุคลากร สกสว. ที่มีสถานภาพโสดจะมีความสุขในการทำงานสูงกว่าบุคลากรที่มีสถานภาพสมรส อาจเนื่องมาจากบุคลากรที่มีสถานภาพสมรสนั้นมีความรับผิดชอบในเรื่องของการดูแลบุตรและคู่สมรส ทำให้ไม่ค่อยมีเวลาผ่อนคลาย และดูแลตนเองอย่างเต็มที่ และในบางครั้งที่ต้องมีการทำงานล่วงเวลา ก็จะเป็นอุปสรรคอย่างมากในการดูและครอบครัวของตนเอง จึงอาจส่งผลให้เกิดความเครียดในการทำงานได้ โดยผลการศึกษาดังกล่าวสอดคล้องกับงานวิจัยของ ชัชชัย กสิวาณิชยกุล (2557) ศึกษาเรื่อง เสริมสร้างความสุขในการทำงานของพนักงานในสถาบันอุดมศึกษา : กรณีศึกษา มหาวิทยาลัยศิลปากร วิทยาเขตพระราชวังสนามจันทร์ และ วัชระ ณรงค์ฤทธิเดช (2560) ศึกษาเรื่อง การศึกษาความสุขในการทำงานของบุคลากรสายสนับสนุนม หาวิทยาลัยรามคำแหง

2.4 บุคลากร สกสว. ที่มีรายได้ต่อเดือนต่างกัน มีความสุขในการทำงาน แตกต่างกัน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้ แสดงให้เห็นว่ารายได้ต่อเดือนที่ต่างกันของบุคลากร สกสว. มีอิทธิพลกับความสุขในการทำงาน โดยพบว่าบุคลากร สกสว. ที่มีรายได้ต่อเดือนไม่เกิน 20,000 บาท และ 20,001-30,000 บาท มีความสุขในการทำงานสูงกว่า บุคลากรที่มีรายได้ต่อเดือน 30,001-40,000 บาท และ 40,001 บาทขึ้นไป อาจเนื่องมาจากบุคลากรที่มีรายได้สูงขึ้นนั้นมาพร้อมกับหน้าที่ความรับผิดชอบและภาระงานที่เพิ่มมากขึ้นด้วยเช่นกัน อีกทั้งยังต้องทำงานภายใต้แรงกดและความคาดหวังจากทั้งหัวหน้าหน่วยงานและเพื่อร่วมงานด้วย และบุคลากรที่มี

รายได้ต่อเดือน 30,001-40,000 บาท และ 40,001 บาทขึ้นไปนั้นมักจะอยู่ในช่วงอายุที่มีภาระค่าใช่จ่ายที่สูงขึ้นด้วย ไม่ว่าจะเป็นค่าที่อยู่อาศัย ค่าเล่าเรียนบุตร ค่ารักษาพยาบาล และอื่นๆ จึงส่งผลให้มีความสุขในการทำงานน้อยกว่าบุคลากรมีรายได้ต่อเดือนไม่เกิน 20,000 บาท และ 20,001-30,000 บาท ซึ่งมีหน้าที่ความรับผิดชอบน้อย และค่าใช้รายจ่ายต่อเดือนก็ไม่สูงมากนัก โดยผลการศึกษาดังกล่าวสอดคล้องกับงานวิจัยของ ชัชชัย กสิวาณิชยกุล (2557) ศึกษาเรื่อง เสริมสร้างความสุขในการทำงานของพนักงานในสถาบันอุดมศึกษา : กรณีศึกษา มหาวิทยาลัยศิลปากร วิทยาเขตพระราชวังสนามจันทร์ และ ณภัทร พรศิลปะกุล (2557) ศึกษาเรื่อง ปัจจัยที่ส่งผลต่อความสุขในการทำงานของบุคลากรในสำนักงานใหญ่

2.5 บุคลากร สกสว. ที่มีอายุงานต่างกัน มีความสุขในการทำงาน ไม่แตกต่างกัน ซึ่งไม่เป็นไปตามสมมติฐานที่ตั้งไว้ แสดงให้เห็นว่าอายุงานที่ต่างกันของบุคลากร สกสว. ไม่มีอิทธิพลกับความสุขในการทำงาน อาจเป็นเพราะบุคลากร สกสว. ไม่ว่าจะเป็นบุคลากรที่เพิ่งเริ่มทำงานใหม่ หรือจะเป็นบุคลากรที่มีประสบการณ์การทำงานมานานแล้ว ทุกคนต่างก็ต้องมีการเรียนรู้วิธีการและทักษะการทำงานใหม่ๆ รวมไปถึงข้อมูลข่าวสารที่มีการเปลี่ยนแปลงอยู่ตลอดเวลา อีกทั้งหน่วยงานเองก็เปิดโอกาสให้ทุกคนได้แสดงความคิดเห็นและแสดงศักยภาพของบุคลากรทุกคนได้อย่างอิสระ จึงทำให้ไม่มีอิทธิพลกับความสุขในการทำงาน โดยผลการศึกษาดังกล่าวสอดคล้องกับงานวิจัยของ สุรัสวดี อ่อนอำไพ (2558) ศึกษาเรื่อง ความสุขในการทำงานของพนักงานกองบำรุงรักษาโรงไฟฟ้าเขื่อนภูมิพล จังหวัดตาก และ ชัชฎาภรณ์ ฝูงชมเชย (2559) ศึกษาเรื่อง บรรยากาศในองค์การที่ส่งผลต่อความสุขในการทำงานของพนักงานการไฟฟ้าส่วนภูมิภาค ในจังหวัดปทุมธานี

3. เพื่อศึกษาความสัมพันธ์ระหว่างบรรยากาศองค์การกับความสุขในการทำงานของบุคลากรสำนักงานคณะกรรมการส่งเสริมวิทยาศาสตร์ วิจัยและนวัตกรรม (สกสว.) พบว่าบรรยากาศองค์การมีความสัมพันธ์กับความสุขในการทำงานของบุคลากร สกสว. โดยอยู่ในระดับที่มีความสัมพันธ์กันสูง มีค่าสัมประสิทธิ์สหสัมพันธ์ เท่ากับ 0.563 ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้ แสดงให้เห็นว่าบรรยากาศองค์การมีความสัมพันธ์กับความสุขในการทำงานของบุคลากร สกสว. อาจเป็นเพราะบุคลากรส่วนใหญ่มีความเห็นว่าบรรยากาศในองค์การ ทั้ง 6 ด้านที่ประกอบไปด้วย ด้านโครงสร้าง ด้านมาตรฐานการปฏิบัติงาน ด้านความรับผิดชอบ ด้านการสนับสนุน และด้านความเป็นอันหนึ่งอันเดียวกัน ต่างเป็นปัจจัยที่สำคัญขององค์การที่เมื่อผู้บริหารสามารถบริหารจัดการบรรยากาศขององค์การได้อย่างเหมาะสมแล้ว ส่งผลให้สามารถจูงใจบุคลากรให้เกิดความพึงพอใจในงาน ความพึงพอใจในตนเอง และเกิดอารมณ์ด้านบวกมากกว่าอารมณ์ด้านลบ ซึ่งสิ่งเหล่านี้ ทำให้ผลการศึกษาบรรยากาศองค์การมีความสัมพันธ์กับความสุขในการทำงานของบุคลากร สกสว. ซึ่งสอดคล้องกับงานวิจัยของ ชัชฎาภรณ์ ฝูงชมเชย (2559) ศึกษาเรื่อง บรรยากาศในองค์การที่ส่งผลต่อความสุขในการทำงานของพนักงานการไฟฟ้าส่วนภูมิภาค ในจังหวัดปทุมธานี และงานวิจัยของ ณัฏยา ผลบุญ (2559) ศึกษาเรื่อง อิทธิพลของบรรยากาศองค์การและการปรับตัวในการทำงานที่มีต่อความสุขในการทำงานของบุคลากรสถาบันอุดมศึกษาเอกชนแห่งหนึ่งในกรุงเทพมหานคร

อภิปรายผลการวิจัย

ในการวิจัยเรื่อง “ความสุขในการทำงานของบุคลากรสำนักงานคณะกรรมการส่งเสริมวิทยาศาสตร์ วิจัยและนวัตกรรม (สกสว.)” ผลการวิจัยพบว่า ความสุขในการทำงานของบุคลากรสำนักงานคณะกรรมการส่งเสริมวิทยาศาสตร์ วิจัยและนวัตกรรม (สกสว.) ในภาพรวมอยู่ในระดับสูง โดยมีค่าเฉลี่ย 3.73 เมื่อพิจารณาเป็นรายข้อ พบว่าประเด็นสำคัญที่บุคลากรซึ่งเป็นกลุ่มตัวอย่างมีความสุขในการทำงานมากที่สุด คือ ท่านรู้สึกดีเมื่องานสำเร็จลุล่วงตามเป้าหมาย (ข้อ 12) มีค่าเฉลี่ยสูงที่สุด คือ 4.38 รองลงมา คือ ครอบครัวของท่านช่วยเหลือเกื้อกูลด้านจิตใจอารมณ์ เพื่อให้ท่านมีความสุข (ข้อ 4) มีค่าเฉลี่ย 4.32 ส่วนประเด็นที่บุคลากร สกสว. มีความสุขในการทำงาน น้อยที่สุด คือ ท่านรู้สึกเบื่อหน่ายกับการทำงาน (ข้อ 24) มีค่าเฉลี่ยน้อยที่สุด คือ 3.12

จากประเด็นที่บุคลากรมีความสุขในการทำงานน้อยที่สุด ในประเด็นที่ว่าท่านรู้สึกเบื่อหน่ายกับการทำงาน แสดงให้เห็นว่าบุคลากรซึ่งเป็นกลุ่มตัวอย่างนั้นมีความสนุก เพลิดเพลินและกระตือรือร้นเมื่อได้ทำงาน โดยเมื่อแยกวิเคราะห์ข้อมูลระดับความสุขในการทำงานของบุคลากร สกสว. เป็นรายด้าน พบว่าด้านความพึงพอใจในงาน มีค่าเฉลี่ยสูงที่สุด รองลงมาคือ ด้านความพึงพอใจในชีวิต ด้านอารมณ์ด้านบวก และด้านอารมณ์ด้านลบ ตามลำดับ ทั้งนี้อาจเนื่องมาจากบุคลากรพอใจในงานที่ได้รับมอบหมายและปฏิบัติงานอยู่ในปัจจุบัน รู้สึกว่างานที่ตนทำนั้นเป็นงานที่มีประโยชน์ต่อสังคมและส่วนร่วม ทำให้ตนเองมีคุณค่าและเกิดความภูมิใจในตนเอง ซึ่งเป็นสิ่งที่ทำให้บุคลากรเกิดอารมณ์ความรู้สึกในด้านบวกมากกว่าด้านลบนั้นเอง โดยผลการศึกษาดังกล่าวสอดคล้องกับงานวิจัยของ ชัชฎาภรณ์ ฝูงชมเชย (2559) ศึกษาเรื่อง บรรยากาศในองค์การที่ส่งผลต่อความสุขในการทำงานของพนักงานการไฟฟ้าส่วนภูมิภาค ในจังหวัดปทุมธานี และงานวิจัยของ ณัฏยา ผลบุญ (2559) ศึกษาเรื่อง อิทธิพลของบรรยากาศองค์การและการปรับตัวในการทำงานที่มีต่อความสุขในการทำงานของบุคลากรสถาบันอุดมศึกษาเอกชนแห่งหนึ่งในกรุงเทพมหานคร

โดยจากการทดสอบสมมติฐานที่ตั้งไว้ 6 สมมติฐาน ผลปรากฏว่าไม่เป็นไปตามสมมติฐานที่ตั้งไว้ 2 สมมติฐาน ได้แก่ อายุและอายุงาน สำหรับผลการทดสอบที่เป็นไปตามสมมติฐานที่ตั้งไว้ 4 สมมติฐาน ได้แก่ ระดับการศึกษา สถานภาพ รายได้ต่อเดือน และบรรยากาศองค์การ

ข้อเสนอแนะ

ข้อเสนอแนะจากการวิจัย

1. ปัจจัยบรรยากาศองค์การ สกสว. ควรมีระบบการพิจารณาความดี ความชอบที่มีความชัดเจน มีความยุติธรรมและเป็นที่ยอมรับของบุคลากรในองค์กร เพื่อเป็นบรรทัดฐานและสร้างขวัญกำลังใจในปฏิบัติงาน รวมทั้งจูงใจให้มีการปฏิบัติงานอย่างมีประสิทธิภาพ

2. ความสุขในการทำงานของบุคลากร สกสว. ควรมีการจัดการอบรมด้านการพัฒนาสภาพจิตใจให้กับบุคลากรอยู่เสมอ เพื่อช่วยส่งเสริม ฟื้นฟูจิตใจ และสร้างภูมิคุ้มกันให้กับบุคลากรสามารถรับมือกับปัญหาและอุปสรรคที่เกิดขึ้น รวมถึงสภาพสังคมที่ต้องเผชิญในทุกวันได้

ข้อเสนอแนะในการศึกษาครั้งต่อไป

1. ควรมีการศึกษาในปัจจัยลักษณะงาน และด้านสัมพันธภาพในที่ทำงานเพิ่มเติม เพื่อให้ทราบว่าส่งผลต่อความสุขในการทำงานแตกต่างกันหรือไม่ จะทำให้ผลการศึกษามีความชัดเจนและครอบคลุมรอบด้านมากยิ่งขึ้น

2. ควรทำการศึกษาภาวะที่ทำให้เกิดความเครียดในการทำงานของบุคลากร สกสว. เพื่อให้ทราบถึงปัจจัยที่ส่งผลต่อความเครียดในการทำงาน อีกทั้งหน่วยงานยังสามารถนำไปแก้ไขปัญหาดังกว่าได้ต่อไป

3. การศึกษาในครั้งนี้เป็นการศึกษาเชิงปริมาณ โดยใช้แบบสอบถามเป็นเครื่องมือในการเก็บรวบรวมข้อมูล ดังนั้นหากมีการศึกษาวิจัยเรื่องนี้ครั้งต่อไป ควรเพิ่มการวิจัยในเชิงคุณภาพเพื่อให้ได้ผลการศึกษาในเชิงลึกมากขึ้น โดยอาจใช้การสัมภาษณ์แบบเจาะลึกกับบุคลากรที่ปฏิบัติงานในแต่ละด้านจากส่วนงานที่แตกต่างกัน เพื่อให้ได้ข้อมูลในเชิงลึกยิ่งขึ้น

4. การศึกษาในครั้งนี้เป็นการศึกษาประชากรเฉพาะบุคลากรใน สกสว. เท่านั้น จึงไม่สามารถสรุปและอธิบายความสุขในการทำงานของบุคลากรในหน่วยงานอื่น ๆ ได้ทั้งหมด ดังนั้นหากมีการศึกษาเรื่องนี้ครั้งต่อไป ควรมีการศึกษาเปรียบเทียบกับบุคลากรของ สกสว. และหน่วยงานอื่นๆ ด้วย

ปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานของบุคลากรส่วนกลางกรมทรัพยากรน้ำ
Factors Affecting Motivation to Work of the Department of Water Resources

สุภาภรณ์ บุญยิ้ม Supaporn Boonyim[1]
อรนันท์ กลันทปุระ Oranan Gluntapura[2]

บทคัดย่อ

การวิจัยครั้งนี้มีวัตถุประสงค์ 1) เพื่อศึกษาระดับแรงจูงใจในการปฏิบัติงานของบุคลากรส่วนกลาง กรมทรัพยากรน้ำ และ 2) เพื่อศึกษาปัจจัยที่มีผลต่อแรงจูงใจในการปฏิบัติงานของบุคลากรส่วนกลาง กรมทรัพยากรน้ำ ประชากรและกลุ่มตัวอย่าง ได้แก่ บุคลากรส่วนกลาง กรมทรัพยากรน้ำ จำนวน 223 คน โดยใช้แบบสอบถาม สถิติที่ใช้ในการวิเคราะห์ข้อมูล ได้แก่ ความถี่, ร้อยละ, ส่วนเบี่ยงเบนมาตรฐาน, t-test และ F-test ผลการศึกษาพบว่า 1) ระดับแรงจูงใจในการปฏิบัติงานของบุคลากรส่วนกลาง กรมทรัพยากรน้ำด้านปัจจัยจูงใจ พบว่า โดยรวมอยู่ในระดับมาก ได้แก่ ด้านนโยบายและการบริหาร ด้านความสัมพันธ์ในการทำงาน ด้านค่าตอบแทนและสวัสดิการ ด้านการปกครองบังคับบัญชา ด้านความมั่นคงในการทำงาน และด้านสภาพแวดล้อมในการทำงาน และ 2) ปัจจัยที่มีผลต่อแรงจูงใจในการปฏิบัติงานของบุคลากรส่วนกลาง กรมทรัพยากรน้ำที่มีอายุ ระดับการศึกษา สถานภาพสมรส ระยะเวลาในการปฏิบัติงาน และรายได้ต่อเดือนที่ต่างกันมีความคิดเห็นต่อปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานแตกต่างกัน อย่างมีนัยสำคัญทางสถิติที่ระดับ 0.05 ส่วนบุคลากรส่วนกลาง กรมทรัพยากรน้ำ ที่มีเพศต่างกัน มีความคิดเห็นต่อปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานไม่แตกต่างกัน

คำสำคัญ: แรงจูงใจ, การปฏิบัติงาน, บุคลากรส่วนกลาง, กรมทรัพยากรน้ำ

Abstract

The purpose of this research is 1) To study the level of work motivation of central personnel. Department of Water Resources. and 2) to study factors affecting the work motivation of central personnel. Department of Water Resources. The population and sample were the central personnel. Department of Water Resources, 223 people using a questionnaire. The statistics used to analyze the data were frequency, percentage, standard deviation, t-test and F-test. The results of the study revealed that 1) the level of motivation in the performance of central personnel. Department of Water Resources in terms of motivation factors, found that the overall level was at a high level, including policies and management. working relationship Remuneration and Welfare governance in terms of work stability and working environment, and 2) factors affecting work motivation of central personnel. department of water resources aged educational level, marital status, length of service and different monthly incomes had different opinions on the factors affecting the motivation to work. with statistical significance at the 0.05 level. Department of Water Resources with different sex There were no differences in opinions on the factors affecting the motivation to work.

Keywords: Incentives, Operations, Central Personnel, Department of Water Resources

บทนำ

ในสภาวะที่ประเทศไทยกำลังเข้าสู่ภาวะของการเปลี่ยนแปลง ทั้งปัจจัยภายใน และภายนอก ทุกสิ่งทุกอย่างเคลื่อนไหวด้วยความต่อเนื่อง การบริหารจัดการเป็นสิ่งที่จำเป็นสำหรับทุกองค์กรทั้งในภาคธุรกิจเอกชน หรือแม้กระทั่งใน หน่วยงานภาคราชการเอง ปัจจัยหรือทรัพยากรทางการบริหารจัดการที่สำคัญ 4 M’s ถือเป็นปัจจัยพื้นฐานที่ใช้ในการบริหาร มนุษย์นับเป็นทรัพยากรสำคัญและจำเป็นที่สุดและต้องใช้ทรัพยากรมนุษย์จำนวนมากในหลากหลายหน้าที่ เพราะทรัพยากรมนุษย์เป็นส่วนสำคัญที่ขับเคลื่อนองค์กรให้ไปสู่ผลสำเร็จ ดังนั้น ผู้บริหารจึงจำเป็นต้องเข้าใจถึงบทบาทการบริหารจัดการองค์กร (ชนิดา คุณทองคำ, 2562) การบริหารจัดการองค์กร การบริหารบุคคลจึงถือเป็นปัจจัยความสำคัญ เพราะบุคลากรเป็นส่วนขับเคลื่อนที่สำคัญที่ทำให้องค์กรดำเนินการไปได้และ

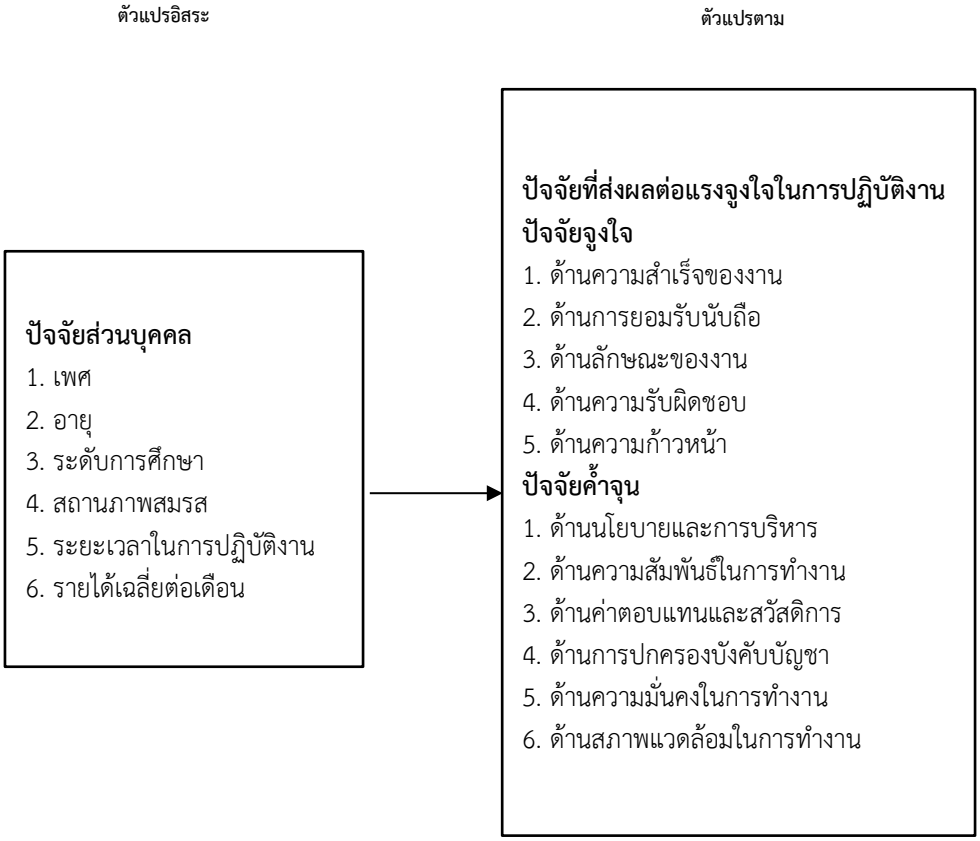
บรรลุเป้าหมาย ถึงแม้ว่าองค์กรจะประกอบด้วยบุคลากรที่มีความรู้ความสามารถที่เหมาะสมต้องการปฏิบัติงาน แต่ถ้าหากบุคลากรเหล่านั้นขาดความตั้งใจ ความกระตือรือร้นในการปฏิบัติหน้าที่ผลจากการปฏิบัติงานก็จะเกิดปัญหาขึ้นได้ เพื่อให้องค์กรบรรลุเป้าหมายที่ตั้งไว้ จึงเป็นสิ่งที่สำคัญที่คณะผู้บริหารต้องมีความเข้าใจและทราบถึงแรงจูงใจในการปฏิบัติงาน เพื่อให้บุคลากรมีแรงจูงใจในการปฏิบัติงานจะทำให้เกิดผลดีต่อองค์กร ปฏิบัติงานมีประสิทธิภาพ และบรรลุเป้าหมายขององค์กร (ปิญาทิพย์ กองโฮม, 2562) ทั้งนี้ การบริหารบุคลากรให้มีประสิทธิภาพเป็นแนวทางการบริหารเพื่อให้บรรลุเป้าหมายขององค์กรผู้บริหารต้องเป็นผู้รับผิดชอบประสานความร่วมมือ ร่วมกับผู้บริหารฝ่ายอื่น ๆ เพื่อให้ระบบการบริหารทรัพยากรมนุษย์มีประสิทธิภาพและประสบผลสำเร็จนั้นจะต้องมีการวางแผนทรัพยากรมนุษย์ สามารถปรับตนเองให้กับเข้าวัฒนธรรมขององค์กร การพัฒนาบุคลากร โดยเริ่มตั้งแต่บุคคลเข้ามาทำงานในองค์กรและพัฒนาต่อเนื่องกันไป ตลอดระยะเวลาที่บุคคลนั้นอยู่ในองค์กร และการรักษาบุคลากรเพื่อให้มีความพึงพอใจในการทำงาน การสร้างขวัญกำลังใจในการทำงาน ความก้าวหน้าในตำแหน่งหน้าที่ การมีรายได้พอเพียงกับความเป็นอยู่นอกจากนี้การบริหารบุคลากรที่มีประสิทธิภาพ ต้องสามารถตรวจสอบและควบคุมได้ตลอดจนให้พนักงานเข้ามามีส่วนร่วมในการตัดสินใจมากขึ้น (พรเพชร บุตรดี, 2563)

ด้วยเหตุนี้จึงทำให้ทุกองค์กรไม่ว่าจะเป็นภาครัฐหรือเอกชนจะต้องมีแนวทางในการปฏิบัติที่ช่วยให้บุคลากรคงอยู่กับองค์กรได้อย่างมีความสุข เมื่อเกิดการปฏิบัติงานได้อย่างมีความสุขจะทำให้บุคลากรเกิดความรัก ความจงรักภักดีต่อองค์กรและรู้สึกอยากเป็นส่วนหนึ่งขององค์กร การส่งเสริมแรงจูงใจในการปฏิบัติงานจึงเป็นสิ่งจำเป็นที่ก่อให้เกิดประโยชน์เพื่อรักษาบุคลากรสำคัญขององค์กร ซึ่งประกอบไปด้วย ปัจจัยจูงใจ และ ปัจจัยค้ำจุน ซึ่งโดยธรรมชาติของมนุษย์ เมื่อได้รับการตอบสนองก็ทำให้เกิดความพึงพอใจ และแสดงพฤติกรรมในทางบวก อีกทั้งถ้าได้รับแรงจูงใจในการทำงานที่ดีและเหมาะสมก็จะเป็นสิ่งกระตุ้นให้การปฏิบัติงาน เป็นไปได้อย่างมีประสิทธิภาพ มีความจงรักภักดี ต่อองค์กรและเต็มใจทำงานอยู่กับองค์กรต่อไป (วชัระ แย้มชู, 2563) นอกจากนี้ แรงจูงใจยังเป็นอีกสาเหตุสำคัญที่ทำให้มนุษย์แสดงพฤติกรรมต่าง ๆ ออกมาในเชิงบวก เช่น มีความมุ่งมั่นที่จะฟันฝ่าอุปสรรคต่าง ๆ ความกระตือรือร้นและท่ากิจกรรมนั้น ๆ อย่างทุ่มเทเต็มกำลังความสามารถขณะเดียวกันหากมนุษย์ไม่มีแรงจูงใจและความพึงพอใจจะทำให้มนุษย์แสดงพฤติกรรมต่าง ๆ ออกมาในเชิงลบ เช่น มีสภาพแวดล้อมที่เฉื่อยชาท่ากิจกรรมนั้น ๆ ให้ผ่าน ๆ ไปไม่ตั้งใจ หรือไม่เอาใจใส่กับการท่ากิจกรรมซึ่งการท่าให้บุคคลนั้นทำงานได้อย่างมีประสิทธิภาพองค์กรจะต้อง ส่งเสริมและสร้างแรงจูงใจให้เกิดกับบุคคลเหล่านั้นซึ่งปัจจุบันการสร้างและส่งเสริมแรงจูงใจให้กับบุคลากรขององค์กรมีด้วยกันหลายปัจจัย ที่จะช่วยให้บุคลากรส่วนกลาง กรมทรัพยากรน้ำมีแรงจูงใจที่จะปฏิบัติงานที่ได้รับมอบหมายให้มีประสิทธิภาพ (ภัตราพร ชนะการณ์, 2561)



กรมทรัพยากรน้ำ เป็นหน่วยงานภาครัฐสังกัดกระทรวงทรัพยากรธรรมชาติและสิ่งแวดล้อม มีภารกิจการเสนอแนะในการจัดทำนโยบายและแผนและมาตรการที่เกี่ยวข้องกับทรัพยากรน้ำ บริหารจัดการพัฒนาอนุรักษ์ฟื้นฟูรวมทั้งควบคุมดูแลกำกับประสานติดตามประเมินผลและแก้ไขปัญหาเกี่ยวกับทรัพยากรน้ำพัฒนาวิชาการกำหนดมาตรฐานและถ่ายทอดเทคโนโลยีด้านทรัพยากรน้ำทั้งระดับภาพรวมและระดับลุ่มน้ำเพื่อการจัดการทรัพยากรน้ำที่เป็นเอกภาพและยั่งยืน ด้วยภาระหน้าที่ความรับผิดชอบของบุคลากรภายในหน่วยงานต้องได้รับแรงจูงใจในการปฏิบัติงานเพื่อรองรับภาระงานที่จะเพิ่มขึ้น และได้รับงานที่มีประสิทธิภาพทางกรมทรัพยากรน้ำ ต้องมีการสร้างแรงจูงใจในการปฏิบัติงาน ซึ่งจะเกิดแรงผลักดันให้บุคลากร กรมทรัพยากรน้ำเกิดความพึงพอใจและมีความสุขในการปฏิบัติงานมากยิ่งขึ้น และบรรลุเป้าหมายขององค์กร (กรมทรัพยากรน้ำ, 2565)

จากความสำคัญของปัญหาดังกล่าวข้างต้นผู้ศึกษาสนใจที่จะศึกษาเรื่อง ปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานของบุคลากรส่วนกลาง กรมทรัพยากรน้ำ เพื่อนำข้อมูลที่ได้จากการศึกษาไปปรับปรุงและแก้ปัญหาได้ตรงจุด และพัฒนาการปฏิบัติงานบุคลากรส่วนกลาง กรมทรัพยากรน้ำให้เหมาะสมยิ่งขึ้นไป นอกจากนี้การศึกษาในครั้งนี้ยังอาจช่วยทำให้ผู้บริหารเล็งเห็นปัญหาที่เกิดขึ้นนำไปวางแผนและพัฒนาการทำงานของบุคลากรส่วนกลาง กรมทรัพยากรน้ำให้ก้าวหน้าต่อไป

วัตถุประสงค์ของการวิจัย

1. เพื่อศึกษาระดับแรงจูงใจในการปฏิบัติงานของบุคลากรส่วนกลาง กรมทรัพยากรน้ำ
2. เพื่อศึกษาปัจจัยที่มีผลต่อแรงจูงใจในการปฏิบัติงานของบุคลากรส่วนกลาง กรมทรัพยากรน้ำ

จากวัตถุประสงค์ของการวิจัยสามารถสร้างกรอบแนวคิดในการวิจัยได้ดังนี้

ภาพที่ 1 กรอบแนวคิดในการวิจัย

วิธีการดำเนินการวิจัย

การวิจัยครั้งนี้เป็นการวิจัยเชิงปริมาณ (Quantitative Research) ซึ่งผู้วิจัยได้ใช้แบบสอบถามในการเก็บรวบรวมข้อมูลจากประชากรและกลุ่มตัวอย่าง โดยมีรายละเอียดดังต่อไปนี้

1. ประชากรและกลุ่มตัวอย่างที่ใช้ในการศึกษา ได้แก่ บุคลากรส่วนกลาง กรมทรัพยากรน้ำ ประกอบด้วย ข้าราชการ จำนวน 363 คน และพนักงานราชการ จำนวน 141 คน รวมทั้งสิ้น 504 คน จากการคำนวณโดยใช้สูตรของทาโร่ ยามาเน่ (Taro Yamane, 1973) ได้กลุ่มตัวอย่าง จำนวน 223 คน ที่ระดับความคลาดเคลื่อน 0.05 โดยการสุ่มตัวอย่างแบบบังเอิญ (Accidental Sampling) โดยใช้สูตรในการคำนวณดังนี้

$$n = \frac{N}{1+(Ne^2)}$$

เมื่อ n = ขนาดของกลุ่มตัวอย่าง
N = จำนวนประชากร
e2 = ระดับของความคลาดเคลื่อนที่ยอมรับให้เกิดขึ้นได้ 5% หรือ 0.05

แทนค่าในสูตร

$$n = \frac{504}{1+(504 \times 0.05^2)}$$

$$n = 223$$

ดังนั้น ในการทำวิจัยครั้งนี้ ผู้ทำวิจัยใช้กลุ่มตัวอย่างจำนวน 223 คน โดยเก็บข้อมูลเฉพาะบุคลากรส่วนกลาง กรมทรัพยากรน้ำ เท่านั้น

2. เครื่องมือที่ใช้ในการวิจัย

เครื่องมือที่ใช้ในการศึกษาครังนี้ คือ แบบสอบถาม (Questionnaire) ซึ่งผู้ศึกษาได้สร้างขึ้นจากการศึกษาแนวคิด ทฤษฎี เอกสาร และผลงานวิจัยที่เกี่ยวข้อง โดยแบ่งออกเป็น 2 ส่วน ดังนี้

ส่วนที่ 1 ปัจจัยส่วนบุคคลของผู้ตอบแบบสอบถาม ซึ่งประกอบไปด้วย เพศ อายุ ระดับการศึกษา สถานภาพสมรส ระยะเวลาในการปฏิบัติงาน และรายได้เฉลี่ยต่อเดือน

ส่วนที่ 2 ปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานของบุคลากรส่วนกลาง กรมทรัพยากรน้ำ มีลักษณะแบบสอบถามเป็นแบบมาตรส่วนประมาณค่า (Rating Scale) ประกอบด้วย

1. ปัจจัยจูงใจ ได้แก่ ด้านความสำเร็จของงาน, ด้านการยอมรับนับถือ, ด้านลักษณะของงาน, ด้านความรับผิดชอบ และด้านความก้าวหน้า จำนวน 25 ข้อ

2. ปัจจัยค้ำจุน ได้แก่ ด้านนโยบายและการบริหาร ด้านความสัมพันธ์ในการทำงาน ด้านค่าตอบแทนและสวัสดิการ ด้านการปกครองบังคับบัญชา ด้านความมั่นคงในการทำงาน และด้านสภาพแวดล้อมในการทำงาน จำนวน 30 ข้อ

3. การทดสอบเครื่องมือที่ใช้ในการศึกษา

ผู้ศึกษาทดสอบเครื่องมือที่ใช้ในการศึกษา โดยการนำแบบสอบถามไปทำการทดสอบหาความเที่ยงตรง (Validity) โดยนำแบบสอบถามที่ผู้ศึกษาสร้างขึ้นจากการศึกษาค้นคว้าเอกสาร ตำรา หนังสือ งานวิจัย และทฤษฎีต่าง ๆ ที่เกี่ยวกับปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานของบุคลากรส่วนกลาง กรมทรัพยากรน้ำ โดยนำไปปรึกษาและเสนอต่อคณะกรรมการที่ปรึกษาการค้นคว้าอิสระ เพื่อตรวจสอบความถูกต้อง หาความเที่ยงตรงเชิงเนื้อหา (Content Validity) ของแบบสอบถามว่าครอบคลุมตามวัตถุประสงค์หรือไม่ และนำข้อแนะนำของคณะกรรมการที่ปรึกษาการค้นคว้าอิสระมาปรับปรุงแก้ไขให้มีความเที่ยงตรงยิ่งขึ้น เพื่อดำเนินการในขั้นตอนต่อไป ทดสอบความเชื่อมั่น (Reliability) โดยผู้ศึกษาจะนำแบบสอบถามที่ได้ทำการปรับแก้ ไปทำการทดสอบ (Try-out) กับกลุ่มประชากรที่ไม่ใช่กลุ่มตัวอย่าง จำนวน 30 คน แล้วนำข้อมูลมาหาความเชื่อมั่น (Reliability) ของแบบสอบถามโดยใช้วิธีการหาค่าสัมประสิทธิ์แอลฟา (Alpha coefficient) ตามวิธีของครอนบาค (Cronbach)

4. การเก็บรวบรวมข้อมูล

การเก็บรวบรวมข้อมูลเชิงปริมาณผู้ศึกษาได้ดำเนินการ แบ่งออกเป็น 2 กลุ่มคือ ข้อมูลปฐมภูมิ (Primary data) ข้อมูลในส่วนนี้ ผู้ศึกษาได้เก็บรวบรวมข้อมูลจากกลุ่มประชากรและกลุ่มตัวอย่างโดยตรงกับบุคลากรส่วนกลาง กรมทรัพยากรน้ำ จำนวน 223 ชุด จากการสร้างแบบสอบถาม (Questionnaire) เป็นคำถามแบบปลายปิด (Close ended Questions) สอบถามบุคลากรส่วนกลาง กรมทรัพยากรน้ำ ตรวจสอบแบบสอบถามที่ได้รับกลับคืนมา โดยตรวจสอบความถูกต้องความครบถ้วนของข้อมูล แล้วนำมากำหนดรหัสคำตอบเพื่อทำการวิเคราะห์ประมวลผลต่อไป และข้อมูลทุติยภูมิ (Secondary Data) โดยการหาข้อมูลด้วยการค้นคว้าจากเอกสารและบทความที่เกี่ยวข้อง เพื่อให้ได้ข้อมูลพื้นฐานที่ใช้เป็นแนวทางในการวิจัย

5. การวิเคราะห์ข้อมูลและสถิติที่ใช้ในการวิเคราะห์ข้อมูล

การวิเคราะห์จากแบบสอบถามปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานของบุคลากรส่วนกลาง กรมทรัพยากรน้ำ ผู้ศึกษานำแบบสอบถามที่ได้รับกลับคืนมา จำนวน 223 ชุด และทำการตรวจสอบความถูกต้องและสมบูรณ์ของแบบสอบถาม
พบแบบสอบถามที่มีความสมบูรณ์จำนวน 223 ชุด วิเคราะห์ข้อมูลทั่วไปเกี่ยวกับปัจจัยส่วนบุคคลของผู้ตอบแบบสอบถาม ได้แก่ เพศ อายุ ระดับการศึกษา สถานภาพสมรส ระยะเวลาในการปฏิบัติงาน และรายได้เฉลี่ยต่อเดือน โดยแจกแจงความถี่ (Frequency) และหาค่าร้อยละ (Percentage) พร้อมทั้งนำเสนอข้อมูลในรูปแบบของตารางวิเคราะห์ข้อมูลเกี่ยวกับปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานของบุคลากร ส่วนกลาง กรมทรัพยากรน้ำ โดยการหาค่าเฉลี่ย (Mean) และส่วนเบี่ยงเบนมาตรฐาน (Standard Deviation) เป็นรายข้อแล้วนำเสนอรูปแบบตาราง และวิเคราะห์เปรียบเทียบปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานที่แตกต่างกันของบุคลากรส่วนกลาง กรมทรัพยากรน้ำแตกต่างกัน การวิเคราะห์โดยข้อมูลโดยใช้สถิติค่าที (t-test) แบบกลุ่มตัวอย่างที่เป็นอิสระจากกัน (Independent Samples) และใช้สถิติ F-test แบบวิเคราะห์ความแปรปรวนทางเดียว (One Way ANOVA) ถ้าพบความแตกต่างกันอย่างมีนัยสำคัญทางสถิติที่ระดับ 0.05 จะทำการเปรียบเทียบค่าเฉลี่ยเป็นรายคูโดยวิธีการของเชฟเฟ่ (Scheffe)

สรุปผลการวิจัย

1. ผลการวิเคราะห์ข้อมูลเกี่ยวกับปัจจัยส่วนบุคคลของผู้ตอบแบบสอบถาม พบว่า ผู้ตอบแบบสอบถามส่วนใหญ่เป็นเพศชาย จำนวน 112 คน คิดเป็นร้อยละ 50.2 มีอายุ 31 - 40 ปี จำนวน 95 คน คิดเป็นร้อยละ 42.6 มีระดับการศึกษาปริญญาตรี จำนวน 135 คน คิดเป็นร้อยละ 60. มีสถานภาพสมรส จำนวน 113 คน คิดเป็นร้อยละ 50.7 มีระยะเวลาในการปฏิบัติงาน 5 - 10 ปี จำนวน 82 คน คิดเป็นร้อยละ 36.8 และมีรายได้ต่อเดือน 15,001 - 20,000 บาท จำนวน 88 คน คิดเป็นร้อยละ 39.5 ตามลำดับ ดังตารางที่ 1

ตารางที่ 1 แสดงค่าความถี่ ร้อยละ จำแนกตามปัจจัยส่วนบุคคลของผู้ตอบแบบสอบถาม (n = 223)

ปัจจัยส่วนบุคคลของผู้ตอบแบบสอบถาม	จำนวน	ร้อยละ
1. เพศ		
ชาย	112	50.2
หญิง	111	49.8
2. อายุ		
21 - 30 ปี	46	20.6
31 - 40 ปี	95	42.6
41 - 50 ปี	60	26.9
51 ปีขึ้นไป	22	9.9
3. ระดับการศึกษา		
ต่ำกว่าปริญญาตรี	55	24.7
ปริญญาตรี	135	60.5
สูงกว่าปริญญาตรีขึ้นไป	33	14.8
4. สถานภาพสมรส		
โสด	76	34.1
สมรส	113	50.7
หย่าร้าง / หม้าย / แยกกันอยู่	34	15.2
5. ระยะเวลาในการปฏิบัติงาน		
น้อยกว่า 5 ปี	46	20.6
5 - 10 ปี	82	36.8
11 - 15 ปี	53	23.8
มากกว่า 15 ปีขึ้นไป	42	18.8
6. รายได้ต่อเดือน		
น้อยกว่า 10,000 บาท	12	5.4
10,000 - 15,000 บาท	52	23.3
15,001 - 20,000 บาท	88	39.5
20,001 - 30,000 บาท	34	15.2
30,001 - 40,000 บาท	17	7.6
40,001 บาทขึ้นไป	20	9.0
รวม	**223**	**100.0**

2. ผลการวิเคราะห์ข้อมูลเกี่ยวกับปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานของบุคลากรส่วนกลาง กรมทรัพยากรน้ำ แสดงดังตารางที่ 2

ตารางที่ 2 แสดงค่าเฉลี่ย และค่าส่วนเบี่ยงเบนมาตรฐานข้อมูลเกี่ยวกับปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานของบุคลากรส่วนกลาง กรมทรัพยากรน้ำ: ภาพรวม (n = 223)

ปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานของบุคลากรส่วนกลาง กรมทรัพยากรน้ำ	$\bar{X}$	S.D.	อันดับ	ระดับ
ปัจจัยจูงใจ				
ด้านความสำเร็จของงาน	4.27	.44	1	มาก
ด้านการยอมรับนับถือ	4.02	.50	4	มาก
ด้านลักษณะของงาน	4.10	.58	3	มาก
ด้านความรับผิดชอบ	4.12	.60	2	มาก
ด้านความก้าวหน้า	4.10	.52	3	มาก
รวม	**4.12**	**.53**	**-**	**มาก**
ปัจจัยค้ำจุน				
ด้านนโยบายและการบริหาร	4.14	.52	2	มาก
ด้านความสัมพันธ์ในการทำงาน	4.10	.52	5	มาก
ด้านค่าตอบแทนและสวัสดิการ	4.04	.56	6	มาก
ด้านการปกครองบังคับบัญชา	4.11	.53	4	มาก
ด้านความมั่นคงในการทำงาน	4.17	.51	1	มาก
ด้านสภาพแวดล้อมในการทำงาน	4.12	.45	3	มาก
รวม	**4.11**	**.52**	**-**	**มาก**
ภาพรวม	**4.12**	**.52**	**-**	**มาก**

จากตารางที่ 2 พบว่า ผู้ตอบแบบสอบถามมีความคิดเห็นเกี่ยวกับปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานของบุคลากรส่วนกลาง กรมทรัพยากรน้ำ โดยรวมอยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.12 เมื่อจำแนกเป็นรายด้านแล้ว พบว่า

2.1 ปัจจัยจูงใจ พบว่า โดยรวมอยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.12 เมื่อจำแนกเป็นรายด้านแล้ว พบว่า ด้านความสำเร็จของงาน อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.27 รองลงมา คือ ด้านความรับผิดชอบ อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.12 และด้านลักษณะของงาน และด้านความก้าวหน้า อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.10 ซึ่งสามารถจำแนกได้ดังนี้

1) ด้านความสำเร็จของงาน พบว่า โดยรวมอยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.27 เมื่อจำแนกเป็นรายข้อแล้ว พบว่า ผลสำเร็จของที่ได้จากการปฏิบัติงานก่อให้เกิดกำลังใจในการปฏิบัติงาน อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.73 รองลงมา คือ จะเกิดความรู้สึกพึงพอใจเมื่องานสำเร็จ และเป็นส่วนหนึ่งของความสำเร็จ อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.58 และปฏิบัติงานได้สำเร็จบรรลุตามเป้าหมาย อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.14 ตามลำดับ

2) ด้านการยอมรับนับถือ พบว่า โดยรวมอยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.02 เมื่อจำแนกเป็นรายข้อแล้ว พบว่า ได้รับการยอมรับในความรู้ ผลงาน และความสามารถในการปฏิบัติงาน อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.21 รองลงมา คือ รู้สึกว่างานที่ปฏิบัติอยู่ช่วยให้มีเกียรติและได้รับการยอมรับจากสังคม อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.20 และได้รับคำชมเชยและความเชื่อถือ ไว้วางใจจากผู้บังคับบัญชาว่ามีความรู้ความสามารถเหมาะสมกับงานที่ได้รับมอบหมาย อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 3.97 ตามลำดับ

3) ด้านลักษณะของงาน พบว่า โดยรวมอยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.10 เมื่อจำแนกเป็นรายข้อแล้ว พบว่า ใช้ความรู้ความสามารถอย่างเต็มที่ในการปฏิบัติงานที่ได้รับมอบหมาย อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.24 รองลงมา คือ งานที่ปฏิบัติอยู่เป็นงานที่สามารถแสดงศักยภาพได้อย่างเต็มที่ อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.21 และมีความเป็นอิสระในการปฏิบัติงานตามความสามารถ อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.13 ตามลำดับ

4) ด้านความรับผิดชอบ พบว่า โดยรวมอยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.12 เมื่อจำแนกเป็นรายข้อแล้ว พบว่า มีความมุ่งมั่นที่จะทำงานให้สำเร็จตามเป้าหมาย อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.27 รองลงมา คือ ได้ปฏิบัติงานตรงตามลักษณะงานที่คาดหวังได้ใช้ความรู้ความสามารถในการปฏิบัติงาน อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.22 และได้รับมอบหมายให้ปฏิบัติงานในปริมาณที่เหมาะสม และยินดีที่จะทำงานด้านอื่น ๆ นอกเหนือจากสายงานตามที่ผู้บังคับบัญชามอบหมาย อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.05 ตามลำดับ

5) ด้านความก้าวหน้า พบว่า โดยรวมอยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.10 เมื่อจำแนกเป็นรายข้อแล้ว พบว่า ได้รับการสนับสนุนให้ได้รับการฝึกอบรม ทำให้เกิดความรู้มากขึ้น อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.21 รองลงมา คือ ได้รับความยุติธรรมในการเลื่อนขั้นเงินเดือน อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.19 และผู้บังคับบัญชาให้การสนับสนุนในตำแหน่งที่สูงขึ้นอยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.09 ตามลำดับ

2.2 ปัจจัยค้ำจุน พบว่า โดยรวมอยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.11 เมื่อจำแนกเป็นรายด้านแล้ว พบว่า ด้านความมั่นคงในการทำงาน อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.17 รองลงมา คือ ด้านนโยบายและการบริหาร อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.14 และด้านสภาพแวดล้อมในการทำงาน อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.12 ซึ่งสามารถจำแนกได้ดังนี้

1) ด้านนโยบายและการบริหาร พบว่า โดยรวมอยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.14 เมื่อจำแนกเป็นรายข้อแล้ว พบว่า กรมทรัพยากรน้ำมีการกำหนดนโยบายต่าง ๆ ไว้อย่างชัดเจน อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.29 รองลงมา คือ กรมทรัพยากรน้ำมีการจัดระบบการทำงานให้มีความคล่องตัว อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.21 และผู้บริหารมีการชี้แจงนโยบายในการดำเนินงานและโครงสร้างการบริหารงานแก่ อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.11 ตามลำดับ

2) ด้านความสัมพันธ์ในการทำงาน พบว่า โดยรวมอยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.10 เมื่อจำแนกเป็นรายข้อแล้ว พบว่า ได้รับความช่วยเหลือจากเพื่อนร่วมงานและผู้บังคับบัญชาเสมอ อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.25 รองลงมา คือ สามารถปฏิบัติงานเป็นทีมกับเพื่อนร่วมงานได้อย่างสบายใจ อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.09 และสามารถเป็นที่ปรึกษาที่ดีให้แก่เพื่อนร่วมงาน อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.08 ตามลำดับ

3) ด้านค่าตอบแทนและสวัสดิการ พบว่า โดยรวมอยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.04 เมื่อจำแนกเป็นรายข้อแล้ว พบว่า ค่าตอบแทนและสวัสดิการที่ได้รับเพียงพอต่อค่าครองชีพของ อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.15 รองลงมา คือ ค่าตอบแทนและสวัสดิการที่ได้รับอยู่ในเกณฑ์สูงกว่าเมื่อเปรียบเทียบงานประเภทเดียวกัน อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.08 และค่าตอบแทนและสวัสดิการที่ได้รับเหมาะสมกับงานที่รับผิดชอบ อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.03 ตามลำดับ

4) ด้านการปกครองบังคับบัญชา พบว่า โดยรวมอยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.11 เมื่อจำแนกเป็นรายข้อแล้ว พบว่า ผู้บังคับบัญชามอบหมายงานและแจกจ่ายงานให้อย่างเหมาะสมและเป็นธรรม อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.19 รองลงมา คือ ผู้บังคับบัญชาให้คำแนะนำในการทำงานแก่ได้เป็นอย่างดี อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.16 และผู้บังคับบัญชาให้การดูแลเอาใจใส่นอกเหนือจากเรื่องงาน และผู้บังคับบัญชามีการควบคุมดูแลปฏิบัติงานอย่างใกล้ชิด อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.15 ตามลำดับ

5) ด้านความมั่นคงในการทำงาน พบว่า โดยรวมอยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.07 เมื่อจำแนกเป็นรายข้อแล้ว พบว่า งานที่ปฏิบัติสร้างความมั่นคงให้ในอนาคตได้โดยไม่ถูกเลิกจ้าง และกรมทรัพยากรน้ำมีระบบการประเมินผลที่เป็นธรรม อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.31 รองลงมา คือ มีความมั่นใจว่างานที่ปฏิบัติจะให้ความมั่นคงโดยไม่ถูกย้ายหน้าที่โดยไม่เป็นธรรม อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.23 และงานที่ปฏิบัติสามารถเลี้ยงครอบครัวของเพียงพอ และยังสามารถมีเงินเก็บออมได้ อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.07 ตามลำดับ

6) ด้านสภาพแวดล้อมในการทำงาน พบว่า โดยรวมอยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.12 เมื่อจำแนกเป็นรายข้อแล้ว พบว่า สถานที่ทำงานของได้รับการดูแลให้มีความสะอาดและเป็นระเบียบ อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.25 รองลงมา คือ ได้รับสิ่งอำนวยความสะดวกอย่างเหมาะสมและเพียงพอ (น้ำดื่ม, โต๊ะทำงาน, คอมพิวเตอร์, โทรศัพท์, ลิฟท์ เป็นต้น) อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.19 และมีอุปกรณ์เครื่องใช้สำนักงานในกรมทรัพยากรน้ำอย่างเหมาะสมและเพียงพอ และบรรยากาศในที่ปฏิบัติงานของมีความเหมาะสม (แสงสว่าง, อุณหภูมิ, เสียงรบกวน) อยู่ในระดับมาก มีค่าเฉลี่ยเท่ากับ 4.09 ตามลำดับ

2.3 จากการทดสอบสมมติฐาน สามารถสรุปได้ดังนี้

สมมติฐานที่ 1 บุคลากรส่วนกลาง กรมทรัพยากรน้ำ ที่มีเพศต่างกัน มีความคิดเห็นต่อปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานไม่แตกต่างกัน

สมมติฐานที่ 2 บุคลากรส่วนกลาง กรมทรัพยากรน้ำ ที่มีอายุต่างกัน มีความคิดเห็นต่อปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานแตกต่างกัน อย่างมีนัยสำคัญทางสถิติที่ระดับ 0.05

สมมติฐานที่ 3 บุคลากรส่วนกลาง กรมทรัพยากรน้ำ ที่มีระดับการศึกษาต่างกัน มีความคิดเห็นต่อปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานแตกต่างกัน อย่างมีนัยสำคัญทางสถิติที่ระดับ 0.05

สมมติฐานที่ 4 บุคลากรส่วนกลาง กรมทรัพยากรน้ำ ที่มีสถานภาพสมรสต่างกัน มีความคิดเห็นต่อปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานแตกต่างกัน อย่างมีนัยสำคัญทางสถิติที่ระดับ 0.05

สมมติฐานที่ 5 บุคลากรส่วนกลาง กรมทรัพยากรน้ำ ที่มีระยะเวลาในการปฏิบัติงานต่างกัน มีความคิดเห็นต่อปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานแตกต่างกัน อย่างมีนัยสำคัญทางสถิติที่ระดับ 0.05

สมมติฐานที่ 6 บุคลากรส่วนกลาง กรมทรัพยากรน้ำ ที่มีรายได้ต่อเดือนต่างกัน มีความคิดเห็นต่อปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานแตกต่างกัน อย่างมีนัยสำคัญทางสถิติที่ระดับ 0.05

อภิปรายผลการวิจัย

จากการศึกษาเรื่อง ปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานของบุคลากรส่วนกลาง กรมทรัพยากรน้ำ โดยผู้วิจัยได้อภิปรายผลการศึกษาตามวัตถุประสงค์ของการศึกษาดังนี้

1. จากการศึกษาระดับแรงจูงใจในการปฏิบัติงานของบุคลากรส่วนกลาง กรมทรัพยากรน้ำ พบว่า

1.1 ระดับแรงจูงใจในการปฏิบัติงานของบุคลากรส่วนกลาง กรมทรัพยากรน้ำด้านปัจจัยจูงใจ พบว่า โดยรวมอยู่ในระดับมาก ซึ่งสามารถจำแนกได้ดังนี้

1) ด้านความสำเร็จของงาน พบว่า โดยรวมอยู่ในระดับมาก อาจเป็นเพราะผลสำเร็จของที่ได้จากการปฏิบัติงานก่อให้เกิดกำลังใจในการปฏิบัติงานจะเกิดความรู้สึกพึงพอใจเมื่องานสำเร็จ และเป็นส่วนหนึ่งของความสำเร็จ และสามารถปฏิบัติงานได้สำเร็จบรรลุตามเป้าหมาย ซึ่งสอดคล้องกับการศึกษาของ ชนิดา คุณทองคำ (2562) พบว่า แรงจูงใจในการปฏิบัติงานของบุคลากรสำนักงานการตรวจเงินแผ่นดินภูมิภาคที่ 2 (จังหวัดชลบุรี) ด้านความสำเร็จของงาน โดยรวมอยู่ในระดับมาก

2) ด้านการยอมรับนับถือ พบว่า โดยรวมอยู่ในระดับมาก อาจเป็นเพราะสามารถได้รับการยอมรับในความรู้ ผลงานและความสามารถในการปฏิบัติงาน ทำให้รู้สึกว่างานที่ปฏิบัติอยู่ช่วยให้มีเกียรติและได้รับการยอมรับจากสังคม และได้รับคำชมเชยและความเชื่อถือ ไว้วางใจจากผู้บังคับบัญชาว่ามีความรู้ความสามารถเหมาะสมกับงานที่ได้รับมอบหมาย ซึ่งสอดคล้องกับการศึกษาของ พัชรินทร์ กลายสุวรรณ (2560) พบว่า แรงจูงใจในการปฏิบัติงานของพนักงาน บริษัท ไฮเวย์ จำกัด ด้านการยอมรับนับถือ โดยรวมอยู่ในระดับมาก

3) ด้านลักษณะของงาน พบว่า โดยรวมอยู่ในระดับมาก อาจเป็นเพราะการใช้ความรู้ความสามารถอย่างเต็มที่ในการปฏิบัติงานที่ได้รับมอบหมาย โดยงานที่ปฏิบัติอยู่เป็นงานที่สามารถแสดงศักยภาพได้อย่างเต็มที่ และมีความเป็นอิสระในการปฏิบัติงานตามความสามารถ ซึ่งสอดคล้องกับการศึกษาของ พัชรินทร์ กลายสุวรรณ (2560) พบว่า แรงจูงใจในการปฏิบัติงานของพนักงาน บริษัท ไฮเวย์ จำกัด ด้านลักษณะของงาน โดยรวมอยู่ในระดับมาก

4) ด้านความรับผิดชอบ พบว่า โดยรวมอยู่ในระดับมาก อาจเป็นเพราะการมีความมุ่งมั่นที่จะทำงานให้สำเร็จตามเป้าหมาย รวมถึงสามารถปฏิบัติงานตรงตามลักษณะงานที่คาดหวังได้ใช้ความรู้ความสามารถในการปฏิบัติงาน และได้รับมอบหมายให้ปฏิบัติงานในปริมาณที่เหมาะสม และยินดีที่จะทำงานด้านอื่น ๆ นอกเหนือจากสายงานตามที่ผู้บังคับบัญชามอบหมาย ซึ่งสอดคล้องกับการศึกษาของ จุรี วรรณาเจริญกุล (2563) พบว่า แรงจูงใจในการปฏิบัติงานของข้าราชการสำนักงานการตรวจเงินแผ่นดิน ด้านความรับผิดชอบ โดยรวมอยู่ในระดับมาก

5) ด้านความก้าวหน้า พบว่า โดยรวมอยู่ในระดับมาก อาจเป็นเพราะการ ได้รับการสนับสนุนให้ได้รับการฝึกอบรมทำให้เกิดความรู้มากขึ้น รวมถึงได้รับความยุติธรรมในการเลื่อนขั้นเงินเดือน และผู้บังคับบัญชาให้การสนับสนุนในตำแหน่งที่สูงขึ้น ซึ่งสอดคล้องกับการศึกษาของ ศุภกาญจน์ ไชยพิพัฒน์นนท์ (2561) พบว่า แรงจูงใจในการปฏิบัติงานของบุคลากรองค์กรปกครองส่วนท้องถิ่นอำเภอคูเมือง จังหวัดบุรีรัมย์ ด้านความก้าวหน้า โดยรวมอยู่ในระดับมาก

1.2 ระดับแรงจูงใจในการปฏิบัติงานของบุคลากรส่วนกลาง กรมทรัพยากรน้ำด้านปัจจัยค้ำจุน พบว่า โดยรวมอยู่ในระดับมาก ซึ่งสามารถจำแนกได้ดังนี้

1) ด้านนโยบายและการบริหาร พบว่า โดยรวมอยู่ในระดับมาก อาจเป็นเพราะกรมทรัพยากรน้ำมีการกำหนดนโยบายต่าง ๆ ไว้อย่างชัดเจน รวมถึงมีการจัดระบบการทำงานให้มีความคล่องตัว และผู้บริหารมีการชี้แจงนโยบายในการดำเนินงานและโครงสร้างการบริหารงานให้กับพนักงานทุกคน ซึ่งสอดคล้องกับการศึกษาของ พัชรินทร์ กลายสุวรรณ (2560) พบว่า แรงจูงใจในการปฏิบัติงานของพนักงาน บริษัท ไฮเวย์ จำกัด ด้านนโยบายและการบริหาร โดยรวมอยู่ในระดับมาก

2) ด้านความสัมพันธ์ในการทำงาน พบว่า โดยรวมอยู่ในระดับมาก อาจเป็นเพราะมีการได้รับความช่วยเหลือจากเพื่อนร่วมงานและผู้บังคับบัญชาเสมอ ทำให้สามารถปฏิบัติงานเป็นทีมกับเพื่อนร่วมงานได้อย่างสบายใจ และสามารถเป็นที่ปรึกษาที่ดีให้แก่

เพื่อนร่วมงาน ซึ่งสอดคล้องกับการศึกษาของ พัชรินทร์ กลายสุวรรณ (2560) พบว่า แรงจูงใจในการปฏิบัติงานของพนักงาน บริษัท ไฮเวย์ จำกัด ด้านความสัมพันธ์กับเพื่อร่วมงาน โดยรวมอยู่ในระดับมาก

3) ด้านค่าตอบแทนและสวัสดิการ พบว่า โดยรวมอยู่ในระดับมาก อาจเป็นเพราะการได้รับค่าตอบแทนและสวัสดิการที่ได้รับเพียงพอต่อค่าครองชีพของ รวมถึงค่าตอบแทนและสวัสดิการที่ได้รับอยู่ในเกณฑ์สูงกว่าเมื่อเปรียบเทียบงานประเภทเดียวกัน และค่าตอบแทนและสวัสดิการที่ได้รับเหมาะสมกับงานที่รับผิดชอบ ซึ่งสอดคล้องกับการศึกษาของ วชัระ แย้มชู (2563) พบว่า แรงจูงใจในการปฏิบัติงานของพนักงานธนาคารเพื่อการเกษตรและสหกรณ์การเกษตร สำนักงานใหญ่ ด้านค่าตอบแทนและสวัสดิการ โดยรวมอยู่ในระดับมาก

4) ด้านการปกครองบังคับบัญชา พบว่า โดยรวมอยู่ในระดับมาก อาจเป็นเพราะผู้บังคับบัญชามอบหมายงานและแจกจ่ายงานให้อย่างเหมาะสมและเป็นธรรม รวมถึงมีการให้คำแนะนำในการทำงานแก่ได้เป็นอย่างดี และมีการดูแลเอาใจใส่นอกเหนือจากเรื่องงาน และผู้บังคับบัญชามีการควบคุมดูแลปฏิบัติงานอย่างใกล้ชิด ซึ่งสอดคล้องกับการศึกษาของ พรเพชร บุตรดี (2563) พบว่า แรงจูงใจในการทำงานที่มีต่อพฤติกรรมการเป็นสมาชิกที่ดีขององค์กรของบุคลากรองค์กรปกครองส่วนท้องถิ่นในเขตอำเภอท่าอุเทน จังหวัดนครพนม ด้านการปกครองบังคับบัญชา โดยรวมอยู่ในระดับมาก

5) ด้านความมั่นคงในการทำงาน พบว่า โดยรวมอยู่ในระดับมาก อาจเป็นเพราะงานที่ปฏิบัติสร้างความมั่นคงให้ในอนาคตได้โดยไม่ถูกเลิกจ้าง และกรมทรัพยากรน้ำมีระบบการประเมินผลที่เป็นธรรม ทำให้มีความมั่นใจว่างานที่ปฏิบัติจะให้ความมั่นคงโดยไม่ถูกย้ายหน้าที่โดยไม่เป็นธรรม และงานที่ปฏิบัติสามารถเลี้ยงครอบครัวของเพียงพอ และยังสามารถมีเงินเก็บออมได้ ซึ่งสอดคล้องกับการศึกษาของ ยุพาภรณ์ สีวิกะ (2560) พบว่า แรงจูงใจในการปฏิบัติงานของพนักงาน บริษัท แจสมินอะเมนนิตี้ จำกัด จังหวัดเชียงใหม่ ด้านความมั่นคงในการทำงาน โดยรวมอยู่ในระดับมาก

6) ด้านสภาพแวดล้อมในการทำงาน พบว่า โดยรวมอยู่ในระดับมาก อาจเป็นเพราะสถานที่ทำงานของได้รับการดูแลให้มีความสะอาดและเป็นระเบียบ ทำให้ได้รับสิ่งอำนวยความสะดวก เช่น น้ำดื่ม โต๊ะทำงาน คอมพิวเตอร์ โทรศัพท์ ลิฟท์ อย่างเหมาะสมและเพียงพอ และมีอุปกรณ์เครื่องใช้สำนักงานในกรมทรัพยากรน้ำอย่างเหมาะสมและเพียงพอ และบรรยากาศในที่ปฏิบัติงานของมีความเหมาะสม ซึ่งสอดคล้องกับการศึกษาของ ยุพาภรณ์ สีวิกะ (2560) พบว่า แรงจูงใจในการปฏิบัติงานของพนักงาน บริษัท แจสมินอะเมนนิตี้ จำกัด จังหวัดเชียงใหม่ ด้านสภาพแวดล้อมในการทำงาน โดยรวมอยู่ในระดับมาก

2. จากการศึกษาปัจจัยที่มีผลต่อแรงจูงใจในการปฏิบัติงานของบุคลากรส่วนกลางกรมทรัพยากรน้ำ สามารถจำแนกได้ดังนี้

2.1 บุคลากรส่วนกลาง กรมทรัพยากรน้ำ ที่มีเพศต่างกัน มีความคิดเห็นต่อปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานแตกต่างกัน พบว่า บุคลากรส่วนกลาง กรมทรัพยากรน้ำ ที่มีเพศต่างกัน มีความคิดเห็นต่อปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานไม่แตกต่างกัน ซึ่งสอดคล้องกับการศึกษาของ ศุภกาญจน์ ไชยพิพัฒน์นนท์ (2561) พบว่า บุคลากรองค์กรปกครองส่วนท้องถิ่นที่มีเพศต่างกัน ส่งผลต่อแรงจูงใจในการปฏิบัติงานของบุคลากรองค์กรปกครองส่วนท้องถิ่นอำเภอคูเมือง จังหวัดบุรีรัมย์ ไม่แตกต่างกัน

2.2 บุคลากรส่วนกลาง กรมทรัพยากรน้ำ ที่มีอายุต่างกัน มีความคิดเห็นต่อปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานแตกต่างกัน พบว่า บุคลากรส่วนกลาง กรมทรัพยากรน้ำ ที่มีอายุต่างกัน มีความคิดเห็นต่อปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานแตกต่างกัน อย่างมีนัยสำคัญทางสถิติที่ระดับ 0.05 ซึ่งสอดคล้องกับการศึกษาของ ศิริรัตน์ บุญสา นิสากร สุวรรณสิงห์ และกฤษณ์ วิทวัสสำราญกุล (2562) พบว่า ปัจจัยส่วนบุคคลทางด้านอายุต่างกัน ส่งผลต่อแรงจูงใจในการปฏิบัติงานของพนักงานระดับปฏิบัติการท่าอากาศยานสุวรรณภูมิ แตกต่างกัน

2.3 บุคลากรส่วนกลาง กรมทรัพยากรน้ำ ที่มีระดับการศึกษาต่างกัน มีความคิดเห็นต่อปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานแตกต่างกัน พบว่า บุคลากรส่วนกลาง กรมทรัพยากรน้ำ ที่มีระดับการศึกษาต่างกัน มีความคิดเห็นต่อปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานแตกต่างกัน อย่างมีนัยสำคัญทางสถิติที่ระดับ 0.05 ซึ่งสอดคล้องกับการศึกษาของ พัชร เนตรวิจิตร (2560) พบว่า พนักงานโรงพยาบาลลาดบัวหลวงที่มีระดับการศึกษา แตกต่างกัน มีระดับแรงจูงใจต่อการปฏิบัติงานแตกต่างกันอย่างมีนัยสำคัญ

2.4 บุคลากรส่วนกลาง กรมทรัพยากรน้ำ ที่มีสถานภาพสมรสต่างกัน มีความคิดเห็นต่อปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานแตกต่างกัน พบว่า บุคลากรส่วนกลาง กรมทรัพยากรน้ำ ที่มีสถานภาพสมรสต่างกัน มีความคิดเห็นต่อปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานแตกต่างกัน อย่างมีนัยสำคัญทางสถิติที่ระดับ 0.05 ซึ่งสอดคล้องกับการศึกษาของ ชลัญญา เพ็ชรขัน (2564) พบว่า ปัจจัยส่วนบุคคลด้านสถานภาพสมรส มีผลต่อประสิทธิภาพในการปฏิบัติงานของบุคลากรกองพัสดุ กรมชลประทาน

2.5 บุคลากรส่วนกลาง กรมทรัพยากรน้ำ ที่มีระยะเวลาในการปฏิบัติงานต่างกัน มีความคิดเห็นต่อปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานแตกต่างกัน พบว่า บุคลากรส่วนกลาง กรมทรัพยากรน้ำ ที่มีระยะเวลาในการปฏิบัติงานต่างกัน มีความคิดเห็นต่อปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานแตกต่างกัน อย่างมีนัยสำคัญทางสถิติที่ระดับ 0.05 ซึ่งสอดคล้องกับการศึกษาของ วชัระ แย้มชู (2563) พบว่า ระยะเวลาปฏิบัติงานต่างกันมีแรงจูงใจในการปฏิบัติงานแตกต่างกันอย่างมีนัยสำคัญทางสถิติที่ ระดับ 0.05

2.6 บุคลากรส่วนกลาง กรมทรัพยากรน้ำ ที่มีรายได้ต่อเดือนต่างกัน มีความคิดเห็นต่อปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานแตกต่างกัน พบว่า บุคลากรส่วนกลาง กรมทรัพยากรน้ำ ที่มีรายได้ต่อเดือนต่างกัน มีความคิดเห็นต่อปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานแตกต่างกัน อย่างมีนัยสำคัญทางสถิติที่ระดับ 0.05 ซึ่งสอดคล้องกับการศึกษาของ วชัระ แย้มชู (2563) พบว่า พนักงานที่มีรายได้ต่อเดือน ต่างกันมีแรงจูงใจในการปฏิบัติงานแตกต่างกันอย่างมีนัยสำคัญทางสถิติที่ ระดับ 0.05

ข้อเสนอแนะ

1. ข้อเสนอแนะในการศึกษาครั้งนี้

1.1 จากการศึกษาปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานของบุคลากรส่วนกลาง กรมทรัพยากรน้ำด้านปัจจัยจูงใจโดยรวมอยู่ในระดับมาก ดังนั้นควรมีการมอบหมายให้ปฏิบัติงานที่มีความสำคัญ และมีการรับฟังพนักงานในการให้โอกาสในการเสนอแนะความคิดเห็นเกี่ยวกับการปฏิบัติงานในหน่วยงานอย่างเต็มความสามารถ เพื่อทำให้หน่วยงานมีการพัฒนาแนวทางในการสร้างเสริมแรงจูงใจในการปฏิบัติงานให้กับบุคลากรส่วนกลาง กรมทรัพยากรน้ำมากยิ่งขึ้น

1.2 จากการศึกษาปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานของบุคลากรส่วนกลาง กรมทรัพยากรน้ำด้านปัจจัยค้ำจุนโดยรวมอยู่ในระดับมาก ดังนั้นผู้บริหารควรมีการจ่ายค่าตอบแทนพิเศษต่าง ๆ ที่นอกเหนือจากเงินเดือนที่ได้รับเป็นที่พึงพอใจ และมีความเหมาะสมกับงานที่รับผิดชอบ และอยู่ในเกณฑ์สูงกว่าเมื่อเปรียบเทียบงานประเภทเดียวกัน

2. ข้อเสนอแนะในการศึกษาครั้งถัดไป

2.1 การศึกษาในครั้งนี้เป็นเพียงการศึกษาเชิงปริมาณ (Quantitative Research) โดยใช้แบบสอบถาม (Questionnaire) เป็นเครื่องมือในการเก็บรวบรวมข้อมูล ดังนั้นในการศึกษาครั้งถัดไปควรมีการศึกษาเชิงคุณภาพ (Qualitative Data) โดยใช้การสัมภาษณ์เชิงลึก (In-depth Interview) เพื่อทำให้ทราบถึงความคิดเห็นเกี่ยวกับปัจจัยที่ส่งผลต่อแรงจูงใจในการปฏิบัติงานของบุคลากรส่วนกลาง กรมทรัพยากรน้ำ ได้อย่างครอบคลุมมากยิ่งขึ้น

2.2 ในการศึกษาครั้งถัดไปควรมีการศึกษาควรเกี่ยวกับความสุขในการทำงานของบุคลากรส่วนกลาง กรมทรัพยากรน้ำ จะได้ข้อมูลจริงเพื่อนำไปพัฒนาปรับปรุงหน่วยงาน ให้บุคลากรส่วนกลาง กรมทรัพยากรน้ำ ที่มีความสุขในการทำงานน้อยลงหรือเบื่อหน่ายให้เกิดแรงบันดาลใจในการทำงาน รวมถึงควรมีการปรับปรุงเป้าหมายในการทำงานให้เหมาะสมกับสภาพความเป็นจริง

การสมรสของพระภิกษุ

BUDDHIST MONK'S MARRIAGE

จงรักษ์ พลสงคราม, (Jongruk Ponsongcarm)[1]

บทคัดย่อ

ประมวลกฎหมายแพ่งและพาณิชย์ บรรพ 5 ครอบครัว ไม่มีบทบัญญัติห้ามพระภิกษุทำการสมรสแต่ประการใด ดังนั้นการที่พระภิกษุทำการสมรสโดยการจดทะเบียนการสมรสนั้น น่าจะสมบูรณ์ไม่ตกเป็นโมฆะแต่การพระภิกษุอยู่กินด้วยกันฉันสามีภริยากับ คู่สมรส พระภิกษุดังกล่าวก็จะพ้นจากการเป็นพระภิกษุทันทีเพราะเป็นการกระทำที่จะผิดวินัยอย่างร้ายแรง คือ อาบัติปาราชิก ในขณะที่พระภิกษุที่จดทะเบียนสมรสแต่ไม่ได้อยู่กินด้วยกันฉันสามีภริยา การสมรสก็จะตกเป็นโมฆะเพราะถือว่าการจดทะเบียนสมรสดังกล่าว ชายหญิงไม่ได้ยินยอมเป็นสามีภริยากัน (ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1458) การที่กฎหมายไม่ห้ามพระภิกษุจดทะเบียนสมรส จึงก่อให้เกิดปัญหาในทางกฎหมายและพระวินัย จึงควรมีการแก้ไขเพิ่มเติมประมวลกฎหมายแพ่งและพาณิชย์โดยการกำหนดเงื่อนไขของการสมรสสมว่า “ชายจะทำการสมรสในขณะที่เป็นพระภิกษุไม่ได้”

คำสำคัญ: พระภิกษุ, การสมรส

Abstract

The Civil and Commercial Code, Book 5, Family, does not have provisions to prohibit Buddhist monks to marry. Therefore, the fact that Buddhist monk marries by registering marriage will be perfect and will not be null and void. However, a Buddhist monk cohabits with female party to be married as husband and wife, such Buddhist monk shall quit from being a monk immediately because he commits offence against the Discipline seriously, as he commits major offence. While Buddhist monk registers marriage but he does not cohabit as husband and wife, marriage will be null and void, because marriage registration is deemed as the male party and the female party do not agree to be husband and wife (according to the Civil and Commercial Code, Section 1458). The fact that the law does not prohibit Buddhist monk to register marriage will cause legal and Discipline problems; there should be amendment of the Civil and Commercial Code and specifying the condition of marriage that “A man must not marry while he is a Buddhist monk.”

Keywords: Buddhist monk, marriage.

บทนำ

เมื่อคนสองคนตัดสินใจมาใช้ชีวิตคู่ร่วมกัน หรือตัดสินใจแต่งงานกัน จุดนี้ถือเป็นจุดเริ่มต้นของการมีชีวิตครอบครัวและเป็นที่มาของสถาบันครอบครัว ไม่ว่าการใช้ชีวิตอยู่ร่วมกันจะมีการการจดทะเบียนสมรสกันหรือไม่ชีวิตครอบครัวหรือสถาบันครอบครัวก็ได้เริ่มต้นแล้ว แต่ในมุมมองของกฎหมายแล้วการเป็นสถาบันครอบครัวจะต้องมีการจดทะเบียนสมรสตามประมวลกฎหมายแพ่งและพาณิชย์ มาตรา มาตรา 1457 “การสมรสตามประมวลกฎหมายนี้จะมีได้เฉพาะเมื่อได้จดทะเบียนแล้วเท่านั้น” เพราะการจดทะเบียนสมรสเป็นที่มาของความสัมพันธ์ระหว่างสามีภริยา ได้แก่ ความสัมพันธ์ในทางส่วนตัว เช่น สามีภริยาต้องอยู่กินด้วยกันฉันสามีภริยา สามีภริยาต้องช่วยเหลืออุปการะเลี้ยงดูกันตามความสามารถและฐานะของตน (ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1467) และความสัมพันธ์ในทางทรัพย์สินซึ่งมีการแบ่งทรัพย์สินออกเป็น 2 ประเภท ได้แก่ สินส่วนตัว (ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1471) และสินสมรส (ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1473) หรือความสัมพันธ์ระหว่างบิดามารดากับบุตร เช่น บิดามารดาจำต้องอุปการะเลี้ยงดูบุตร (ประมวลกฎหมายพ่งและพาณิชย์ มาตรา 1564) บุตรจำต้องอุปการะเลี้ยงดูบิดามารดา (ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1563) หรือบุตรมีสิทธิใช้ชื่อสกุลของบิดาในกรณีที่บิดาไม่ปรากฏ บุตรมีสิทธิใช้ชื่อสกุลของมารดา (ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1561) สำหรับ สิทธิ หน้าที่ ต่าง ๆ ดังที่กล่าวจะเกิดขึ้นเมื่อมีการจดทะเบียนสมรส ดังนั้นการจดทะบียนสมรสจึงเป็นจุดเริ่มต้นของสถาบันครอบครอบในทางกฎหมาย

วัตถุประสงค์

[1] คณะนิติศาสตร์ มหาวิทยาลัยศรีปทุม วิทยาเขตชลบุรี (0616549544 : jongruk_ponsongcarm@hotmail.com)

1. เพื่อศึกษาถึงพระวินัยที่มีผลต่อการสมรสของพระภิกษุ
2. เพื่อศึกษาถึงเงื่อนไขการสมรส ตามประมวลกฎหมายแพ่งและพาณิชย์
3. เพื่อวิเคราะห์ เสนอแนะ และแก้ไข เพิ่มเติม เงื่อนไขการสมรสของพระภิกษุ

กฎหมายที่เกี่ยวข้องกับการสมรสของพระภิกษุ

1. ประมวลกฎหมายแพ่งและพาณิชย์

สมรสประมวลกฎหมายแพ่งและพาณิชย์ได้กำหนดเงื่อนไขของการสมรส ไว้ 8 ประการ กล่าวคือ

1.1 เรื่องของอายุ

ประมวลกฎหมายแพ่งและพาณิชย์มาตรา 1448 บัญญัติว่า “การสมรสจะทำได้ต่อเมื่อชายและหญิงมีอายุสิบเจ็ดปีบริบูรณ์แล้ว แต่ในกรณีที่มีเหตุอันสมควร ศาลอาจอนุญาตให้ทำการสมรสก่อนนั้นได้”

การจดทะเบียนสมรสโดยชายหรือหญิง หรือทั้งชายและหญิง อายุไม่ครบ 17 ปีบริบูรณ์ ไม่ได้ทำให้การสมรสตกเป็นโมฆะ แต่เป็นเหตุให้การสมรสตกเป็นโมฆียะ (ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1503) ซึ่งผู้มีส่วนได้เสียสามารถฟ้องศาลเพื่อให้ศาลพิพากษาเพิกถอนการสมรสที่ตกเป็นโมฆียะเพื่อให้การสมรสสิ้นสุดลงได้ (ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1502)

1.2 เรื่องของการเป็นบุคคลวิกลจริตหรือไร้ความสามารถ

ประมวลกฎหมายแพ่งและพาณิชย์มาตรา 1449 บัญญัติว่า “การสมรสจะกระทำมิได้ถ้าชาย หรือหญิงเป็นบุคคลวิกลจริตหรือเป็นบุคคลซึ่งศาลสั่งให้เป็นคนไร้ความสามารถ”

การสมรสของชายหรือหญิงหรือทั้งชายและหญิง เป็นบุคคลวิกลจริตจะตกเป็นโมฆะตามประมวลกฎหมายแพ่งและพาณิชย์ 1495 บัญญัติว่า “การสมรสที่ฝ่าฝืนมาตรา 1449 มาตรา 1450 มาตรา 1452 และมาตรา 1458 เป็นโมฆะ” ซึ่ง คู่สมรส บิดามารดา หรือผู้สืบสันดานของคู่สมรส อาจร้องขอให้ศาลพิพากษาว่าการสมรสเป็นโมฆะได้ (ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1496)

1.3 การสมรสระหว่างญาติสืบสายโลหิต

ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1450 “ชายหญิงซึ่งเป็นญาติสืบสายโลหิตโดยตรงขึ้นไปหรือลงมาก็ดี เป็นพี่น้องร่วมบิดามารดาหรือร่วมแต่บิดาหรือมารดาก็ดี จะทำการสมรสกันไม่ได้ ความเป็นญาติดังกล่าวมานี้ให้ถือตามสายโลหิต โดยไม่คำนึงว่าจะเป็นญาติโดยชอบด้วยกฎหมายหรือไม่”

การสมรสของระหว่างญาติสืบสายโลหิตจะตกเป็นโมฆะ ตามประมวลกฎหมายแพ่งและพาณิชย์ 1495 บัญญัติว่า “การสมรสที่ฝ่าฝืนมาตรา 1449 มาตรา 1450 มาตรา 1452 และมาตรา 1458 เป็นโมฆะ” ซึ่ง คู่สมรส บิดามารดา หรือผู้สืบสันดานของคู่สมรส อาจร้องขอให้ศาลพิพากษาว่าการสมรสเป็นโมฆะได้ (ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1496)

1.4 การสมรสระหว่างผู้รับบุตรบุญธรรมกับบุตรบุญธรรม

ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1451 “ผู้รับบุตรบุญธรรมและบุตรบุญธรรมจะสมรสกันไม่ได้”

กรณีดังกล่าวหากมีการสมรสระหว่างผู้ผู้รับบุตรบุญธรรมกับบุญธรรม การสมรสสมบูรณ์ ไม่ได้ตกเป็นโมฆะหรือโมฆียะ แต่ประการใดแต่การสมรสที่ฝ่าฝืนเงื่อไขดังกล่าวทำให้ การรับบุตรบุญธรรมย่อมเป็นอันยกเลิก (ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1598/32)

1.5 การสมรสซ้อน

ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1452 “ชายหรือหญิงจะทำการสมรสในขณะที่ตนมีคู่สมรสอยู่ไม่ได้”

กรณีของการสมรสในขณะที่มีคู่สมรสหรือการสมรสซ้อนจะตกเป็นโมฆะ ตามประมวลกฎหมายแพ่งและพาณิชย์ 1495 บัญญัติว่า “การสมรสที่ฝ่าฝืนมาตรา 1449 มาตรา 1450 มาตรา 1452 และมาตรา 1458 เป็นโมฆะ” ซึ่งผู้มีส่วนได้เสียอาจกล่าวอ้างขึ้นหรือร้องขอให้ศาลพิพากษาว่าการสมรสเป็นโมฆะได้ก็ได้ (ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1497)

1.6 การสมรสใหม่กรณีสามีตาย

ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา1453 “หญิงที่สามีตายหรือที่การสมรสสิ้นสุดลงด้วยประการอื่นจะทำการสมรสใหม่ได้ต่อเมื่อการสิ้นสุดแห่งการสมรสได้ผ่านพ้นไปแล้วไม่น้อยกว่าสามร้อยสิบวัน เว้นแต่

(1) คลอดบุตรแล้วในระหว่างนั้น
(2) สมรสกับคู่สมรสเดิม
(3) มีใบรับรองแพทย์ประกาศนียบัตรหรือปริญญาซึ่งเป็นผู้ประกอบการรักษาโรค
(4) ในสาขาเวชกรรมได้ตามกฎหมายว่ามิได้มีครรภ์ หรือ
(5) มีคำสั่งของศาลให้สมรสได้”

การสมรสที่ฝ่าฝืนเงื่อนไขมาตรา 1453 กฎหมายไม่ได้บัญญัติถึงผลแห่งการฝ่าฝืนว่าจะมีผลอย่างไร ฉะนั้นจึงต้องถือว่าเป็นการสมรสที่สมบูรณ์ไม่ตกเป็นโมฆะหรือโมฆียะ

1.7 ความยินยอมของบิดามารดาหรือผู้ปกครอง

ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1454 “ผู้เยาว์จะทำการสมรสให้นำความในมาตรา 1436 มาใช้บังคับโดยอนุโลม”

ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1436 “ผู้เยาว์จะทำการหมั้นได้ต้องได้รับความยินยอมของบุคคลดังต่อไปนี้

(1) บิดาและมารดา ในกรณีที่มีทั้งบิดามารดา

(2) บิดาหรือมารดา ในกรณีที่มารดาหรือบิดาตายหรือถูกถอนอำนาจปกครองหรือไม่อยู่ในสภาพหรือฐานะที่อาจให้ความยินยอม หรือโดยพฤติการณ์ผู้เยาว์ไม่อาจขอความยินยอมจากมารดาหรือบิดาได้

(3) ผู้รับบุตรบุญธรรม ในกรณีที่ผู้เยาว์เป็นบุตรบุญธรรม

การจดทะเบียนสมรสโดยไม่ได้รับความยินยอม ตามมาตรา 1436 เป็นเหตุให้การสมรสตกเป็นโมฆียะ (ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1509) ซึ่งบิดาและมารดา ผู้รับบุตรบุญธรรม ผู้ปกครอง สามารถร้องขอต่อศาล (ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1510) เพื่อให้ศาลพิพากษาเพิกถอนการสมรสที่ตกเป็นโมฆียะให้การสมรสสิ้นสุดลงได้ (ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1502)

1.8 ความยินยอมเป็นสามีภริยา

ประมวลกฎหมายพ่งและพาณิชย์มาตรา 1458 “การสมรสจะทำได้ต่อเมื่อชายหญิงยินยอมเป็นสามีภริยากันและต้องแสดงการยินยอมนั้นให้ปรากฏโดยเปิดเผยต่อหน้านายทะเบียนและให้นายทะเบียนบันทึกความยินยอมนั้นไว้ด้วย”

การสมรสซึ่งชายหญิงไม่ได้ยินยอมเป็นสามีภริยาจะตกเป็นโมฆะ ตามประมวลกฎหมายแพ่งและพาณิชย์ 1495 บัญญัติว่า “การสมรสที่ฝ่าฝืนมาตรา 1449 มาตรา 1450 มาตรา 1452 และมาตรา 1458 เป็นโมฆะ” ซึ่ง คู่สมรส บิดามารดา หรือผู้สืบสันดานของคู่สมรสอาจร้องขอให้ศาลพิพากษาว่าการสมรสเป็นโมฆะได้ (ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1496)

จากที่กล่าวมาจะเห็นได้ว่าการสมรสที่ฝ่าฝืนเงื่อนไข 8 ประการดังกล่าวส่งผลในทางกฎหมายที่แตกต่างกันแต่เงื่อนไขของการสมรสดังกล่าวไม่ได้มีบทบัญญัติที่ห้ามพระภิกษุทำการสมรส ดังนั้นหากพิจารณาเฉพาะเงื่อนไขทั้ง 8 ประการดังกล่าวพระภิกษุก็น่าจะมีสิทธิจดทะเบียนสมรส

ระเบียบของทางราชการในการจดทะเบียนสมรส (สำนักบริหารการทะเบียน. (ออนไลน์). 2023.)

ในการจดทะเบียนสมรสมีระเบียบของทางราชการที่ได้กำหนดคุณสมบัติของบุคคลที่มีสิทธิในการจดทะเบียนสมรสไว้ดังนี้

คุณสมบัติของผู้ที่จะจดทะเบียนสมรส

1. ชายหรือหญิงมีอายุครบ 17 ปีบริบูรณ์ กรณีมีเหตุอันควร ศาลอาจอนุญาตให้ทำการสมรสก่อนที่ชายและหญิง มีอายุครบ 17 ปีบริบูรณ์ได้
2. ไม่เป็นบุคคลวิกลจริต หรือเป็นบุคคลซึ่งศาลสั่งให้เป็นคนไร้ความสามารถ
3. ไม่เป็นพี่น้องร่วมบิดามารดา หรือร่วมแต่บิดามารดา
4. ไม่เป็นคู่สมรสของบุคคลอื่น
5. ผู้รับบุตรบุญธรรมจะสมรสกับบุตรบุญธรรมไม่ได้
6. หญิงหม้ายจะสมรสใหม่ เมื่อการสมรสครั้งก่อนได้สิ้นสุดไปแล้วไม่น้อยกว่า 310 วัน เว้นแต่
   - คลอดบุตรแล้วในระหว่างนั้น
   - สมรสกับคู่สมรสเดิม
   - มีใบรับรองแพทย์ว่าไม่ได้ตั้งครรภ์
   - ศาลมีคำสั่งให้สมรสได้
   - มีคำสั่งของศาลให้สมรสได้
7. ผู้เยาว์จะทำการสมรสได้ต้องได้รับความยินยอมจากผู้มีอำนาจให้ความยินยอมได้ตามกฎหมาย

จากที่กล่าวมาจะเห็นได้ว่า ประมวลกฎหมายแพ่งและพาณิชย์ได้กำหนดเงื่อนไขของการสมรสไว้ 8 ประการ และระเบียบของทางราชการเกี่ยวกับการจดทะเบียนสมรสก็กำหนดไว้สอดคล้องกับประมวลกฎหมายแพ่งและพาณิชย์ ซึ่งไม่ปรากฏกรณีผู้ขอจดทะเบียนสมรสเป็นพระภิกษุ ว่าสามารถจดทะเบียนสมรสได้ หรือไม่

พระวินัย

การบวชเป็นพระภิกษุ มีพระวินัย 227 ข้อ ของพระ เป็นกฎหมายหรือข้อห้ามของพระภิกษุสงฆ์เถรวาทตามพระวินัยบัญญัติจัดอยู่ในส่วนอาทิพรหมจาริยกาสิกขา พระวินัย 227บทในพระปาฏิโมกข์ ที่พระพุทธเจ้าทรงวางข้อกำหนดไม่พึงละเมิดไว้เพื่อความเป็นระเบียบเรียบร้อยของคณะสงฆ์ และเพื่อเป็นข้อปฏิบัติพื้นฐานอันเอื้อเฟื้อต่อการประพฤติพรหมจรรย์ของพระภิกษุสงฆ์ มีโทษในการล่วงละเมิดร้ายแรงที่สุดถึงปาราชิก หรือขาดจากความเป็นพระสงฆ์ ดังนั้นพระวินัย 227 ไม่ใช่ศีลแต่เรียกว่า พระวินัย ผู้ทำผิดศีลเรียกว่าล่วงพระวินัย เป็น อาบัติ (วิกิพีเดีย (ออนไลน์) 2565)

คำว่า อาบัติ (อาปตฺติ) (K@POOK. (ออนไลน์) 2557) เป็นภาษาบาลี ซึ่งแปลตามรากศัพท์ว่า การต้อง การกระทบ หรือความหมายที่เข้าใจง่าย ๆ คือ ผิดศีล ศีลขาด (ใช้กับพระภิกษุสงฆ์เท่านั้น) การมีโทษที่เกิดจากการล่วงละเมิดในข้อ (พระวินัยบัญญัติ) ที่พระพุทธเจ้าทรงตรัสห้าม

โดยทั่วไปการอาบัติก็เหมือนการละเมิดข้อห้าม ศีลทั้ง 227 ข้อ ของพระสงฆ์ ซึ่งก็มีทั้งความผิดสถานเบาและสถานหนัก โดยการอาบัตินั้น มีทั้งหมด 7 ประเภท สามารถแยกย่อยเป็นความผิดโทษเบาและหนักได้ดังต่อไปนี้ (K@POOK. (ออนไลน์) 2557)

1. ครุกาบัติ หมายถึง อาบัติหนัก อาบัติที่มีโทษร้ายแรง มี 2 อย่าง คือ อาบัติปาราชิก อาบัติสังฆาทิเสส หากละเมิดปาราชิกต้องขาดจากความเป็นพระสงฆ์ ส่วนสังฆาทิเสส สามารถปลงอาบัติได้ต้องอยู่ “ปริวาสกรรม” (ทรมานตนตามระเบียบ)

1.1 อาบัติปาราชิก คำว่า “ปาราชิก” ปรากฏในกฎหมายของไทยมาแต่โบราณ ได้แก่ พระไอยการลักษณะผัวเมีย ในกฎหมายตราสามดวงที่ตราขึ้นในสมัยรัชกาลที่ 1 บัญญัติว่า “พระครูภิกษุสามเณรผิดเมียท่านถึงชำเราชื่อว่าปาราชิกให้สึกออกเสียแล้วปรับไหม...” และ “ถ้าพระครูภิกษุสามเณรผู้อยู่ในศีลทำทุราจานผิดกิจวิไนยทำร้ายด้วยหญิงบทผัวมิได้ ถึงชำเราเป็นสังไช้ชื่อว่าปาราชิกให้สึกออกลงโทษทวนด้วยลวดหนัง 25 ถึง 50 ที ส่งตัวลงหญ้าช้างหลวง ส่วนหญิงนั้นให้ทำโทษดุจหญิงทำชู้นอกใจผัวนักแล” (SILPA-MAGCOM. (ออนไลน์) 2564)

สำหรับปาราชิก มี 4 ข้อ อยู่ใน ศีล 227 ได้แก่ (วิกิพีเดีย (ออนไลน์) 2565)

(1) เสพเมถุน แม้กับสัตว์เดรัจฉาน (ร่วมสัมพันธ์ทางเพศกับมนุษย์ หรืออมนุษย์ หรือสัตว์ แม้แต่ซากศพก็ไม่ละเว้น)

(2) ถือเอาทรัพย์ที่เจ้าของไม่ได้ให้ มาเป็นของตน จากบ้านก็ดี จากป่าก็ดี (ขโมย) ได้ราคา 5 มาสก (5 มาสกเท่ากับ 1 บาท)

(3) พรากกายมนุษย์จากชีวิต (ฆ่าคน) แสวงหาและใช้เครื่องมือกระทำเอง หรือจ้างวานฆ่าคน หรือพูดพรรณาคุณแห่งความตายให้คนนั้น ๆ ยินดีที่จะตาย (โดยมีเจตนาหวังให้ตาย) ไม่เว้นแม้แต่การแท้งเด็กในครรภ์

(4) กล่าวอวดอุตริมนุสธรรมที่ไม่จริง อันเป็นความเห็นอย่างประเสริฐ อย่างสามารถ น้อมเข้าในตัวเองว่า เรารู้อย่างนี้ เราเห็นอย่างนี้ (ไม่รู้จริง แต่โอ้อวดความสามารถของตัวเอง)ยกเว้นเข้าใจตัวเองผิด

อาบัติปาราชิกทั้ง 4 นี้ เป็นอาบัติหนักที่เรียกว่า อเตกิจฉา คือแก้ไขไม่ได้เลยโทษของอาบัติปาราชิกพระภิกษุต้องอาบัติปาราชิกสี่ข้อใดข้อหนึ่ง แม้จะไม่กล่าวลาสิกขาบท ก็ถือว่าขาดจากความเป็นพระภิกษุทันที เมื่อความผิดสำเร็จ เมื่อขาดจากความเป็นพระแล้ว ก็ถือว่าไม่ใช่พระภิกษุอีกต่อไป ไม่สามารถอยู่ร่วมกับภิกษุอื่นหรือคณะหมู่สงฆ์ได้เลย ต้องลาสิกขาบทออกจากเป็นพระภิกษุทันที มิฉะนั้นจะกลายเป็นพวกอลัชชี (แปลว่า ผู้ไม่ละอาย นอกจากนั้นจะไม่สามารถกลับเข้ามาบวชใหม่ได้เลยตลอดชีวิต แม้จะบวชเข้ามาได้ก็ไม่ใช่พระภิกษุที่ถูกต้องตามพระธรรมวินัย

1.2 อาบัติสังฆาทิเสส (K@POOK. (ออนไลน์) 2557) สังฆาทิเสส ถือเป็นอาบัติหนักรองมาจาก ปาราชิก โดยมีทั้งหมด 13 ข้อ ดังนี้

(1) เตรสกัณฑ์ หมายถึง การห้ามมิให้ใช้มือในการสำเร็จความใคร่

(2) ห้ามจับต้องกายหญิง

(3) ห้ามพูดเกี้ยวหญิง

(4) ห้ามพูดล่อหญิงให้บำเรอตนด้วยกาม

(5) ห้ามชักสื่อ หมายถึง กล่าววาจาหรือแสดงท่าทีชักนำให้ผู้ได้ยินทะเลาะวิวาท หรือกินแหนงแคลงใจกัน

(6) ห้ามสร้างกุฏิด้วยการขอ กฎของการก่อกุฏิ ให้อยู่ในที่ไม่มีเจ้าของ ไม่มีชานรอบ ไม่มีใครจองไว้ เอื้อให้เป็นที่อยู่จำเพาะตนด้วยการขอ (สิ่งต่าง ๆ) เอาเอง พึงทำให้ได้ยาวไม่เกินประมาณ 12 คืบ กว้างไม่เกิน 7 คืบ

(7) ถ้าที่อยู่ซึ่งจะสร้างขึ้นนั้น มีทายกเป็นเจ้าของ ทำให้เกินประมาณนั้นได้ แต่ต้องให้สงฆ์ แสดงที่ให้ก่อน

(8) ห้ามยุยงและแกล้งโจทย์ภิกษุอื่นด้วยอาบัติปาราชิก

(9) ห้ามใส่ความโจทย์ภิกษุอื่นด้วยอาบัติปาราชิก

(10) ห้ามทำให้พระสงฆ์แตกกัน

(11) เมื่อมีภิกษุอื่นตักเตือนให้ตั้งใช้ฟังสงฆ์สวด ก็มิได้ปฏิบัติตาม ถือเป็นความผิด

(12) เมื่อมีภิกษุอื่นตักเตือน และให้สงฆ์นั้นสวดกรรมเพื่อจะให้ละประพฤตินั้น ถ้าไม่ยอมสวดกรรมแก้การละเมิด ถือเป็นความผิด

(13) ประจบคฤหัสถ์ หมายถึง ห้ามกล่าววาจาไม่ดีถึงสถาบันสงฆ์รวมถึงสงฆ์ที่ไม่ได้อยู่วัดแล้ว ถือเป็นความผิด

2. ลหุกาบัติ หมายถึง อาบัติเบา อาบัติที่ไม่มีโทษร้ายแรงเท่าครุกาบัติ มี 5 อย่าง คือ อาบัติถุลลัจจัย อาบัติปาจิตตีย์ อาบัติปาฏิเทสนียะ อาบัติทุกกฏ อาบัติทุพภาสิต เป็นความผิดที่ปลงอาบัติได้ เพียงสำรวมควบคุมสติ และร่วมเข้าพิธีปลงอาบัติของสงฆ์ที่มักทำในวันโกน

แม้การสมรสโดยการจดทะเบียนสมรสตามประมวลกฎหมายแพ่งและพาณิชย์ไม่ถือว่าเป็นการผิดพระวินัย เพราะพระวินัย 227 ข้อ ไม่ได้ห้ามเอาไว้โดยตรง แต่ผลของการจดทะเบียนสมรสก่อให้เกิดสิทธิหน้าที่ของการเป็นสามีภริยาซึ่งอาจส่งผลต่อการผิดพระวินัยดังจะได้กล่าวในหัวข้อต่อไป

พระราชบัญญัติคณะสงฆ์ พ.ศ. 2505

พระราชบัญญัติคณะสงฆ์ พ.ศ. 2505 มีบทบัญญัติของกฎหมายที่เกี่ยวกับการพ้นสภาพการเป็นพระภิกษุเพราะการฝ่าฝืนพระวินัยที่น่าสนใจ ได้แก่

มาตรา 26 พระภิกษุรูปใดล่วงละเมิดพระธรรมวินัยและได้มีคำวินิจฉัยถึงที่สุดให้ได้รับนิคหกรรมให้สึก ต้องสึกภายในยี่สิบสี่ชั่วโมงนับแต่เวลาที่ได้ทราบคำวินิจฉัยนั้น

นิคหกรรม (วัดโมลีโลกยาราม. (ออนไลน์) 2563) หมายถึง การลงโทษตามพระธรรมวินัยเรียกว่า ปรับอาบัติ โดยโทษมี 3 สถาน คือ โทษอย่างหนัก 1 โทษอย่างกลาง 1 โทษอย่างเบา 1

โทษอย่างหนักนั้น ในพระวินัยเรียกว่า อเตกิจฉา ในพระราชบัญญัตินี้ เรียกว่า นิคหกรรมให้สึก คือ อาบัติปาราชิกทั้ง 4 ซึ่งเป็น “ครุกาบัติ” ซึ่งเป็นอาบัติหนักที่เรียกว่า อเตกิจฉา คือแก้ไขไม่ได้เลยโทษของอาบัติปาราชิกพระภิกษุต้องอาบัติปาราชิกสี่ข้อใดข้อหนึ่ง แม้จะไม่กล่าวลาสิกขาบท ก็ถือว่าขาดจากความเป็นพระภิกษุทันที เมื่อความผิดสำเร็จ ส่วนโทษอย่างกลางและอย่างเบาในพระวินัยเรียกว่า สเตกิจฉา ในพระราชบัญญัตินี้เรียกว่า นิคหกรรมไม่ถึงให้สึกและหมายถึงการลงโทษตามพระวินัยอย่างอื่น เช่น อุกเขปนียกรรม ก็ได้

วิเคราะห์ปัญหาการสมรสของพระภิกษุ

1. ปัญหาเกี่ยวกับผลแห่งการสมรสของพระภิกษุ

จากที่ได้กล่าวมาจะเห็นได้ว่า การสมรสที่เป็นโมฆะมีได้เฉพาะ ตามที่บัญญัติไว้ในประมวลกฎหมายแพ่งและพาณิชย์ เท่านั้น ตามมาตรา 1494 บัญญัติว่า “การสมรสจะเป็นโมฆะก็แต่เฉพาะที่บัญญัติไว้ในหมวดนี้” และการสมรสที่ตกเป็นโมฆะเป็นการสมรสที่ฝ่าฝืนเงื่อนไขการสมรสตามที่บัญญัติไว้ใน มาตรา 1495 บัญญัติว่า “การสมรสที่ฝ่าฝืนมาตรา 1449 มาตรา 1450 มาตรา 1452 และมาตรา 1458 เป็นโมฆะ”

จากบทบัญญัติ มาตรา 1494 และมาตรา 1495 จะเห็นได้ว่าการสมรสของพระภิกษุ ประมวลกฎหมายแพ่งและพาณิชย์ไม่ได้บัญญัติไว้ว่าตกเป็นโมฆะประกอบกับระเบียบของทางราชการในการจดทะเบียนสมรส ดังที่กล่าวไว้ในข้อที่ 2 ไม่ห้ามพระภิกษุจดทะเบียนสมรส ดังนั้นการสมรสของพระภิกษุจึงน่าจะสมบูรณ์

อย่างไรก็ตามการสมรสของพระภิกษุนั้นมีนักกฎหมายให้ความเห็นว่า น่าจะเป็นการทำนิติกรรมที่มีวัตถุประสงค์ขัดต่อความสงบเรียบร้อยหรือศีลธรรมอันดีของประชาชน ตามมาตรา 150 (คำอธิบายประมวลกฎหมายแพ่งและพาณิชย์ บรรพ 5 ว่าด้วยครอบครัว (ชาติชาย อัครวิบูลย์, 2552) การสมรสดังกล่าวน่าจะตกเป็นโมฆะ ทั้งนี้ก็น่าจะเนื่องมาจากว่า การสมรสกรณีเป็นพระภิกษุ เป็นการกระทำที่ต้องห้ามตามกฎหมายเก่าคือพระอัยการลักษณะผัวเมีย บทที่ 40 ซึ่งห้ามไว้ชัดเจนว่าถ้าหากชายเป็นพระภิกษุสามเณรผิดเมียผู้อื่นถึงชำเราได้ชื่อว่าปาราชิกให้สึกออกและให้ปรับไหมด้วย (ดวงจิตต์ กำประเสริฐ. 2531)

ความเห็นดังกล่าวยังไม่มีคำพิพากษาศาลฎีกาตัดสินเอาไว้เป็นบรรทัดฐานประกอบกับประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1494 บัญญัติว่า “การสมรสจะเป็นโมฆะก็แต่เฉพาะที่บัญญัติไว้ในหมวดนี้” ซึ่งการสมรสของพระภิกษุประมวลกฎหมายแพ่งและพาณิชย์ บรรพ 5 ไม่ได้บัญญัติไว้ว่าตกเป็นโมฆะในขณะที่จากการศึกษาพบว่าพระอัยการลักษณะผัวเมีย บทที่ 40 ซึ่งเป็นกฎหมายเก่าได้บัญญัติห้ามไว้ชัดเจน แต่เมื่อมีการประกาศ ใช้ประมวลกฎหมายแพ่งและพาณิชย์กลับไม่มีเงื่อนไขการสมรส กรณีของพระภิกษุแต่ประการใด

กรณีดังกล่าวจึงเกิดความไม่แน่นอนว่าการสมรสของพระภิกษุจะตกเป็นโมฆะหรือไม่

2. ปัญหาเกี่ยวกับการกล่าวอ้างการสมรสที่ตกเป็นโมฆะ

การสมรสของพระภิกษุ หากตกเป็นโมฆะ ตามประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 150 ตามความเห็นของนักกฎหมายดังที่กล่าวในเรื่องครุกาบัติ กรณีก็เกิดปัญหาว่าการสมรสที่ตกเป็นโมฆะ จะต้องฟ้องศาล ตามมาตรา 1496 ซึ่งบัญญัติว่า “คำพิพากษาของศาลเท่านั้นที่จะแสดงว่า การสมรสที่ฝ่าฝืนมาตรา 1449 มาตรา 1450 และมาตรา 1458 เป็นโมฆะ” หรือผู้มีส่วนได้เสียสามารถกล่าวอ้างได้ ตามประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 172 ซึ่งบัญญัติว่า “โมฆะกรรมนั้นไม่อาจให้สัตยาบันแก่กันได้ และผู้มีส่วนได้เสียคนหนึ่งคนใดจะยกความเสียเปล่าแห่งโมฆะกรรมขึ้นกล่าวอ้างก็ได้”

สำหรับความเห็นของผู้เขียนเห็นว่า การกล่าวอ้างความเป็นโมฆะของการสมรส ไม่ว่าจะเป็นกรณีใดจะต้องมีกาสรฟ้องศาลเพื่อให้ศาลมีคำพิพากษาแสดงว่าการสมรสเป็นโมฆะ ตามประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1496 ไม่น่าจะนำการกล่าวอ้างความเป็นโมฆะ ตามมาตรา 172 มาใช้กับการสมรสได้ ด้วยเหตุผลดังต่อไปนี้

(1) การสมรสที่ตกเป็นโมฆะ ประมวลกฎหมายแพ่งแลพาณิชย์ บรรพ 5 ว่าด้วยครอบครัว บทบัญญัติไว้เป็นกรณีเฉพาะคือ มาตรา 1496 กรณีดังกล่าวจะนำบทกฎหมายทั่วไป คือ มาตรา 172 มาใช้บังคับไม่ได้

(2) การสมรสที่ตกเป็นโมฆะมีผลแต่กต่างจากการทำนิติกรรมที่ตกเป็นโมฆะเพราะการทำนิติกรรมที่ตกเป็นโมฆะ ไม่สามารถกล่าวอ้างนิติกรรมหรือสัญญาดังกล่าวได้เลย ในขณะที่การสมรสที่ตกเป็นโมฆะ ไม่ก่อให้เกิดความสัมพันธ์ในทางทรัพย์สินตาม มาตรา 1498 บัญญัติว่า “การสมรสที่เป็นโมฆะ ไม่ก่อให้เกิดความสัมพันธ์ทางทรัพย์สินระหว่างสามีภริยา” กล่าวคือ ทรัยพ์สินที่เกิดในระหว่างสมรสไม่ถือว่าเป้นสินสมรส

อย่างไรก็ตามแม้การสมรสที่ตกเป็นโมฆะจะไม่ก่อให้เกิดความสัมพันธ์ในทางทรัพย์สินดังกล่าวแต่ความสัมพันธ์เกี่ยวกับบุคคลผู้ทำการสมรส บางประการก็มีผลในทางกฎหมาย เช่น คู่สมรสที่กระทำการโดยสุจริตไม่ทำให้เสื่อมเสียสิทธิที่ได้มาเพราะการสมรส (ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1499) เช่น สิทธิในการหักค่าลดหย่อนภาษี หรือของหมั้นที่ตกได้แก่หญิงเมื่อมีการหมั้น รวมถึงสิทธิในการรับมรดกของคู่สมรสที่ถึงแก่ความตาย เว้นแต่การสมรสที่ตกเป็นโมฆะเพราะเป็นการสมรสในขณะที่มีคู่สมรสหรือสมรสซ้อน แม้คู่สมรสจะสุจริต ก็ไม่ก่อให้เกิดสิทธิในการรับมรดก (ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1499 วรรค 2)

นอกจากนี้แล้วการสมรสที่ตกเป็นโมฆะไม่มีผลกระทบกระเทือนถึงการเป็นบุตรที่ชอบด้วยกฎหมาย ตามมาตรา 1536 บัญญัติว่า “ เด็กเกิดแต่หญิงขณะเป็นภริยาชายหรือภายในสามร้อยสิบวัน นับแต่วันที่กาสมรสสิ้นสุดลง ให้สันนิษฐานไว้ก่อนว่าเป็นบุตรชอบด้วยกฎหมายของชายผู้เป็นสามี หรือเคยเป็นสามี แล้วแต่กรณี

ให้นำความในวรรคหนึ่งมาใช้บังคับแก่บุตรที่เกิดจากหญิงก่อนที่ได้มีคำพิพากษาถึงที่สุดของศาลแสดงว่าการสมรสเป็นโมฆะหรือภายในระยะเวลาสามร้อยสิบวันนับแต่วันนั้น”

จากที่กล่าวมาจะเห็นได้ว่าความเป็นโมฆะของการสมรสมีลักษณะที่แตกต่างจากการตกเป็นโมฆะในเรื่องของนิติกรรม หลายประการ ประมวลกฎหมายแพ่งและพาณิชย์จึงบัญญัติให้การกล่าวอ้างโมฆะของการสมรสจะต้องมีการฟ้องศาล เพื่อให้ศาลพิจารณาถึงสาเหตุของการสมรสที่ตกเป็นโมฆะและพิจารณาถึงความสัมพันธ์ในทางส่วนตัวของคู่สมรสและบุคคลที่เกี่ยวข้องกับคู่สมรส เช่น บุตรของคู่สมรส

ดังนั้นการสมรสของพระภิกษุ แม้จะตกเป็นโมฆะ ตามมาตรา 150 ผู้มีส่วนได้เสียก็ไม่น่าจะสามารถกล่าวอ้าง ตามมาตรา 172 ได้ควรจะต้องฟ้องศาลเท่านั้น แต่เมื่อมีการฟ้องศาลเพื่อให้ศาลเพิกถอนการสมรสที่ตกเป็นโมฆะกรณีพระภิกษุสมรส ผู้ที่ถูกโต้แย้งสิทธิจะอ้างกฎหมายบทใดในการฟ้องศาลเพราะการฟ้องเพิกถอนการสมรส มาตรา 1496 ไม่ได้บัญญัติถึงการสมรสของพระภิกษุแต่ประการใด

3 . การสมรสของพระภิกษุกับพระวินัย

3.1 กรณีที่พระภิกษุไม่ได้อยู่กินด้วยกันฉันสามีภริยา

คู่สมรสที่จดทะเบียนสมรส ประมวลกฎหมายแพ่งและพาณิชย์บัญญัติไว้ใน มาตรา 1461 “สามีภริยาต้องอยู่กินด้วยกันฉันสามีภริยา

สามีภริยาต้องช่วยเหลืออุปการะเลี้ยงดูกันตามความสามารถและฐานะของตน”

จากบทบัญญัติดังกล่าวการอยู่กินด้วยกันฉันสามีภริยา หมายถึง การอยู่กินด้วยกัน มีความสัมพันธ์ทางเพศเพื่อให้ครอบครัวมีสมาชิก ดังนั้นจึงต้องมีการร่วมหลับนอนและเชิดชูยกย่องฐานะของอีกฝ่ายหนึ่งฉันสามีภริยา (ชาติชาย อัครวิบูลย์. 2552)

ดังนั้นหากพระภิกษุไม่ได้อยู่กินด้วยกันฉันสามีภริยาเพียงแต่มีการจดทะเบียนสมรสเท่านั้น กรณีดังกล่าวอาจจะถือว่าสมรสดังกล่าวเป็นการสมรสที่ชายหญิงมิได้ยินยอมเป็นสามีภริยาตามมาตรา 1458 ซึ่งทำให้การสมรสตกเป็นโมฆะ ตามมาตรา 1495

คำพิพากษาฎีกาที่ 1067/2545 “การสมรสจะทำได้ต่อเมื่อชายและหญิงยินยอมเป็นสามีภริยากัน โดยทั้งสองคนตกลงจะเป็นบุคคลในครอบครัวเดียวกัน ต้องอยู่กินด้วยกันฉันสามีภริยาทั้งในทางธรรมชาติและกฎหมาย ได้ดูแลความทุกข์สุข เจ็บป่วยซึ่งกันและกันต้องช่วยเหลืออุปการะเลี้ยงดูกันตามความสามารถและฐานะของตน การที่จำเลยจดทะเบียนสมรสกับ ช. แต่ไม่ได้พักอาศัยอยู่ด้วยกัน เมื่อ ช. ป่วย โจทก์เป็นผู้พา ช. ไปโรงพยาบาลและเสียค่ารักษาพยาบาลให้ และยังให้ ช. ไปพักอาศัยอยู่ด้วย ส่วนจำเลยยังคงพักอาศัยอยู่กับน้องสาวและไม่เคยออกค่ารักษาพยาบาลทั้งไม่เคยมาเยี่ยมเยียน ช. เลย เห็นได้ชัดว่าจำเลยกับ ช. มิได้อยู่กินด้วยกันฉัน

สามีภริยาแต่อย่างใด จำเลยเองก็ยังรับว่าไม่อยากไปจดทะเบียนสมรส แต่ ช. เป็นผู้พาไปโดยบอกว่าถ้าไม่จดทะเบียนสมรสแล้วจะไม่มีผู้ใดมีสิทธิรับเงินบำเหน็จตกทอด ซึ่งก็ปรากฏว่าเมื่อ ช. ถึงแก่กรรมจำเลยเป็นผู้ได้รับเงินบำเหน็จตกทอดมาจริง แสดงว่าจำเลยจดทะเบียนสมรสกับ ช. โดยมิได้มีเจตนาที่จะเป็นสามีภริยากันมาแต่แรก หากแต่เป็นการกระทำเพื่อให้มีสิทธิรับเงินบำเหน็จตกทอดเท่านั้น การสมรสของจำเลยจึงฝ่าฝืนต่อบทบัญญัติแห่งประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1458 ตกเป็นโมฆะตามมาตรา 1495”

ดังนั้นหากเป็นการจดทะเบียนสมรสกันโดยที่ไม่ได้อยู่กินด้วยกันฉันสามีภริยา เช่นภายหลังจากกาสมรสแล้วพระภิกษุก็ไปจำพรรษาอยู่ที่วัด ไม่ได้อยู่กินด้วยกันฉันสามีภริยากับภริยาที่จดทะเบียนแต่ประการใด การสมรสของพระภิกษุก็ไม่นาจะเป็นการผิดพระวินัย แต่การสมรสดังกล่าวก็อาจจะตกเป็นโมฆะเพราะถือว่าการสมรสนั้น ชายหญิงมิได้ยินยอมเป็นสามีภริยากัน ตามประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1452 ประกอบกับมาตรา 1495

3.2 กรณีพระภิกษุอยู่กินด้วยกันฉันสามีภริยา

การที่พระภิกษุอยู่กินด้วยกันฉันสามีภริยา แม้จะไม่มีการร่วมประเวณีแต่หากมีพูดเกี้ยวหญิง พูดล่อหญิงให้บำเรอตนด้วยกาม หรือมีการแตะเนื้อต้องตัวหญิงซึ่งแม้เป็นภริยาตนก็เป็นการกระทำที่เป็นอาบัติซึ่งเป็น อาบัติสังฆาทิเสส ซึ่งเป็น “ครุกาบัติ” ที่มีโทษร้ายแรงแม้ไม่ต้องขาดจากความเป็นพระสงฆ์เพราะสามารถปลงอาบัติได้ ต้องอยู่ “ปริวาสกรรม” (ทรมานตนตามระเบียบ) ก็เป็นการกระทำที่ไม่เหมาะสม

ประการสำคัญ หากพระภิกษุสงฆ์ที่อยู่กินด้วยกันฉันสามีภริยามีการร่วมประเวณีเมื่อใดก็จะถือว่าพระภิกษุนั้นกระทำการอาบัติที่มีโทษร้ายแรง คือ อาบัติปาราชิกซึ่งเป็น “ครุกาบัติ” อันเป็นอาบัติหนักที่เรียกว่า อเตกิจฉา คือแก้ไขไม่ได้เลยและต่อมาพระภิกษุรูปที่ล่วงละเมิดพระธรรมวินัยในข้อดังกล่าวมีคำวินิจฉัยถึงที่สุดให้ได้รับนิคหกรรมให้สึก พระภิกษุรูปดังกล่าวต้องสึกภายในยี่สิบสี่ชั่วโมงนับแต่เวลาที่ได้ทราบคำวินิจฉัยนั้นตามที่บัญญัติไว้ในพระราชบัญญัติคณะสงฆ์ พ.ศ. 250 มาตรา 26

อย่างไรก็ตามแม้พระภิกษุรูปดังกล่าวจะไม่กล่าวลาสิกขาบทเนื่องจากไม่ยอมลาสิกขาหรือยังไม่มีคำวินิจฉัยอันถึงที่สุด ตามพระราชบัญญัติคณะสงฆ์ พ.ศ. 2505 มาตรา 26 ตามพระวินัยก็ถือว่าขาดจากความเป็นพระภิกษุทันที เมื่อความผิดสำเร็จ เมื่อขาดจากความเป็นพระแล้ว ก็ถือว่าไม่ใช่พระภิกษุอีกต่อไป ไม่สามารถอยู่ร่วมกับภิกษุอื่นหรือคณะหมู่สงฆ์ได้เลย ต้องลาสิกขาบทออกจากเป็นพระภิกษุทันที (วิกิพีเดีย. (ออนไลน์) 2565)

อย่างไรก็ตามการที่พระภิกษุต้องอาบัติปาราชิกแม้จะพ้นจากการเป็นพระภิกษุแต่ก็ไม่น่าจะส่งผลต่อการสมรส หากการสมรสนั้นชอบด้วยกฎหมาย

สรุป

จากที่กล่าวมาสรุปได้ว่าประมวลกฎหมายแพ่งและพาณิชย์ไม่มีบทบัญญัติห้ามพระภิกษุทำการสมรสแต่ประการใด ดังนั้นการที่พระภิกษุทำการสมรสโดยการจดทะเบียนการสมรสนั้นน่าจะสมบูรณ์ไม่ตกเป็นโมฆะเพราะการสมรสที่จะตกเป็นโมฆะ มีได้เฉพาะที่บัญญัติไว้ในประมวลกฎหมายแพ่งและพาณิชย์ (ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1494) อย่างไรก็ตามการสมรสที่ตกเป็นโมฆะหากพระภิกษุอยู่กินด้วยกันฉันสามีภริยากับคู่สมรสพระภิกษุดังกล่าวก็จะพ้นจากการเป็นพระภิกษุทันทีเพราะการอยู่กินด้วยกันฉันสามีภริยา เป็นกากรระทำที่จะผิดวินัยอย่างร้ายแรง คือ อาบัติปาราชิก แต่ไม่กระทบต่อการจดทะเบียนสมรส หากพระภิกษุจดทะเบียนสมรสแต่ไม่ได้อยู่กินด้วยกันฉันสามีภริยาการสมรสดังกล่าวน่าจะตกเป็นโมฆะเพราะถือว่าการจดทะเบียนสมรสดังกล่าว ชายหญิงไม่ได้ยินยอมเป็นสามีภริยากัน(ประมวลกฎหมายแพ่งและพาณิชย์ มาตรา 1458)

ข้อเสนอแนะ

ควรมีการแก้ไขเพิ่มเติมประมวลกฎหมายแพ่งและพาณิชย์โดยการกำหนดเงื่อนไขของการสมรสมว่า “ชายจะทำการสมรสในขณะที่เป็นพระภิกษุไม่ได้”

อำนาจของวุฒิสภาไทยที่มีต่อฝ่ายบริหารและที่มาของวุฒิสภาไทย : ศึกษาจากแนวคิดของกฎหมายประเทศอังกฤษ

The Power of the Thai Senate over the Executive Branch and the Origin of the Thai Senate : A Study from the Concept of the UK Law.

กิตติพันธ์ รัตนโชติ, (Kittiphan Rattanachot)[1]
ภาวิตา ค้าขาย, (Pawita Kakhai)[2]
สุรศักดิ์ มีบัว, (Surasak Meebua)[3]

บทคัดย่อ

วุฒิสภา ถือเป็นองค์กรฝ่ายนิติบัญญัติซึ่งเป็นองค์กรผู้ใช้อำนาจอธิปไตย โดยมีหน้าที่สำคัญในการตรากฎหมายให้รัดกุม ชัดเจน และให้กฎหมายที่จะบังคับกับประชาชนมีความถูกต้องและเป็นธรรมมากที่สุด แต่วุฒิสภาชุดปัจจุบัน ซึ่งถือเป็นวุฒิสภาชุดแรกหลังจากที่รัฐธรรมนูญแห่งราชอาณาจักรไทย พุทธศักราช 2560 มีผลใช้บังคับและรัฐสภามีวุฒิสภาขึ้น ก็สร้างความไม่พอใจของประชาชนผู้เป็นเจ้าของอำนาจอธิปไตยในการคัดค้านที่มาของสมาชิกวุฒิสภาชุดปัจจุบัน ทั้งยังคัดค้านบทบัญญัติของรัฐธรรมนูญว่าด้วยอำนาจของสมาชิกวุฒิสภาที่มีอำนาจลงมติเลือกประมุขฝ่ายบริหาร ทั้งยังมีปัญหาในเรื่องคุณสมบัติเฉพาะของผู้ดำรงตำแหน่งวุฒิสภาชุดแรกอีกด้วย

การศึกษาครั้งนี้มีวัตถุประสงค์ 3 ประการ ได้แก่ 1. เพื่อศึกษาปัญหาและข้อเปรียบเทียบของอำนาจวุฒิสภาประเทศไทยที่มีต่อฝ่ายบริหารกับวุฒิสภาของประเทศอังกฤษ 2. เพื่อศึกษาที่มาของวุฒิสภาประเทศไทยกับวุฒิสภาของประเทศอังกฤษ3. เพื่อศึกษาคุณสมบัติของผู้ดำรงตำแหน่งสมาชิกวุฒิสภาประเทศไทยกับวุฒิสภาของประเทศอังกฤษ โดยใช้วิธีการวิจัยเชิงคุณภาพ (Qualitative Research) ด้วยวิธีการเก็บรวบรวมข้อมูลเอกสาร ผลการศึกษา พบว่าประเทศไทยอำนาจวุฒิสภาที่มีต่อฝ่ายบริหารมีมากกว่าวุฒิสภาของประเทศอังกฤษ ทั้งที่มาแม้จะคล้ายคลึงกันแต่ก็มีกระบวนการสรรหาที่แตกต่างกันโดยสิ้นเชิง และแม้คุณสมบัติของวุฒิสภาประเทศไทยในปัจจุบันจะมีความหลากหลายมากกว่าวุฒิสภาของประเทศอังกฤษในแง่ของคุณวุฒิผู้ดำรงตำแหน่งวุฒิสภา

ดังนั้น จึงควรแก้ไขปรับปรุงกฎหมายให้มีความรัดกุม เป็นธรรม และเป็นที่ยอมรับของประชาชนเพื่อไม่ให้เป็นที่ครหาของประชาชนผู้เป็นเจ้าของอำนาจอธิปไตย ทั้งควรกำหนดให้วุฒิสภามีอำนาจหน้าที่ในการดำเนินการเพื่อให้บรรลุวัตถุประสงค์ตามเจตนารมณ์ในการตรวจสอบและกลั่นกรองกฎหมาย หาควรนำวุฒิสภามาเป็นเครื่องมือเพื่อให้กลุ่มบุคคลใดเพียงบุคคลหนึ่งเข้าสู่อำนาจในการบริหารประเทศในฐานะนายกรัฐมนตรีไม่

คำสำคัญ: วุฒิสภา, ฝ่ายบริหาร, ที่มาของวุฒิสภาไทย

Abstract

The Senate is regarded as a legislative organisation that exercises sovereign power with an important duty in enacting legislation concisely and clearly as well as ensuring that the laws enforced on the people are as accurate and fair as possible. However, the current Senate, considered as the first Senate after the Constitution of the Kingdom of Thailand B.E. 2560 that comes into force and the National Assembly has a Senate, has created dissatisfaction among the people who occupy the sovereign power in opposing the origin of the current senators. It also opposes a constitutional provision on the power of senators to vote for the head of the executive branch. Moreover, there are problems with the specific qualifications of the first Senate incumbent as well.

This study has 3 objectives: 1. to study the problems and comparisons of the power of the Thai Senate with the executive branch and the British Senate; 2. to study the origins of the Thai Senate and the British Senate;

3. To study the qualifications of senators in Thailand and the Senate of the UK by using the qualitative research method to collect document data. The study found that, in Thailand, the power of the Senate over the executive branch is greater than the Senate of the UK. Despite the similar origins, the recruitment process is completely different even though the qualifications of the Thai Senate today are more diverse than the British Senate in terms of qualifications for senate holders.

Therefore, the law should be amended to be more concise, fair, and acceptable to the people so as not to be condemned by the people who own the sovereign power. In addition, the Senate should be empowered to act in order to achieve its intended objectives in examining and scrutinizing the law but not to be used as a tool for a single group of people to come into power to rule the country as a Prime Minister.
Keyword: Senate, executive branch, the origin of the Thai Senate

บทนำ

ในปัจจุบันสังคมไทยมักมีเรื่องการเมืองเข้ามาแทรกซึมอยู่ในกิจวัตรประจำวันของประชาชน ไม่จำกัดแค่เพียงผู้ใหญ่หรือผู้สูงอายุแต่เพียงเท่านั้น แต่หากกล่าวถึงเด็กหรือเยาวชนที่ยังไม่บรรลุนิติภาวะ ก็มีแนวคิดและความสนใจเรื่องการเมืองระดับประเทศเป็นจำนวนไม่น้อย จึงเห็นได้จากการจัดการชุมนุมหรือประท้วงรัฐบาลได้มีเด็กหรือเยาวชนปรากฏตัวและอยู่ร่วมการชุมนุมจำนวนมาก และในทุกการปราศรัยของผู้ชุมนุมจะมีคำปราศรัยที่กล่าวหาและว่าร้ายวุฒิสภาไทยในยุคปัจจุบัน โดยหนึ่งในข้อครหานั้นก็คือ วุฒิสภายุคปัจจุบันไม่ได้มาจากเสียงของประชาชนอย่างแท้จริง โดยหากเปรียบเทียบอดีตจนถึงปัจจุบันก็มีสมาชิกวุฒิสภาที่มาจากการเลือกตั้งของประชาชนเป็นจำนวนไม่น้อย เหตุที่ประชาชนเล็งเห็นถึงการได้มาของวุฒิสภาควรมาจากประชาชนและมาจากการเลือกตั้ง เพราะประชาชนคือเจ้าของอำนาจอธิปไตยที่แท้จริง[1] อีกทั้งในแง่มุมของทฤษฎีสากล กล่าวคือ ทฤษฎีสัญญาประชาคม ได้กล่าวไว้ว่าประชาชนคือผู้ที่ได้แสดงเจตนาร่วมกันสร้างกฎหมาย กฎเกณฑ์ให้ผู้มีอำนาจมาใช้อำนาจรัฐในการบริหารประเทศซึ่งถือเป็นเจตนารมณ์ร่วมกันของประชาชนในการมอบอำนาจให้รัฐออกกฎเกณฑ์และใช้อำนาจต่าง ๆ ได้[2] แต่ที่มาของวุฒิสภาไทยยุคปัจจุบันหาได้ถูกต้องตามทฤษฎีของสากลแต่อย่างใดไม่ จึงทำให้ประชาชนในปัจจุบันไม่ให้ความเคารพนับถือและเห็นชอบกับวุฒิสภาที่มีอำนาจอยู่ในทุกวันนี้ และยิ่งไปกว่านั้น รัฐธรรมนูญไทยฉบับปัจจุบันได้ให้อำนาจของวุฒิสมาชิกในการลงมติเลือกนายกรัฐมนตรีอีกด้วย จึงทำให้เกิดปัญหาต่าง ๆ ตามมา อาทิ วุฒิสภา ไม่ได้มาจากการเลือกตั้งของประชาชนแล้วจะมีสิทธิในการลงมติเลือกนายกรัฐมนตรีได้อย่างไร วุฒิสภาชุดปัจจุบันมีที่มาโดยชอบด้วยกฎหมายหรือไม่ ประเทศไทยควรมีวุฒิสภาหรือไม่ เป็นต้น ด้วยเหตุผลดังกล่าว ผู้เขียนจึงได้สนใจศึกษาอำนาจของวุฒิสภาไทยที่มีต่อฝ่ายบริหารและที่มาของวุฒิสภาไทย ว่ามีการบัญญัติถึงอำนาจของวุฒิสภาไว้อย่างไร เพื่อนำข้อมูลและแนวคิด มาหาข้อสรุปต่อไป

โจทย์วิจัย/ปัญหาวิจัย

อำนาจของวุฒิสภาไทยที่มีต่อฝ่ายบริหารควรบัญญัติอย่างไรไม่ให้เป็นที่ครหาของประชาชน และที่มาของวุฒิสภาไทยชุดปัจจุบันควรมีการแก้ไขบทบัญญัติของรัฐธรรมนูญว่าด้วยการได้มาซึ่งสมาชิกวุฒิสภาตามบทเฉพาะกาลหรือไม่ โดยให้เกิดจากความชอบธรรมในการเข้าสู่ตำแหน่งของสมาชิกวุฒิสภาและไม่ให้กระทบต่อความเชื่อมั่นของประชาชน

วัตถุประสงค์การวิจัย

1. เพื่อศึกษาปัญหาและข้อเปรียบเทียบของอำนาจวุฒิสภาประเทศไทยที่มีต่อฝ่ายบริหารกับวุฒิสภาของประเทศอังกฤษ
2. เพื่อศึกษาที่มาของวุฒิสภาประเทศไทยกับวุฒิสภาของประเทศอังกฤษ
3. เพื่อศึกษาคุณสมบัติของผู้ดำรงตำแหน่งสมาชิกวุฒิสภาประเทศไทยกับวุฒิสภาของประเทศอังกฤษ

ประโยชน์ที่คาดว่าจะได้รับจากงานวิจัย

1. ทำให้ทราบปัญหาและข้อเปรียบเทียบของอำนาจวุฒิสภาประเทศไทยที่มีต่อฝ่ายบริหารกับวุฒิสภาของประเทศอังกฤษ
2. ทำให้ทราบที่มาของวุฒิสภาประเทศไทยกับวุฒิสภาของประเทศอังกฤษ
3. ทำให้ทราบคุณสมบัติของผู้ดำรงตำแหน่งสมาชิกวุฒิสภาประเทศไทยกับวุฒิสภาของประเทศอังกฤษ

การทบทวนวรรณกรรม

ผู้วิจัยได้ทำการศึกษาค้นคว้าวรรณกรรมที่เกี่ยวข้องกับบทความฉบับนี้โดยแยกอธิบายเป็นหัวข้อ ดังต่อไปนี้

1. ประเทศไทย

1.1 อำนาจวุฒิสภา

วุฒิสภา คือ หนึ่งในองค์กรผู้ใช้อำนาจอธิปไตยในฝ่ายนิติบัญญัติ โดยมีอำนาจหน้าที่ในการตรวจสอบกฎหมายที่ผ่านมาจากสภาผู้แทนราษฎร ซึ่งถือเป็นองค์กรผู้ใช้อำนาจนิติบัญญัติหรือเรียกอีกชื่อหนึ่งคือสภาสูง โดยบทบาทหลักของวุฒิสภามีอำนาจหน้าที่ตรวจสอบและให้ความเห็นชอบกฎหมายที่สมาชิกสภาผู้แทนราษฎรหรือสภาล่างเสนอ โดยหากสมาชิกวุฒิสภาให้ความเห็นชอบกฎหมายนั้น กฎหมายก็จะถูกเสนอเข้าสู่คณะรัฐมนตรี คณะรัฐมนตรีก็จะนำขึ้นทูลเกล้าทูลกระหม่อมกราบบังคมทูลถวายพระมหากษัตริย์ ให้ทรงลงพระปรมาภิไธย และประกาศราชกิจจานุเบกษา ซึ่งถือว่ากฎหมายฉบับนั้นมีผลใช้บังคับ[1] บทบาทของสมาชิกวุฒิสภาจะมีบทบาทในการกลั่นกรองกฎหมายให้ถูกต้องรัดกุมเท่านั้น แต่หากเปรียบเทียบกับรัฐธรรมนูญของประเทศไทยจะเห็นได้ว่าสมาชิกวุฒิสภาจะมีบทบาทในทางการเมืองและการกำหนดรายชื่อบุคคลที่ถูกเสนอชื่อขึ้นมาเพื่อให้เข้าดำรงตำแหน่งประมุขฝ่ายบริหารด้วย

หากพิเคราะห์ที่มาของวุฒิสภาไทยตามรัฐธรรมนูญแห่งราชอาณาจักรไทย พุทธศักราช 2560 และเปรียบเทียบกับสถานการณ์ทางการเมืองปัจจุบัน จะเห็นได้ว่า การกำหนดที่มาของวุฒิสภาและการใช้อำนาจของวุฒิสภาในการเลือกนายกรัฐมนตรี ไม่เป็นไปตามหลักการแนวคิดตามทฤษฎีแนวคิดที่มาของวุฒิสภา ซึ่งไม่ก่อให้เกิดอำนาจความชอบธรรมขึ้น[2]

รัฐธรรมนูญแห่งราชอาณาจักรไทย พุทธศักราช 2560 มาตรา 272 บัญญัติว่า“ในระหว่างห้าปีแรกนับแต่วันที่มีรัฐสภาชุดแรกตามรัฐธรรมนูญนี้ การให้ความเห็นชอบบุคคลซึ่งสมควรได้รับแต่งตั้งเป็นนายกรัฐมนตรีให้ดำเนินการตามมาตรา 159 เว้นแต่การพิจารณาให้ความเห็นชอบตามมาตรา 159 วรรคหนึ่ง ให้กระทำในที่ประชุมร่วมกันของรัฐสภา และมติที่เห็นชอบการแต่งตั้งบุคคลใดให้เป็นนายกรัฐมนตรีตามมาตรา 159 วรรคสาม ต้องมีคะแนนเสียงมากกว่ากึ่งหนึ่งของจำนวนสมาชิกทั้งหมดเท่าที่มีอยู่ของทั้งสองสภา

ในระหว่างเวลาตามวรรคหนึ่ง หากมีกรณีที่ไม่อาจแต่งตั้งนายกรัฐมนตรีจากผู้มีชื่ออยู่ในบัญชีรายชื่อที่พรรคการเมืองแจ้งไว้ตามมาตรา 88 ไม่ว่าด้วยเหตุใด และสมาชิกของทั้งสองสภารวมกันจำนวนไม่น้อยกว่ากึ่งหนึ่งของจำนวนสมาชิกทั้งหมดเท่าที่มีอยู่ของทั้งสองสภาเข้าชื่อเสนอต่อประธานรัฐสภาขอให้รัฐสภามีมติยกเว้นเพื่อไม่ต้องเสนอชื่อนายกรัฐมนตรีจากผู้มีชื่ออยู่ในบัญชีรายชื่อที่พรรคการเมืองแจ้งไว้ตามมาตรา 88 ในกรณีเช่นนั้น ให้ประธานรัฐสภาจัดให้มีการประชุมร่วมกันของรัฐสภาโดยพลัน และในกรณีที่รัฐสภามีมติด้วยคะแนนเสียงไม่น้อยกว่าสองในสามของจำนวนสมาชิกทั้งหมดเท่าที่มีอยู่ของทั้งสองสภาให้ยกเว้นได้ ให้ดำเนินการตามวรรคหนึ่งต่อไป โดยจะเสนอชื่อผู้อยู่ในบัญชีรายชื่อที่พรรคการเมืองแจ้งไว้ตามมาตรา 88 หรือไม่ก็ได้”

นอกจากสมาชิกวุฒิสภาชุดแรกจะมีอำนาจลงมติเลือกนายกรัฐมนตรีตามบทเฉพาะกาลแล้ว ยังมีอำนาจในการยับยั้งกฎหมายของสภาผู้แทนราษฎร โดยอำนาจดังกล่าวเป็นอำนาจในการยับยั้งกฎหมายของสภาผู้แทนราษฎรที่มาจากการเลือกตั้งของประชาชน และยังมีอำนาจให้ความเห็นชอบให้บุคคลดำรงตำแหน่งตุลาการศาลรัฐธรรมนูญ ตามมาตรา 204 ทั้งยังมีอำนาจให้คำแนะนำในการเลือกผู้ตรวจการแผ่นดิน จำนวน 3 คน ตามมาตรา 228 มีอำนาจให้คำแนะนำในการเลือกคณะกรรมการการเลือกตั้ง จำนวน 7 คน ตามมาตรา 222 มีอำนาจให้คำแนะนำในการเลือกคณะกรรมการป้องกันและปราบปรามการทุจริตแห่งชาติ จำนวน 9 คน ตามมาตรา 232 มีอำนาจให้คำแนะนำในการเลือกคณะกรรมการตรวจเงินแผ่นดิน จำนวน 7 คน ตามมาตรา 238 มีอำนาจให้คำแนะนำในการจัดให้มีผู้ว่าการตรวจเงินแผ่นดิน ตามมาตรา 241 และมีอำนาจให้คำแนะนำในการเลือกคณะกรรมการสิทธิมนุษยชน จำนวน 7 คน ตามมาตรา 246

คณะกรรมาธิการของวุฒิสภาไทย คณะกรรมาธิการ[3] (Committee) หมายถึง องค์กรภายในสภาที่ประกอบด้วย บุคคลที่ได้รับเลือกจากสมาชิกสภาผู้แทนราษฎรหรือสมาชิกวุฒิสภา และหรือผู้ทรงคุณวุฒิที่ไม่ได้เป็นสมาชิกสภา ที่สภาแต่งตั้งขึ้นเพื่อทำหน้าที่ในการสอบสวนหรือศึกษาเรื่องใด ๆ ตามที่สภามอบหมาย และเมื่อดำเนินการเสร็จแล้วให้รายงานต่อสภา

---

[2] วีระพงศ์ เชาวลิต, ปัญหาของการใช้อำนาจของสมาชิกวุฒิสภา: ศึกษากรณีการใช้อำนาจในการเลือกนายกรัฐมนตรี ตามบทเฉพาะกาลตามรัฐธรรมนูญแห่งราชอาณาจักรไทย พุทธศักราช 2560, วารสารวิชาการเซาธ์อีสท์บางกอก (สาขามนุษยศาสตร์และสังคมศาสตร์) 7,2 (กรกฎาคม-ธันวาคม 2564), หน้า 42.

[3] สำนักงานเลขาธิการวุฒิสภา, กรรมาธิการ, สืบค้นเมื่อ 30 ธันวาคม 2565 จาก https://www.senate.go.th/view/1/หน้าหลักคณะกรรมาธิการ/TH-TH

คณะกรรมาธิการถือเป็นเครื่องมือหรือกลไกในการดำเนินงานของรัฐสภา เนื่องจากรัฐสภามีอำนาจและหน้าที่กว้างขวางและครอบคลุมกิจการทุกด้านของประเทศ จะต้องพิจารณาปัญหากฎหมายที่หลากหลาย

กรณีอำนาจของวุฒิสภาที่มีบทบาทในการตรวจสอบฝ่ายบริหารนอกจากอำนาจในการลงมติเลือกนายกรัฐมนตรีแล้วยังมีอำนาจตรวจสอบฝ่ายบริหาร ดังนี้

1. อำนาจในการตั้งกระทู้ถามรัฐมนตรี ***ตามรัฐธรรมนูญแห่งราชอาณาจักรไทย พุทธศักราช 2560 มาตรา 150 วรรคหนึ่ง*** บัญญัติว่า “สมาชิกสภาผู้แทนราษฎรหรือสมาชิกวุฒิสภามีสิทธิตั้งกระทู้ถามรัฐมนตรีในเรื่องใดเกี่ยวกับงานในหน้าที่โดยจะถามเป็นหนังสือหรือด้วยวาจาก็ได้ ตามข้อบังคับการประชุมแห่งสภานั้น ๆ ซึ่งอย่างน้อยต้องกำหนดให้มีการตั้งกระทู้ถามด้วยวาจาโดยไม่ต้องแจ้งล่วงหน้าไว้ด้วย“ ซึ่งถือเป็นอำนาจของวุฒิสภาในการตั้งกระทู้ถามรัฐมนตรีซึ่งเป็นการถ่วงดุลอำนาจตามหลักการแบ่งแยกอำนาจที่ฝ่ายนิติบัญญัติมีอำนาจตรวจสอบและถ่วงดุลฝ่ายบริหาร

2. อำนาจในการเข้าชื่อกันมากกว่า 84 คน (ไม่น้อยกว่าหนึ่งในสามของจำนวนวุฒิสมาชิก 250 คน) ของจำนวนสมาชิกวุฒิสภาในการเปิดอภิปรายทั่วไปให้คณะรัฐมนตรีชี้แจงปัญหา ***ตามรัฐธรรมนูญแห่งราชอาณาจักรไทย พุทธศักราช 2560 มาตรา 153*** บัญญัติว่า “สมาชิกวุฒิสภาจำนวนไม่น้อยกว่าหนึ่งในสามของจำนวนสมาชิกทั้งหมดเท่าที่มีอยู่ของวุฒิสภา มีสิทธิเข้าชื่อขอเปิดอภิปรายทั่วไปในวุฒิสภาเพื่อให้คณะรัฐมนตรีแถลงข้อเท็จจริงหรือชี้แจงปัญหาสำคัญเกี่ยวกับการบริหารราชการแผ่นดินโดยไม่มีการลงมติ”

3. อำนาจในการลงมติเลือกนายกรัฐมนตรี ***ตามรัฐธรรมนูญแห่งราชอาณาจักรไทย พุทธศักราช 2560 มาตรา 272***

1.2 ที่มาของวุฒิสภา

หากกล่าวถึงกระบวนการเข้าสู่ตำแหน่งของวุฒิสภาในประเทศไทย นับตั้งแต่ประเทศไทยมีรัฐธรรมนูญมาทั้งหมด 20 ฉบับ กระบวนการเข้าสู่ตำแหน่งของวุฒิสมาชิก มีทั้งหมด 3 รูปแบบ[1] ดังนี้

รูปแบบที่หนึ่ง กระบวนการเข้าสู่ตำแหน่งสมาชิกวุฒิสภาที่มาจากการแต่งตั้ง กล่าวคือ จะมีคณะบุคคลหรือผู้มีอำนาจตามกฎหมายในขณะนั้นเป็นผู้มีอำนาจในการเลือกสรรผู้ที่จะมาดำรงตำแหน่งวุฒิสมาชิก อาทิ รัฐธรรมนูญแห่งราชอาณาจักรไทย พุทธศักราช 2560 ได้กำหนดให้คณะกรรมการสรรหาและคณะรักษาความสงบแห่งชาติเป็นผู้เลือกบุคคลที่ดำรงตำแหน่งวุฒิสมาชิก ซึ่งตามบทเฉพาะกาลของรัฐธรรมนูญฉบับปัจจุบัน ได้กำหนดให้มีวุฒิสภา จำนวน 250 คน และมีสมาชิกวุฒิสภาที่มาจากการแต่งตั้งโดยตำแหน่งอีก 6 คน คือ ผู้บัญชาการทหารสูงสุด ผู้บัญชาการทหารบก ผู้บัญชาการทหารเรือ ผู้บัญชาการทหารอากาศ ผู้บัญชาการตำรวจแห่งชาติ และ ปลัดกระทรวงกลาโหม หากจะเปรียบเทียบกับวุฒิสภาของประเทศอังกฤษ จะเห็นได้ว่า วุฒิสภาของประเทศอังกฤษก็มาจากการแต่งตั้งทั้งหมดทั้งสิ้น แต่อย่างไรก็ดี วุฒิสภาของประเทศอังกฤษก็ไม่มีเรื่องการเมืองแอบแฝงเหมือนดั่งวุฒิสภาของประเทศไทย เหตุเพราะวุฒิสภาของประเทศอังกฤษได้กำหนดอำนาจตามเจตนารมณ์ของวุฒิสภา ให้วุฒิสภาทำการตรวจสอบกฎหมายของสภาผู้แทนราษฎรเท่านั้น

รูปแบบที่สอง กระบวนการเข้าสู่ตำแหน่งสมาชิกวุฒิสภาที่มาจากการเลือกตั้ง โดยในประเทศไทย การกำหนดที่มาของวุฒิสภาที่มาจากการเลือกตั้งได้เคยบัญญัติไว้ตาม***รัฐธรรมนูญแห่งราชอาณาจักรไทย พุทธศักราช 2540 มาตรา 121 วรรคหนึ่ง*** “วุฒิสภาประกอบด้วยสมาชิกซึ่งราษฎรเลือกตั้งจำนวนสองร้อยคน” ซึ่งในขณะนั้นถือเป็นครั้งแรกที่วุฒิสภาไทยมาจากการเลือกตั้งทั้งหมด แต่ก็เป็นที่ครหาว่าที่มาดังกล่าวเป็นการเอื้อผลประโยชน์ให้แก่คนบางกลุ่มที่ลงสมัครเป็นวุฒิสภาโดยในขณะนั้นได้ขนานนามวุฒิสภาว่าสภาผัวเมีย

รูปแบบที่สาม กระบวนการเข้าสู่ตำแหน่งสมาชิกวุฒิสภาที่มาจากการแต่งตั้งผสมผสานการเลือกตั้ง โดยประเทศไทยก็เคยมีรูปแบบดังกล่าวในการใช้เป็นที่มาของสมาชิกวุฒิสภาเช่นกัน ตาม***รัฐธรรมนูญแห่งราชอาณาจักรไทย พุทธศักราช 2550 มาตรา 111 วรรคหนึ่ง*** “วุฒิสภาประกอบด้วยสมาชิกจำนวนรวมหนึ่งร้อยห้าสิบคน ซึ่งมาจากการเลือกตั้งในแต่ละจังหวัดจังหวัดละหนึ่งคนที่ได้ และมาจากการสรรหาเท่ากับจำนวนรวมข้างต้น หักด้วยจำนวนสมาชิกวุฒิสภาที่มาจากการเลือกตั้ง” ดังนี้เห็นว่ารัฐธรรมนูญฉบับดังกล่าวได้กำหนดให้สมาชิกวุฒิสภามาจากการเลือกตั้งของประชาชนโดยตรงและมาจากสรรหา ซึ่งรัฐธรรมนูญดังกล่าวได้กำหนดจำนวนให้มีวุฒิสมาชิกทั้งหมด 150 คน โดยมาจากการสรรหา 74 คน และมาจากการเลือกตั้งจังหวัดละ 1 คน ทั้งหมด 76 คน ซึ่งถือเป็นการเลือกตั้งผสมผสานกับการแต่งตั้งของระบบที่มาของวุฒิสภาไทย การแต่งตั้งสมาชิกวุฒิสภามีหลายวิธีส่วนขั้นตอนการได้มาซึ่งสมาชิกวุฒิสภานี้ อาจผ่านกระบวนการต่าง ๆ โดยพฤตินัยได้ โดยปกติแล้วผู้มีอำนาจแต่งตั้งก็คือประมุขของรัฐซึ่งหากเป็นพระมหากษัตริย์ ความรับผิดชอบในการสรรหาและเสนอรายชื่อก็จะอยู่ที่ผู้ลงนามรับสนองพระบรมราชโองการ

---

[1] สถาพร สระมาลีย์, กระบวนการเข้าสู่ตำแหน่งของสมาชิกวุฒิสภา, วารสารนิติศาสตร์และสังคมท้องถิ่น มหาวิทยาลัยราชภัฏสุราษฎร์ธานี 4, 2 (กรกฎาคม-ธันวาคม 2563), หน้า 43-45.

การเปลี่ยนแปลงรูปแบบรัฐสภาไทย ในเริ่มแรก รัฐธรรมนูญแห่งราชอาณาจักรสยาม พุทธศักราช 2475 เป็นระบบสภาเดียว ไม่มีวุฒิสภาซึ่งมีเพียงสภาผู้แทนราษฎร ต่อมารัฐธรรมนูญแห่งราชอาณาจักรไทย พุทธศักราช 2489 มีวุฒิสภา (พฤฒสภา)[1] ที่มาจากการเลือกตั้งจำนวน 80 คน โดยเป็นการเลือกตั้งทางอ้อมที่เป็นรัฐธรรมนูญฉบับแรกที่กำหนดให้มีวุฒิสภา ต่อมาเมื่อมีการรัฐประหารทุกครั้ง สมาชิกวุฒิสภาที่มาจากการตราให้บังคับใช้รัฐธรรมนูญฉบับใหม่และยกเลิกรัฐธรรมนูญที่บังคับใช้ มักจะถูกกำหนดและเชื่อมโยงกับคณะกลุ่มบุคคลที่ก่อการรัฐประหาร และให้มีการเลือกตั้งสภาผู้แทนราษฎร ทำให้เป็นระบบสภาคู่ แต่เนื่องจากมีวุฒิสภาที่มีที่มาจากการแต่งตั้งเป็นหลัก จึงมิได้เป็นไปตามหลักเจตนารมณ์ของระบบสภาคู่ที่แท้จริง โดยมีแนวคิดในทางรัฐธรรมนูญสามแนวทาง คือ แนวคิดที่หนึ่ง ควรยกเลิกการมีวุฒิสภาให้รัฐธรรมนูญไทยเป็นเพียงระบบสภาเดียว ที่มีเพียงสภาผู้แทนราษฎร แนวคิดที่สอง ควรให้ดำรงวุฒิสภาไทยในฐานะองค์กรรัฐสภาที่เป็นสัญลักษณ์ทางการเมืองเช่นเดียวกับสภาสูงของประเทศอังกฤษที่ลดทอนอำนาจหน้าที่ของวุฒิสภา ให้ไม่มีบทบาทอำนาจหน้าที่ทางการเมือง แนวคิดที่สาม เห็นควรให้ระบบสองสภายังมีความจำเป็นต่อระบบการเมืองการปกครองไทย จึงต้องมีทั้งสมาชิกวุฒิสภาและสมาชิกสภาผู้แทนราษฎร

โดยผู้ที่จะมาดำรงตำแหน่งสมาชิกวุฒิสภาต้องประกอบด้วยคุณสมบัติ ดังต่อไปนี้

รัฐธรรมนูญแห่งราชอาณาจักรไทย พุทธศักราช 2560 มาตรา 108

“สมาชิกวุฒิสภาต้องมีคุณสมบัติและไม่มีลักษณะต้องห้าม ดังต่อไปนี้

ก. คุณสมบัติ

(1) มีสัญชาติไทยโดยการเกิด

(2) มีอายุไม่ต่ำกว่าสี่สิบปีในวันสมัครรับเลือก

(3) มีความรู้ ความเชี่ยวชาญ และประสบการณ์หรือทำงานในด้านที่สมัครไม่น้อยกว่าสิบปีหรือเป็นผู้มีลักษณะตามหลักเกณฑ์และเงื่อนไขที่บัญญัติไว้ในพระราชบัญญัติประกอบรัฐธรรมนูญว่าด้วยการได้มาซึ่งสมาชิกวุฒิสภา

(4) เกิด มีชื่ออยู่ในทะเบียนบ้าน ทำงาน หรือมีความเกี่ยวพันกับพื้นที่ที่สมัครตามหลักเกณฑ์และเงื่อนไขที่บัญญัติไว้ในพระราชบัญญัติประกอบรัฐธรรมนูญว่าด้วยการได้มาซึ่งสมาชิกวุฒิสภา

ข. ลักษณะต้องห้าม

(1) เป็นบุคคลต้องห้ามมิให้ใช้สิทธิสมัครรับเลือกตั้งตามมาตรา 98 (1) (2) (3) (4) (5) (6) (7) (8) (9) (10) (11) (15) (16) (17) หรือ (18)

(2) เป็นข้าราชการ

(3) เป็นหรือเคยเป็นสมาชิกสภาผู้แทนราษฎร เว้นแต่ได้พ้นจากการเป็นสมาชิกสภาผู้แทนราษฎรมาแล้วไม่น้อยกว่าห้าปีนับถึงวันสมัครรับเลือก

(4) เป็นสมาชิกพรรคการเมือง

(5) เป็นหรือเคยเป็นผู้ดำรงตำแหน่งใดในพรรคการเมือง เว้นแต่ได้พ้นจากการดำรงตำแหน่งในพรรคการเมืองมาแล้วไม่น้อยกว่าห้าปีนับถึงวันสมัครรับเลือก

(6) เป็นหรือเคยเป็นรัฐมนตรี เว้นแต่ได้พ้นจากการเป็นรัฐมนตรีมาแล้วไม่น้อยกว่าห้าปีนับถึงวันสมัครรับเลือก

(7) เป็นหรือเคยเป็นสมาชิกสภาท้องถิ่นหรือผู้บริหารท้องถิ่น เว้นแต่ได้พ้นจากการเป็นสมาชิกสภาท้องถิ่นหรือผู้บริหารท้องถิ่นมาแล้วไม่น้อยกว่าห้าปีนับถึงวันสมัครรับเลือก

(8) เป็นบุพการี คู่สมรส หรือบุตรของผู้ดำรงตำแหน่งสมาชิกสภาผู้แทนราษฎรสมาชิกวุฒิสภา ข้าราชการการเมือง สมาชิกสภาท้องถิ่นหรือผู้บริหารท้องถิ่น ผู้สมัครรับเลือกเป็นสมาชิกวุฒิสภาในคราวเดียวกัน หรือผู้ดำรงตำแหน่งในศาลรัฐธรรมนูญหรือในองค์กรอิสระ

(9) เคยดำรงตำแหน่งสมาชิกวุฒิสภาตามรัฐธรรมนูญนี้”

โดยที่มาของสมาชิกวุฒิสภาชุดแรกตามรัฐธรรมนูญ พุทธศักราช 2560 มีที่มา 3 รูปแบบ[2] คือ

รูปแบบแรก กลุ่มสมาชิกวุฒิสภาที่เป็นโดยตำแหน่ง 6 คน ได้แก่ ผู้บัญชาการทหารสูงสุด ผู้บัญชาการทหารบก ผู้บัญชาการทหารเรือ ผู้บัญชาการทหารอากาศ ผู้บัญชาการตำรวจแห่งชาติ และปลัดกระทรวงกลาโหม จากที่ได้กล่าวมาในข้างต้นว่าสมาชิกวุฒิสภากลุ่มแรกเป็นสมาชิกวุฒิสภาโดยตำแหน่ง โดย 6 ตำแหน่งดังกล่าวล้วนเป็นตำแหน่งที่เกี่ยวข้องและเกี่ยวพันกับทางทหารเป็นอย่างมาก หากพิจารณาจากรัฐธรรมนูญฉบับอื่นในอดีตก็ไม่เคยมีการบัญญัติสมาชิกวุฒิสภาที่เป็นโดยตำแหน่งซึ่งใช้คุณสมบัติในทางการทหารมาเป็นสิ่งที่กำหนด อาจกล่าวได้ว่าสมาชิกวุฒิสภาที่เป็นโดยตำแหน่งล้วนอาจเกี่ยวข้องกับเรื่องในทางการเมือง เหตุ

[1] สถาพร สระมาลีย์, เรื่องเดียวกัน, หน้า 44.

[2] workpointTODAY, เลือกตั้ง 62 l ส.ว. 250 คน มีที่มาอย่างไร ?, ค้นวันที่ 1 มกราคม 2566 จาก https://workpointtoday.com/250คนมีที่มาอย่างไร

เพราะจุดกำเนิดรัฐธรรมนูญแห่งราชอาณาจักรไทยฉบับ 2560 มีที่มาจากการรัฐประหารยกเลิกรัฐธรรมนูญฉบับปี 2550 ซึ่งบุคคลที่กระทำการยกเลิกรัฐธรรมนูญฉบับปี 2550 ก็คือบุคคลที่มีตำแหน่งในทางการทหารขณะนั้น จึงอาจกล่าวได้ว่าสมาชิกวุฒิสภาที่เป็นโดยตำแหน่ง 6 คน ย่อมมีส่วนเกี่ยวข้องในทางการเมือง โดยการที่นำทหารเข้ามาอยู่ในฝ่ายนิติบัญญัติจึงมิใช่เรื่องที่สมควร เหตุเพราะฝ่ายนิติบัญญัติทำหน้าที่ในการตรากฎหมายเพื่อบังคับใช้กับประชาชนผู้เป็นเจ้าของอำนาจอธิปไตย ดังนั้นควรจะมีความเกี่ยวข้องกับประชาชนในการที่จะให้บุคคลดังกล่าวจะเข้ามาใช้อำนาจในทางนิติบัญญัตินั่นเอง

รูปแบบที่สอง กลุ่มที่เลือกกันเอง โดยคณะรักษาความสงบแห่งชาติ[1] ได้เลือกบุคคลขึ้นมา 50 คนจากการเสนอชื่อบุคคล 200 คนที่เลือกกันเองมาแล้วในเบื้องต้น และให้คณะรักษาความสงบแห่งชาติเลือกบุคคล 50 คนขึ้นดำรงตำแหน่งวุฒิสมาชิก

รูปแบบสุดท้าย กลุ่มที่มาจากการเลือกโดยตรงของคณะรักษาความสงบแห่งชาติ ซึ่งคณะรักษาความสงบแห่งชาติได้เลือกบุคคลขึ้นมาอีก 194 คนให้ดำรงตำแหน่งสมาชิกวุฒิสภา ซึ่งถือเป็นการเลือกโดยตรงโดยไม่ได้ผ่านการคัดเลือกหรือสรรหาตามคุณสมบัติของรัฐธรรมนูญฉบับ อื่น ๆ ในอดีต จึงกล่าวได้ว่าสมาชิกวุฒิสภา 194 คน มาจากการเลือกโดยตรงของคณะรักษาความสงบแห่งชาติ ซึ่งเป็นผู้ที่ยึดอำนาจการปกครองแผ่นดินของรัฐบาลในขณะนั้นนั่นเอง

2. ประเทศอังกฤษ

2.1 อำนาจวุฒิสภา

อำนาจของสภาขุนนางถูกกำหนดไว้ในพระราชบัญญัติรัฐสภาปี ค.ศ. 1911 และ 1949 ซึ่งจำกัดและลดอำนาจของสภาขุนนางมาโดยตลอด โดยพระราชบัญญัติรัฐสภาปี ค.ศ. 1911 ระบุว่า หากสภาสามัญผ่านร่างกฎหมายใดให้สภาขุนนางพิจารณา หากผ่านไปแล้ว 1 เดือน สภาขุนนางยังไม่ได้มีความคิดเห็นใดออกมาจะถือว่าร่างกฎหมายนั้นเป็นกฎหมายทันที และห้ามสภาขุนนางแก้ไขร่างกฎหมายที่เกี่ยวข้องกับการเงิน แต่มีหน้าที่ให้ความเห็นชอบยืนตามสภาสามัญเท่านั้น

ส่วนพระราชบัญญัติรัฐสภาปี ค.ศ. 1949 ยิ่งลดอำนาจของสภาขุนนางลงไปอีก กล่าวคือ สภาขุนนางไม่สามารถยับยั้งกฎหมายได้เพียงแต่ชะลอออกไปได้มากถึง 2 ปี

ในปี ค.ศ. 2011 มีการจัดทำรายงานการศึกษาโดยรองนายกรัฐมนตรีในสมัยนั้น เกี่ยวกับที่มาของสมาชิกสภาขุนนางที่จะให้ประกอบด้วยสมาชิกจำนวน 300 คนเท่านั้น โดย 80 เปอร์เซ็นต์มาจากการเลือกตั้งและ 20 เปอร์เซ็นต์มาจากการแต่งตั้ง แม้จะมีความพยายามที่จะจำกัดอำนาจสภาขุนนางโดยให้มีที่มาจากการเลือกตั้งของประชาชน แต่ประเด็นนี้ยังเป็นที่ถกเถียงกันอยู่และอาจต้องใช้ระยะเวลาอีกหลายปี

จึงเห็นได้ว่าสมาชิกสภาขุนนางของประเทศอังกฤษกลับมีอำนาจอย่างจำกัดและถูกลิดรอนอำนาจลง เรื่อย ๆ มาตลอดนับร้อยปี เพราะสภาขุนนางมิได้เป็น “ตัวแทน” ของประชาชนทั้งประเทศ สภาขุนนางจึงถูกวางไว้บนหลักการว่าควรจะมีอำนาจอย่างจำกัด และควรทำหน้าที่ส่งเสริมและสนับสนุนการทำงานของสภาสามัญให้มีประสิทธิภาพมากยิ่งขึ้นในการผ่านร่างกฎหมายต่าง ๆ

กล่าวได้ว่า ประเทศอังกฤษวุฒิสภาของอังกฤษไม่มีอำนาจในการยับยั้งกฎหมาย มีเพียงการชะลอกฎหมายเท่านั้น กล่าวคือสมาชิกวุฒิสภาหรือสภาขุนนางของประเทศอังกฤษไม่มีอำนาจยับยั้งกฎหมายที่ผ่านสภาผู้แทนราษฎรมาแล้ว หากจะทำได้ก็เพียงแค่ชะลอไว้ได้เท่านั้นตามกฎหมาย ทั้งวุฒิสภาของประเทศอังกฤษถูกลดทอนอำนาจและบทบาทของตนเองลง ทั้งไม่มีอำนาจในการยับยั้งกฎหมายและยังไม่มีอำนาจตั้งองค์กรอิสระ และสมาชิกวุฒิสภาของประเทศอังกฤษไม่มีสิทธิ์เลือกนายกรัฐมนตรีที่ใช้อำนาจบริหารประเทศ เหตุเพราะประเทศอังกฤษมีแนวคิดที่ว่า สภาขุนนางมิได้มาจากการเลือกตั้งของประชาชนโดยตรงจึงไม่มีอำนาจในการลงมติเลือกนายกรัฐมนตรีของประเทศอังกฤษผู้ที่จะมาบริหารประเทศ แต่มีเพียงอำนาจในเชิงฝ่ายนิติบัญญัติ กล่าวคือ อำนาจในการตรวจสอบการออกกฎหมายของสภาผู้แทนราษฎรหรือชะลอการออกกฎหมายเท่านั้น

อำนาจของวุฒิสภาประเทศอังกฤษ (สภาขุนนางอังกฤษ) ที่มีอำนาจหน้าที่ควบคุมฝ่ายบริหาร ตามหลักของการตรวจสอบถ่วงดุลอำนาจกันระหว่างฝ่ายบริหารและฝ่ายนิติบัญญัติ ดังนี้[2]

1. อำนาจในการตั้งกระทู้ถามนายกรัฐมนตรี รัฐมนนตรี หรือคณะรัฐมนตรี หรือเจ้าหน้าที่ของรัฐ

2. อำนาจในการอภิปราย ซึ่งสภาขุนนางอังกฤษมีอำนาจในการขอเปิดการอภิปรายได้ แต่ทั้งนี้การอภิปรายจะไม่มีการออกเสียงลงมติต่อเรื่องที่ตนได้อภิปราย

---

[1] คณะรักษาความสงบแห่งชาติ หรือ คสช. (อังกฤษ: National Council for Peace and Order; ชื่อย่อ: NCPO) เป็นคณะผู้ยึดอำนาจการปกครอง โดยรัฐประหารยึดอำนาจการปกครองจากรัฐบาลของ นางสาวยิ่งลักษณ์ ชินวัตร นายกรัฐมนตรีในขณะนั้น ซึ่งคณะรักษาความสงบแห่งชาติประกอบด้วยกองทัพไทยและสำนักงานตำรวจแห่งชาติ มีพลเอก ประยุทธ์ จันทร์โอชา เป็นหัวหน้าคณะ ก่อตั้งขึ้นตั้งแต่วันที่ 22 พฤษภาคม พ.ศ. 2557 จนถึง 16 กรกฎาคม พ.ศ. 2562

[2] ปณิธัศร์ ปทุมวัฒน์, “สภาขุนนางอังกฤษ”, จุลนิติ 12, 4 (กรกฎาคม-สิงหาคม 2558), หน้า 192-193.

3. อำนาจในการตรวจสอบโดยกลไกของคณะกรรมาธิการ โดยคณะกรรมาธิการในสภาขุนนางอังกฤษมีอำนาจในการพิจารณาและตรวจสอบการบริหารราชการแผ่นดินของฝ่ายบริหาร

2.2 ที่มาของวุฒิสภา

สภาขุนนาง (House of Lords) เป็นสภาสูงแห่งรัฐสภาสหราชอาณาจักรบริเตนใหญ่และไอร์แลนด์เหนือ เป็นสภาที่ได้รับการแต่งตั้งขึ้นทั้งหมด มิได้ผ่านการเลือกตั้งโดยตรงจากประชาชนแม้แต่คนเดียว และมีอำนาจหน้าที่ในการตรวจสอบและเสนอกฎหมายของรัฐบาลและสภาสามัญหรือสภาผู้แทนราษฎรสมาชิกสภาขุนนางแบ่งออกเป็น 3 กลุ่มใหญ่ รวมทั้งสิ้น 781 คน[1] คือ

ขุนนางสืบตระกูล (Hereditary Peers) เดิมสภาขุนนางจะมีสมาชิกมาจากขุนนางสืบตระกูลเท่านั้น ซึ่งเป็นขุนนางที่ได้ตำแหน่งสืบทอดจากบรรพบุรุษตระกูลเก่าแก่ของอังกฤษ โดยกล่าวได้ว่าสมาชิกเหล่านี้เป็นพระบรมวงศานุวงศ์หรือขุนนางตำแหน่งต่าง ๆ และปัจจุบันถูกกำหนดไว้ให้มี 87 คน

ขุนนางศาสนา (Lords Spiritual) เป็นสมาชิกสภาขุนนางโดยตำแหน่งบิชอป และอาร์ชบิชอปทั่วประเทศ ปัจจุบันกำหนดไว้ที่ 26 คน

ขุนนางตลอดชีพ (Life Peerages) ซึ่งได้ออกพระราชบัญญัติให้มีการแต่งตั้งสมาชิกสภาขุนนางประเภทนี้มาตั้งแต่ ค.ศ. 1958 เป็นขุนนางที่มาจากการแต่งตั้งโดยพระมหากษัตริย์ ผ่านการเสนอจากนายกรัฐมนตรี เนื่องจากมีความดีความชอบ หรือเป็นบุคคลสำคัญ ๆ ของประเทศ และสามารถลาออกได้ มีจำนวนสมาชิกสภาขุนนางทั้งหมด 668 คน

วิธีดำเนินการวิจัย

การดำเนินการวิจัยฉบับนี้เป็นการศึกษาวิจัยเชิงคุณภาพ (Qualitative research) โดยการศึกษาทบทวนวรรณกรรมจากเอกสารต่าง ๆ ที่เกี่ยวข้องจากแหล่งข้อมูลปฐมภูมิ ประกอบด้วยการศึกษาค้นคว้าและรวบรวมข้อมูลจากตัวบทกฎหมาย ตำราทางกฎหมายและทางวิชาการ บทความและวารสารทางกฎหมาย และข้อมูลจากอินเทอร์เน็ตที่เกี่ยวข้องกับอำนาจของวุฒิสภาไทยที่มีต่อฝ่ายบริหารและระยะเวลาการดำรงตำแหน่ง รวมถึงศึกษาจากแนวคิดของกฎหมายประเทศอังกฤษ แล้วนำข้อมูลที่ได้มาวิเคราะห์ปัญหา เพื่อนำไปสู่การสรุปอภิปรายผลการศึกษาและสังเคราะห์เป็นข้อเสนอแนะ

ผลการวิจัย

1) ปัญหาอำนาจของวุฒิสภาไทยที่มีต่อฝ่ายบริหาร

รัฐธรรมนูญแห่งราชอาณาจักรไทย ตามบทเฉพาะกาล บัญญัติให้สมาชิกวุฒิสภาชุดแรกมีอำนาจร่วมลงมติเลือกนายกรัฐมนตรีร่วมกับสมาชิกสภาผู้แทนราษฎรด้วย แต่อย่างไรก็ดีสมาชิกวุฒิสภาดังกล่าว ถูกบัญญัติให้มีอำนาจในการเลือกนายกรัฐมนตรีเพียง 2 ครั้ง (สมาชิกวุฒิสภามีวาระ 5 ปี ภายใน 4 ปีแรกเลือกได้ 1 ครั้ง นายกรัฐมนตรีดำรงตำแหน่งได้ 4 ปี สมาชิกวุฒิสภาจะเลือกได้อีก 1 ครั้ง รวมการเลือกนายกรัฐมนตรีเป็น 2 ครั้ง) เมื่อพ้นกำหนดหลังจากนั้น อำนาจการลงมติเลือกนายกรัฐมนตรีจะไปอยู่ในอำนาจของสมาชิกสภาผู้แทนราษฎรแต่ผู้เดียว สมาชิกวุฒิสภาย่อมหมดอำนาจตามบทเฉพาะกาล ยังมีอำนาจในการยับยั้งกฎหมายของสภาผู้แทนราษฎร โดยอำนาจดังกล่าวเป็นอำนาจในการยับยั้งกฎหมายของสภาผู้แทนราษฎรที่มาจากการเลือกตั้งของประชาชน และยังมีอำนาจให้คำแนะนำในการเลือกบุคคลเข้าดำรงตำแหน่งองค์กรอิสระในประเทศไทยได้ ตามรัฐธรรมนูญแห่งราชอาณาจักรไทย พุทธศักราช 2560 มาตรา 222 มาตรา 228 มาตรา 232 มาตรา 238 มาตรา 241 มาตรา 246 เป็นต้น ทั้งยังมีอำนาจให้ความเห็นชอบผู้ได้รับคัดเลือกเป็นตุลาการศาลรัฐธรรมนูญ ตามมาตรา 204 ด้วย แต่อย่างไรก็ดีตามรัฐธรรมนูญฉบับปัจจุบันยังดำรงไว้ซึ่งหลักการถ่วงดุลอำนาจขององค์กรผู้ใช้อำนาจอธิปไตยอยู่ กล่าวคือยังกำหนดให้ฝ่ายนิติบัญญัติมีอำนาจในการตรวจสอบและถ่วงดุลการบริหารราชการแผ่นดินของฝ่ายบริหารด้วย ตามมาตรา 150 มาตรา 153 และมาตรา 236 เป็นต้น

[1] ปณิธัศร์ ปทุมวัฒน์, เรื่องเดียวกัน, หน้า 190.

ตารางเปรียบเทียบอำนาจของวุฒิสภาไทยที่มีต่อฝ่ายบริหารกับประเทศอังกฤษ

อำนาจของวุฒิสภา	
ประเทศไทย	**ประเทศอังกฤษ**
1. อำนาจในการตั้งกระทู้ถามรัฐมนตรี ตามรัฐธรรมนูญแห่งราชอาณาจักรไทย มาตรา 150 วรรคหนึ่ง 2. อำนาจในการเข้าชื่อกันมากกว่า 84 คน ของจำนวนสมาชิกวุฒิสภาในการเปิดอภิปรายทั่วไปให้คณะรัฐมนตรีชี้แจงปัญหา ตามรัฐธรรมนูญแห่งราชอาณาจักรไทย มาตรา 153 3. อำนาจในการลงมติเลือกนายกรัฐมนตรีของสมาชิกวุฒิสภาชุดแรก ตามบทเฉพาะกาล ตามรัฐธรรมนูญแห่งราชอาณาจักรไทย มาตรา 272	1. อำนาจในการตั้งกระทู้ถามนายกรัฐมนตรี รัฐมนนตรี หรือคณะรัฐมนตรี หรือเจ้าหน้าที่ของรัฐ 2. อำนาจในการอภิปราย ซึ่งสภาขุนนางอังกฤษมีอำนาจในการขอเปิดการอภิปรายได้ แต่ทั้งนี้การอภิปรายจะไม่มีการออกเสียงลงมติต่อเรื่องที่ตนได้อภิปราย 3. อำนาจในการตรวจสอบโดยกลไกของคณะกรรมาธิการ โดยคณะกรรมาธิการในสภาขุนนางอังกฤษมีอำนาจในการพิจารณาและตรวจสอบการบริหารราชการแผ่นดินของฝ่ายบริหาร

เมื่อพิจารณาตารางข้างต้น จะเห็นได้ว่าสมาชิกวุฒิสภาของประเทศไทยมีอำนาจในการตั้งกระทู้ถามรัฐมนตรี มีอำนาจในการเปิดอภิปรายทั่วไปให้คณะรัฐมนตรีชี้แจงปัญหา และมีอำนาจในการลงมติเลือกนายกรัฐมนตรีของสมาชิกวุฒิสภาชุดแรก ตามบทเฉพาะกาล ซึ่งแตกต่างจากวุฒิสภาของประเทศอังกฤษ (สภาขุนนางอังกฤษ) ที่มีอำนาจเพียงการตรวจสอบถ่วงดุลการบริหารราชการแผ่นดินของฝ่ายบริหารที่เข้ามาบริหารประเทศเท่านั้น หาได้มีอำนาจในการลงมติเลือกประมุขฝ่ายบริหารให้มาดำรงตำแหน่งนายกรัฐมนตรีไม่

2) ปัญหาที่มาของวุฒิสภาไทย

จะเห็นได้ว่าที่มาของสมาชิกวุฒิสภาตามรัฐธรรมนูญไทยจะมีที่มาแตกต่างกันออกไป ซึ่งขึ้นอยู่กับผู้ใช้อำนาจรัฐในขณะนั้น โดยหากมองย้อนถึงที่มาของรัฐธรรมนูญที่กำหนดที่มาของวุฒิสภา จะเห็นได้ว่า รัฐธรรมนูญ ฉบับปี 2540 เป็นรัฐธรรมนูญที่ผ่านประชามติของประชาชนทั้งประเทศ (เฉพาะผู้มีสิทธิเลือกตั้ง) ส่วนที่มาของรัฐธรรมนูญ ฉบับปี 2550 มาจากการล้มเลิกรัฐธรรมนูญ ฉบับปี 2540 ซึ่งมาจากการรัฐประหาร และรัฐธรรมนูญฉบับปัจจุบัน มาจากการการรัฐประหาร และล้มเลิกรัฐธรรมนูญ ฉบับปี 2550 เป็นต้น แม้รัฐธรรมนูญแห่งราชอาณาจักรไทย พุทธศักราช 2560 มาตรา 108 จะกำหนดคุณสมบัติดังกล่าวของสมาชิกวุฒิสภาเป็นคุณสมบัติที่ถูกระบุไว้ในรัฐธรรมนูญแห่งราชอาณาจักรไทยพุทธศักราช 2560 มาตรา 108 ซึ่งบทบัญญัติในรัฐธรรมนูญแห่งราชอาณาจักรไทยฉบับดังกล่าวจะจะมีผลต่อเมื่อรัฐธรรมนูญได้ถูกประกาศใช้ โดยเมื่อรัฐธรรมนูญแห่งราชอาณาจักรไทยฉบับปัจจุบันถูกประกาศใช้เมื่อวันที่ 6 เมษายน 2560 โดยพระบาทสมเด็จพระวชิรเกล้าเจ้าอยู่หัว พระมหากษัตริย์แห่งราชอาณาจักรไทยได้ลงพระปรมาภิไธย จึงทำให้รัฐธรรมนูญแห่งราชอาณาจักรไทยพุทธศักราช 2560 ซึ่งถือเป็นฉบับที่ 20 มีผลใช้บังคับ ดังนั้นคุณสมบัติของสมาชิกวุฒิสภาที่ถูกบัญญัติไว้ในรัฐธรรมนูญจึงมีผลบังคับใช้หลังจากวันที่รัฐธรรมนูญประกาศใช้เป็นกฎหมายสูงสุด แต่เมื่อเปรียบเทียบกับที่มาของวุฒิสภาซึ่งมีการสรรหาก่อนวันที่รัฐธรรมนูญแห่งราชอาณาจักรไทยฉบับปัจจุบันมีผลใช้บังคับ ดังนั้นคุณสมบัติดังกล่าวที่ถูกบัญญัติไว้ในรัฐธรรมนูญมาตรา 108 จึงไม่สามารถนำมาเป็นตัวกำหนดคุณสมบัติสมาชิกวุฒิสภาชุดแรกได้ เหตุเพราะสมาชิกวุฒิสภาชุดแรกเป็นสมาชิกวุฒิสภาที่มาจากการแต่งตั้งทั้งหมดทุกคน อีกทั้งตามพระราชบัญญัติประกอบรัฐธรรมนูญ ว่าด้วยการได้มาซึ่งสมาชิกวุฒิสภา พ.ศ.2561 หมวด 1 ว่าด้วยผู้สมัครและการสมัครรับเลือกสมาชิกวุฒิสภา ที่ประกาศใช้ในปัจจุบันก็ยังไม่ปรากฏที่มีสมาชิกวุฒิสภาคนใดที่ได้เข้ารับตำแหน่งโดยผ่านกระบวนการตามพระราชบัญญัติประกอบรัฐธรรมนูญฉบับนี้ เพราะสมาชิกวุฒิสภาชุดแรกคณะรักษาความสงบแห่งชาติได้ทำการคัดเลือกรายชื่อสำรองของบุคคลที่จะเข้ารับตำแหน่งดังกล่าวไว้แล้ว โดยหากเกิดเหตุการณ์ที่สมาชิกวุฒิสภาชุดปัจจุบันสิ้นสุดสมาชิกภาพลงเมื่อใด ก็จะนำรายชื่อสำรองทั้ง 50 รายชื่อให้เข้ามาดำรงตำแหน่งตามตำแหน่งที่ว่างลง ซึ่งบุคคลที่เป็นรายชื่อสำรอง ก็มีที่มากระบวนการสรรหามาจากคณะรักษาความสงบแห่งชาติเช่นกัน

จึงกล่าวโดยสรุปได้ว่า สมาชิกวุฒิสภาจำนวน 250 คนในปัจจุบันเป็นสมาชิกวุฒิสภาที่มาจากการเลือกของคณะรักษาความสงบแห่งชาติแต่เพียงกลุ่มเดียวเท่านั้น หาได้มาจากการเลือกตั้งหรือผ่านกระบวนการสรรหาที่ถูกต้องเป็นธรรมหรือเป็นกระบวนการสรรหาที่ต้องผ่านคุณสมบัติที่ถูกบัญญัติไว้ในรัฐธรรมนูญนั้นไม่ สมาชิกวุฒิสภา 250 คนจึงไม่ได้มาจากการเลือกตั้งของประชาชนแต่มาจากการคัดเลือกของบุคคลหรือกลุ่มอำนาจใดกลุ่มอำนาจหนึ่งในประเทศเท่านั้น จึงเห็นได้ว่าสมาชิกวุฒิสภาแม้จะมีการกำหนดคุณสมบัติไว้ในรัฐธรรมนูญแห่งราชอาณาจักรไทยฉบับปัจจุบัน แต่สมาชิกวุฒิสภาชุดแรกก็หาได้จำเป็นต้องใช้คุณสมบัติดังกล่าวที่

กำหนดไว้ในรัฐธรรมนูญไม่ เพราะมีรายชื่อบุคคลสำรอง 50 รายชื่อ ที่จะได้รับตำแหน่งแทนสมาชิกวุฒิสภาแทนบุคคลเดิมที่มีการยุติบทบาทหน้าที่ไปเพียงเท่านั้น หรือสมาชิกภาพของสมาชิกวุฒิสภาสิ้นสุดลง[1]

ที่มาของกลุ่มสมาชิกวุฒิสภาที่เป็นโดยตำแหน่ง 6 คน อันได้แก่ ผู้บัญชาการทหารสูงสุด ผู้บัญชาการทหารบก ผู้บัญชาการทหารเรือ ผู้บัญชาการทหารอากาศ ผู้บัญชาการตำรวจแห่งชาติ และปลัดกระทรวงกลาโหม ย่อมเป็นสมาชิกวุฒิสภาโดยตำแหน่งด้วย

ตารางเปรียบเทียบที่มาของวุฒิสภาไทยกับประเทศอังกฤษ

ที่มาของวุฒิสภา	
ประเทศไทย	**ประเทศอังกฤษ**
1. มาจากการแต่งตั้งของคณะรักษาความสงบแห่งชาติทั้งโดยตรงและโดยอ้อม 2. มีการแต่งตั้งสมาชิกวุฒิสภาโดยตำแหน่ง 6 คน	1. มาจากการแต่งตั้งทั้งหมด โดยคัดเลือกบุคคลผู้มีคุณสมบัติออกเป็น 3 กลุ่มใหญ่ ทั้งด้านการสืบตำแหน่งจากขุนนางบรรพบุรุษ ด้านการศาสนา และด้านการเป็นบุคคลสำคัญของประเทศจนได้ถูกเสนอชื่อ

เมื่อพิจารณาตารางข้างต้น จะเห็นได้ว่าสมาชิกวุฒิสภาของประเทศไทยมาจากการคัดเลือกของคณะบุคคลเพียงคณะเดียว ไม่ว่าทางตรงหรือทางอ้อมก็ล้วนแต่มีที่มาจากคณะรักษาความสงบแห่งชาติทั้งสิ้น และแม้ที่มาของวุฒิสภาประเทศอังกฤษ (สภาขุนนางอังกฤษ) จะมาจากการแต่งตั้งเหมือนกับสมาชิกวุฒิสภาของประเทศไทย แต่ก็แตกต่างกันตรงที่ประเทศอังกฤษ วุฒิสภามาจากบุคคลหลากหลายกลุ่มที่มามากกว่าวุฒิสภาของประเทศไทย อีกทั้งวุฒิสภาของประเทศไทยยังมีการกำหนดบุคคลให้เข้าดำรงตำแหน่งเป็นวุฒิสภาตามตำแหน่งที่บุคคลนั้นดำรงอยู่ด้วย

อภิปรายผลการวิจัย

การที่ปัจจุบันประเทศไทยมีสมาชิกวุฒิสภาจำนวน 250 คน โดยมาจากการแต่งตั้งจากคณะบุคคลเพียงคณะเดียว (คสช.) ทั้งยังไม่ได้มีปฏิสัมพันธ์กับประชาชนผู้เป็นเจ้าของอำนาจอธิปไตยที่แท้จริง กล่าวคือสมาชิกวุฒิสภาชุดปัจจุบันไม่ได้มาจากการเลือกตั้งหรือผ่านการเห็นชอบจากประชาชนนั่นเอง แม้จะกล่าวว่าได้มีการทำประชามติเห็นชอบด้วยกับการให้ยกร่างรัฐธรรมนูญ ฉบับปีพุทธศักราช 2560 ของประชาชน แต่การแต่งตั้งสมาชิกวุฒิสภาชุดปัจจุบันก็เกิดขึ้นหลังจากการที่ประชาชนให้ความเห็นชอบผ่านประชามติรับร่างรัฐธรรมนูญแห่งราชอาณาจักรไทยพุทธศักราช 2560 แล้ว โดยในขณะนั้นประชาชนผู้เป็นเจ้าของประเทศยังมิได้ทราบถึงขั้นตอนหรือกลไกในการสรรหาสมาชิกวุฒิสภาแต่อย่างใด จึงกล่าวได้ว่าสมาชิกวุฒิสภาชุดปัจจุบันไม่ได้มาจากประชาชนซึ่งหากเปรียบเทียบกับวุฒิสภาของประเทศอังกฤษแม้จะมาจากการแต่งตั้งเช่นเดียวกัน แต่ในเชิงอำนาจที่มีต่อฝ่ายบริหารก็ไม่ได้มีอำนาจมากเหมือนกับสมาชิกวุฒิสภาของประเทศไทย อีกทั้งแม้รัฐธรรมนูญแห่งราชอาณาจักรไทยฉบับปัจจุบันจะกำหนดคุณสมบัติของผู้ที่จะมาเป็นวุฒิสภาของประเทศไทยไว้หลากหลายคุณสมบัติเพื่อให้เกิดความแตกต่างในด้านความรู้ความสามารถ แต่ก็หาได้เป็นไปตามเจตนารมณ์ของรัฐธรรมนูญไม่ เหตุเพราะคุณสมบัติต่าง ๆ ที่รัฐธรรมนูญกำหนดเป็นการกำหนดหลังจากที่มีการสรรหาวุฒิสภาชุดแรกตามบทเฉพาะกาลแล้ว และแม้คุณสมบัติของวุฒิสภาประเทศไทยในปัจจุบันจะมีความหลากหลายมากกว่าวุฒิสภาของประเทศอังกฤษในแง่ของคุณวุฒิผู้ดำรงตำแหน่งวุฒิสภา อาจจะมีความหลากหลายในด้านความคิดเพราะมีบุคคลหลากหลายวิชาชีพ แต่ในแง่ของการเมืองวุฒิสภาไทยย่อมถูกครหาว่าเป็นเครื่องมือทางการเมืองของกลุ่มบุคคลใดบุคคลหนึ่งมากกว่าประเทศอังกฤษเหตุเพราะอำนาจ

---

[1] รัฐธรรมนูญแห่งราชอาณาจักรไทย พุทธศักราช 2560 มาตรา 111 สมาชิกภาพของสมาชิกวุฒิสภาสิ้นสุดลง เมื่อ

(1) ถึงคราวออกตามอายุของวุฒิสภา

(2) ตาย

(3) ลาออก

(4) ขาดคุณสมบัติหรือมีลักษณะต้องห้ามตามมาตรา 108

(5) ขาดประชุมเกินจำนวนหนึ่งในสี่ของจำนวนวันประชุมในสมัยประชุมที่มีกำหนดเวลาไม่น้อยกว่าหนึ่งร้อยยี่สิบวันโดยไม่ได้รับอนุญาตจากประธานวุฒิสภา

(6) ต้องคำพิพากษาถึงที่สุดให้จำคุก แม้จะมีการรอการลงโทษ เว้นแต่เป็นการรอการลงโทษในความผิดอันได้กระทำโดยประมาท ความผิดลหุโทษ หรือความผิดฐานหมิ่นประมาท

(7) กระทำการอันเป็นการฝ่าฝืนมาตรา 113 หรือกระทำการอันต้องห้ามตามมาตรา 184 หรือมาตรา 185

(8) พ้นจากตำแหน่งเพราะเหตุตามมาตรา 144 หรือมาตรา 235 วรรคสาม

ในการลงมติเลือกนายกรัฐมนตรี ทั้งรัฐธรรมนูญไทยก็ได้ให้อำนาจแก่วุฒิสภาไว้มากกว่าวุฒิสภาของประเทศอังกฤษทั้งอำนาจทั่วไปและอำนาจที่มีต่อฝ่ายบริหารคือการลงมติเลือกนายกรัฐมนตรี จึงทำให้สมาชิกวุฒิสภาไทยแม้จะมีความแตกต่างแต่ไม่มีความหลากหลายเหมือนกับวุฒิสภาของประเทศอังกฤษในปัจจุบัน

ข้อเสนอแนะการวิจัย

จากการศึกษาเปรียบเทียบอำนาจของวุฒิสภาไทยที่มีต่อฝ่ายบริหารและที่มาของวุฒิสภาไทย : ศึกษาจากแนวคิดของกฎหมายประเทศอังกฤษ ผู้วิจัยจึงเสนอข้อเสนอแนะแบ่งออกเป็น 3 ข้อ ดังต่อไปนี้

1. เห็นสมควรให้มีการแก้ไขหรือยกเลิกรัฐธรรมนูญแห่งราชอาณาจักรไทย พุทธศักราช 2560 มาตรา 272 กล่าวคือให้ยกเลิกบทบัญญัติในการให้อำนาจวุฒิสภาลงมติเลือกนายกรัฐมนตรี เหตุเพราะวุฒิสภาไม่มีความยึดโยงกับประชาชน จึงไม่สมควรเป็นผู้ร่วมกำหนดบุคคลที่จะเข้าดำรงตำแหน่งนายกรัฐมนตรีร่วมกับบุคคลผู้เป็นตัวแทนของประชาชนโดยแท้จริงซึ่งคือสมาชิกสภาผู้แทนราษฎร และให้อำนาจในการลงมติเลือกนายกรัฐมนตรีตกไปแก่สมาชิกสภาผู้แทนราษฎรแต่ผู้เดียว ดังที่รัฐธรรมนูญแห่งราชอาณาจักรไทยในอดีตได้วางหลักการดังกล่าวมา ทั้งไม่สอดคล้องกับหลักทฤษฎีและหลักกฎหมายของประเทศอังกฤษซึ่งมิได้บัญญัติให้อำนาจวุฒิสภาในการลงมติเลือกนายกรัฐมนตรีเหตุเพราะวุฒิสภามิได้มาจากการเลือกตั้งของประชาชนผู้เป็นเจ้าของอำนาจอธิปไตยโดยแท้จริง ตามทฤษฎีอำนาจอธิปไตยเป็นของประชาชน

2. เห็นสมควรให้แก้ไขที่มาของวุฒิสภาชุดแรก กล่าวคือ ยกเลิกรายชื่อบุคคลสำรองที่คณะรักษาความสงบแห่งชาติได้กระทำการคัดเลือกไว้ตามบทเฉพาะกาล และนำพระราชบัญญัติประกอบรัฐธรรมนูญว่าด้วยการได้มาซึ่งสมาชิกวุฒิสภา พ.ศ.2561 หมวด 1 ว่าด้วยผู้สมัครและการสมัครรับเลือกสมาชิกวุฒิสภา มาใช้บังคับโดยการจัดให้มีการเลือกตั้งสมาชิกวุฒิสภา เพื่อลดความครหาของประชาชนว่าวุฒิสภาชุดแรกไม่ได้มาจากประชาชน และแม้วุฒิสภาชุดแรกจะมีภารกิจการดำเนินให้ชาติเป็นไปตามแผนยุทธศาสตร์ชาติ 20 ปีก็ตาม ก็หาใช่เหตุผลสำคัญที่มีความจำเป็นต้องแต่งตั้งสมาชิกวุฒิสภาไม่ ผู้วิจัยจึงเห็นควรให้ทำการเลือกตั้งสมาชิกวุฒิสภาคนใหม่ทันทีแทนตำแหน่งวุฒิสภาคนก่อนที่ว่าง และยกเลิกสมาชิกวุฒิสภาโดยตำแหน่ง 6 คน เนื่องจากไม่มีความจำเป็นต้องให้กองทัพไทยมาดำเนินกิจการของวุฒิสภา เหตุเพราะคุณสมบัติของสมาชิกวุฒิสภามีความหลากหลายอยู่แล้วตามคุณสมบัติที่รัฐธรรมนูญกำหนดหรือตามคุณวุฒิของสมาชิกวุฒิสภาชุดปัจจุบันก็น่าจะเพียงพอต่อการพัฒนากลั่นกรองกฎหมายของประเทศไทย

3. ควรกำหนดคุณสมบัติสมาชิกวุฒิสภาเพิ่มมากขึ้น โดยเพิ่มบทบัญญัติตามรัฐธรรมนูญแห่งราชอาณาจักรไทย พุทธศักราช 2560 มาตรา 108 ห้ามมิให้วุฒิสภามีความฝักใฝ่พรรคการเมืองใดโดยห้ามข้องเกี่ยวกับพรรคการเมืองหรือกลุ่มการเมืองใด เป็นระยะเวลา 5-8 ปีเป็นอย่างน้อย ไม่ว่าจะเป็นการแสดงออกเชิงสัญลักษณ์หรือเป็นการแสดงออกผ่านทางสื่อออนไลน์ก็ตาม เนื่องจากจะทำให้วุฒิสภามีความฝักใฝ่ในพรรคการเมืองและก่อให้เกิดการกลั่นกรองกฎหมายให้เป็นไปตามความพึงพอใจในพรรคการเมืองที่เสนอกฎหมายฉบับนั้น จนอาจทำให้เกิดอคติในการตรวจสอบหรือกลั่นกรองกฎหมายที่มีผลบังคับใช้กับประชาชน

LPA-006

ปัญหาการบังคับใช้กฎหมายว่าด้วยใบอนุญาตขับขี่รถบิ๊กไบค์ที่แยกจากใบขับขี่มอเตอร์ไซค์ทั่วไป

Big bike driving license laws which are separate from general motorcycle driving licenses

นพพรศิริ เหลืองาม Noppornsiri lueangam[1]

บทคัดย่อ

ในปัจจุบัน ซึ่งมีกระแสความนิยมการขับขี่มอเตอร์ไซค์บิ๊กไบค์จำนวนมากและมีแนวโน้มที่จะเพิ่มขึ้นจากยอดขายทางการตลาดของจักรยานยนต์บิ๊กไบค์จะเห็นได้ว่าผู้ที่ขับขี่จักรยานยนต์บิ๊กไบค์ในสังคมไทยนั้นเริ่มที่จะมีมากขึ้นเรื่อยๆ และมีอุบัติเหตุเพิ่มมากขึ้นเรื่อย ๆ เช่นกัน เนื่องจากผู้ขับขี่ยังขาดประสบการณ์และทักษะการขับขี่มอเตอร์ไซค์บิ๊กไบค์และก่อให้เกิดความสูญเสียบนท้องถนนอยู่เรื่อย ๆเนื่องจากผู้ขับขี่ในปัจจุบันสามารถขับขี่รถจักรยานยนต์บิ๊กไบค์ได้เมื่อทำใบขับขี่ในรถจักรยานยนต์ธรรมดาก็สามารถขับขี่รถจักรยานยนต์บิ๊กไบค์ได้ เนื่องด้วยพระราชบัญญัติจราจรทางบกที่กำหนดการทำใบอนุญาตขับขี่รถจักรยานยนต์ส่วนบุคคลไว้ ผู้ที่จะทำใบอนุญาตใบขับขี่รถจักรยานยนต์ ด้วยเหตุนี้บุคคลที่มีอายุน้อยจึงสามารถขับรถจักรยานยนต์ที่มีพละกำลังที่สูงเนื่องจากกฎหมายไม่ระบุขนาดของ cc และไม่ได้แบ่งช่วงอายุของผู้ขับซึ่งผู้ขับขี่ยังไม่มีวุฒิภาวะที่มากเพียงพอต่อการรับผิดชอบต่อสังคมจึงเป็นต้นเหตุของการเกิดอุบัติเหตุบนท้องถนนและผู้ขับขี่ที่เกิดอุบัติเหตุมีอายุที่น้อยลงเนื่องด้วยสาเหตุนี้ ดังนั้นจึงควรมีกฎหมายที่จะเข้ามาแก้ไขปัญหาดังกล่าวโดยการเสนอแก้ไขกฎหมายที่ว่าด้วยใบอนุญาตขับขี่รถจักรยานยนต์ที่มีพละกำลังไม่เกิน 400 cc แบ่งออกมาเป็นรถจักรยานยนต์ที่มี cc เกินกว่า 400 cc และยังมีการสอบโดยเฉพาะของจักรยานยนต์บิ๊กไบค์ที่มีขนาดเกินกว่า 400 cc ไม่ว่าจะเป็นภาคทฤษฎีหรือปฏิบัติซึ่งจะต้องมีการแก้ไขภาคทฤษฎีและปฏิบัติใหม่ทั้งหมด โดยทฤษฎีและภาคปฏิบัติจะนำมาจากกฎหมายประเทศญี่ปุ่นหรือเทียบเคียงให้มากที่สุดเพื่อหวังว่าจะลดอุบัติเหตุบนท้องถนนของจักรยานยนต์บิ๊กไบค์ได้

คำสำคัญ: ใบอนุญาตขับขี่รถบิ๊กไบค์ , ใบขับขี่มอเตอร์ไซค์ทั่วไป

Abstract

Nowadays, there is a trend of big bike riding and there is a tendency to increase from the sales of the big bike market. Beginning to have more and more And more and more accidents as well As the rider still lack the experience and skills to ride a big bike And causing loss on the road continuously because current riders can drive big bikes Due to the Road Traffic Act that sets out a personal motorcycle driver's license Who will issue a motorcycle driver's license For this reason, young people can drive motorcycles with high power Because the law does not specify the size of the cc and does not divide the age range of the driver, which the driver does not have much maturity Sufficient to social responsibility, therefore is the root cause of road accidents and motorcyclists that are Accidents have decreased in age due to this reason Therefore, there should be a law to come and solve the problem by Proposed amendments to the law on motorcycle driving licenses with no more than 400 cc of power Turned out to be a motorcycle that has CC more than 400 cc and also has a special exam of motorcycles Big bikes that are larger than 400 cc, whether theoretical or practical, will need to be revised for the theory And perform a whole new operation The theory and practice will be taken from Japanese law or comparable as much as possible in the hope of reducing the accident on the road of big bikes.

Keywords: Big bike driver's License, General motorcycle license

บทนำ

เนื่องด้วยผู้เริ่มหัดขับขี่รถจักรยานยนต์บิ๊กไบค์ในเริ่มแรกหรือที่เรียกว่านักขับมือใหม่ที่ยังขาดทักษะและประสบการณ์ของการขับขี่รถจักรยานยนต์บิ๊กไบค์ให้เกิดอุบัติเหตุบนท้องถนนจนทำให้ตนเองหรือเพื่อนร่วมทางต้องประสบอุบัติเหตุไปด้วย สาเหตุเหล่านี้เนื่องด้วยจากรถจักรยานยนต์บิ๊กไบค์ที่มีราคาสูงผู้ขับขี่จึงกลัวที่จะฝึกทักษะต่างๆ ไม่กล้าที่จะลองกับรถตัวเองหรือในภาษาวงการบิ๊กไบค์คือการ “ล้มแปะ” ด้วยน้ำหนักลดที่มากกว่า 200 กิโลกรัม อย่างไรก็ดีเมื่อปี 2560 ได้มีการจัดอบรมภาคปฏิบัติทางบริษัท AP Honda ได้จัดให้ผู้ที่ซื้อรถจักรยานยนต์บิ๊กไบค์ของทาง Honda นั้นได้เข้าอบรมก่อนที่จะนำรถไปขับบนถนนจริงทำให้ผู้ขับขี่มีความมั่นใจในการใช้รถใช้ถนนและรู้จักทักษะต่างๆ ในการควบคุม แต่ก็ยังมีผู้ขับขี่รถจักรยานยนต์บิ๊กไบค์ที่ยังไม่ได้มีทักษะในการขับขี่อีกมากดังนั้นควรเห็นว่ากรมการขนส่งทางบกควรจะมีภาคปฏิบัติและทฤษฎีที่แยกออกจากรถจักรยานยนต์ทั่วไปเพื่อวัดทักษะของผู้ขับขี่ที่จะเข้าขอใบขออนุญาตใบขับขี่ที่มี CC มากกว่า 400CC มีแรงม้าที่มากกว่า 40 แรงม้าขึ้นไป ในภาคปฏิบัติท่าทางการปฏิบัตินำจะนำมาจากในสนามแข่งประยุกต์ออกมาให้ใช้บนท้องถนนอาทิเช่น Counter steering หรือการเข้าโค้งโดยหักแฮนด์ไปยังองศาที่ตรงกันข้าม และการเลี้ยวในมุมแคบจะทำให้ผู้ขับขี่นั้นสามารถคล่องตัวในเมืองได้มากขึ้นและเมื่อหลังการทำใบขับขี่เสร็จ การต่อใบอนุญาตขับขี่ควรมีการ Test การขับขี่อีกครั้งเพื่อให้เป็นที่มั่นใจในการขับขี่รถจักรยานยนต์บิ๊กไบค์ของผู้ขับขี่เอง สามารถให้ทางผู้ผลิตสามารถจัดการเรียนการสอนการขับขี่รถจักรยานยนต์บิ๊กไบค์และสามารถออกใบอนุญาตใบขับขี่ให้แก่ผู้ที่ผ่านการฝึกอบรมของทางบริษัทได้ด้วย

ที่มาและความสำคัญ

ปัจจุบันอุบัติเหตุร้ายแรงหลายครั้งที่ทำให้เกิดข่าวขึ้นทุกวันด้วยการออกแบบที่น่าดึงดูดและเครื่องยนต์ที่ทรงพลังทำให้บิ๊กไบค์เป็นเครื่องจักรฆ่าเสียชีวิตของผู้ยังขาดประสบการณ์ รวมถึงผู้ที่มีประสบการณ์ก็ยังสามารถพลาดได้ ซึ่งจะเห็นข่าวไม่เว้นในแต่ละวัน ซึ่งกรมขนส่งทางบกพบว่ามีรถจักรยานยนต์ขนาดใหญ่เกือบ 165,000 คันเข้ามาในประเทศไทยและคาดว่าจะใกล้ถึง 200,000 คันภายในสิ้นปีนี้บิ๊กไบค์มักเกิดอุบัติเหตุจำนวนมากที่เกี่ยวข้องกับจักรยานขนาดใหญ่เนื่องจากมักถูกขี่โดยบุคคลที่ร่ำรวยและมีชื่อเสียงจึงทำให้เกิดกระแสทำให้เยาวไทยมีความนิยมเป็นอย่างมา และพบว่ามีรายงานผู้เสียชีวิตจากอุบัติเหตุทางถนน 9,961 รายในช่วงเจ็ดเดือนแรกของปีนี้โดยมีผู้บาดเจ็บมากกว่า 554,000 คน แม้ว่าจำนวนผู้เสียชีวิตจำนวนเล็กน้อยนั้นเกิดจากจักรยานขนาดใหญ่เมื่อเทียบกับมอเตอร์ไซค์ขนาดเล็ก แต่อัตราการเสียชีวิตของนักขี่จักรยานใหญ่เพิ่มขึ้นอย่างมากที่ ในปีนี้ เนื่องจากผู้ที่ขับขี่รถยนต์ทั้งจักรยานยนต์บิ๊กไบค์ในปัจจุบันมักจะเกิดความอุบัติเหตุบนท้องถนนซึ่งหากผู้ขับขี่ที่มีทักษะไม่เพียงพอก็มักส่งผลให้เกิดอุบัติเหตุที่รุนแรงจากการใช้ความเร็วสูงเกินความสามารถในการควบคุมรถของตนเอง หรือไม่สามารถประคองน้ำหนักของรถที่หลาย ๆ รุ่นหนักเกินกว่า 200 กิโลกรัม บางรายก็เกิดอุบัติเหตุน้อย ขั้นร้ายแรงบางรายก็เสียชีวิต โดยสาเหตุทั้งหลายนั้นล้วนแล้วแต่เกิดจากผู้ขับขี่ที่ยังขาดประสบการณ์และทักษะการขับขี่บนท้องถนน ดังนั้น มอเตอร์ไซค์ **50 cc จนถึง 1800 cc ขึ้นไป** ซึ่งการขับขี่รถจักรยานยนต์ที่มีสูงเกินกว่า 40 แรงม้า หรือมากกว่า 400 ซีซี มันมีพละกำลังมากกว่ารถจักรยานยนต์ขนาด 150 cc เป็นอย่างมากทำให้ผู้คนคิดว่า สามารถควบคุมรถจักรยานยนต์ได้เหมือน 150 cc รวมถึงความประพฤติไม่ดีก่อเกิดอันตรายบนท้องถนน[1]

นิยามและทฤษฎี

จากการศึกษานิยามและทฤษฎีการขอใบอนุญาตขับขี่รถจักรยานยนต์ และกฎหมายการออกใบอนุญาตรถจักรยานยนต์ของประเทศไทยและประเทศญี่ปุ่น มีดังนี้

2.1 เงื่อนไขการการทำใบขับขี่รถจักรยานยนต์ในประเทศไทย[2]

ใบอนุญาตขับ**ขี่รถจักรยานยนต์** ประเภทใบขับขี่**รถจักรยานยนต์ในปัจจุบัน**ใบอนุญาตขับรถจักรยานยนต์ส่วนบุคคล อายุ 5 ปี **และ** ใบอนุญาตขับรถจักรยานยนต์สาธารณะ อายุ 3 ปีต้องมีอายุไม่ต่ำกว่า 18 ปีบริบูรณ์ แต่ถ้าเป็นผู้ขอใบขับขี่รถจักรยานยนต์ส่วนบุคคลชั่วคราวสำหรับรถจักรยานยนต์ที่มีขนาดความจุกระบอกสูบรวมกันไม่เกิน 110 ลูกบาศก์เซนติเมตรต้องมีอายุไม่ต่ำกว่า 15 ปีบริบูรณ์ ” นั่นหมายความว่าหากคุณอายุมากกว่า 18 ปีบริบูรณ์ขนาดกระบอกสูบรวมกันก็สามารถเกิน 110 ลูกบาศก์เซนติเมตร (cc) ได้โดยไม่มีข้อจำกัด และไม่ผิดพระราชบัญญัติใด ๆ โดยเบื้องต้นการได้ใบขับขี่ครั้งแรกนั้นจะเรียกว่า “ใบขับขี่รถจักรยานยนต์ส่วนบุคคลชั่วคราว” มีอายุการใช้งาน 1 ปี และสามารถนำไปเปลี่ยนจากชนิดชั่วคราว เป็นชนิด 5 ปี ได้ โดยมีหลักเกณฑ์ว่าต้องอายุครบ 18 ปีบริบูรณ์ และถือใบขับขี่ชนิดชั่วคราวมาไม่น้อยกว่า 1 ปี (ยื่นขอก่อนใบขับขี่สิ้นอายุได้ไม่เกิน 60 วัน) เป็นที่สรุปได้ว่า ใบขับขี่

[1] กรมการขนส่งทางบก (2564) https://www.dlt.go.th/th/ เงื่อนไขการสอบใบอนุญาตขับขี่

[2] พระราชบัญญัติรถยนต์ (ฉบับที่ 18) พ.ศ. 2562 มาตรา 46 คำอธิบายเงื่อนไขการการทำใบขับขี่รถจักรยานยนต์ในประเทศไทย

รถจักรยานยนต์ประเทศไทยขี่บิ๊กไบค์ได้ทุกรุ่นทุกยี่ห้อ ต่างจากหลาย ๆ ประเทศที่มีการจำกัดประเภทของการใช้งานไว้อย่าชัดเจนว่าประเภทไหนสามารถขับขี่รถจักรยานยนต์ได้ไม่เกินกี่ cc

2.2 การสอบใบขับขี่รถจักรยานยนต์ในปัจจุบันในประเทศไทย[1]

1 .คุณสมบัติขอผู้ที่จะขอใบขับขี่

1.1 ผู้ขอใบขับขี่รถมอเตอร์ไซค์ส่วนบุคคลชั่วคราว ต้องมีอายุไม่ต่ำกว่า 18 ปีบริบูรณ์

1.2 ผู้ขอใบขับขี่รถมอเตอร์ไซค์ส่วนบุคคลที่มีขนาดความจุกระบอกสูบรวมกันไม่ เกิน 110 ลูกบาศก์เซนติเมตร ต้องมีอายุไม่ต่ำกว่า 15 ปีบริบูรณ์

1.3 ผู้ขอใบขับขี่รถมอเตอร์ไซค์สาธารณะ ต้องมีอายุไม่ต่ำกว่า 20 ปีบริบูรณ์

2. มีทักษะในการขับขี่

3. ไม่เป็นผู้พิการจนเป็นที่เห็นได้ว่าไม่สามารถขับขี่ได้

4. ไม่มีโรคประจำตัวที่ผู้ประกอบวิชาชีพเวชกรรมเห็นว่าอาจเป็นอันตรายขณะขับรถ

2.3 ใบอนุญาตรถจักรยานยนต์ของประเทศญี่ปุ่น[2]

ทั้งใบขับขี่ญี่ปุ่นทั่วไปหรือใบขับขี่รถจักรยานยนต์ต่างประเทศจะไม่อนุญาตให้คุณขี่จักรยานในญี่ปุ่น จะต้องได้รับการรับรองในทางกฎหมายญี่ปุ่นที่จะกำหนดให้มีใบอนุญาตใบขับขี่รถจักรยานยนต์ซึ่งแบ่งขนาดเครื่องยนต์ 125 cc หรือต่ำกว่านั้นจะต้องใช้ใบอนุญาตขับขี่ธรรมดาหรือใบอนุญาตสีเขียวหรือผู้ที่มีอายุ 16 ขึ้นไป และบุคคลที่จะสามารถทำใบขับขี่ที่มากกว่า 125 ซีซีขึ้นไปจนถึง 400 cc จะต้องมีใบอนุญาตใบขับขี่ที่ต้องสอบต่อจากใบอนุญาตขับขี่ธรรมดาขึ้นไป และถ้าจะทำใบอนุญาตใบขับขี่ที่มากกว่า 400 cc ขึ้นไปจะต้องมีการสอบภาคทฤษฎีและปฏิบัติตามขั้นตอนและจึงได้ใบอนุญาตขับขี่สีน้ำเงินและเมื่อใกล้ถึงวันหมดอายุจะได้รับใบเตือนทางไปรษณียบัตรจากศูนย์การขับขี่ในท้องถิ่นซึ่งเชิญให้คุณต่ออายุ คุณสามารถสมัครต่ออายุใบขับขี่ได้ที่ศูนย์ขับรถหรือทำการนัดหมายที่แผนกตำรวจท้องและจะต้องทำการทดสอบสายตาและดูการบรรยายเรื่องความปลอดภัยการจราจร

2.4 คุณสมบัติ[3]

1. อายุ 18 ปีขึ้นไป (รถจักรยานยนต์ธรรมดาอายุ 16 ปีขึ้นไปใบขับขี่ขนาดกลางมีอายุ 20 ปีขึ้นไปใบขับขี่ขนาดใหญ่มีอายุ 21 ปีขึ้นไป)

2. ใบขับขี่รถยนต์และรถจักรยานยนต์จะต้องมีสายตาที่ชัดเจนหรือระยะการมองเห็นตั้งแต่ 0.7 ขึ้นไปสำหรับทั้งสองตาและ 0.3 หรือมากกว่าสำหรับแต่ละตา หากความสามารถในการมองเห็นของตาข้างใดข้างหนึ่งน้อยกว่า 0.3 หรือหากมองไม่เห็นแนวสายตาของอีกตาจะต้องมี 150 องศาขึ้นไปทางซ้ายและขวา(สายตาเอียง)

3. ใบอนุญาตรถจักยานยนต์ขนาดกลางและขนาดใหญ่มีความสามารถในการมองเห็น 0.8 หรือมากกว่าสำหรับทั้งตาและ 0.5 หรือมากกว่าสำหรับแต่ละตาและมีการตรวจสอบ 3 ครั้งด้วยเครื่องทดสอบการรับรู้เชิงลึกของวิธีการแบบสามบาร์และข้อผิดพลาดเฉลี่ยคือ 2 ซม.

2.5 กำหนดประเภทของใบอนุญาตรถจักรยานยนต์ที่จะได้รับ

ใบอนุญาตรถจักรยานยนต์ประเภทต่อไปนี้

มอเตอร์ไซค์ขนาดใหญ่ ... ไม่ จำกัด

มอเตอร์ไซค์ขนาดกลาง ... 400 ซีซีหรือเล็กกว่า

รถจักรยานยนต์ขนาดเล็ก ... 125 ซีซีหรือเล็ก

2.6 เงื่อนไขสำคัญในการต่อใบอนุญาตขับขี่ของญี่ปุ่น

ใบขับขี่ใหม่ (ใบอนุญาตสีเขียว) มีอายุใช้งานได้สามปี หลังจากต่ออายุแล้วใบอนุญาตก็ยังดีอีกสามปีในฐานะ “คนขับธรรมดา” (ใบอนุญาตสีน้ำเงิน) เมื่อคุณขับรถครบหกปีโดยไม่มีการละเมิดบันทึก (สามเป็นไดรเวอร์ใหม่และสามเป็นไดรเวอร์ธรรมดา) ก็สามารถสมัครใบอนุญาตสีทองซึ่งมีอายุสำหรับใบขับขี่ห้าปีและสามารถต่อได้เรื่อยๆ

2.9 การทดสอบภาคปฏิบัติประกอบด้วยดังต่อไปนี้[1]

1. คานทรงตัว ความยาว 15 เมตร; กว้าง 30 ซม. จะข้ามใน 7 วินาทีสำหรับมอเตอร์ไซค์ขนาดกลางและ 10 วินาทีสำหรับจักรยานใหญ่

2. สลาลอม สลาลมปัดโคนเป็นเส้นตรง ต่ำกว่า 8 วินาทีสำหรับขนาดกลางและ 7 วินาทีสำหรับมอเตอร์ไซค์ขนาดใหญ่

3. ทางลาดบนไม้กระดานขนาดเล็กเว้นระยะห่างไม่เกิน 8 เมตร ที่จะข้ามยืนบนจักรยานในกว่า 10 วินาที (จักรยานขนาดกลางได้รับการยกเว้นจากข้อกำหนดนี้)

4. ขับขี่ให้รถหยุดนิ่งบนทางลาดโดยไม่ให้รถไหลย้อนกลับ

5. โค้ง-S ไปรอบ ๆ เส้นโค้งรูปตัว S ไม่ จำกัด เวลา

6. ท่าเหวี่ยง ต้องไม่ชนกรวยทั้งสองข้าง ไม่จำกัดเวลา

7. หยุดฉุกเฉิน หยุดภายใน 11 เมตรจากความเร็ว 40 กม. ต่อชั่วโมงโดยไม่ต้องเลี้ยว
บนพื้นที่พื้นเปียกน้ำ

8. ทางข้ามทางรถไฟ นี่คือการจำลองทางรถไฟจำลองที่ต้องหยุดและตรวจสอบทางซ้ายและขวาก่อน

วิเคราะห์กฎหมายว่าด้วยใบอนุญาตขับขี่รถบิ๊กไบค์

กฎหมายว่าด้วยใบอนุญาตขับขี่รถบิ๊กไบค์

เมื่อศึกษาถึงกฎหมายที่ใช้ในปัจจุบัน ในการทำใบอนุญาตขับขี่รถจักรยานยนต์ ตามพระราชบัญญัติรถยนต์ จะพบได้ว่ายังมีข้อบกพร่อง ในหลายส่วน ไม่ว่าจะเป็นภาคปฏิบัติหรือทฤษฎีในการสอบเพื่อขอใบอนุญาตขับขี่และอายุของผู้ขับขี่ยังน้อยเกินไปจึงก่อให้เกิดการขาดทักษะของผู้ขับขี่และวุฒิภาวะทางอารมณ์ความคึกคะนองจึงนำมาซึ่งอุบัติเหตุบนท้องถนนทั้งนี้ไม่ว่าจะเป็นรถจักรยานยนต์ธรรมดาหรือจักรยานยนต์บิ๊กไบค์ซึ่งคาดการณ์ว่าการออกกฎหมายว่าด้วยการทำใบอนุญาตขับขี่รถจักรยานยนต์บิ๊กไบค์ขึ้นมาจะสามารถควบคุมผู้ที่จะขับขี่รถจักรยานยนต์บิ๊กไบค์เนื่องด้วยกฎหมายนี้มีความเข้มงวดต่อการขับขี่เป็นอย่างมากและทำให้ผู้ขับขี่ตระหนักถึงปัญหาการเกิดอุบัติเหตุ และควบคุมเยาวชนที่มีความคึกคะนองหรือการลอกเลียนแบบในทางอันตราย นอกจากนี้กฎหมายว่าด้วยใบอนุญาตขับขี่รถจักรยานยนต์บิ๊กไบค์ยังจัดระเบียบของลักษณะประเภทใบขับขี่และผู้ที่จะขอออกใบอนุญาตขับขี่ ได้ง่ายมากขึ้น

สรุป

จากการศึกษาแนวคิด ทฤษฎีกฎหมายว่าด้วยใบอนุญาตขับขี่รถบิ๊กไบค์ของประเทศญี่ปุ่นหลักเกณฑ์ขอใบอนุญาตขับขี่ การขับขี่รถจักรยานยนต์ในประเทศญี่ปุ่นซึ่งมีการแบ่งใบอนุญาตขับขี่รถจักรยานยนต์ตาม cc และอายุของผู้ขับขี่ ซึ่งจะมีการแบ่งประเภทรถดังนี้ รถจักรยานยนต์ ขนาดเล็กไม่เกิน 125 cc และ ขนาดกลางไม่เกิน 400 cc และ ขนาดใหญ่ไม่จำกัด cc การขอรับทำใบอนุญาตขับขี่รถจักรยานยนต์จะต้องเข้าฝึกอบรมจากกรมขนส่งประเทศญี่ปุนหรือสถาบันที่สอนการขับขี่เพื่อที่จะนำใบประกาศนียบัตรมาเพื่อแสดงต่อขนส่งประเทศญี่ปุ่นในการทำใบอนุญาตขับขี่การอบรมของประเทศญี่ปุ่นจะมีการอบรมภาคทฤษฎีเป็นเวลา 4 ชั่วโมงและภาคปฏิบัติจะมีขั้นตอนการปฏิบัติตามขนาดและประเภทของจักรยานยนต์ รวมไปถึงการแบ่งประเภทของใบขับขี่ที่มีลักษณะต่างกันและอายุการใช้งานที่ต่างกันออกไป ซึ่งจะแบ่งหลักๆเป็น 3 สีมีดังนี้ สีขาว สีน้ำเงินและสีทอง

เมื่อเทียบกับกฎหมายพระราชบัญญัติจราจรทางบกและพระราชบัญญัติรถยนต์ ของประเทศไทย พบว่าในประเทศไทยไม่ได้มีการแบ่ง cc และขนาดของรถจักรยานยนต์เพียงแต่กำหนดอายุของผู้ขับขี่เท่านั้น และไม่สามารถนำประกาศนียบัตรจากสถาบันสอนขับขี่มาทำใบขับขี่ได้นอกจากนี้การอบรมหรือการสอบทฤษฎีในประเทศไทยใช้เวลาการอบรมเพียง 1 ชั่วโมงเมื่อเทียบจากของประเทศญี่ปุ่นถือว่าการอบรมยังไม่เพียงพอต่อผู้ขับขี่รวมไปถึงภาคปฏิบัติที่ไม่ว่าจะรถจักรยานยนต์ขนาดเท่าใดก็ต้องสอบในแบบทดสอบเหมือนกันทั้งหมด ไม่ว่าจะเป็นรถจักรยานยนต์ธรรมดาคือรถจักรยานยนต์บิ๊กไบค์ และในประเทศไทยการทำใบขับขี่นั้นจะไม่ได้แบ่งในลักษณะเหมือนประเทศญี่ปุ่นที่เป็นสี 3 สีเพื่อแสดงถึงลักษณะของจักรยานยนต์ที่ขับขี่

[1] Jason Gatewood (2020) https://www.japanistry.com/getting-a-motorcycle-license-in-japan/ คำอธิบายการทดสอบภาคปฏิบัติของประเทศญี่ปุ่น

ข้อเสนอแนะ

ผู้เขียนเห็นถึงปัญหาที่ผู้เขียนที่ได้รับจากประสบการณ์จริงในเรื่องการขับขี่บิ๊กไบค์ที่มีความอันตรายและผู้ขี่ที่ขาดทักษะการขับขี่บิ๊กไบค์หรือความคึกคะนองของวัยรุ่น ทำให้เกิดปัญหาประสพอุบัติเหตุ ดังนั้นผู้เขียนจึงตระถึงกฎหมายที่จะมาควบคุมการขับขี่บิ๊กไบค์ดังกล่าวมาเห็นควรแก้ปัญหา ดังนี้

1. การกำหนดอายุของผู้ขับขี่ที่มากขึ้นจากเดิม 18 ปีเปลี่ยนเป็น 21 ปีในการขอใบอนุญาตขับขี่ที่มากกว่า 400 cc ขึ้นไป

2. ให้มีการอบรมภาคทฤษฎีที่มากขึ้นจากเดิม 1 ชั่วโมงเพิ่มเป็น 4 ชั่วโมง

3. ภาคปฏิบัติสำหรับรถจักรยานยนต์บิ๊กไบค์จะเทียบเคียงภาคปฏิบัติจากภาคปฏิบัติของประเทศญี่ปุ่นอาทิเช่น การทรงตัวบนรถจักรยานยนต์บน และการเลี้ยวมุมแคบ

ดังนั้น ผู้เขียนเห็นควรปรับปรุงแก้ไขร่างกฎกระทรวงกำหนดหลักเกณฑ์ใบอนุญาตขับขี่บิ๊กไบค์ โดยภาครัฐควรมีการส่งเสริมการเรียนการสอนขับขี่รถจักรยานยนต์บิ๊กไบค์โดยเฉพาะเนื่องด้วยทางบริษัทที่เป็นเอกชนที่รับฝึกสอนขับรถจักรยานยนต์บิ๊กไบค์มีราคาการสอนที่แพงจึงทำให้ผู้ขับขี่รถจักรยานยนต์บิ๊กไบค์ไม่อยากที่จะเรียนภาครัฐควรมีการฝึกสอน ในหลักสูตรก่อนที่จะสอบใบขับขี่และมันไม่เพียงแต่เกี่ยวกับทักษะการขับขี่เท่านั้นมันเป็นเรื่องเกี่ยวกับวุฒิภาวะเมื่อพูดถึงกระบวนการตัดสินใจ

ความสัมพันธ์ระหว่างภาวะผู้นำกับการบริหารงานตามหลักธรรมาภิบาลของเทศบาลตำบลท่าช้างคล้อง อำเภอผาขาว จังหวัดเลย
Relationship between Leadership and Good Governance of Tha Chang Klong Subdistrict Municipality, Pha Khao District, Loei Province

พระมหาเริงชัย โนนนัน, (Phramaha Roengchai Nonnan)[1]
วิลาสินี จินตลิขิตดี, (Vilasinee Jintalikhitdee)[2]

บทคัดย่อ

การศึกษานี้มีจุดมุ่งหมายเพื่อศึกษา ความสัมพันธ์ระหว่างภาวะผู้นำกับการบริหารงานตามหลักธรรมาภิบาลของเทศบาล โดยเป็นการวิจัยเชิงปริมาณ เก็บข้อมูลจากบุคลากรในเทศบาล จำนวน 94 คน ด้วยแบบสอบถามแบบมีโครงสร้างและทดสอบสมมติฐานด้วยการวิเคราะห์ความแปรปรวนทางเดียว และวิเคราะห์ความสัมพันธ์โดยใช้ค่าสัมประสิทธิ์สหสัมพันธ์ แบบเพียร์สัน ที่ระดับนัยสำคัญทางสถิติ 0.01 ผลการวิจัยพบว่า ภาวะผู้นำมีความสัมพันธ์กับการบริหารงานตามหลักธรรมาภิบาลของเทศบาลในทางบวกอย่างมีนัยสำคัญ มากที่สุด คือ ด้านการกระตุ้นทางปัญญา ด้านการสร้างแรงบันดาลใจ ด้านการคำนึงถึงความเป็นปัจเจกบุคคล และด้านการใช้อิทธิพลเชิงอุดมคติ ตามลำดับ

คำสำคัญ: การบริหารงาน/หลักธรรมาภิบาล/การปกครองส่วนท้องถิ่น/เทศบาล

Abstract

This study aims to study the relationship between leadership and administration according to the good governance principles of the municipality. It is quantitative research collecting data from 94 municipal personnel using a structured questionnaire and hypothesis testing by one-way ANOVA analysis of variance. The relationship was analyzed by Pearson correlation coefficient at the statistical significance level of 0.01. The findings revealed that Leadership had a positive relationship with the governance of municipalities. The most significant was the aspect of intellectual stimulation. inspiring individuality and ideological influence, respectively.

Keywords: Leadership/Administration/Good Governance/Local Government/Municipality

บทนำ

หลักธรรมาภิบาลหรือหลักการบริหารจัดการบ้านเมืองที่ดี (Good Governance) มีความจำเป็นอย่างยิ่งสำหรับประเทศที่กำลังพัฒนา เพราะหลักธรรมาภิบาลเป็นหลักการบริหารที่สามารถตรวจสอบได้ และเป็นระบบที่เปิดโอกาสให้ประชาชนมีส่วนร่วมในการบริหารจัดการ ซึ่งในปัจจุบันสถานการณ์ด้านการเมืองเศรษฐกิจ สังคม การบริหารงานของภาครัฐของประเทศไทย มีความเปลี่ยนแปลงไปอย่างรวดเร็ว ทั้งนี้เนื่องจากความก้าวหน้าทางด้านการสื่อสารเทคโนโลยี การถ่ายทอดข้อมูลข่าวสารอย่างรวดเร็วสู่ประชาชน และสภาพแวดล้อมได้เปลี่ยนแปลงไปอย่างรวดเร็วสู่ยุคโลกาภิวัตน์ แต่ระบบการบริหารจัดการของภาครัฐ และบริบทสังคมไทย ไม่ทันต่อความเปลี่ยนแปลงที่เกิดขึ้นอย่างรวดเร็ว ดังนั้น การนำหลักธรรมาภิบาลหรือการบริหารจัดการบ้านเมืองที่ดี (Good Governance) มาใช้จึงมีความจำเป็นอย่างยิ่ง เพราะหลักธรรมาภิบาลเป็นระบบเปิด สามารถให้สถานประการธุรกิจเอกชนและประชาชนตรวจสอบได้อันจะช่วยให้ประเทศชาติมีความสงบสุขและพัฒนาอย่างรวดเร็วและยั่งยืน (ไชยวัฒน์ ค้ำชู, 2548)

การนำแนวคิดหลักธรรมาภิบาลมาใช้ในการบริหารงานของทั้งภาครัฐและภาคเอกชน ในส่วนของภาครัฐให้ความสำคัญกับหลักประชาธิปไตยแบบมีส่วนร่วมของประชาชนและแนวคิดเรื่องของการเป็นพลเมืองชุมชน ประชาสังคม โดยให้ความสำคัญในคุณค่าและศักดิ์ศรีแห่งความเป็นมนุษย์ การกระจายอำนาจให้แก่ชุมชน ซึ่งส่งผลให้บทบาทหน้าที่ของภาครัฐเปลี่ยนแปลงไปจากเดิม เป็นผู้ปฏิบัติเปลี่ยนเป็นผู้สนับสนุน กำกับดูแลและติดตามประเมินผล ซึ่งทำให้กระบวนการหลาย ๆ ด้านขององค์การภาครัฐต้องปรับบทบาท

[1] นักศึกษาปริญญาโท หลักสูตรรัฐประศาสนศาสตรมหาบัณฑิต สาขารัฐประศาสนศาสตร์ วิทยาลัยการเมืองการปกครอง มหาวิทยาลัยราชภัฏสวนสุนันทา E-mail address: Teiyruengchai@gmail.com
[2] อาจารย์ที่ปรึกษา หลักสูตรรัฐประศาสนศาสตรมหาบัณฑิต สาขารัฐประศาสนศาสตร์ วิทยาลัยการเมืองและการปกครอง มหาวิทยาลัยราชภัฏสวนสุนันทา

หน้าที่ รวมทั้งการทบทวนถึงแนวทางการพัฒนา การคำนึงถึงผลประโยชน์สาธารณะเป็นสิ่งสำคัญ และในส่วนของภาคเอกชนนั้นมุ่งเน้นไปทางด้านการตรวจสอบได้ โปร่งใส มีความรับผิดชอบต่อสังคม มีการตรวจสอบภายใน เพื่อให้เกิดประสิทธิภาพและความรับผิดชอบต่อส่วนรวม ซึ่งการสร้างธรรมาภิบาลจำเป็นต้องพัฒนาไปพร้อม ๆ กันทั้ง 3 ส่วน คือภาครัฐ ภาคเอกชน และภาคประชาสังคม (รัชยา ภักดีจิตต์, 2555)

การดำเนินการสร้างธรรมาภิบาลในภาคราชการ เกิดขึ้นตามประกาศของระเบียบสำนักนายกรัฐมนตรีว่าด้วยการสร้างระบบบริหารกิจการบ้านเมืองและสังคมที่ดี พ.ศ.2542 และประกาศราชการกิจจานุเบกษา เมื่อวันที่ 10 สิงหาคม 2542 ระเบียบนี้มีผลบังคับใช้กับหน่วยงานของรัฐตั้งแต่วันที่ 11 สิงหาคม 2542 สำนักงานคณะกรรมการพัฒนาระบบราชการ (ก.พ.) สำนักงบประมาณ และสำนักงานคณะกรรมการพัฒนาเศรษฐกิจและสังคมแห่งชาติ โดยระเบียบนี้กำหนดให้ทุกหน่วยงานของรัฐ ดำเนินการบริหารจัดการโดยยึดหลักการ 6 หลักได้แก่ หลักนิติธรรม หลักคุณธรรม หลักความโปร่งใส หลักการมีส่วนร่วม หลักความรับผิดชอบ และหลักความคุ้มค่า (สถาบันสิ่งแวดล้อมไทยและสถาบันพระปกเกล้า, 2546 : 12-13)

องค์กรปกครองส่วนท้องถิ่น เป็นหน่วยงานหนึ่งของภาครัฐ อยู่ใกล้ชิดประชาชนมากที่สุด โดยทำหน้าที่ แทนรัฐในการจัดการบริการสาธารณะ การบริหารจัดการกิจการต่าง ๆ ในพื้นที่รับผิดชอบแก่ประชาชน เพื่อให้เกิดประโยชน์สุขแก่ประชาชนเป็นการสำคัญ กระทรวงมหาดไทยจึงได้จัดทำเกณฑ์การบริหารกิจการบ้านเมืองที่ดีขององค์กรปกครองส่วนท้องถิ่น เพื่อให้องค์กรปกครองส่วนท้องถิ่นได้นำไปใช้เป็นแนวทางในการปฏิบัติบริหารจัดการภารกิจในความรับผิดชอบต่อไป (กรมส่งเสริมการปกครองส่วนท้องถิ่น, 2556)

จากแนวคิดของนักวิชาการตามที่ได้ศึกษามานั้น ได้เสนอเกี่ยวกับการพัฒนาระบบการบริหารจัดการขององค์กรปกครองส่วนท้องถิ่นพบว่า มีความสอดคล้องกันหลายประเด็น ได้แก่ องค์กรปกครองส่วนท้องถิ่นต้องมีความรู้สมัยใหม่ที่เกี่ยวข้อง เพื่อนำความรู้นั้นมาบริหารจัดการภายในองค์การให้มีประสิทธิภาพ องค์กรปกครองส่วนท้องถิ่นต้องมีเป้าหมายที่ชัดเจนในการพัฒนา เพื่อนำความรู้มาปรับใช้ได้อย่างเหมาะสมและเกิดการพัฒนาตามวัตถุประสงค์ องค์กรปกครองส่วนท้องถิ่นต้องปรับปรุงรูปแบบการทำงานให้มีประสิทธิภาพมากขึ้น ไม่ยึดติดกับรูปแบบเดิม ๆ โดยมุ่งเน้นไปที่ผลประโยชน์ของประชาชนในระยะยาวเป็นหลักมากกว่าผลประโยชน์ทางการเมืองที่หวังผลเฉพาะหน้า หากรัฐบาลสามารถผลักดันให้เกิดกลไกในการพัฒนาประสิทธิภาพในการบริหารจัดการองค์กรปกครองส่วนท้องถิ่นได้ก็จะช่วยให้ประชาชนได้รับการบริการสาธารณะที่มีคุณภาพ และเกิดการพัฒนาในระดับฐานรากของสังคมที่เข้มแข็งได้อย่างยั่งยืน

เทศบาล เป็นรูปแบบการปกครองส่วนท้องถิ่นที่ถือว่าเป็นหน่วยงานที่รัฐได้กระจายอำนาจสู่ประชาชนในการปกครองตนเองภายใต้บทบัญญัติแห่งรัฐธรรมนูญที่รัฐต้องให้ความเป็นอิสระแก่ท้องถิ่นตามหลักสำคัญของระบบการปครองส่วนท้องถิ่น ประกอบด้วยการจัดให้มีการเลือกตั้ง เพื่อให้คนในท้องถิ่นได้มีโอกาสเข้าไปเป็นตัวแทนประชาชนในการปกครองตนเอง มีองค์กรสภาท้องถิ่น มีเขตพื้นที่ในการบริหารและรับผิดชอบตามหน้าที่ที่ได้กำหนด ให้มีสภานิติบุคคลเพื่อผลสมบูรณ์ในการดำเนินการก่อนิติสัมพันธ์หรือทำนิติกรรม มีรายได้ มีอำนาจในการจัดทำงบประมาณและมีความเป็นอิสระในการปกครองตนเอง โดยมีองค์กรที่คอยกำกับดูแลในระดับนโยบายทั่วไปภายใต้เงื่อนไขของกฎหมาย ระเบียบ คำสั่งของรัฐบาลตามระบบทฤษฎีการกระจายอำนาจ (โกวิทย์ พวงงาม, 2546 : 230-239) แต่ในช่วงหลายปีที่ผ่านมานั้น พบว่ามีการร้องเรียนและตรวจสอบการทุจริตคอรัปชั่นหลายรูปแบบในเทศบาล ด้วยเหตุดังกล่าวทำให้เกิดปัญหาขึ้นในการบริหารเทศบาล เป็นเหตุให้การบริหารราชการส่วนท้องถิ่นย่อหย่อนประสิทธิภาพในการบริหาร ไม่สามารถพัฒนาท้องถิ่นให้เกิดความเจริญก้าวหน้าตามเจตนารมณ์ของการกระจายอำนาจ ส่งผลให้สังคมเกิดความเคลือบแคลงสงสัยในกระบวนการกระจายอำนาจ นอกจากนี้ปัญหาการทุจริตคอรัปชั่น ความไม่โปร่งใสในการดำเนินงานของเทศบาลที่ไม่ได้ผ่านการร้องเรียนหรือไม่ได้รับการตรวจสอบจากหน่วยงานต่าง ๆ ก็ยังมีอีกมาก ซึ่งล้วนเป็นปัญหาสำคัญที่ต้องเร่งดำเนินการแก้ไข (นพดล สุรนัคครินทร์, 2547)

เทศบาลตำบลท่าช้างคล้อง อำภอผาขาว จังหวัดเลย ได้ดำเนินการตามนโยบายโดยการขับ เคลื่อนยุทธศาสตร์ให้สอดคล้องตามแผนพัฒนาอย่างต่อเนื่องจนถึงปัจจุบัน ซึ่งได้ดำเนินการตามแผนพัฒนาของเทศบาลตำบลท่าช้างคล้อง ให้ครอบคลุมและได้มาตรฐานตามโครงสร้างที่ได้กำหนดไว้ เช่น การคมนาคมและการสาธารณูปโภค สาธารณูปการต่าง ๆ ส่งเสริมสนับสนุนงบประมาณเพื่อการดำเนินกิจกรรมต่าง ๆ อันเป็นการส่งเสริมเศรษฐกิจและแก้ไขปัญหาความยากจน ลดรายได้เพิ่มรายจ่ายให้ประชาชนอยู่ดีกินดี ยึดประชาชนเป็นศูนย์กลาง และแก้ไขปัญหาความเดือดร้อนของประชาชน โดยเน้นการมีส่วนร่วมของประชาชน เป็นต้น ซึ่งเทศบาลตำบลท่าช้างคล้องจะต้องยึดตามหลักธรรมาภิบาล 6 ประการ คือ หลักนิติธรรม หลักคุณธรรม หลักความโปร่งใส หลักการมีส่วนร่วม หลักความรับผิดชอบ และหลักความคุ้มค่า มาใช้ในการบริหารองค์กรให้เป็นไปตามหลักการ กฎ ระเบียบ หรือข้อบังคับ เพื่อให้ประชาชนในท้องถิ่นได้มีส่วนร่วมในการตัดสินใจดำเนินการกิจกรรมต่าง ๆ มีการออกกฎ ระเบียบที่เป็นบรรทัดฐานให้คนในท้องถิ่นได้ปฏิบัติร่วม ประชาชนสามารถรับรู้ข้อมูลข่าวสารที่เผยแพร่ออกไปได้ ตรวจสอบการดำเนินขององค์กรได้อย่างโปร่งใส เพื่อให้เกิด

ประสิทธิภาพในการบริหารจนนำไปสู่ประสิทธิผล และใช้จ่ายงบประมาณหรือบริหารทรัพยากรที่มีอยู่ได้อย่างคุ้มค่า (แผนพัฒนาท้องถิ่น เทศบาลตำบลท่าช้างคล้อง, 2564)

จากสภาพปัญหาข้างต้น จึงเกิดความสนใจที่จะศึกษาการบริหารงานตามหลักธรรมาภิบาลของเทศบาลตำบลท่าช้างคล้อง อำเภอผาขาว จังหวัดเลย ซึ่งมีหน้าที่รับผิดชอบในการตอบสนองความต้องการของประชาชนในพื้นที่และปฏิบัติหน้าที่บำบัดทุกข์ บำรุงสุขให้แก่ประชาชน โดยจะได้นำผลการวิจัยมาเป็นข้อมูลในการปรับปรุง แก้ไขปัญหาและเสนอแนะแนวทางในการบริหารงานของเทศบาลตำบลท่าช้างคล้อง เพื่อเป็นประโยชน์ในการบริหารจัดการเกิดประสิทธิผลอย่างเป็นรูปธรรมและสามารถนำไปพัฒนาตามนโยบายการบริหารงานของเทศบาลตำบลท่าช้างคล้องต่อไป

วัตถุประสงค์

เพื่อศึกษาความสัมพันธ์ระหว่างภาวะผู้นำกับการบริหารงานตามหลักธรรมาภิบาลของเทศบาลตำบลท่าช้างคล้อง อำเภอผาขาว จังหวัดเลย

ผลการวิจัย

ตารางที่ 1 แสดงข้อมูลระดับภาวะผู้นำของเทศบาลตำบลท่าช้างคล้อง แยกเป็นรายด้าน

	ภาวะผู้นำของผู้บริหารเทศบาลตำบลท่าช้างคล้อง	ค่าเฉลี่ย	S.D.	ระดับ	อันดับ
1	ด้านการใช้อิทธิพลเชิงอุดมคติ	4.13	.77	มาก	1
2	ด้านการสร้างแรงบันดาลใจ	4.06	.49	มาก	2
3	ด้านการกระตุ้นทางปัญญา	4.05	.52	มาก	3
4	ด้านการคำนึงถึงความเป็นปัจเจกบุคคล	4.06	.55	มาก	2
	รวม	**4.07**	**.48**	**มาก**	

จากตารางที่ 1 แสดงให้เห็นถึงระดับความคิดเห็นต่อการบริหารงานของเทศบาลตำบลท่าช้าง-คล้อง พบว่า บุคลากรที่ปฏิบัติงานเทศบาลตำบลท่าช้างคล้อง อำเภอผาขาว จังหวัดเลย มีความคิดเห็นต่อภาวะผู้นำของผู้บริหารเทศบาลตำบลท่าช้างคล้อง โดยในภาพรวมเมื่อพิจารณาแล้วมีความคิดเห็นต่อภาวะผู้นำในระดับมาก (ค่าเฉลี่ย = 4.07, S.D. = 0.48) เมื่อพิจารณาภาวะผู้นำเป็นรายด้าน บุคลากรมีความคิดเห็นอยู่ในระดับมากทุกด้าน ลำดับแรก คือ ด้านการใช้อิทธิพลเชิงอุดมคติ (ค่าเฉลี่ย = 4.13, S.D. = 0.77) รองลงมาคือ ด้านการสร้างแรงบันดาลใจ (ค่าเฉลี่ย = 4.06, S.D. = 0.49) ด้านการคำนึงถึงความเป็นปัจเจกบุคคล (ค่าเฉลี่ย = 4.06, S.D. = 0.55) และด้านการกระตุ้นทางปัญญา (ค่าเฉลี่ย = 4.05, S.D. = 0.52) ตามลำดับ

ตารางที่ 2 แสดงความสัมพันธ์ของภาวะผู้นำกับการบริหารงานตามหลักธรรมาภิบาลของเทศบาล ตำบลท่าช้างคล้อง โดยภาพรวม

ภาวะผู้นำ		การบริหารงานตามหลักธรรมาภิบาล			
		ค่าสัมประสิทธิ์สหสัมพันธ์ (r)	Sig.	ระดับความสัมพันธ์	ทิศทางความสัมพันธ์
1	ด้านการใช้อิทธิพลเชิงอุดมคติ	.51	.00	ปานกลาง	ทางบวก
2	ด้านการสร้างแรงบันดาลใจ	.73	.00	สูง	ทางบวก
3	ด้านการกระตุ้นทางปัญญา	.79	.00	สูง	ทางบวก
4	ด้านการคำนึงถึงความเป็นปัจเจกบุคคล	.68	.00	ปานกลาง	ทางบวก
รวม		**.80**	**.00**	**สูง**	ทางบวก

**นัยสำคัญทางสถิติที่ระดับ .01

จากตารางที่ 2 พบว่า ในภาพรวมของภาวะผู้นำมีความสัมพันธ์กับการบริหารงานตามหลักธรรมาภิบาลของเทศบาลตำบลท่าช้างคล้อง อย่างมีนัยสำคัญที่ระดับ .01 (Sig = .00) ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้ และมีความสัมพันธ์กันในระดับสูง (r = .80) โดยเป็นความสัมพันธ์กันในทางบวก หมายความว่า ยิ่งมีภาวะผู้นำมากเท่าใด ยิ่งส่งผลให้การบริหารงานตามหลักธรรมาภิบาลของเทศบาลตำบลท่าช้างคล้อง สูงขึ้นตาม ซึ่งภาวะผู้นำที่มีความสัมพันธ์กับการบริหารงานตามหลักธรรมาภิบาลมากที่สุด คือ ด้านการกระตุ้นทางปัญญา (r = .79) รองลงมาคือ ด้านการสร้างแรงบันดาลใจ (r = .73) ด้านการคำนึงถึงความเป็นปัเจกบุคคล (r = .791) และด้านการใช้อิทธิพลเชิงอุดมคติ (r = .51) ตามลำดับ

สรุป

ภาวะผู้นำของเทศบาลตำบลท่าช้างคล้อง อำเภอผาขาว จังหวัดเลย

ผลการวิจัยสรุปได้ว่าบุคลากรที่ปฏิบัติงานในเทศบาลตำบลท่าช้างคล้อง มีความคิดเห็นต่อภาวะผู้นำของผู้บริหารเทศบาลตำบลท่าช้างคล้องในภาพรวมในระดับมาก (ค่าเฉลี่ย) เมื่อพิจารณาภาวะผู้นำเป็นรายด้านพบว่า ด้านการใช้อิทธิพลเชิงอุดมคติสูงที่สุด (ค่าเฉลี่ย 4.13) สอดคล้องกับงานวิจัยของสุทธิพงษ์ พันวิลัย (2563) ได้ศึกษาวิจัยเรื่อง อิทธิพลของภาวะผู้นำการเปลี่ยนแปลงการบริหารงานตามหลักธรรมาภิบาล ต่อคุณภาพการบริการภาครัฐขององค์กรปกครองส่วนท้องถิ่น ในพื้นที่อำเภอกุสุมาลย์ จังหวัดสกลนคร ผลการวิจัยพบว่า 1) ภาวะผู้นำการเปลี่ยนแปลงของผู้บริหารและผู้นำขององค์กรปกครองส่วนท้องถิ่น โดยภาพรวมอยู่ระดับมาก ($\bar{X}$ =4.22) ภาวะผู้นำการเปลี่ยนแปลงของผู้บริหาร และการบริหารงานตามหลักธรรมาภิบาล มีอิทธิพลต่อคุณภาพการบริการภาครัฐ ขององค์กรปกครองส่วนท้องถิ่น อย่างมีนัยสำคัญทางสถิติที่ระดับ .05 ซึ่งสามารถนำไปปรับใช้กับการทำงานของเทศบาลในด้านการใช้ภาวะผู้นำของผู้บริหารเทศบาลไปในการเป็นตัวอย่างที่ดีในการทำงานตามหลักธรรมาภิบาลที่ดีแก่บุคลากรของเทศบาล เพื่อให้การบริหารงานของเทศบาลสำเร็จลุล่วงตามภารกิจ

ความสัมพันธ์ระหว่างภาวะผู้นำกับการบริหารงานตามหลักธรรมาภิบาลของเทศบาลตำบลท่าช้างคล้อง อำเภอผาขาว จังหวัดเลย

ผลการทดสอบสมมติฐานสรุปได้ว่าในภาพรวมของภาวะผู้นำมีความสัมพันธ์กับการบริหารงานตามหลักธรรมาภิบาลของเทศบาลตำบลท่าช้างคล้อง อย่างมีนัยสำคัญที่ระดับ ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้ และมีความสัมพันธ์กันในทางบวกระดับสูง หมายความว่า ยิ่งมีภาวะผู้นำมากเท่าใด ยิ่งส่งผลให้การบริหารงานตามหลักธรรมาภิบาลของเทศบาลตำบลท่าช้างคล้อง สูงขึ้นตาม ซึ่งภาวะผู้นำที่มีความสัมพันธ์กับการบริหารงานตามหลักธรรมาภิบาลมากที่สุด คือ ด้านการกระตุ้นทางปัญญา รองลงมาคือ ด้านการสร้างแรงบันดาลใจด้านการคำนึงถึงความเป็นปัจเจกบุคคลและด้านการใช้อิทธิพลเชิงอุดมคติ ตามลำดับ ซึ่งสอดคล้องกับงานวิจัยของสุทธิพงษ์ พันวิลัย (2563) ได้ศึกษาวิจัยเรื่อง อิทธิพลของภาวะผู้นำการเปลี่ยนแปลง การบริหารงานตามหลักธรรมาภิบาล ต่อคุณภาพการบริการภาครัฐขององค์กรปกครองส่วนท้องถิ่น ในพื้นที่อำเภอกุสุมาลย์ จังหวัดสกลนคร ผลการวิจัยพบว่า ภาวะผู้นำการเปลี่ยนแปลงของผู้บริหาร และการบริหารงานตามหลักธรรมาภิบาล มีอิทธิพลต่อคุณภาพการบริการภาครัฐ ขององค์กรปกครองส่วนท้องถิ่น

ข้อเสนอแนะ

1. ผู้บริหารเทศบาลตำบลท่าช้างคล้อง อำเภอผาขาว จังหวัดเลยควรมีการส่งเสริมให้ผู้บริหารของเทศบาลมีคุณธรรมและจริยธรรมในการทำงานเพื่อส่วนรวม หลีกเลี่ยงการใช้อำนาจเพื่อประโยชน์ส่วนตนและพวกพ้องโดยกำหนดหลักเกณฑ์ในการรับสมัครบุคลากร การประเมินผลบุคลากรให้มีความเป็นธรรมและโปร่งใส โดยให้บุคลากรอื่น ๆ ในเทศบาลเข้ามามีส่วนร่วมในกระบวนการเพื่อสร้างเจตคติที่ดีและคิดในแง่บวกในการทำงานรวมถึงสร้างเสริมความเชื่อมั่นในการแก้ไขปัญหาแก่บุคลากร

2. ผู้บริหารของเทศบาลควรส่งเสริมการให้ความช่วยเหลือและดูแลเอาใจใส่บุคลากรในเทศบาลทั้งเรื่องการทำงานและเรื่องส่วนตัว โดยเพิ่มกิจกรรมการพัฒนาสัมพันธ์ระหว่างผู้บริหารและบุคลากร เช่น การจัดการแข่งขันกีฬาประจำปี เป็นต้น

ปัญหาอัตราเงินเดือนแรกบรรจุพนักงานมหาวิทยาลัยของรัฐตามมติคณะรัฐมนตรี

The issue of the first salary rate for state university employees according to the cabinet resolution

ศิกวัส กริ่งสันเทียะ, (Siggawat Kringsantie)[1]

บทคัดย่อ

มหาวิทยาลัยของรัฐกับการจ้างบุคลากร ประเภท พนักงานมหาวิทยาลัย เพื่อทดแทนอัตราข้าราชการพลเรือนในมหาวิทยาลัย เกิดขึ้นในประเทศไทยนับแต่ปี พ.ศ. 2542 โดยคณะรัฐมนตรี ในวันที่ 31 สิงหาคม 2542 มีมติเห็นชอบในหลักการให้สำนักงบประมาณพิจารณาจัดสรรงบประมาณ เพื่อเป็นค่าใช้จ่ายสำหรับการจ้างบุคคลตามสัญญาจ้าง โดยบุคลากรสาย ก (สายวิชาการ) จ้างในอัตราข้าราชการแรกบรรจุบวกด้วยอัตราเพิ่มอีก ร้อยละ 70 ของอัตราแรกบรรจุ บุคลากรสาย ข และ ค (สายสนับสนุน) จ้างในอัตราข้าราชการแรกบรรจุบวกด้วยอัตราเพิ่ม อีกร้อยละ 50 ของอัตราแรกบรรจุ จนกว่ามหาวิทยาลัยจะปรับเปลี่ยนสถานภาพเป็นมหาวิทยาลัยในกำกับของรัฐ รวมทั้งให้สำนักงบประมาณจัดสรรงบประมาณเพื่อเป็นค่าใช้จ่ายสำหรับการจ้างบุคคลในหมวดเงินอุดหนุนทั่วไปตามจำนวนอัตราว่างที่เกิดจากการเกษียณอายุราชการตั้งแต่วันที่ 1 ตุลาคม 2541 เป็นต้นมา กับให้มหาวิทยาลัยกำหนดจำนวนบุคคลที่จะจ้างและอัตราค่าจ้างได้ภายในวงเงินงบประมาณที่ได้รับจัดสรร โดยได้รับความเห็นชอบจากสภามหาวิทยาลัย แต่มหาวิทยาลัยของรัฐตีความเจตนารมณ์ของมติคณะรัฐมนตรีดังกล่าวแตกต่างกัน ทำให้มหาวิทยาลัยของรัฐบางแห่งกำหนดอัตราค่าจ้างต่ำไปกว่าที่มติคณะรัฐมนตรีกำหนด ทำให้เกิดปัญหาการฟ้องร้องคดีต่อศาลเป็นจำนวนมากตามมา

คำสำคัญ : อัตราค่าจ้างแรกบรรจุ , พนักงานมหาวิทยาลัยของรัฐ

Abstract

In Thailand, since 1999, the Cabinet has hired university employees to work in public universities in place of civil servants. On August 31, 1999, a resolution was adopted that approved allowing the Budget Office considers budget allocations to be costs associated with hiring individuals under employment contracts. Division A (Academic Division) employees are compensated at the first civil servant recruitment rate with an additional rate equal to 70% of the first recruitment rate. In Division B and Division C (the support division), employees are compensated at the same rate as recently recruited public employees with an additional rate equal to 50% of the first placement rate. Instructing the Bureau of the Budget to provide funds for hiring costs in the general subsidies category by the vacancy rate caused on by civil service retirement since October 1, 1998. The university can determine the number of persons to be hired and the wage rate within the allocated budget with the approval of the university council, but state universities have different interpretations of the intention of the cabinet resolution. As a result, some state university standard salary has been lower than the resolution set by the Cabinet, resulting in several legal cases.

Keywords: The first salary rate, University employee

บทนำ

ปัจจุบันการจ้างพนักงานในมหาวิทยาลัยของรัฐ เป็นอำนาจของสภามหาวิทยาลัยในการกำหนดจำนวนบุคคลที่จะจ้างและอัตราค่าจ้างได้ภายในวงเงินงบประมาณที่ได้รับจัดสรร ทำให้การดำเนินการของมหาวิทยาลัยของรัฐแต่ละแห่งเกิดความแตกต่างกัน รวมถึงอัตราค่าจ้างพนักงานมหาวิทยาลัยของรัฐแต่ละแห่งก็มีการกำหนดค่าจ้าง และผลประโยชน์เกื้อกูลอื่นๆที่แตกต่างกัน โดยอัตราค่าจ้างแรกบรรจุบุคลากรสาย ก (สายวิชาการ) ในมหาวิทยาลัยของรัฐจะจ้างในอัตราข้าราชการแรกบรรจุบวกด้วยอัตราเพิ่มอีกร้อยละ 70 สำหรับบุคลากรสาย ข และ ค (สายสนับสนุน) จะจ้างในอัตราข้าราชการแรกบรรจุบวกด้วยอัตราเพิ่ม อีกร้อยละ 50 ซึ่งเป็นอัตราที่เป็นไปตามมติของคณะรัฐมนตรีตั้งแต่ปีพุทธศักราช 2542 โดยมหาวิทยาลัยของรัฐตีความเจตนารมณ์ของมติคณะรัฐมนตรีดังกล่าวแตกต่างกัน ทั้งในเรื่องการกำหนดอัตราค่าจ้างว่าสามารถกำหนดค่าจ้างแรกบรรจุบุคลากรสาย ก (สายวิชาการ) ให้ต่ำกว่าอัตราข้าราชการแรกบรรจุบวกด้วยอัตราเพิ่มอีกร้อยละ 70 (1.7 เท่า) ได้หรือไม่ และสำหรับบุคลากรสาย ข และ ค (สายสนับสนุน) จะสามารถกำหนดค่าจ้างต่ำกว่าอัตราข้าราชการแรกบรรจุบวกด้วยอัตราเพิ่มอีกร้อยละ 50 (1.5 เท่า) ได้หรือไม่ และการกำหนด

สวัสดิการผลประโยชน์เกื้อกูลอื่นๆรวมอยู่ในงบประมาณที่ได้รับการจัดสรรหรือไม่ หากการดำเนินการไม่เป็นไปตามมติคณะรัฐมนตรีดังกล่าวจะเป็นการกระทำละเมิดหรือไม่ ซึ่งปัญหาดังกล่าวเป็นกรณีที่ต้องพิจารณามติคณะรัฐมนตรีที่เกี่ยวข้อง ตั้งแต่ปี พ.ศ. 2542 พระราชบัญญัติความรับผิดทางละเมิดของเจ้าหน้าที่ พ.ศ.2539 ประกอบกับศึกษาแนวคำวินิจฉัยของศาลปกครองที่เกี่ยวข้อง

วัตถุประสงค์

1. เพื่อให้ทราบความเป็นมาของการจ้างบุคลากรทดแทนอัตราข้าราชการในมหาวิทยาลัยของรัฐ
2. เพื่อให้ทราบมติคณะรัฐมนตรีที่เกี่ยวกับการจ้างบุคลากรทดแทนอัตราข้าราชการในมหาวิทยาลัยของรัฐ
3. เพื่อศึกษากฎหมาย และคำพิพากษาของศาลที่เกี่ยวกับการจ้างบุคลากรทดแทนอัตราข้าราชการในมหาวิทยาลัยของรัฐ

(1) มติคณะรัฐมนตรี เกี่ยวกับการจ้างบุคลากรทดแทนอัตราข้าราชการในมหาวิทยาลัยของรัฐ และกฎหมายที่เกี่ยวข้อง

(1.1) ความเป็นมา และสาระสำคัญของมติคณะรัฐมนตรี เกี่ยวกับการจ้างบุคลากรทดแทนอัตราข้าราชการในมหาวิทยาลัยของรัฐ

สำนักเลขาธิการคณะรัฐมนตรี ได้แจ้งมติการประชุมคณะรัฐมนตรี เมื่อวันที่ 1 มิถุนายน 2542 ให้ทบวงมหาวิทยาลัยทราบว่า คณะรัฐมนตรีได้อนุมัติในหลักการให้มหาวิทยาลัยของรัฐจ้างลูกจ้างในลักษณะการจ้างพิเศษที่มีวาระการจ้างที่กำหนดเวลาชัดเจน แทนการบรรจุข้าราชการใหม่ โดยกำหนดให้สำนักงบประมาณพิจารณาจัดสรรงบประมาณเพื่อเป็นค่าใช้จ่ายสำหรับพนักงานตามสัญญาจ้างบุคคลทดแทนการบรรจุเป็นข้าราชการพลเรือนในมหาวิทยาลัยในอัตราข้าราชการไปพลางก่อน โดยให้พิจารณาจ้างผู้ว่างงานที่มีประสบการณ์ และมีความรู้ความสามารถ เพื่อบรรเทาปัญหาการว่างงาน โดยให้ทบวงมหาวิทยาลัย กระทรวงการคลัง สำนักงานงบประมาณ และสำนักงาน ก.พ. พิจารณากำหนดวิธีการ สิทธิประโยชน์ และสวัสดิการ และเสนอความเห็นที่เกี่ยวข้องต่อคณะรัฐมนตรี **(มหาวิทยาลัยราชภัฏเชียงใหม่ [มร.ชม.], 2564, น.9)**

ต่อมา ทบวงมหาวิทยาลัย สำนักงบประมาณ และสำนักงาน ก.พ. ได้พิจารณาเห็นว่า หลักการที่กำหนดให้สำนักงบประมาณพิจารณาจัดสรรงบประมาณเพื่อเป็นค่าใช้จ่ายสำหรับพนักงานตามสัญญาจ้างบุคคลทดแทนการบรรจุเป็นข้าราชการพลเรือนในอัตราข้าราชการไปพลางก่อนนั้น น่าจะเป็นไปได้ยากในทางปฏิบัติ เนื่องจากอัตราค่าจ้างในอัตราข้าราชการนั้น ไม่จูงใจให้บุคคลที่มีความรู้ความสามารถ และมีประสบการณ์สนใจมาสมัคร ประกอบกับการจ้างกรณีดังกล่าวมีลักษณะการจ้างชั่วคราว นอกจากนี้ระเบียบเกี่ยวกับสวัสดิการและประโยชน์เกื้อกูลที่ใช้บังคับอยู่ในปัจจุบันยังไม่เปิดโอกาสให้ลูกจ้างชั่วคราวสามารถเบิกค่าสวัสดิการและประโยชน์เกื้อกูลเช่นข้าราชการได้ ซึ่งจะทำให้เกิดปัญหาการขาดแคลนบุคลากรในมหาวิทยาลัย และในขณะนั้นได้ประสบปัญหาการสรรหาบุคคลที่มีคุณภาพเพื่อบรรจุเป็นอาจารย์อยู่แล้ว หากใช้ระบบการจ้างที่เป็นการจ้างชั่วคราวและจ้างในอัตราข้าราชการ ก็จะทำให้การสรรหาเป็นไปได้ด้วยความยากลำบากยิ่งขึ้น และส่งผลกระทบต่อการเรียนการสอน และคุณภาพของบัณฑิต จึงได้เสนอความเห็นในการแก้ปัญหา โดยได้ข้อสรุปว่า มหาวิทยาลัยควรจะได้รับการจัดสรรงบประมาณในหมวดเงินอุดหนุน เงินอุดหนุนทั่วไป ตามจำนวนอัตราว่างที่เกิดจากการเกษียณอายุราชการ และว่างโดยเหตุอื่นที่มิใช่ว่างจากผลการเกษียณอายุราชการ ในอัตราค่าจ้างบุคลากรสาย ก หรือสายวิชาการ ให้ค่าจ้างเพิ่มจากอัตราข้าราชการแรกบรรจุอีกร้อยละ 70 และอัตราค่าจ้างบุคลากรสาย ข และ ค หรือสายสนับสนุน ให้ค่าจ้างเพิ่มจากอัตราค่าจ้างข้าราชการแรกบรรจุอีกร้อยละ 50 โดยเป็นอัตราที่รวมสวัสดิการและประโยชน์เกื้อกูลอื่นๆแล้ว

คณะรัฐมนตรี ในวันที่ 31 สิงหาคม 2542 มีมติเห็นชอบให้ปรับปรุงแก้ไขมติคณะรัฐมนตรีเมื่อวันที่ 1 มิถุนายน 2542 โดยให้ยกเลิกหลักการที่กำหนด ให้สำนักงบประมาณจัดสรรงบประมาณเพื่อเป็นค่าใช้จ่ายสำหรับพนักงานตามสัญญาจ้างในอัตราข้าราชการไปพลางก่อน และเห็นชอบหลักการให้สำนักงบประมาณพิจารณาจัดสรรงบประมาณเพื่อเป็นค่าใช้จ่ายสำหรับการจ้างบุคคลตามสัญญาจ้าง โดยบุคลากรสาย ก (สายวิชาการ) จ้างในอัตราข้าราชการแรกบรรจุบวกด้วยอัตราเพิ่มอีก ร้อยละ 70 ของอัตราแรกบรรจุ บุคลากรสาย ข และ ค (สายสนับสนุน) จ้างในอัตราข้าราชการแรกบรรจุบวกด้วยอัตราเพิ่ม อีกร้อยละ 50 ของอัตราแรกบรรจุ จนกว่ามหาวิทยาลัยจะปรับเปลี่ยนสถานภาพเป็นมหาวิทยาลัยในกำกับ รวมทั้งให้สำนักงบประมาณจัดสรรงบประมาณเพื่อเป็นค่าใช้จ่ายสำหรับการจ้างบุคคลในหมวดเงินอุดหนุนทั่วไปตามจำนวนอัตราว่างที่เกิดจากการเกษียณอายุราชการตั้งแต่วันที่ 1 ตุลาคม 2541 เป็นต้นมา และว่างโดยเหตุอื่นที่มิใช่ผลการเกษียณอายุราชการซึ่งว่างอยู่ในปัจจุบันและที่จะว่างต่อไป และอัตรานักเรียนทุนที่มีข้อผูกพันตามสัญญา รวมทั้งอัตราเพิ่มใหม่สำหรับมหาวิทยาลัย กับให้มหาวิทยาลัยกำหนดจำนวนบุคคลที่จะจ้างและอัตราค่าจ้างได้ภายในวงเงินงบประมาณที่ได้รับจัดสรร โดยได้รับความเห็นชอบจากสภามหาวิทยาลัย **(มร.ชม., 2564, น.24)**

(1.2) กฎหมายที่เกี่ยวข้อง

สาระสำคัญของพระราชบัญญัติความรับผิดทางละเมิดของเจ้าหน้าที่ พ.ศ.2539 และพระราชบัญญัติจัดตั้งศาลปกครองและวิธีพิจารณาคดีปกครอง พ.ศ. ๒๕๔๒ ที่เกี่ยวกับการจ้างบุคลากรทดแทนอัตราข้าราชการในมหาวิทยาลัยของรัฐ

"พระราชบัญญัติพระราชบัญญัติความรับผิดทางละเมิดของเจ้าหน้าที่ พ.ศ.2539" (2539) "เจ้าหน้าที่" หมายความว่า ข้าราชการ พนักงาน ลูกจ้าง หรือผู้ปฏิบัติงานประเภทอื่น ไม่ว่าจะเป็นการแต่งตั้งในฐานะเป็นกรรมการหรือฐานะอื่นใด

"หน่วยงานของรัฐ" หมายความว่า กระทรวง ทบวง กรม หรือส่วนราชการที่เรียกชื่ออย่างอื่นและมีฐานะเป็นกรม ราชการส่วนภูมิภาค ราชการส่วนท้องถิ่น และรัฐวิสาหกิจที่ตั้งขึ้นโดยพระราชบัญญัติหรือพระราชกฤษฎีกา และให้หมายความรวมถึงหน่วยงานอื่นของรัฐที่มีพระราชกฤษฎีกากำหนดให้เป็นหน่วยงานของรัฐตามพระราชบัญญัตินี้ด้วย

"พระราชบัญญัติจัดตั้งศาลปกครองและวิธีพิจารณาคดีปกครอง พ.ศ. 2542" (2542) "กฎ" หมายความว่า พระราชกฤษฎีกา กฎกระทรวง ประกาศกระทรวง ข้อบัญญัติท้องถิ่น ระเบียบ ข้อบังคับ หรือบทบัญญัติอื่นที่มีผลบังคับเป็นการทั่วไป โดยไม่มุ่งหมายให้ใช้บังคับแก่กรณีใด หรือบุคคลใดเป็นการเฉพาะ

หน่วยงานของรัฐต้องรับผิดต่อผู้เสียหายในผลแห่งละเมิดที่เจ้าหน้าที่ของตนได้กระทำในการปฏิบัติหน้าที่ ในกรณีนี้ผู้เสียหายอาจฟ้องหน่วยงานของรัฐดังกล่าวได้โดยตรง แต่จะฟ้องเจ้าหน้าที่ไม่ได้

ศาลปกครองมีอำนาจพิจารณาพิพากษาหรือมีคำสั่งในเรื่องดังต่อไปนี้

คดีพิพาทเกี่ยวกับการที่หน่วยงานทางปกครองหรือเจ้าหน้าที่ของรัฐกระทำการโดยไม่ชอบด้วยกฎหมายไม่ว่าจะเป็นการออกกฎ คำสั่งหรือการกระทำอื่นใดเนื่องจากกระทำโดยไม่มีอำนาจหรือนอกเหนืออำนาจหน้าที่หรือไม่ถูกต้องตามกฎหมาย หรือโดยไม่ถูกต้องตามรูปแบบขั้นตอน หรือวิธีการอันเป็นสาระสำคัญที่กำหนดไว้สำหรับการกระทำนั้น หรือโดยไม่สุจริต หรือมีลักษณะเป็นการเลือกปฏิบัติที่ไม่เป็นธรรม หรือมีลักษณะเป็นการสร้างขั้นตอนโดยไม่จำเป็นหรือสร้างภาระให้เกิดกับประชาชนเกินสมควร หรือเป็นการใช้ดุลพินิจโดยมิชอบ

คดีพิพาทเกี่ยวกับการกระทำละเมิดหรือความรับผิดอย่างอื่นของหน่วยงานทางปกครองหรือเจ้าหน้าที่ของรัฐอันเกิดจากการใช้อำนาจตามกฎหมาย หรือจากกฎ คำสั่งทางปกครอง หรือคำสั่งอื่น หรือจากการละเลยต่อหน้าที่ตามที่กฎหมายกำหนดให้ต้องปฏิบัติหรือปฏิบัติหน้าที่ดังกล่าวล่าช้าเกินสมควร

พระราชบัญญัติความรับผิดทางละเมิดของเจ้าหน้าที่ พ.ศ.2539 บัญญัติหลักการในกรณีที่เจ้าหน้าที่ของรัฐกระทำละเมิดในการปฏิบัติหน้าที่ ให้ผู้เสียหายต้องฟ้องหน่วยงานของรัฐได้โดยตรง ดังนั้นกรณีที่กรรมการสภามหาวิทยาลัยออกประกาศกำหนดอัตราเงินเดือนพนักงานมหาวิทยาลัยไม่เป็นไปตามมติคณะรัฐมนตรี และทำให้เกิดความเสียหาย พนักงานมหาวิทยาลัยที่เป็นผู้ได้รับความเดือดร้อนหรือเสียหาย อาจฟ้องสภามหาวิทยาลัย รวมถึงมหาวิทยาลัยของรัฐให้รับผิดในผลแห่งละเมิดที่เกิดขึ้น ตามพระราชบัญญัติความรับผิดทางละเมิด พ.ศ.2539 มาตรา 5

พระราชบัญญัติจัดตั้งศาลปกครองและวิธีพิจารณาคดีปกครอง พ.ศ. ๒๕๔๒ บัญญัติคดีที่อยู่ในอำนาจของศาลปกครองไว้ในมาตรา 9 วรรคหนึ่ง ซึ่งหากสภามหาวิทยาลัยใช้อำนาจในการออกประกาศ ข้อบังคับ ที่เกี่ยวกับอัตราเงินค่าจ้างพนักงานมหาวิทยาลัยที่ไม่เป็นไปตามมติคณะรัฐมนตรี มหาวิทยาลัยก็อาจถูกฟ้องคดีต่อศาลปกครองได้ โดยเฉพาะกรณีที่พนักงานมหาวิทยาลัยที่ได้รับความเดือดร้อน หรือเสียหายจากการออกประกาศ ข้อบังคับ ก็สามารถฟ้องเป็นคดีตามมาตรา 9 วรรคหนึ่ง (1) โดยเป็นการเพิกถอนประกาศ หรือข้อบังคับที่ไม่ชอบด้วยนั้น หรือหากต้องการฟ้องเรียกค่าเสียหายจากการกระทำละเมิดที่สภามหาวิทยาลัย ออกประกาศ หรือข้อบังคับที่ไม่ชอบด้วยกฎหมายก็สามารถฟ้องเป็นคดีตามมาตรา 9 วรรคหนึ่ง (3) ดังนั้น การที่สภามหาวิทยาลัยจะใช้อำนาจในการออกประกาศ ข้อบังคับ ในการกำหนดอัตราเงินเดือนพนักงานมหาวิทยาลัย จึงต้องคำนึงถึงมติคณะรัฐมนตรีที่เกี่ยวข้องเพื่อให้การออกประกาศ ข้อบังคับ สอดคล้องและเป็นไปตามมติคณะรัฐมนตรี

(2) กรณีพิพาทเกี่ยวกับการจ้างบุคลากรทดแทนอัตราข้าราชการ

มหาวิทยาลัยของรัฐแต่ละแห่ง มีอำนาจในการกำหนดจำนวนบุคคลที่จะจ้างและอัตราค่าจ้างพนักงานมหาวิทยาลัยได้ภายในวงเงินงบประมาณที่ได้รับจัดสรร โดยได้รับความเห็นชอบจากสภามหาวิทยาลัย และเกิดการตีความเจตนารมณ์ของมติคณะรัฐมนตรี เกี่ยวกับอัตราค่าจ้างแตกต่างกัน บางแห่งมีการกำหนดอัตราค่าจ้างต่ำไปกว่าอัตราข้าราชการแรกบรรจุบวกด้วยอัตราเพิ่มอีก ร้อยละ 70 ของอัตราแรกบรรจุ สำหรับบุคลากรสาย ก (สายวิชาการ) และต่ำกว่าอัตราค่าจ้างข้าราชการแรกบรรจุบวกด้วยอัตราเพิ่ม อีกร้อยละ 50 ของอัตราแรกบรรจุ สำหรับบุคลากรสาย ข และ ค (สายสนับสนุน) บางแห่งตีความเจตนารมณ์โดยการกำหนดสวัสดิการ ผลประโยชน์เกื้อกูลอื่นๆรวมอยู่ในงบประมาณที่ได้รับการจัดสรร แตกต่างกันไปตามมติสภามหาวิทยาลัย ซึ่งทำให้เกิดปัญหาความไม่พอใจ ของพนักงานมหาวิทยาลัยของรัฐที่มองว่ามหาวิทยาลัยของรัฐไม่ดำเนินการจ้างให้เป็นไปตามมติของคณะรัฐมนตรี โดยมีกรณีตัวอย่างที่เป็นคดีของศาลปกครองหลายคดี

(2.1) ในปีพุทธศักราช 2561 ศาลปกครองกลางได้มีคำพิพากษาในคดีพิพาทเกี่ยวกับการที่หน่วยงานทางปกครอง หรือเจ้าหน้าที่ของรัฐกระทำการโดยไม่ชอบด้วยกฎหมาย และการกระทำละเมิดของหน่วยงานทางปกครอง อันเกิดจากการใช้อำนาจตามกฎหมาย เป็นกรณีที่สภามหาวิทยาลัยแห่งหนึ่ง ได้พิจารณากำหนดอัตราค่าจ้างพนักงานมหาวิทยาลัยสาย ก. สาย ข. และ สาย ค. ในอัตราค่าจ้างข้าราชการแรกบรรจุบวกด้วยอัตราเพิ่ม อีกร้อยละ 50 เท่ากันทั้งหมด โดยไม่ได้กำหนดให้พนักงานมหาวิทยาลัยสาย ก (สายวิชาการ) ได้อัตราค่าจ้างข้าราชการแรกบรรจุบวกด้วยอัตราเพิ่ม อีกร้อยละ 70 ตามมติคณะรัฐมนตรี โดยมหาวิทยาลัยได้มีประกาศสภามหาวิทยาลัย เรื่อง ข้อบังคับมหาวิทยาลัยว่าด้วยการบริหารงานบุคคลสำหรับพนักงาน ข้อ 13 กำหนดอัตราค่าจ้างดังกล่าว ทำให้พนักงานมหาวิทยาลัยสาย ก. เห็นว่า มหาวิทยาลัยจ่ายค่าจ้างพนักงานมหาวิทยาลัย สาย ก. สาย ข และสาย ค. ในอัตรา 1.5 เท่าของอัตราเงินเดือนข้าราชการเท่ากันเป็นการไม่ปฏิบัติตามมติคณะรัฐมนตรีที่กำหนดให้จ้างพนักงานมหาวิทยาลัย สาย ก. ในอัตรา 1.7 เท่าของอัตราเงินเดือนแรกบรรจุข้าราชการ และมหาวิทยาลัยฯ หักเงินค่าจ้างจำนวน 0.2 เท่า ดังกล่าวไปเป็นสวัสดิการในการจัดทำประกันสุขภาพกลุ่มของพนักงานมหาวิทยาลัยทั้งหมด จึงมีการเรียกร้องให้มีการปรับอัตราค่าจ้างเป็น 1.7 เท่าของอัตราเงินเดือนแรกบรรจุข้าราชการ แต่คณะกรรมการบริหารงานบุคคลของมหาวิทยาลัยได้มีมติเห็นชอบให้จ่ายค่าจ้างพนักงานมหาวิทยาลัย สาย ก สาย ข และสาย ค ในอัตรา 1.5 เท่าของอัตราเงินเดือนข้าราชการเหมือนเดิม ซึ่งพนักงานมหาวิทยาลัยสาย ก ไม่เห็นด้วย จึงได้มีหนังสือร้องทุกข์ต่อคณะกรรมการอุทธรณ์และร้องทุกข์ประจำมหาวิทยาลัย แต่คณะกรรมการอุทธรณ์และร้องทุกข์ประจำมหาวิทยาลัย ไม่รับเรื่องร้องทุกข์ไว้พิจารณา พนักงานมหาวิทยาลัยสาย ก จึงนำคดีมาฟ้องต่อศาลปกครองกลาง และมีประเด็นที่ศาลปกครองกลางจะต้องวินิจฉัยว่า การที่มหาวิทยาลัยจ่ายค่าจ้างแต่ละเดือนให้แก่พนักงานมหาวิทยาลัยสาย ก ในอัตรา 1.5 เท่าของอัตราเงินเดือนข้าราชการ เป็นการละเมิดต่อพนักงานมหาวิทยาลัยสาย ก หรือไม่ หากเป็นการละเมิดแล้ว มหาวิทยาลัยต้องรับผิดชดใช้เงินให้แก่ ผู้ฟ้องคดีเพียงใด โดยท้ายที่สุดศาลปกครองกลางได้พิพากษาพิพากษาให้มหาวิทยาลัยจ่ายค่าจ้างเพิ่มอีกเดือนละ 0.2 เท่า ของอัตราเงินเดือนข้าราชการ และดอกเบี้ยในอัตราร้อยละ 7.5 ต่อปี ของจำนวนเงินค่าจ้างแต่ละเดือนที่ผู้ฟ้องคดีแต่ละรายมีสิทธิได้รับนับแต่วันทำละเมิด **(คำพิพากษาศาลปกครองกลาง หมายเลขแดงที่ 1643/61, 2561)**

(2.2) ศาลปกครองสูงสุด ในปีพุทธศักราช 2563 ได้มีคำพิพากษา คดีพิพาทเกี่ยวกับการที่หน่วยงานทางปกครอง หรือเจ้าหน้าที่ของรัฐกระทำการโดยไม่ชอบด้วยกฎหมาย และการกระทำละเมิดอันเกิดจากการออกกฎ โดยคดีนี้ผู้ฟ้องคดีเป็นพนักงานมหาวิทยาลัย สายวิชาการ ตำแหน่งอาจารย์ ฟ้องสภามหาวิทยาลัย เป็นผู้ถูกฟ้องคดีที่ 1 อธิการบดีมหาวิทยาลัย เป็นผู้ถูกฟ้องคดีที่ 2 และมหาวิทยาลัย เป็นผู้ถูกฟ้องคดีที่ 3 โดยผู้ฟ้องคดีได้รับความเดือดร้อนเสียหาย จากการที่สภามหาวิทยาลัยปรับฐานเงินเดือนของพนักงานมหาวิทยาลัยสายวิชาการเป็น 1.5 เท่าของเงินเดือนข้าราชการ (แทนที่จะเป็น 1.7 เท่า) สำหรับ 0.2 เท่าของเงินเดือนข้าราชการ ให้ใช้สำหรับเป็นสวัสดิการ เช่น เงินประจำตำแหน่งทางวิชาการ ผู้ฟ้องคดีเห็นว่าค่าใช้จ่ายดังกล่าวเป็นส่วนที่มหาวิทยาลัยต้องเป็นผู้รับผิดชอบ ผู้ฟ้องคดีเห็นว่า การกระทำของผู้ถูกฟ้องคดีทั้งสามไม่ชอบด้วยมติคณะรัฐมนตรี และไม่เป็นธรรมกับผู้ฟ้องคดี เนื่องจากสภามหาวิทยาลัย และอธิการบดี ต้องดำเนินการปรับค่าจ้างพนักงานมหาวิทยาลัยสายวิชาการเพิ่มจากเงินเดือนแรกบรรจุของข้าราชการเป็น 1.7 เท่า ศาลปกครองสูงสุดวินิจฉัยว่า สภามหาวิทยาลัยในการประชุมครั้งที่ 1/51 เมื่อวันที่ 28 สิงหาคม 51 และในการประชุมครั้งที่ 14/51 เมื่อวันที่ 25 กันยายน 51 ได้พิจารณาปรับค่าจ้างพนักงานสายวิชาการ 1.5 เท่าของเงินเดือนข้าราชการแรกบรรจุ สำหรับ 0.2 เท่า ของเงินดังกล่าวใช้เป็นสวัสดิการ ตั้งแต่ 1 ต.ค. 51 เป็นต้นไป จะเห็นได้ว่าผลรวมของอัตราค่าจ้างดังกล่าวที่สภามหาวิทยาลัยกำหนดไว้นั้น เป็นอัตราค่าจ้าง 1.7 เท่า ของเงินเดือนแรกบรรจุอันเป็นไปตามเจตนารมณ์ของมติคณะรัฐมนตรีแล้วในเบื้องต้น แต่การที่มหาวิทยาลัยหักอัตราจ้าง 0.2 ของเงินเดือนแรกบรรจุสำหรับใช้เป็นสวัสดิการ แม้หน่วยงานของรัฐจะมีอำนาจกำหนดแนวทางการบริหารงานบุคคลได้อย่างตามกรอบงบประมาณที่ได้รับการจัดสรร อันเป็นการเปิดกว้างให้ผู้ถูกฟ้องคดีใช้ดุลพินิจได้ทั้งส่วนอัตรากำลังและกรอบอัตราเงินเดือน แต่การใช้ดุลพินิจจะต้องทำภายในขอบเขตของกฎหมายที่ให้อำนาจ เมื่อพิจารณาตามสัญญาจ้างฉบับที่ 1 มิได้ระบุถึงค่าใช้จ่ายที่ถูกหักเพื่อเป็นสวัสดิการ ซึ่งสวัสดิการ และประโยชน์เกื้อกูลตามที่สำนักงาน ก.พ. กำหนดนั้น หมายถึง ค่าตอบแทนที่ทางราชการจัดให้แก่ข้าราชการในฐานะที่เป็นสมาชิกส่วนหนึ่งขององค์กร เพื่อช่วยให้มีความมั่นคงในการดำรงชีวิต ตลอดจนเป็นเครื่องมือในการเสริมสร้างขวัญกำลังใจและกำลังใจให้ข้าราชการ แบ่งได้เป็นสวัสดิการที่เป็นตัวเงิน เช่น ค่ารักษาพยาบาล การศึกษาของบุตร บำเหน็จความชอบ บำนาญ หรือสวัสดิการที่ไม่ใช่ตัวเงินเช่นการลา เครื่องราชอิสริยาภรณ์ และประโยชน์เกื้อกูล เช่น ค่าเช่าบ้าน ค่าตอบแทนการปฏิบัติงานนอกเวลา รถประจำตำแหน่ง โทรศัพท์มือถือ แต่เงินประจำตำแหน่งเป็นค่าตอบแทนที่เป็นสิทธิเฉพาะตัวของผู้ดำรงตำแหน่งนั้น ซึ่งมหาวิทยาลัยจะต้องจัดสรรเงินมาทดแทน มิใช่นำเงินสวัสดิการมาใช้ประโยชน์เพื่อการนี้ อีกทั้งมิใช่ความหมายของคำว่าสวัสดิการและประโยชน์เกื้อกูลที่บุคลากรทุกรายมีสิทธิที่จะได้รับจากหน่วยงานของรัฐเพื่อประโยชน์ของตนเอง เพราะในทางปฏิบัติบุคลากรจะเป็นผู้ต้องจ่ายเงินในส่วนนี้เพื่อผู้อื่นเสียเอง ศาลปกครองสูงสุดพิพากษาเพิกถอนระเบียบมหาวิทยาลัยว่าด้วยอัตราค่าจ้าง ค่าตอบแทน และเงินประจำตำแหน่งของพนักงานมหาวิทยาลัย (ฉบับที่2) โดยให้มีผลย้อนหลังไปถึงวันที่ระเบียบดังกล่าวมีผลใช้บังคับ ทั้งนี้ให้มีการประกาศผลคำพิพากษาในราชกิจจานุเบกษา และให้การประกาศมีผล

เป็นการเพิกถอนระเบียบดังกล่าว และให้มหาวิทยาลัยชดใช้ค่าเสียหาย พร้อมดอกเบี้ย 7.5 ต่อปี ของต้นเงินดังกล่าวนับถัดจากวันฟ้องเป็นต้นไปจนกว่าจะชำระเสร็จแก่ผู้ฟ้องคดี **(มร.ชม., 2564, น.232-279)**

(2.3) ศาลปกครองนครราชสีมา ในปีพุทธศักราช 2563 ได้มีคำพิพากษาในที่พนักงานมหาวิทยาลัยของรัฐ ฟ้องร้องมหาวิทยาลัย สภามหาวิทยาลัย รวมถึงอธิการบดีมหาวิทยาลัย เป็นคดีพิพาทเกี่ยวกับการที่หน่วยงานทางปกครอง หรือเจ้าหน้าที่ของรัฐกระทำการโดยไม่ชอบด้วยกฎหมาย และการกระทำละเมิดอันเกิดจากการออกกฎ ในคดีดังกล่าว ผู้ฟ้องคดีฟ้องคดีเห็นว่ามหาวิทยาลัยออกระเบียบ ข้อบังคับ และประกาศจำนวนหลายฉบับโดยไม่ชอบด้วยกฎหมาย และไม่เป็นไปตามมติคณะรัฐมนตรี โดยกำหนดอัตราค่าตอบแทนของบุคลากรประเภทสายวิชาการระดับวุฒิการศึกษาปริญญาตรีและปริญญาโท ในอัตรา 1.2 เท่า ของอัตราแรกบรรจุ และระดับปริญญาเอกในอัตรา 1.3 เท่า ของอัตราแรกบรรจุ ส่วนบุคลากรประเภทสายสนับสนุน กลุ่มบริหารหรือวิชาชีพเฉพาะ ระดับวุฒิการศึกษาปริญญาตรี ปริญญาโท และปริญญาเอก ในอัตรา 1.2 เท่า ของอัตราแรกบรรจุ ส่งผลให้ผู้ฟ้องคดีแต่ละรายไม่ได้รับค่าจ้างในอัตราที่ควรจะเป็นตามมติคณะรัฐมนตรีดังกล่าว จึงฟ้องคดีต่อศาลปกครองให้ผู้ถูกฟ้องคดี จ่ายค่าจ้างในส่วนที่หักไว้คืนให้แก่ผู้ฟ้องคดี พร้อมด้วยดอกเบี้ยอัตราร้อยละ 7.5 ต่อปี ศาลปกครองนครราชสีมา พิจารณาแล้วเห็นว่า คณะรัฐมนตรีได้มีมติเมื่อวันที่ 19 ธันวาคม 2549 เห็นชอบแนวทางปฏิบัติให้สถาบันอุดมศึกษากลุ่มมหาวิทยาลัยราชภัฏ กลุ่มมหาวิทยาลัยเทคโนโลยีราชมงคล และสถาบันเทคโนโลยีปทุมวัน สามารถดำเนินการจ้างพนักงานมหาวิทยาลัยทดแทนอัตราข้าราชการ ทั้งสายผู้สอนและสายสนับสนุน โดยให้สำนักงบประมาณพิจารณาจัดสรรงบประมาณเพื่อเป็นค่าใช้จ่ายสำหรับการจ้างกรณีทดแทนตำแหน่งเกษียณอายุและตำแหน่งที่ว่างโดยเหตุอื่น กรณีตำแหน่งเพิ่มใหม่และตำแหน่งนักเรียนทุนในหมวดเงินอุดหนุนทั่วไปในอัตราแรกบรรจุ และบวกเพิ่มอีกร้อยละ 70 ของอัตราแรกบรรจุสำหรับสายผู้สอน และในอัตราแรกบรรจุและบวกเพิ่มอีกร้อยละ 50 ของอัตราแรกบรรจุสำหรับบุคลากรสายสนับสนุน โดยให้สถาบันอุดมศึกษาดังกล่าวกำหนดจำนวนบุคคลที่จะจ้าง และอัตราค่าจ้างได้ตามเหตุผลความจำเป็น ซึ่งต้องได้รับความเห็นชอบจากสภาสถาบันอุดมศึกษา และอยู่ภายในวงเงินงบประมาณที่ได้รับจัดสรร กรณีจึงเห็นได้ว่า มติคณะรัฐมนตรีดังกล่าวเป็นการกำหนดสาระสำคัญให้ยึดถือเป็นแนวทางให้มหาวิทยาลัยต้องปฏิบัติตามในการจ้างพนักงานมหาวิทยาลัยสาย ก หรือสายวิชาการหรือสายผู้สอน ในอัตราแรกบรรจุและบวกเพิ่มอีกร้อยละ 70 หรือคิดเป็น 1.7 เท่า ของอัตราเงินเดือนแรกบรรจุของข้าราชการนั้น ส่วนการจ้างพนักงานมหาวิทยาลัยสาย ข หรือสายสนับสนุนให้จ้างในอัตราแรกบรรจุและบวกเพิ่มอีกร้อยละ 50 หรือ 1.5 เท่า ของอัตราเงินเดือนแรกบรรจุของข้าราชการนั้น แม้มติคณะรัฐมนตรีข้างต้นจะให้อำนาจมหาวิทยาลัย สามารถใช้ดุลพินิจกำหนดจำนวนบุคคลที่จะจ้างและอัตราค่าจ้างได้ภายในวงเงินที่ได้รับจัดสรรโดยได้รับความเห็นชอบจากสภามหาวิทยาลัยก็ตาม แต่คงหมายความเพียงการให้อำนาจในการกำหนดจำนวนบุคคลที่จะจ้างและอัตราค่าจ้างตามตำแหน่งที่มหาวิทยาลัยประสงค์จะจ้าง ซึ่งอัตราค่าจ้างย่อมแตกต่างกันไปตามตำแหน่งที่ประสงค์จะจ้าง หาได้หมายความว่าจะกำหนดอัตราค่าจ้างของพนักงานมหาวิทยาลัย สาย ก ให้ต่ำกว่า 1.7 เท่า หรือสาย ข ให้ต่ำกว่า 1.5 เท่า ได้แต่อย่างใดไม่ การที่มหาวิทยาลัย มีประกาศมหาวิทยาลัย เรื่อง ค่าตอบแทนพนักงานมหาวิทยาลัย กำหนดอัตราค่าตอบแทนของบุคลากรประเภทสายวิชาการระดับวุฒิการศึกษาปริญญาตรีและปริญญาโท ในอัตรา 1.2 เท่า ของอัตราแรกบรรจุ และระดับปริญญาเอกในอัตรา 1.3 เท่า ของอัตราแรกบรรจุ ส่วนบุคลากรประเภทสายสนับสนุน กลุ่มบริหารหรือวิชาชีพเฉพาะ ระดับวุฒิการศึกษาปริญญาตรี ปริญญาโท และปริญญาเอก ในอัตรา 1.2 เท่า ของอัตราแรกบรรจุ จึงเป็นการกำหนดอัตราค่าตอบแทนของพนักงานมหาวิทยาลัยที่มิได้เป็นไปตามมติคณะรัฐมนตรี เมื่อวันที่ 19 ธันวาคม 2549 ที่มหาวิทยาลัยและอธิการบดี จะต้องถือปฏิบัติให้เป็นไปตามมติคณะรัฐมนตรีดังกล่าว การที่อธิการบดี จ่ายค่าจ้างพนักงานมหาวิทยาลัยให้แก่ผู้ฟ้องคดีแต่ละคดี โดยอาศัยอำนาจตามประกาศดังกล่าวเป็นเหตุให้ผู้ฟ้องคดีในแต่ละคดี ได้รับค่าจ้างน้อยกว่าอัตราค่าจ้าง ที่มีสิทธิจะได้รับตามมติคณะรัฐมนตรี เมื่อวันที่ 19 ธันวาคม 49 จึงเป็นการกระทำละเมิดต่อสิทธิของผู้ฟ้องคดีตามมาตรา 420 แห่งประมวลกฎหมายแพ่ง และพาณิชย์ ผู้ฟ้องคดีในแต่ละคดีจึงมีสิทธิได้รับค่าจ้างในอัตราที่มติคณะรัฐมนตรีเมื่อวันที่ 19 ธันวาคม 2549 กำหนด เมื่ออธิการบดีมหาวิทยาลัย เป็นเจ้าหน้าที่ในสังกัดของมหาวิทยาลัย ดังนั้น มหาวิทยาลัยจึงต้องรับผิดชดใช้ค่าสินไหมทดแทนให้แก่ผู้ฟ้องคดีในแต่ละคดี ตามมาตรา 9 วรรคหนึ่ง (3) แห่งพระราชบัญญัติความรับผิดทางละเมิดของเจ้าหน้าที่ พ.ศ. 2539 เท่ากับจำนวนเงินค่าจ้างที่ผู้ฟ้องคดีในแต่ละคดีจะต้องได้รับเพิ่มขึ้นอีกให้เท่ากับอัตรา 1.5 เท่า หรือ 1.7 เท่า ตามตำแหน่งและวุฒิการศึกษาของผู้ฟ้องคดีในแต่ละคดี

คดีดังกล่าวนี้ ได้ขึ้นสู่ศาลปกครองสูงสุด และศาลปกครองสูงสุด ได้มีคำพิพากษาในปีพุทธศักราช 2564 ศาลปกครองสูงสุดได้ตรวจพิจารณากฎหมาย ระเบียบ และข้อบังคับที่เกี่ยวข้องประกอบด้วยแล้ว พิเคราะห์แล้วเห็นว่า ประกาศมหาวิทยาลัยที่กำหนดอัตราค่าจ้างแรกบรรจุสำหรับคุณวุฒิปริญญาโท ๑๘,๓๖๐ บาท แล้วกำหนดให้เงินค่าตอบแทนพนักงานมหาวิทยาลัยที่ได้รับการบรรจุและแต่งตั้งใหม่ ในอัตราขั้นต่ำ ซึ่งตามบัญชีค่าตอบแทนพนักงานมหาวิทยาลัยแนบท้ายประกาศดังกล่าว กำหนดอัตราขั้นต่ำ - ขั้นสูง ประเภทสายวิชาการว่า ระดับวุฒิการศึกษาปริญญาโท อัตราเงินเดือนขั้นต่ำ ๒๑,๐๐๐ บาทต่อเดือน หรือในอัตราเท่ากับ ๑.๒ เท่าของอัตราข้าราชการแรกบรรจุ ซึ่งแม้จะเป็นการดำเนินการโดยมิได้นำงบประมาณค่าใช้จ่ายบุคลากรที่ได้รับจัดสรรจากสำนักงบประมาณทั้งหมดตามมติคณะรัฐมนตรีเมื่อวันที่ ๑๓ สิงหาคม ๒๕๔๒ นำไปจ้างพนักงานมหาวิทยาลัยสาย ก (สายวิชาการ) ในอัตราข้าราชการ

แรกบรรจุบวกเพิ่มอีกร้อยละ ๗๐ หรือคิดเป็น ๑.๗ เท่า ของอัตราข้าราชการแรกบรรจุก็ตาม แต่เมื่อมติคณะรัฐมนตรีดังกล่าวมิได้กำหนดให้มหาวิทยาลัยจะต้องจ้างพนักงานมหาวิทยาลัยสายวิชาการในอัตรา ๑.๗ เท่าของอัตราข้าราชการแรกบรรจุ และงบประมาณที่ได้รับการจัดสรรดังกล่าวยังจะต้องนำไปดำเนินการเป็นสวัสดิการและประโยชน์เกื้อกูลอื่นๆ ของพนักงานมหาวิทยาลัยด้วย รวมทั้งข้อเท็จจริงยังรับฟังได้ว่า มหาวิทยาลัยได้นำงบประมาณทั้งหมดที่ได้รับการจัดสรรจากสำนักงบประมาณตามมติคณะรัฐมนตรีดังกล่าวไปใช้ภายในขอบเขตของมติคณะรัฐมนตรีเมื่อวันที่ ๓๑ สิงหาคม ๒๕๔๒ ประกอบกับมติคณะรัฐมนตรีเมื่อวันที่ ๑ มิถุนายน ๒๕๔๒ กล่าวคือ นอกจากได้นำเงินส่วนใหญ่ไปกำหนดเป็นอัตราค่าจ้างหรือเงินเดือนของพนักงานมหาวิทยาลัยแล้ว ยังได้นำเงินอีกส่วนหนึ่งไปกำหนดเป็นสวัสดิการหรือประโยชน์เกื้อกูลอื่นๆของพนักงานมหาวิทยาลัยซึ่งเป็นไปตามมติคณะรัฐมนตรีดังกล่าวที่ถือว่าอัตรางบประมาณที่มีมติให้สำนักงบประมาณจัดสรรให้แก่มหาวิทยาลัยสถาบันนั้น เป็นงบประมาณที่ได้รวมถึงสวัสดิการและประโยชน์เกื้อกูลอื่นๆแล้วด้วย จึงไม่ขัดหรือแย้งกับมติคณะรัฐมนตรี เมื่อวันที่ ๑๙ ธันวาคม ๒๕๔๙ แต่อย่างใด และเป็นประกาศที่ออกโดยชอบด้วยกฎหมายแล้ว อีกทั้งยังเป็นการกำหนดค่าจ้างหรือค่าตอบแทนให้แก่พนักงานมหาวิทยาลัยที่สอดคล้องกับงบประมาณที่มหาวิทยาลัยได้รับการจัดสรรโดยไม่ปรากฏข้อเท็จจริงหรือพยานหลักฐานใดๆ ในสำนวนคดีว่าเป็นการดำเนินการโดยไม่สุจริต หรือมีลักษณะเป็นการเลือกปฏิบัติที่ไม่เป็นธรรม หรือเป็นการใช้ดุลพินิจโดยมิชอบแต่อย่างใด พิพากษากลับคำพิพากษาของศาลปกครองชั้นต้น เป็นให้ยกฟ้อง และให้คืนค่าธรรมเนียมศาลในชั้นอุทธรณ์ทั้งหมดให้แก่ผู้ฟ้องคดีที่ ๑ **(คำพิพากษาศาลปกครองสูงสุด หมายเลขแดงที่ อบ 475/2564, 2564)**

สรุป

จากมติคณะรัฐมนตรีที่เกี่ยวข้อง และแนวคำพิพากษาของศาลปกครองสูงสุดที่ได้วินิจฉัยถึงอัตราค่าจ้างพนักงานมหาวิทยาลัยตามมติคณะรัฐมนตรี ที่อนุมัติให้มหาวิทยาลัยของรัฐจ้างพนักงานในลักษณะการจ้างพิเศษที่มีวาระการจ้าง กำหนดเวลาชัดเจนแทนการบรรจุข้าราชการใหม่ โดยให้ได้รับประมาณแผ่นดินเป็นค่าใช้จ่ายในการจ้างพนักงานมหาวิทยาลัยเพิ่มขึ้นจากเงินเดือนแรกบรรจุของข้าราชการ คือ สายวิชาการ เพิ่มขึ้น 1.7 เท่า สายสนับสนุน เพิ่มขึ้น 1.5 เท่า นั้น เป็นวงเงินที่ใช้ในการจ้างโดยมหาวิทยาลัยมีอำนาจกำหนดแนวทางการบริหารงานบุคคลได้ตามกรอบงบประมาณที่ได้รับการจัดสรร แต่การใช้ดุลพินิจจะต้องทำภายในขอบเขตของกฎหมายที่ให้อำนาจ เงินที่สำนักงบประมาณจัดสรรให้มหาวิทยาลัยใช้จ่ายสำหรับการจ้างพนักงานมหาวิทยาลัยบุคลากรสายวิชาการ อัตราเพิ่มร้อยละ 70 ของอัตราแรกบรรจุ และบุคลากรสายสนับสนุน อัตราเพิ่มร้อยละ 50 ของอัตราแรกบรรจุ มหาวิทยาลัยต้องใช้เพื่อเป็นเงินเดือนค่าจ้าง รวมทั้งสวัสดิการและประโยชน์เกื้อกูลอื่นได้ หรือมหาวิทยาลัยจะจ่ายเงินเดือนหรือค่าจ้างเต็มในอัตราเพิ่มอีกร้อยละ 70 หรือร้อยละ 50 ของอัตราแรกบรรจุ โดยไม่จัดสวัสดิการและประโยชน์เกื้อกูลอื่นก็ได้ ในกรณีที่มหาวิทยาลัยไม่จ่ายค่าจ้างเต็มจำนวน 1.7 หรือ 1.5 เท่า แล้วแต่กรณีนั้น โดยมีการหักงบประมาณไว้ในการจัดทำสวัสดิการ มหาวิทยาลัยควรต้องกำหนดการหักค่าจ้างดังกล่าวไว้ในสัญญาจ้างอย่างชัดเจน และการจัดทำสวัสดิการและประโยชน์เกื้อกูลมหาวิทยาลัยต้องมีกฎหมายภายใน เช่น ประกาศ ข้อบังคับ ระเบียบ ในการจัดทำสวัสดิการให้ชัดเจนก่อนการหักเงินไปจัดทำสวัสดิการ และควรเป็นสวัสดิการที่มอบให้กับพนักงานมหาวิทยาลัยทุกคนเสมอภาคกัน เช่น กองทุน ประกันสุขภาพ ค่ารักษาพยาบาล ในกรณีเงินประจำตำแหน่งทางวิชาการ หรือเงินประจำตำแหน่งบริหารนั้น ตามแนวคำพิพากษาศาลปกครองสูงสุดวินิจฉัยไว้ว่ามิใช่ความหมายของคำว่าสวัสดิการและประโยชน์เกื้อกูลที่บุคลากรทุกรายมีสิทธิที่จะได้รับจากหน่วยงานของรัฐเพื่อประโยชน์ของตนเอง อย่างไรก็ตามคำพิพากษาศาลปกครองย่อมมีผลผูกพันเฉพาะคู่กรณี ไม่อาจนำมาใช้บังคับเป็นการทั่วไปได้ ซึ่งข้อเท็จจริงบางกรณีมีความใกล้เคียงกันแต่ศาลปกครองอาจวินิจฉัยออกมาแตกต่างกันขึ้นอยู่กับดุลยพินิจขององค์คณะตุลาการแต่ละคณะ

ข้อเสนอแนะ

ผู้เขียนเสนอให้การออกประกาศ และข้อบังคับของมหาวิทยาลัยของรัฐเกี่ยวกับค่าจ้างพนักงานมหาวิทยาลัย ควรนำแนวคำพิพากษาของศาลปกครองสูงสุด มาเป็นแนวทางในการกำหนดอัตราค่าจ้างพนักงานมหาวิทยาลัยให้เหมาะสม เพื่อให้เป็นไปตามเจตนารมณ์ของมติคณะรัฐมนตรี เกิดความเป็นธรรม สร้างความเสมอภาค และความเข้าใจอันดีแก่พนักงานมหาวิทยาลัย โดยมหาวิทยาลัยควรต้องกำหนดการจ่ายค่าจ้าง ค่าตอบแทน รวมถึงสวัสดิการตามมติคณะรัฐมนตรี โดยปรับอัตราค่าจ้างแรกบรรจุพนักงานมหาวิทยาลัย สาย ก (สายวิชาการ) เพิ่มขึ้น 1.7 เท่า และสาย ข และ ต (สายสนับสนุน) เพิ่มขึ้น 1.5 เท่า ของเงินเดือนข้าราชการ โดยต้องไม่มีลักษณะเป็นการเลือกปฏิบัติที่ไม่เป็นธรรม กรณีมหาวิทยาลัยจะจัดทำสวัสดิการ และต้องหักเงินค่าจ้าง ก็ควรต้องออกประกาศ ระเบียบ ข้อบังคับภายใน และกำหนดไว้ในสัญญาจ้างให้ครอบคลุมกรณีดังกล่าวก่อนที่จะหักเงินค่าจ้าง เพื่อจัดทำสวัสดิการ จะเป็นการช่วยลดปัญหาการฟ้องร้องคดีต่อศาลในปัจจุบันได้

ภาวะผู้นำการเปลี่ยนแปลงของผู้บริหารคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช

Transformational Leadership of Administrators of Faculty of Medicine Vajira Hospital, Navamindradhiraj University

วรรณญา ผ่องใยดี, (Wannaya Phongyaidee)[1]

บทคัดย่อ

การวิจัยในครั้งนี้มีวัตถุประสงค์เพื่อศึกษาระดับภาวะผู้นำการเปลี่ยนแปลงของผู้บริหารของคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช โดยใช้กรอบการวิจัยภาวะผู้นำการเปลี่ยนแปลงของ Bass and Avolio การวิจัยนี้เป็นการวิจัยเชิงปริมาณ กลุ่มตัวอย่าง คือ บุคลากรประเภทวิชาการ และประเภทสนับสนุนจากคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช จำนวน 346 คน โดยใช้แบบสอบถามเป็นเครื่องมือในการวิจัย วิเคราะห์ข้อมูลโดยใช้โปรแกรมคอมพิวเตอร์สำเร็จรูป สถิติที่ใช้ในการวิจัย ได้แก่ การแจกแจงความถี่ ค่าร้อยละ ค่าเฉลี่ย และส่วนเบี่ยงเบนมาตรฐาน

ผลการวิจัยพบว่า ผู้บริหารมีภาวะผู้นำการเปลี่ยนแปลงในภาพรวมอยู่ในระดับมาก โดยมีภาวะผู้นำการเปลี่ยนแปลงด้านการมีอิทธิพลอย่างมีอุดมการณ์หรือการสร้างบารมี มีค่าเฉลี่ยสูงสุด รองลงมาคือด้านการกระตุ้นการใช้ปัญญา ด้านการคำนึงถึงความเป็นปัจเจกบุคคล และสุดท้ายคือด้านการสร้างแรงบันดาลใจ

คำสำคัญ: ภาวะผู้นำการเปลี่ยนแปลง, ผู้บริหาร, คณะแพทยศาสตร์วชิรพยาบาล

Abstract

The research aimed to study the level of transformational leadership of administrators of the Faculty of Medicine Vajira Hospital, Navamindradhiraj University. Bass and Avolio's concept of transformational leadership was used as the framework of this research. This research is quantitative research with a sample totaled 346 participants consisted of academic personnel and support personnel from the Faculty of Medicine Vajira Hospital. A questionnaire was administered as the research tool. Data were analyzed by using a computer program. The statistics used include frequency, percentage, mean and standard deviation.

The results of the research showed that the administrators of the Faculty of Medicine Vajira Hospital, Navamindradhiraj University have a high level of transformational leadership. The sub-scales of transformational leadership of administrators showed that the idealized influence of charismatic leadership was at the highest level. Intellectual stimulation was at the second level. Individualized consideration was the third level. Inspiration and motivation were the lowest level.

Keywords: transformational leadership, administrator, Faculty of Medicine Vajira Hospital

บทนำ

ยุคโลกาภิวัตน์ในปัจจุบันเป็นยุคของการเปลี่ยนแปลงทั้งด้านเศรษฐกิจ สังคม การเมืองการปกครอง เทคโนโลยี และการแข่งขัน การเปลี่ยนแปลงต่าง ๆ เป็นไปอย่างรวดเร็วจนยากที่จะคาดการณ์ได้ว่าจะเกิดอะไรขึ้นต่อไป ซึ่งส่งผลกระทบต่อองค์กรทั้งภาครัฐบาลและเอกชนในการดำเนินการต่าง ๆ ทำให้องค์กรต้องปรับเปลี่ยนแนวทางการบริหารงานไปจากเดิม เช่น การปรับเปลี่ยนโครงสร้างองค์กรใหม่ การใช้หลักการทำงานเป็นทีม การเปิดโอกาสให้บุคลากรมีส่วนร่วมในการรับรู้ แสดงความคิดเห็น ตัดสินใจและรับผิดชอบในประเด็นสำคัญ เป็นต้น ผู้นำจึงเป็นบุคคลสำคัญที่มีอิทธิพลต่อองค์กรในการนำผู้ใต้บังคับบัญชาให้ปฏิบัติงานร่วมกันเพื่อให้บรรลุผลสำเร็จตามเป้าหมายที่องค์กรกำหนดไว้ โดยผู้นำที่มีภาวะผู้นำจะมีศิลปะหรือความสามารถในการผลักดันและจูงใจให้ผู้ใต้บังคับบัญชายินดีและเต็มใจที่จะปฏิบัติงานด้วยความศรัทธาและนำไปสู่การบรรลุวัตถุประสงค์ขององค์กร ทั้งนี้ ภาวะผู้นำที่มีความเหมาะสมกับสภาวการณ์ในปัจจุบัน ได้แก่ ภาวะผู้นำการเปลี่ยนแปลง เมื่อมีการเปลี่ยนแปลงเกิดขึ้นในองค์กร ภาวะผู้นำการเปลี่ยนแปลงจะมีผลอย่างมากในการนำองค์กรไปสู่สถานการณ์ใหม่ที่ดีขึ้น อีกทั้งเป็นองค์ประกอบในการสนับสนุนให้องค์กรดำเนินการ

เปลี่ยนแปลงไปได้อย่างมีประสิทธิภาพ เนื่องจากมุ่งให้ความสำคัญกับการสร้างคุณค่าในตนเองของผู้ร่วมงานและผู้ใต้บังคับบัญชา กระตุ้นการสร้างแรงบันดาลใจในการทำงาน ส่งเสริมการทำงานเป็นทีมและการมีส่วนร่วมในการตัดสินใจ ช่วยให้การปฏิบัติงานและการนำองค์กรบรรลุสู่เป้าหมาย

คณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช มีโครงสร้างการบริหารประกอบด้วยกลุ่มภารกิจการศึกษา โรงพยาบาล และกลุ่มภารกิจสนับสนุน โดยมีบทบาทภารกิจในการสร้างองค์ความรู้ ผลิตบัณฑิตและผู้เชี่ยวชาญ จัดบริการด้านการแพทย์และสุขภาพที่มีคุณภาพสูงได้มาตรฐานสากลด้วยเทคโนโลยียุคดิจิทัล โดยเน้นเวชศาสตร์เขตเมือง จิตสาธารณะ และศิลปวัฒธรรมที่ทรงคุณค่า เพื่อสังคมไทยในอนาคต ในการนี้เพื่อให้บรรลุเป้าหมายและเกิดผลสัมฤทธิ์ตามภารกิจดังกล่าว ผู้บริหารจึงเป็นผู้ที่มีบทบาทสำคัญในการขับเคลื่อนภารกิจให้ประสบผลสำเร็จ ทั้งนี้ ผู้บริหารเปรียบเสมือนศูนย์รวมพลังของบุคลากรในทุกด้าน จึงต้องให้ความสำคัญและประสานงานกับบุคลากรทุกระดับ ดังนั้น ภาวะผู้นำของผู้บริหารจึงมีความสำคัญอย่างยิ่งในการบริหารองค์กร โดยเฉพาะภาวะผู้นำการเปลี่ยนแปลง ซึ่งจะสามารถกระตุ้นแรงจูงใจให้บุคลากรร่วมมือร่วมแรงร่วมใจทำงานเป็นทีมที่มีประสิทธิภาพและมีผลการปฏิบัติงานเหนือความคาดหมายได้

จากความสำคัญดังกล่าวข้างต้น ภาวะผู้นำมีความจำเป็นสำคัญในการบริหารองค์กรให้บรรลุประสิทธิผล โดยเฉพาะภาวะผู้นำการเปลี่ยนแปลง ผู้วิจัยจึงต้องการศึกษาเกี่ยวกับภาวะผู้นำการเปลี่ยนแปลงของผู้บริหารคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช เพื่อให้คณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช สามารถนำข้อมูลไปใช้เป็นแนวทางในการพัฒนาคุณภาพองค์กรให้มีประสิทธิภาพยิ่งขึ้นต่อไป

วัตถุประสงค์ของการวิจัย

การวิจัยครั้งนี้มีวัตถุประสงค์เพื่อ ศึกษาระดับภาวะผู้นำการเปลี่ยนแปลงของผู้บริหารของคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช โดยมีคำถามการวิจัยคือ ภาวะผู้นำการเปลี่ยนแปลงของผู้บริหารของคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราชอยู่ในระดับใด

คำนิยามศัพท์ที่กำหนดขึ้นในการวิจัยนี้ ได้แก่ 1) ผู้บริหาร หมายถึง ผู้ได้รับการแต่งตั้งให้ดำรงตำแหน่งผู้บริหารของคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช ดังนี้ ผู้บริหารระดับสูง ได้แก่ คณบดี และผู้บริหารระดับกลาง ได้แก่ รองคณบดี และ 2) ภาวะผู้นำการเปลี่ยนแปลง (Transformational leadership) หมายถึง ความสามารถของผู้นำในการกระตุ้นและสร้างแรงบันดาลใจให้ผู้ตามหรือผู้ใต้บังคับบัญชากระทำเพื่อส่วนรวมจนบรรลุผลสำเร็จเกินกว่าที่คาดหวังไว้ โดยผู้นำทำให้ผู้ตามมีความรู้สึกไว้วางใจ จงรักภักดี และเคารพนับถือ ส่งผลให้ผู้ตามเป็นผู้มีศักยภาพในการเป็นนักพัฒนา เป็นผู้ที่เสริมแรงได้ด้วยตนเอง ซึ่งผู้นำจะต้องยกระดับความรู้สึกของผู้ตาม ให้ความสำคัญและคุณค่าของผลลัพธ์ที่ต้องการและวิธีการที่จะบรรลุผลลัพธ์ที่ต้องการ ทำให้ผู้ตามไม่คำนึงถึงประโยชน์ส่วนตน แต่อุทิศตนเพื่อองค์กร ซึ่งประกอบด้วย

(1) การมีอิทธิพลอย่างมีอุดมการณ์หรือการสร้างบารมี (Idealized Influence or Charisma leadership) หมายถึง ผู้นำแสดงพฤติกรรมตามบทบาท ทำให้ผู้ตามมีความชื่นชม มีความภูมิใจ จงรักภักดี และเชื่อถือในตัวผู้นำและผู้นำได้วางแผน กำหนดแนวทางให้ผู้ตามแสดงตามโดยการสร้างวิสัยทัศน์ (Vision) ร่วมกัน โดยผู้นำซึ่งเป็นผู้ที่มีวิสัยทัศน์ (Vision) และรู้ถึงพันธกิจ (Mission) ขององค์กร สร้างความเชื่อมั่น ความไว้วางใจในภารกิจโดยรวม เป็นผู้นำในลักษณะที่มีพฤติกรรม เจตคติ และค่านิยมของความเป็นผู้นำแสดงให้ผู้ตามเห็นว่าสามารถปฏิบัติงานบรรลุวัตถุประสงค์ในสิ่งที่ผู้ตามรู้สึกว่าเป็นไปได้ สร้างวิสัยทัศน์และวัตถุประสงค์ในอนาคต

(2) การสร้างแรงบันดาลใจ (Inspirational Motivation) หมายถึง พฤติกรรมที่ผู้นำทำให้ผู้ตามเกิดอารมณ์กระตุ้น จูงใจให้ไม่เห็นประโยชน์ส่วนตน แต่อุทิศตนเพื่อทีมงาน เห็นคุณค่าของผลการปฏิบัติงาน เป็นผลทำให้ผู้เกิดความพยายามในการปฏิบัติงานเป็นพิเศษ โดยผู้นำใช้วิธีการง่าย ๆ ชักชวน สร้างอารมณ์ให้ผู้ตามเข้าใจวิสัยทัศน์และความหมาย มีความรู้สึกตระหนักว่าพันธกิจที่ต้องทำเป็นสิ่งสำคัญ เช่น ผู้นำใช้คำพูดหรือสัญลักษณ์สร้างจินตนาการ ภาวะผู้นำการสร้างแรงบันดาลใจจะปรากฏเมื่อผู้นำกระตุ้นเร้าใจผู้ตามเกิดแรงจูงใจให้ปฏิบัติงาน และสร้างความมั่นใจว่าผู้ตามมีความสามารถกระทำให้บรรลุตามวัตถุประสงค์ โดยผู้นำสร้างความมั่นใจ ผู้นำสร้างความเชื่อในเหตุผลที่ทำให้ผู้ตามรับรู้ว่าสิ่งที่บุคลากรทำนั้นมีวัตถุประสงค์ และสร้างความคาดหวังในความสำเร็จให้ผู้ตาม

(3) การกระตุ้นทางปัญญา (Intellectual Stimulation) หมายถึง พฤติกรรมที่ผู้นำกระตุ้นผู้ตามให้เห็นวิธีการ หรือแนวทางใหม่ในการแก้ปัญหาโดยการกระทำให้ผู้ตามมีความพอใจและมีความตั้งใจด้วยการใช้สัญลักษณ์ จินตนาการและภาษาที่เข้าใจง่าย ส่งเสริมให้ผู้ตามเข้าใจในบทบาทและยอมรับในบทบาท สร้างความมั่นใจและส่งเสริมคุณค่าของผลลัพธ์ที่ต้องการเป็นผลให้บุคลากรเกิดความพยายามในการปฏิบัติงานและแก้ปัญหาในการปฏิบัติงานมากขึ้น

(4) การคำนึงถึงความเป็นปัจเจกบุคคล (Individualized Consideration) หมายถึง พฤติกรรมที่ผู้นำแสดงให้เห็นในการบริหารองค์กรที่เป็นกระบวนการวินิจฉัยและยกระดับความต้องการของผู้ตาม มีการติดต่อกับผู้ตามเป็นรายบุคคล และ

ติดต่อสื่อสารแบบสองทาง เอาใจใส่ความต้องการตามความแตกต่างระหว่างบุคคลของผู้ตามกระจายอำนาจความรับผิดชอบส่งเสริมให้ผู้ตามเกิดจินตภาพด้วยตนเอง มีความมั่นคง สามารถบูรณาการความต้องการ มีทัศนภาพที่ชัดเจนได้รับข่าวสารตามที่ปรารถนาเกิดความต้องการเฉพาะมีความรู้สึกเป็นตัวของตัวเอง มีความรับผิดชอบและควบคุมตัวเองได้ จากนั้นผู้นำสร้างความมั่นใจและส่งเสริมคุณค่าของผลลัพธ์ที่กำหนด

วิธีการดำเนินการวิจัย

ประชากรและกลุ่มตัวอย่าง

ประชากรที่ใช้ในการวิจัยครั้งนี้ คือบุคลากรที่ปฏิบัติงานในคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช ประกอบด้วย บุคลากรประเภทวิชาการ สนับสนุนวิชาชีพเฉพาะ สนับสนุนเชี่ยวชาญเฉพาะ และสนับสนุนทั่วไป สังกัดคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช ซึ่งมีจำนวน 3,061 คน

กลุ่มตัวอย่างในการศึกษาครั้งนี้ คือ บุคลากรประเภทวิชาการ สนับสนุนวิชาชีพเฉพาะ สนับสนุนเชี่ยวชาญเฉพาะ และสนับสนุนทั่วไปในสังกัดคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช ซึ่งได้กำหนดกลุ่มตัวอย่าง โดยใช้การเทียบตารางของเครจซี่ และมอร์แกน (Krejcie and Morgan, อ้างถึงใน ขวัญตา เกื้อกูลรัฐ, 2554) ได้จำนวน 346 ตัวอย่าง และใช้วิธีการสุ่มตัวอย่างแบ่งชั้นภูมิ (Stratified Sampling) จากนั้นสุ่มกลุ่มตัวอย่างประชากรแต่ละชั้นภูมิโดยการสุ่มตัวอย่างแบบง่าย (Simple random sampling) จะได้กลุ่มตัวอย่าง ดังรายละเอียดในตารางที่ 1

ตารางที่ 1 จำนวนประชากรและกลุ่มตัวอย่าง

ประเภทบุคลากรคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช	จำนวนประชากร	จำนวนกลุ่มตัวอย่าง
1. วิชาการ	326	37
2. สนับสนุนวิชาชีพเฉพาะ	1,298	147
3. สนับสนุนเชี่ยวชาญเฉพาะ	286	32
4. สนับสนุนทั่วไป	1,151	130
รวม	3,061	346

ตัวแปรที่ใช้ในการวิจัย

ตัวแปรที่ใช้ในการวิจัย ได้แก่ ภาวะผู้นำการเปลี่ยนแปลงของผู้บริหาร ประกอบด้วย การมีอิทธิพลอย่างมีอุดมการณ์หรือการสร้างบารมี (Charismatic or Idealized influence) การสร้างแรงบันดาลใจ (Inspirational motivation) การกระตุ้นการใช้ปัญญา (Intellectual stimulation) และการคำนึงถึงความเป็นปัจเจกบุคคล (Individualized consideration)

ขอบเขตการวิจัย

1. ขอบเขตด้านเนื้อหา

ศึกษาภาวะผู้นำการเปลี่ยนแปลงตามแนวคิดและทฤษฎีของบาส และอโวลิโอ (Bass and Avolio, 1994) ประกอบด้วยคุณลักษณะ 4 ประการ คือ 1) การมีอิทธิพลอย่างมีอุดมการณ์หรือการสร้างบารมี (Charismatic or Idealized influence) 2) การสร้างแรงบันดาลใจ (Inspirational motivation) 3) การกระตุ้นการใช้ปัญญา (Intellectual stimulation) 4) การคำนึงถึงความเป็นปัจเจกบุคคล (Individualized consideration)

2. ขอบเขตด้านประชากร

ประชากรที่ใช้ในการวิจัยครั้งนี้ ได้แก่ บุคลากรประเภทวิชาการ และประเภทสนับสนุนของคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช

เครื่องมือที่ใช้ในการวิจัย

เครื่องมือที่ใช้ในการวิจัยครั้งนี้ เป็นแบบสอบถาม (Questionnaire) ที่ผู้วิจัยปรับปรุงและพัฒนาขึ้น โดยพิจารณาภายใต้กรอบแนวคิดเชิงทฤษฎีที่ได้จากการศึกษาวิเคราะห์วรรณกรรมและงานวิจัยที่เกี่ยวข้อง รวมทั้งให้สอดคล้องกับคำจำกัดความในการวิจัยที่ได้กำหนดไว้แบ่งเป็น 2 ส่วน ประกอบด้วย ส่วนที่ 1 แบบสอบถามเกี่ยวกับข้อมูลส่วนบุคคลของผู้ตอบแบบสอบถาม เป็นลักษณะแบบตรวจสอบรายการ (Check List) ได้แก่ เพศ อายุ ระดับการศึกษา สถานภาพการปฏิบัติงาน และอายุงานในตำแหน่ง ส่วนที่ 2

แบบสอบถามความคิดเห็นเกี่ยวกับภาวะผู้นำการเปลี่ยนแปลงของผู้บริหารคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช เป็นแบบมาตราส่วนประมาณค่า (Rating Scale) 5 ระดับ คือ มากที่สุด มาก ปานกลาง น้อย และน้อยที่สุด มีความหมาย ดังนี้

5 (มากที่สุด)	หมายถึง	ผู้บริหารมีการปฏิบัติในข้อรายการนั้นมากที่สุด
4 (มาก)	หมายถึง	ผู้บริหารมีการปฏิบัติในข้อรายการนั้นมาก
3 (ปานกลาง)	หมายถึง	ผู้บริหารมีการปฏิบัติในข้อรายการนั้นปานกลาง
2 (น้อย)	หมายถึง	ผู้บริหารมีการปฏิบัติในข้อรายการนั้นน้อย
1 (น้อยที่สุด)	หมายถึง	ผู้บริหารมีการปฏิบัติในข้อรายการนั้นน้อยที่สุด

การตรวจสอบคุณภาพของเครื่องมือโดยผู้ทรงคุณวุฒิ จำนวน 3 ท่าน ได้ผลการตรวจสอบสรุปประเด็นโดยการหาค่าดัชนีความสอดคล้อง (IOC) เท่ากับ 1.00 ทุกข้อคำถาม จึงนำไปทดลองใช้กับบุคลากร จำนวน 30 คน ในองค์กรซึ่งไม่ใช่กลุ่มตัวอย่างในการวิจัย ครั้งนี้ ได้แก่ บุคลากรภายนอกช่วยปฏิบัติงานของคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช และนำไปใช้หาความเชื่อมั่น (Reliability) ของแบบสอบถามที่ได้รับกลับคืนมาโดยใช้วิธีหาค่าสัมประสิทธิ์แอลฟาของครอนบาค (Cronbach, 1990 อ้างถึงใน วาโร เพ็งสวัสดิ์, 2551) ได้ค่าสัมประสิทธิ์แอลฟาเท่ากับ 0.962

ขั้นตอนในการวิจัย

1. การเก็บรวบรวมข้อมูลเพื่อให้การปฏิบัติเป็นไปอย่างถูกต้องและเป็นระบบ ผู้วิจัยได้ดำเนินการเก็บข้อมูลตามขั้นตอนและวิธีการ ดังนี้

1) ประสานงานกับประธานหลักสูตรรัฐประศาสนศาสตรมหาบัณฑิต เพื่อทำหนังสือขออนุญาตถึงคณบดีคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช ในการใช้แบบสอบถามเก็บรวมรวมข้อมูลกลุ่มตัวอย่างตามที่กำหนดไว้

2) ส่งหนังสือขออนุมัติในการเก็บรวบรวมข้อมูลพร้อมโครงร่างการวิจัยฉบับย่อ ตัวอย่างเครื่องมือวิจัย และแบบเสนอเพื่อขอรับการพิจารณาจริยธรรมการวิจัย ถึงประธานคณะกรรมการจริยธรรมการวิจัยของคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช

3) เมื่อได้รับอนุญาตให้เก็บรวบรวมข้อมูลได้ จึงนำแบบสอบถามไปเก็บรวบรวมข้อมูลจากบุคลากรของคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราชที่เป็นกลุ่มตัวอย่าง และกำหนดวัน เวลาในการขอรับแบบสอบถามคืนภายใน 15 วัน

4) เก็บรวมรวมและติดตามแบบสอบถามที่ยังไม่ได้รับคืน และแจกแบบสอบถามอีกครั้งในรายที่แบบสอบถามสูญหายหรือไม่สมบูรณ์ โดยขยายเวลาอีก 10 วัน

5) นำแบบสอบถามที่ได้รับคืนมาตรวจสอบความสมบูรณ์ และนำข้อมูลแบบสอบถามมาวิเคราะห์ข้อมูล

2. การวิเคราะห์ข้อมูล ผู้วิจัยนำข้อมูลที่ได้จากแบบสอบถามมาวิเคราะห์ ดังนี้

1) รวบรวมข้อมูลทั้งหมดมาตรวจสอบทีละแบบสอบถาม เพื่อพิจารณาความถูกต้องของคำตอบในแต่ละประเด็นเพื่อนำมาใช้ในการคำนวณทางสถิติ โดยใช้โปรแกรมสำเร็จรูป

2) ค่าความถี่ (Frequency) และค่าร้อยละ (Percentage) ใช้วิเคราะห์ข้อมูลลักษณะของตัวอย่างเพื่อจำแนกลักษณะทั่วไปของตัวอย่างที่ใช้ในการวิจัย ได้แก่ เพศ อายุ ระดับการศึกษา ตำแหน่งหน้าที่ อายุงานในตำแหน่ง

3) ค่าเฉลี่ย (Mean) และส่วนเบี่ยงเบนมาตรฐาน (Standard Deviation) ใช้วิเคราะห์ข้อมูลคะแนนในการจำแนกผลวิเคราะห์ทางสถิติของตัวแปรที่ใช้ในการวิจัย ได้แก่ ภาวะผู้นำการเปลี่ยนแปลงของผู้บริหารคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช

สรุปผลการวิจัย

ผู้วิจัยเสนอผลการวิจัยตามวัตถุประสงค์เพื่อศึกษาระดับภาวะผู้นำการเปลี่ยนแปลงของผู้บริหารของคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช และคำถามการวิจัยคือ ภาวะผู้นำการเปลี่ยนแปลงของผู้บริหารของคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราชอยู่ในระดับใด โดยนำเสนอข้อมูลผลการวิจัยตามลำดับ ดังนี้

ตอนที่ 1 ผลการวิเคราะห์ข้อมูลปัจจัยส่วนบุคคลของผู้ตอบแบบสอบถาม

เพศ : ผู้ตอบแบบสอบถามส่วนมากเป็นเพศหญิง มีจำนวน 288 คน คิดเป็นร้อยละ 65.9 และเพศชายมีจำนวน 118 คน คิดเป็นร้อยละ 34.1

อายุ : ผู้ตอบแบบสอบถามมีอายุระหว่าง 36 – 46 ปี มากที่สุด จำนวน 133 คน คิดเป็นร้อยละ และรองลงมามีอายุระหว่าง 25 – 35 ปี จำนวน 91 คน คิดเป็นร้อยละ 26.3

ระดับการศึกษา : ผู้ตอบแบบสอบถามมีการศึกษาระดับปริญญาตรีมากที่สุด จำนวน 212 คน คิดเป็นร้อยละ 61.3 และรองลงมามีการศึกษาสูงกว่าระดับปริญญาตรี จำนวน 79 คน คิดเป็นร้อยละ 22.8

สถานภาพการปฏิบัติงาน : ผู้ตอบแบบสอบถามเป็นพนักงานมหาวิทยาลัยมากที่สุด จำนวน 268 คน คิดเป็นร้อยละ 77.5 และรองลงมาเป็นลูกจ้างประจำ จำนวน 66 คน คิดเป็นร้อยละ 19.1

อายุงานในตำแหน่ง : ผู้ตอบแบบสอบถามมีอายุงานในตำแหน่งนับถึงปัจจุบันมากกว่า 10 ปีมากที่สุด จำนวน 150 คน คิดเป็นร้อยละ 43.4 และรองลงมามีอายุงานในตำแหน่งระหว่าง 6 – 10 ปี จำนวน 105 คน คิดเป็นร้อยละ 30.3

ตอนที่ 2 ผลการวิเคราะห์ข้อมูลด้านภาวะผู้นำการเปลี่ยนแปลงของผู้บริหารคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช ในภาพรวมตามองค์ประกอบเฉพาะของภาวะผู้นำการเปลี่ยนแปลง 4 องค์ประกอบ

ผลการวิเคราะห์ข้อมูลด้านภาวะผู้นำการเปลี่ยนแปลงของผู้บริหารคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช โดยใช้สถิติค่าเฉลี่ย (Mean) และส่วนเบี่ยงเบนมาตรฐาน (Standard Deviation) ได้ผลดังตารางที่ 2

ตารางที่ 2 แสดงข้อมูลภาวะผู้นำการเปลี่ยนแปลงของผู้บริหารคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช

ภาวะผู้นำการเปลี่ยนแปลงของผู้บริหาร	$\overline{X}$	S.D.	ระดับ	อันดับ
การมีอิทธิพลอย่างมีอุดมการณ์หรือการสร้างบารมี	3.59	1.03	มาก	1
2. การสร้างแรงบันดาลใจ	3.44	1.17	มาก	4
3. การกระตุ้นการใช้ปัญญา	3.47	1.14	มาก	2
4. การคำนึงถึงความเป็นปัจเจกบุคคล	3.44	1.12	มาก	3
รวม	**3.49**	**1.10**	**มาก**	

ภาวะผู้นำการเปลี่ยนแปลงของผู้บริหารของคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช ในภาพรวมอยู่ในระดับมาก ($\overline{X}$ = 3.49, S.D.= 1.10) เมื่อพิจารณาเป็นรายข้อ โดยเรียงตามลำดับค่าเฉลี่ย พบว่า ด้านการมีอิทธิพลอย่างมีอุดมการณ์หรือการสร้างบารมี มีค่าเฉลี่ยสูงสุด ($\overline{X}$ = 3.59, S.D.= 1.03) รองลงมาคือด้านการกระตุ้นการใช้ปัญญา ($\overline{X}$ = 3.47, S.D.= 1.14) ด้านการคำนึงถึงความเป็นปัจเจกบุคคล ($\overline{X}$ = 3.44, S.D.= 1.12) และด้านการสร้างแรงบันดาลใจ มีค่าเฉลี่ยน้อยที่สุด ($\overline{X}$ = 3.44, S.D.= 1.17)

ตอนที่ 3 ผลการวิเคราะห์ข้อมูลภาวะผู้นำการเปลี่ยนแปลงของผู้บริหารคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช จำแนกตามองค์ประกอบเฉพาะของภาวะผู้นำการเปลี่ยนแปลง 4 องค์ประกอบ

การมีอิทธิพลอย่างมีอุดมการณ์หรือการสร้างบารมี

ผู้บริหารเป็นผู้นำแนวคิด วิธีการ ความรู้และเทคโนโลยีใหม่ ๆ มาใช้ในการบริหารงาน มีค่าเฉลี่ยสูงสุด ($\overline{X}$ = 3.91, S.D.= 1.03) รองลงมาคือ ผู้บริหารประพฤติตนเป็นที่น่าเชื่อถือ น่าเคารพ น่ายกย่อง น่าเลื่อมใสศรัทธา เป็นแบบอย่างสำหรับผู้ใต้บังคับบัญชา และผู้บริหารทำให้ผู้ใต้บังคับบัญชาเกิดความรู้สึกยินดี ภาคภูมิใจ เต็มใจ ร่วมใจ เมื่อได้ปฏิบัติงานร่วมกัน มีค่าเฉลี่ยเท่ากัน ($\overline{X}$ = 3.58, S.D.= 1.12 และ $\overline{X}$ = 3.58, S.D.= 1.08) ส่วนผู้บริหารมีความเป็นกัลยาณมิตร เปิดใจกว้าง รับฟังความคิดเห็นและข้อเสนอแนะจากผู้ใต้บังคับบัญชา มีค่าเฉลี่ยน้อยที่สุด ($\overline{X}$ = 3.41, S.D.= 1.17)

การสร้างแรงบันดาลใจ

ผู้บริหารส่งเสริมให้ผู้ใต้บังคับบัญชาปฏิบัติงานโดยให้ความไว้วางใจ ให้เกียรติซึ่งกันและกัน มีค่าเฉลี่ยสูงสุด ($\overline{X}$ = 3.49, S.D.= 1.21) รองลงมาคือ ผู้บริหารให้กำลังใจและดูแลผู้ใต้บังคับบัญชา เมื่อต้องเผชิญปัญหาและอุปสรรค ($\overline{X}$ = 3.46, S.D.= 1.19) และผู้บริหารโน้มน้าวให้ผู้ใต้บังคับบัญชาเห็นถึงความสำคัญของภารกิจว่าเป็นสิ่งสำคัญ และน่าภาคภูมิใจ มีค่าเฉลี่ยน้อยที่สุด ($\overline{X}$ = 3.39, S.D.= 1.21)

การกระตุ้นการใช้ปัญญา

ผู้บริหารมีการกระตุ้น การจูงใจและสนับสนุนความคิดใหม่เพื่อให้งานมีประสิทธิภาพ และผู้บริหารแสดงให้ผู้ร่วมงานเห็นว่าปัญหาที่เกิดขึ้นเป็นเรื่องที่ท้าทาย และเป็นโอกาสที่ดีที่จะเรียนรู้และจัดการปัญหานั้น มีค่าเฉลี่ยสูงสุดเท่ากัน ($\overline{X}$ = 3.50, S.D.= 1.18

และ $\overline{X}$ = 3.50, S.D.= 1.17) รองลงมาคือ ผู้บริหารส่งเสริมให้ผู้ใต้บังคับบัญชามีบทบาทเป็นผู้ประสานงาน วิเคราะห์ สังเคราะห์ ความคิดเห็นต่าง ๆ เพื่อให้เกิดความเชี่ยวชาญในการปฏิบัติงาน ($\overline{X}$ = 3.48, S.D.= 1.16) และผู้บริหารส่งเสริมผู้ใต้บังคับบัญชาให้มีความสามารถในการแก้ปัญหาด้วยวิธีการที่หลากหลายอย่างสร้างสรรค์ มีค่าเฉลี่ยน้อยที่สุด ($\overline{X}$ = 3.45, S.D.= 1.15)

การคำนึงถึงความเป็นปัจเจกบุคคล

ผู้บริหารส่งเสริมให้ผู้ใต้บังคับบัญชามีการพัฒนาตนเอง มีค่าเฉลี่ยสูงสุด ($\overline{X}$ = 3.56, S.D.= 1.15) รองลงมาคือ ผู้บริหารเปิดโอกาสให้ผู้ใต้บังคับบัญชาได้ปฏิบัติงานอย่างเต็มความสามารถ ($\overline{X}$ = 3.50, S.D.= 1.19) และผู้บริหารปฏิบัติต่อผู้ใต้บังคับบัญชาด้วยความเสมอภาคเท่าเทียมและยุติธรรม มีค่าเฉลี่ยน้อยที่สุด ($\overline{X}$ = 3.32, S.D.= 1.22)

อภิปรายผลการวิจัย

จากการสรุปผลการวิจัยข้างต้นสามารถนำมาอภิปรายผล ได้ดังนี้

ภาวะผู้นำการเปลี่ยนแปลงของผู้บริหารของคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช ทั้งในภาพรวมและรายด้านอยู่ในระดับมาก ที่ปรากฏผลเช่นนี้เพราะว่า ผู้บริหารคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราชเป็นผู้นำที่สร้างวิสัยทัศน์หรือมองภาพในอนาคตขององค์กรที่ดีกว่าปัจจุบัน และกำหนดพันธกิจ โดยผู้ใต้บังคับบัญชายอมรับและผู้ใต้บังคับบัญชามีวิสัยทัศน์ของตนที่สอดคล้องกับวิสัยทัศน์ขององค์กร มีกลวิธีใหม่ ๆ ในการทำงานเพื่อให้บรรลุวิสัยทัศน์ที่มีการยึดถือร่วมกัน ทำให้ผู้ใต้บังคับบัญชาเกิดความเชื่อมั่นในกลวิธีที่จะทำให้บรรลุผลสำเร็จ กล้าเสี่ยงเพื่อประโยชน์ขององค์กรและบุคลากร มีการใช้อำนาจส่วนตัวคือ อำนาจความเชี่ยวชาญ เพื่อให้ผู้ใต้บังคับบัญชาทำงานได้สำเร็จและใช้อำนาจอ้างอิงเพื่อเป็นแบบอย่างที่ดีแก่ผู้ใต้บังคับบัญชา รวมทั้งมีคุณสมบัติที่สามารถดึงดูดผู้ใต้บังคับบัญชาได้ เช่นเดียวกับทฤษฎีภาวะผู้นำการเปลี่ยนแปลงของบาสและอโวลิโอ (Bass and Avolio) ที่ผู้นำมีอิทธิพลต่อผู้ร่วมงานและผู้ใต้บังคับบัญชาโดยเปลี่ยนแปลงความพยายามของผู้ร่วมงานและผู้ใต้บังคับบัญชาให้สูงขึ้นกว่าความพยายามที่คาดหวัง พัฒนาความสามารถไปสู่ระดับที่สูงขึ้นและมีศักยภาพมากขึ้น จูงใจให้มองให้ไกลเกินกว่าความสนใจของพวกเขาไปสู่ประโยชน์ของกลุ่มขององค์กรและสังคม สอดคล้องกับแนวคิดของบาส (Bass, 1985 อ้างถึงในสมเกียรติ บาลลา, 2554) ที่ได้สรุปไว้ว่า ภาวะผู้นำการเปลี่ยนแปลงเป็นสิ่งกระตุ้นจูงใจผู้ตามให้กระทำมากกว่าที่คาดหวัง มีความเชื่อมั่นที่จะปฏิบัติเพื่อให้บรรลุผลตามที่ปรารถนาและใช้ความพยายามเพื่อยกระดับความต้องการของผู้ตามให้เป็นลำดับของความต้องการที่สูงขึ้น และสอดคล้องกับแนวคิดของปัญญาวุฒิ ธนาวุฒิ (2558) ได้สรุปถึงภาวะผู้นำการเปลี่ยนแปลงไว้ว่า เป็นพฤติกรรมที่ผู้บริหารมีอิทธิพล โดยให้ความสำคัญของผู้ร่วมงานหรือผู้ตามมีมุมมองเห็นงานในแง่มุมใหม่ ๆ จากการสร้างแรงบันดาลใจ กระตุ้นใช้ปัญญา หรือการคำนึงถึงความเป็นปัจเจกบุคคล โดยที่ผู้นำกระตุ้นจูงใจ ชี้นำและมีส่วนร่วมในการพัฒนาผู้ตามหรือผู้ร่วมงานไปสู่ความสามารถที่สูงขึ้น มีศักยภาพขึ้น นำไปสู่การบรรลุถึงผลงานที่สูงขึ้น ซึ่งจะนำไปสู่การบรรลุประสิทธิผลขององค์กร

นอกจากนี้ ผลการวิจัยยังสอดคล้องกับพัชรพรรณ เวียงเก่า (2561) ได้วิจัยเรื่อง ความสัมพันธ์ระหว่างภาวะผู้นำการเปลี่ยนแปลงของหัวหน้าหอผู้ป่วยกับการเป็นองค์กรแห่งความสุข กลุ่มการพยาบาล โรงพยาบาลแพร่ ผลการวิจัยพบว่า ภาวะผู้นำการเปลี่ยนแปลงของหัวหน้าหอผู้ป่วยตามการรับรู้ของพยาบาลวิชาชีพ โรงพยาบาลแพร่ โดยรวมทุกองค์ประกอบอยู่ในระดับสูง สอดคล้องกับผลการวิจัยของผุสดี จิรนากุล (2562) ได้วิจัยเรื่อง ความสัมพันธ์ระหว่างภาวะผู้นำการเปลี่ยนแปลงกับประสิทธิผลการบริหารงานบุคคลของผู้บริหารสถานศึกษาในอำเภอแม่ฟ้าหลวง สังกัดสำนักงานเขตพื้นที่การศึกษาประถมศึกษาเชียงราย เขต 3 ผลการวิจัยพบว่า ภาวะผู้นำการเปลี่ยนแปลงของผู้บริหารสถานศึกษาในอำเภอแม่ฟ้าหลวง สังกัดสำนักงานเขตพื้นที่การศึกษาประถมศึกษาเชียงราย เขต 3 ในภาพรวมและรายด้านอยู่ในระดับมาก และสอดคล้องกับผลการวิจัยของอรวรรณ ภัทรดำเนินสุข (2564) ได้วิจัยเรื่อง ภาวะผู้นำการเปลี่ยนแปลงของผู้บริหารกับแรงจูงใจในการปฏิบัติงานของครูในสถานศึกษา สังกัดสำนักงานเขตพื้นที่การศึกษาประถมศึกษาสมุทรสงคราม ผลการวิจัยพบว่า ภาวะผู้นำการเปลี่ยนแปลงของผู้บริหารสถานศึกษา สังกัดสำนักงานเขตพื้นที่การศึกษาประถมศึกษาสมุทรสงคราม โดยภาพรวมและรายด้านอยู่ในระดับมาก

ข้อเสนอแนะ

ข้อเสนอแนะในการนำผลการวิจัยไปใช้งาน

1. จากผลการวิจัยพบว่า ภาวะผู้นำการเปลี่ยนแปลงของผู้บริหารคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช ในภาพรวมมีคะแนนเฉลี่ยอยู่ในระดับมากทุกด้าน แต่ไม่ได้อยู่ในระดับมากที่สุด ดังนั้น มหาวิทยาลัยนวมินทราธิราชควรมีการส่งเสริมการพัฒนาภาวะผู้นำการเปลี่ยนแปลงให้กับผู้บริหารทุกส่วนงานทั้ง 4 ด้าน ได้แก่ การมีอิทธิพลอย่างมีอุดมการณ์หรือการสร้างบารมี การสร้างแรงบันดาลใจ การกระตุ้นการใช้ปัญญา และการคำนึงถึงความเป็นปัจเจกบุคคล ซึ่งจะส่งผลให้การบริหารจัดการมีประสิทธิภาพในการกระตุ้นให้ผู้ใต้บังคับบัญชากระทำเพื่อส่วนรวมจนบรรลุผลสำเร็จเกินกว่าที่คาดหวังไว้

2. จากผลการวิจัยพบว่า ภาวะผู้นำการเปลี่ยนแปลงของผู้บริหารคณะแพทยศาสตร์วชิรพยาบาล มหาวิทยาลัยนวมินทราธิราช ในภาพรวมมีคะแนนเฉลี่ยอยู่ในระดับมากทุกด้าน เมื่อพิจารณาเป็นรายด้าน พบว่า ด้านที่มีคะแนนเฉลี่ยน้อยที่สุดคือ ด้านการสร้างแรงบันดาลใจ ดังนั้น ผู้บริหารควรโน้มน้าวให้ผู้ใต้บังคับบัญชาเห็นถึงความสำคัญของภารกิจว่าเป็นสิ่งสำคัญ และน่าภาคภูมิใจ ผู้บริหารต้องสร้างความเชื่อมั่นให้กับผู้ใต้บังคับบัญชา เพื่อให้ผู้ใต้บังคับบัญชาเกิดขวัญและกำลังใจ พร้อมที่จะทุ่มเทความพยายามมากเป็นพิเศษในการปฏิบัติงานเพื่อให้บรรลุเป้าหมายขององค์กร นอกจากนี้ ผู้บริหารจะต้องสร้างแรงบันดาลใจให้ผู้ใต้บังคับบัญชารู้สึกว่าตนเองมีคุณค่า และมีความกระตือรือร้นในการปฏิบัติงานให้บรรลุเป้าหมาย อาจใช้คำพูดเพื่อกระตุ้นให้ผู้ใต้บังคับบัญชามั่นใจและกระตือรือร้น โดยพูดให้ผู้ใต้บังคับบัญชาเกิดความภูมิใจในตนเอง พูดเพื่อสร้างขวัญกำลังใจในยามที่ผู้ใต้บังคับบัญชาหมดกำลังใจ ท้อแท้ พูดให้ผู้ใต้บังคับบัญชาเกิดความเชื่อมั่นว่าสามารถทำงานได้สำเร็จและมีคุณภาพ

ข้อเสนอแนะเพื่อการวิจัยครั้งต่อไป

1. ควรมีการศึกษาวิจัยภาวะผู้นำการเปลี่ยนแปลงของผู้บริหารโดยการใช้วิธีวิจัยเชิงคุณภาพ เนื่องจากจะทำให้ได้ทราบข้อมูลในเชิงลึกมากขึ้น

2. ควรมีการศึกษาวิจัยเกี่ยวกับรูปแบบการพัฒนาภาวะผู้นำการเปลี่ยนแปลงของผู้บริหาร เพื่อนำผลที่ได้จาการวิจัยมาเป็นข้อมูลในการวางแผนฝึกอบรมเพื่อพัฒนาศักยภาพของผู้บริหารในด้านภาะผู้นำการเปลี่ยนแปลง

3. ควรมีการศึกษาวิจัยด้านปัญหาและอุปสรรคของภาวะผู้นำการเปลี่ยนแปลงของผู้บริหาร เพื่อให้ทราบสาเหตุของปัญหาและอุปสรรค สามารถนำผลการศึกษาวิจัยมาเป็นแนวทางในการแก้ไขปัญหาเพื่อพัฒนาองค์กรให้มีคุณภาพมากยิ่งขึ้น

คุณภาพชีวิตในการทำงานของพนักงานโรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท. จำกัด (มหาชน)

Quality Of Work Life of Employees of Gas Separation Plant Ptt Public Company Limited

ปวิมล ศรีใหม่, (Pawimon Srimai)[1]
วัลลภ รัฐฉัตรานนท์, (Wanlop Rathachatranon)[2]

บทคัดย่อ

บทความวิจัยนี้มีวัตถุประสงค์เพื่อ (1) ศึกษาระดับคุณภาพชีวิตในการทำงานของพนักงานโรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท. จำกัด (มหาชน) (2) เปรียบเทียบคุณภาพชีวิตในการทำงานของพนักงานโรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท. จำกัด (มหาชน) จำแนกตามปัจจัยส่วนบุคคล การวิจัยในครั้งนี้ใช้ระเบียบวิธีวิจัยเชิงปริมาณ กลุ่มตัวอย่างที่ใช้ในการศึกษา คือ พนักงานโรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท. จำกัด (มหาชน) จำนวน 161 คน โดยเครื่องมือที่ใช้ในการวิจัย เป็นแบบสอบถาม ซึ่งวิเคราะห์ข้อมูลโดยใช้โปรแกรมคอมพิวเตอร์สำเร็จรูป สถิติที่ใช้ในการวิเคราะห์ข้อมูล ได้แก่ ค่าสถิติ ร้อยละ ค่าเฉลี่ย ค่าส่วนเบี่ยงเบนมาตรฐาน การทดสอบค่าที และการวิเคราะห์ความแปรปรวนทางเดียว โดยค่านัยสำคัญทางสถิติที่ใช้ในการวิเคราะห์ครั้งนี้ กำหนดไว้ที่ระดับ 0.05 ผลการวิจัยพบว่า (1) คุณภาพชีวิตในการทำงานของพนักงานโรงแยกก๊าซธรรมชาติ อยู่ในระดับสูง (2) พนักงานโรงแยกก๊าซธรรมชาติ ที่มีปัจจัยส่วนบุคคลด้านอายุ ส่วนที่สังกัด และระยะเวลาที่ปฏิบัติงาน มีผลต่อคุณภาพชีวิตในการทำงาน อย่างมีนัยสำคัญทางสถิติที่ระดับ 0.05 และปัจจัยด้านระดับการศึกษา สถานภาพการสมรส และรายได้ต่อเดือน ไม่มีผลต่อคุณภาพชีวิตในการทำงาน อย่างมีนัยสำคัญทางสถิติที่ระดับ 0.05

คำสำคัญ: คุณภาพชีวิตในการทำงาน , พนักงาน ,โรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท. จำกัด (มหาชน)

Abstract

The purposes of this study were to (1) study the level of quality of work life of employees of Gas Separation Plant PTT Public Company Limited. (2) compare the quality of work life of employees of Gas Separation Plant PTT Public Company Limited on personal aspects. 161 employees comprised the study's sample. A questionnaire was utilized for the research. Utilize easily available computer programs to perform data analysis. Included in the statistics used to examine data are percentage and average statistics. Standard deviation, T-test and one-way ANOVA. The statistical significance value used in this analysis is set at 0.05. The study concluded that (1) The level of quality of work life of employees of Gas Separation Plant PTT Public Company Limited was at the high level. (2) According to the hypothesis testing age, department, and period caused difference in quality of work life, the level of significance for statistical testing was 0.05. However, education level, status and income per month did not cause any difference in the quality of work life, the level of significance for statistical testing was 0.05.

Keywords: Quality of work life, Employees, Gas Separation Plant PTT Public Company Limited

บทนำ

การเปลี่ยนแปลงกระแสการพัฒนาของโลกหรือกระแสโลกาภิวัตน์ (Globalization) รวมถึงการเปลี่ยนแปลงของโลกการทำงานในปัจจุบันที่รูปแบบการทำงานเปลี่ยนไป ในยุคเศรษฐกิจที่มีการเปลี่ยนแปลงอย่างพลิกผัน (Disruption Economy) ทำให้เกิดความเจริญก้าวหน้าทางเทคโนโลยีและกลไกการตลาดที่ก่อให้เกิดการเติบโตขนาดใหญ่ ในปัจจุบันการเติบโตอย่างรวดเร็วของเศรษฐกิจทำให้พลังงานและก๊าซธรรมชาติเป็นสิ่งสำคัญต่อระบบเศรษฐกิจและการดำเนินชีวิตของประชาชนในทุกภูมิภาคของโลก เป็นสินค้าที่มีความสากล มีการซื้อขายกันอย่างเสรีทั่วโลก ทำให้การค้าพลังงานและก๊าซธรรมชาติมีการขยายตัวเพิ่มขึ้นเรื่อย ๆ (ชัลวานา ฮะซานี, 2550) การที่กิจการโรงกลั่นน้ำมันและโรงแยกก๊าซธรรมชาติของประเทศไทยจะดำรงอยู่และเจริญเติบโตในสภาวะการแข่งขันของโลกในปัจจุบัน ต้องมีการปรับตัวให้พร้อมกับการแข่งขันและการเปลี่ยนแปลงอยู่เสมอ

การเติบโตอย่างรวดเร็วของเศรษฐกิจ ทำให้การใช้น้ำมันและก๊าซธรรมชาติเพิ่มมากขึ้นอย่างมาก ซึ่งต้องมีการลงทุนในปริมาณมหาศาลเพื่อรองรับความต้องการ นอกจากการลงทุนด้านการเงินแล้ว ในการดำเนินการอย่างมีประสิทธิภาพ พัฒนาศักยภาพการแข่งขัน และประสบความสำเร็จตามเป้าหมายเทียบเท่าสากลได้นั้น ทรัพยากรบุคคล (Human Resources) จึงถือเป็นปัจจัยสำคัญอีกประการหนึ่งในการขับเคลื่อนองค์การไปสู่เป้าหมาย ปัจจัยด้านบุคลากรมีความสำคัญต่ออุตสาหกรรมประเภทนี้เป็นอย่างมาก นั้นคือ อุตสาหกรรมการผลิตของโรงกลั่นน้ำมันและโรงแยกก๊าซธรรมชาติ ล้วนต้องการบุคลากรที่มีความรู้ ความสามารถ ประสบการณ์และความเชี่ยวชาญในระดับสูง ซึ่งสิ่งเหล่านี้ต้องใช้ระยะเวลาในการฝึกฝน สั่งสมประการณ์ทางเทคนิคที่เพียงพอ จึงจะสร้างขีดความสามารถ ทักษะที่สอดคล้องกับลักษณะงานที่ต้องการและ การสร้างศักยภาพในเชิงการผลิตได้อย่างต่อเนื่องที่จะส่งผลให้องค์การธุรกิจน้ำมันและก๊าซธรรมชาติสามารถแข่งขันได้ในปัจจุบัน ดังนั้นการให้ความสำคัญต่อทรัพยากรบุคคลจึงเป็นเรื่องที่องค์การไม่สามารถมองข้ามได้ เพื่อให้บุคลากรทำงานได้สอดคล้องกับเป้าหมายขององค์การ ช่วยให้องค์การเข้าใจความต้องการของบุคลากรในแต่ละระดับ กระทั่งทำให้เกิดคุณภาพชีวิตในการทำงานที่ดีส่งผลต่อประสิทธิภาพของผลงาน ทรัพยากรบุคคลเป็นปัจจัยสำคัญในการดำเนินงานขององค์การ องค์การมุ่งหวังให้บุคคลากรมีความรู้ ความสามารถ และความชำนาญในการทำงาน บุคลากรควรจะมีทัศนคติที่ดีต่อองค์การ มีการรับรู้มีจิตสำนึก ของตนเอง มีคุณภาพชีวิตในการทำงานที่ดี มีความผูกพันต่อองค์การ รวมทั้งเป็นสมาชิกที่ดี ขององค์การด้วย ปัจจัยที่กล่าวมานี้ทำให้องค์การมีความเข้มแข็งเพียงพอที่จะรับมือกับความเปลี่ยนแปลงอย่างรวดเร็วในปัจจุบัน ทั้งยังผลักดันให้เป็นองค์การที่มีประสิทธิภาพ บรรลุถึงเป้าหมายได้สำเร็จ ในการจัดการกลยุทธ์ที่วางไว้ องค์การต้องใช้ทรัพยากรบุคคลในองค์การทั้งสิ้น การบริหารจัดการบุคลากรที่ดีจะส่งผลต่อเป้าหมายและความยั่งยืนขององค์การ ในขณะเดียวกันบุคลากรก็ต้องมีความสุขในการทำงาน ดังนั้นคุณภาพชีวิตในการทำงานจึงเป็นเป้าหมาย เมื่อเป้าหมายของทั้งบุคลากรและองค์การมีความสอดคล้องกันแล้ว บุคลากรมีความสุขในการทำงาน เกิดความผูกพันต่อองค์การ เกิดความรู้สึกเป็นส่วนหนึ่งขององค์การ เป็นผลให้เกิดพฤติกรรมการเป็นสมาชิกที่ดีขององค์การตามมา

เมื่อพิจารณาความสำคัญของคุณภาพชีวิตในการทำงาน ซึ่งเป็นปัจจัยสำคัญในการเพิ่มผลผลิตขององค์การตลอดจนการมีคุณภาพชีวิตในการทำงานที่ดีจะเป็นการสร้างเป็นขวัญและกำลังใจของผู้ปฏิบัติงาน องค์ประกอบสำคัญเกี่ยวกับคุณภาพชีวิตนั้น มี 8 ประการ อันได้แก่ ค่าตอบแทนที่เป็นธรรมและเพียงพอ สิ่งแวดล้อมที่ถูกลักษณะและปลอดภัย การเปิดโอกาสให้ผู้ปฏิบัติงานได้พัฒนาความรู้ความสามารถได้เป็นอย่างดีลักษณะงานที่ส่งเสริมความเจริญเติบโตและความมั่นคงให้แก่ผู้ปฏิบัติงาน ลักษณะงานมีส่วนส่งเสริมด้านบูรณาการทางสังคม ลักษณะงานที่ตั้งอยู่บนฐานของกฎหมายหรือกระบวนการยุติธรรมความสมดุลระหว่างชีวิตกับการทำงานโดยส่วนรวม และลักษณะงานมีส่วนเกี่ยวข้องและสัมพันธ์กับสังคมโดยตรง เมื่อคนใช้เวลาส่วนใหญ่ในชีวิตไปกับการทำงาน จึงควรมีสภาวะที่เหมาะสมในการทำงาน เกิดความสุขทั้งร่างกายและจิตใจ มีความรู้สึกว่า มั่นคงทั้ง สุขภาวะทางกาย สุขภาวะทางอารมณ์ สุขภาวะทางจิตวิญญาณ และสุขภาวะทางสังคม ผู้บริหาร จึงต้องใส่ใจกับบุคลากรในองค์การให้ดีเพราะจะส่งผลต่อประสิทธิภาพของผลงานโดยตรง

บริษัท ปตท. จำกัด (มหาชน) ในฐานะบริษัทพลังงานแห่งชาติผู้รับผิดชอบในด้านพลังงานของประเทศไทย ได้ก่อสร้างและดำเนินงานในด้านธุรกิจก๊าซธรรมชาติหลังจากที่ได้มีการค้นพบก๊าซธรรมชาติในอ่าวไทย เพื่อทดแทนการใช้น้ำมันดิบที่ต้องนำเข้าจากต่างประเทศ จึงได้ดำเนินการก่อสร้างโรงแยกก๊าซธรรมชาติหน่วยต่าง ๆ ขึ้นที่ ต.มาบตาพุด อ.เมือง จ.ระยอง เพื่อนำไปใช้เป็นเชื้อเพลิงผลิตไฟฟ้า เพิ่มมูลค่าของก๊าซธรรมชาติและเพื่อตอบสนองความต้องการใช้ก๊าซปิโตรเลียมเหลว รวมทั้งช่วยเสริมสร้างความมั่นคงให้แก่อุตสาหกรรมปิโตรเคมี ในปัจจุบันสังคมมนุษย์มีการพัฒนาและเปลี่ยนแปลงที่รวดเร็ว การเติบโตของเศรษฐกิจส่งผลต่อความต้องการในการใช้น้ำมันและก๊าซธรรมชาติ ทำให้พนักงานส่วนใหญ่ต้องทุ่มเทเวลาการทำงานมากกว่าเดิม เกิดความกดดันในการทำงาน บางครั้งทำให้ไม่มีเวลาหรือไม่สามารถจัดสรรเวลาและให้เวลาสำหรับชีวิตความเป็นอยู่ของตนเอง ครอบครัว เพื่อนฝูงและสังคมได้ ซึ่งสภาพการทำงานดังกล่าวย่อมเสี่ยงต่อภาวะการทำงาน

ดังนั้น การศึกษาคุณภาพชีวิตในการทำงานของพนักงานโรงแยกก๊าซธรรมชาติ จังหวัดระยอง จึงเป็นแนวทางที่จะช่วยให้พนักงานในองค์การสามารถทำงานได้อย่างมีประสิทธิภาพ มีความตั้งใจและทุ่มเทในการทำงานเพื่อความสำเร็จขององค์การ และเป็นส่วนร่วมในการส่งเสริมยกระดับคุณภาพชีวิตการทำงานให้ดียิ่งขึ้น

วัตถุประสงค์ของการวิจัย

1. เพื่อศึกษาระดับคุณภาพชีวิตในการทำงานของพนักงานโรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท. จำกัด (มหาชน)

2. เพื่อเปรียบเทียบคุณภาพชีวิตในการทำงานของพนักงานโรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท. จำกัด (มหาชน) จำแนกตามปัจจัยส่วนบุคคล

วิธีการดำเนินการวิจัย

ประชากรและตัวอย่าง

ประชากรที่ใช้ในการศึกษาครั้งนี้ คือ พนักงานโรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท. จำกัด (มหาชน) จำนวน 161 คน (ข้อมูล ณ วันที่ 15 เดือน พฤศจิกายน 2565) ซึ่งจะทำการศึกษาจากจำนวนประชากรทั้งหมด

ตัวแปรที่ใช้ในการวิจัย

การกำหนดการใช้ตัวแปรสำหรับการวิจัยในครั้งนี้ เป็นตัวแปรอิสระ (Independent Variables) 2 ตัวแปร คือ ปัจจัยส่วนบุคคล โดยแบ่งออกเป็น 6 ด้าน ได้แก่ ด้านอายุ ด้านระดับการศึกษา ด้านสถานภาพสมรส ด้านสังกัดที่ปฏิบัติงาน ด้านรายได้ และด้านระยะเวลาในการทำงาน ส่วนตัวแปรตาม (Dependent Variables) ใช้ทฤษฎีเกี่ยวกับคุณภาพชีวิตการทำงาน โดยแบ่งออกเป็น 8 ด้าน ได้แก่ ค่าตอบแทนที่เพียงพอและยุติธรรม สภาพแวดล้อมที่ปลอดภัยและส่งเสริมสุขภาพ การพัฒนาศักยภาพของผู้ปฏิบัติงาน ความก้าวหน้าและความมั่นคงในงาน การบูรณาการทางสังคม ประชาธิปไตยในองค์การ ความสมดุลระหว่างงานกับชีวิตส่วนตัว และความเกี่ยวข้องสัมพันธ์กับสังคม

วิธีการและอุปกรณ์

1. การศึกษาค้นคว้า จากเอกสารทางวิชาการต่าง ๆ เช่น หนังสือ สารนิพนธ์ วิทยานิพนธ์ งานวิจัย บทความทางวิชาการ วารสาร เอกสาร และงานวิจัยที่เกี่ยวข้อง เป็นข้อมูลพื้นฐานในการกำหนดขอบเขตการศึกษาและประกอบการสร้างแบบสอบถาม

2. การศึกษาเชิงสำรวจ (Survey Study) โดยการใช้แบบสอบถาม (Questionnaire) เป็นเครื่องมือในการศึกษา ซึ่งเป็นแบบสอบถามปลายปิด (closed-ended questions)

เครื่องมือที่ใช้ในการวิจัย

เครื่องมือที่ใช้ในการวิจัย คือ แบบสอบถามที่ผู้วิจัยสร้างขึ้นจากแนวคิด ทฤษฎีและผลงานวิจัยที่เกี่ยวข้อง โดยแบ่งออกเป็น 2 ส่วน คือ ส่วนที่ 1 ปัจจัยส่วนบุคคลของผู้ตอบแบบสอบถาม ได้แก่ อายุ ระดับการศึกษา สถานภาพสมรส สังกัดที่ปฏิบัติงาน รายได้ และระยะเวลาในการทำงาน เป็นแบบตรวจรายการ (Check list) ส่วนที่ 2 แบบสอบถามคุณภาพชีวิตในการทำงานของพนักงานโรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท. จำกัด (มหาชน) โดยส่วนที่ 2 ใช้ลักษณะคำถามเป็นมาตรา ประมาณค่าของ ลิเคิร์ท (Likert Scale) มีเกณฑ์การให้คะแนน 5 ระดับ คือ เห็นด้วยอย่างยิ่ง เห็นด้วย ไม่แน่ใจ ไม่เห็นด้วย และไม่เห็นด้วยอย่างยิ่ง

การทดสอบเครื่องมือที่ใช้ในการวิจัย

ผู้วิจัยได้นำแบบสอบถามที่ได้สร้างขึ้นเพื่อการศึกษาในครั้งนี้ ไปทดสอบหาความตรง (Validity) โดยได้นำเครื่องมือที่สร้างขึ้นเสนอให้อาจารย์ที่ปรึกษาและผู้ทรงคุณวุฒิ แก้ไขปรับปรุงเพื่อความเหมาะสม แก้ไขภาษาและคำถามให้มีความชัดเจนเข้าใจได้ง่ายสำหรับผู้ตอบแบบสอบถาม อีกทั้งเพื่อให้ข้อคำถามแต่ละข้อตรงตามจุดมุ่งหมายและวัตถุประสงค์ของการศึกษาครั้งนี้ แล้วนำไปหาความเชื่อมั่น (Reliability) ผู้วิจัยได้นำแบบสอบถามที่ปรับปรุงแล้วไปทดสอบ (Try-Out) กับกลุ่มตัวอย่างที่มีลักษณะใกล้เคียงกับกลุ่มที่จะศึกษาโดยทดสอบเก็บข้อมูลจากกลุ่มตัวอย่าง จำนวน 40 ชุด เพื่อหาความเชื่อมั่นเป็นรายข้อ (Item analysis) โดยวิธีการหาค่าสัมประสิทธิ์แอลฟา (Cronbach's Alpha Coefficient) ผลการทดสอบพบว่าแบบสอบถามข้อมูลคุณภาพชีวิตในการทำงานมีค่าความเชื่อมั่น เท่ากับ 0.964

ขั้นตอนในการวิจัย

1. การสำรวจเอกสาร จากการเก็บรวบรวมข้อมูลที่เกี่ยวข้องกับเรื่องที่จะศึกษาค้นคว้า จากหนังสือ ตำรา เอกสาร ผลงานวิจัย ซึ่งสามารถค้นคว้าได้จากแหล่งต่างๆโดยเฉพาะห้องสมุด เพื่อนำมาสร้างแบบสอบถามก่อนที่จะนำไปใช้เก็บข้อมูล

2. การสำรวจภาคสนาม นำแบบสอบถามที่สมบูรณ์แล้ว แจกให้พนักงานโรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท. จำกัด (มหาชน)

3. แบบสอบถามมาตรวจสอบความสมบูรณ์แล้วนำไปประมวลผลและวิเคราะห์ผลทางสถิติ

การวิเคราะห์ข้อมูล

การวิจัยครั้งนี้ ผู้วิจัยนำเสนอข้อมูลที่รวบรวมได้จากแบบสอบถามมาตรวจสอบความถูกต้อง และครบถ้วนของข้อมูล แล้วนำไปประมวลผลวิเคราะห์ข้อมูลด้วยคอมพิวเตอร์ โดยใช้โปรแกรมสำเร็จรูปทางสถิติ (Statistical Computer Ready Made Program) เพื่อให้ผลการวิจัยมีความถูกต้องแม่นยำมากขึ้น และใช้เครื่องมือทางสถิติในการช่วยวิเคราะห์เพื่อใช้ทดสอบสมมติฐาน จัดทำตารางวิเคราะห์ทางสถิติ เพื่อเสนอเป็นผลการวิจัยตามลำดับ

สถิติที่ใช้ในการวิเคราะห์ข้อมูล

สถิติที่ใช้ในการวิเคราะห์ข้อมูล และทดสอบสมมติฐานครั้งนี้ ประกอบด้วย (1) ค่าสถิติร้อยละ (Percentage) ใช้อธิบายลักษณะทั่วไปของกลุ่มตัวอย่างที่ศึกษา (2) ค่าเฉลี่ย (Mean) ใช้อธิบายระดับความคิดเห็นต่อคุณภาพชีวิตในการทำงานของพนักงานโรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท. จำกัด (มหาชน) (3) ทดสอบความแตกต่างของค่าเฉลี่ยของกลุ่มตัวอย่าง 2 กลุ่ม ใช้การทดสอบค่าที (t-test) (4) การวิเคราะห์ความแปรปรวนทางเดียว (One-Way ANOVA) ใช้ในการเปรียบเทียบค่าเฉลี่ยของคุณภาพชีวิต

ในการทำงานของพนักงานโรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท. จำกัด (มหาชน) ซึ่งจำแนกตัวแปรอิสระออกเป็น 3 กลุ่มขึ้นไป เมื่อพบความแตกต่างจึงทำการวิเคราะห์ความแตกต่างของค่าเฉลี่ย โดยวิธีของ LSD โดยมีค่านัยยะสำคัญทางสถิติที่ใช้ในการวิเคราะห์ครั้งนี้กำหนดไว้ที่ระดับ 0.05

ผลการวิจัย

ข้อมูลส่วนใหญ่ของกลุ่มตัวอย่างซึ่งเป็นพนักงานโรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท. จำกัด (มหาชน) ทั้งหมดจำนวน 161 คน พบว่ากลุ่มตัวอย่างส่วนมากประกอบด้วย พนักงานที่มีช่วงอายุ 31-40 ปี คิดเป็นร้อยละ 36.6 มีระดับการศึกษาระดับปริญญาตรี คิดเป็นร้อยละ 55.9 มีสถานภาพโสด คิดเป็นร้อยละ 50.3 มีส่วนที่สังกัดส่วนบำรุงรักษาระบบควบคุม คิดเป็นร้อยละ 26.1 มีรายได้ต่อเดือน 45,001 บาทขึ้นไป คิดเป็นร้อยละ 83.9 และมีอายุงาน 10 ปีขึ้นไป คิดเป็นร้อยละ 65.2

ผลการวิเคราะห์ระดับความคิดเห็นของพนักงานโรงแยกก๊าซธรรมชาติ ต่อคุณภาพชีวิตในการทำงาน

จากผลการวิเคราะห์ พบว่า พนักงานโรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท. จำกัด (มหาชน) มีภาพรวมของระดับคุณภาพชีวิตในการทำงาน อยู่ในระดับสูง มีค่าเฉลี่ยรวม 4.24 โดยเมื่อพิจารณาระดับความคิดเห็นต่อคุณภาพชีวิตในการทำงาน ทั้ง 8 ด้านตามลำดับได้ดังนี้ ด้านความรับผิดชอบต่อสังคม มีค่าเฉลี่ยสูงที่สุด คือ 4.46 ด้านสภาพแวดล้อมที่ปลอดภัยและส่งเสริมสุขภาพ มีค่าเฉลี่ย 4.28 ด้านค่าตอบแทนที่เพียงพอและยุติธรรม มีค่าเฉลี่ย 4.26 ด้านความก้าวหน้าและความมั่นคงในงาน มีค่าเฉลี่ย 4.25 ด้านการพัฒนาศักยภาพของผู้ปฏิบัติงาน มีค่าเฉลี่ย 4.23 ด้านการบูรณาการทางสังคมหรือการทำงานร่วมกัน มีค่าเฉลี่ย 4.22 ด้านการรักษาสิทธิส่วนบุคคล มีค่าเฉลี่ย 4.18 และด้านความสมดุลระหว่างการทำงานกับชีวิตส่วนตัว มีค่าเฉลี่ย 4.08

เมื่อทดสอบสมมติฐานที่ผู้วิจัยได้ตั้งไว้ 6 สมมติฐาน โดยทดสอบความสัมพันธ์และเปรียบเทียบความแตกต่างระหว่างตัวแปรอิสระ ได้แก่ อายุ ระดับการศึกษา สถานภาพการสมรส ส่วนที่สังกัด รายได้ต่อเดือน และระยะเวลาที่ปฏิบัติงาน ส่วนตัวแปรตาม ได้แก่ คุณภาพชีวิตในการทำงาน สามารถสรุปได้ดังนี้

ตารางที่ 1 สรุปผลการทดสอบสมมติฐาน

ตัวแปรอิสระ	Sig.	เป็นไปตามสมมติฐาน	ไม่เป็นไปตามสมมติฐาน
1. อายุ	0.044*	✓	-
2. ระดับการศึกษา	0.478	-	✓
3. สถานภาพการสมรส	0.073	-	✓
4. ส่วนที่สังกัด	0.000*	✓	-
5. รายได้ต่อเดือน	0.557	-	✓
6. ระยะเวลาที่ปฏิบัติงาน	0.000*	✓	-

โดยกำหนดระดับนัยสำคัญทางสถิติที่ใช้ในการทดสอบไว้ที่ระดับ 0.05

จากตารางทดสอบสมมติฐานที่ตั้งไว้ 6 สมมติฐาน ผลปรากฏว่า

สมมติฐานที่ 1 พนักงาน ที่มีอายุต่างกัน มีคุณภาพชีวิตในการทำงานแตกต่างกัน ซึ่งเป็นไปตามสมมติฐาน

สมมติฐานที่ 2 พนักงาน ที่มีระดับการศึกษาต่างกัน มีคุณภาพชีวิตในการทำงานไม่แตกต่างกัน ซึ่งไม่เป็นไปตามสมมติฐานที่ตั้งไว้

สมมติฐานที่ 3 พนักงาน ที่มีสถานภาพต่างกัน มีคุณภาพชีวิตในการทำงานไม่แตกต่างกัน ซึ่งไม่เป็นไปตามสมมติฐานที่ตั้งไว้

สมมติฐานที่ 4 พนักงาน ที่มีส่วนที่สังกัดต่างกัน มีคุณภาพชีวิตในการทำงานแตกต่างกัน ซึ่งเป็นไปตามสมมติฐาน

สมมติฐานที่ 5 พนักงาน ที่มีรายได้ต่อเดือนต่างกัน มีคุณภาพชีวิตในการทำงานไม่แตกต่างกัน ซึ่งไม่เป็นไปตามสมมติฐานที่ตั้งไว้

สมมติฐานที่ 6 พนักงาน ที่มีระยะเวลาที่ปฏิบัติงานแตกต่างกัน มีคุณภาพชีวิตในการทำงานแตกต่างกัน ซึ่งเป็นไปตามสมมติฐาน

สรุปผลการวิจัย

การวิจัยเรื่อง คุณภาพชีวิตในการทำงานของพนักงานโรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท. จำกัด (มหาชน) สามารถอภิปรายผลได้ดังนี้

1. ระดับคุณภาพชีวิตในการทำงานของพนักงานโรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท. จำกัด (มหาชน) ในภาพรวมอยู่ในระดับสูง มีค่าเฉลี่ยรวม 4.24 โดยเมื่อพิจารณาคุณภาพชีวิตในการทำงานทั้ง 8 ด้าน ตามลำดับได้ดังนี้ ด้านความรับผิดชอบต่อสังคมมีค่าเฉลี่ยสูงที่สุด คือ 4.46 ด้านสภาพแวดล้อมที่ปลอดภัยและส่งเสริมสุขภาพ มีค่าเฉลี่ย 4.28 ด้านค่าตอบแทนที่เพียงพอและยุติธรรม มีค่าเฉลี่ย 4.26 ด้านความก้าวหน้าและความมั่นคงในงาน มีค่าเฉลี่ย 4.25 ด้านการพัฒนาศักยภาพของผู้ปฏิบัติงาน มีค่าเฉลี่ย 4.23 ด้านการบูรณาการทางสังคมหรือการทำงานร่วมกัน มีค่าเฉลี่ย 4.22 ด้านการรักษาสิทธิส่วนบุคคล มีค่าเฉลี่ย 4.18 และด้านความสมดุลระหว่างการทำงานกับชีวิตส่วนตัว มีค่าเฉลี่ย 4.08 ทั้งนี้อาจเนื่องมาจากพนักงานพึงพอใจในค่าตอบแทน สวัสดิการที่ได้รับมีความยุติธรรมเหมาะสมในการดำเนินชีวิตในปัจจุบัน รู้สึกว่าการทำงานมีประโยชน์ต่อสังคมและส่วนรวมทำให้เห็นคุณค่าและเกิดความภาคภูมิใจ

2. เพื่อเปรียบเทียบปัจจัยคุณภาพชีวิตในการทำงานของพนักงานโรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท. จำกัด (มหาชน) จำแนกตามปัจจัยส่วนบุคคล

2.1 พนักงานที่มีอายุต่างกัน มีคุณภาพชีวิตในการทำงานแตกต่างกัน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้แสดงให้เห็นว่า พนักงานของโรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท.จำกัด (มหาชน) ที่มีช่วงอายุมากซึ่งมีระยะเวลาในการทำงานที่นานกว่ามีความสามารถในการปรับตัวกับผู้ร่วมงานได้ดี ตลอดจนสามารถรับมือกับการเปลี่ยนแปลงทั้งภายในและภายนอกได้ดี เนื่องจากมีวุฒิภาวะที่สามารถจัดการปัญหาได้ดีกว่า ค่าตอบแทนและสวัสดิการที่สูงกว่าพนักงานใหม่ ซึ่งสอดคล้องกับผลการศึกษาของรุ่งวิกรัย หอมแหยม (2554) ศึกษาเรื่องคุณภาพชีวิตในการทำงานของพนักงานบริษัท เมวะ เอ็นจิเนียริ่ง จำกัด และผลการศึกษาของนรินทร์ อบแพทย์ (2563) ศึกษาเรื่องคุณภาพชีวิตในการทำงาน : กรณีศึกษาบุคลากรในองค์การบริหารส่วนจังหวัดระนอง

2.2 พนักงานที่มีระดับการศึกษาต่างกัน มีคุณภาพชีวิตในการทำงานไม่แตกต่าง ซึ่งไม่เป็นไปตามสมมติฐานที่ตั้งไว้แสดงให้เห็นว่า พนักงานของโรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท.จำกัด (มหาชน) ในฝ่ายวิศกรรมและบำรุงรักษาโรงแยกก๊าซธรรมชาติ โดยลักษณะงานเน้นไปในทางปฏิบัติ การใช้ทักษะ ความรู้ ความสามารถ ประสบการณ์ เฉพาะทางในการทำงาน ซึ่งส่วนใหญ่ต้องใช้เวลาในการฝึกปรือฝีมือมากกว่าระดับการศึกษา ด้วยเหตุนี้ทำให้การศึกษาไม่มีผลต่อคุณภาพชีวิตในการทำงาน ซึ่งสอดคล้องกับผลการศึกษาของพลอย บูญญาพิทักษ์ (2554) ศึกษาเรื่องคุณภาพชีวิตกับการรักษาความผูกพันต่อองค์การของบุคลากรต่างวัย : กรณีศึกษาบุคลากรในสำนักงานปลัดกระทรวงมหาดไทย การศึกษาของรุ่งวิกรัย หอมแหยม (2554) ศึกษาเรื่องคุณภาพชีวิตในการทำงานของพนักงานบริษัท เมวะ เอ็นจิเนียริ่ง จำกัด และการศึกษาของลิยากร ตริวาลอง (2561) ศึกษาเรื่องคุณภาพชีวิตในการทำงานของพนักงานการเคหะแห่งชาติ

2.3 พนักงานที่มีสถานะทางสมรสต่างกัน มีคุณภาพชีวิตในการทำงานไม่แตกต่างกัน ซึ่งไม่เป็นไปตามสมมติฐานที่ตั้งไว้แสดงให้เห็นว่า พนักงานของโรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท.จำกัด (มหาชน) ไม่ว่าจะสถานะโสดหรือสมรส ล้วนมีคุณภาพชีวิตในการทำงานที่คล้ายคลึงกันด้านค่าตอบแทนและสวัสดิการ การพัฒนาความสามารถ ความก้าวหน้า ความสมดุลระหว่างชีวิตการทำงานกับชีวิตด้านอื่น ความเกี่ยวข้องกับหน่วยงานส่วนอื่น ไม่แตกต่างกัน ทำให้คุณภาพชีวิตในการทำงานไม่แตกต่างกัน ซึ่งสอดคล้องกับการศึกษาของกฤษฎา ฉัตรวิไล (2561) ศึกษาเรื่องความผูกพันในงานและคุณภาพชีวิตในการทำงานของพนักงานระดับปฏิบัติการ กรณีศึกษา : ฝ่ายการช่างกล การรถไฟแห่งประเทศไทย และการศึกษาของลิยากร ตริวาลอง (2561) ศึกษาเรื่องคุณภาพชีวิตในการทำงานของพนักงานการเคหะแห่งชาติ

2.4 พนักงานที่มีสังกัดการปฏิบัติงานต่างกัน มีคุณภาพชีวิตในการทำงานแตกต่างกัน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้แสดงให้เห็นว่า พนักงานของโรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท. จำกัด (มหาชน) มีรูปแบบการทำงาน ความรับผิดชอบของงานที่แตกต่างกัน เช่น ส่วนบำรุงรักษาระบบควบคุม และส่วนบำรุงรักษาเครื่องกล หน้าที่หลักส่วนใหญ่ต้องลงพื้นที่ในการทำงานภายในโรงแยกก๊าซธรรมชาติทั้งหมด ทำให้มีจำนวนพนักงานที่มากกว่าเพื่อให้เพียงพอต่อการทำงานในแต่ละพื้นที่ที่ดูแล ซึ่งแตกต่างจากส่วนวิศวกรรมเทคนิค ส่วนบริหารแผนงานบำรุงรักษา ส่วนตรวจสอบโรงงาน และส่วนบริหารการซ่อมใหญ่โรงงาน มีหน้าที่สนับสนุน ดูแลรับผิดชอบโครงการ วางแผนภาพรวมของระบบงาน แผนงานสำหรับการบำรุงรักษาประจำปี ซึ่งแผนที่ไว้ต้องเป็นไปตามกรอบระยะเวลา หากเกิดความผิดพลาดอาจก่อให้เกิดความเครียดได้หากไม่เป็นไปตามแผน และลงพื้นที่ในการทำงานเป็นบางครั้ง จำนวนพนักงานในส่วนงานจึงมีน้อย ทำให้สังกัดการปฏิบัติงานต่างกัน มีคุณภาพชีวิตในการทำงานแตกต่างกัน ซึ่งสอดคล้องกับการศึกษาของพลอย บูญญาพิทักษ์ (2554) ศึกษาเรื่องคุณภาพชีวิตกับการรักษาความผูกพันต่อองค์การของบุคลากรต่างวัย : กรณีศึกษาบุคลากรในสำนักงานปลัดกระทรวงมหาดไทย และผลการศึกษาของนรินทร์ อบแพทย์ (2563) ศึกษาเรื่องคุณภาพชีวิตในการทำงาน : กรณีศึกษาบุคลากรในองค์การบริหารส่วนจังหวัดระนอง

2.5 พนักงานที่มีรายได้ต่างกัน มีคุณภาพชีวิตในการทำงานไม่แตกต่างกัน ซึ่งไม่เป็นไปตามสมมติฐานที่ตั้งไว้ แสดงให้เห็นว่าพนักงานของโรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท.จำกัด (มหาชน) ได้รับค่าตอบแทนและสวัสดิการในอัตราที่สูงกว่าค่าแรงขั้นต่ำที่รัฐบาลกำหนด ค่าตอบแทนมีความสมเหตุสมผล สวัสดิการรวมไปถึงบุคคลในครอบครัว ทำให้เพียงพอต่อค่าใช้จ่ายในแต่ละเดือน และสามารถเก็บออม นำไปลงทุนได้ ทำให้พนักงานที่มีรายได้ต่างกัน มีคุณภาพชีวิตในการทำงานไม่แตกต่างกัน ซึ่งสอดคล้องกับการศึกษาของพรรษชล ละลายบาป (2550) ทำการศึกษาเรื่องปัจจัยส่วนบุคคลที่มีผลต่อคุณภาพชีวิตการทำงานของพนักงานปฏิบัติการ กรณีศึกษาในโรงงานอุตสาหกรรมผลิตสินค้าอุปโภค-บริโภค และการศึกษาของกฤษฎา ฉัตรวิไล (2561) ศึกษาเรื่องความผูกพันในงานและคุณภาพชีวิตในการทำงานของพนักงานระดับปฏิบัติการ กรณีศึกษา : ฝ่ายการช่างกล การรถไฟแห่งประเทศไทย

อภิปรายผลการวิจัย

ในการวิจัยเรื่อง “คุณภาพชีวิตในการทำงานของพนักงานโรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท. จำกัด (มหาชน)” ผลการวิจัยพบว่า คุณภาพชีวิตในการทำงานของพนักงานโรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท. จำกัด (มหาชน) ในภาพรวมอยู่ในระดับสูง โดยมีค่าเฉลี่ย 4.24 เมื่อพิจารณาเป็นรายข้อ พบว่าประเด็นสำคัญที่พนักงานโรงแยกก๊าซธรรมชาติซึ่งเป็นกลุ่มตัวอย่าง มีคุณภาพชีวิตในการทำงานมากที่สุด คือ องค์การของท่านมีนโยบายการพัฒนาชุมชนและสังคม เช่น ร่วมปลูกป่าถาวร โครงการวิสาหกิจชุมชน โครงการชุมชนปลอดภัย (ข้อ 40) มีค่าเฉลี่ยสูงที่สุด คือ 4.56 รองลงมา คือ องค์การของท่านมีส่วนช่วยให้ประเทศชาติสามารถพัฒนาไปในทางที่ดีขึ้น (ข้อ 36) มีค่าเฉลี่ย 4.54 ส่วนประเด็นที่พนักงานโรงแยกก๊าซธรรมชาติ มีคุณภาพชีวิตในการทำงาน น้อยที่สุด คือ ท่านมักจะไม่ต้องทำงานนอกเวลา หรือนำงานกลับไปทำต่อที่บ้าน (ข้อ 34) มีค่าเฉลี่ยน้อยที่สุด คือ 3.83

จากประเด็นที่พนักงานโรงแยกก๊าซธรรมชาติ มีคุณภาพชีวิตในการทำงานน้อยที่สุด ในประเด็นที่ว่าท่านมักจะไม่ต้องทำงานนอกเวลา หรือนำงานกลับไปทำต่อที่บ้าน แสดงให้เห็นว่าพนักงานโรงแยกก๊าซธรรมชาติ ซึ่งเป็นกลุ่มตัวอย่างนั้นต้องทำงานนอกเวลาและนำงานกลับไปทำต่อที่บ้าน โดยเมื่อแยกวิเคราะห์ข้อมูลระดับคุณภาพชีวิตในการทำงานของพนักงานโรงแยกก๊าซธรรมชาติ จังหวัดระยอง บริษัท ปตท. จำกัด (มหาชน) เป็นรายด้าน พบว่า ด้านความรับผิดชอบต่อสังคม มีค่าเฉลี่ยสูงที่สุด รองลงมาคือ ด้านสภาพแวดล้อมที่ปลอดภัยและส่งเสริมสุขภาพ ด้านค่าตอบแทนที่เพียงพอและยุติธรรม ด้านความก้าวหน้าและความมั่นคงในงาน ด้านการพัฒนาศักยภาพของผู้ปฏิบัติงาน ด้านการบูรณาการทางสังคมหรือการทำงานร่วมกัน ด้านการรักษาสิทธิส่วนบุคคล และด้านความสมดุลระหว่างการทำงานกับชีวิตส่วนตัว ตามลำดับ ทั้งนี้อาจเนื่องมาจากพนักงานโรงแยกก๊าซธรรมชาติ พึงพอใจในงานที่ได้รับมอบหมายและทำงานอยู่ในปัจจุบัน รู้สึกว่างานที่ทำอยู่เป็นประโยชน์ต่อสังคมส่วนรวม และประเทศชาติ ทำให้เกิดความภาคภูมิใจในตนเอง ซึ่งเป็นสิ่งที่ทำให้พนักงานโรงแยกก๊าซธรรมชาติเกิดความรู้สึกในทางด้านบวกมากกว่าด้านลบ โดยผลการศึกษาสอดคล้องกับงานวิจัยของรุ่งวิกรัย หอมแหยม (2554) ศึกษาเรื่องคุณภาพชีวิตในการทำงานของพนักงานบริษัท เมวะ เอ็นจิเนียริ่ง จำกัด

โดยจากการทดสอบสมมติฐานที่ตั้งไว้ 6 สมมติฐาน ผลปรากฏว่าไม่เป็นไปตามสมมติฐานที่ตั้งไว้ 3 สมมติฐาน ได้แก่ ระดับการศึกษา สถานภาพการสมรส และรายได้ต่อเดือน สำหรับผลการทดสอบที่เป็นไปตามสมมติฐานที่ตั้งไว้ 3 สมมติฐาน ได้แก่ ระดับอายุ ส่วนที่สังกัด และระยะเวลาที่ปฏิบัติงาน

ข้อเสนอแนะ

ข้อเสนอแนะจากการวิจัย

1. ควรสร้างสมดุลระหว่างการทำงานกับชีวิตส่วนตัวที่เหมาะสม มีการกำหนดเวลาชีวิตการทำงาน และชีวิตส่วนตัวในตารางประจำวันด้วยหลังจากเลิกงาน และควรจัดลำดับความสำคัญในชีวิต

2. องค์การควรสนับสนุนการมีคุณภาพชีวิตที่ดีในการทำงานของพนักงาน กำหนดค่าตอบแทนที่เพียงพอและเป็นธรรม ปรับปรุงสวัสดิการ ให้สอดคล้องกับความต้องการของพนักงานในสภาพปัจจุบัน ให้พนักงานเกิดความพึงพอใจโดยการได้รับการตอบสนองความต้องการ

3. องค์การควรพัฒนาบุคลากร พัฒนาศักยภาพ ระบบการฝึกอบรมบุคลากรที่มีมาตรฐานและต่อเนื่อง

4. องค์การควรพัฒนาศักยภาพผู้บังคับบัญชา เป็นผู้นำการเปลี่ยนแปลง มีความยืดหยุ่น ทักษะการฟัง วิสัยทัศน์ เพิ่มความเสมอภาค การดูแลเอาใจใส่ และให้ความสนใจข้อเสนอแนะของผู้ใต้บังคับบัญชาอย่างเท่าเทียมกัน เพื่อสร้างขวัญและกำลังใจในการทำงานของผู้ใต้บังคับบัญชา

5. องค์การควรมีตำแหน่งงานที่พร้อมให้พนักงานก้าวสู่ตำแหน่งที่สูงกว่า และการเลื่อนขั้นที่เหมาะสม เป็นธรรม

6. องค์การควรส่งเสริมการทำงานร่วมกัน เน้นการทำงานเป็นทีม รับฟังเสียงทุก ๆ คนในทีมอย่างเท่าเทียมกัน และแก้ปัญหาด้วยเหตุผลที่ดีที่สุด

ข้อเสนอแนะในการศึกษาครั้งต่อไป

1. การศึกษาค้นคว้าครั้งนี้เป็นการศึกษาเฉพาะพนักงานที่ปฏิบัติงานภายในฝ่ายวิศวกรรมและบำรุงรักษาโรงแยกก๊าซธรรมชาติ เท่านั้น ไม่สามารถสรุป อธิบายคุณภาพชีวิตของพนักงานได้ทั้งหมด ในการศึกษาวิจัยครั้งต่อไปควรศึกษาเปรียบเทียบพนักงานในฝ่ายอื่น ๆ ด้วย ซึ่งจะทำให้ความชัดเจนได้มากยิ่งขึ้น สามารถนำไปพัฒนาคุณภาพชีวิตของพนักงานต่อไป

2. ควรมีการศึกษาคุณภาพชีวิตในการทำงานของพนักงานในองค์การอื่น ๆ ในกลุ่มธุรกิจใกล้เคียงกัน เพื่อให้ทราบถึงระดับคุณภาพชีวิตในการทำงานของพนักงานในวิชาชีพเดียวกัน เพื่อนำผลที่ได้มาวิเคราะห์เปรียบเทียบหาแนวทางในการพัฒนาคุณภาพชีวิตในการทำงานต่อไป

3. การศึกษาค้นคว้าครั้งนี้เป็นการวิจัยเชิงปริมาณ โดยใช้วิธีการเก็บข้อมูลจากแบบสอบถาม ซึ่งในการศึกษาครั้งต่อไปอาจใช้วิธีการเก็บข้อมูลเชิงคุณภาพ โดยเป็นการสัมภาษณ์เชิงลึก เช่น ผู้จัดการ หัวหน้างาน และพนักงาน เป็นต้น เพื่อให้ได้ข้อมูลที่มีความละเอียดและชัดเจนมากยิ่งขึ้น

บทคัดย่อ

บทความนี้มีวัตถุประสงค์เพื่อศึกษาการมีส่วนร่วมทางการเมืองของประชาชนในเขตองค์การบริหารส่วนตำบลกะลุวอ อำเภอเมือง จังหวัดนราธิวาส พบว่า ระดับการมีส่วนร่วมทางการเมืองของประชาชนโดยรวมอยู่ในระดับกลาง เมื่อจำแนกเป็นรายด้าน พบว่า กลุ่มตัวอย่างมีส่วนร่วมในด้านกิจกรรมการออกเสียงเลือกตั้งมากที่สุด ด้านกิจกรรมการพูดคุยปรึกษาเรื่องการเมืองรองลงมา และน้อยที่สุดคือด้านกิจกรรมการจัดตั้งและเป็นสมาชิกกลุ่มต่างๆ ทางการเมือง และเมื่อพิจารณาปัจจัยที่มีผลต่อการมีส่วนร่วมทางการเมืองของประชาชนฯ พบว่า ระดับการศึกษา ระดับรายได้ และการรับรู้สถานการณ์ทางการเมือง มีผลต่อการมีส่วนร่วมทางการเมือง ในขณะที่ เพศ อายุ ศาสนา และอาชีพ ไม่มีผลต่อการมีส่วนร่วมทางการเมือง จากข้อมูลสรุปว่าประชาชนในพื้นที่ดังกล่าวมีระดับการรับรู้สถานการณ์ทางการเมืองโดยรวมอยู่ในระดับสูง ทั้งในเรื่องข้อมูลข่าวสารทางการเมือง สถานการณ์การเลือกตั้ง เครือข่ายชุมชนทางการเมือง และนโยบายและผลงานในพื้นที่ แต่ประชาชนในพื้นที่ยึดติดกับการมีส่วนร่วมทางการเมืองในแบบที่เรียบง่าย เช่น การไปใช้สิทธิ์เลือกตั้ง การพูดคุยปรึกษาเรื่องการเมือง แต่ยังไม่มีส่วนร่วมทางการเมืองในประเด็นที่มีความซับซ้อน เช่น การเรียกร้องประเด็นสาธารณะ การจัดตั้งเป็นสมาชิกกลุ่มต่างๆ ทางการเมือง เป็นต้น ทำให้ระดับการการมีส่วนร่วมทางการเมืองโดยรวมอยู่ในระดับกลาง
คำสำคัญ: การมีส่วนร่วมทางการเมือง, กะลุวอ, นราธิวาส

Abstract

This paper aims to study public political participation in Kaluwo Subdistrict Administrative Organization Mueang Narathiwat District, Narathiwat Province, had found that overall the Public Political Participation level is average. When classified, the representative sample had participated in elections the most. Following by political conversational activity. The least is organizing and being a part of a political group. Moreover, the research found the factors that affect public political participation which are levels of education, income, and political awareness. While genders, ages, beliefs, and occupations are not affected. The data showed that people in this area have a level of political awareness in a high degree, which involves political information, election situation, political communion network, policy, and political performance. However, people still cling to simple public political participation such as going to vote, having political conversations, and consulting. Yet, in complex matters, like public issues demonstrating and organizing, and being a part of political groups, people are not participating much. As a result, the level of public political participation is on average.
Keywords: Public Political Participation, Kalowo, Narathiwat

บทนำ

การก้าวเข้าสู่การเปลี่ยนแปลงการปกครองของประเทศไทย จากระบอบสมบูรณาญาสิทธิราชย์ มาสู่ระบอบการปกครองแบบประชาธิปไตยอันมีพระมหากษัตริย์ทรงเป็นประมุข ได้ทำให้เกิดการเปลี่ยนแปลงในหลายด้าน นับตั้งแต่วันที่ 24 มิถุนายน 2475 หากนับเวลามาจนถึงปัจจุบันเป็นเวลามากกว่า 90 ปี ระยะเวลาดังกล่าวได้หล่อหลอมวัฒนธรรม ขนบธรรมเนียม และประเพณีต่างๆ ของไทยเข้าด้วยกันกับรูปแบบการปกครอง รวมทั้งตลอดระยะเวลาที่ผ่านมารูปแบบการปกครองก็ได้มีการพัฒนาและปรับเปลี่ยนกฎเกณฑ์ กติกาอยู่เสมอมา จนกระทั่งกลายเป็นการปกครองในระบบประชาธิปไตยที่มีเอกลักษณ์ โดยการปกครองในระบอบดังกล่าวนี้

[1] สาขาวิชารัฐศาสตร์และรัฐประศาสนศาสตร์ คณะสังคมศาสตร์ มหาวิทยาลัยเกษตรศาสตร์ 0904807757 Biannat.su@ku..th
[2] สาขาวิชารัฐศาสตร์ คณะสังคมศาสตร์ มหาวิทยาลัยเกษตรศาสตร์

จะมีหลักการสำคัญคือ จะมีการแบ่งการปกครองออกเป็น 3 ฝ่าย ได้แก่ ฝ่ายนิติบัญญัติ ฝ่ายตุลาการ และฝ่ายบริหาร ซึ่งแต่ละฝ่ายมีหน้าที่ของตนเอง รวมถึงแต่ละฝ่ายจะมีการดุลอำนาจซึ่งกันและกัน

ในปัจจุบัน สถานการณ์ทางการเมืองในประเทศไทยเรียกได้ว่ากำลังมีความพยายามเปลี่ยนแปลงให้เป็นประเทศที่ปกครองด้วยระบอบประชาธิปไตยที่มากขึ้น หรือเรียกได้ว่ากำลังเปลี่ยนแปลงเข้าสู่การปกครองแบบระบอบประชาธิปไตยที่แท้จริง หากแต่การไปถึงจุดดังกล่าวได้นั้นองค์ประกอบสำคัญอย่างหนึ่งเลยคือ การมีส่วนร่วมทางการเมืองของประชน เพราะการปกครองในระบอบประชาธิปไตยนั้น เป็นการปกครองที่ถือว่าทุกคนมีสิทธิมีเสียงที่เท่ากัน โดยในรัฐธรรมนูญซึ่งเป็นกฎหมายสูงสุดของประเทศ ได้กล่าวถึงการแสดงความคิดเห็นทางการเมือง ซึ่งถือเป็นหนึ่งสิ่งในการมีส่วนร่วมทางการเมือง โดยกล่าวไว้ในหมวดที่ 3 ว่า “...สิทธิและเสรีภาพของปวงชนชาวไทย ส่งผลให้ประชาชนชาวไทยสามารถมีเสรีภาพในการแสดงความคิดเห็น การพิมพ์ การเขียน...” ตามมาตราที่ 34

“...การมีส่วนร่วมทางการเมือง มีความสำคัญต่อการพัฒนาประชาธิปไตย คือ ทำให้ผู้ปกครองและผู้ถูกปกครองได้มีโอกาสทราบความต้องการของกันและกันอย่างแท้จริง ทำให้การดำเนินนโยบายของรัฐตอบสนองต่อผู้เป็นเจ้าของประเทศในด้านเศรษฐกิจการเมืองและสังคม...” (อัญธิษฐา อักษรศร, 2562) อีกทั้งการมีส่วนร่วมทางการเมืองของประชาชน ยังแสดงออกถึงอำนาจสูงสุด 5 ประการดังนี้ (โกวิท วงศ์สุรวัฒน์, 2546, หน้า 31) 1.) การเลือกตั้งแบบเลือกตั้ง (election) 2.) การลงประชามติ (referendum) 3.) ประชาชนมีสิทธิเสนอร่างกฎหมาย (initiative) 4.) ประชาชนสามารถตัดสินใจในประเด็นสำคัญเกี่ยวกับนโยบายแห่งรัฐ 5.) ประชาชนสามารถเปลี่ยนผู้ดำรงตำแหน่งสำคัญทางราชการได้

จากข้อมูลของกรมส่งเสริมการปกครองท้องถิ่น พบว่าการปกครองของประเทศไทยในปัจจุบัน ได้แบ่งการปกครองออกเป็นองค์การบริหารส่วนจังหวัด 76 แห่ง เทศบาล 2,472 แห่ง(เทศบาลนคร 30 แห่ง เทศบาลเมือง 195 แห่ง และเทศบาลตำบล 2,247 แห่ง) องค์การบริหารส่วนตำบล 5,300 แห่ง และองค์กรปกครองท้องถิ่นรูปแบบพิเศษ (กรุงเทพมหานครและเมืองพัทยา) ๒ แห่ง รวมทั้งสิ้น 7,850 แห่ง (กรมส่งเสริมการปกครองท้องถิ่น, 2563) จะเห็นว่าด้วยจำนวนการปกครองส่วนท้องถิ่นที่แยกย่อยออกมากว่า 7,850 แห่งนั้น เมื่อเราหยิบยกการศึกษาการมีส่วนร่วมของประชาชนในแต่ละท้องถิ่น หรือแต่ละพื้นที่ ที่ได้มีผู้ทำการศึกษาไว้แล้วมาทำความเข้าใจ เราย่อมที่จะได้รับรู้ถึงข้อมูลและผลการศึกษาที่แตกต่างกัน เนื่องด้วยสภาพสังคมแต่ละท้องถิ่นที่มีความแตกต่างกัน รวมไปถึงปัจจัยพื้นฐานของแต่ละบุคคลที่มีทั้งความเหมือนและความแตกต่างกัน ดังนั้นทางผู้วิจัยเล็งเห็นถึงประเด็น ปัญหา และข้อมูลต่างๆที่รอการศึกษาจากพื้นที่ท้องถิ่นของผู้วิจัย

จากข้อมูลของสำนักงานท้องถิ่นจังหวัดนราธิวาส พบว่า จังหวัดนราธิวาสแบ่งการปกครองภูมิภาคเป็น 13 อำเภอ การปกครองท้องที่ 77 ตำบล 589 หมู่บ้าน และมีการจัดการปกครองท้องถิ่น ดังนี้ 1.) รูปแบบองค์การบริหารส่วนจังหวัดจำนวน 1 แห่ง โดยใช้พื้นที่ทั้งจังหวัด 2.) รูปแบบเทศบาลใช้พื้นที่ตำบลทั้งตำบล แต่เทศบาลบางแห่งใช้พื้นที่ไม่ครบทั้งพื้นที่ตำบล ปัจจุบัน มีจำนวน 16 เทศบาล แยกเป็นเทศบาลเมืองจำนวน 3 แห่ง เทศบาลตำบลจำนวน 13 แห่ง 3.) รูปแบบองค์การบริหารส่วนตำบล ใช้พื้นที่ตำบลทั้งตำบลและบางแห่งรวมพื้นที่ตำบลอื่น หรือพื้นที่ติดเขตเทศบาล มีจำนวน 72 แห่ง

องค์การบริหารส่วนตำบลกะลุวอ เป็น 1 ใน 78 พื้นที่การปกครองของจังหวัดนราธิวาส โดยองค์การบริหารส่วนตำบลกะลุวอมีจำนวนหมู่บ้านทั้งสิ้น 8 หมู่บ้าน ประกอบด้วยหมู่บ้าน หมู่1 บ้านยาบี, หมู่2 บ้านกำแพง, หมู่3 บ้านกาแนะ, หมู่4 บ้านกูแบสาลอ, หมู่5 บ้านจาเราะสะโตร์, หมู่6 บ้านโคกศิลา, หมู่7 บ้านรอตันมาตู และหมู่ 8 บ้านกาโมแร ซึ่งมีประชากรทั้งสิ้น 11,630 คน (ข้อมูลจากองค์การบริหารส่วนตำบลกะลุวอ อำเภอเมืองนราธิวาส จังหวัดนราธิวาส, 2564) จากข้อมูลดังกล่าวจะพบว่าในพื้นที่องค์การบริหารส่วนตำบลกะลุวอ เป็นพื้นที่ที่มีความหลากหลาย และมีผู้คนอาศัยอยู่เป็นจำนวนมาก

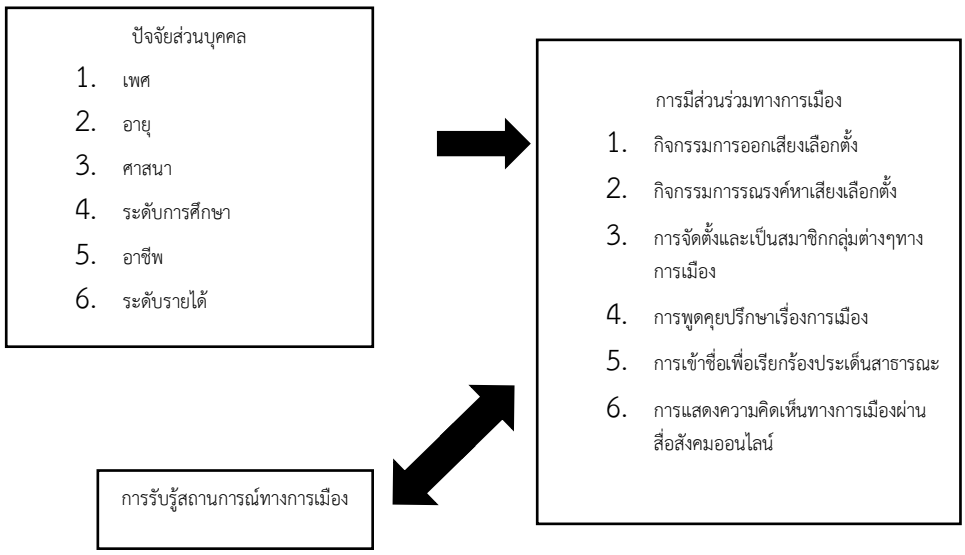
จากการกล่าวมาข้างต้น ผู้วิจัยประสงค์ที่จะศึกษาการมีส่วนร่วมมือทางการเมืองของประชาชนในเขตองค์การบริหารส่วนตำบลกะลุวอ อำเภอเมือง จังหวัดนราธิวาส เนื่องด้วยผู้วิจัยต้องการจะศึกษากลุ่มประชาชนในเขตพื้นที่ภูมิลำเนาของตน เพื่อศึกษาถึงสาเหตุว่าเหตุใดประชาชนในเขตพื้นที่ดังกล่าวถึงมีพฤติกรรมการมีส่วนร่วมทางการเมืองที่เป็นอยู่ และเพื่อที่จะศึกษาปัจจัยต่างๆที่ส่งผลต่อการมีส่วนร่วมทางการเมืองของประชาชนในเขตองค์การบริหารส่วนตำบลกะลุวอ อำเภอเมือง จังหวัดนราธิวาส

วัตถุประสงค์

1. เพื่อศึกษาระดับการมีส่วนร่วมทางการเมืองของประชาชนในเขตองค์การบริหารส่วนตำบลกะลุวอ อำเภอเมือง จังหวัดนราธิวาส

2. เพื่อศึกษาปัจจัยส่วนบุคคล และการรับรู้สถานการณ์ทางการเมือง ที่มีผลต่อการมีส่วนร่วมทางการเมืองของประชาชนในเขตองค์การบริหารส่วนตำบลกะลุวอ อำเภอเมือง จังหวัดนราธิวาส

แนวคิดเกี่ยวกับการมีส่วนร่วมทางการเมือง



การมีส่วนร่วมทางการเมืองเป็นกิจกรรมที่ประชาชนมีส่วนร่วมในการปกครอง ตามสิทธิที่กำหนดโดยระบบการเมืองและกฎหมายในการกระทำเป็นการกระทำโดยสมัครใจของประชาชนเพื่อมีอิทธิพลต่อการกำหนดนโยบายของรัฐทั้งในการเมืองและการปกครองระดับท้องถิ่นและระดับชาติ รวมไปถึงการตรวจสอบการทำงานของรัฐบาล ไปจนถึงการตั้งคำถามในแสดงความคิดคิดที่มองว่าเป็นปัญหาของการบริหารประเทศในแต่ละวาระ(กนก จินดา, 2557)

การมีส่วนร่วมทางการเมือง ได้มีการกำหนดนิยามไว้ ดังนี้ (Weiner, 1971, pp. 161-163)

1. การให้การสนับสนุน หรือเรียกร้องให้ผู้นำในรัฐบาลเพื่อตอบสนองต่อความต้องการ
2. ความพยายามที่จะสร้างผลกระทบต่อการปฏิบัติงานของรัฐบาลที่มีประสิทธิผล
3. กิจกรรมทางการเมืองที่ชอบด้วยกฎหมาย เช่น การลงคะแนนเสียง
4. การใช้สิทธิเลือกตั้งผู้แทนเพื่อใช้อำนาจแทนตน
5. ความรู้สึกแปลกแยกหรือตีตนออกจากระบบการเมือง อันเนื่องจาก การถูกกีดกันไม่ให้เข้ามีส่วนร่วมทางการเมือง กลุ่มคนแบบนี้มีศักยภาพที่จะกลับเข้ามาใหม่ และเปลี่ยนแปลงระบบการเมืองเพื่อให้เป็นไปตามแนวทางที่พวกเขาเห็นว่าเหมาะสมหรือยุติธรรมกว่า
6. กิจกรรมของนักเคลื่อนไหวทางการเมือง ซึ่งกิจกรรมเหล่านี้รวมถึงการพูด การกล่าวถึงปัญหา ไม่จำเป็นเสมอไปที่จะต้องอยู่ในรูปแบบของการใช้สิทธิเลือกตั้ง
7. กิจกรรมทางการเมืองทุกประเภททั้งที่มีความรุนแรงและไม่ใช้ความรุนแรง
8. กิจกรรมทางการเมือง และกิจกรรมที่มีอิทธิพลต่อการปฏิบัติงานของเจ้าหน้าที่รัฐ
9. กิจกรรมต่างๆ ที่กระทบต่อการเมืองระดับชาติ แต่อาจมองว่าจะต้องรวมถึงกิจกรรมที่กระทบต่อองค์กรส่วนท้องถิ่นด้วย
10. กิจกรรมทุกชนิดที่เป็นการเมือง

การมีส่วนร่วมทางการเมืองของประชาชนเพื่อแสดงออกถึงอำนาจสูงสุด 5 ประการดังนี้ (โกวิท วงศ์สุรวัฒน์, 2546, หน้า 31)

1. การเลือกตั้งแบบเลือกตั้ง (election)
2. การลงประชามติ (referendum)
3. ประชาชนมีสิทธิเสนอร่างกฎหมาย (initiative)
4. ประชาชนสามารถตัดสินใจในประเด็นสำคัญเกี่ยวกับนโยบายแห่งรัฐ
5. ประชาชนสามารถเปลี่ยนผู้ดำรงตำแหน่งสำคัญทางราชการได้

กรอบแนวคิดในการวิจัย

วิธีดำเนินการวิจัย

การวิจัยเรื่องการมีส่วนร่วมทางการเมืองของประชาชนในเขตองค์การบริหารส่วนตำบลกะลุวอ อำเภอเมือง จังหวัดนราธิวาส เป็นการวิจัยเชิงปริมาณ (Quantitative Research) โดยใช้แบบสอบถามเป็นเครื่องมือในการเก็บรวบรวมข้อมูล

ประชากรที่ใช้ในการวิจัยครั้งนี้ คือ ประชาชนที่มีอายุ 18 ปีขึ้นไปที่มีสิทธิ์เลือกตั้ง จำนวน 7,909 คน (องค์การบริหารส่วนตำบลกะลุวอ อำเภอเมืองนราธิวาส จังหวัดนราธิวาส, 2564) ในเขตองค์การบริหารส่วนตำบล กะลุวอ อำเภอเมือง จังหวัดนราธิวาส โดยมีกลุ่มตัวอย่างจำนวน 312 คน จากการหาจำนวนกลุ่มตัวอย่าง (Sample size) ที่เหมาะสมด้วยโปรแกรมสำเร็จรูป G*Power

ในการวิจัยครั้งนี้ ผู้วิจัยวิเคราะห์ข้อมูล โดยใช้สถิติพรรณนา ได้แก่ ค่าร้อยละ(Percentage) ค่าเฉลี่ย(Mean) ค่าเบี่ยงเบนมาตรฐาน(Standard Deviation) และสถิติอนุมาน ได้แก่ การวิเคราะห์จำแนกพหุ (Multiple Classification Analysis) โดยการวิจัยครั้งนี้กำหนดระดับนัยสำคัญทางสถิติไว้ที่ระดับ 0.05

ผลการวิจัย

ข้อมูลทั่วไปเกี่ยวกับกลุ่มตัวอย่าง โดยกลุ่มตัวอย่างในการวิจัยนี้ ส่วนใหญ่เป็นเพศหญิง อายุระหว่าง 40-59 ปี ศาสนาพุทธ มีการศึกษาในระดับประถมศึกษา มีระดับรายได้ไม่เกิน 10,000 บาท และมีอาชีพรับจ้างทั่วไป

การมีส่วนร่วมทางการเมืองในภาพรวมอยู่ในระดับกลาง ($\bar{x}$ = 2.46) และเมื่อพิจารณาเป็นรายด้าน พบว่า กลุ่มตัวอย่างมีส่วนร่วมทางการเมืองในกิจกรรมการออกเสียงเลือกตั้งมากที่สุด ($\bar{x}$ = 3.60) รองลงมา คือ กิจกรรมการพูดคุยปรึกษาเรื่องการเมือง ($\bar{x}$ = 2.44) และกิจกรรมการจัดตั้งและเป็นสมาชิกกลุ่มต่างๆ ทางการเมืองน้อยที่สุด ($\bar{x}$ = 1.81)

การรับรู้สถานการณ์ทางการเมืองในภาพรวมอยู่ในระดับสูง ($\bar{x}$ = 3.84) โดยกลุ่มตัวอย่างมีการรับรู้สถานการณ์ทางการเมืองด้านสถานการณ์การเลือกตั้งมากที่สุด ($\bar{x}$ = 4.10) รองลงมาคือ ด้านข้อมูลข่าวสารทางการเมือง ($\bar{x}$ = 3.92) และด้านนโยบายและผลงานในพื้นที่น้อยที่สุด ($\bar{x}$ = 3.47)

ตัวแปรอิสระ	การมีส่วนร่วมทางการเมืองของผู้สูงอายุ		
	ระดับนัยสำคัญ	เป็นไปตามสมมติฐาน	ไม่เป็นไปตามสมมติฐาน
ปัจจัยส่วนบุคคล			
1. เพศ	0.798		✓
2. อายุ	0.544		✓
3. ศาสนา	0.192		✓
4. ระดับการศึกษา	0.000*	✓	
5. ระดับรายได้	0.000*	✓	
6. อาชีพ	0.267		✓
การรับรู้สถานการณ์ทางการเมือง	0.000*	✓	

ดังนั้น สามารถสรุปผลการทดสอบสมมติฐานได้ดังนี้

1. เพศไม่มีผลต่อการมีส่วนร่วมทางการเมืองของประชาชนในเขตองค์การบริหารส่วนตำบลกะลุวอ อำเภอเมือง จังหวัดนราธิวาส ไม่เป็นไปตามสมมติฐานที่ตั้งไว้

2. อายุไม่มีผลต่อการมีส่วนร่วมทางการเมืองของประชาชนในเขตองค์การบริหารส่วนตำบลกะลุวอ อำเภอเมือง จังหวัดนราธิวาส ไม่เป็นไปตามสมมติฐานที่ตั้งไว้

3. ศาสนาไม่มีผลต่อการมีส่วนร่วมทางการเมืองของประชาชนในเขตองค์การบริหารส่วนตำบลกะลุวอ อำเภอเมือง จังหวัดนราธิวาส ไม่เป็นไปตามสมมติฐานที่ตั้งไว้

4. ระดับการศึกษามีผลต่อการมีส่วนร่วมทางการเมืองของประชาชนในเขตองค์การบริหารส่วนตำบลกะลุวอ อำเภอเมือง จังหวัดนราธิวาส เป็นไปตามสมมติฐานที่ตั้งไว้

5. ระดับรายได้มีผลต่อการมีส่วนร่วมทางการเมืองของประชาชนในเขตองค์การบริหารส่วนตำบลกะลุวอ อำเภอเมือง จังหวัดนราธิวาส เป็นไปตามสมมติฐานที่ตั้งไว้

6. อาชีพไม่มีผลต่อการมีส่วนร่วมทางการเมืองของประชาชนในเขตองค์การบริหารส่วนตำบลกะลุวอ อำเภอเมือง จังหวัดนราธิวาส ไม่เป็นไปตามสมมติฐานที่ตั้งไว้

7. การรับรู้สถานการณ์ทางการเมืองมีผลต่อการมีส่วนร่วมทางการเมืองของประชาชนในเขตองค์การบริหารส่วนตำบลกะลุวอ อำเภอเมือง จังหวัดนราธิวาส เป็นไปตามสมมติฐานที่ตั้งไว้

จากการวิจัยการมีส่วนร่วมทางการเมืองของประชาชนในเขตองค์การบริหารส่วนตำบลกะลุวอ อำเภอเมือง จังหวัดนราธิวาส พบว่าในภาพรวมระดับการมีส่วนร่วมทางการเมืองอยู่ในระดับกลาง ($\overline{x}$ = 2.46) อภิปรายได้ว่าด้านการออกเสียงเลือกตั้งเป็นด้านที่มีการมีส่วนร่วมมากที่สุด ทั้งนี้อันเนื่องมาจากประชาชนในพื้นที่มีการไปใช้สิทธิ์เลือกตั้งตามรัฐธรรมนูญกันเป็นจำนวนมาก อ้างอิงจากสถิติการเลือกตั้งสมาชิกองค์การบริหารส่วนตำบลกะลุวอ เมื่อวันที่ 28 พฤศจิกายน 2564 ที่มีผู้ไปใช้สิทธิ์ร้อยละ 74.66 โดยประชาชนเองก็มีการชักชวนกันและกันไปใช้สิทธิ์เลือกตั้ง รวมทั้งยังมีการเข้าร่วมกิจกรรมเกี่ยวกับการสาธิตการลงคะแนนเสียงเลือกตั้งอีกด้วย จะเห็นว่าประชาชนส่วนใหญ่นั้นให้ความสำคัญกับการเลือกตั้งเป็นอย่างมาก ซึ่งเป็นไปตามหลักการแห่งประชาธิปไตยที่มองว่าการเลือกตั้งเป็นหนึ่งในหัวใจสำคัญของระบอบประชาธิปไตย และด้านการพูดคุยปรึกษาเรื่องการเมืองเป็นด้านที่มีการมีส่วนร่วมมากรองลงมา ทั้งนี้เนื่องจากประชาชนส่วนใหญ่ได้มีการพูดคุยเกี่ยวกับสถานการณ์ทางการเมืองกับบุคคลในครอบครัว และเพื่อนบ้าน รวมทั้งมีการพูดคุยในเชิงของการปรึกษา เสนอปัญหา และแสดงความคิดเห็นแก่บุคคลต่างๆ ไม่ว่าจะเป็นบุคคลในครอบครัว เพื่อนบ้าน ผู้เชี่ยวชาญ หรือแม้กระทั่งนักการเมืองในท้องถิ่น จากการอภิปรายในด้านนี้จะพบว่าประชาชนส่วนใหญ่นั้นให้ความสำคัญกับการพูดคุยปรึกษาเรื่องการเมืองค่อนข้างที่จะครอบคลุมในทุกกลุ่ม หรือทุกระดับทางสังคม ซึ่งสอดคล้องกับผลการศึกษาของ นัทธ์หทัย ขันคูณจรูญรัตน์ (2552) ที่ได้ทำการศึกษาการมีส่วนร่วมทางการเมืองในการพัฒนาประชาธิปไตยของประชาชนที่อยู่ในเขตเทศบาลเมืองพิบูลมังสาหาร จังหวัดอุบลราชธานี โดยการศึกษาพบว่า สองอันดับแรกที่ประชาชนมีส่วนร่วมมากที่สุดคือ ด้านการออกเสียงเลือกตั้งและด้านการพูดคุยปรึกษาเรื่องการเมือง ซึ่งสอดคล้องกันกับงานวิจัยการมีส่วนร่วมทางการเมืองของประชาชนในเขตองค์การบริหารส่วนตำบลกะลุวอ อำเภอเมือง จังหวัดนราธิวาส แต่ทั้งนี้พบว่าในภาพรวมการมีส่วนร่วมของประชาชนอยู่ในระดับน้อย ($\overline{x}$ = 1.86) โดยผู้วิจัยได้ให้เหตุผลไว้ว่า จากการสอบถามเชิงลึก ประชาชนกลุ่มตัวอย่างนั้นยังเป็นกลุ่มที่มีอาชีพเกษตรกรรม และยังมีวิถีการดำรงชีวิตแบบดั้งเดิม จึงไม่ค่อยมีเวลาว่างในการไปมีส่วนร่วมทางการเมือง อีกทั้งยังมีปัจจัยอื่นๆ เข้ามาประกอบด้วย

ในส่วนของการรับรู้สถานการณ์ทางการเมืองของประชาชนในเขตองค์การบริหารส่วนตำบลกะลุวอ อำเภอเมือง จังหวัดนราธิวาส พบว่าในภาพรวมระดับการรับรู้สถานการณ์ทางการเมืองอยู่ในระดับสูง($\overline{x}$ = 3.84) อภิปรายได้ว่าด้านการรับรู้สถานการณ์การเลือกตั้งเป็นด้านที่ประชาชนมีค่าเฉลี่ยการรับรู้มากที่สุดอยู่ที่ 4.10 ซึ่งถือว่าอยู่ในระดับสูง ทั้งนี้อันเนื่องมาจากประชาชนรับรู้วันเวลาที่ใช้จัดการเลือกตั้งจากองค์กรที่เกี่ยวข้อง ประชาชนรับรู้ถึงกฎเกณฑ์ กติกา สิทธิในการเลือกตั้ง และรายละเอียดต่างๆที่เกี่ยวข้องกับการเลือกตั้ง และประชาชนรับรู้ถึงข้อมูลต่างๆของผู้ลงสมัครรับเลือกตั้ง ด้านการรับรู้ข้อมูลข่าวสารทางการเมืองเป็นด้านที่มีค่าเฉลี่ยการรับรู้รองลงมาอยู่ที่ 3.92 ซึ่งถือว่าอยู่ในระดับสูงเช่นกัน ทั้งนี้อันเนื่องมาจากประชาชนได้ติดตามข่าวสารทางการเมืองในระดับท้องถิ่นอย่างสม่ำเสมอ ไม่ว่าจะเป็นในส่วนของ ข่าวสารการเลือกตั้งในท้องถิ่น ผลการเลือกตั้งในท้องถิ่น สถานการณ์ทางการเมืองในท้องถิ่น เป็นต้น ซึ่งสอดคล้องกับผลการศึกษาของ สรัช สิริสิงห (2560) ที่ได้ทำการศึกษาในเรื่องการมีส่วนร่วมทางการเมืองและการบริหารงานภาครัฐ โดยช่องทางไม่ผ่านและผ่านระบบอินเตอร์เน็ต ของนักศึกษามหาวิทยาลัยธรรมศาสตร์ ซึ่งพบว่าการรับรู้ข้อมูลข่าวสารทางการเมืองมีผลต่อการมีส่วนร่วมทางการเมืองเช่นกัน โดยกลุ่มตัวอย่างมีการติดตามข่าวสารทางการเมืองมากกว่าร้อยละ 90

และในส่วนของการศึกษาตัวแปรปัจจัยส่วนบุคคล ได้แก่ เพศ อายุ ศาสนา ระดับการศึกษา ระดับรายได้ และอาชีพ สามารถอภิปรายได้ดังนี้ ปัจจัยส่วนบุคคลมีอิทธิพลต่อการมีส่วนร่วมทางการเมืองของประชาชนในเขตองค์การบริหารส่วนตำบลกะลุวอ อำเภอเมือง จังหวัดนราธิวาส จากการศึกษาพบว่า ระดับรายได้ และระดับการศึกษา มีอิทธิพลต่อการมีส่วนร่วมทางการเมืองของประชาชนในเขตองค์การบริหารส่วนตำบลกะลุวอ อำเภอเมือง จังหวัดนราธิวาส ดังจะเห็นได้จากข้อมูลที่ผู้วิจัยศึกษาที่พบว่า ระดับปริญญาตรีมีค่าเฉลี่ยของการมีส่วนร่วมทางการเมืองมากที่สุด และระดับประถามศึกษามีค่าเฉลี่ยของการมีส่วนร่วมทางการเมืองต่ำที่สุด ทั้งนี้อาจเป็นเพราะว่า ระดับการศึกษาที่สูงขึ้น ส่งผลให้บุคคลเห็นถึงความสำคัญของการมีส่วนร่วมฯในระบอบการปกครองแบบประชาธิปไตยมากขึ้น และเหตุผลประการอื่นประกอบกัน อาทิเช่น บุคคลที่มีระดับการศึกษาที่สูงแล้ว ย่อมที่จะดำเนินชีวิตในเส้นทางที่สามารถจะดำรงชีพหรือหาเลี้ยงชีพตนเองได้อย่างไม่ต้องพยายามมากนัก ทำให้มีเวลาว่างที่จะมาสนใจในเรื่องความเป็นอยู่หรือเรื่องการเมืองมากขึ้น ซึ่งแตกต่างจะบุคคลที่มีระดับการศึกษาประถมศึกษาที่อาจจะต้องใช้ความพยายามที่มากขึ้น และเวลาที่มากขึ้นในการหาเลี้ยงชีพ ทำให้ได้มีเวลามากพอในการที่จะมาสนใจเรื่องการเมืองเท่าที่ควร ซึ่งจะเห็นว่าสอดคล้องกับปัจจัยส่วนบุคคลอีกอย่างหนึ่งที่มีอิทธิพลกับการมีส่วนร่วมทางการเมืองฯ เช่นกัน นั่นก็คือ ระดับรายได้ ที่ผู้วิจัยได้ทำการศึกษาและพบว่า ยิ่งบุคคลนั้นมีระดับรายได้ที่สูงมากขึ้น ก็จะยิ่งส่งผลต่อค่าเฉลี่ยการมีส่วนร่วมทางการเมืองที่มากขึ้นเช่นกัน ทั้งนี้อาจจะเป็นเพราะว่า บุคคลเหล่านั้นมีความเพียบพร้อมในการดำรงชีวิตในเรื่องของทรัพย์สินหรือเงินตราพอสมควร ทำให้ไม่จำเป็นที่จะต้องใช้เวลาไปกับการทำงานที่มากเกินไปหรือใช้ความพยายามที่มากเกินไป แฉกเช่นเดียวกับเหตุผลก่อนหน้า จึงทำให้มีเวลามากขึ้นในการที่จะมาสนใจในเรื่องของการมีส่วน

ร่วมทางการเมือง ซึ่งจากสองปัจจัยส่วนบุคคลที่ผู้วิจัยได้ศึกษาและพบว่ามีอิทธิพลต่อการมีส่วนร่วมทางการเมืองนี้ ทั้งระดับการศึกษาและระดับรายได้ ต่างก็ส่งผลโดยตรงต่อกันและกัน ซึ่งสอดคล้องกับงานวิจัยของ ดนุวัศ สุวรรณวงศ์ (2553) ที่ศึกษาเรื่อง ระดับความไว้วางใจทางการเมืองและระดับการมีส่วนร่วมทางการเมืองของประชาชนในพื้นที่ที่มีความหลากหลายทางวัฒนธรรมภาคใต้: ศึกษาเปรียบเทียบพื้นที่เทศบาลนครหาดใหญ่และเทศบาลเมืองปัตตานี ที่พบว่าปัจจัยด้านการศึกษาและปัจจัยด้านรายได้มีอิทธิพลต่อการมีส่วนร่วมทางการเมืองเช่นกัน

บทสรุป

จากการวิจัยการมีส่วนร่วมทางการเมืองของประชาชนในเขตองค์การบริหารส่วนตำบลกะลุวอ อำเภอเมือง จังหวัดนราธิวาส สรุปได้ดังนี้ ระดับการมีส่วนร่วมทางการเมืองโดยภาพรวมอยู่ในระดับกลาง และระดับการรับรู้สถานการณ์ทางการเมืองอยู่ในระดับสูง ทั้งนี้เนื่องจาก ปัจจุบันประชาชนในพื้นที่มีการเข้าถึงข้อมูลข่าวสารทางการเมืองได้ง่าย มีการพูดคุยเรื่องการเมืองกันเป็นวงกว้าง โดยเริ่มจากภายในครอบครัว และขยายออกไปสู่สังคมภายนอก อีกทั้งประชาชนในพื้นที่เกิดความตระหนักและตื่นตัวทางการเมือง ไม่ว่าจะเป็นเรื่องการออกไปใช้สิทธิ์เลือกตั้ง การออกไปเรียกร้องประเด็นสาธารณะ หรือแม้แต่การแสดงความคิดเห็นทางการเมืองผ่านสังคมออนไลน์ และหากเราพิจารณาข้อมูลเป็นรายด้าน/กิจกรรมย่อยภายใน จะพบว่าด้านย่อยของการรับรู้สถานการณ์ทางการเมือง ส่งผลโดยตรงต่อด้านย่อยของการมีส่วนร่วมทางการเมือง อาทิเช่น การรับรู้สถานการณ์การเลือกตั้งที่มีค่าเฉลี่ยที่อยู่ในระดับสูง ส่งผลโดยตรงต่อการมีส่วนร่วมทางการเมืองในด้านกิจกรรมการเลือกตั้งที่มีค่าเฉลี่ยที่อยู่ในระดับค่อนข้างสูง และเมื่อพิจารณาถึงปัจจัยส่วนบุคคลจะพบว่า ระดับรายได้ และระดับการศึกษา ต่างก็มีผลต่อการมีส่วนร่วมทางการเมืองของประชาชนเช่นกัน

ข้อเสนอแนะ

1. จากการวิจัย พบว่า กลุ่มตัวอย่างมีส่วนร่วมทางการเมืองเรื่องการจัดตั้งและเป็นสมาชิกกลุ่มต่างๆทางการเมือง น้อยที่สุด ดังนั้นหน่วยงานที่เกี่ยวข้อง ได้แก่ องค์การบริหารส่วนตำบล องค์การบริหารส่วนจังหวัด และพรรคการเมืองต่างๆ ในพื้นที่ควรเร่งรัดในการส่งเจ้าหน้าที่เพื่อให้ความรู้ความเข้าในในเรื่องของการมีส่วนร่วมทางการเมือง และเพื่อยกระดับการมีส่วนร่วมทางการเมืองของประชาชนในเรื่องการจัดตั้งและเป็นสมาชิกกลุ่มต่างๆทางการเมืองให้สูงขึ้น

2. จากการวิจัย พบว่า กลุ่มตัวอย่างมีการรับรู้สถานการณ์ทางการเมืองในระดับสูง แต่เมื่อพิจารณาเป็นรายด้าน จะพบว่าด้านการรับรู้นโยบายและผลงานในพื้นที่อยู่ในระดับกลาง ดังนั้นควรให้หน่อยงานที่เกี่ยวข้องเร่งพัฒนาในส่วนของการประชาสัมพันธ์นโยบาย และผลงานที่เป็นรูปธรรมในพื้นที่ เพื่อที่จะทำให้ประชาชนรับรู้ในส่วนนี้มากยิ่งขึ้น

3. จากการวิจัย พบว่า กลุ่มตัวอย่างที่มีการศึกษาระดับประถมศึกษา มีส่วนร่วมทางการเมืองต่ำกว่ากลุ่มตัวอย่างที่มีการศึกษาระดับอื่น ดังนั้น หน่วยงานที่เกี่ยวข้องได้แก่ องค์การบริหารส่วนจังหวัด องค์การบริหารส่วนตำบล พรรคการเมืองต่างๆ รวมทั้งคณะกรรมการการเลือกตั้งประจำจังหวัด ควรส่งเจ้าหน้าที่ให้ความรู้ความเข้าใจในเรื่องของการมีส่วนร่วมทางการเมืองให้มากยิ่งขึ้น ไม่เพียงแต่บุคคลกล่มนี้ แต่ต้องครอบคลุมประชาชนในพื้นที่ให้ได้มากที่สุด

4. จากการวิจัย พบว่า การรับรู้สถานการณ์ทางการเมืองมีความสัมพันธ์ในทิศทางเดียวกันกับการมีส่วนร่วมทางการเมือง ดังนั้นควรส่งเสริมและพัฒนาในส่วนของการมีส่วนร่วมทางการเมืองให้มากขึ้น เช่น ให้หน่อยงานที่เกี่ยวข้องลงพื้นที่ทำการสำรวจชุมชนต่างๆ และจัดให้มีการอบรมในเรื่องของการมีส่วนร่วมทางการเมืองตามหลักการประชาธิปไตย เป็นต้น

ข้อเสนอแนะในการวิจัยครั้งต่อไป

ผู้วิจัยขอเสนอแนะแนวทางสำหรับผู้สนใจที่จะทำการวิจัยในครั้งต่อไป ดังนี้

1. การวิจัยในครั้งต่อไป ควรใช้การวิจัยผสมผสานวิธี (Mixed Method Research) โดยเสริมการวิจัยเชิงปริมาณด้วยการวิจัยเชิงคุณภาพ เก็บรวบรวมข้อมูลโดย การสัมภาษณ์เชิงลึก การสังเกตแบบมีส่วนร่วม รวมทั้งควรมีการเพิ่มระยะเวลาในการรวบรวมข้อมูลมากขึ้น เพื่อให้ผลการวิจัยมีความแม่นตรง ความเชื่อมั่น และประสิทธิภาพสูงขึ้น

2. ผู้สนใจศในเรื่องเดียวกันนี้ ควรศึกษากับประชากรกลุ่มอื่นๆ นอกเหนือจากพื้นที่ที่ผู้วิจัยศึกษา จะทำให้เกิดความหลากหลายของข้อมูล และสามารถนำข้อมูลไปวิเคราะห์ รวมถึงพัฒนาต่อยอดได้ในภายภาคหน้าว่าประชาชนในแต่ลพื้นที่มีความคิดเห็นเกี่ยวกับการมีส่วนร่วมทางการเมืองแบบเดียวกันหรือไม่

3. ควรศึกษากับตัวแปรอื่นๆ ที่มีอิทธิพลตต่อการมีส่วนร่วมทางการเมือง เช่น ความรู้เกี่ยวกับการเมือง วัฒนธรรมทางการเมือง เป็นต้น

ความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ของข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ

Knowledge and Understanding about E-Commerce of Government Officers, Department of International Trade Promotion

ณัชจรี อภิญญามนตรี, (Natjaree Apinyamontree)[1]
วัลลภ รัฐฉัตรานนท์, (Wanlop Rathachatranon)[2]

บทคัดย่อ

บทความนี้มีวัตถุประสงค์เพื่อ (1) เพื่อศึกษาระดับความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ของข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ (2) เพื่อศึกษาเปรียบเทียบความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ของข้าราชการ จำแนกตามปัจจัยส่วนบุคคล (3) เพื่อศึกษาความสัมพันธ์ระหว่างปัจจัยด้านช่องทางการรับรู้ข้อมูลกับระดับความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ของข้าราชการ การวิจัยครั้งนี้ใช้ระเบียบวิธีวิจัยเชิงปริมาณ กลุ่มตัวอย่างที่ใช้ในการศึกษา คือ ข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ จำนวน 419 คน โดยเครื่องมือที่ใช้ในการวิจัย เป็นแบบสอบถาม ซึ่งวิเคราะห์ข้อมูลโดยใช้โปรแกรมคอมพิวเตอร์สำเร็จรูป สถิติที่ใช้ในการวิเคราะห์ข้อมูล ได้แก่ ค่าสถิติร้อยละ ค่าเฉลี่ย ส่วนเบี่ยงเบนมาตรฐาน การทดสอบค่าที การวิเคราะห์ความแปรปรวนทางเดียว และค่าสัมประสิทธิ์สหสัมพันธ์แบบเพียร์สัน โดยมีค่านัยสำคัญทางสถิติที่ใช้ในการวิเคราะห์ครั้งนี้กำหนดไว้ที่ระดับ 0.05 ผลการวิจัยพบว่า (1) ความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ของข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ อยู่ในระดับสูง (2) ข้าราชการที่มีปัจจัยส่วนบุคคลด้าน เพศ อายุ ระดับการศึกษา ประสบการณ์การทำงาน เงินเดือน และประเภทตำแหน่ง แตกต่างกันมีความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์แตกต่างกัน (3) ช่องทางการรับรู้ข้อมูล มีความสัมพันธ์ต่อความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ ของข้าราชการในระดับน้อย ในทิศทางเดียวกันและมีค่าสัมประสิทธิ์สหสัมพันธ์ 0.184 ซึ่งสอดคล้องกับสมมติฐานที่ตั้งไว้

คำสำคัญ: ความรู้ความเข้าใจ, ข้าราชการ, กรมส่งเสริมการค้าระหว่างประเทศ

Abstract

This study aim to (1) analyze the level of knowledge and understanding about e-commerce of government officers, Department of International Trade Promotion. (2) compare knowledge and understanding about e-commerce based on personal factor (3) To investigate a correlation between communication channels and knowledge and understanding about e-commerce. This research is Quantitative Research. The study sample composed of 419 government officers in Department of International Trade Promotion. The data were collected by questionnaires and analyzed by a computer program. Statistical tools applied in data analysis were Percentage, Mean, Standard Deviation, t-test, One-Way ANOVA and Pearson Product-Moment Correlation Coefficient. The level of significance for statistical testing was 0.05. The research findings are as follow. (1) The level of knowledge and understanding about e-commerce of government officers was high. (2) Government officers with gender, age, education background, personal experience, salaries and type of positions of the officers contribute to the difference in knowledge and understanding in e-commerce. (3) there is a correlation between communication channels and government officers level of knowledge and understanding about e-commerce. The relative coefficient in the same direction is 0.184. The level of significance for statistical testing was 0.05.

Keywords: knowledge and understanding, Government officer, Department of International Trade Promotion.

บทนำ

พาณิชย์อิเล็กทรอนิกส์ เป็นการทำธุรกรรมทางการค้าผ่านช่องทางอิเล็กทรอนิกส์ ซึ่งในปัจจุบันมีบทบาทต่อสังคมโลกมากยิ่งขึ้น และมีแนวโน้มดำเนินต่อเนื่องไปในอนาคตสู่การเป็นเศรษฐกิจดิจิทัล อีกทั้งเป็นโอกาสสำคัญของผู้ประกอบการในการดำเนินธุรกิจ ขยายตลาด การเปลี่ยนแปลงรูปแบบการค้าจากการค้าแบบดั้งเดิม ซึ่งเป็นการค้าสินค้าและบริการ โดยมีสถานประกอบการเป็นหลักแหล่ง ให้ผู้บริโภคได้รับประสบการณ์ในการซื้อของด้วยตัวเอง เป็นการค้ารูปแบบใหม่ หรือที่เรียกว่า พาณิชย์อิเล็กทรอนิกส์ หรือ Electronic Commerce ซึ่งการค้าที่อาศัยเทคโนโลยีและนวัตกรรมดิจิทัลเข้ามาเป็นสื่อกลางระหว่างผู้ผลิตและผู้บริโภค เพื่ออำนวยความสะดวกในยุคดิจิทัล ซึ่งจะช่วยขับเคลื่อนประเทศไทยให้เข้าสู่เศรษฐกิจดิจิทัล (Digital Economy) อันเป็นนโยบายหลักของการพัฒนาประเทศในช่วง 20 ปีข้างหน้า

ความก้าวหน้าด้านเทคโนโลยีสารสนเทศและความสะดวกในการติดต่อสื่อสาร เป็นปัจจัยสำคัญที่ทำให้พาณิชย์อิเล็กทรอนิกส์ (e-Commerce) ขยายตัวอย่างต่อเนื่อง ซึ่งยืนยันได้จากอัตราการเติบโตของภาคธุรกิจการค้าออนไลน์ ทั้งในส่วนการค้าภายในประเทศและการค้าระหว่างประเทศ เนื่องจากเป็นธุรกรรมที่สามารถดำเนินการครอบคลุมได้ทั่วโลก สะดวก รวดเร็ว ประหยัดค่าใช้จ่าย และไม่จำกัดเวลา โดยในปี พ.ศ. 2564 มูลค่าพาณิชย์อิเล็กทรอนิกส์ค้าปลีกของโลกทั้งสิ้น 4.92 ล้านล้านดอลลาร์สหรัฐฯ หรือประมาณ 162.37 ล้านล้านบาท และคาดว่าจะเติบโตขึ้นเป็น 7.39 ล้านล้านดอลลาร์สหรัฐฯ หรือประมาณ 243.67 ล้านล้านบาท ในปี 2568 (eMarketer, 2021) สำหรับประเทศไทย มูลค่าพาณิชย์อิเล็กทรอนิกส์ ปี พ.ศ. 2563 เท่ากับ 3.78 ล้านล้านบาท และคาดว่าจะเติบโตขึ้นร้อยละ 6.11 เป็นมูลค่า 4.01 ล้านล้านบาท ในปี พ.ศ.2564 (สำนักงานพัฒนาธุรกรรมทางอิเล็กทรอนิกส์, 2564)

การแพร่ระบาดของโรคติดเชื้อไวรัสโคโรนาสายพันธุ์ใหม่ (Covid-19) ได้ส่งผลกระทบต่อการใช้ชีวิตของผู้คนทั่วโลก โดยเฉพาะด้านเศรษฐกิจ ก่อให้เกิดความผันผวนรุนแรงในตลาดการเงินและการค้าโลก จนเข้าสู่สภาวะเศรษฐกิจโลกชะลอตัวและมีแนวโน้มถดถอย หลายกิจการเกิดการชะงักงัน จนถึงขั้นปิดตัวลงพร้อมกับการเลิกจ้าง หรือลดค่าตอบแทนของพนักงาน ทำให้ผู้คนจำเป็นต้องปรับเปลี่ยนการดำเนินชีวิตให้เหมาะสม เกิดรูปแบบการใช้ชีวิตประจำวันที่เรียกว่า ชีวิตวิถีใหม่ (New Normal) ขึ้น ซึ่งจำเป็นต้องปรับเปลี่ยนพฤติกรรมรวมทั้งการดำเนินธุรกิจทั้งการซื้อและการขายรวมถึงการให้บริการ ไปเป็นรูปแบบออนไลน์ ผู้ซื้อและผู้ขายต่างต้องปรับเปลี่ยนเรียนรู้วิธีการใช้งานระบบออนไลน์มากขึ้นเพื่อความอยู่รอด และทั้งผู้ซื้อและผู้ขายล้วนได้รับประสบการณ์ที่สร้างความรู้สึกสะดวกสบาย และเกิดความไว้วางใจที่จะซื้อสินค้าและบริการผ่านแพลตฟอร์มออนไลน์ต่างๆ ทั้งของไทยและต่างประเทศ

กรมส่งเสริมการค้าระหว่างประเทศได้ให้ความสำคัญกับการดำเนินกิจกรรมด้านพาณิชย์อิเล็กทรอนิกส์ เพื่อส่งเสริมให้ผู้ประกอบการไทยสามารถขายสินค้าผ่านช่องทางออนไลน์ โดยได้กำหนดแนวทางการดำเนินการด้านพาณิชย์อิเล็กทรอนิกส์ เรื่องการเร่งรัดขยายตลาดส่งออกละธุรกิจในต่างประเทศเชิงรุก ทั้ง Physical และ Digital market (City focus) โดยมีการปรับรูปแบบการดำเนินกิจกรรมภายใต้มาตรการการแพร่ระบาดของโรคติดเชื้อไวรัสโคโรนาสายพันธุ์ใหม่ (Covid-19) มุ่งเน้นการใช้ประโยชน์จากเทคโนโลยีดิจิทัลในการเข้าถึง และขยายช่องทางการตลาดทั้งในประเทศและต่างประเทศ

ดังนั้น การศึกษาความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ของข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ รวมทั้งความสัมพันธ์ระหว่างปัจจัยด้านช่องทางการรับรู้ข้อมูลกับระดับความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ของข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ เพื่อนำข้อมูลที่ได้มาเป็นแนวทางในการส่งเสริมความรู้ความใจของข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ เกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ รูปแบบการซื้อขายสินค้าที่เปลี่ยนแปลงไป ให้สามารถตอบโจทย์การใช้ชีวิตในยุคดิจิทัล การบริโภคสินค้าและธุรกิจบริการของไทย รวมทั้งพัฒนาและสร้างมูลค่าเพิ่มของสินค้าและธุรกิจบริการส่งออก ให้สามารถบริการข้อมูลการค้าและเพิ่มศักยภาพ การแข่งขันของผู้ประกอบการไทยในตลาดโลก ได้อย่างแท้จริง ซึ่งเป็นหนึ่งในภารกิจหลักในการขับเคลื่อนการส่งเสริมการค้าระหว่างประเทศของกรมส่งเสริมการค้าระหว่างประเทศ

วัตถุประสงค์ของการวิจัย

1. เพื่อศึกษาระดับความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ของข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ
2. เพื่อศึกษาเปรียบเทียบความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ของข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ จำแนกตามปัจจัยส่วนบุคคล
3. เพื่อศึกษาความสัมพันธ์ระหว่างปัจจัยด้านช่องทางการรับรู้ข้อมูลกับระดับความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ของข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ

วิธีการดำเนินการวิจัย

ประชากรและตัวอย่าง

ประชากรที่ใช้ในการศึกษาครั้งนี้ คือ ข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ จำนวน 419 ราย (ข้อมูล ณ เดือน สิงหาคม 2565 จากกลุ่มงานการเจ้าหน้าที่ สำนักบริหารกลาง กรมส่งเสริมการค้าระหว่างประเทศ) และหาจำนวนกลุ่มตัวอย่าง (Sample Size) ที่เหมาะสมที่จะใช้เป็นตัวแทนของประชากรสำหรับการศึกษา โดยใช้โปรแกรมสำเร็จรูป G*Power โดยทำการสุ่มกลุ่มตัวอย่างแบบบังเอิญ (Accidental sampling) กับข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ จำนวน 280 ตัวอย่าง

ตัวแปรที่ใช้ในการวิจัย

การกำหนดตัวแปรสำหรับการวิจัยในครั้งนี้ เป็นตัวแปรอิสระ (Independent variable) 2 ตัวแปร คือ ปัจจัยส่วนบุคคล และปัจจัยด้านช่องทางการรับรู้ข้อมูล ส่วนตัวแปรตาม (Dependent variable) ใช้ทฤษฎีเกี่ยวกับความรู้ความเข้าใจของ Nonaka and Takeuchi (1995) โดยแบ่งออกเป็น 2 ด้าน ได้แก่ 1. ด้านความรู้เฉพาะตัวของบุคคล 2. ด้านความรู้ที่สามารถรวบรวมถ่ายทอดได้

ขอบเขตการวิจัย

ผู้วิจัยทำการศึกษาข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ จำนวน 419 คน (ข้อมูลจากกลุ่มงานการเจ้าหน้าที่ สำนักบริหารกลาง กรมส่งเสริมการค้าระหว่างประเทศ ณ สิงหาคม 2565) ในเดือนตุลาคม ถึง ธันวาคม 2565

เครื่องมือที่ใช้ในการวิจัย

เครื่องมือที่ใช้ในการวิจัย คือ แบบสอบถามที่ผู้วิจัยสร้างขึ้นจากแนวคิด ทฤษฎีและผลงานวิจัยที่เกี่ยวข้อง โดยแบ่งออกเป็น 3 ส่วน คือ ส่วนที่ 1 ปัจจัยส่วนบุคคลของผู้ตอบแบบสอบถาม ได้แก่ เพศ อายุ ระดับการศึกษา ประสบการณ์การทำงาน เงินเดือน และประเภทตำแหน่ง ส่วนที่ 2 ช่องทางการรับรู้ข้อมูล ส่วนที่ 3 ความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์

การทดสอบเครื่องมือที่ใช้ในการวิจัย

ผู้วิจัยได้นำแบบสอบถามที่ได้สร้างขึ้นเพื่อการศึกษาในครั้งนี้ ไปทดสอบหาความตรง (Validity) โดยได้นำเครื่องมือที่สร้างขึ้นเสนอให้อาจารย์ที่ปรึกษาและผู้ทรงคุณวุฒิ แก้ไขปรับปรุงเพื่อความเหมาะสม แก้ไขภาษาและคำถามให้มีความชัดเจนเข้าใจได้ง่ายสำหรับผู้ตอบแบบสอบถาม อีกทั้งเพื่อให้ข้อคำถามแต่ละข้อตรงตามจุดมุ่งหมายและวัตถุประสงค์ของการศึกษาครั้งนี้ แล้วนำไปหาความเชื่อมั่น (Reliability) ผู้วิจัยได้นำแบบสอบถามที่ปรับปรุงแล้วไปทดสอบ (Try-Out) กับกลุ่มตัวอย่างที่มีลักษณะใกล้เคียงกับกลุ่มที่จะศึกษาโดยทดสอบเก็บข้อมูลจากกลุ่มตัวอย่าง จำนวน 30 ชุด เพื่อหาความเชื่อมั่นเป็นรายข้อ (Item analysis) โดยวิธีการหาค่าความสอดคล้องภายใน (Internal Consistency Method) ผลการทดสอบพบว่าแบบสอบถามข้อมูลเกี่ยวกับช่องทางการรับรู้ข้อมูล มีค่าความเชื่อมั่น เท่ากับ 0.808 แบบสอบถามความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ ค่าความเชื่อมั่น เท่ากับ 0.863

ขั้นตอนในการวิจัย

1. การสำรวจเอกสาร จากการเก็บรวบรวมข้อมูลที่เกี่ยวข้องกับเรื่องที่จะศึกษาค้นคว้า จากหนังสือ ตำรา เอกสาร ผลงานวิจัย ซึ่งสามารถค้นคว้าได้จากแหล่งต่างๆ โดยเฉพาะห้องสมุด เพื่อนำมาสร้างแบบสอบถามก่อนที่จะทำการสำรวจภาคสนามต่อไป

2. การสำรวจภาคสนาม นำแบบสอบถามที่สมบูรณ์แล้วแจกให้กับข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ แล้วจึงนำแบบสอบถามที่ได้รับคืนตรวจสอบความสมบูรณ์และความถูกต้อง รวมทั้งความครบถ้วนของข้อมูลทุกฉบับ

3. แบบสอบถามมาตรวจสอบความสมบูรณ์แล้วนำไปประมวลผลและวิเคราะห์ผลทางสถิติ

การวิเคราะห์ข้อมูล

การวิจัยครั้งนี้ ผู้วิจัยนำเสนอข้อมูลที่รวบรวมได้จากแบบสอบถามมาตรวจสอบความถูกต้อง และครบถ้วนของข้อมูล แล้วนำไปประมวลผลวิเคราะห์ข้อมูลด้วยโปรแกรมสำเร็จรูปทางสถิติ (Statistical Software) เพื่อให้ผลการวิจัยมีความถูกต้องแม่นยำมากขึ้น และใช่เครื่องมือทางสถิติในการช่วยวิเคราะห์เพื่อใช้ทดสอบสมมติฐาน จัดทำตารางวิเคราะห์ทางสถิติ เพื่อเสนอเป็นผลการวิจัยตามลำดับ

สถิติที่ใช้ในการวิเคราะห์ข้อมูล

สถิติที่ใช้ในการวิเคราะห์ข้อมูล และทดสอบสมมติฐานครั้งนี้ ประกอบด้วย (1) ค่าสถิติร้อยละ (Percentage) ใช้อธิบายลักษณะทั่วไปของกลุ่มตัวอย่างที่ศึกษา (2) ค่าเฉลี่ย (Mean) และค่าส่วนเบี่ยงเบนมาตรฐาน (Standard Deviation) ใช้อธิบายระดับความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ของข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ (3) การทดสอบค่าที (t-test) ทดสอบความแตกต่างของค่าเฉลี่ยของกลุ่มตัวอย่าง 2 กลุ่ม (4) การวิเคราะห์ความแปรปรวนทางเดียว (One-Way ANOVA) ใช้ทดสอบความแตกต่างของกลุ่มตัวอย่าง ตั้งแต่ 3 กลุ่มขึ้นไป และใช้วิธีของ LSD ในการทดสอบความแตกต่างรายคู่ (5) ค่าสัมประสิทธิ์สหสัมพันธ์แบบเพียร์สัน (Pearson’s Product Moment Correlation Coeffcient) ใช้อธิบายความสัมพันธ์ระหว่างช่องทางการรับรู้

ข้อมูลกับความรู้ความเข้าใจเกี่ยวกับพาณิชอิเล็กทรอนิกส์ของข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ ตามหลักเกณฑ์ของ Cohen. (1988: 332) ที่กำหนดไว้ดังนี้ค่าสหสัมพันธ์ระหว่าง 0.10 ถึง 0.29 มีความสัมพันธ์น้อย ระหว่าง 0.30 ถึง 0.49 มีความสัมพันธ์ปานกลาง และระหว่าง 0.50 ถึง 1.00 มีความสัมพันธ์สูง โดยมีค่านัยยะสำคัญทางสถิติที่ใช้ในการวิเคราะห์ครั้งนี้กำหนดไว้ที่ระดับ 0.05

ผลการวิจัย

ข้อมูลส่วนใหญ่ของกลุ่มตัวอย่างซึ่งเป็นข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ จำนวน 280 คน พบว่า กลุ่มตัวอย่างส่วนมากประกอบด้วย ข้าราชการเพศหญิง คิดเป็นร้อยละ 71.4 มีอายุ 31-40 ปี คิดเป็นร้อยละ 43.6 ระดับการศึกษาในระดับสูงกว่าปริญญาตรี คิดเป็นร้อยละ 65.4 ประสบการณ์การทำงาน 6-10 ปี คิดเป็นร้อยละ 43.9 เงินเดือน 20,001-30,000 บาท คิดเป็นร้อยละ 39.6 และประเภทตำแหน่งประเภทวิชาการ คิดเป็นร้อยละ 83.2 ช่องทางการรับรู้ข้อมูล มีระดับความถี่ในการรับรู้ข้อมูลอยู่ในระดับปานกลาง มีค่าเฉลี่ยเท่ากับ 1.17 และความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ในภาพรวมอยู่ในระดับมาก โดยมีค่าเฉลี่ย 0.84 โดยระดับความรู้ความเข้าใจแบ่งเป็น 2 ด้าน 1) ด้านความรู้เฉพาะตัวของบุคคล มีค่าเฉลี่ย 0.84 2) ด้านความรู้ที่สามารถรวบรวมถ่ายทอดได้ มีค่าเฉลี่ย 0.83

การทดสอบสมมติฐานที่ตั้งไว้ 7 สมมติฐาน ผลปรากฏว่าเป็นไปตามสมมุติฐานที่ตั้งไว้ ทั้ง 7 สมมติฐาน ได้แก่ เพศ อายุ ระดับการศึกษา ประสบการณ์การทำงาน เงินเดือน และประเภทตำแหน่ง และช่องทางการรับรู้ข้อมูล รายละเอียดดังตารางที่ 1

ตารางที่ 1 สรุปผลการทดสอบสมมติฐาน

ตัวแปรอิสระ	Sig.	เป็นไปตามสมมติฐาน	ไม่เป็นไปตามสมมติฐาน
1. เพศ	0.041*	☐	-
2. อายุ	0.000*	☐	-
3. ระดับการศึกษา	0.000*	☐	-
4. ประสบการณ์การทำงาน	0.000*	☐	-
5. เงินเดือน	0.000*	☐	-
6. ประเภทตำแหน่ง	0.000*	☐	-
7. ช่องทางการรับรู้ข้อมูล	0.002*	☐	-

โดยกำหนดระดับนัยสำคัญทางสถิติที่ใช้ในการทดสอบไว้ที่ระดับ 0.05

จากการทดสอบสมมติฐานที่ตั้งไว้ 7 สมมติฐาน ผลปรากฏว่า

สมมติฐานที่ 1 ข้าราชการที่มีเพศต่างกัน มีความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์แตกต่างกัน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้

สมมติฐานที่ 2 ข้าราชการที่มีช่วงอายุต่างกัน มีความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ แตกต่างกัน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้

สมมติฐานที่ 3 ข้าราชการที่มีระดับการศึกษาต่างกัน มีความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์แตกต่างกัน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้

สมมติฐานที่ 4 ข้าราชการที่มีประสบการณ์การทำงานต่างกัน มีความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์แตกต่างกัน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้

สมมติฐานที่ 5 ข้าราชการที่มีเงินเดือนต่างกัน มีความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์แตกต่างกัน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้

สมมติฐานที่ 6 ข้าราชการที่มีประเภทตำแหน่งต่างกัน มีความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์แตกต่างกัน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้

สมมติฐานที่ 7 ช่องทางการรับรู้ข้อมูลมีความสัมพันธ์กับความรู้ความเข้าใจของข้าราชการเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ในทิศทางเดียวกัน และมีความสัมพันธ์ในระดับน้อย ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้

สรุปผลการวิจัย

การวิจัยเรื่อง ความรู้ความเข้าใจเกี่ยวกับพาณิชอิเล็กทรอนิกส์ของข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ สามารถอภิปรายผลได้ดังนี้

1. เพื่อศึกษาระดับความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ของข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ พบว่า ภาพรวมอยู่ในระดับมาก มีค่าเฉลี่ยรวม 0.84 ซึ่งเป็นกลุ่มตัวอย่างมีความรู้ความเข้าใจอยู่ในระดับมาก เช่น การแพร่ระบาดของโควิดทำให้พาณิชย์อิเล็กทรอนิกส์ได้รับความสนใจจากประชาชนมากยิ่งขึ้น (ข้อ 24) มีค่าเฉลี่ยสูงที่สุด 1.00 รองลงมาคือ ตลาดกลางพาณิชย์อิเล็กทรอนิกส์ (e-Marketplace) เป็นช่องทางการค้าออนไลน์รูปแบบหนึ่ง (ข้อ 5) และพาณิชย์อิเล็กทรอนิกส์ (e-Commerce) เป็นส่วนหนึ่งของ “เศรษฐกิจดิจิทัล” (Digital Economy) (ข้อ 10) มีค่าเฉลี่ย 0.99 และพบว่าคำถามที่ข้าราชการมีความรู้ความเข้าใจอยู่ในระดับปานกลาง ได้แก่ พาณิชย์อิเล็กทรอนิกส์ (e-Commerce) เป็นรูปแบบการค้าที่จะมาทดแทนการค้ารูปแบบเดิม (ข้อ 3) มีค่าเฉลี่ย 0.57 การใช้ระบบโอนเงินทางอิเล็กทรอนิกส์ (EFT = Electronic Fund Transfer) ทำให้เกิดพาณิชย์อิเล็กทรอนิกส์เป็นครั้งแรก (ข้อ 1) มีค่าเฉลี่ย 0.60 และการจองร้านอาหารผ่านแอปพลิเคชัน โดยไม่มีการชำระเงิน ถือเป็นพาณิชย์อิเล็กทรอนิกส์ (e-Commerce) (ข้อ 13) มีค่าเฉลี่ย 0.65 ตามลำดับ

2. เพื่อเปรียบเทียบความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ของข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ จำแนกตามปัจจัยส่วนบุคคล

2.1 ข้าราชการที่มีเพศต่างกัน มีความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์แตกต่างกัน ซึ่งเป็นไปตามสมมุติฐานที่ตั้งไว้ แสดงให้เห็นว่าเพศของข้าราชการนั้นมีผลต่อความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ของข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศอาจเป็นเพราะ ข้าราชการเพศหญิงมีความสนใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ รวมทั้งมีประสบการณ์ในการซื้อของออนไลน์มากกว่าเพศชาย ซึ่งผลการวิจัยนี้ สอดคล้องกับงานวิจัยของ วิชิต แซ่อึ้ง (2563) ศึกษาเรื่อง ความรู้ความเข้าใจ และความพึงพอใจของผู้ใช้บริการสินเชื่อเช่าซื้อรถยนต์ในกรุงเทพมหานครเกี่ยวกับพระราชบัญญัติการทวงถามหนี้ พุทธศักราช 2558

2.2 ข้าราชการที่มีช่วงอายุต่างกัน มีความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ แตกต่างกัน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้ แสดงให้เห็นว่าอายุมีผลต่อความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ของข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ อาจเป็นเพราะว่า ข้าราชการที่มีอายุ 31-40 ปี เป็นช่วงอายุที่อยู่ในช่องเปลี่ยนผ่านจากยุคดั้งเดิมสู่ยุคดิจิทัล ได้เห็นพัฒนาการของเทคโนโลยีสารสนเทศ รวมทั้งการพัฒนาเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ เกิดตลาดกลางพาณิชย์อิเล็กทรอนิกส์ขึ้น รวมทั้งการประชาสัมพันธ์เชิญชวนให้ใช้อย่างแพร่หลาย จึงมีความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ มากกว่าข้าราชการในช่วงอายุอื่นๆ ซึ่งผลการวิจัยนี้ สอดคล้องกับงานวิจัยของ กมลชนก วงศ์สวัสดิ์ (2563) ศึกษาเรื่อง ความรู้ความเข้าใจต่อพระราชบัญญัติคุ้มครองข้อมูลส่วนบุคคล พ.ศ. 2562 ของพนักงานการไฟฟ้าส่วนภูมิภาค สำนักงานใหญ่ และนาตยา ประสานสงฆ์ (2559) ศึกษาเรื่อง ความรู้ความเข้าใจเกี่ยวกับอาชีวอนามัยและความปลอดภัยในการทำงาน ของพนักงานเก็บขนมูลฝอย สำนักงานเขตคลองเตย กรุงเทพมหานคร

2.3 ข้าราชการที่มีระดับการศึกษาต่างกัน มีความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ แตกต่างกัน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้ แสดงให้เห็นว่าระดับการศึกษามีผลต่อความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ของข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ อาจเป็นเพราะว่า ข้าราชการที่มีระดับการศึกษาสูงกว่าปริญญาตรี ได้รับการศึกษาข้อมูลเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ ในระดับมหาบัณฑิต จึงมีความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์มากกว่าข้าราชการที่มีระดับการศึกษาปริญญาตรี และต่ำกว่าปริญญาตรี ซึ่งผลการวิจัยนี้ สอดคล้องกับงานวิจัยของ ธนาภัฏ ธนาคุณ (2562) ศึกษาเรื่อง การศึกษาปัจจัยส่วนบุคคล ความรู้ความเข้าใจในเศรษฐกิจยุค 4.0 และกระบวนการทำงานในองค์กร ที่มีผลต่อคุณลักษณะของนักบัญชีที่พึงประสงค์ต่อการเข้ามาของปัญญาประดิษฐ์ในยุคไทยแลนด์ 4.0 ของนักบัญชีในกรุงเทพมหานคร และสุภาวิตา อุกฤษ (2564) ศึกษาเรื่อง ความรู้ความเข้าใจเกี่ยวกับภาษีเงินได้บุคคลธรรมดา ตามประมวลรัษฎากรของนักบัญชีในอำเภอเมือง จังหวัดนครราชสีมา

2.4 ข้าราชการที่มีประสบการณ์การทำงานต่างกัน มีความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ แตกต่างกันอย่างซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้ แสดงให้เห็นว่าประสบการณ์การทำงานมีผลต่อความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ของข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ อาจเป็นเพราะว่า ข้าราชการที่มีประสบการณ์การทำงาน 6-10 ปี มีโอกาสได้ทำกิจกรรมเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์มากกว่าเนื่องจากกระแสความนิยมที่เกิดขึ้นในช่วงที่พาณิชย์อิเล็กทรอนิกส์เข้ามามีบทบาทในประเทศไทย ซึ่งผลการวิจัยนี้ สอดคล้องกับงานวิจัยของ กมลชนก วงศ์สวัสดิ์ (2563) ศึกษาเรื่อง ความรู้ความเข้าใจต่อพระราชบัญญัติคุ้มครองข้อมูลส่วนบุคคล พ.ศ. 2562 ของพนักงานการไฟฟ้าส่วนภูมิภาค สำนักงานใหญ่ และสุภาวิตา อุกฤษ (2564) ศึกษาเรื่อง ความรู้ความเข้าใจเกี่ยวกับภาษีเงินได้บุคคลธรรมดา ตามประมวลรัษฎากรของนักบัญชีในอำเภอเมือง จังหวัดนครราชสีมา

2.5 ข้าราชการที่มีเงินเดือนต่างกัน มีความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ แตกต่างกัน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้ แสดงให้เห็นว่าเงินเดือน มีผลต่อความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ของข้าราชการ กรมส่งเสริมการค้า

ระหว่างประเทศ อาจเป็นเพราะว่า ข้าราชการที่มีเงินเดือน 20,001-30,000 บาท เป็นกลุ่มที่มีกำลังซื้อและมีโอกาสใช้พาณิชย์อิเล็กทรอนิกส์ในชีวิตประจำวัน ซึ่งผลการวิจัยนี้ สอดคล้องกับงานวิจัยของภิรมนวล ภักดีศรีศักดา (2555) ศึกษาเรื่อง ความรู้ความเข้าใจ แรงจูงใจและทัศนคติด้านส่วนประสมทางการตลาดที่มีผลต่อแนวโน้มพฤติกรรมการเติมน้ำมันแก๊สโซฮอล์ E85 ของผู้ขับขี่รถยนต์ในกรุงเทพมหานคร และวิชิต แซ่อึ้ง (2563) ศึกษาเรื่อง ความรู้ความเข้าใจ และความพึงพอใจของผู้ใช้บริการสินเชื่อเช่าซื้อรถยนต์ในกรุงเทพมหานครเกี่ยวกับพระราชบัญญัติการทวงถามหนี้ พุทธศักราช 2558

2.6 ข้าราชการที่มีประเภทตำแหน่งต่างกัน มีความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ แตกต่างกัน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้ แสดงให้เห็นว่าประเภทตำแหน่ง มีผลต่อความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ของข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ อาจเป็นเพราะว่า ข้าราชการที่มีประเภทตำแหน่งวิชาการ เป็นกลุ่มที่ได้เข้าร่วมการประชุมและการจัดกิจกรรมส่งเสริมพาณิชย์อิเล็กทรอนิกส์ในการทำงาน มากกว่าข้าราชการประเภทตำแหน่งทั่วไปที่จะทำหน้าที่สนับสนุนการทำงานของข้าราชการประเภทตำแหน่งวิชาการ ซึ่งผลการวิจัยนี้ สอดคล้องกับงานวิจัยของ กมลชนก วงศ์สวัสดิ์ (2563) ศึกษาเรื่อง ความรู้ความเข้าใจต่อพระราชบัญญัติคุ้มครองข้อมูลส่วนบุคคล พ.ศ. 2562 ของพนักงานการไฟฟ้าส่วนภูมิภาค สำนักงานใหญ่ และวิชิต แซ่อึ้ง (2563) ศึกษาเรื่อง ความรู้ความเข้าใจ และความพึงพอใจของผู้ใช้บริการสินเชื่อเช่าซื้อรถยนต์ในกรุงเทพมหานครเกี่ยวกับพระราชบัญญัติการทวงถามหนี้ พุทธศักราช 2558

3. เพื่อศึกษาความสัมพันธ์ระหว่างปัจจัยด้านช่องทางการรับรู้ข้อมูลกับระดับความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ของข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ พบว่า ช่องทางการรับรู้ข้อมูลมีความสัมพันธ์กับความรู้ความเข้าใจของข้าราชการเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้ แสดงให้เห็นว่าช่องทางการรับรู้ข้อมูลของข้าราชการกรมส่งเสริมการค้าระหว่างประเทศ มีความหลากหลาย และส่งผลต่อการรับรู้ข้อมูลพาณิชย์อิเล็กทรอนิกส์ ช่องทางต่างๆ ที่ข้าราชการกรมส่งเสริมการค้าระหว่างประเทศใช้เป็นประจำมากที่สุด คือ สื่อสังคมออนไลน์ อาทิ Facebook Instagram Twitter Line มีความสอดคล้องกับยุคดิจิทัล ซึ่งผลการวิจัยนี้ สอดคล้องกับงานวิจัยของพิสมัย ใจหาญ (2543) ศึกษาเรื่อง ความรู้ความเข้าใจในการบังคับใช้พระราชบัญญัติป้องกันและปราบปรามการค้าประเวณี พ.ศ. 2539 : ศึกษาเฉพาะสถานคุ้มครองและพัฒนาอาชีพบ้านเกร็ดตระการ

อภิปรายผลการวิจัย

ในการวิจัยเรื่อง “ความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ของจ้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ” ผลการวิจัยพบว่า ความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์ของข้าราชการ กรมส่งเสริมการค้าระหว่างประเทศ ในภาพรวมอยู่ในระดับมาก มีค่าเฉลี่ย 0.84 โดยมีลักษณะที่สำคัญดังนี้ข้อคำถามที่ข้าราชการซึ่งเป็นกลุ่มตัวอย่างมีความรู้ความเข้าใจอยู่ในระดับมาก เช่น การแพร่ระบาดของโควิดทำให้พาณิชย์อิเล็กทรอนิกส์ได้รับความสนใจจากประชาชนมากยิ่งขึ้น (ข้อ 24) มีค่าเฉลี่ยสูงที่สุด 1.00 รองลงมาคือ ตลาดกลางพาณิชย์อิเล็กทรอนิกส์ (e-Marketplace) เป็นช่องทางการค้าออนไลน์รูปแบบหนึ่ง (ข้อ 5) และพาณิชย์อิเล็กทรอนิกส์ (e-Commerce) เป็นส่วนหนึ่งของ “เศรษฐกิจดิจิทัล” (Digital Economy) (ข้อ 10) มีค่าเฉลี่ย 0.99 และพบว่าคำถามที่ข้าราชการมีความรู้ความเข้าใจอยู่ในระดับปานกลาง ได้แก่ พาณิชย์อิเล็กทรอนิกส์ (e-Commerce) เป็นรูปแบบการค้าที่จะมาทดแทนการค้ารูปแบบเดิม (ข้อ 3) มีค่าเฉลี่ย 0.57 การใช้ระบบโอนเงินทางอิเล็กทรอนิกส์ (EFT = Electronic Fund Transfer) ทำให้เกิดพาณิชย์อิเล็กทรอนิกส์เป็นครั้งแรก (ข้อ 1) มีค่าเฉลี่ย 0.60 และการจองร้านอาหารผ่านแอปพลิเคชัน โดยไม่มีการชำระเงิน ถือเป็นพาณิชย์อิเล็กทรอนิกส์ (e-Commerce) (ข้อ 13) มีค่าเฉลี่ย 0.65

แสดงให้เห็นว่าข้าราชการที่เป็นกลุ่มตัวอย่างมีความรู้คำเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์อยู่ในระดับมากโดยข้าราชการมีความรู้ความเข้าใจเกี่ยวกับพาณิชย์อิเล็กทรอนิกส์เป็นอย่างดี เพียงแต่ขาดความรู้ความเข้าใจในเชิงลึกของที่มาและขอบเขตของพาณิชย์อิเล็กทรอนิกส์

จากการทดสอบสมมติฐานที่ตั้งไว้ 7 สมมติฐาน ผลปรากฏว่าเป็นไปตามสมมุติฐานที่ตั้งไว้ ทั้ง 7 สมมติฐาน

ข้อเสนอแนะ

ข้อเสนอแนะจากการวิจัย

1. กรมส่งเสริมการค้าระหว่างประเทศควรจัดให้มีการอบรมให้ความรู้แก่ ข้าราชการโดยเฉพาะอย่างยิ่งข้าราชการที่มีบทบาทในส่วนงานสนับสนุนให้มีความรู้ความเข้าใจที่เกี่ยวข้องกับการพาณิชย์อิเล็กทรอนิกส์ รวมทั้งธุรกรรมทางอิเล็กทรอนิกส์ เพื่อส่งเสริมการปฏิบัติงานของกรมให้มีความทันสมัย สร้างสรรค์ ตอบโจทย์การทำทำการค้าในยุคดิจิทัล

2. กรมส่งเสริมการค้าระหว่างประเทศ ควรให้มีการนำเสนอแนวทางการส่งเสริมการดำเนินงานที่เกี่ยวข้องกับพาณิชย์อิเล็กทรอกนิกส์แบบบูรณาการ เพื่อให้ข้าราชการ รวมทั้งบุคลากรคุ้นเคยกับรูปแบบการค้าที่เข้ามามีบทบาทในยุคปัจจุบัน

ข้อเสนอแนะในการศึกษาครั้งต่อไป

1. การศึกษาค้นคว้าครั้งนี้เป็นการศึกษาเฉพาะบุคลากรที่เป็น ข้าราชการ ของกรมส่งเสริมการค้าระหว่างประเทศ เท่านั้น ไม่สามารถสรุประดับความรู้ความเข้าใจของบุคลากรทั้งหมดของกรมส่งเสริมการค้าระหว่างประเทศได้ ในการวิจัยครั้งต่อไปควรศึกษาเปรียบเทียบบุคลากรประเภทอื่น ของกรมส่งเสริมการค้าระหว่างประเทศ ซึ่งจะสามารถสะท้อนให้เห็นระดับความรู้ความเข้าใจได้ดียิ่งขึ้น

2. การศึกษาค้นคว้าในครั้งต่อไปควรมีการศึกษาค้นคว้าในเชิงคุณภาพร่วมด้วย เพื่อให้สามารถเข้าใจระดับความรู้ความเข้าใจของข้าราชการได้ในเชิงลึก เพื่อนำไปเป็นแนวทางในการพัฒนางานในยุคดิจิทัลต่อไป

ปัญหากฎหมายเกี่ยวกับการควบคุมบุหรี่ไฟฟ้า
Legal issues regarding e-cigarette control

ชัดชัย กลั่นความดี, (Chatchai Kankwamdee)[1]

บทคัดย่อ

เนื่องจากยุคปัจจุบันมีความก้าวหน้าทางเทคโนโลยีและเปลี่ยนวิธีชีวิตของคนในยุคอดีตและปัจจุบันเป็นอย่างมาก ทำให้ชีวิตมีความสะดวกสบายมากยิ่งขึ้น เช่นเดี่ยวกันกับบุหรี่ในอดีตยังคงเรียกว่ายาเส้นเป็นมวน แต่ในปัจจุบันมีการเป็นแปลงทางเทคโนโลยีจากเป็นยาเส้นเป็นแบบมวนจนปัจจุบันเป็นระบบไฟฟ้าตัวทำความร้อนมาทำให้เกิดปฏิกิริยาเคมีน้ำยาที่มีสารนิโคตินทำให้เกิดควันเหมือนการสูบบุหรี่ในอดีตและวิธีการใช้ชีวิตของคนรุ่นใหม่ที่เกิดมาพร้อมกับสิ่งอำนวยความสะดวกทางด้านเทโนโลยีมากมาย ในปัจจุบันความทันสมัยต่อโลกที่มีการเปลี่ยนแปลงบุหรี่ไฟฟ้าจึงกำเนิดขึ้นเพื่อตอบสนอกความต้องการของคนรุ่นใหม่ในยุคปัจจุบันมากยิ่งขึ้นความต้องการรวมถึงการผลิตและการจัดการ ที่มีรูปแบบทันสมัยและการใช้งานที่ง่ายสะดวกในการพกพา บุหรี่ไฟฟ้านั้นสามารถทำความร้อนเพื่อนำสารนิโคตินทำให้เกิดปฏิกิริยาทางไฟฟ้าความร้อนทำให้เกิดควันในขณะเดี่ยวกันกฎหมายก็ยังมีความแตกต่างกันในเรื่องของนิยามผู้นำเข้า และผู้ที่มีไว้เพื่อขายที่มีความผิดที่แตกต่างกัน ร่วมถึงผู้ซื้อและผู้มีไว้ครบครองในเรื่องของอันตรายที่เกิดขึ้นกับผู้ใช้ และกฎหมายหมายที่มีการควบคุมกันคนละแบบ ทำให้บุหรี่ไฟฟ้ามีความผิดทางด้านกฎหมายหลายส่วน เช่น การนำเข้า มีไว้เพื่อครอบครองและเพื่อจำหน่าย และความผิดที่ได้รับโทษที่มีความแตกต่างทั้งที่เป็นเรื่องเดี่ยวกัน

คำสำคัญ: การซื้อขายบุหรี่ไฟฟ้า การควบคุมบุหรี่ไฟฟ้า

Abstract

due to the advancement of technology and greatly changed the way of life of people in the past and present Make life more comfortable Like cigarettes in the past, it is still called fun tobacco. But at present, there is a technological transformation from tobacco to fun until now it is an electric heating system with a liquid that causes smoke like smoking in the past and the way of life of the new generation that is born with things. Facilitates a lot of technology today. Modernity in a changing world E-cigarettes are therefore created to better meet the needs of the new generation in today's generation, in order to facilitate the needs of production and management. With a modern design and easy to use, easy to carry. E-cigarettes can be heated to deliver nicotine, causing an electrical reaction to chemically heat up smoke. At the same time, the law also differs in terms of definitions of importers and those for sale with different offenses. Including the buyer and the possessor. In terms of dangers that occur to users and the law that controls each other in different ways Causing electronic cigarettes to be illegal in many parts of the law, such as importing, possessing and selling And the fault that has been different, both in the same story, so it makes the author. Have an interest in law enforcement

Keywords: e-cigarette trading e-cigarette control

บทนำ

เทคโนโลยีต่างๆ มีความเจริญก้าวหน้ามาก จึงถูกนำมาใช้มากขึ้นในการดัดแปลงของสำหรับของใช้ส่วนตัวและอุปกรณ์ต่างๆ บุหรี่ไฟฟ้าก็เป็นหนึ่งในเทคโนลียีใหม่เช่นเดี่ยวกันสำหรับการค้าแบบไร้พรมแดนรวมถึงการใช้เทคโนโลยีที่ทันสมัยพัฒนาบุหรี่ธรรมดาที่เป็นยาสูบเป็นระบบไฟฟ้าทั่วโลก ผู้ซื้อสินค้าในรูปแบบออนไลน์และรูปแบบออฟไลน์ มีสิทธิที่จะเลือกซื้อสินค้าและการใช้จ่ายด้วยเงินของตัวเองด้วยโดยอิสระ ในปัจจุบันมีการพัฒนาในเรื่องของสินค้ามาก ให้ทันสมัยตรงความต้องการของตลาด บุหรี่ในปัจจุบันจึงมีการปรับเปลี่ยนให้เป็นระบบไฟฟ้าโดยมีสารเคมีบางประเภทที่เหมือนกับสารเคมีที่มีอยู่ในบุหรี่เรียกว่า สารนิโคติที่อยู่ในบุหรี่ปกติมีความเข็มข้นน้อยกว่า แต่ในบุหรี่ไฟฟ้ามีมากกว่าจึงทำให้มีผลต่อสมอง อย่างไรก็ตามก็ยังมีการซื้อขายกันอย่างแพร่หลายซึ่งอาจจะเรียกได้ว่าไม่เป็นของผิดดกฎหมาย แต่งอย่างไรรวมถึงการมีกฎหมายออกมาเพื่อเอาผิดผู้มีไว้ในความครอบครองก็มีความผิดด้วยเช่นกัน

[1] สาขาวิชานิติศาสตร์ คณะนิติศาสตร์ มหาวิทยาลัยศรีปทุมวิทยาเขตขอนแก่น. (หมายเลขโทรศัพท์ 091-0519815 E-mail: Siggawat.kr@spu.ac.th)

ในขณะเดียวกันจำนวนผู้ซื้อก็ยังมีจำนวนที่เพิ่มมากขึ้นและยังเป็นที่ต้องการมาในตลาด และยังไม่มีทีท่าว่าจะน้อยลงแต่อย่างไร อย่างไรก็ตามแอพพลิเคชั่นขายของออนไลน์บางแอพพลิเคชั่นยังไม่มีการควบคุมการซื้อขายที่เพียงพอต่อกฎหมายภายในประเทศ และบุหรี่ไฟฟ้าก็เช่นเดียวกัน สิทธิของผู้บริโภคต้องได้รับการคุ้มครองเพื่อให้แน่ใจว่าจะมีการใช้กฎมายอย่างจริงจัง ดังนั้น ผู้เขียนจึงแนะนำกลไกลต่าง ๆ ในการคุมครองผู้บริโภค เช่น ความยินยอมของผู้บริโภค การดำเนินการจับการลักลอกการนำเข้า การบังคับใช้กฎหมายและการบูรณาการอย่างจริงจังทุกภาคส่วน

ในขณะเดี่ยวกันประเทศไทยประกาศใช้กฎหมายหลายฉบับจึงทำให้เกิดปัญหาการบังครับใช้ และประชาชนทั่วไปที่รับผลกระทบ การบังคับใช้กฎหมายที่มีหลายฉบับและความแตกต่างกัน จึงทำให้เกิดปัญหาว่าสามารถทำได้มีการลักลอบการนำเข้าสินค้าดังกล่าวมากยิ่งขึ้นและอาจจะไม่สอดคลองกับแนวทางการปฏิบัติ หากกฎหมายที่บังคับใช้นั้นปิดช่องทางไม่ให้มีการนำเข้าหรือการใช้มาตราการบังคับในกฎหมายฉบับเดียวก็จะเป็นประโยชน์กับผู้ใช้บังคับและผู้ปฏิบัติตามทำให้มีความชัดเจนในความผิดและในสิ่งที่เป็นที่ต้องห้าม จึงควรให้มีการกำหนดโทษที่มากขึ้นแก่ผู้ซื้อและจากผู้นำเข้าให้เท่ากันและผู้ซื้อใช้เพื่อส่วนตัวมีความผิดฐานสนับสนุน

กรณีของผู้ขายบุหรี่ไฟฟ้าที่ไม่ใช่ผู้นำเข้าบุหรี่ไฟฟ้าโดยผ่านพิธีการกรมศุลกากรขาเข้า การดำเนินงานของผู้ขายนั้นยังไม่มีกฎหมายระบุไว้อย่างชัดเจนว่าให้มีความผิดฐานเป็นผู้ขายในกรณีขายบุหรี่ไฟฟ้า แต่กฎหมายที่เกี่ยวกับคุ้มครองผู้บริโภคได้กำหนดโทษของผู้นำเข้ามาประกอบธุรกิจในลักษณะขายแต่ไม่ได้มีระบุถึงในเรื่องของคำนิยามว่าผู้ที่นำมาขายหรือเผยแพร่โฆษณาทางเว็บไซต์หรือขายออนไลน์หรือออฟไลน์ จึงทำให้เกิดปัญหาว่าผู้ขายที่ไปรับสินค้าจากผู้ที่กระทำความผิดในการนำเข้ามาในราชอาณาจักรอย่างผิดกฎหมายมีความผิดหรือไม่เพราะเป็นในลักษณะของผู้ที่ซื้อต่อจากผู้ที่นำเข้ามาในราชอาณาจักรโดยผิดกฎหมาย จึงเป็นปัญหาว่าการที่ผู้ขายไปซื้อต่อจากผู้นำเข้ามาในราชอาณาจักรอาจไม่เข้าเงื่อนไขเป็นผู้กระทำความผิด ตามลักษณะที่กฎหมายได้ระบุไว้เกี่ยวกับคุ้มครองผู้บริโภค จึงทำให้เกิดปัญหาตามมาว่าการที่ผู้ซื้อไปซื้อจากผู้นำเข้าไม่ได้เป็นการกระทำความผิดฐานนำเข้าบุหรี่ไฟฟ้าเพื่อประกอบธุรกิจประเด็นดังกล่าวจึงทำให้เป็นปัญหาว่าการที่มีผู้กระทำความผิดนำบุหรี่ไฟฟ้าเข้ามาในราชอาณาจักรทำให้เกิดความเสียหายแก่รัฐในกรณีเช่นนี้ผู้นำเข้าจะต้องได้รับโทษตามประกาศกระทรวงพาณิชย์และคณะกรรมการคุ้มครองผู้บริโภค ซึ่งในประกาศของกฎกระทรวงและประกาศห้ามไว้อย่างชัดเจนในกรณีที่นำเข้าบุหรี่ไฟฟ้าเข้ามาในราชอาณาจักรและมีโทษตามกฎหมายเช่นเดียวกับคณะกรรมการคุ้มครองผู้บริโภคได้มีประกาศในเรื่องของการนำเข้าบุหรี่ไฟฟ้าเข้ามาในราชอาณาจักรซึ่งมีทั้งโทษปรับและจำคุกหรือทั้งจำทั้งปรับแต่ก็ยังไม่มีประกาศจากหน่วยงานที่เกี่ยวข้องให้ผู้ที่ไปซื้อบุหรี่ไฟฟ้าในรูปแบบออนไลน์หรือออฟไลน์มีความผิดในลักษณะที่เป็นทั้งผู้ซื้อและผู้ขายในขณะเดียวกันผู้ซื้อบุหรี่ไฟฟ้าจากผู้นำเข้าบุหรี่ไฟฟ้ามาในราชอาณาจักรโดยผิดกฎหมายก็อาจจะเป็นผู้ขายได้เช่นเดียวกัน แต่กฎหมายก็มิได้มีคำนิยามหรือระบุของผู้ขายไว้อย่างชัดเจนว่าต้องห้ามด้วยลักษณะใด

วัตถุประสงค์

การบังคับใช้ประกาศกระทรวงพาณิชย์ เรื่อง กำหนดให้บารากู่และบารากู่ไฟฟ้า หรือบุหรี่ไฟฟ้าเป็นสินค้าที่ต้องห้ามในการนำเข้ามาในราชอาณาจักร พ.ศ. 2557 ลงวันที่ 12 ธันวาคม 2557 นั้น เป็นการประกาศโดยมีผลอย่างชัดเจนเพื่อวัตถุประสงค์ไม่ให้มีการนำเข้าซื้อขาย สินค้าบุหรี่ไฟฟ้าอยู่แล้ว การประกาศดังกล่าวควรที่ความผิดร่วมถึงผู้ที่ได้กระทำความผิดในลักษณะอย่างอื่นด้วย เช่น ในเรื่องของการ ซื้อขายภายในประเทศ ถ้าหามีการกระทำความผิดต้องแต่การนำเข้าในราชอนาจักรแล้วควรให้มีโทษสำหรับผู้ขายขาย ในกรณีที่เท่าๆ กัน ในความผิดที่มีลักษณะใกล้เคียงกัน เพื่อเป็นการป้องกันมิให้มีการกระทำความผิดที่คล้ายคลึงกัน และ เพิ่มโดทษผู้ขายให้เสหมือนกระทำความผิดที่เทียบเท่ากับผู้นำเข้ามาในราชอาณาจักร

1 เพื่อให้ทราบปัญหาเกี่ยวนิยามของผู้ซื้อ ปัญหาที่เกิดขึ้นจากผู้ซื้อ ผู้ซื้อได้ทำการซื้อจากผู้นำเข้าและนำไปขายต่อให้กลับผู้ซื้ออีกทอดหนึ่งนิยามไม่มีความชัดเจนในเรื่องของผู้ซื้อบุหรี่ไฟฟ้าว่าเสมอนเป็นผู้นำเข้าและนำไปขายต่อมีความผิดเทียบเท่ากับผู้นำเข้า จึงทำให้เกิดปัญหาว่ากฎหมายไม่ได้ให้ผู้ซื้อเป็นผู้กระทำความผิดฐานเป็นผู้นำเข้าที่ไปจำหน่ายต่อมีความผิดเทียบเท่าผู้นำเข้ามาในราชอนาจักร แต่ให้ผู้ซื้อมีความผิดตามกฎหมายอื่น ซึ่งอาจจะทำให้เป็นสนับสนุนการกระทำความผิดในฐานอื่นการลักลอบน้ำเข้าโดยผิดกฎหมาย ซึ่งโทษผู้นำเข้าที่มีโทษหนักกว่าผู้ขายและเป็นการห้ามปรามในฐานความผิดที่สูงแล้วในขณะเดียวกันโทษที่มีอัตราความผิดสูงจะเป็นการป้องปรามผู้ที่จะกระทำความผิดด้วย เพื่อเป็นการป้องปรามไม่ให้เกิดปัญหาการซื้อขายเห็นควรให้มีการเพิ่มโทษผู้ซื้อให้เทียบเท่ากับผู้นำเข้าด้วยในลักษณะที่ต่างกัน และผู้ซื่อเพื่อจำหน่าย มีโทษที่เท่าเทียมกับผู้นำเข้า

2. เพื่อให้ทราบปัญหาเกี่ยวกับความผิดที่เกี่ยวกับผู้ขายบุหรี่ไฟฟ้า การขายบุหรีไฟฟ้ามีกฎหมายหลายส่วนที่เกี่ยวข้องจึ้งเป็นปัญหาการบังคับใช่ว่าควรใช้กฎหมายฉบับไหนให้มีความจัดเจนและบังครับใช้ได้จริง เพื่อให้การนำไปใช่มีประสิทธิภาพไม่เกินการสับสนในการใช้บังคับกฎหมายต้องประชาชน

3. เพื่อให้ทราบปัญหาเกี่ยวกับการบังคับใช้กฎหมาย ว่ามีการใช่บังคับกฎหมายใด้บ้างและกฎหมายไหนเป็นกฎหมายที่สามารถบังคับใช้ได้จริงและประชาชนสามารถเข้าใจได้ง่าย

3. ขอบเขตการวิจัย

การวิจัยนี้จะมุ่งศึกษาปัญหากฎหมายที่เกี่ยวกับขอบเขตความรับผิดของการซื้อขายบุหรี่ไฟฟ้ากรณีผู้ซื้อมีความผิดเสมือนว่าเป็นผู้ขาย อาจเข้าเงื่อนไขผู้เป็นผู้จำหน่ายให้กับบุคคลที่ซื้อ เช่น ผู้ซื้อเป็นผู้จำหน่ายเพราะรับจากผู้กระทำความผิดที่นำมาในราชอาณาจักร จึงทำให้เกิดปัญหาเรื่องเกี่ยวกับผู้ขายที่ไม่ชัดเจนในเรื่องของผู้ขายที่นำเข้ามาในราชอาณาจักรที่ไม่ชัดเจน มาตรการต่างๆ ในการควบคุมบุหรี่ไฟฟ้าว่ามีการควบคุมและดูแลในเรื่องของการนำเข้าและผู้ซื้อผู้ขายอย่างชัดเจนและผลของกฎหมายในการควบคุมมาตราการต่างๆ ตามหลักกฎหมายระหว่างประเทศ กฎหมายต่างประเทศ และกฎหมายของประเทศไทย รวมทั้งแนวคำพิพากษาของศาลต่างประเทศ เพื่อนำมาเป็นแนวทางในการวิเคราะห์และเปรียบเทียบต่อไป

4. กฎหมายที่เกี่ยวข้อง

ภายใต้กฎหมาย ตามพระราชบัญญัติควบคุมผลิตภัณฑ์ยาสูบ พ.ศ. 2560 มาตรา 4 มีในเรื่องของคำนิยามที่ไม่มีความสอดคล้อง เกี่ยวกับการออกกฎหมายในแต่ละฉบับซึ่งอาจจะเป็นปัญหาในเรื่องของการตีความกฎหมายได้ในขณะเดียวกันก็อาจจะทำให้เกิดปัญหาการบังครับใช้กฎหมายที่มีหมายกฎหมายที่ใช้บังคับและอาจทำให้ประชาชนส่วนใหญ่เข้าใจผิดจึงเห็นควรให้มีการแก้ปัญหาและปรับอแก้กฎหมายให้สอดคล้องกันเพื่อประโยชน์ในการปรับใช้และการตีความ

การบังคับใช้ที่เกี่ยวกับกฎหมายนั้นในเรื่องของบุหรี่ไฟฟ้ามีการบังคับให้เป็นสินค้าห้ามนำเข้า ตามประกาศกระทรวงพาณิชย์ พ.ศ. 2557 ภายใต้ พ.ร.บ.การส่งออกไปนอกและการนำเข้ามาในราชอาณาจักรซึ่งสินค้า พ.ศ. 2522 ผู้ฝ่าฝืนมีโทษ จำคุกไม่เกิน 10 ปีหรือปรับเป็นเงิน 5 เท่าของสินค้าที่นำเข้า หรือทั้งจำทั้งปรับพร้อมถูกริบสินค้าบุหรี่ไฟฟ้ายังเป็นสินค้าที่ห้ามขายหรือให้บริการ ในขณะเดียวกันนั้นยังมีกฎหมายที่เกี่ยวข้องกับส่วนอื่นด้วย

ตามคำสั่งคณะกรรมการคุ้มครองผู้บริโภค ที่ 9/2558 ซึ่งกำหนดโทษสำหรับผู้ประกอบธุรกิจทั่วไป ให้จำคุกไม่เกิน 5 ปี ปรับไม่เกิน 500,000 บาท หรือทั้งจำทั้งปรับ และหากผู้ที่กระทำผิดเป็นผู้ประกอบธุรกิจในฐานะผู้ผลิต ผู้สั่ง หรือผู้ที่นำเข้ามาเพื่อขายต้องรับโทษเพิ่มสูงขึ้นเป็นจำคุกไม่เกิน 10 ปี ปรับไม่เกิน 1,000,000 บาท หรือทั้งจำทั้งปรับ ตามพระราชบัญญัติควบคุมผลิตภัณฑ์ยาสูบ พ.ศ. 2560 ผู้ศึกษาขอเสนอแนะแนวทางแก้ไขปัญหาดังต่อไปนี้

1. ปัญหาเกี่ยวกับการตีความเกี่ยวกับบุหรี่ไฟฟ้า มาตรา 4 แห่งพระราชบัญญัติควบคุมผลิตภัณฑ์ยาสูบ พ.ศ. 2560 เป็น “ผลิตภัณฑ์ยาสูบ หมายความว่า ผลิตภัณฑ์ที่มีส่วนประกอบของใบยาสูบหรือพืชนิโคเทียนาทาแบกกุ้ม (Nicotianatabacum) และให้หมายความรวมถึงผลิตภัณฑ์อื่นใดมีสารนิโคตินเป็นส่วนประกอบซึงบริโภคโดยวิธีสูบ ดูด ดม อม เคี้ยว กิน เป่า หรือพ่นเข้าไปในปากหรือจมูก ทำ หรือโดยวิธีอื่นใด เพื่อให้ได้ผลเป็นเช่นเดียวกัน ไม่รวมถึงผลิตภัณฑ์ยาสูบที่ไม่ส่วนประกอบของใบยาสูบ สารนิโคติน หรือเครื่องมืออื่นที่ทำให้เกิดควัน คล้ายวิธีสูบ ดูด ดม อม เคี้ยว กิน เป่า

2. ปัญหาการตีความ ตามมาตรา 4 “ขาย” หมายความรวมถึง จำหน่าย จ่าย แจก แลกเปลี่ยน หรือให้ เพื่อประโยชน์ในทางการค้า เพิ่มเติม เป็น “ขาย” ไม่รวมถึง ผู้จำหน่าย จ่าย แจก แลกเปลี่ยน หรือให้ เพื่อประโยชน์ในทางการค้า มีความผิดเทียบเท่ากับผู้นำเข้าบุรี่ไฟฟ้ามาในราชอาณาจักรตามประกาศกระทรวงพาณิชย์ พ.ศ. 2557 ภายใต้ พ.ร.บ.การส่งออกไปนอกและการนำเข้ามาในราชอาณาจักรซึ่งสินค้า พ.ศ. 2522 ผู้ฝ่าฝืนมีโทษ จำคุกไม่เกิน 10 ปีหรือปรับเป็นเงิน 5 เท่าของสินค้าที่นำเข้า หรือทั้งจำทั้งปรับพร้อมถูกริบสินค้าบุหรี่ไฟฟ้ายังเป็นสินค้าที่ห้ามขายหรือให้บริการ

3. ปัญหาการตีความ มาตรา 4 “ผู้มีส่วนเกี่ยวข้อง” หมายความว่า บุคคลหรือองค์กรที่ทำการแทนผู้ประกอบการ สมาคม หรือ ชมรมผู้เพาะปลูก ผู้บ่ม ผู้ค้าใบยาสูบ หรือสมาคมหรือชมรมผู้ค้าผลิตภัณฑ์ยาสูบ เพิ่มเติมเป็น “ผู้มีส่วนเกี่ยวข้อง” หมายความว่า บุคคลหรือองค์กรที่ทำการแทนผู้ประกอบการ สมาคมหรือ ชมรมผู้เพาะปลูก ผู้บ่ม ผู้ค้าใบยาสูบ หรือสมาคมหรือชมรมผู้ค้าผลิตภัณฑ์ยาสูบ ไม่รวมถึงผู้ที่นำเข้าบุหรี่ไฟฟ้ามาในราชอาณาจักร เพื่อจำหน่าย จ่าย แจก แลกเปลี่ยน หรือให้ เพื่อประโยชน์ในทางการค้า

5 สรุป

ปัญหาคือกฎหมายมีการกำหนดโทษการผู้ที่นำเข้าบุหรี่ไฟฟ้าที่มีอัตราโทษที่สูงแต่กลับมีอัตราโทษผู้ที่กระทำความผิดกรณีผู้ซื้อในลักษณะที่น้อยกว่าผู้ที่นำเข้าซึ่งการกระทำความผิดนั้นเป็นการกระทำความผิดที่มีลักษณะเหมือนกัน ผู้นำเข้าและผู้ขายมีความต้องการเพื่อที่แสวงหาผลกำไรทั้งสองฝ่าย การปรับแก้บทนิยามและข้อกฎหมายจึงทำให้เกิดความชัดเจนมากยิ่งขึ้น ในการบังคับใช้กฎหมาย

6 ข้อเสนอแนะ

1. แก้ไขนิยามโดยโดยมีการให้บุหรี่ไฟฟ้าไม่เป็นผลิตยาสูบ
2. บัญญัตินิยามคำว่าขายให้รวมถึงการจำหน่ายเพื่อการค้า
3. ให้แก้ไขบทนิยามผู้มีส่วนเกี่ยวข้องให้รวมถึงผู้ที่นำเข้ามาในราชอาณาจักรเพื่อจำหน่าย

กิตติกรรมประกาศ

บทความนี้ได้รับการสนับสนุนเผยแพร่ผลงานทางวิชาการ จากมหาวิทยลัยศรีปทุมวิทยาเขตขอนแก่น

เอกสารอ้างอิง

ตามพระราชบัญญัติควบคุมผลิตภัณฑ์ยาสูบ พ.ศ. 2560 มาตรา 4

ประกาศกระทรวงพาณิชย์ เรื่อง กำหนดให้บารากู่และบารากู่ไฟฟ้า หรือบุหรี่ไฟฟ้าเป็นสินค้าที่ต้องห้ามในการนำเข้ามาในราชอาณาจักร พ.ศ. 2557ลงวันที่ 12 ธันวาคม 2557

คำสั่งคณะกรรมการคุ้มครองผู้บริโภคที่ ๙/๒๕๕๘ เรื่อง ห้ามขายหรือห้ามให้บริการสินค้า “บารากู่ บารากู่ไฟฟ้าหรือบุหรี่ไฟฟ้า หรือตัวยาบารากู่ น้ำยาสำหรับเติมบารากู่ไฟฟ้าหรือบุหรี่ไฟฟ้า”

ความผูกพันต่อองค์การของข้าราชการ กรมส่งเสริมสหกรณ์

Organizational Commitment of Cooperative Promotion Department Government Officers

ธเนศร์ คำสอน, (Thanes Kumsorn)[1]
สมเกียรติ วันทะนะ, (Somkiat Wanthana)[2]

บทคัดย่อ

การวิจัยครั้งนี้มีวัตถุประสงค์เพื่อศึกษาระดับความผูกพันต่อองค์การของข้าราชการกรมส่งเสริมสหกรณ์

กลุ่มตัวอย่างที่ใช้ในการศึกษาคือข้าราชการกรมส่งเสริมสหกรณ์ จำนวน 286 คน โดยใช้แบบสอบถาม การวิเคราะห์ข้อมูลใช้โปรแกรมคอมพิวเตอร์สำเร็จรูปสถิติที่ใช้ในการวิเคราะห์ ได้แก่ ค่าสถิติ ร้อยละ ค่าเฉลี่ย ค่าส่วนเบี่ยงเบนมาตรฐาน การทดสอบค่าที และการวิเคราะห์ความแปรปรวนทางเดียว ค่านัยสำคัญทางสถิติ ที่ใช้ในการวิเคราะห์ครั้งนี้กำหนดไว้ที่ระดับ 0.05

ผลการศึกษาค้นคว้าพบว่า ข้าราชการกรมส่งเสริมสหกรณ์ มีระดับความผูกพันต่อองค์การ ในระดับสูง จากการทดสอบสมมติฐานพบว่า ระดับการศึกษา อายุราชการ และภูมิลำเนาเกิด อย่างมีนัยสำคัญทางสถิติที่ระดับ 0.05 ส่วนตัวแปรทางด้าน เพศ อายุ สถานภาพสมรส และเงินเดือน ไม่มีผลต่อความผูกพันต่อองค์การของข้าราชการ อย่างมีนัยสำคัญทางสถิติที่ระดับ 0.05

คำสำคัญ : ความผูกพัน, กรมส่งเสริมสหกรณ์, ข้าราชการ

Abrstract

The objectives of this research were to study the level of Organizational Commitment of Cooperative Promotion Department Government Officers.

The samples composed of 286 persons of Cooperative Promotion Department Government Officers. The data were collected by using questionnaires and analyzed by using the statistic program. Statistical tools employed in data analysis and presented through Percentage, Mean, Standard Deviation, t-test, and One-Way ANOVA. The level of significance for statistical testing was 0.05.

The research findings are as follow. The level of factor's Organizational Commitment of Cooperative Promotion Department Government Officers was high. According to the hypothesis testing, level of education, work experience and domicile of birth caused difference in the organizational commitment. The level of significance for statistical testing was 0.05. However, gender, age, status, and salary did not cause any difference in the organizational engagement. The level of significance for statistical testing was 0.05.

Keyword: Organizational Commitment, Cooperative Promotion Department, Government Officers

บทนำ

กรมส่งเสริมสหกรณ์ เป็นหน่วยงานของรัฐในสังกัดกระทรวงเกษตรและสหกรณ์ มีภารกิจเกี่ยวกับการส่งเสริม เผยแพร่ และให้ความรู้เกี่ยวกับ อุดมการณ์ หลักการ และวิธีการสหกรณ์ให้แก่บุคลากรสหกรณ์ กลุ่มเกษตรกร และประชาชนทั่วไป ส่งเสริม สนับสนุน คุ้มครอง และพัฒนาระบบสหกรณ์ให้มีความเข้มแข็ง เพื่อให้สมาชิกสหกรณ์มีคุณภาพชีวิตที่ดีขึ้นทั้งทาง ด้านเศรษฐกิจและสังคม กรมส่งเสริมสหกรณ์ได้จัดทำแผนยุทธศาสตร์ 20 ปี (พ.ศ. 2560 -2579) ที่มีความสอดคล้องกับแผนยุทธศาสตร์ชาติระยะ 20 ปี (พ.ศ. 2560 - 2579) และแผนพัฒนาเศรษฐกิจและสังคมแห่งชาติฉบับที่ 12 (พ.ศ. 2560 - 2564) โดยกำหนดวิสัยทัศน์ และจัดทำแผนปฏิบัติการกรมส่งเสริมสหกรณ์ 5 ปี (พ.ศ. 2560 - 2579) เพื่อมุ่งเน้นพัฒนาส่งเสริมภาพลักษณ์ที่ดี และพัฒนาขีดความสามารถของสหกรณ์และกลุ่มเกษตรกร ด้วยการบริหาร

[1] หลักสูตรศิลปศาสตรมหาบัณฑิต สาขารัฐศาสตร์ คณะสังคมศาสตร์ มหาวิทยาลัยเกษตรศาสตร์
(หมายเลขโทรศัพท์ 095-737-8998 E-mail: thanes.kumsorn@gmail.com)
[2] อาจารย์หลักสูตรศิลปศาสตรมหาบัณฑิต สาขาวิชารัฐศาสตร์ มหาวิทยาลัยเกษตรศาสตร์

จัดการคุณภาพ บุคลากรมืออาชีพ และเทคโนโลยีสารสนเทศ เพื่อยกระดับศักยภาพและความเข้มแข็งของสหกรณ์และกลุ่มเกษตรกร (สำนักพัฒนาและถ่ายทอดเทคโนโลยีการสหกรณ์ กรมส่งเสริมสหกรณ์, 2560: 2)

กรมส่งเสริมสหกรณ์ได้ตระหนักถึงความสำคัญของการบริหารจัดการทรัพยากรบุคคล ซึ่งเป็นปัจจัยสำคัญใน การขับเคลื่อนการดำเนินการตามนโยบาย เพื่อบรรลุความสำเร็จสอดคล้องกับเจตนารมณ์การบริหารกิจการบ้านเมืองที่ดีรวมทั้งให้สอดคล้องกับการประเมินคุณธรรมและความโปร่งใสในการดำเนินงานของหน่วยงานภาครัฐ ซึ่งกรมส่งเสริมสหกรณ์จึงได้กำหนดนโยบายการบริหารทรัพยากรบุคคลขึ้นเพื่อใช้เป็นกรอบแนวทางในการบริหารทรัพยากรบุคคล โดยการพัฒนาบุคลากรนั้นให้มีการจัดทำแผนพัฒนาบุคลากรประจำปีที่เหมาะสม โดยเชื่อมโยงกับสมรรถนะมาตรฐานกำหนดตำแหน่ง และนำไปสู่ การพัฒนาศักยภาพของบุคลากรให้พร้อมรับภารกิจและสอดคล้องกับยุทธศาสตร์ขององค์การ โดยมุ่งเน้นพัฒนาความรู้ ความเชี่ยวชาญ ปลูกฝังค่านิยม คุณธรรมจริยธรรม การเรียนรู้พัฒนางานอย่างต่อเนื่อง การมุ่งผลสัมฤทธิ์อย่างทั่วถึงทั้งองค์การ ตลอดจนการรักษาไว้ และการจูงใจให้มีการวางแผนมุ่งเน้นการสร้างคุณภาพชีวิตให้มีความสมดุล โดยการสร้างสภาพแวดล้อม ระบบวิธีการทำงานที่ดี มีเส้นทางความก้าวหน้าในตำแหน่งงาน มีการวางแผนเตรียมความพร้อมบุคลากรที่จะดำรงตำแหน่งสำคัญในอนาคต มีการพัฒนาฐานข้อมูลสารสนเทศบุคลากรมีระบบการประเมินผลการปฏิบัติงานที่ชัดเจน และถือปฏิบัติโดยทั่วกัน ส่งผลให้ได้รับค่าตอบแทนที่สอดคล้องกับผลการปฏิบัติงาน เพื่อรักษาไว้ซึ่งบุคลากรที่มีศักยภาพสูง

การเปลี่ยนแปลงองค์การนั้นต้องอาศัยบุคลากรทุกฝ่ายในองค์การร่วมมือกันปฏิบัติงานและดำเนินการตามแผนงานและนโยบายที่องค์การวางไว้ เพื่อให้เกิดการเปลี่ยนแปลงและพัฒนาองค์การให้ไปสู่เป้าหมายที่กำหนดไว้ โดยการเปลี่ยนแปลงดังกล่าวอาจส่งผลกระทบทั้งด้านบวกและด้านลบต่อองค์การและบุคลากรผู้ปฏิบัติงานผลทางด้านบวก เช่น องค์การสามารถพัฒนาและดำเนินการได้อย่างมีประสิทธิภาพ องค์การมีนโยบายในการบริหารงานที่เหมาะสมต่อสภาพแวดล้อมที่เปลี่ยนแปลงไป องค์การสามารถนำนวัตกรรมใหม่ๆ มาใช้ในการดำเนินกิจการ บุคลากรผู้ปฏิบัติงานมีการพัฒนาตนเองและทักษะในการทำงานมากขึ้น เพื่อให้บรรลุวัตถุประสงค์หรือภารกิจขององค์การ ในส่วนผลทางด้านลบจากกรณีการเปลี่ยนแปลงที่รวดเร็วนี้อาจส่งผลให้บุคลากรผู้ปฏิบัติงานมีความกดดันในการทำงานมากขึ้น เกิดความเบื่อหน่ายในการทำงานส่งผล ให้เกิดสภาวะหมดไฟในการทำงาน ซึ่งความกดดัน ความเบื่อหน่าย และสภาวะหมดไฟในการทำงานอาจส่งผลให้ความพึงพอใจในการทำงานลดลง ทำให้บุคลากรมีความผูกพันต่อองค์การลดลง ถ้าหากมีโอกาสที่ดีกว่าบุคลากรที่มีคุณภาพอาจจะลาออกจากองค์การเพื่อไปสู่องค์การที่มีความก้าวหน้าในด้านการทำงาน ระดับผลตอบแทนและสภาพสังคมที่ดีกว่า จากที่กล่าวมาจะเห็นได้ว่าบุคลากรถือเป็นทรัพยากรที่มีส่วนสำคัญในการนำพาองค์การไปสู่ความสำเร็จและยั่งยืน ดังนั้นองค์การต่างๆ ทั้งภาครัฐและภาคเอกชนจึงจำเป็นต้องให้ความสำคัญกับการบริหารทรัพยากรบุคคล โดยต้องคำนึงถึงการรักษาบุคลากรที่มีคุณภาพให้คงอยู่กับองค์การ รวมถึงการสร้างความพึงพอใจต่อองค์การเพื่อให้เกิดแรงจูงใจในการทำงานร่วมกันของบุคลากรและพัฒนาไปสู่ความผูกพันต่อองค์การต่อไป (ชลิตพันธ์ บุญมีสุวรรณ และคณะ, 2560: 155-172)

ภารกิจของกรมส่งเสริมสหกรณ์เป็นกลไกสำคัญต่อการพัฒนาเศรษฐกิจและสังคมของประเทศ ที่ทำให้ข้าราชการของกรมส่งเสริมสหกรณ์ต้องปฏิบัติหน้าที่ด้วยความรับผิดชอบ มุ่งมั่นในการทำงาน ยึดหลักใน ความซื่อสัตย์สุจริต และพัฒนาความรู้ด้านวิชาการเพื่อไปแนะนำส่งเสริมสหกรณ์และกลุ่มเกษตรให้มีความรู้ความเข้าใจต่อระบบสหกรณ์และพัฒนาอาชีพให้แก่เกษตรกร อีกทั้งกรมส่งเสริมสหกรณ์มุ่งมั่นที่จะพัฒนาไปสู่องค์การที่ประสิทธิภาพสูง รวมทั้งเพิ่มระดับประสิทธิภาพในการบริหารงาน การพัฒนาข้าราชการให้มีความรู้ทางวิชาการ ความสามารถในการแนะนำส่งเสริม และมีความพึงพอใจในการปฏิบัติงานตามยุทธศาสตร์ชาติด้านการพัฒนาและเสริมสร้างศักยภาพทรัพยากรมนุษย์ นอกจากพัฒนาประสิทธิภาพขององค์การแล้วการที่องค์การจะบรรลุเป้าหมายได้นั้น ต้องอาศัยความสามัคคี ความร่วมมือร่วมแรง ร่วมใจ ความอดทนความทุ่มเทและเสียสละ และความผูกพันของบุคลากร เพื่อให้องค์การภาครัฐสามารถบรรลุเป้าหมาย (สำนักงานคณะกรรมการข้าราชการพลเรือน, 2563: ออนไลน์) ซึ่งความผูกพันต่อองค์การจึงเป็นตัวแปรสำคัญที่องค์การจะต้องตระหนักอยู่เสมอ ซึ่งเป็นการสะท้อนถึงความรู้สึกของบุคลากร ที่มีต่อองค์การในระยะยาว ดังนั้นองค์การจะต้องวางแผนการปรับปรุงและพัฒนาการบริหารทรัพยากรบุคคล เพื่อจูงใจและส่งเสริมบุคลากร เกิดความผูกพันและยอมรับเป้าหมายค่านิยมขององค์การ พร้อมใช้ความรู้ความสามารถอย่างเต็มที่เพื่อปฏิบัติงานให้สำเร็จตามวัตถุประสงค์ขององค์การ ขณะเดียวกันก็อยากจะคงความเป็นสมาชิกภาพองค์การไว้ ความผูกพันต่อองค์การจะทำให้บุคลากร มีทัศนคติและพฤติกรรมที่แสดงออกในด้านบวกต่อองค์การ บุคลากรที่มีความผูกพันต่อองค์การจะปฏิบัติงานได้อย่างมีประสิทธิภาพและจะปฏิบัติงานในระยะยาวกับองค์การตราบเท่าที่องค์การต้องการ (ถาวร อ่อนลออ, 2561: 101)

ด้วยเหตุผลดังกล่าวผู้วิจัยจึงต้องการศึกษาเกี่ยวกับความผูกพันต่อองค์การของข้าราชการกรมส่งเสริมสหกรณ์ เพื่อที่จะทราบว่าปัจจัยใดที่มีผลต่อความผูกพันต่อองค์การและนำปัจจัยต่างๆ มาเป็นแนวทางในการเสริมสร้างความผูกพันต่อองค์การของข้าราชการกรมส่งเสริมสหกรณ์และองค์การภาครัฐอื่นๆ ให้ดียิ่งขึ้น ซึ่งทำให้ข้าราชการเกิดความจงรักภักดีต่อองค์การ มีแรงจูงใจในการปฏิบัติงานและธำรงรักษาข้าราชการให้ทำงานให้แก่องค์การ นำความรู้ที่ได้จากการศึกษาไปใช้ในการพัฒนาการบริหารทรัพยากรมนุษย์และพัฒนาองค์การให้มีประสิทธิภาพและประสิทธิผลต่อไป

วัตถุประสงค์ของการวิจัย

1. เพื่อศึกษาระดับความผูกพันต่อองค์การของข้าราชการกรมส่งเสริมสหกรณ์
2. เพื่อเปรียบเทียบความผูกพันต่อองค์การของข้าราชการกรมส่งเสริมสหกรณ์ จำแนกตามปัจจัยส่วนบุคคล

วิธีการวิจัย

การวิจัยนี้เป็นการศึกษาความผูกพันต่อองค์การของข้าราชการกรมส่งเสริมสหกรณ์ โดยศึกษาถึงปัจจัยส่วนบุคคล และความผูกพันต่อองค์การของข้าราชการกรมส่งเสริมสหกรณ์ ผู้ศึกษาได้กำหนดขนาดของกลุ่มตัวอย่างโดยใช้ตารางสำเร็จรูปของทาโร่ ยามาเน่ได้จำนวนตัวอย่างเท่ากับ 286 คน สถิติที่ใช้ในการวิจัย ได้แก่ ค่าสถิติร้อยละ (Percentage) และค่าเฉลี่ย (Mean) ทดสอบความแตกต่างของค่าเฉลี่ยของกลุ่มตัวอย่าง 2 กลุ่ม ใช้การทดสอบค่าที (t – test) ทดสอบความแตกต่างของค่าเฉลี่ยของกลุ่มตัวอย่างตั้งแต่ 3 กลุ่มขึ้นไปเป็นการวิเคราะห์การแปรปรวนทางเดียว (One-way ANOVA) และทดสอบความแตกต่างรายคู่โดยวิธีของ (Fisher's Least Significance Difference : LSD) โดยกำหนดค่านัยสำคัญทางสถิติไว้ที่ใช้ในการวิเคราะห์ครั้งนี้กำหนดไว้ที่ระดับ 0.05

ผลการวิจัย

ข้อมูลส่วนใหญ่ของกลุ่มตัวอย่าง พบว่า กลุ่มตัวอย่างส่วนมากประกอบด้วย เพศหญิง จำนวน 192 คน คิดเป็นร้อยละ 67.1มีอายุ 31 – 40 ปี จำนวน 140 คน คิดเป็นร้อยละ 49.0 มีสถานภาพโสด จำนวน 174 คน คิดเป็นร้อยละ 60.8 มีระดับการศึกษาสูงกว่าปริญญาตรี จำนวน 156 คิดเป็นร้อยละ 54.6 มีเงินเดือนไม่เกิน 25,000 บาท จำนวน 177 คน คิดเป็นร้อยละ 61.9 มีอายุราชการ ไม่เกิน 5 ปี จำนวน 152 คน คิดเป็นร้อยละ 53.2 มีภูมิลำเนาเกิดในภาคตะวันออกเฉียงเหนือ จำนวน 64 คน คิดเป็นร้อยละ 22.4ระดับความผูกพันต่อองค์การ แสดงให้เห็นว่า ความผูกพันของข้าราชการกรมส่งเสริมสหกรณ์ อยู่ในระดับสูง โดยมีค่าเฉลี่ย 3.91

เมื่อทดสอบสมมติฐานที่ตั้งไว้ 7 สมมติฐาน โดยทดสอบความสัมพันธ์และเปรียบเทียบความแตกต่างระหว่างสำหรับตัวแปรอิสระ ที่ใช้ในการวิจัยครั้งนี้ ได้แก่ เพศ อายุ สถานภาพสมรส ระดับการศึกษา เงินเดือน อายุราชการและภูมิลำเนาเกิด ตัวแปรตาม คือ ความผูกพันต่อองค์การ ดังนี้

ตารางที่ 1 สรุปผลการทดสอบสมมติฐาน

ตัวแปรอิสระ	Sig	เป็นไปตามสมมติฐาน	ไม่เป็นไปตามสมมติฐาน
1. เพศ	0.881	-	✔
2. อายุ	0.453	-	✔
3. สถานภาพสมรส	0.110	-	✔
4. ระดับการศึกษา	0.030*	✔	-
5. เงินเดือน	0.322	-	✔
6. อายุราชการ	0.008*	✔	-
7. ภูมิลำเนาเกิด	0.041*	✔	-

โดยกำหนดระดับนัยสำคัญทางสถิติที่ใช้ในการทดสอบไว้ที่ระดับ 0.05

จากตารางทดสอบสมมติฐานที่ตั้งไว้ 7 สมมติฐาน ผลปรากฏว่า

สมมติฐานที่ 1 ข้าราชการที่มีเพศต่างกัน มีความผูกพันต่อองค์การของข้าราชการกรมส่งเสริมสหกรณ์ไม่แตกต่างกัน ซึ่งไม่เป็นไปตามสมมติฐานที่ตั้งไว้ ซึ่งสอดคล้องกับ สมจิตร จันทร์เพ็ญ (2557) ศึกษาเรื่อง "ความผูกพันต่อองค์การของเจ้าหน้าที่สถาบันพัฒนาองค์กรชุมชน (องค์การมหาชน)" พิญาภรณ์ เต็งพานิชกุล (2558) ศึกษาเรื่อง "ความผูกพันต่อองค์กรของบุคลากรฝ่ายพัฒนาชุมชนและสวัสดิการสังคมสำนักงานเขตบางแค"

สมมติฐานที่ 2 ข้าราชการที่มีอายุต่างกัน มีความผูกพันต่อองค์การของข้าราชการกรมส่งเสริมสหกรณ์ไม่แตกต่างกัน ซึ่งไม่เป็นไปตามสมมติฐานที่ตั้งไว้ ซึ่งสอดคล้องกับงานวิจัยของ พิชิต ปราณีพร้อมพงศ์ (2559) ศึกษาเรื่อง "ความผูกพันต่อองค์กรของ

พนักงานฝ่ายทรัพยากรบุคคล บริษัท ห้างเซ็นทรัล ดีพาทเมนท์สโตร์ จำกัด” ศรัญญา สันธิ (2560) ศึกษาเรื่อง “ปัจจัยที่มีผลต่อความผูกพันต่อองค์การของข้าราชการกรมป่าไม้ สังกัดส่วนกลาง”

สมมติฐานที่ 3 ข้าราชการที่มีสถานภาพสมรสต่างกัน มีความผูกพันต่อองค์การของข้าราชการกรมส่งเสริมสหกรณ์ไม่แตกต่างกัน ซึ่งไม่เป็นไปตามสมมติฐานที่ตั้งไว้ ซึ่งสอดคล้องกับเสาดะ แขวงดำ (2559) ศึกษาเรื่อง “ความผูกพันต่อองค์การของบุคลากรกรมเจรจาการค้าระหว่างประเทศ” สมเกียรติ อินยม (2560) ศึกษาเรื่อง “ความผูกพันต่อองค์กรของพนักงานฝ่ายผลิตบริษัทแห่งหนึ่งใน นิคมอุตสาหกรรมอีสเทิร์นซีบอร์ด จังหวัดระยอง”

สมมติฐานที่ 4 ข้าราชการที่มีระดับการศึกษาต่างกัน มีความผูกพันต่อองค์การของข้าราชการกรมส่งเสริมสหกรณ์แตกต่างกัน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้ ซึ่งสอดคล้องกับงานวิจัยของ สิริธร แสงวันลอย (2559) ศึกษาเรื่อง “ความผูกพันต่อองค์การของพนักงาน บริษัท บางกอก มิสซูบิชิ ยูเอฟเจ ลิส จำกัด” ณัชชา ชะรัดรัมย์ (2559) ศึกษาเรื่อง “ความผูกพันต่อองค์การของข้าราชการกรมการปกครองจังหวัดบุรีรัมย์”

สมมติฐานที่ 5 ข้าราชการที่มีเงินเดือนต่างกัน มีความผูกพันต่อองค์การของข้าราชการกรมส่งเสริมสหกรณ์ไม่แตกต่างกัน ซึ่งไม่เป็นไปตามสมมติฐานที่ตั้งไว้ ซึ่งสอดคล้องกับงานวิจัยของ พิญาภรณ์ เต็งพานิชกุล (2558) ศึกษาเรื่อง “ความผูกพันต่อองค์กรของบุคลากรฝ่ายพัฒนาชุมชนและสวัสดิการสังคมสำนักงานเขตบางแค” พิชิต ปราณีพร้อมพงศ์ (2559) ศึกษาเรื่อง “ความผูกพันต่อองค์กรของพนักงานฝ่ายทรัพยากรบุคคล บริษัท ห้างเซ็นทรัล ดีพาทเมนท์สโตร์ จำกัด”

สมมติฐานที่ 6 ข้าราชการที่มีอายุราชการต่างกัน มีความผูกพันต่อองค์การของข้าราชการกรมส่งเสริมสหกรณ์แตกต่างกัน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้ ซึ่งสอดคล้องกับงานวิจัยของ สนธยา วงศาพันธ์ (2557) ศึกษาเรื่อง “ความผูกพันต่อองค์การของข้าราชการตำรวจ : กรณีศึกษากองกำกับการต่อต้านการก่อการร้าย กองบังคับการสายตรวจและปฏิบัติการพิเศษ” สิริธร แสงวันลอย (2559) ศึกษาเรื่อง “ความผูกพันต่อองค์การของพนักงาน บริษัท บางกอก มิสซูบิชิ ยูเอฟเจ ลิส จำกัด”

สมมติฐานที่ 7 ข้าราชการที่มีภูมิลำเนาเกิดต่างกัน มีความผูกพันต่อองค์การของข้าราชการกรมส่งเสริมสหกรณ์แตกต่างกัน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้ ซึ่งไม่สอดคล้องกับงานวิจัยของ ณัชชา ชะรัดรัมย์ (2559) ศึกษาเรื่อง “ความผูกพันต่อองค์การของข้าราชการกรมการปกครองจังหวัดบุรีรัมย์”

ข้อเสนอแนะจากการวิจัย

จากผลการวิจัย พบว่า ความผูกพันต่อองค์การของข้าราชการกรมส่งเสริมสหกรณ์ อยู่ในระดับสูง แสดงให้เห็นว่าข้าราชการให้ความสำคัญด้านความก้าวหน้าในงาน ความสัมพันธ์กับผู้ร่วมงาน และความมั่นคงในงาน ซึ่งเป็นสิ่งที่จะช่วยทำให้เกิดความผูกพันต่อองค์การ แต่การที่จะรักษาระดับความผูกพันต่อองค์การ ให้อยู่ในระดับสูง ต่อไปได้นั้น ผู้วิจัยขอเสนอแนะ ดังนี้

1. กรมส่งเสริมสหกรณ์ ควรกำหนดค่าตอบแทนพิเศษ สวัสดิการต่างๆ และค่าเบี้ยเลี้ยงให้แก่ข้าราชการเพิ่มเติมเพื่อให้มีความครอบคลุมและเหมาะสมกับสถานการณ์เศรษฐกิจในปัจจุบัน

2. กรมส่งเสริมสหกรณ์ ควรมีการปรับปรุงกระบวนการพิจารณาเลื่อนขั้นเงินเดือนและเลื่อนตำแหน่ง อย่างยุติธรรม และมีประสิทธิภาพด้วยความเป็นธรรม

3. กรมส่งเสริมสหกรณ์ ควรมีการส่งเสริมด้านการสร้างการมีส่วนร่วมภายในองค์การในการร่วมกันกำหนดนโยบายต่างๆ รวมถึงการมีส่วนร่วมในการรับผลประโยชน์จากหน่วยงาน และร่วมกันประเมินผลของหน่วยงานให้มากยิ่งขึ้น ทำให้เกิดความรู้สึกเป็นอันหนึ่งอันเดียวกัน

ข้อเสนอแนะในการศึกษาค้นคว้าครั้งต่อไป

1. การวิจัยครั้งนี้เป็นการศึกษาเฉพาะข้าราชการของกรมส่งเสริมสหกรณ์เท่านั้น ไม่สามารถอธิบายความผูกพันของข้าราชการทั้งหมดได้ ในการวิจัยครั้งต่อไปควรเป็นการศึกษาเปรียบเทียบข้าราชการส่วนอื่นๆ ของประเทศ ซึ่งจะให้ความชัดเจนได้มากยิ่งขึ้น

2. การวิจัยในครั้งต่อไปควรมีการศึกษาตัวแปรอิสระอื่นๆ นอกจากตัวแปรในงานวิจัยครั้งนี้เพิ่มเติมเพื่อให้เกิดความสมบูรณ์มากขึ้น เช่น วัฒนธรรมขององค์การ และปัจจัยที่มีผลต่อประสิทธิภาพในการทำงาน ขวัญกำลังใจในการปฏิบัติงาน คุณภาพชีวิตในการทำงานเป็นต้น เพื่อจะได้นำปัจจัยเหล่านั้นไปปรับปรุงให้สอดคล้องกับการทำงาน อันจะเกี่ยวข้องกับความผูกพันต่อองค์การ

ความพึงพอใจที่มีต่อโครงการคนละครึ่งของประชาชน เขตตลิ่งชัน กรุงเทพมหานคร

The satisfaction to wards, The 50-50 Co-Payment Scheme of the people in Taling chan District, Bangkok.

เสนาวิท อิศรเสนา ณ อยุธยา, (Senavit Isarasena Na Ayudthaya)[1]
วัลลภ รัฐฉัตรานนท์, (Wanlop Rathachatranon)[2]

บทคัดย่อ

วัตถุประสงค์ของการวิจัยเพื่อศึกษาระดับ และเพื่อศึกษาเปรียบเทียบความพึงพอใจที่มีต่อโครงการคนละครึ่งของประชาชน เขตตลิ่งชัน กรุงเทพมหานคร

กลุ่มตัวอย่างที่ใช้ในการศึกษาคือประชาชน เขตตลิ่งชัน กรุงเทพมหานคร จำนวน 324 คน โดยใช้แบบสอบถาม การวิเคราะห์ข้อมูลใช้โปรแกรมคอมพิวเตอร์สำเร็จรูปสถิติที่ใช้ในการวิเคราะห์ ได้แก่ ค่าสถิติ ร้อยละ ค่าเฉลี่ย ค่าส่วนเบี่ยงเบนมาตรฐาน การทดสอบค่าที และการวิเคราะห์ความแปรปรวนทางเดียว ค่านัยสำคัญทางสถิติที่ใช้ในการวิเคราะห์ครั้งนี้กำหนดไว้ที่ระดับ 0.05

ผลการศึกษาค้นคว้าพบว่า ความพึงพอใจที่มีต่อโครงการคนละครึ่งของประชาชน เขตตลิ่งชัน กรุงเทพมหานคร มีระดับความพึงพอใจในระดับปานกลาง จากการทดสอบสมมติฐานพบว่า อายุ และอาชีพ อย่างมีนัยสำคัญทางสถิติที่ระดับ 0.05 ส่วนตัวแปรทางด้าน เพศ สถานภาพทางสมรส ระดับการศึกษา และรายได้ต่อเดือน ไม่มีผลต่อความพึงพอใจที่มีต่อโครงการคนละครึ่งของประชาชน อย่างมีนัยสำคัญทางสถิติที่ระดับ 0.05

คำสำคัญ : ความพึงพอใจ, โครงการคนละครึ่ง, เขตตลิ่งชัน

Abrstract

The objectives of this research were to study the level and compare of the satisfaction to wards, The 50-50 Co-Payment Scheme of the people in Taling chan District, Bangkok.

The samples composed of 324 persons people in Taling chan District, Bangkok. The data were collected by using questionnaires and analyzed by using the packaging computer program. Statistical tools employed in data analysis and presented through Percentage, Mean, Standard Deviation, t-test and One-Way ANOVA. The level of significance for statistical testing was 0.05.

The research findings are as follow. The level of the satisfaction to wards, The 50-50 Co-Payment Scheme of the people in Taling chan District, Bangkok was moderate. According to the hypothesis testing, age and occupation caused difference in the satisfaction. The level of significance for statistical testing was 0.05. However, gender, status, level of education, and income per month did not cause any difference in the satisfaction. The level of significance for statistical testing was 0.05.

Keywords: satisfaction, the 50:50 Co-Payment Scheme, taling chan District

บทนำ

ในปีพุทธศักราช 2563 ทั่วโลกรวมไปถึงประเทศไทยได้ประสบปัญหาวิกฤตการณ์ การแพร่เชื้อของโรคระบาด โดยสาเหตุหลักมาจากเชื้อไวรัสโคโรนา 2019 (COVID-19) ที่มีการแพร่เชื้ออย่างหนักจึงส่งผลให้ ทั่วทั้งโลกประเทศไทยเป็นอีกหนึ่งประเทศที่ประสบปัญหานี้เช่นเดียวกัน จึงได้มีการออกมาตรการรองรับให้สอดคล้องกับสถานการณ์การแพร่เชื้อไวรัสโคโรนา 2019 (COVID-19) รัฐบาลแต่ละประเทศทั้งนี้รวมไปถึงประเทศไทยก็พยายามคิดหาวิธีแก้ไข และรับมือกับโรคระบาดนี้เพื่อต้องการให้เศรษฐกิจของ

[1] เสนาวิท อิศรเสนา ณ อยุธยา นิสิตหลักสูตรศิลปศาสตรมหาบัณฑิต สาขารัฐศาสตร์ คณะสังคมศาสตร์ มหาวิทยาลัยเกษตรศาสตร์ (หมายเลขโทรศัพท์ 092-387-9640 E-mail: senavit.i@ku.th)

[2] อาจารย์หลักสูตรศิลปศาสตรมบัณฑิต สาขาวิชารัฐศาสตร์ มหาวิทยาลัยเกษตรศาสตร์

ประเทศ นั้นเดินหน้าต่อ คณะกรรมการโรคติดต่อแห่งชาติจึงมีการทำหนังสือออกมาด้วยปัจจุบันสถานการณ์ การแพร่ระบาดของ เชื้อไวรัสโคโรนา 2019 (COVID-19) ในประเทศไทยมีแนวโน้มเพิ่มสูงขึ้นเป็นโรคติดต่ออันตราย ซึ่งส่งผลกระทบต่อประชาชน และสภาวะเศรษฐกิจของประเทศเป็นวงกว้าง จึงให้มีการเฝ้าระวัง ซึ่งมาตรการณ์ป้องกันโรคระบาดนั้นมีอาทิเช่น เลี่ยงสถานที่เสี่ยงติดเชื้อสถานที่คนแออัดหรืออากาศถ่ายเทไม่สะดวก อยู่ห่างกัน 2 เมตร ใส่แมสก์ป้องกันอย่างถูกวิธี หมั่นล้างมือ เป็นต้น และเพื่อยับยั้งการแพร่ระบาดครั้งนี้จึงทำให้เกิดวัคซีนป้องกันเชื้อไวรัสโคโรนา 2019 (COVID-19) ในปัจจุบันในหลายๆ ประเทศรวมไปถึงประเทศไทยได้มีการรับวัคซีนกันเป็นจำนวนมาก และมีบางส่วนที่ยังไม่ได้รับวัคซีนจึงทำให้รัฐบาลนั้นต้องคิดหาวิธีไม่ให้ส่งผลกระทบต่อเศรษฐกิจภายในประเทศมากขึ้น ประเทศไทยได้ประสบปัญหาทางด้านเศรษฐกิจมาโดยตลอดไม่ว่าจะเป็นในด้านใดก็ตาม จึงส่งให้เกิดปัญหาทางด้านเศรษฐกิจ ที่ผ่านมากระทรวงต่างๆ ได้มีมาตรการออกมาเพื่อนำมารับมือกับปัญหาด้านเศรษฐกิจประเทศไทยยังคงต้องเดินหน้าต่อเพื่อให้เศรษฐกิจของประเทศนั้นมีการขยับตัวอยู่ตลอดเวลา และยังคงต้องพึ่งพาตลาดอุสาหกรรม ทั้งนี้ได้เกิดเหตุการณ์ที่ทุกคนทั้งโลกนั้นไม่ได้คาดเดาว่าเกิดการแพร่ระบาดของเชื้อไวรัสโคโรนา 2019 (COVID-19) จึงต้องวางแผน และมีการรับมือกับเชื้อไวรัสที่เกิดขึ้น เพราะเชื้อไวรัสดังกล่าวนั้นส่งผลกระทบต่อทุกประเทศ และทุกคนบนโลก รัฐบาลไทยจึงได้มีการออกนโยบายที่เป็น การช่วยเหลือประชาชน คือ **"โครงการคนละครึ่ง"** เพื่อเป็นการฟื้นฟูเศรษฐกิจของประเทศ และนำมาดูแลประชาชนให้ครอบคลุมทุกกลุ่ม โดยเฉพาะผู้ที่มีรายได้น้อย ที่มีการออกแบบมาให้ผู้ได้รับประโยชน์เป็นร้านค้าขนาดเล็ก และให้แก่ประชาชนทั่วไป ซึ่งช่วยลดภาระค่าใช้จ่ายให้ประชาชนที่เข้าร่วมโครงการ และกระตุ้นให้มีการจับจ่าย ใช้สอยมากขึ้น แต่ข้อจำกัดของโครงการคือ ประชาชนที่ลงทะเบียนไม่ทัน และผู้ที่ไม่มีสมาร์ทโฟน ไม่สามารถเข้าถึงโครงการได้ สำหรับโครงการคนละครึ่งมีระบบการใช้จ่ายผ่านแอปพลิเคชั่น "เป๋าตัง" และ "ถุงเงิน" ที่มีการยืนยันตัวตนเพื่อประโยชน์แก่ผู้ใช้ให้มั่นใจว่าไม่มีผู้อื่นมาใช้สิทธิแทน และมีการใช้จ่ายจริงตามวัตถุประสงค์ของโครงการซึ่งระบบดังกล่าวเป็นการสร้างการเรียนรู้ให้กับประชาชนทุกระดับจนถึงระดับฐานรากให้สามารถใช้ประโยชน์จากเทคโนโลยี เพื่อลดความเหลื่อมล้ำ และพัฒนาให้สังคมไทยเดินหน้าสู่ Digital Society ไปพร้อมๆ กัน ในขณะเดียวกันยังเป็นการลดการใช้เงินสด ทำให้การดำเนินโครงการนั้นเต็มไปด้วยความโปร่งใส รวดเร็ว และมีประสิทธิภาพมากขึ้น

กรุงเทพมหานครนั้นขึ้นชื่อว่าเป็นเมืองหลวงของประเทศไทยซึ่งมีประชากรประมาณ 5.59 ล้านคน ซึ่งมีประชากรเยอะที่สุดเป็นอับดับ 1 ของประเทศ ประชาชนหลั่งไหลเข้ามาทำงานในกรุงเทพมหานครเป็นจำนวนมาก ทำให้เศรษฐกิจของกรุงเทพมหานครนั้นค่อนข้างที่จะเติบโตไม่ว่าจะเป็นร้านค้าขนาดใหญ่ไปจนถึงร้านค้าขนาดเล็ก มีการจับจ่ายใช้สอยเป็นจำนวนมาก และร้านค้าในกรุงเทพมหานครมีการรองรับสำหรับการใช้โครงการคนละครึ่งมีมากถึง 200,982 ร้านค้า เพื่อให้ประชาชนเข้าถึงการจับจ่ายใช้สอยได้ง่ายสำหรับผู้ค้ารายย่อย และในพื้นที่แขวงคลองชักพระ เขตตลิ่งชัน เป็นอีกหนึ่งพื้นที่ ที่มีเล็กแต่มีความหนาแน่นของประชากรมากที่สุดในเดือนธันวาคม 2564 ในแขวงคลองชักพระ เขตตลิ่งชัน นั้นได้มีตลาดน้ำตลิ่งชัน และตลาดคลองสองน้ำ เป็นพื้นที่ที่น่าสนใจเพราะพื้นที่นี้ยังคงเรียกว่าเป็นตลาดน้ำที่มีอยู่ในกรุงเทพมหานครเป็นพื้นที่ที่ให้ประชาชนหรือ คนในชุมชนได้เข้ามาค้าขายจึงทำให้เกิดเป็นแหล่งท่องเที่ยว ทำให้เป็นการกระตุ้นเศรษฐกิจไปในตัว

ในการใช้โครงการคนละครึ่งในครั้งนี้ มีปัญหาเกี่ยวกับการใช้งานเทคโนโลยี และแอพพลิเคชั่น ประชาชนที่ได้เข้ามาลงทะเบียนใช้สิทธิโครงการคนละครึ่งนั้น มีทั้งนิสิตนักศึกษา จนกระทั่งผู้สูงวัย ซึ่งมีอายุเกิน 61 ปีขึ้นไป จึงอาจจะส่งผลกระทบต่อการใช้งานในโครงการคนละครึ่ง การนำแอพพลิเคชั่นเป๋าตังมาเป็นตัวกลางในการใช้จ่ายนั้น อาจจะนำมาซึ่งปัญหาหลายด้าน เช่น การลงทะเบียนขอรับสิทธิโครงการคนละครึ่ง การยืนยันตัวตนผ่านแอพพลิเคชั่น และอีกทั้งต้องเติมเงินเข้าไปก่อนที่จะนำมาใช้ในการจับจ่ายซื้อของ ในปัญหาส่วนนี้อาจจะทำให้เกิดปัญหาต่อผู้สูงวัย หรือคนหลายกลุ่มตามมา

ในส่วนของความพึงพอใจที่มีต่อโครงการคนละครึ่งของประชาชน เขตตลิ่งชัน กรุงเทพมหานคร ในส่วนของนโยบายโครงการคนละครึ่งนั้นเป็นการส่งเสริมเศรษฐกิจเพื่อกระตุ้นเศรษฐกิจของประเทศ ซึ่งเป็นการลดภาระค่าใช้จ่ายของประชาชนภายในประเทศ ดังนั้นผู้วิจัยมีความประสงค์ที่ทำการศึกษาเกี่ยวกับความพึงพอใจที่มีต่อโครงการคนละครึ่งของประชาชน เขตตลิ่งชัน กรุงเทพมหานคร ว่าประชาชนมีความพึงพอใจต่อนโยบายของรัฐบาลในโครงการ คนละครึ่ง มากน้อยเพียงใดเพื่ออาจจะเป็นข้อมูลเพื่อที่จะนำไปต่อยอดในโครงการอื่น ๆ ในรัฐบาลต่อไป

วัตถุประสงค์ของการวิจัย

1. เพื่อศึกษาระดับความพึงพอใจที่มีต่อโครงการคนละครึ่งของประชาชน เขตตลิ่งชัน กรุงเทพมหานคร
2. เพื่อศึกษาเปรียบเทียบความพึงพอใจที่มีต่อโครงการคนละครึ่งของประชาชน เขตตลิ่งชัน กรุงเทพมหานคร จำแนกตามปัจจัยส่วนบุคคล

วิธีการวิจัย

การวิจัยนี้เป็นการศึกษาความพึงพอใจที่มีต่อโครงการคนละครึ่งของประชาชน เขตตลิ่งชัน กรุงเทพมหานคร โดยศึกษาถึงปัจจัยด้านบุคคล และความพึงพอใจที่มีต่อโครงการคนละครึ่งของประชาชน เขตตลิ่งชัน กรุงเทพมหานคร ผู้ศึกษาได้กำหนดขนาดของกลุ่มตัวอย่างโดยใช้โปรแกรมสำเร็จรูป G*Power ได้จำนวนตัวอย่างเท่ากับ 324 คน สถิติที่ใช้ในการวิจัย ได้แก่ ค่าสถิติร้อยละ (Percentage) และค่าเฉลี่ย (Mean) ทดสอบความแตกต่างของค่าเฉลี่ยของกลุ่มตัวอย่าง 2 กลุ่ม ใช้การทดสอบค่าที (t – test) ทดสอบความแตกต่างของค่าเฉลี่ยของกลุ่มตัวอย่างตั้งแต่ 3 กลุ่มขึ้นไปเป็น การวิเคราะห์การแปรปรวนทางเดียว (One-way ANOVA) และทดสอบความแตกต่างรายคู่โดยวิธีของ (Fisher's Least Significance Difference : LSD) ใช้ทดสอบความสัมพันธ์ของความพึงพอใจที่มีต่อโครงการคนละครึ่งของประชาชน เขตตลิ่งชัน กรุงเทพมหานคร โดยกำหนดค่านัยสำคัญทางสถิติไว้ที่ใช้ในการวิเคราะห์ครั้งนี้กำหนดไว้ที่ระดับ 0.05

ผลการวิจัย

ข้อมูลส่วนใหญ่ของกลุ่มตัวอย่าง พบว่า กลุ่มตัวอย่างส่วนมากประกอบด้วย เพศ ชาย คิดเป็นร้อยละ 55.6 มีอายุ 41 – 50 ปี คิดเป็นร้อยละ 27.8 มีสถานภาพ สมรส คิดเป็นร้อยละ 58.0 มีระดับการศึกษา ปวส./อนุปริญญา คิดเป็นร้อยละ 38.6 มีอาชีพประกอบธุรกิจส่วนตัว/ค้าขาย คิดเป็นร้อยละ 29.9 มีรายได้ต่อ 20,001 – 30,000 บาท คิดเป็นร้อยละ 34.9 ระดับความพึงพอใจที่มีต่อโครงการคนละครึ่ง แสดงให้เห็นว่าประชาชนนั้น มีความพึงพอใจต่อโครงการคนละครึ่งอยู่ในระดับ ปานกลาง โดยมีค่าเฉลี่ย 3.01

เมื่อทดสอบสมมติฐานที่ตั้งไว้ 6 สมมติฐาน โดยทดสอบความสัมพันธ์ และเปรียบเทียบความแตกต่างระหว่างตัวแปรอิสระ ได้แก่ เพศ อายุ สถานภาพสมรส ระดับการศึกษา อาชีพ และรายได้ต่อเดือน ส่วนตัวแปรตาม ได้แก่ ความพึงพอใจที่มีต่อโครงการคนละครึ่งของประชาชน เขตตลิ่งชัน กรุงเทพมหานคร สามารถสรุปได้ดังนี้

ตารางที่ 1 สรุปผลการทดสอบสมมติฐาน

ตัวแปรอิสระ	เป็นไปตามสมมติฐาน	ไม่เป็นไปตามสมมติฐาน
1. เพศ		√
2. อายุ	√	
3. สถานภาพสมรส		√
4. ระดับการศึกษา		√
5. อาชีพ	√	
6. รายได้ต่อเดือน		√

โดยกำหนดระดับนัยสำคัญทางสถิติที่ใช้ในการทดสอบไว้ที่ระดับ 0.05

อภิปายผล

จากตารางทดสอบสมมติฐานที่ตั้งไว้ 6 สมมติฐาน ผลปรากฏว่า

สมมติฐานที่ 1 ประชาชนที่มีเพศต่างกัน มีความพึงพอใจต่อโครงการคนละครึ่งไม่แตกต่างกัน ซึ่งไม่เป็นไปตามสมมติฐานที่ตั้งไว้ ซึ่งสอดคล้องกับงานวิจัยของ อมรรัตน์ บุญผา (2557) ศึกษาเรื่อง "ความพึงพอใจของประชาชนต่อคุณภาพการบริการของเทศบาล ตำบลพะวา อำเภอแก่งหางแมว จังหวัดจันทบุรี" วิเนตร สุขสวัสดิ์เสรีกุล (2559) ศึกษาเรื่อง "ความพึงพอใจของประชาชนที่มีต่อการบริหารงาน การจัดการสำนักงานที่ดินจังหวัดชลบุรี" และ วัชรี รักษา (2562) ศึกษาเรื่อง "การศึกษาปัจจัยที่มีผลต่อความพึงพอใจของประชาชนต่อการใช้บริการ เทศบาลตำบลไม้ยา อ.พญาเม็งราย จ.เชียงราย"

สมมติฐานที่ 2 ประชาชนที่มีอายุต่างกัน มีความพึงพอใจต่อโครงการคนละครึ่ง แตกต่างกัน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้ ซึ่งสอดคล้องกับงานวิจัยของ จารุวิทย์ ศิริพรรญปัญญา (2564) ศึกษาเรื่อง "ความพึงพอใจของประชาชนต่อโครงการบัตรสวัสดิการแห่งรัฐในเขตจังหวัดมหาสารคาม" นิธิพร คงแก้ว (2561) ศึกษาเรื่อง "ความพึงพอใจของประชาชนที่มีต่อการใช้บัตรสวัสดิการแห่งรัฐในพื้นที่อำเภอเมืองจังหวัดตรัง" ชนะดา วีระพันธ์ (2554) ศึกษาเรื่อง "ความพึงพอใจของประชาชนต่อการบริการ อบต.บ้านเก่า อ.พานทอง จ.ชลบุรี" และ วิเนตร สุขสวัสดิ์เสรีกุล (2559) ศึกษาเรื่อง "ความพึงพอใจของประชาชนที่มีต่อการบริหารงาน การจัดการสำนักงานที่ดินจังหวัดชลบุรี"

สมมติฐานที่ 3 ประชาชนที่มีสถานภาพสมรสต่างกัน มีความพึงพอใจต่อโครงการ ไม่แตกต่างกัน ซึ่งไม่เป็นไปตามสมมติฐานที่ตั้งไว้ ซึ่งสอดคล้องกับงานวิจัยของ วิเนตร สุขสวัสดิ์เสรีกุล (2559) ศึกษาเรื่อง “ความพึงพอใจของประชาชนที่มีต่อการบริหารงาน การจัดการสำนักงานที่ดินจังหวัดชลบุรี” และ วัชรี รักษา (2562) ศึกษาเรื่อง “การศึกษาปัจจัยที่มีผลต่อความพึงพอใจของประชาชนต่อการใช้บริการ เทศบาลตำบลไม้ยา อ.พญาเม็งราย จ.เชียงราย”

สมมติฐานที่ 4 ประชาชนที่มีระดับการศึกษาต่างกัน มีความพึงพอใจต่อโครงการคนละครึ่ง ไม่แตกต่างกัน ซึ่งไม่เป็นไปตามสมมติฐานที่ตั้งไว้ ซึ่งสอดคล้องกับงานวิจัยของ จารุวิทย์ ศิริพรรญปัญญา (2564) ศึกษาเรื่อง “ความพึงพอใจของประชาชนต่อโครงการบัตรสวัสดิการแห่งรัฐในเขตจังหวัดมหาสารคาม” วิเนตร สุขสวัสดิ์เสรีกุล (2559) ศึกษาเรื่อง “ความพึงพอใจของประชาชนที่มีต่อการบริหารงาน การจัดการสำนักงานที่ดินจังหวัดชลบุรี” และ วัชรี รักษา (2562) ศึกษาเรื่อง “การศึกษาปัจจัยที่มีผลต่อความพึงพอใจของประชาชนต่อการใช้บริการ เทศบาลตำบลไม้ยา อ.พญาเม็งราย จ.เชียงราย”

สมมติฐานที่ 5 ประชาชนที่มีอาชีพต่างกัน มีความพึงพอใจต่อโครงการคนละครึ่ง แตกต่างกัน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้ ซึ่งสอดคล้องกับงานวิจัยของ จารุวิทย์ ศิริพรรญปัญญา (2564) ศึกษาเรื่อง “ความพึงพอใจของประชาชนต่อโครงการบัตรสวัสดิการแห่งรัฐในเขตจังหวัดมหาสารคาม” นิธิพร คงแก้ว (2561) ศึกษาเรื่อง “ความพึงพอใจของประชาชนที่มีต่อการใช้บัตรสวัสดิการแห่งรัฐในพื้นที่อำเภอเมืองจังหวัดตรัง” ชนะดา วีระพันธ์ (2554) ศึกษาเรื่อง “ความพึงพอใจของประชาชนต่อการบริการ อบต.บ้านเก่า อ.พานทอง จ.ชลบุรี” รุ่งทิพย์ บุตรดี (2556) ศึกษาเรื่อง “ความพึงพอใจของประชาชนที่มีต่อบริการสวัสดิการสังคมของเทศบาลตำบลกะเปาะ อำเภอกะเปาะ จังหวัดระนอง” และ วัชรี รักษา (2562) ศึกษาเรื่อง “การศึกษาปัจจัยที่มีผลต่อความพึงพอใจของประชาชนต่อการใช้บริการ เทศบาลตำบลไม้ยา อ.พญาเม็งราย จ.เชียงราย”

สมมติฐานที่ 6 ประชาชนที่มีรายได้ต่อเดือนต่างกัน มีความพึงพอใจต่อโครงการคนละครึ่งของประชาชน แตกต่างกัน ซึ่งเป็นไปตามสมมติฐานที่ตั้งไว้ ซึ่งสอดคล้องกับงานวิจัยของ จารุวิทย์ ศิริพรรญปัญญา (2564) ศึกษาเรื่อง “ความพึงพอใจของประชาชนต่อโครงการบัตรสวัสดิการแห่งรัฐในเขตจังหวัดมหาสารคาม” และ วิเนตร สุขสวัสดิ์เสรีกุล (2559) ศึกษาเรื่อง “ความพึงพอใจของประชาชนที่มีต่อการบริหารงาน การจัดการสำนักงานที่ดินจังหวัดชลบุรี”

ข้อเสนอแนะจากการวิจัย

จากผลการวิจัยพบว่า ความพึงพอใจที่มีต่อโครงการคนละครึ่ง แสดงให้เห็นว่าประชาชนนั้นมีความพึงพอใจต่อโครงการคนละครึ่งอยู่ในระดับ ปานกลาง แสดงให้เห็นว่า ประชาชนนั้นให้ความสำคัญกับโครงการที่ประชาชนนั้นได้รับ ซึ่งเป็นสิ่งที่จะช่วยในการกระตุ้นเศรษฐกิจ เพื่อจะบรรเทาผลกระทบที่เกิดมาจาก สถานการณ์การแพร่เชื้อไวรัสโคโรนา 2019 (COVID-19) รัฐบาลได้หาทางออกให้กับประเทศโดยมีการจัดทำโครงการคนละครึ่งขึ้นมาเพื่อที่จะให้ประชาชนนั้น ได้จับจ่ายใช้สอย การที่มีโครงการคนละครึ่งนั้นได้ทำให้ประชาชนนั้นมี ความพึงพอใจอยู่ในระดับ ปานกลาง เท่านั้น ผู้ศึกษาค้นคว้าข้อเสนอแนะ ดังนี้

1. โครงการคนละครึ่งนั้นเป็นนโยบายของรัฐบาล ที่เกิดขึ้นมาเพื่อกระตุ้นเศรษฐกิจ ที่ได้รับผลกระทบที่เกิดมาจากสถานการณ์การแพร่เชื้อไวรัสโคโรนา 2019 (COVID-19) ซึ่งโครงการคนละครึ่งในแต่ละรอบนั้นได้รับผลตอบรับจากประชาชนเป็นอย่างมากมีประชาชนเข้ามาใช้งานเต็มจำนวนที่เปิดให้ใช้งานในแต่ละรอบ แต่โครงการคนละครึ่งที่เกิดขึ้นนั้นรัฐบาลอาจจะยังแก้ไขปัญหาได้อย่างไม่ตรงจุดมากเท่าที่ควร จึงทำให้ผลลัพธ์ออกมาได้ไม่ดีเท่าที่ควรจะเป็น ประชาชนควรมีสิทธิ และควรมีตัวเลือกที่จะให้มีนโยบายที่ประชาชนจะได้รับอย่างตรงจุดมากกว่านี้ เพื่อช่วยเศรษฐกิจของประเทศนั้นเดินหน้าต่อ แม้จะเกิดปัญหาที่ไม่คาดคิดก็ตามในภายภาคหน้า

2. ในการที่จะใช้แอพพลิเคชั่น เข้ามาเป็นตัวกลางในการใช้โครงการคนละครึ่งนั้น ควรคำนึงถึงผู้สูงอายุ ที่มีปัญหาในเรื่องของการใช้ เทคโนโลยี หรือแอพพลิเคชั่นใหม่ ๆ เพราะผู้สูงอายุเหล่านี้อาจจะมีปัญหาในเรื่องของสายตา ขนาดตัวหนังสือ ในแอพพลิเคชั่น จึงอาจส่งผลกระทบที่มีความยุ่งยากต่อการใช้งานในผู้สูงวัย

บทคัดย่อ

การศึกษาครั้งนี้มีวัตถุประสงค์เพื่อ 1)พัฒนาระบบการจัดการทรัพย์สินคงคลัง กรณีศึกษาบริษัท เคซีอี อีเลคโทรนิคส์ จำกัด (มหาชน) 2)ประเมินความพึงพอใจของผู้ใช้ระบบการจัดการทรัพย์สินคงคลัง ผู้วิจัยศึกษาขั้นตอนของการจัดการข้อมูลทรัพย์สินในคลังไม่ตรงกับความต้องการของผู้ประกอบการทำให้เกิดความล่าช้าและซ้ำซ้อนในการเบิกจ่ายอุปกรณ์เพื่อใช้ในการทำงาน จึงนำข้อมูลและปัญหาที่เกิดขึ้นมาพัฒนาระบบ โดยเครื่องมือที่ใช้ในการพัฒนาเว็บไซต์คือโปรแกรม Visual Studio Code และใช้ระบบจัดการฐานข้อมูล PHP ผลการวิจัยพบว่าผู้ตอบแบบสอบถามส่วนใหญ่มีความพึงพอใจในการใช้ระบบการจัดการทรัพย์สินคงคลัง กรณีศึกษาบริษัท เคซีอี อีเลคโทรนิคส์ จำกัด (มหาชน) ด้านการออกแบบมีความพึงพอใจอยู่ในระดับมากที่สุด ($\bar{X}$ = 4.67, S.D. = 0.06) และมีความพึงพอใจด้านการนำไปประโยชน์อยู่ในระดับมากที่สุด ($\bar{X}$ = 4.66, S.D. = 0.06) โดยภาพรวมความพึงพอใจของพนักงานในการใช้งานระบบอยู่ในระดับมากที่สุด การนำระบบนี้เข้ามาช่วยการจัดการข้อมูลทรัพย์สินคงคลัง ทำให้การตรวจสอบข้อมูลทรัพย์สินในบริษัทเป็นไปได้อย่างรวดเร็วถูกต้องแม่นยำ และสามารถนำไปใช้ประโยชน์ได้จริง

คำสำคัญ: ทรัพย์สินคงคลัง ระบบการจัดการ

Abstract

This study aims to 1) Develop inventory management system Case study of KCE Electronics Public Company Limited 2) Evaluate the satisfaction of users of the inventory management system. The researcher studied the process of asset data management in the warehouse. Does not meet the needs of operators, causing delays and repetitions in disbursing equipment for use in work Therefore bring information and problems that arise to develop the system. The tool used for website development is the Visual Studio Code program and using PHP database management system. The results showed that most of the respondents were satisfied with using the inventory management system. A case study of KCE Electronics Public Company Limited in terms of design satisfaction at the highest level. ($\bar{X}$ = 4.67, S.D. = 0.06) and are satisfied the aspect of utilization was at the highest level. ($\bar{X}$ = 4.66, S.D. = 0.06) overall, employees' satisfaction in using the system was at the highest level. Bringing this system to help manage inventory data Makes it possible to check the property information in the company quickly and accurately. and can be put to good use.

บทนำ

ในปัจจุบันเทคโนโลยีได้เข้ามามีบทบาทอย่างมากซึ่งมีคอมพิวเตอร์ เข้าไปเกี่ยวข้องให้เห็นอยู่ตลอดเวลาและเทคโนโลยีสารสนเทศมีความสำคัญต่อการทำงานในชีวิตประจำวันเป็นอย่างมากเพราะทำให้เกิดความสะดวกและความรวดเร็วในการดำเนินกิจกรรมต่าง ๆ เทคโนโลยีสารสนเทศที่นำมาใช้งานธุรกิจ สามารถใช้ได้ทั้งธุรกิจขนาดเล็กไปจนถึงธุรกิจขนาดใหญ่ และในการทำธุรกิจที่มีการจัดการทรัพย์สินคงคลัง (Inventory Management) หมายถึง การจัดการปริมาณสินค้าที่หมุนเวียนในธุรกิจที่เกี่ยวข้องกับการผลิตหรือการขายสามารถดำเนินการไปได้อย่างราบรื่นการจัดเก็บสินค้าในคงคลังที่มีปริมาณมากเกินไปอาจทำให้เกิดปัญาหากับธุรกิจทางด้านต้นทุนการเก็บรักษา สินค้าเสื่อมสภาพ สินค้าอาจถูกขโมยหรือสูญหายและทำให้เสียโอกาสในการนำเงินไปใช้ประโยชน์ในด้านอื่น ๆ (ก่อเกียรติ วิริยะกิจพัฒนา และมาลัย ม่วงเทศ. 2551 : 61) ซึ่งหากไม่มีการนำเทคโนโลยีสารสนเทศมาใช้ในการจัดการทรัพย์สินจะมีความยุ่งยากอย่างมาก ทั้งในเรื่องการจัดเก็บการค้นหาข้อมูลและวัสดุอุปกรณ์ต่างๆเพราะต้องใช้เวลาในการค้นหานาน ผู้บริหารมีหน้าที่ที่สำคัญอีกประการหนึ่ง คือ การบริหารสินค้าคงคลังให้มีประสิทธิภาพ โดยต้องมีการวางแผนในการควบคุมสินค้คงคลังและดำเนินการตรวจสอบผลการปฏิบัติงานที่เกิดขึ้นจริงกับแผนที่กำหนดไว้หากไม่เป็นไปตามแผนที่วางผู้บริหารจะต้องพิจารณาหาสาเหตุและปัจจัยที่เกี่ยวข้องว่าเกิดจากสาเหตุใด และหาแนวทางแก้ไขทันทีเพื่อให้เกิดประโยชน์สูงสุดแก่ธุรกิจ การวางแผนและควบคุมสินค้าอย่างเหมาะสมทำให้ธุรกิจทราบความเคลื่อนไหวของสินค้าได้ตลอดเวลาอย่างถูกต้อง แม่นยำและรวดเร็ว ดังนั้นประโยชน์ที่ได้รับจากการบริหารสินค้าคงคลังที่มีประสิทธิภาพ (อมรศิริ ดิสสร. 2550 : 6)

จากการที่ผู้วิจัยได้ทำงานในบริษัท เคซีอี อีเลคโทรนิคส์ จำกัด (มหาชน) และได้สำรวจระบบคลังจัดเก็บวัสดุอุปกรณ์ของบริษัท จึงทราบปัญหาการบริหารสินค้าคงคลัง (Inventory Management) เป็นการจัดการต่าง ๆ เกี่ยวกับรายการสินค้าในคลังสินค้าตั้งแต่การรวบรวมจดบันทึกสินค้าเข้า – ออก การควบคุมให้มีสินค้าเหลือในปริมาณที่เหมาะสม มีระเบียบแบบแผน เพื่อให้สินค้าที่มีอยู่ตรงตามความต้องการของผู้ใช้โดยจะต้องควบคุมให้อยู่ในระดับที่เหมาะสม (ดำรงศักดิ์ ชัยสนิทและสุนีย์ เลิศแสวงกิจ. 2542 : 65) ระบบคลังจัดเก็บวัสดุอุปกรณ์ของบริษัทว่ายังเป็นรูปแบบกระดาษในการจดบันทึกเข้าออกของวัสดุในคลังจัดเก็บวัสดุอุปกรณ์ และยังประสบปัญหาทางด้านการตรวจนับวัสดุในคลังจัดเก็บวัสดุอุปกรณ์ว่ายังเหลือวัสดุอุปกรณ์จำนวนเท่าไร เพราะเวลาที่พนักงานต้องการจะเบิกวัสดุในคลังจัดเก็บวัสดุอุปกรณ์แบบด่วน แล้ววัสดุในคลังจัดเก็บวัสดุ อุปกรณ์หมดพนักงานคลังจัดเก็บวัสดุอุปกรณ์จึงเขียนรายการสั่งซื้อวัสดุอุปกรณ์ต่าง ๆ ที่หมดมาให้ทางฝ่ายจัดซื้อสั่งซื้อวัสดุอุปกรณ์แล้วต้องรอเวลาที่วัสดุอุปกรณ์ที่สั่งไปกว่าจะมาส่งจึงทำให้เวลาการทำงานล่าช้า

ดังนั้นผู้วิจัยจึงได้จัดทำวิจัยระบบการจัดการทรัพย์สินคงคลัง กรณีศึกษาบริษัท เคซีอี อีเลคโทรนิคส์ จำกัด (มหาชน) เพื่ออำนวยความสะดวกในการบันทึกรับวัสดุและอุปกรณ์เข้าออกของระบบทรัพย์สินของบริษัท สามารตรวจสอบวัสดุในคลังจัดเก็บวัสดุและอุปกรณ์ว่ามีวัสดุอุปกรณ์จำนวนเท่าไหร่ และสามารถออกรายงานการขอเบิกประจำวัน ซึ่งจะทำให้องค์กรสามารถลดระยะเวลาในการปฏิบัติงาน และเพิ่มประสิทธิภาพในการระบุรายละเอียดทรัพย์สินที่มีในคลังได้ถูกต้องและแม่นยำ

วัตถุประสงค์ของการวิจัย

1. เพื่อพัฒนาระบบการจัดการทรัพย์สินคงคลัง
2. เพื่อประเมินความพึงพอใจของผู้ใช้บริการระบบการจัดการทรัพย์สินคงคลัง

วิธีการดำเนินการวิจัย

ประชากรและกลุ่มตัวอย่างที่ใช้ในการศึกษาครั้งนี้ คือ พนักงานบริษัท เคซีอี อีเลคโทรนิคส์ จำกัด (มหาชน) แผนกสโตร์ จำนวน 6 คน

ตัวแปรที่ใช้ในการวิจัย

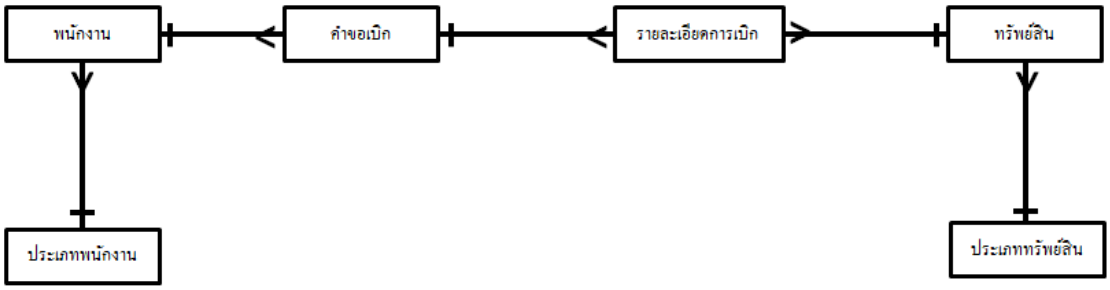
ตัวแปรอิสระ ได้แก่

1. ปัจจัยส่วนบุคคลของกลุ่มตัวอย่าง
   1.1 เพศ
   1.2 อายุ
   1.3 ระดับการศึกษา

ตัวแปรตาม ได่แก่

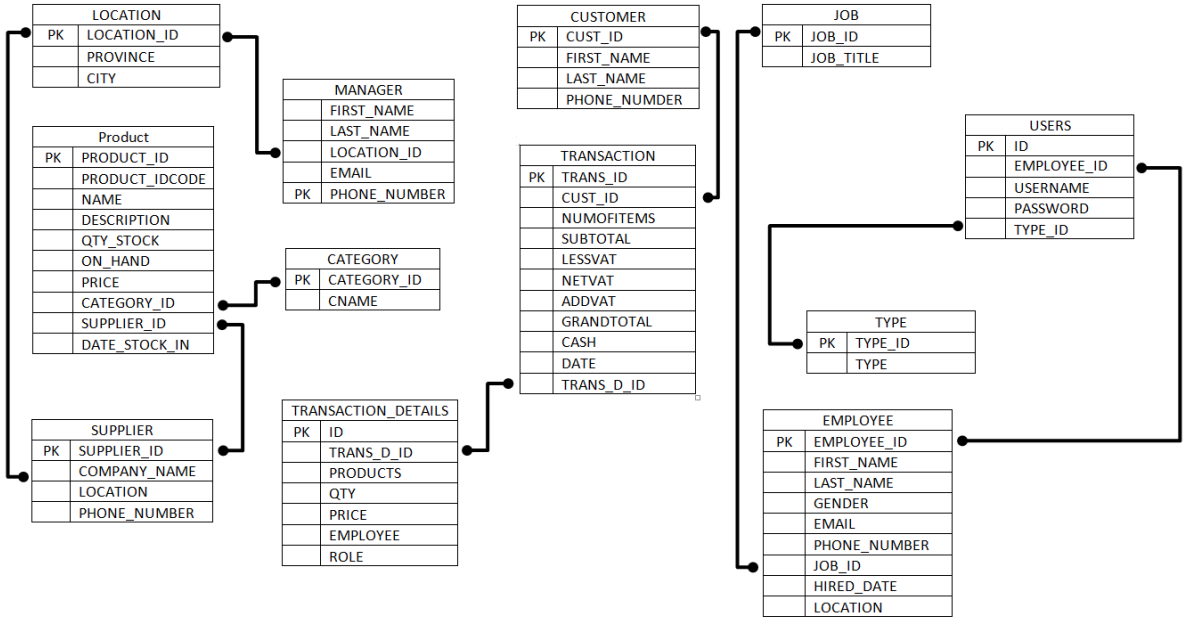
1. ความพึงพอใจของผู้ใช้บริการระบบการจัดการทรัพย์สินคงคลัง
   1.1 ด้านการออกแบบและจัดรูปแบบระบบ
   1.2 ด้านการนำไปใช้ประโยชน์

ขอบเขตการวิจัย



งานวิจัยนี้ ศึกษาเฉพาะการใช้ระบบการจัดการทรัพย์สินคงคลังของพนักงาน บริษัท เคซีอี อีเลคโทรนิคส์ จำกัด (มหาชน) แผนกสโตร์และการเพิ่มประสิทธิภาพการจัดการทรัพย์สินภายในคลัง

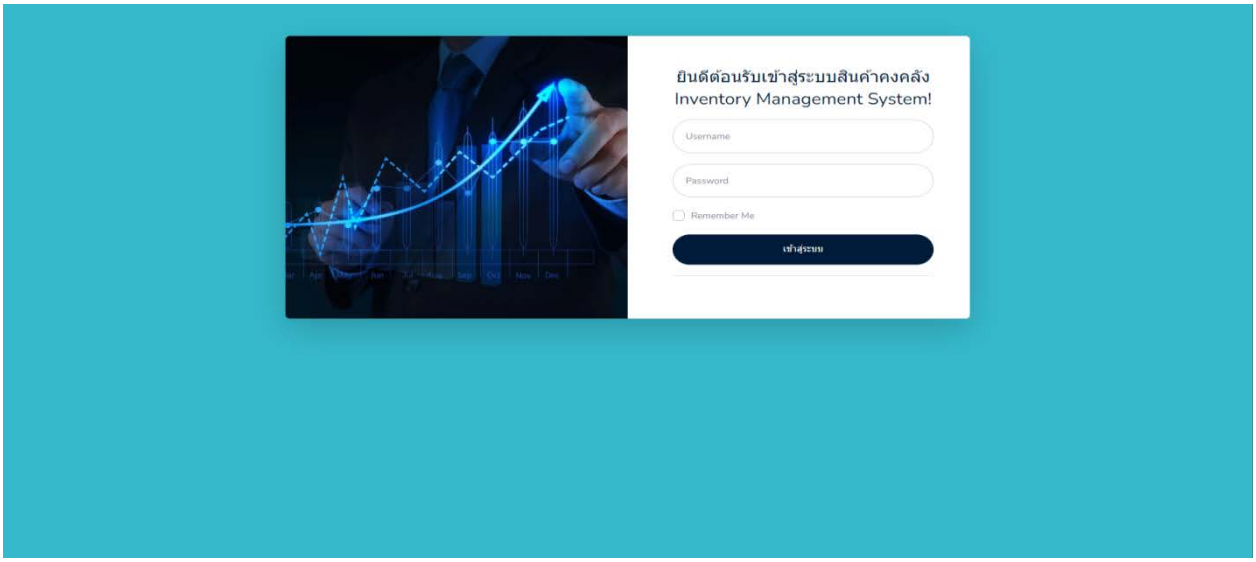
เครื่องมือที่ใช้ในการวิจัย



แบบประเมินความพึงพอใจของผู้ใช้ระบบการจัดการทรัพย์สินคงคลังกรณีศึกษาบริษัท เคซีอี อีเลคโทรนิคส์ จำกัด (มหาชน)

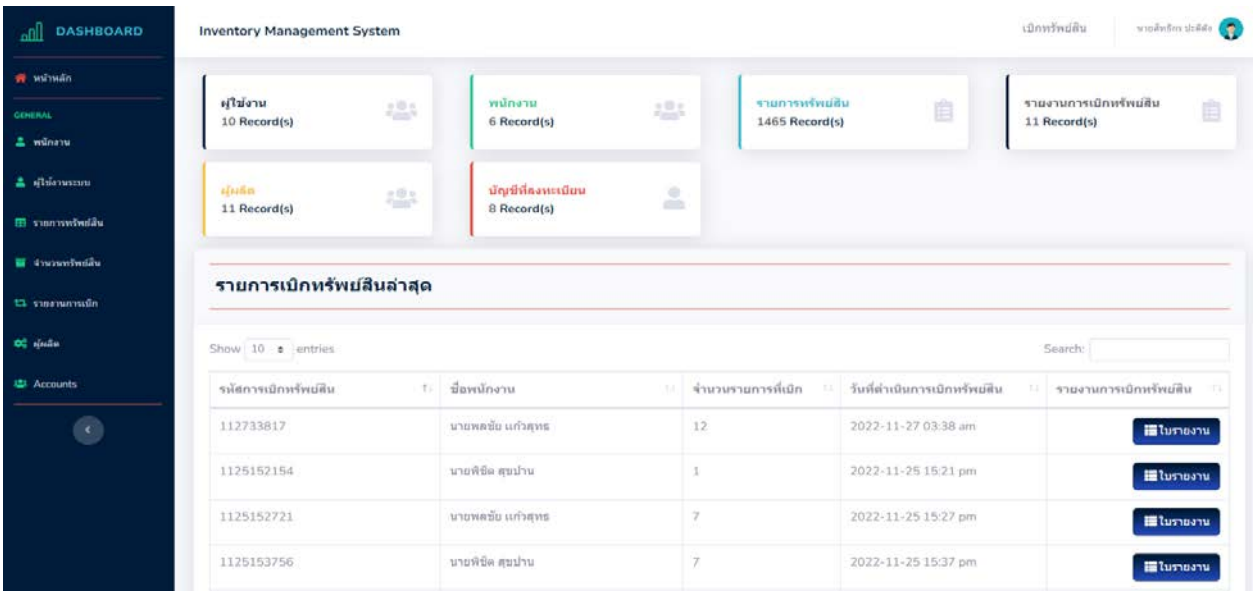
ขั้นตอนในการวิจัย

1. ศึกษาระบบงานเดิม ปัญหาในการทำงานและรวบรวมความต้องการ ศึกษาวิธีการข้อมูลต่าง ๆ ที่เกี่ยวข้องกับขั้นตอนการดำเนินงาน จัดเก็บข้อมูลทรัพย์สินในบริษัท โดยการจัดการข้อมูล การขอเบิกอุปกรณ์ รวมทั้งการออกรายงานการเบิกประจำวัน
2. การออกแบบระบบจะใช้โปรแกรม Visual Studio Code ในการออกแบบหน้าเมนูต่าง ๆ ในระบบและใช้ระบบจัดการฐานข้อมูล PHP เพื่อจัดเก็บรวบรวมข้อมูลของทรัพย์สิน
3. ออกแบบฐานข้อมูลและสร้างข้อมูลเชิงสัมพันธ์โดยมีการสร้างตามแผนภาพดังนี้



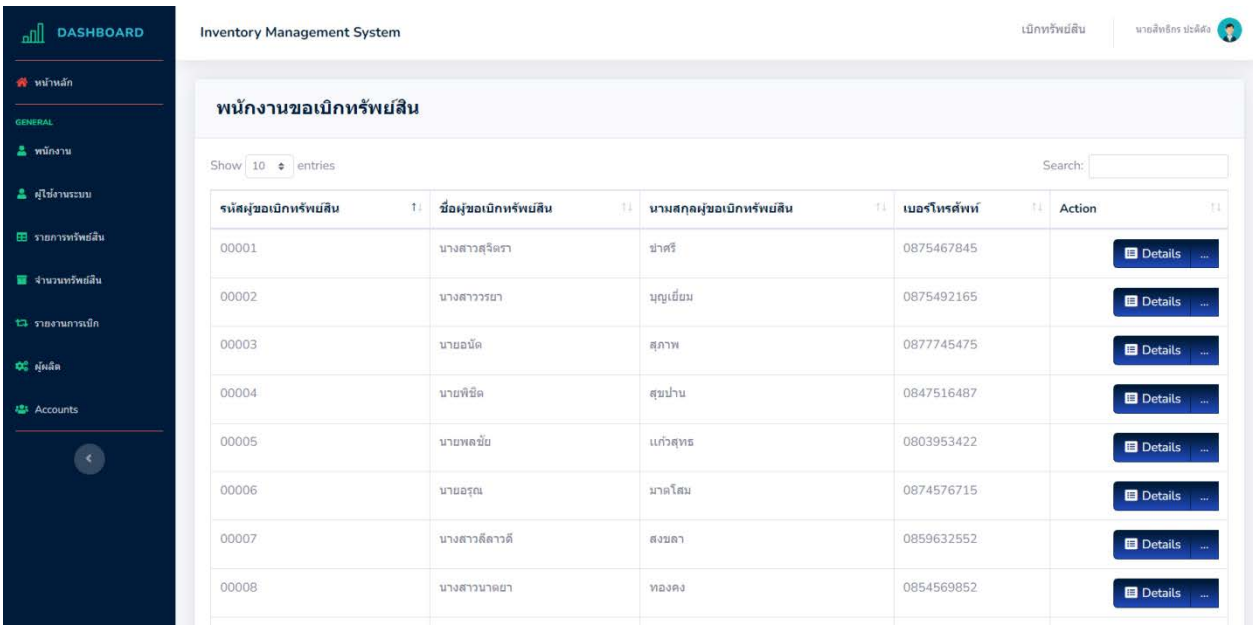
ภาพที่ 3.1 Entity-Relationship Diagram Level 0

ภาพที่ 3.2 Entity-Relationship Diagram Level 1



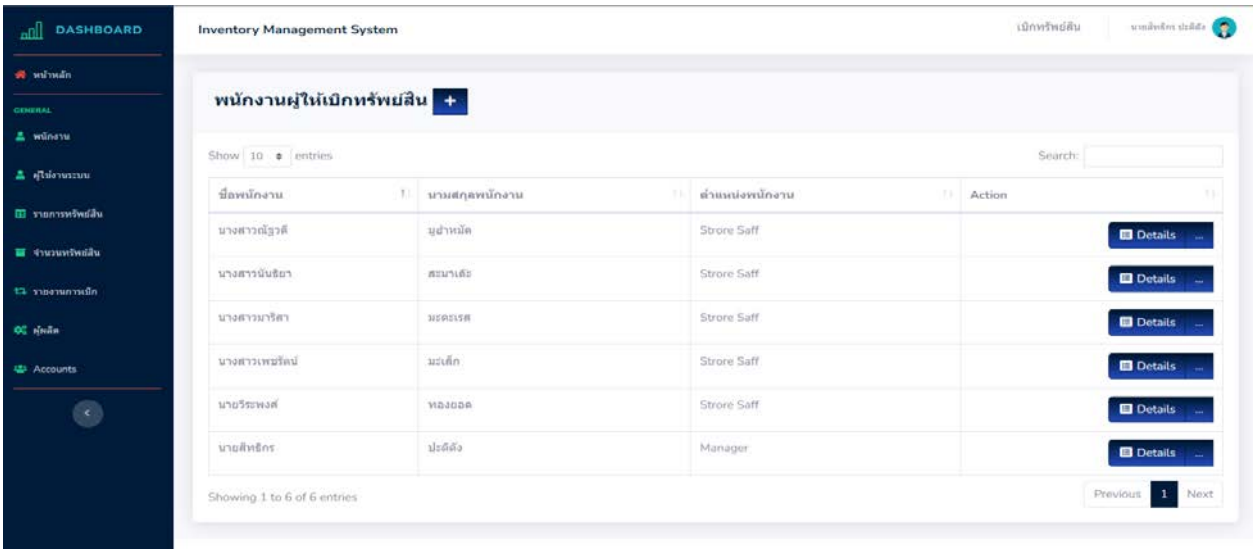
ผลการทดลอง

4.1 ผลจากการทดลองระบบการจัดการทรัพย์สินคงคลัง กรณีศึกษาบริษัท เคซีอี อีเลคโทรนิคส์ จำกัด (มหาชน)



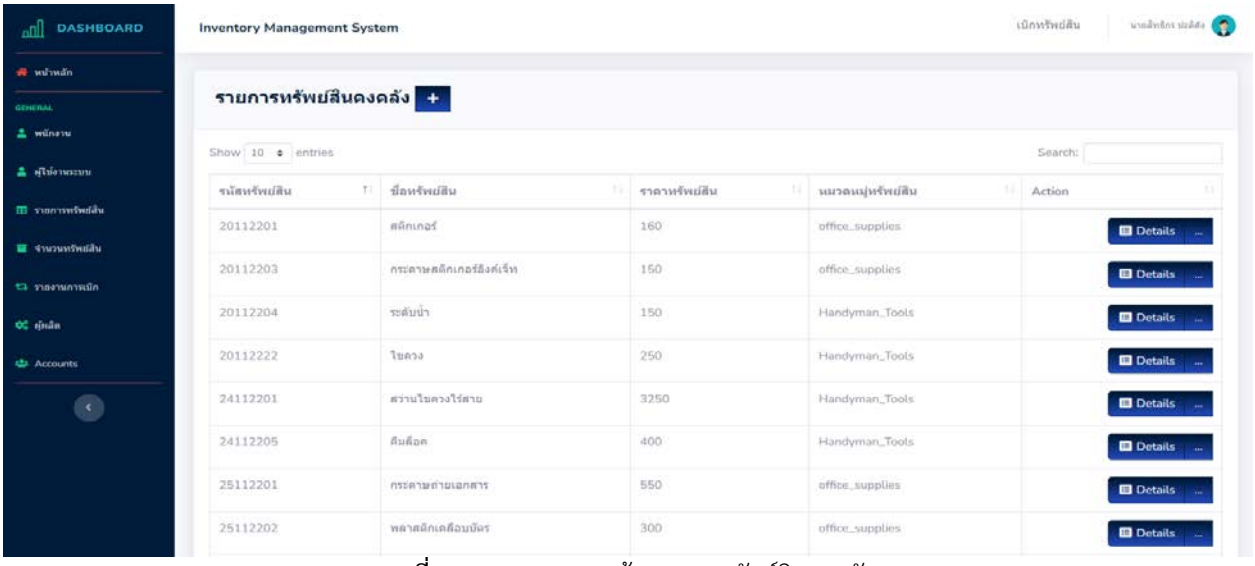
ภาพที่ 4.1.1 ภาพแสดงหน้าจอเข้าสู่ระบบของระบบ

โดยผู้ใช้งานจะต้องทำการลงชื่อเข้าใช้ระบบ โดยผู้ใช้ระบบจะแบ่งออกเป็น 2 ส่วน คือ ส่วนของตำแหน่งผู้จัดการ (Manager) จะสามารถแก้ไขและดูรายการทรัพย์สินคงคลัง จำนวนทรัพย์สินคงคลัง รายงานการเบิกทรัพย์สิน และตำแหน่งพนักงานสโตร์ (Store Staff) จะสามารถทำรายการเบิกทรัพย์สินให้กับพนักงานในบริษัทเท่านั้น



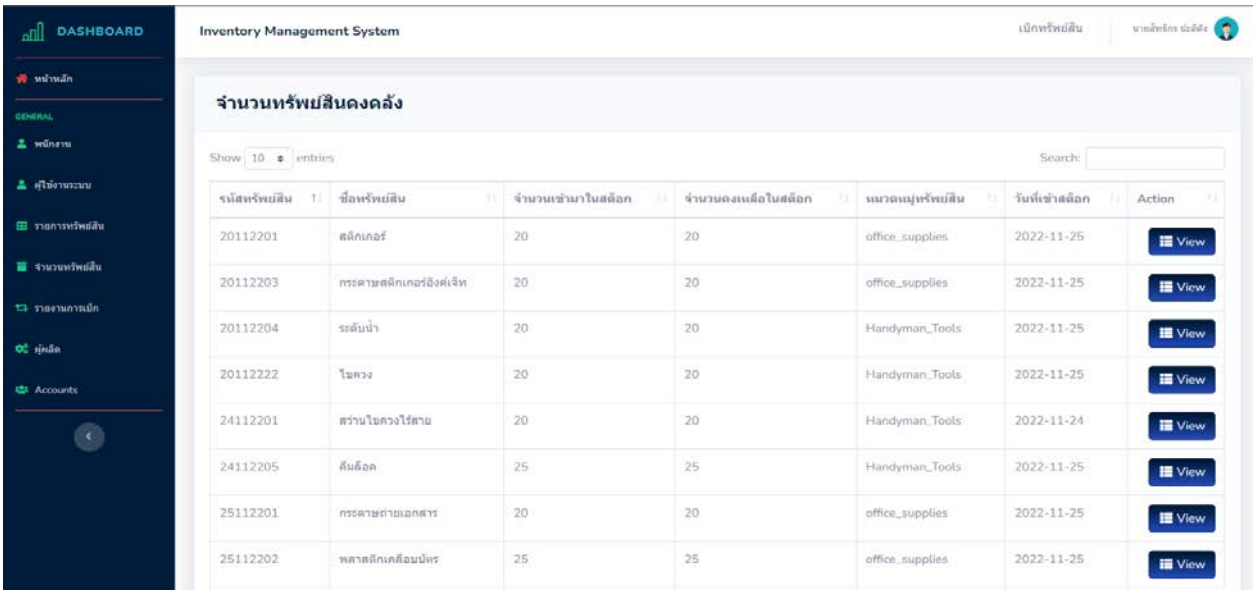
ภาพที่ 4.1.2 ภาพแสดงหน้าหลักของระบบ

โดยหน้า dashboard แสดงฟังก์ชันการทำงานต่างๆ ในกรณีที่เป็นผู้จัดการ (Manager) จะแสดงหน้าจอแสดงรายการขอเบิกทรัพย์สินล่าสุด ดังรายละเอียดต่อไปนี้ รหัสการเบิก, ชื่อพนักงานที่ขอเบิก, จำนวนรายการที่เบิก และวันที่ดำเนินการเบิก



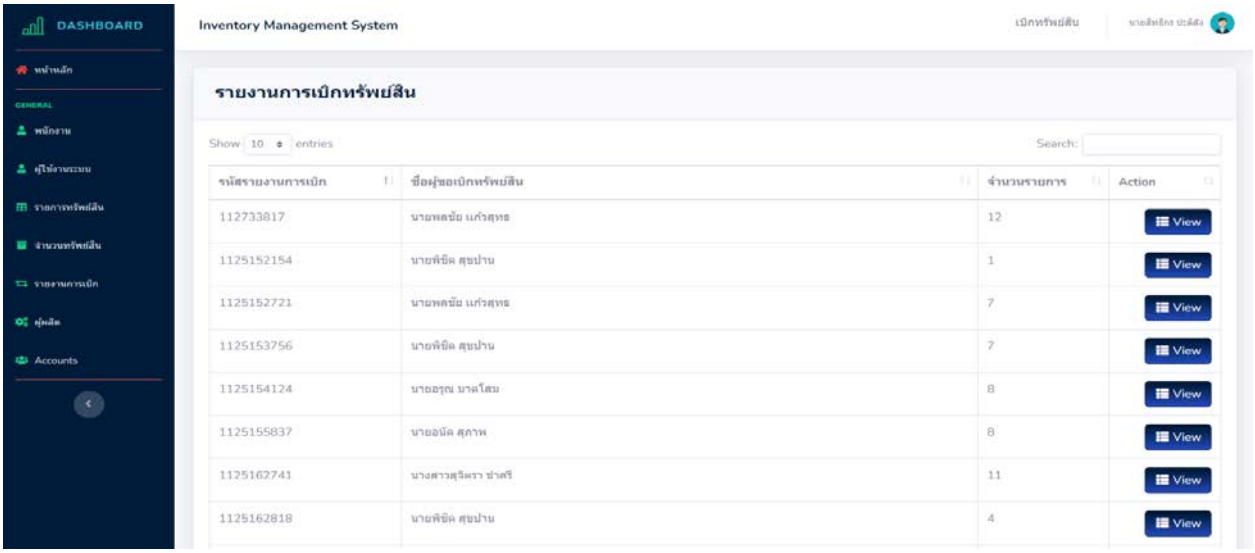
ภาพที่ 4.1.3 ภาพแสดงหน้ารายการพนักงานขอเบิกทรัพท์สิน

โดยหน้ารายการพนักงานขอเบิกทรัพย์สิน จะแสดงหน้าจอดังรายละเอียดต่อไปนี้ รหัสผู้ขอเบิกทรัพย์สิน, ชื่อผู้ขอเบิกทรัพย์สิน, นามสกุลผู้ขอเบิกทรัพย์สิน และเบอร์โทรศัพท์



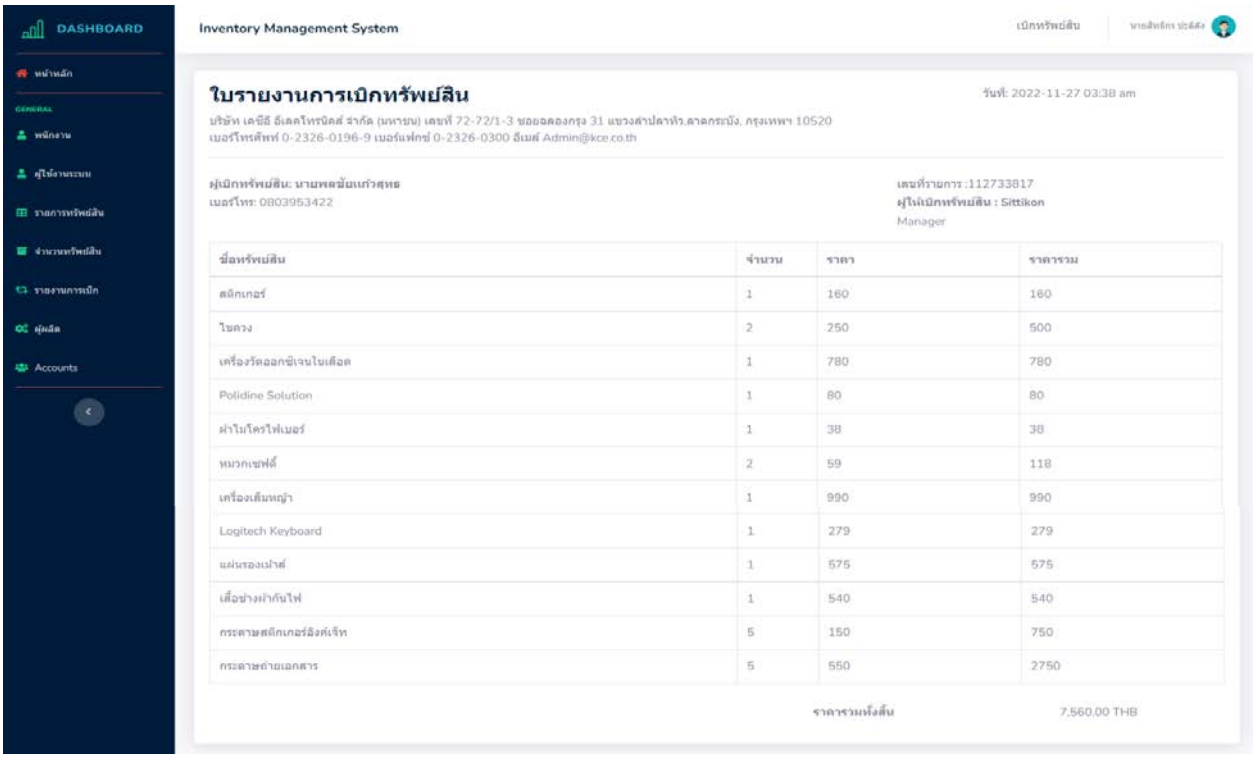
ภาพที่ 4.1.4 ภาพแสดงหน้ารายการพนักงานผู้ให้เบิกทรัพย์สิน

โดยหน้ารายการพนักงานผู้ให้เบิกทรัพย์สิน จะแสดงหน้าจอดังรายละเอียดต่อไปนี้ ชื่อพนักงาน, นามสกุลพนักงาน และตำแหน่งพนักงาน



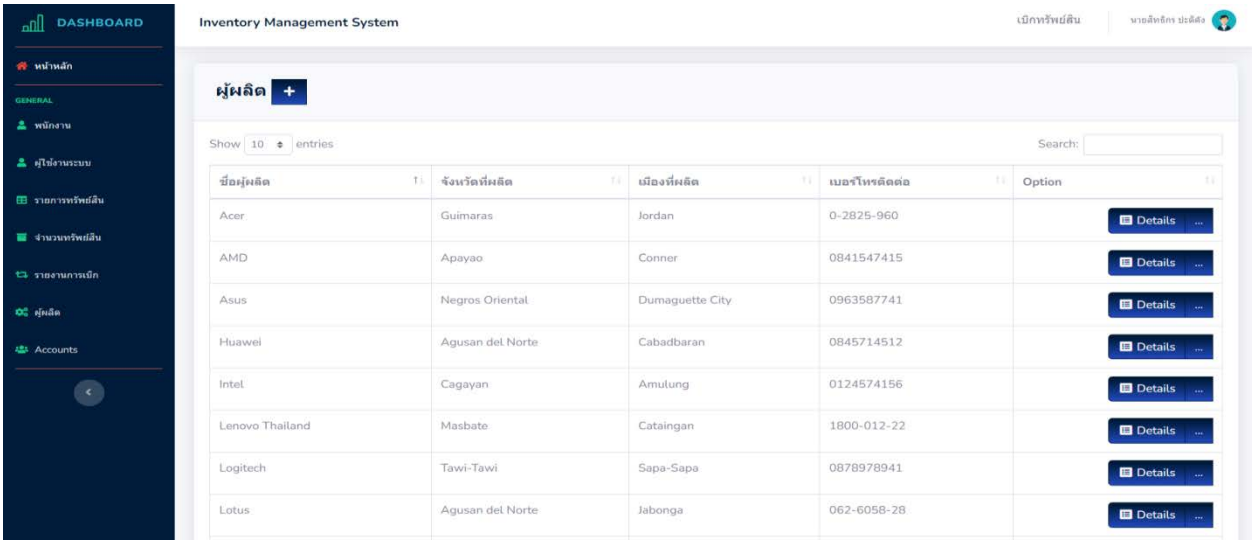
ภาพที่ 4.1.5 ภาพแสดงหน้ารายการทรัพย์สินคงคลัง

โดยหน้ารายการทรัพย์สินคงคลัง จะแสดงหน้าจอดังรายละเอียดต่อไปนี้ รหัสทรัพย์สิน, ชื่อทรัพย์สิน, ราคาทรัพย์สิน และหมวดหมู่ทรัพย์สิน



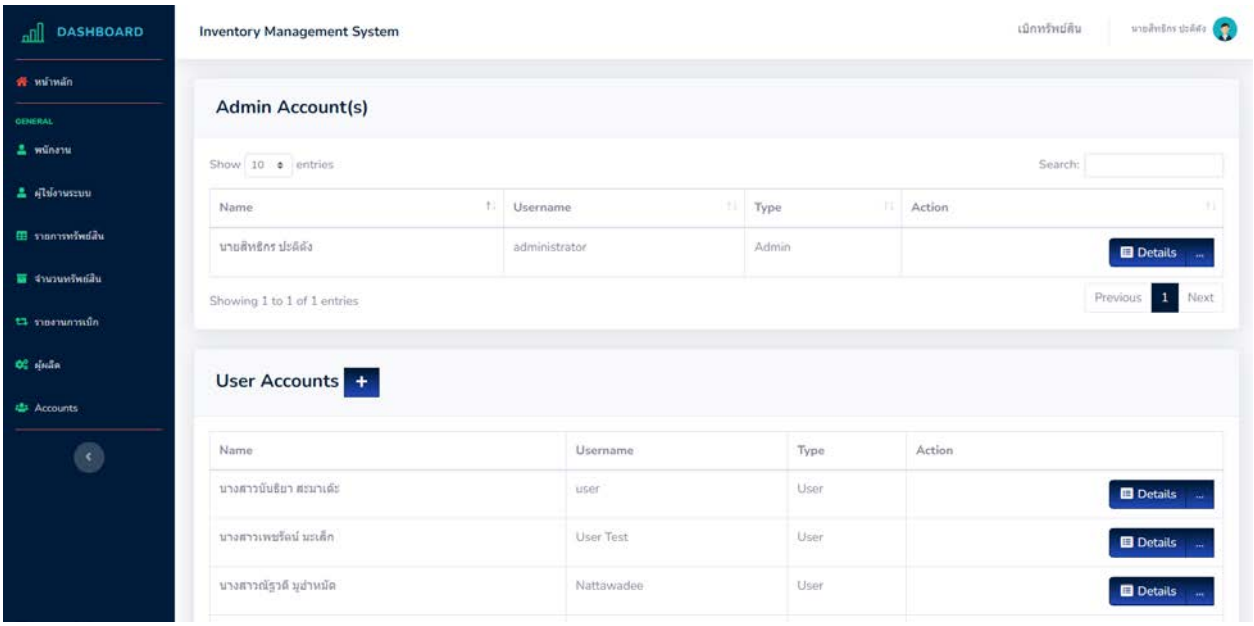
ภาพที่ 4.1.6 ภาพแสดงหน้ารายการจำนวนทรัพย์สินคงคลัง

โดยหน้ารายการจำนวนทรัพย์สินคงคลัง จะแสดงหน้าจอดังรายละเอียดต่อไปนี้ รหัสทรัพย์สิน, ชื่อทรัพย์สิน, จำนวนเข้ามาในสต๊อก, จำนวนคงเหลือในสต๊อก, หมวดหมู่ทรัพย์สิน และวันที่เข้าสต๊อก



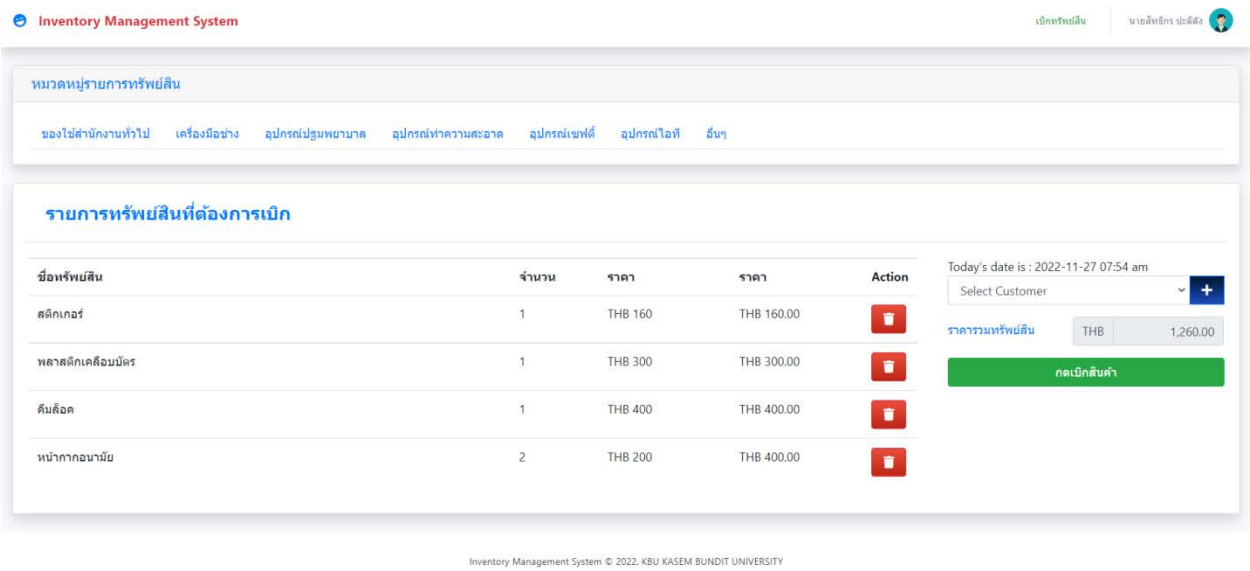
ภาพที่ 4.1.7 ภาพแสดงหน้ารายการรายงานการเบิกทรัพย์สิน

โดยหน้ารายการรายงานการเบิกทรัพย์สิน จะแสดงหน้าจอดังรายละเอียดต่อไปนี้ รหัสรายงานการเบิก, ชื่อผู้ขอเบิกทรัพย์สิน และจำนวนรายการที่ขอเบิก



ภาพที่ 4.1.8 ภาพแสดงตัวอย่างหน้าใบรายงานการเบิกทรัพย์สิน

โดยหน้าแสดงใบรายงานการเบิกทรัพย์สิน จะแสดงหน้าจอดังรายละเอียดต่อไปนี้ ชื่อผู้เบิก,เลขที่รายการ, ชื่อทรัพย์สิน, จำนวน, ราคา และราคารวมทั้งสิ้น



ภาพที่ 4.1.9 ภาพแสดงหน้ารายการผู้ผลิต

โดยหน้าแสดงรายการผู้ผลิต จะแสดงหน้าจอดังรายละเอียดต่อไปนี้ ชื่อผู้ผลิต, จังหวัดที่ผลิต, เมืองที่ผลิต และเบอร์โทรติดต่อ

ภาพที่ 4.1.10 ภาพแสดงหน้า Accounts

โดยหน้าแสดง Accounts จะแสดงหน้าจอรายละเอียดของ Admin Account และ User Accounts สำหรับการเข้าใช้งานระบบ

ภาพที่ 4.1.11 ภาพแสดงหน้าการเบิกทรัพย์สิน

โดยหน้าแสดงการเบิกทรัพย์สิน พนักงานของแผนกสโตร์ สามารถเข้าสู่ระบบและทำการเบิกทรัพย์สินตามคำร้องของพนักงานในบริษัท จะแสดงหน้าจอ หมวดหมู่รายการทรัพย์สินในคลังของบริษัท มีหมวดหมู่ดังนี้ ของใช้สำนักงานทั่วไป, เครื่องมือช่าง, อุปกรณ์ปฐมพยาบาล, อุปกรณ์ทำความสะอาด, อุปกรณ์เซฟตี้, อุปกรณ์ไอที และอื่น ๆ

4.2 ผลการประเมินความพึงพอใจของผู้ใช้ระบบการจัดการทรัพย์สินคงคลัง กรณีศึกษาบริษัท เคซีอี อีเลคโทรนิคส์ จำกัด (มหาชน) เพื่อเป็นข้อมูลในการปรับปรุงระบบให้ตรงตามความต้องการและให้มีประสิทธิภาพต่อไป

ผลการประเมินความพึงพอใจของผู้ใช้ระบบการจัดการทรัพย์สินคงคลัง กรณีศึกษาบริษัท เคซีอี อีเลคโทรนิคส์ จำกัด (มหาชน) สรุปเป็นตาราง ดังนี้

ตารางที่ 1 ด้านการออกแบบและการจัดรูปแบบระบบ

รายการประเมิน	ผลการทดสอบระบบ		ระดับความพึงพอใจ
	$\bar{X}$	S.D.	
1. การจัดรูปแบบระบบง่ายต่อการอ่านและการใช้งาน	4.83	0.41	มากที่สุด
2. หน้าโฮมเพจมีความสวยงาม มีความทันสมัย น่าสนใจ	4.33	0.52	มากที่สุด
3. สีสันในการออกแบบระบบมีความเหมาะสม	4.83	0.41	มากที่สุด
4. ขนาดตัวอักษร และรูปแบบตัวอักษร มีความสวยงามและอ่านได้ง่าย	4.67	0.52	มากที่สุด
5. การออกแบบให้ใช้งานง่าย เมนูไม่ซับซ้อน	4.50	0.55	มากที่สุด
6. ความเป็นปัจจุบันของข้อมูล	4.67	0.52	มากที่สุด
7. ความสะดวกในการใช้งานระบบ	4.50	0.55	มากที่สุด
8. ความเหมาะสมในการใช้งานระบบ	4.83	0.41	มากที่สุด
9. ความพึงพอใจในการใช้งาน	4.83	0.41	มากที่สุด
10. ตรงตามวัตถุประสงค์ที่ต้องการ	4.67	0.52	มากที่สุด
รวม	**4.67**	**0.06**	**มากที่สุด**

จากตารางที่ 1 สรุปได้ว่าผู้ตอบแบบสอบถามส่วนใหญ่มีความพึงพอใจอยู่ในระดับมากที่สุด ($\bar{X}$= 4.67, S.D. = 0.06) เมื่อพิจารณารายข้อ พบว่า การจัดรูปแบบระบบง่ายต่อการอ่านและการใช้งาน สีสันในการออกแบบระบบมีความเหมาะสม ความเหมาะสมในการใช้งานระบบ และความพึงพอใจในการใช้งานอยู่ในระดับมากที่สุด ($\bar{X}$= 4.83, S.D. = 0.41) รองลงมาคือขนาดตัวอักษร และรูปแบบตัวอักษร มีความสวยงามและอ่านได้ง่าย ความเป็นปัจจุบันของข้อมูล และตรงตามวัตถุประสงค์ที่ต้องการอยู่ในระดับมาก ($\bar{X}$= 4.67, S.D. = 0.52)

ตารางที่ 2 ด้านการนำไปใช้ประโยชน์

รายการประเมิน	ผลการทดสอบระบบ		ระดับความพึงพอใจ
	$\bar{x}$	S.D.	
1. เนื้อหามีประโยชน์ต่อผู้ใช้งาน และสามารถนำไปประยุกต์ใช้ได้	4.83	0.41	มากที่สุด
2. สามารถเป็นแหล่งความรู้ได้	4.33	0.52	มาก
3. เป็นแหล่งข้อมูลที่ตรงกับความต้องการของผู้ใช้งาน	4.83	0.41	มากที่สุด
รวม	**4.66**	**0.06**	**มากที่สุด**

จากตารางที่ 2 สรุปได้ว่าผู้ตอบแบบสอบถามส่วนใหญ่มีความพึงพอใจอยู่ในระดับมากที่สุด ($\bar{x}$= 4.66, S.D. = 0.06) เมื่อพิจารณารายข้อพบว่า เนื้อหามีประโยชน์ต่อผู้ใช้งาน และสามารถนำไปประยุกต์ใช้ได้ และเป็นแหล่งข้อมูลที่ตรงกับความต้องการของผู้ใช้งานอยู่ในระดับมากที่สุด ($\bar{x}$= 4.83, S.D. = 0.41) รองลงมาคือสามารถเป็นแหล่งความรู้ได้อยู่ในระดับมาก ($\bar{x}$= 4.33, S.D. = 0.52)

สรุปผลการวิจัย

1. การพัฒนาระบบการจัดการทรัพย์สินคงคลัง สามารถอำนวยความสะดวกในการบันทึกรับวัสดุและอุปกรณ์เข้าออกของระบบคลังเก็บวัสดุและอุปกรณ์ของบริษัท การจัดการข้อมูลทรัพย์สิน การรับวัสดุและอุปกรณ์เข้าคลัง การขอเบิกอุปกรณ์ รวมถึงการออกแบบรายงานการขอเบิกประจำวัน

2. ความพึงพอใจของผู้ใช้ระบบการจัดการทรัพย์สินคงคลัง กรณีศึกษาบริษัท เคซีอี อีเลคโทรนิคส์ จำกัด (มหาชน) มีความพึงพอใจในด้านการออกแบบและด้านการนำไปใช้ประโยชน์อยู่ในระดับมากที่สุด

อภิปรายผลการวิจัย

1. ผลจากการสร้างการพัฒนาระบบการจัดการทรัพย์สินคงคลัง กรณีศึกษาบริษัท เคซีอี อีเลคโทรนิคส์ จำกัด (มหาชน) สามารถบันทึกการรับวัสดุและอุปกรณ์เข้าคลัง การขอเบิกอุปกรณ์ และยังสามารถออกแบบรายงานการขอเบิกทรัพย์สินประจำวันตามที่พนักงานขอเบิกทรัพย์สินในระบบ

2. ผลการดำเนินความพึงพอใจของผู้ใช้งานระบบการจัดการทรัพย์สินคงคลัง บริษัท เคซีอี อีเลคโทรนิคส์ จำกัด (มหาชน) มีความพึงพอใจในการใช้ระบบการจัดการทรัพย์สินคงคลัง กรณีศึกษาบริษัท เคซีอี อีเลคโทรนิคส์ จำกัด (มหาชน) ด้านการออกแบบมีความพึงพอใจอยู่ในระดับมากที่สุด ($\bar{x}$= 4.67, S.D. = 0.06) และมีความพึงพอใจด้านการนำไปประโยชน์อยู่ในระดับมากที่สุด ($\bar{x}$= 4.66,S.D. = 0.06) ซึ่งสอดคล้องกับงานวิจัยของ (ภัทรพล เสมอภาค. 2563. 28-36) ได้ศึกษาการจัดการฐานข้อมูลระบบคลังจัดเก็บวัสดุและอุปกรณ์ กรณีศึกษาบริษัท ฟิวชั่น ดีไซน์ เดคคอเรท จำกัด ที่ผู้วิจัยสร้างขึ้นอยู่ในระดับมากที่สุด ระบบงานสามารถออกรายงาน (Report) ออกมาให้ส่วนงานจัดซื้อสามารถสั่งวัสดุอุปกรณ์ตามที่พนักงานคลังวัสดุ อุปกรณ์ต้องการสั่งซื้อวัสดุ

ข้อเสนอแนะ

นอกจากจะทำการพัฒนาระบบการจัดการทรัพย์สินคงคลัง อาจมีการเพิ่มในส่วนการขอเบิกทรัพย์สินผ่านแอพพลิเคชั่นอื่น ๆ เพื่อความสะดวกและ ความรวดเร็วในการดำเนินงาน

บทคัดย่อ

งานวิจัยนี้มีวัตถุประสงค์ 1) เพื่อออกแบบและพัฒนาระบบการเบิกอุปกรณ์ไอทีออนไลน์ และ 2) เพื่อประเมินความพึงพอใจของผู้ใช้ระบบการเบิกอุปกรณ์ไอทีออนไลน์ ซึ่งระบบการเบิกอุปกรณ์ไอทีออนไลน์เป็นการพัฒนาในรูปแบบเว็บแอปพลิเคชัน โดยใช้โปรแกรม Adobe Dreamweaver ในการพัฒนา และใช้ MySQL เป็นฐานข้อมูล โดยพัฒนาเพื่อใช้งานเฉพาะแผนกไอที เครื่องมือที่ใช้ในการวิจัยครั้งนี้เป็นแบบสอบถามความพึงพอใจที่มีต่อระบบการเบิกอุปกรณ์ไอทีออนไลน์ โดยพนักงานแผนกไอที จำนวน 18 คน เป็นผู้ประเมิน ซึ่งระบบมีการทำงานอยู่ 2 ส่วน ได้แก่ ส่วนของผู้ดูแลระบบและส่วนของผู้ใช้งานทั่วไป จากผลการประเมินพบว่าพนักงานแผนกไอทีเห็นว่าระบบมีประสิทธิภาพอยู่ในระดับมากที่สุด โดยมีค่าเฉลี่ยอยู่ที่ 4.58 และส่วนเบี่ยงเบนมาตรฐาน 0.13 สรุปได้ว่า ระบบที่พัฒนาขึ้นนี้สามารถนำไปใช้ในงานได้อย่างเหมาะสมและมีประสิทธิภาพ

คำสำคัญ: ระบบการจัดการ ระบบการเบิกจ่ายออนไลน์ ระบบการเบิกอุปกรณ์

Abstract

The objectives of this research were 1) Design and develop an online IT equipment disbursement system. 2) Assess user satisfaction with the online IT equipment disbursement system. The online IT equipment disbursement system is designed as a web application using the Adobe Dreamweaver program and MySQL as a database. A developed system was developed under the direction of the IT department. The system is divided into two sections admin and general user. According to the evaluation results, IT department staff observed the system performing at the highest level with a mean of 4.58 and a standard deviation of 0.13. To conclude, the online IT equipment disbursement system is more efficient and effective system.

Keywords: Management System, Online disbursement system, Equipment requisition system

[7] อาจารย์สาขาวิชาธุรกิจดิจิทัล คณะบริหารธุรกิจ มหาวิทยาลัยเกษมบัณฑิต

ในปัจจุบันมีการนำเทคโนโลยีคอมพิวเตอร์และอินเทอร์เน็ตมาใช้ให้เกิดประโยชน์มากมายหลากหลายด้านซึ่งหนึ่งในนั้นคือการนำมาใช้ในด้านธุรกิจ โดยมีการประยุกต์ออกมาหลายรูปแบบ เช่น การเขียนแอปพลิเคชันสำหรับอุปกรณ์เคลื่อนที่ และการพัฒนาเว็บแอปพลิเคชัน โดยใช้ภาษา Personal Home Page (PHP) ร่วมกับระบบฐานข้อมูล MySQL เพื่อใช้ในการติดต่อกับฐานข้อมูล ณัฐวรรณ ธรรมวัชรากร (2562) โดยจะถูกสร้างหรือพัฒนาขึ้นมาตามความต้องการของผู้ใช้งานนั้นๆ ไม่ว่าจะเป็นการสร้างออกมาให้ใช้งานแบบเฉพาะเจาะจงหรือใช้งานแบบทั่วไปก็ตาม ด้วยเหตุนี้จึงทำให้มีหลายบริษัทฯ ไม่น้อยที่เลือกเว็บแอปพลิเคชันเข้ามาช่วยในการทำงาน เพราะเว็บแอปพลิเคชันนั้นมีข้อดี คือผู้ใช้งานไม่ต้องติดตั้งโปรแกรมใดๆ เพียงแค่มีอุปกรณ์ที่เชื่อมต่ออินเทอร์เน็ตก็สามารถเปิดใช้งานได้ผ่านทางเว็บบราว์เซอร์ก็พร้อมใช้งานทันที (Korrawit Thaichay, 2022) จึงทำให้เกิดการทำงานที่รวดเร็วโดยที่สามารถทำงานได้แบบ 24 ชม. มีความสะดวกสบาย มีประสิทธิภาพ ถูกต้องแม่นยำ และมีการจัดเก็บข้อมูลแบบออนไลน์ได้ อย่างปลอดภัย ไม่เปลืองพื้นที่ในการจัดเก็บ

บริษัทไมโครชิพเทคโนโลยี จำกัด นั้นมีหลายแผนกซึ่งหนึ่งในนั้นคือแผนกไอทีที่ดูแลในเรื่องของการเบิกของที่เกี่ยวกับอุปกรณ์ไอทีโดยเฉพาะ เพราะต้องใช้ความรู้ความเชี่ยวชาญในด้านไอทีมาช่วยในการจ่ายของให้อย่างถูกต้องและเหมาะสม โดยในการเบิกแต่ละครั้งจะให้เขียนใบขอเบิกในรูปแบบของเอกสารและพนักงานไอทีทำการบันทึกข้อมูลรวมถึงการตัดสต็อกผ่าน Excel และเมื่อมีการขอเบิกเข้ามามากๆ หรือหลายรายการทำให้ Excel มีขนาดไฟล์ที่ใหญ่และช้าต่อการใช้งาน และมีความเสี่ยงต่อการสูญหายของข้อมูลด้วย จึงทำให้เกิดข้อมูลผิดพลาดหรือคลาดเคลื่อน การตกหล่นของการเบิกของ การรับ-ส่งของล่าช้า และใช้เวลามากในการค้นหารายการเบิกย้อนหลัง

ดังนั้น ผู้พัฒนาได้เล็งเห็นถึงปัญหาที่เกิดขึ้น จึงได้ศึกษาค้นคว้า วิเคราะห์ ระบบการจัดการเบิกอุปกรณ์แผนกไอทีออนไลน์ของบริษัทไมโครชิพเทคโนโลยี จำกัด เพื่อให้สามารถจัดการเบิกอุปกรณ์แผนกไอทีออนไลน์ ซึ่งจะทำให้ได้ข้อมูลที่ถูกต้อง แม่นยำ จัดเก็บข้อมูลบน Database ข้อมูลไม่สูญหาย และมีความรวดเร็วมากยิ่งขึ้น รวมไปถึงสามารถเข้าจัดการสต็อกของอุปกรณ์ไอที ได้จากทุกที่ ทุกเวลา ผ่านช่องทางออนไลน์ที่จะทำให้เกิดความสะดวกสบาย และสามารถเลือกดูข้อมูลหรือรายงานการเบิกย้อนหลังได้

วัตถุประสงค์ของการวิจัย

1. เพื่อออกแบบและพัฒนาระบบการเบิกอุปกรณ์ไอทีออนไลน์
2. เพื่อประเมินความพึงพอใจของผู้ใช้ระบบการเบิกอุปกรณ์ไอทีออนไลน์

วิธีการดำเนินการวิจัย

1. ประชากรและกลุ่มตัวอย่าง

1.1 ประชากรและกลุ่มตัวอย่าง ได้แก่ พนักงานแผนกไอที ของบริษัทไมโครชิพเทคโนโลยี จำกัด โดยมีกลุ่มประชากรและกลุ่มตัวอย่างทั้งหมดจำนวน 18 คน

1.2 วิธีสุ่มตัวอย่าง (Random Sampling) เพื่อความเหมาะสม และเพื่อให้ได้ข้อมูลตรงตามสภาพจริงมากที่สุด ผู้วิจัยจึงเลือกวิธีสุ่มตัวอย่างแบบเฉพาะเจาะจง (purposive sampling) เพราะพนักงานไอทีได้มีการใช้งานระบบการเบิกอุปกรณ์ไอทีจริงทุกคน

1.3 ตัวแปรที่ใช้ในการวิจัยครั้งนี้ ผู้วิจัยได้กำหนดตัวแปรที่ศึกษา ดังนี้

1.3.1 ตัวแปรต้น คือ เว็บแอปพลิเคชันระบบการเบิกอุปกรณ์ไอทีออนไลน์

1.3.2 ตัวแปรตาม คือ ความพึงพอใจที่มีต่อระบบการเบิกอุปกรณ์ไอทีออนไลน

2. ขอบเขตการวิจัย

2.1 ขอบเขตด้านเนื้อหา

การวิจัยครั้งนี้มุ่งศึกษาเกี่ยวกับ เรื่องการเบิกอุปกรณ์ไอทีออนไลน์ ของบริษัทไมโครชิพเทคโนโลยี จำกัดโดยกำหนดขอบเขตที่จะศึกษาไว้เป็น 2 กลุ่ม คือผู้ดูและระบบและผู้ใช้งานระบบ ดังนี้

2.1.1 ผู้ดูแลระบบ

3.4.1.1 สามารถเข้าใช้งานระบบและออกระบบได้

3.4.1.2 สามารถเพิ่ม ลบ แก้ไข รายการอุปกรณ์ไอทีได้

3.4.1.3 สามารถเพิ่ม ลบ แก้ไข ข้อมูลผู้ใช้งานได้

3.4.1.4 สามารถเพิ่ม ลบ แก้ไข เว็บบอร์ดได้

3.4.1.5 สามารถค้นหารายการที่ต้องการได้

3.4.1.6 สามารถตรวจสอบและแสดงรายการอุปกรณ์ไอทีได้

3.4.1.7 สามารถบันทึกข้อมูลรายการอุปกรณ์ไอทีได้

3.4.1.8 สามารถพิมพ์รายงานการเบิกและสามารถดูรายงานย้อนหลังได้

2.1.2 ผู้ใช้งานระบบ

3.4.1.1 สามารถเข้าใช้งานระบบและออกระบบได้

3.4.1.2 สามารถตรวจสอบและแสดงรายการอุปกรณ์ไอทีได้

3.4.1.3 สามารถค้นหารายการที่ต้องการได้

3.4.1.4 สามารถเพิ่มและแสดงของเว็บบอร์ดได้

3.4.1.5 สามารถพิมพ์รายงานการเบิกและสามารถดูรายงานย้อนหลังได้

2.2 ขอบเขตของประชากรที่จะศึกษา

พนักงานแผนกไอที ของบริษัทไมโครชิพเทคโนโลยี จำกัด

2.3 ขอบเขตด้านระยะเวลา

ระยะเวลาที่ใช้ในการศึกษาครั้งนี้ ตั้งแต่ 2 สิงหาคม 2565 ถึง 15 พฤศจิกายน 2565

3. เครื่องมือที่ใช้ในการวิจัย

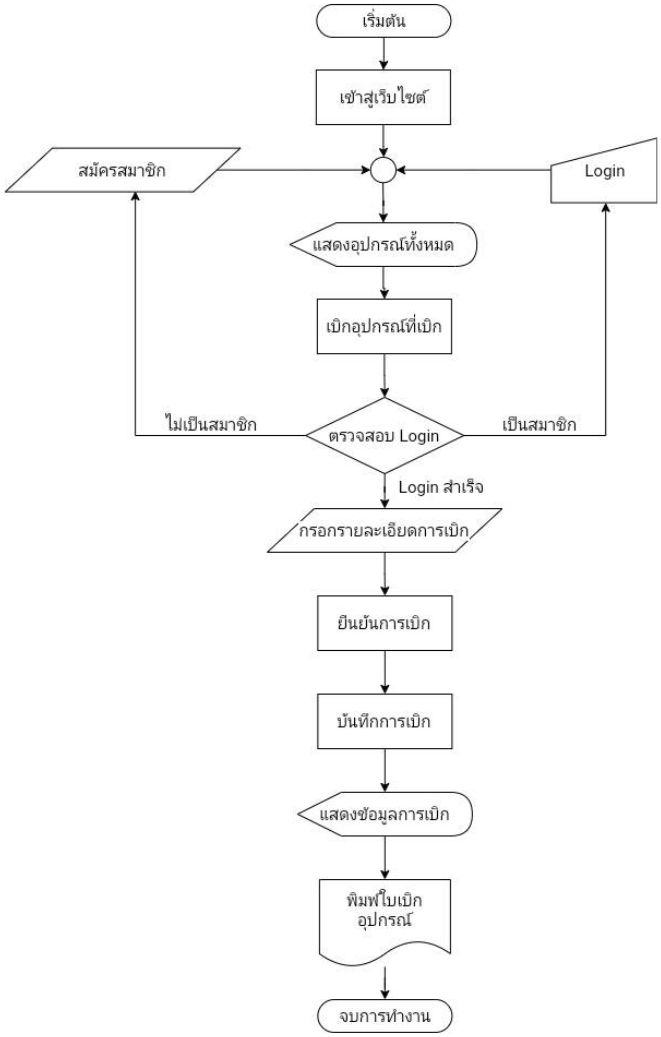
เครื่องมือที่ใช้ในการเก็บรวบรวมข้อมูลเพื่อทำการวิจัยในครั้งนี้ คือแบบสอบถาม (Questionnaire) ที่ผู้วิจัยสร้างขึ้น โดยใช้เป็นแบบสอบถามปลายปิด ซึ่งแบ่งรายละเอียดเป็น 3 ตอน ดังนี้

ตอนที่ 1 ข้อมูลทั่วไปของผู้ตอบแบบสอบถาม ประกอบด้วยคำถามทั่วไปเกี่ยวกับสถานภาพของกลุ่มตัวอย่าง

ตอนที่ 2 แบบสอบถามเกี่ยวกับความพึงพอใจต่อวิจัยของผู้ใช้ระบบการเบิกอุปกรณ์ไอทีออนไลน์ ประกอบด้วยหัวข้อคำถามเกี่ยวกับความปลอดภัยของระบบ การออกแบบเว็บไซต์ ด้านเนื้อหา และประสิทธิภาพในการใช้งานเว็บไซต์

ตอนที่ 3 ข้อเสนอแนะเกี่ยวกับความพึงพอใจต่อวิจัยของผู้ใช้ระบบการเบิกอุปกรณ์ไอทีออนไลน์

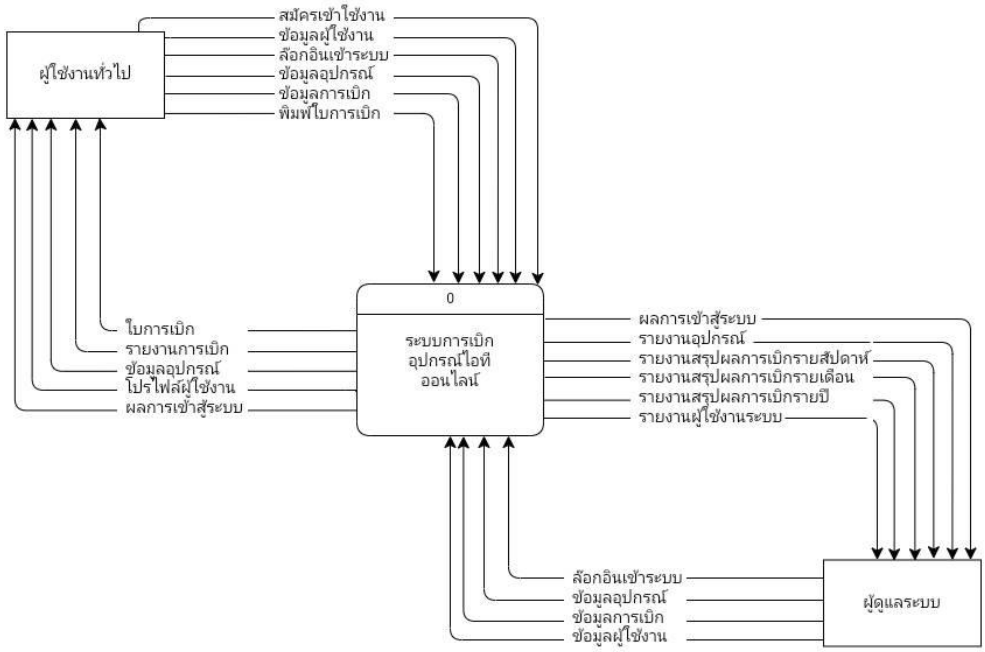
4. ขั้นตอนในการวิจัย



ในงานวิจัยฉบับนี้ได้นำกระบวนการพัฒนาระบบวงจรการพัฒนาระบบ (System Development Life Cycle: SDLC) มาใช้ในวิธีดำเนินการวิจัยซึ่งประกอบด้วย 7 ขั้นตอน ดังนี้

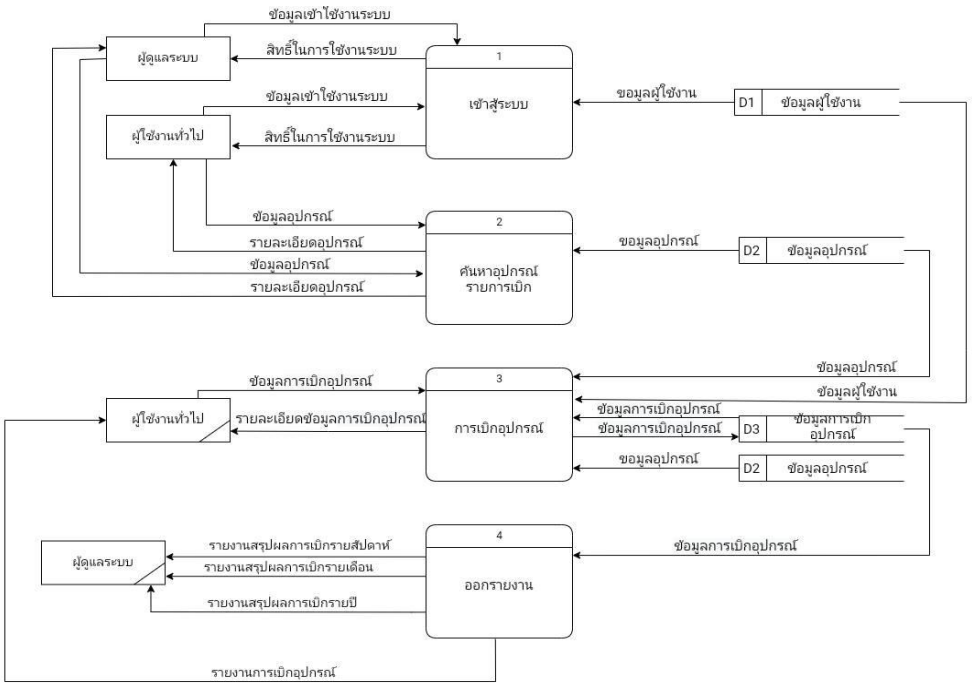
4.1 การเก็บรวบรวมข้อมูล

คณะผู้วิจัยดำเนินการเก็บรวบรวมข้อมูลด้วยตนเอง โดยมีการสอบถามและสัมภาษณ์ความต้องการระบบกับทางแผนกไอทีและได้รวบรวมข้อมูลต่างๆ จากพนักงานไอทีทุกคน



4.2 การวิเคราะห์ระบบ

4.1.1 แผนภาพผังงานระบบ (System Flowchart)



ภาพที่ 1 แสดงแผนภาพผังงานระบบ (System Flowchart)

4.1.1 คอนเทกซ์ไดอะแกรมของระบบการเบิกอุปกรณ์ไอทีออนไลน์

ภาพที่ 2 แสดงคอนเท็กซ์ไดอะแกรม (Context Diagram)

4.1.2 แผนภาพกระแสข้อมูล (Data Flow Diagram)

ภาพที่ 3 แสดงแผนภาพกระแสข้อมูลระดับ 1 (Data Flow Diagram Level 1)

4.3 การออกแบบระบบ

4.3.1 การออกแบบฐานข้อมูล (Database Design) โดยการกำหนดพจนานุกรมข้อมูล (Data Dictionary) ของระบบมีรายละเอียด ดังนี้

ตารางที่ 1 รายละเอียดของตารางข้อมูลผู้เข้าใช้งาน

Table : Customer		
Field Name	Data Description	Data Type
cus_id	รหัสผู้ใช้งาน	int(11)
cus_pass	รหัสผ่าน	Varchar(12)
cus_fnm	ยืนยันรหัสผ่าน	Varchar(6)
cus_name	ชื่อผู้ใช้งาน	Varchar(5)
cus_email	อีเมล์	Varchar(50)
cus_status	สถานะ	Varchar(30)
Primary Key : cus_id		
Foreign Key : -		

ตารางที่ 2 รายละเอียดของตารางข้อมูลอุปกรณ์

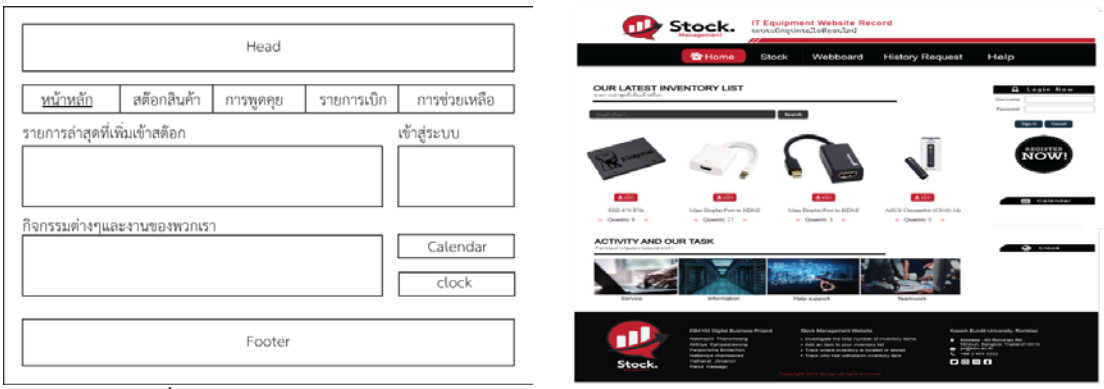


Table : Product		
Field Name	Data Description	Data Type
pro_id	รหัสอุปกรณ์	int(11)
pro_name	ชื่ออุปกรณ์	Varchar(50)
pro_detall	รายละเอียดอุปกรณ์	text
pro_type	ประเภท	Varchar(25)
pro_unit	จำนวน	int(5)
pro_plc	รูปภาพ	Varchar(25)
Primary Key :pro_id		
Foreign Key : -		

ตารางที่ 3 รายละเอียดของตารางข้อมูลรายการเบิก

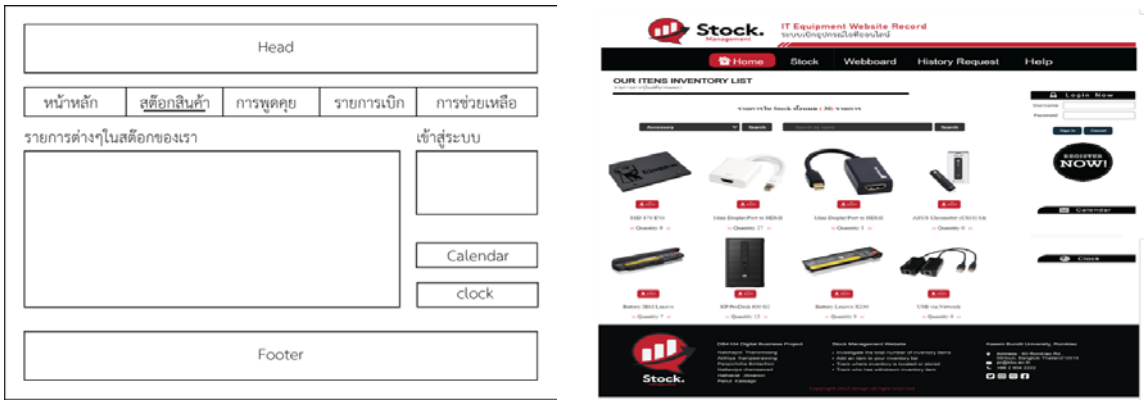

Table : orders		
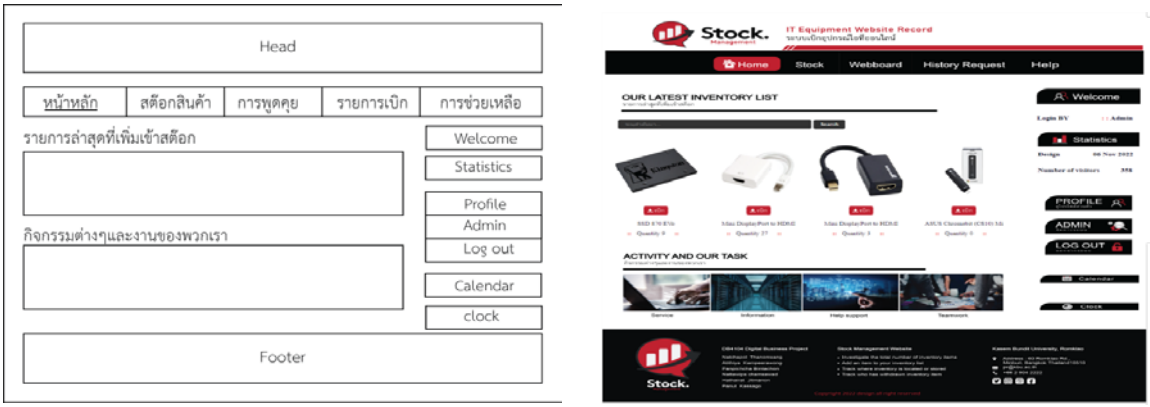
Field Name	Data Description	Data Type
orders_id	หมายเลขการเบิก	int(11)
cus_id	รหัสผู้ใช้งาน	Varchar(50)
orders_date	วันที่เบิก	date
orders_time	เวลาที่เบิก	time
orders_unit	จำนวนที่เบิก	int(5)
Primary Key : orders_id		
Foreign Key : -		

4.3.2 การออกแบบหน้าจอ (แบ่งเป็น 2 ส่วน คือ ส่วนของ User และ ส่วนของ Admin)

4.3.2.1 ออกแบบหน้าจอหลักและหน้าจอ User (User Interface) ดังนี้

ภาพที่ 4 การออกแบบและแสดงหน้าจอหลักและหน้าล็อกอินเข้าสู่ระบบของผู้ใช้งาน (User)



ภาพที่ 5 การออกแบบและแสดงหน้าสต็อกสินค้า

ภาพที่ 6 การออกแบบและแสดงหน้าประวัติรายการเบิก

4.3.2.2 ออกแบบหน้าจอหลักและหน้าจอ Admin (User Interface) ดังนี้

ภาพที่ 7 การออกแบบและแสดงหน้าจอหลักและหน้าล็อกอินเข้าสู่ระบบของผู้ดูแลระบบ Admin

ภาพที่ 8 การออกแบบและแสดงหน้าการจัดการสต๊อก (Stock Management)

4.4 การพัฒนาระบบ

ในการพัฒนาระบบครั้งนี้ ผู้วิจัยได้พัฒนาระบบในรูปแบบเว็บแอปพลิเคชันด้วยภาษา PHP ผ่านโปรแกรม Adobe Dreamweaver และใช้ระบบฐานข้อมูล MySQL ด้วยโปรแกรม AppServe โดยโปรแกรม Adobe Dreamweaver เป็นโปรแกรมสำหรับพัฒนาเว็บไซต์ ซึ่งมีคุณสมบัติครอบคลุมตั้งแต่การออกแบบและสร้างเว็บและสร้างเว็บเพจ การบริหารจัดการเว็บไซต์ ตลอดไปจนถึงการพัฒนาเว็บแอพพลิเคชั่นเบื้องต้น และระบบฐานข้อมูล MySQL ช่วยในการบริหารจัดการฐานข้อมูลเชิงสัมพันธ์ ซึ่ง MySQL ทำงานเป็นดาต้าเบสเซิร์ฟเวอร์ และได้รับการออกแบบและปรับให้เหมาะสมสำหรับเว็บแอปพลิเคชันและสามารถทำงานในการติดต่อกันระหว่างเครือข่ายเพื่อเพิ่ม ลบ แก้ไข และแสดงผลข้อมูลระหว่างผู้ใช้งานและฐานข้อมูล

4.5 การทดสอบระบบ

การทดสอบในวิจัยนี้ดำเนินการทดสอบระบบการเบิกอุปกรณ์ไอทีออนไลน์ก่อนที่จะนำระบบไปใช้งานจริง เป็นการทดสอบเบื้องต้นด้วยการสร้างข้อมูลจำลองขึ้นมาเพื่อตรวจสอบการทำงานของระบบงาน โดยการทดสอบระบบนี้จะมีการตรวจสอบอยู่ 3 ส่วน คือ การตรวจสอบรูปแบบภาษาเขียน (Syntax) ผ่านโปรแกรม Adobe Dreamweaver และการตรวจสอบการทำงานของระบบผ่านทางเว็บเบราว์เซอร์ (Google Chrome) และการทดสอบผ่านแบบประเมินความพึงพอใจที่มีต่อระบบ โดยที่ให้พนักงานแผนกไอที จำนวน 18 คน ทำการประเมิน โดยใช้แบบประเมินออนไลน์ (Google Form) ซึ่งค่าความพึงพอใจแบ่งออกเป็น 5 ระดับ ระดับน้อยมาก ระดับน้อย ระดับปานกลาง ระดับมาก ระดับมากที่สุด

4.6 การติดตั้งระบบ

เมื่อทำการทดสอบระบบจนมั่นใจว่าระบบสามารถทำงานได้จริงและตรงกับความต้องการของผู้ใช้ระบบ ตลอดจนพร้อมที่จะนำไปติดตั้งเพื่อใช้งานในสถานการณ์จริง จึงนำระบบไปติดตั้งด้วยการติดตั้งเว็บเซิร์ฟเวอร์สำหรับบริษัทไมโครชิพใช้ vmware ในการจำลอง VM (Visual machine) ซึ่งเป็นการสร้างคอมพิวเตอร์เสมือน ซึ่งทำงานในลักษณะของ web server นั่นคือเครื่องคอมพิวเตอร์จะเป็นทั้งเครื่องแม่และเครื่องลูกในเครื่องเดียวกัน ทำให้ไม่ต้องเชื่อมต่อกับอินเตอร์เน็ต ก็สามารถทดสอบเว็บไซต์ได้ทุกที่ทุกเวลาโดยขั้นตอนคือทำการติดตั้งแอปเซิร์ฟลงบน Visual machine จากนั้นตั้งชื่อ Server Name ก็เป็นอันเสร็จสิ้นของการติดตั้ง ซึ่งในการติดตั้งจะเป็นการเลือกการติดตั้งแบบทันทีทันใด (Direct Installation) หรือเป็นวิธีการติดตั้งระบบใหม่ทันทีและยกเลิกการใช้งานระบบเก่าทันที

4.7 การบำรุงรักษาระบบ

ภายหลังจากระบบใช้งานเป็นที่เรียบร้อย ระบบยังต้องมีการบำรุงอยู่ต่อเนื่อง เพื่อให้สามารถใช้งานได้ตลอด และมีระบบ backup ข้อมูล บริษัทไมโครชิพใช้ ฟีดเจอร์ windows server backup ทำการ Backup System Reserved และ local disk C โดยทำการเขียนเป็น bat file ตั้งชื่อเป็น SystemBackup.bat และใช้ทาง scheduler ของ windows saver ให้ทำการรันแบบไฟล์ตามช่วงเวลาที่เรากำหนดคือ 15.00 และ 03.00 ของทุกวันและยังทำการเปิด ฟีดเจอร์ Snapshot File System ให้ auto backup ไฟล์ และเรียกคืนได้ทันทีผ่านหน้าต่าง Previous Version

ตัวอย่างคำสั่ง system backup.bat

```
@echo off
wbadmin start backup -backuptarget:e : -include:c:
Eof:
```

สรุปผลการวิจัย

ในการวิเคราะห์ข้อมูลทั้งหมดที่ผ่านมาข้างต้น ผู้วิจัยได้สรุปผลการวิจัยตามวัตถุประสงค์ที่ได้ตั้งไว้ ดังต่อไปนี้

1. ผลการพัฒนาและออกแบบระบบการเบิกอุปกรณ์ไอทีออนไลน์ ผู้วิจัยได้ใช้หลักการพัฒนาและออกแบบ โดยระบบ System Develop Life Cycle (SDLC) 7 ขั้นตอน พัฒนาเป็นระบบการเบิกอุปกรณ์ไอทีออนไลน์ ซึ่งสามารถสรุปผลการพัฒนาได้ดังนี้

1.1 สามารถกำหนดสิทธิ์การเข้าใช้งานได้ 2 รูปแบบ ได้แก่ ผู้ดูแลระบบและผู้ใช้งาน

1.2 สามารถจัดการข้อมูลรายการอุปกรณ์ไอที, ข้อมูลผู้ใช้งาน, ข้อมูลเว็บบอร์ดได้

1.3 สามารถค้นหารายการที่ต้องการได้

1.4 สามารถตรวจสอบและแสดงรายการอุปกรณ์ไอที

1.5 สามารถบันทึกข้อมูลรายการอุปกรณ์ไอทีได้

1.6 สามารถพิมพ์รายงานการเบิกและสามารถดูรายงานย้อนหลังได้

2. ผู้วิจัยได้นำแบบสอบถามทั้งหมดมาวิเคราะห์ ผ่านทางโปรแกรม Excel และนำมาแปลความหมายตามเกณฑ์ดังนี้ ตารางที่ 5 และผลการประเมินประสิทธิภาพของระบบการเบิกอุปกรณ์ไอทีออนไลน์ โดยพนักงานแผนกไอที จำนวน 18 คน จากผลการประเมินประสิทธิภาพของระบบการเบิกอุปกรณ์ไอทีออนไลน์พบว่า มีประสิทธิภาพอยู่ในระดับมากที่สุด โดยมีรายละเอียดตามตารางที่ 6 ดังนี้

สถิติที่ใช้ในการวิเคราะห์ข้อมูล

แบบประเมินคุณภาพของระบบที่พัฒนาขึ้น ระบบได้กำหนดเกณฑ์ตามวิถีของลิเคิร์ท (Likert Scale) โดยประกอบ ด้วยมาตราส่วนประมาณค่า 5 ระดับ (Rating Scale) ซึ่งแต่ละระดับจะมีเกณฑ์ให้คะแนนความหมายดังนี้ (บุญชม, 2545)

ตารางที่ 4 มาตราส่วนประมาณค่า 5 ระดับ (Rating Scale)

ค่าเฉลี่ย 4.51-5.00	ระบบที่พัฒนามีคุณภาพสูงมาก
ค่าเฉลี่ย 3.51-4.50	ระบบที่พัฒนามีคุณภาพสูง
ค่าเฉลี่ย 2.51-3.50	ระบบที่พัฒนามีคุณภาพปานกลาง
ค่าเฉลี่ย 1.51-2.50	ระบบที่พัฒนามีคุณภาพต่ำ
ค่าเฉลี่ย 1.00-1.50	ระบบที่พัฒนามีคุณภาพต่ำมาก

โดยแต่ละข้อคำถามมีคำตอบให้เลือก 5 ระดับ คือ มากที่สุดได้ 5 คะแนน มากได้ 4 คะแนน ปานกลางได้ 3 คะแนน น้อยได้ 2 คะแนน และน้อยที่สุดได้ 1 คะแนน จากนั้นนำข้อมูลมาวิเคราะห์โดยค่าสถิติที่ใช้ ได้แก่ การหาค่าร้อยละ การหาค่าเฉลี่ย ($\overline{x}$) ค่าเบี่ยงเบนมาตรฐาน (S.D.)

จากค่าสถิติที่ใช้ ใช้ค่าเฉลี่ยและค่าเบี่ยงเบนมาตรฐาน ใช้วิเคราะห์ระดับความพึงพอใจของระบบการเบิกอุปกรณ์ไอทีออนไลน์ โดยมีเกณฑ์ระดับความพึงพอใจ ดังนี้

ตารางที่ 5 มาตราส่วนประมาณค่า 5 ระดับ (Rating Scale)

ค่าเฉลี่ย 4.51-5.00	หมายถึง	มากที่สุด
ค่าเฉลี่ย 3.51-4.49	ให้คะแนนเท่ากับ	มาก
ค่าเฉลี่ย 2.51-3.50	ให้คะแนนเท่ากับ	ปานกลาง
ค่าเฉลี่ย 1.51-2.50	ให้คะแนนเท่ากับ	น้อย
ค่าเฉลี่ย 1.00-1.50	ให้คะแนนเท่ากับ	น้อยที่สุด

ตารางที่ 6 การประเมินประสิทธิภาพของ ระบบการเบิกอุปกรณ์ไอทีออนไลน์

การประเมินประสิทธิภาพของ ระบบการเบิกอุปกรณ์ไอทีออนไลน์	($\bar{x}$)	S.D.	ระดับ
ความปลอดภัยของระบบ			
1.สามารถช่วยป้องกันการสูญหายของข้อมูลได้	4.5	0.69	มาก
2.มีการกำหนดผู้ใช้และรหัสผ่านสามารถตรวจสอบได้	4.67	0.47	มากที่สุด
3.การแจ้งเตือนในกรณีที่มีการเกิดข้อผิดพลาดต่างๆ	4.5	0.5	มาก
4.การเข้าถึงข้อมูลมีความปลอดภัยและน่าเชื่อถือ	4.61	0.59	มากที่สุด
5.การปรับปรุงแก้ไขข้อมูลที่มีความถูกต้อง	4.56	0.5	มากที่สุด
6.เมื่อเกิดปัญหามีช่องทางให้ผู้ใช้งานสามารถติดต่อสอบถามข้อมูล และแสดงความคิดเห็นผ่านระบบของเว็บไซต์	4.44	0.6	มาก
การออกแบบเว็บไซต์			
1.ความเหมาะสมในการเลือกใช้ชนิด ขนาด สีตัวอักษร บนเว็บไซต์	4.56	0.5	มากที่สุด
2.การใช้สัญลักษณ์หรือรูปภาพในการสื่อความหมาย	4.83	0.5	มากที่สุด
3.การวางตำแหน่งของส่วนประกอบและเมนูต่างๆบนเว็บไซต์	4.83	0.37	มากที่สุด
4.ความเร็วในการแสดง ภาพ ตัวอักษร ข้อมูลต่างๆ	4.61	0.59	มากที่สุด
5.ความสะดวกชัดเจนในการค้นหาอุปกรณ์	4.61	0.59	มากที่สุด
6.หน้าโฮมเพจมีความสวยงามเหมาะสม น่าสนใจ	4.61	0.49	มากที่สุด
ด้านเนื้อหา			
1.ความสะดวกในการเชื่อมโยงข้อมูลภายในเว็บไซต์	4.67	0.58	มากที่สุด
2.ความถูกต้องครบถ้วนของข้อมูล	4.67	0.47	มากที่สุด
3.ภาพประกอบสอดคล้องกับเนื้อหา	4.67	0.58	มากที่สุด
4.มีการจัดหมวดหมู่ให้ง่ายต่อการค้นหาและทำความเข้าใจ	4.61	0.49	มากที่สุด
5.เนื้อหามีปริมาณเพียงพอกับความต้องการ	4.33	0.67	มาก
6.คำศัพท์ที่ใช้ผู้ใช้มีความคุ้นเคยและสามารถปฏิบัติตามได้โดยง่าย	4.56	0.5	มากที่สุด
ประสิทธิภาพในการใช้งานเว็บไซต์			
1.ความถูกต้องของผลลัพธ์ที่ได้จากการประมวลในโปรแกรม	4.5	0.6	มากที่สุด
2.สามารถลดเวลาและกระบวนการนับอุปกรณ์ในคลังได้	4.67	0.58	มากที่สุด
3.การจัดหมวดหมู่ให้ง่ายต่อการค้นหาและทำความเข้าใจ	4.67	0.58	มากที่สุด
4.ความครอบคลุมของระบบที่พัฒนากับระบบจริง	4.33	0.67	มาก
5.ความเชื่อมโยงสัมพันธ์สอดคล้องและลำดับเนื้อหา	4.39	0.68	มากที่สุด
6.การรับฟังความคิดเห็นของผู้ใช้งาน	4.5	0.69	มากที่สุด
เฉลี่ยรวม	**4.58**	**0.13**	**มากที่สุด**

ผลการประเมินประสิทธิภาพของ ระบบการเบิกอุปกรณ์ไอทีออนไลน์

สรุปผลการประเมินความพึงพอใจจากประชากรและกลุ่มตัวอย่าง พนักงานแผนกไอที ของบริษัทไมโครชิพเทคโนโลยี จำกัด โดยมีกลุ่มประชากรและกลุ่มตัวอย่างทั้งหมดจำนวน 18 คน โดยการประเมินประสิทธิภาพของระบบการเบิกอุปกรณ์ไอทีออนไลน์พบว่ามีประสิทธิภาพอยู่ในระดับมากที่สุดเมื่อพิจารณป็นรายข้อระดับมากที่สุดเรียงลำดับ 3 อันดับแรก

ได้แก่ การใช้สัญลักษณ์หรือรูปภาพในการสื่อความหมาย (X=4.83, S.D.=0.50) รองลงมาได้แก่ การวางตำแหน่งของส่วนประกอบและเมนูต่างๆบนเว็บไซต์ (X=4.83, S.D.=0.37) และ ความสะดวกในการเชื่อมโยงข้อมูลภายในเว็บไซต์, ภาพประกอบสอดคล้องกับเนื้อหา, สามารถลดเวลาและกระบวนการนับอุปกรณ์ในคลังได้, การจัดหมวดหมู่ให้ง่ายต่อการค้นนหาและทำความเข้าใจ (X=4.67, S.D.=0.58) โดยภาพรวมพบว่า มีประสิทธิภาพของระบบอยู่ในระดับมากที่สุด (X=4.58, S.D.=0.13)

อภิปรายผลการวิจัย

งานวิจัยนี้มีวัตถุประสงค์เพื่อพัฒนาระบบการเบิกอุปกรณ์ไอทีออนไลน์ จากการพัฒนาระบบการเบิกไอทีออนไลน์ในงานวิจัยฉบับนี้ที่รวมเอาระบบจัดการผู้เข้าใช้งาน การจัดการข้อมูลอุปกรณ์ การจัดการประเภทอุปกรณ์ การจัดการข้อมูลรายการเบิกอุปกรณ์ รวมถึงรายละเอียดของอุปกรณ์ การจัดการข้อมูลบอร์ดประชาสัมพันธ์ของการเบิกอุปกรณ์ไอทีโดยมีทั้งการตั้งกระทู้การโต้ตอบกระทู้และรูปแบบเว็บแอปพลิเคชันถูกพัฒนาด้วยภาษา PHP และใช้ระบบฐานข้อมูล MySQLในการบริหารจัดการฐานข้อมูลเชิงสัมพันธ์ ในการติดต่อกันระหว่างเครือข่ายเพื่อเพิ่ม แก้ไข แสดงผลข้อมูล ระหว่างผู้ใช้งาน และฐานข้อมูล ซึ่งเหมือนกับงานวิจัยของ

แสนยานุภาพ นามวงศ์ และ จารี ทองคำ (2565) เป็นการพัฒนาระบบจัดการคลังสินค้าออนไลน์ และต่างจากงานวิจัยของ วิจิตรา ผาผึ้ง, ปริชาติ โอชาดร และศิรินภา สุนประสบ (2562) เป็นการพัฒนาระบบการบริหารจัดการ คลังสินค้าออนไลน์ จากผลการประเมินความพึงพอใจของผู้ใช้งาน ผลการวิจัยพบว่า การพัฒนาระบบการเบิกอุปกรณ์ไอทีออนไลน์ เป็นที่ยอมรับของผู้ใช้งานระบบ ผลการประเมินความพึงพอใจต่อระบบซึ่งมีการใช้สัญลักษณ์หรือรูปภาพในการสื่อความหมาย และการวางตำแหน่งของส่วนประกอบและเมนูต่างๆ บนเว็บไซต์ มีความพึงพอใจในระดับมากที่สุด ด้านเนื้อหา ความสะดวกในการเชื่อมโยงข้อมูลภายในเว็บไซต์ ความถูกต้องครบถ้วนของข้อมูล และภาพประกอบสอดคล้องกับเนื้อหา เป็นไปตามความต้องการของผู้ใช้ระบบ มีความพึงพอใจในระดับมากที่สุด ความปลอดภัยของระบบ มีการกำหนดผู้ใช้และรหัสผ่านสามารถตรวจสอบได้ สร้างความพึงพอใจมากที่สุดกับผู้ใช้งาน ส่วนด้านประสิทธิภาพในการใช้งานเว็บไซต์นั้น มีระดับความพึงพอใจมาก แสดงให้เห็นว่าระบบ ที่พัฒนาขึ้นมา มีคุณภาพสามารถนำไปใช้งานได้จริง อีกทั้งระบบนี้สามารถช่วยอำนวยความสะดวก และง่ายต่อการใช้งานการจัดการข้อมูลอุปกรณ์ไอที และเพิ่มประสิทธิภาพในการดำเนินธุรกิจ อีกทั้งผู้วิจัยมีความคิดจะต่อยอดให้มีฟังก์ชันการคำนวณปริมาณของจุดสั่งซื้อ เพื่อเป็นการแจ้งให้ทราบว่าอุปกรณ์ในคลังมีจำนวนถึงกำหนดที่ต้องทำการสั่งซื้อเพิ่ม

ข้อเสนอแนะ

1. ควรพัฒนาระบบการเบิกอุปกรณ์ไอทีออนไลน์ บริษัทไมโครชิพเทคโนโลยี จำกัด ให้มีฟังก์ชันการคำนวณปริมาณของจุดสั่งซื้อ และการคำนวณการสั่งซื้ออุปกรณ์ในการสต็อกอุปกรณ์ไอที
2. ควรพัฒนาระบบการเบิกอุปกรณ์ไอทีออนไลน์ บริษัทไมโครชิพเทคโนโลยี จำกัด ให้มีรูปแบบที่ทันสมัยอยู่เสมอ

บทคัดย่อ

งานวิจัยนี้มีวัตถุประสงค์เพื่อ 1)สร้างระบบควบคุมการเปิด-ปิดไฟด้วยอินเตอร์เน็ตของสรรพสิ่ง 2)ประเมินความพึงพอใจของผู้ใช้งานระบบควบคุมการเปิด-ปิดไฟด้วยอินเตอร์เน็ตของสรรพสิ่ง ในการอำนวยความสะดวกมากขึ้น ให้ง่ายต่อการจัดการเวลา จัดการทรัพยากร และสามารถลดปัญหาการทำงานที่ซับซ้อนและปัญหาในการใช้ทรัพยากรที่สิ้นเปลือง ทำให้สามารถดำเนินงานได้อย่างสมบูรณ์และมีประสิทธิภาพ สร้างความสะดวกสบายและความรวดเร็วให้กับผู้ใช้งาน จากข้อมูลข้างต้นจึงได้มีการพัฒนา Application ระบบควบคุมการเปิด-ปิดไฟ ขึ้นมาเพื่อประยุกต์ใช้ในการช่วยลดปัญหาด้านเวลาและทรัพยากร โดยพัฒนาระบบด้วย Application Blynk โดยใช้โปรแกรม Arduino IDE เขียนโค้ดคำสั่งเพื่อควบคุมระบบไฟ ผ่าน Application Blynk การออกแบบนี้สามารถประหยัดพลังงานไฟฟ้าได้มากเมื่อเทียบกับไฟทั่วไปในสถานที่ต่างๆ จากการประเมินความพึงพอใจในการใช้งานระบบภายในที่พักอาศัยผ่านแบบสอบถามประเมินความพึงพอใจนั้น ในการใช้ระบบควบคุมการเปิด-ปิดไฟด้วยอินเตอร์เน็ตของสรรพสิ่ง (IOT) พบว่ากลุ่มเป้าหมาย ในการจัดทำโครงงานครั้งนี้ได้แก่ สมาชิกในหมู่บ้าน The Plan เท่ากับ 3.83 หมายถึง มีความพึงพอใจอยู่ในระดับดี

คำสำคัญ : ระบบไฟอัจฉริยะ เทคโนโลยี อินเตอร์เน็ตของสรรพสิ่ง ควบคุม

Abstract

The purpose of this research is: 1) to establish a system to control the opening and closing of everything through the Internet. 2) Evaluate users' satisfaction with the Internet lighting control system to facilitate time management. Manage resources to reduce complex tasks and resource waste It can be operated completely and effectively, creating convenience and speed for users, and developed from the above information. The application program controls the turning on and off of lights to reduce time and resource problems. The system is developed through the application program. Blynk uses Arduino IDE to write command code to control the lighting system through the Blynk application. Compared with traditional lighting in different places, this design can save a lot of power. The satisfaction degree of the use of the housing system is evaluated through the satisfaction evaluation questionnaire. When using the Internet of Things control system (IOT), the target group of this project is the members of the village. The plan is 3.83, which means good satisfaction.

Keywords: Smart Lighting, Technology, Internet of Thing, Control

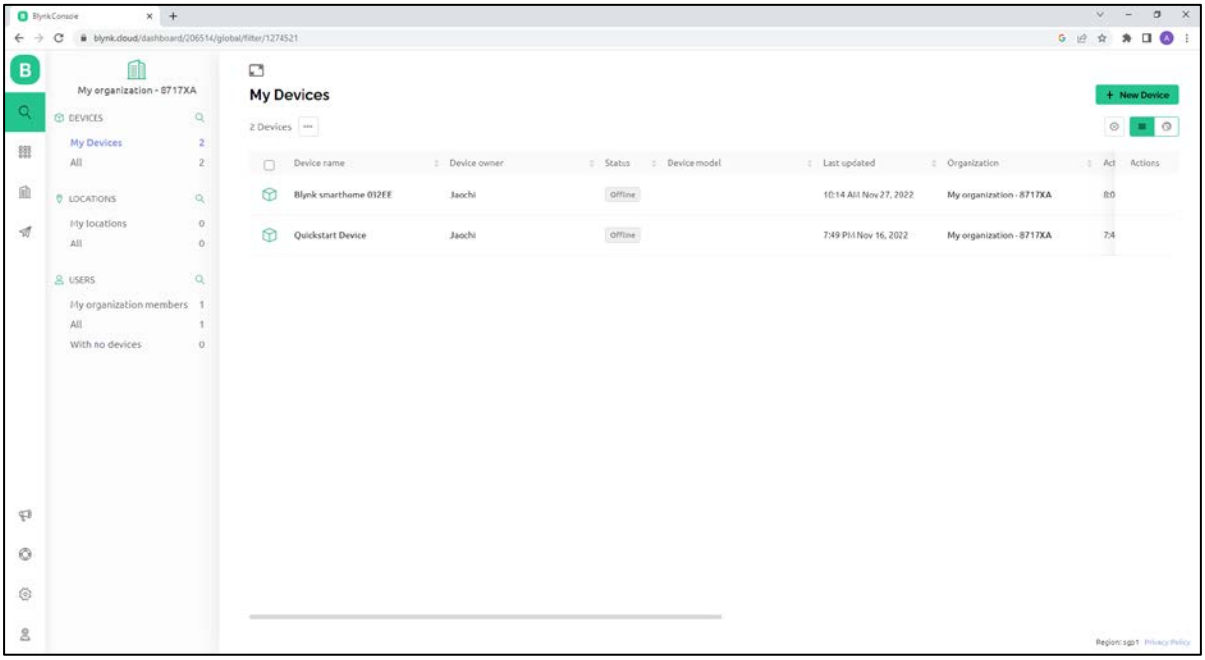
บทนำ

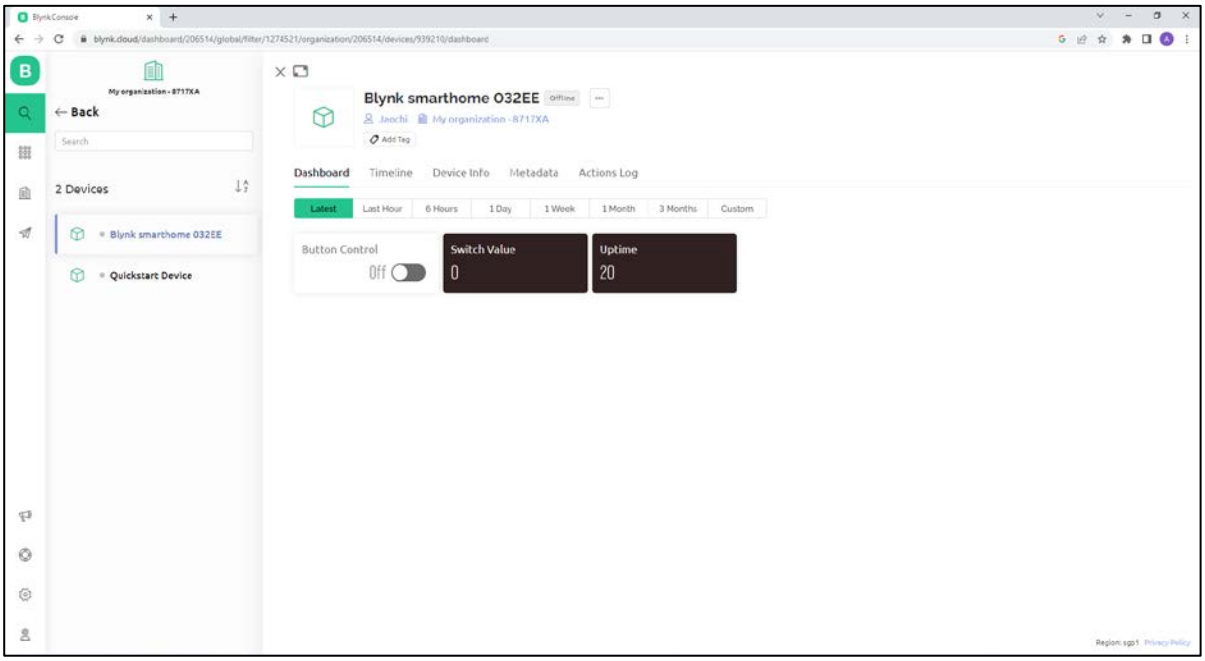
เนื่องจากปัจจุบันมีการใช้พลังงานที่สิ้นเปลือง ที่ก่อให้เกิดผลกระทบเมื่อกล่าวถึงการประหยัดพลังงาน ทุกคนจะนึกถึงการลดการใช้พลังงานน้ำมัน หรือลดการใช้พลังงานไฟฟ้า เพราะเป็นเรื่องใกล้ตัวที่เกี่ยวข้องกับชีวิตประจำวันของทุกคนและน่าจะเป็นสิ่งที่ปฏิบัติได้ง่ายที่สุดและเห็นผลได้ชัดเจนที่สุด เช่นค่าใช้จ่ายในการเติมน้ำมันในแต่ละเดือนลดลง ค่าไฟฟ้าแต่ละเดือนลดลง เมื่อเป็นเช่นนั้นก็สามารถสรุปได้ว่าเราได้ประหยัดพลังงานแล้ว แต่จริงๆ แล้ว ยังมีอีกหลากหลายวิธีที่เราสามารถช่วยกันประหยัดพลังงานและเป็นวิธีง่ายๆ ที่เราสามารถทำได้ด้วยตัวเองทั้งสิ้น

การที่อยากทำโครงการนี้เพราะช่วยประหยัดพลังงานและค่าใช้จ่ายในครัวเรือน เพราะประชากรได้มีการเปิดใช้ไฟและลืมปิดไฟเป็นการปล่อยให้พลังงานสูญเสียไปโดยสูญเปล่า เพื่อที่เราสามารถประหยัดไฟฟ้าได้นั้นทางเราจึงเล็งเห็นการทำไฟอัจฉริยะขึ้นมาเพื่อประหยัดพลังงานไฟฟ้า ง่ายต่อการจัดการเวลา อีกทั้งยังสามารถช่วยให้เรามีชีวิตที่ดีขึ้นอีกด้วย



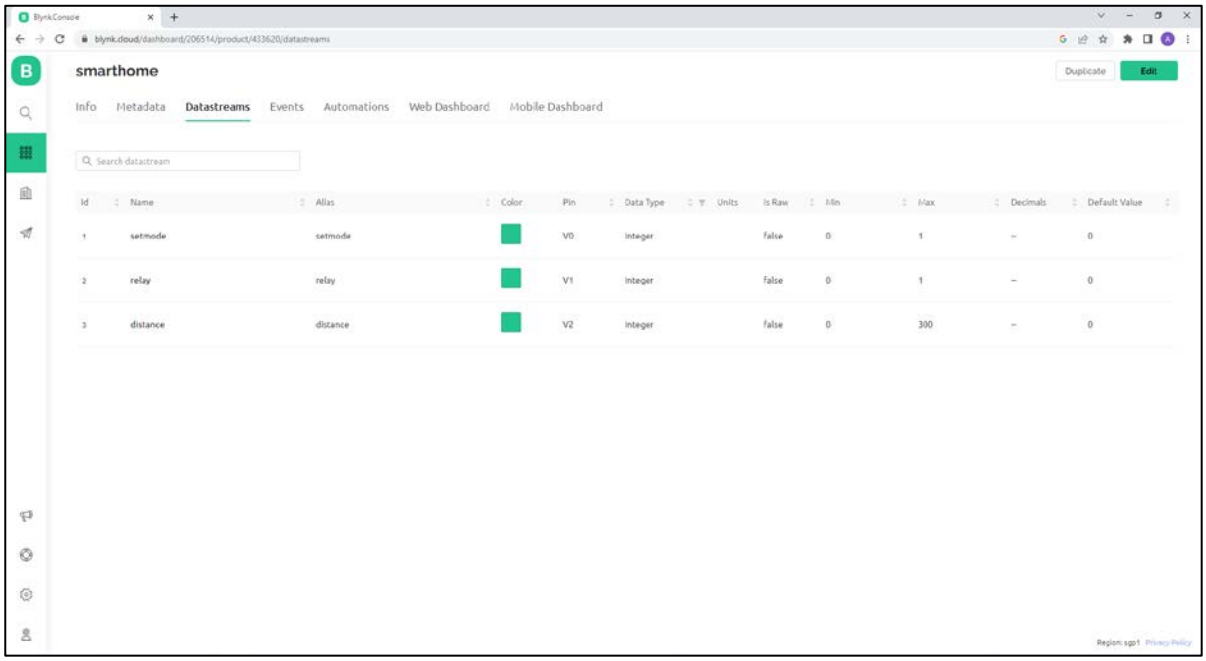
วัตถุประสงค์ของการวิจัย

1. เพื่อสร้างระบบควบคุมการเปิด-ปิดไฟด้วยอินเตอร์เน็ตของสรรพสิ่ง
2. เพื่อประเมินความพึงพอใจของผู้ใช้งานระบบควบคุมการเปิด-ปิดไฟด้วยอินเตอร์เน็ตของสรรพสิ่ง

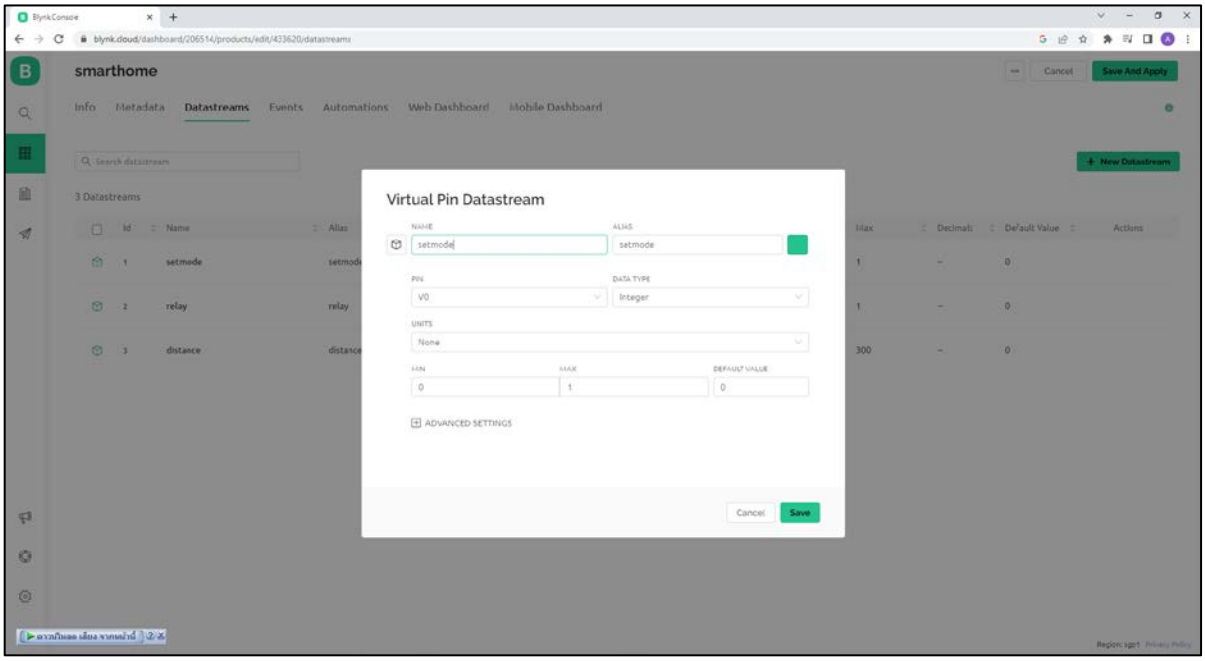


วิธีการดำเนินการวิจัย

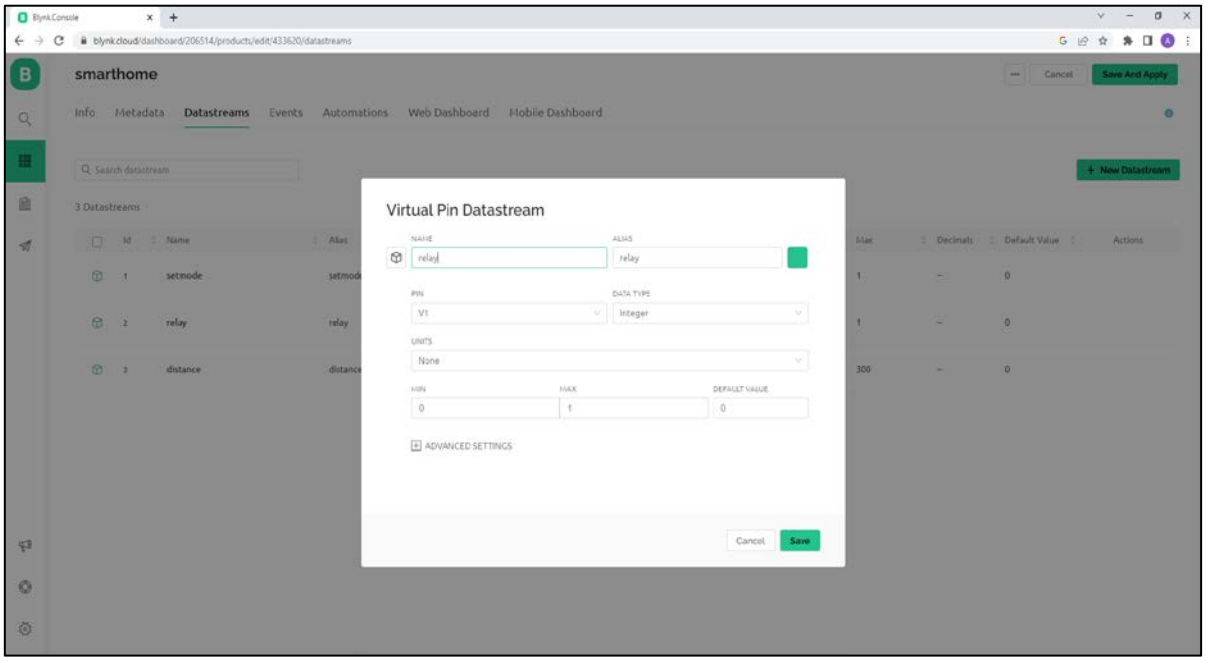
การใช้เทคนิควิธีการเหมืองข้อมูลสามารถวิเคราะห์ในการวางแผนการใช้พลังงานภายในบ้านในช่วงที่มีความต้องการและพยากรณ์การใช้พลังงานในบ้านเพื่อวางแผนการพัฒนาสำหรับระบบการจัดการพลังงานภายในบ้าน



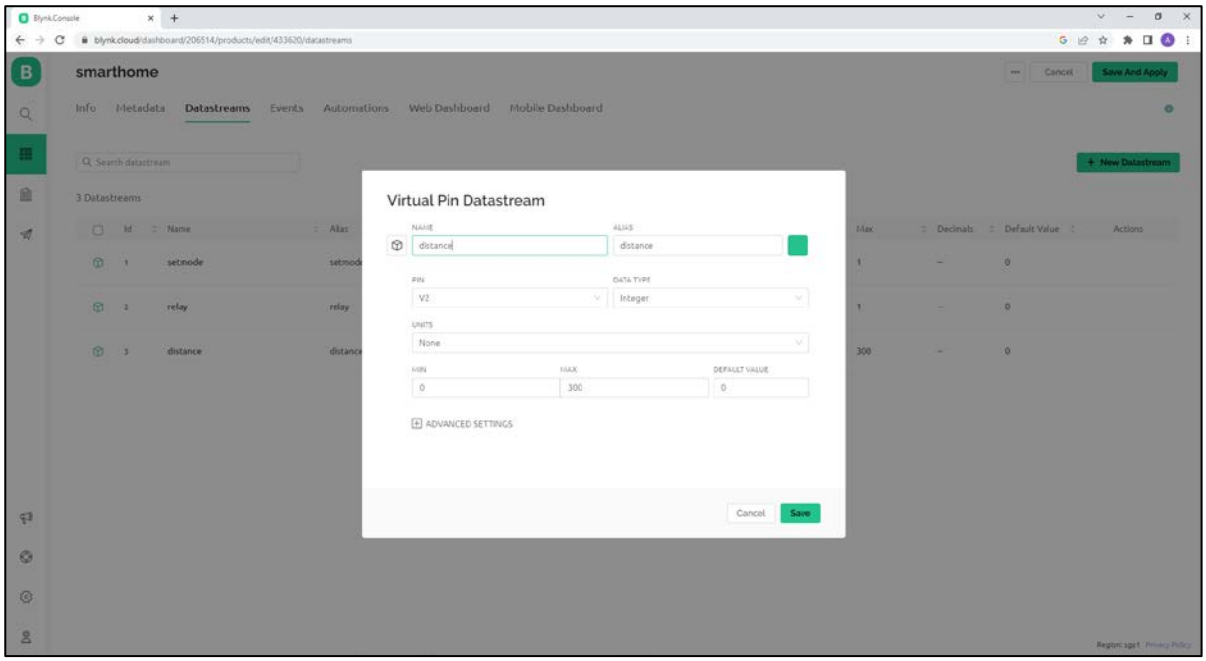
1. ทำการเพิ่ม Device ตั้งชื่อตามที่ต้องการ



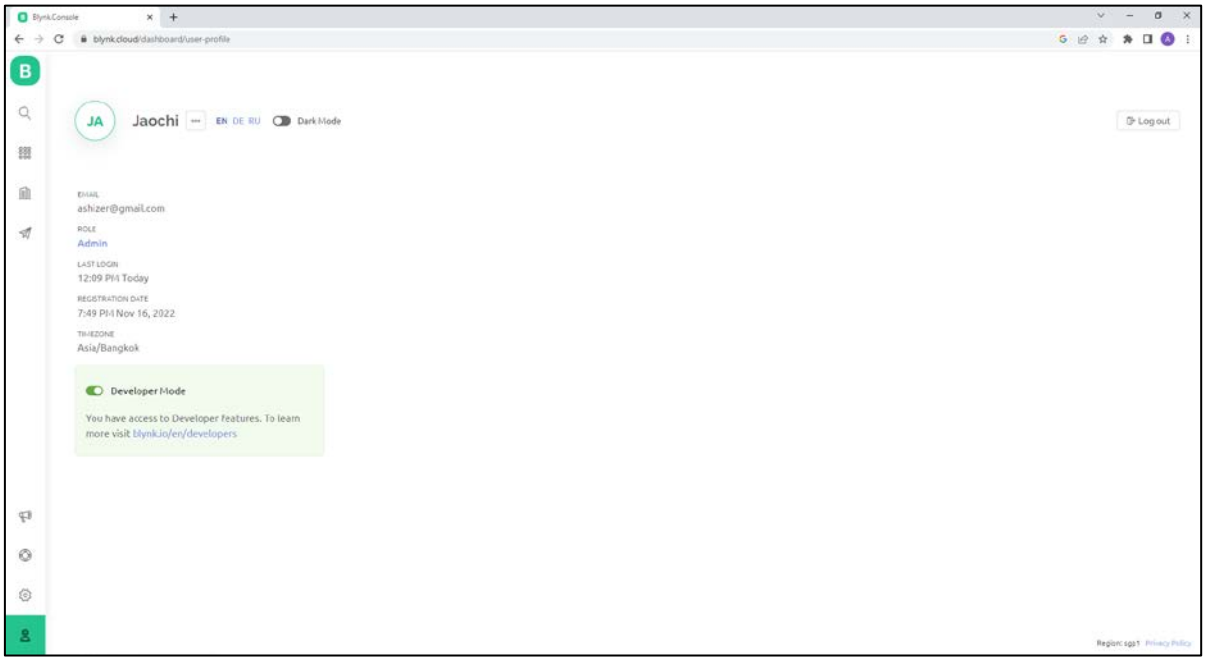
2. สามารถเช็ค ปุ่ม Control ได้ที่หน้าของ Dashboard



3. หลังจากตั้งค่า Datastreams และ Set ค่าต่างๆ จะแสดงหน้าดังรูป โดยสามารถเพิ่ม ลบ และแก้ไขได้ตามความต้องการ



4. เข้า Datastreams เพื่อสร้างปุ่มควบคุมตั้งค่า Virtual Pin Datastreams โดยกำหนด Name: setmode เป็น PIN = V0 และ Set ค่าตามที่เรากำหนด



5. ตั้งค่า Virtual Pin Datastreams โดยกำหนด Name: relay เป็น PIN = V1 และ Set ค่าตามที่เรากำหนด

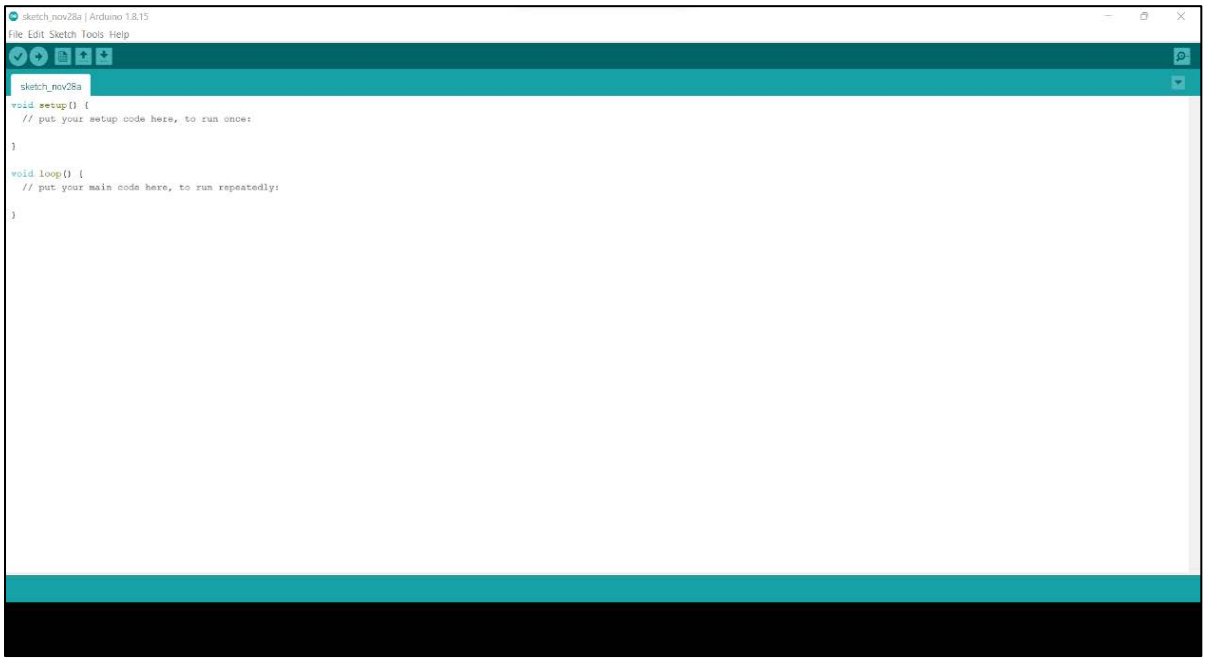
6. ตั้งค่า Virtual Pin Datastreams โดยกำหนด Name: distance เป็น PIN = V2 และ Set ค่าตามที่เรากำหนด

7. หน้าแสดงผลของการใช้งาน User

8. เข้าเว็บ Blynk ผ่าน Google และทำการสร้าง Account หลังจากนั้นสร้าง Templates

ขอบเขตการวิจัย

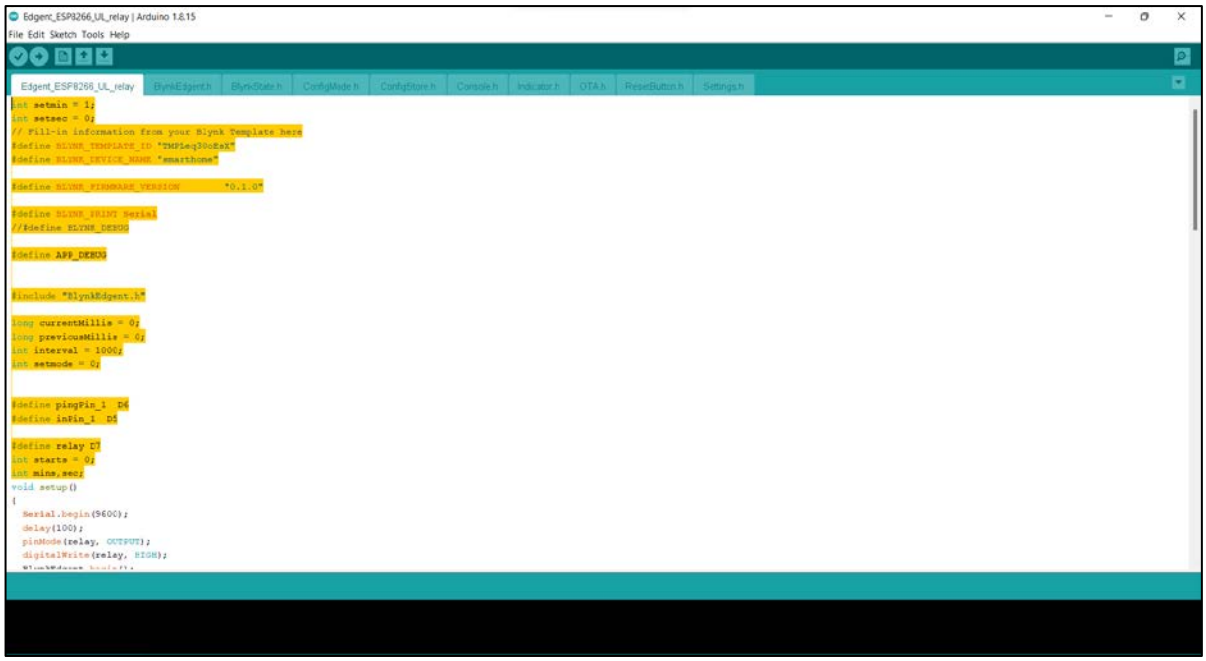
ส่วนของผู้ดูแลระบบ



1. สามารถเพิ่ม แก้ไข ลบ ข้อมูลของผู้ใช้ระบบทั้งหมดได้
2. สามารถกำหนดสิทธิ์การเข้าถึงการใช้งาน

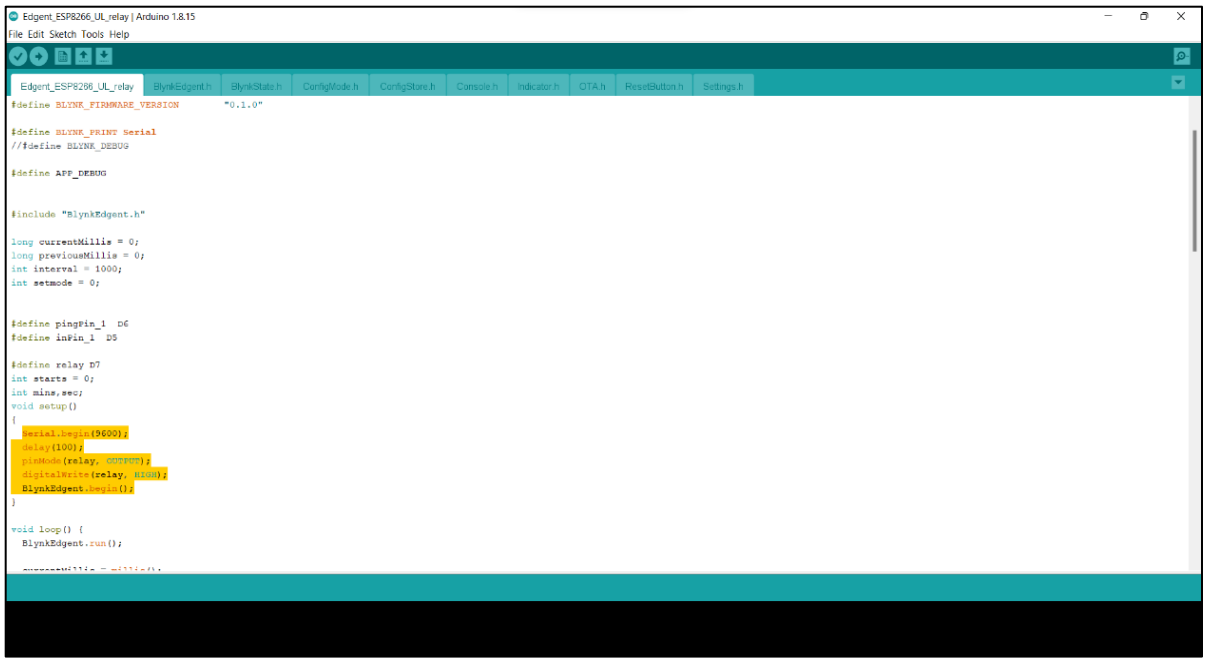
ส่วนของผู้ใช้งาน

1. สามารถควบคุมระบบไฟอัจฉริยะผ่าน Application จากโทรศัพท์มือถือได้
2. สามารถเช็คข้อมูลการใช้งานผ่านโทรศัพท์มือถือได้



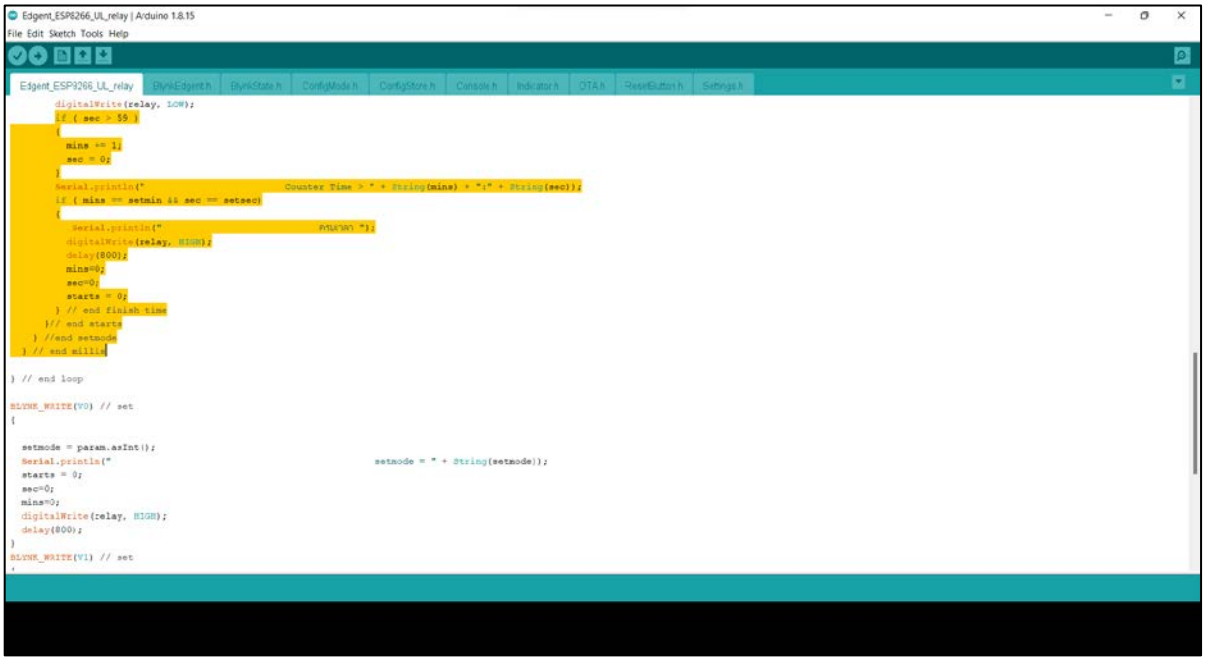
ขั้นตอนในการวิจัย

หน้าแรกโปรแกรม Arduino IDE



ส่วนที่ 1 เป็นการประกาศการสร้างตัวแปลสำคัญเช่น

1. การกำหนดตัวเลข
2. การเรียกใช้ library (เป็นโปรแกรมเสริมที่ใช้ในการสื่อสารระหว่างโปรแกรม Arduino กับ Blynk)
3. การตั้งชื่อขา node mcu ในการใช้ควบคุม

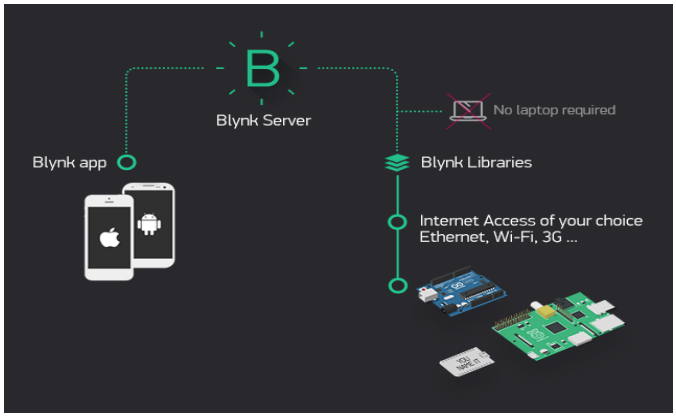


ส่วนที่ 2 void setup

เป็นส่วนคำสั่งที่ควบคุมความเร็วในการทำงานของ relay โดยกำหนดให้ relay ปิดก่อนในตอนที่เครื่องเริ่มต้นการทำงาน

ส่วนที่ 3 คำสั่ง void loop ประกอบด้วยคำสั่งให้ loop ทำงานแบบ real time ของ Server Blynk โดยกำหนด ระยะตรวจจับของเซ็นเซอร์ และระยะเวลาเมื่อเซ็นเซอร์เริ่มทำงาน

ส่วนที่ 4 เป็นส่วนพิเศษ ที่รับคำสั่งผ่าน Blynk สำหรับควบคุมแบบ manual



เครื่องมือที่ใช้ในการวิจัย

1. โปรแกรม Arduino IDE

Arduino IDE เป็นโปรแกรมที่ “แจกฟรี” ในการใช้งานลักษณะ Open source ซึ่ง Arduino IDE จะทำหน้าที่ ติดต่อระหว่างคอมพิวเตอร์ ไม่ว่าจะเป็นระบบWindows, Mac OS X หรือ Linux กับ บอร์ด Arduino ซึ่งโปรแกรมนี้ออกแบบให้ง่ายต่อการเขียนโค้ดและอัปโหลดโปรแกรมที่เราเขียนเข้าสู่บอร์ด Arduino Arduino IDE ส่วน IDE ย่อมาจก (Integrated Development Environment) คือ ส่วนเสริมของระบบการพัฒนา หรือตัวช่วยต่าง ๆ ที่จะคอยช่วยเหลือ Developer หรือช่วยเหลือคนที่พัฒนา Application เพื่อเสริมให้เกิดความรวดเร็ว ถูกต้อง แม่นยำ ตรวจสอบระบบที่จัดทำได้ ทำให้การพัฒนางานต่าง ๆ เร็วมากขึ้น ส่วนในการเขียนโปรแกรมและคอมไพล์ลงบอร์ด โดยขนาดของโปรแกรม Arduino โดยปกติแล้วจะใหญ่กว่าโค้ด AVR ปกติเนื่องจากโค้ด AVR เป็นการเข้าถึงจากรีจิสเตอร์โดยตรง แต่โค้ด Arduino เข้าถึงผ่านฟังก์ชั่น เพื่อให้สามารถเขียนโค้ดได้ง่ายมากกว่าการเขียนโค้ดแบบ AVR หรือเวอร์ชั่นอื่นๆ ของ Arduino

2. Application Blynk

Blynk คือ Application สำเร็จรูปสำหรับงาน IOT มีความน่าสนใจคือการเขียนโปรแกรมที่ง่าย ไม่ต้องเขียน App เองสามารถใช้งานได้อย่าง Real time สามารถเชื่อมต่อ Device ต่างๆเข้ากับ Internet ได้อย่างง่ายดาย ไม่ว่าจะเป็น Arduino, Esp8266, Esp32, Nodemcu,Rasberry pi นำมาแสดงบน Application ได้อย่างง่ายดาย แล้วที่สำคัญ Application Blynk ยังฟรีและ รองรับในระบบ IOS และ Android อีกด้วย

สรุปผลการวิจัย

สรุปจากการประเมินความพึงพอใจในการใช้งานระบบควบคุมการเปิด-ปิดไฟด้วยอินเตอร์เน็ตของสรรพสิ่งภายในที่พักอาศัยผ่านแบบสอบถามประเมินความพึงพอใจ ในการใช้ระบบควบคุมการเปิด-ปิดไฟด้วยอินเตอร์เน็ตของสรรพสิ่ง (IOT) พบว่ากลุ่มเป้าหมาย ในการจัดทำโครงงานครั้งนี้ได้แก่ สมาชิกในหมู่บ้าน The Plan ถนนพัฒนาชนบท3 ตำบลคลอง2ต้นนุ่น อำเภอลาดกระบัง จังหวัดกรุงเทพมหานคร 10520 จำนวน 20 คน เท่ากับ 3.83 หมายถึง มีความพึงพอใจอยู่ในระดับดี ส่วนเบี่ยงเบนมาตรฐาน เท่ากับ 0.13

อภิปรายผลการวิจัย

จากการพัฒนาระบบไฟอัจฉริยะ ได้ทำการนำตัวตรวจจับอินฟราเรด (Infrared Sensor) และ ตัวส่งสัญญาณ เครือข่ายไร้สาย มาช่วยในการควบคุมอุปกรณ์ไฟฟ้าภายในที่พักอาศัยตามที่ได้กำหนดไว้ พร้อมทั้งมีการควบคุมอุปกรณ์ไฟฟ้าผ่านแอปพลิเคชัน (Application) บนระบบปฏิบัติการแอนดรอยด์ (Android OS) และ IOS เพื่อแสดงผลการควบคุมของอุปกรณ์ไฟฟ้าที่ใช้งานไปบนระบบปฏิบัติการดังกล่าว ซึ่งการสื่อสารระหว่างอุปกรณ์ไฟฟ้ากับระบบปฏิบัติการดังกล่าว จะทำการสื่อสารผ่านทางตัวส่งสัญญาณเครือข่ายไร้สาย จึงพบว่าอุปกรณ์ไฟฟ้าสามารถเปิด-ปิด การทำงานได้เองตามที่ได้กำหนดไว้ตามแนวความคิด IOT (Internet of Things) ทำให้ช่วยประหยัดพลังงานไฟฟ้าอย่างมาก และยังเป็นการช่วยลดการใช้ทรัพยากรและประหยัดพลังงานไฟฟ้าอีกด้วย เป็นประโยชน์ในการนำไปประยุกต์ใช้ในครัวเรือนและตึกหรืออาคารในองค์กรต่างๆต่อไป จากการพัฒนาระบบนี้แบ่งออกเป็น 3 ส่วนหลัก ๆ ดังนี้

1. ส่วนของภาคตรวจจับ จากผลการทดสอบความแม่นยำของตัวตรวจจับอินฟราเรด (Infrared) พบว่ามีความถูกต้องแม่นยำในการตรวจจับได้ถึงร้อยละ 100 เนื่องจากไม่พบการทำงานที่ผิดพลาดเลย โดยตัวตรวจจับอินฟราเรด (Infrared) ทั้ง 5W จุดนั้นสามารถทำงานได้ตรงตามทฤษฎีที่ได้ศึกษามา

2. ส่วนของการควบคุมอุปกรณ์ไฟฟ้าผ่านแอปพลิเคชัน (Application) บนระบบปฏิบัติการดังกล่าว จากผลการทดสอบความแม่นยำของการควบคุมผ่านเครือข่ายไร้สาย (WIFI) พบว่ามีความถูกต้อง แม่นยำในการตรวจจับได้ต่ำสุดร้อยละ 5 เนื่องจากในช่วงเริ่มทดสอบจะยังหาสัญญาณเครือข่ายไร้สาย (WIFI) ไม่เจอแต่เมื่อมีการเชื่อมต่อแล้วก็สามารถควบคุมได้ทุกจุดที่ตั้งไว้ ตรงตามทฤษฎีที่ได้ศึกษามา

3. ส่วนของการประหยัดพลังงาน จากผลการทดลองพบว่าเมื่อเปรียบเทียบการนำระบบไฟอัจฉริยะมาใช้นั้น จะพบว่ามีผลการใช้พลังงานไฟฟ้าที่ลดลงทำให้สามารถประหยัดค่าใช้จ่ายได้มากขึ้น ซึ่งสามารถช่วยลดโลกร้อนได้อีกด้วย ซึ่งสอดคล้องกับทฤษฎีที่นำมาใช้ในระบบไฟอัจฉริยะนี้

ข้อเสนอแนะ

การพัฒนาเครื่องควบคุมเครื่องใช้ไฟฟ้าควบคุมด้วยระบบปฏิบัติการ AndroidและIOS เพื่อให้ได้โครงงานนี้ทางผู้จัดทำโครงงานได้ทำการสร้างไฟอัจฉริยะที่มีประสิทธิภาพ และสามารถนำไปเผยแพร่และต่อยอดโครงการได้ดียิ่งขึ้นไป

บทคัดย่อ

งานวิจัยนี้จัดทำขึ้นโดยมีวัตถุประสงค์เพื่อ 1) เพื่อพัฒนาและออกแบบสร้างถังขยะอัจฉริยะด้วยเทคโนโลยีอินเทอร์เน็ตของสรรพสิ่ง 2) เพื่อประเมินความพึงพอใจของผู้ใช้งานถังขยะอัจฉริยะด้วยเทคโนโลยีอินเทอร์เน็ตของสรรพสิ่ง มีรูปแบบการใช้งานคือ ระบบบลิ้งแอปพลิเคชัน (Blynk Application) ซึ่งเป็นโมบายแอปพลิชัน (Mobile Application) ที่แสดงข้อมูลแบบเรียลไทม์ ในส่วนของเทคโนโลยีด้านฮาร์ดแวร์ที่ใช้ในการจัดทำ ได้แก่ อาดูโน่ นาโน (Arduino nano) กับเซ็นเซอร์ (Sensor) จะส่งข้อมูลไปยังระบบ

ทางคณะผู้จัดทำจึงได้ทำถังขยะอัจฉริยะด้วยเทคโนโลยีอินเทอร์เน็ตของสรรพสิ่งที่สามารถเปิด-ปิด อัตโนมัติเพื่อช่วยลดการสัมผัสเชื้อโรคบริเวณฝาถังขยะ ทำให้การจัดเก็บขยะมีประสิทธิภาพเพิ่มมากขึ้น โดยประเมินความพึงพอใจของผู้ใช้งานจากแบบสอบถามพบว่ามีความพึงพอใจในการใช้งานถังขยะอัจฉริยะเฉลี่ยอยู่ในระดับมากคิดเป็นร้อยละ (3.95)

คำสำคัญ: ถังขยะอัจฉริยะ อินเตอร์เน็ตของสรรพสิ่ง อาดูโน่

Abstract

This research was conducted with the aim of 1) to develop and design intelligent trash cans with Internet technology. 2) To evaluate the satisfaction of users of smart trash cans with the Internet technology of all things. The usage model is Blynk Application, a mobile application that displays real-time information. The hardware technologies used in the preparation include Arduino nano and sensors that send data to the system.

Therefore, the team has created a smart trash can with the Internet technology of things that can be turned on and off automatically to help reduce waste. the exposure of germs to the garbage can to make garbage collection more efficient by evaluating user satisfaction. From the survey, it was found that the average satisfaction of using smart trash cans was high (3.95 percent).

Keywords: Smart Trash, Internet of Things, Arduino

บทนำ

ในปัจจุบันบนโลกของเรามีจำนวนประชากรเพิ่มขึ้นส่งผลให้แต่ละพื้นที่มีการทิ้งขยะเพิ่มขึ้นอย่างต่อเนื่อง ข้อมูลจากกรมควบคุมมลพิษ พบว่าปัจจุบันประเทศไทยมี ขยะพลาสติก 2 ล้านตันต่อปี ล่าสุดตัวเลขเดือนเมษายน 2564 ขยะพลาสติกเพิ่มขึ้น 45% หรือเฉลี่ย 139 กรัม/คน/วัน ส่งผลให้เกิดปัญหาปริมาณขยะที่สะสมเพิ่มมากขึ้น ถังขยะบางถังอาจล้นถังทำให้เกิดปัญหากลิ่นเหม็นรบกวน เกิดปัญหาทางมลพิษ ได้แก่ การเกิดปัญหาก๊าซมีเทนที่เป็นต้นเหตุทำให้เกิดโลกร้อน รวมไปถึงปัญหา

การเกิดก๊าซไดอ๊อกซิน ซึ่งเป็นสารก่อมะเร็ง เป็นต้น (กรมควบคุมมลพิษ. คู่มือแนวทางการลดและข้อกำหนด เบื้องต้นการลดและใช้ประโยชน์ขยะมูลฝอย. กรุงเทพฯ: กระทรวงทรัพยากรธรรมชาติและสิ่งแวดล้อม; 2565.)

ปัจจุบันได้มีการนำอินเทอร์เน็ตของสรรพสิ่ง (Internet of Things : IOT) หรืออุปกรณ์ไอโอทีมา ประยุกต์ใช้งานหลากหลายด้าน ทั้งการควบคุม อุปกรณ์ไฟฟ้า การตรวจวัดค่าต่างๆ
จากสิ่งแวดล้อมและอื่น ๆ อีกมากมาย อุปกรณ์ไอโอทีนี้มีอยู่มากมายหลายประเภท เพื่อใช้เป็นอุปกรณ์ที่ให้ความสะดวก มีความทันสมัย เพื่อเป็นแรงจูงใจให้ผู้คนหันมาดูแล สิ่งแวดล้อมและรักษาความสะอาดมากยิ่งขึ้น

ผู้วิจัยจึงได้เล็งเห็นความสำคัญเรื่องของปัญหาดังกล่าวจึงเป็นที่มาในการพัฒนาระบบถังขยะอัจฉริยะในการแก้ไขปัญหาการทิ้งขยะและเพิ่มประสิทธิภาพควบคุมถังขยะอัจฉริยะแจ้งเตือนผ่านแอปพลิเคชันไลน์ ที่สามารถเปิด-ปิดได้อัตโนมัติ เพื่อช่วยลดการสัมผัสเชื้อโรคบริเวณฝาถังขยะและสะดวกรวดเร็วไม่เสียเวลาในการทำงาน ทำให้การจัดเก็บขยะมีประสิทธิภาพเพิ่มมากขึ้น

วัตถุประสงค์ของการวิจัย

1) เพื่อพัฒนาและออกแบบสร้างถังขยะอัจฉริยะด้วยเทคโนโลยีอินเทอร์เน็ตของสรรพสิ่ง
2) เพื่อประเมินความพึงพอใจของผู้ใช้งานถังขยะอัจฉริยะด้วยเทคโนโลยีอินเทอร์เน็ตของสรรพสิ่ง

วิธีการดำเนินการวิจัย

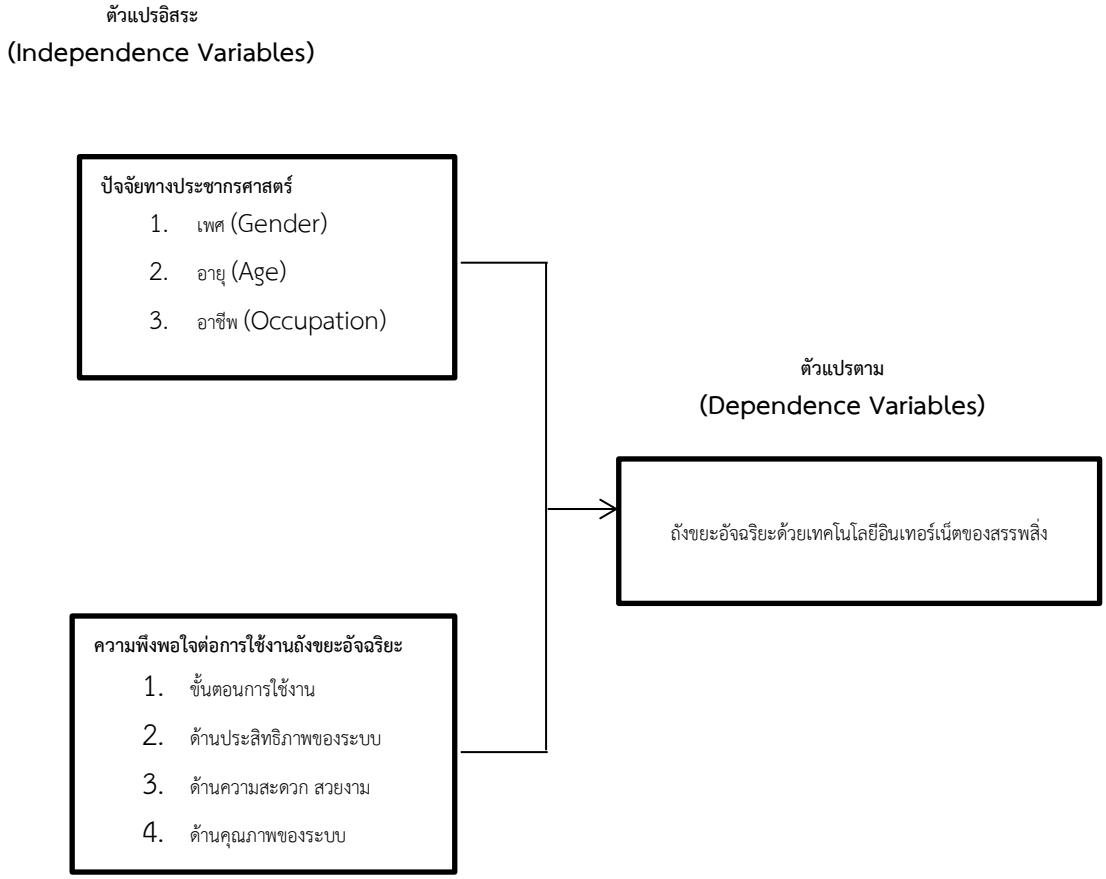
การวิจัยเรื่องถังขยะอัจฉริยะด้วยเทคโนโลยีอินเทอร์เน็ตของสรรพสิ่งต่อความพึงพอใจของผู้ใช้งานถังขยะอัจฉริยะ จะใช้วิธีการวิจัยแบบเชิงปริมาณ (Quantitative Research) โดยมีรูปแบบเป็นการวิจัยเชิงสำรวจ (Survey Research) ด้วยการทดสอบให้ใช้งานถังขยะอัจฉริยะและใช้แบบสอบถาม (Questionnaire) เป็นเครื่องมือในการเก็บรวบรวมข้อมูลกลุ่มตัวอย่างผ่านการแจกแบบสอบถาม โดยผู้วิจัยได้ให้กลุ่มตัวอย่างเป็นผู้ตอบแบบสอบถามด้วยตนเอง (Self-Administered Questionnaire) ผู้วิจัยได้ดำเนินการศึกษาค้นคว้าตามขั้นตอน ดังต่อไปนี้

1. ลักษณะประชากร การกำหนดขนาดของกลุ่มตัวอย่าง และการเลือกกลุ่มตัวอย่าง
2. ตัวแปรที่ใช้ในการวิจัย
3. เครื่องมือที่ใช้ในการวิจัย
4. การวิเคราะห์ข้อมูล

ลักษณะประชากร การกำหนดขนาดของกลุ่มตัวอย่าง และการเลือกกลุ่มตัวอย่าง

1. กลุ่มประชากรเป้าหมาย

ประชากร (Population) ที่อยู่ในกลุ่มเป้าหมายในการวิจัยครั้งนี้ ได้แก่ประชากร ด้าน เพศ อายุ อาชีพ เป็นนักศึกษาสาขาธุรกิจดิจิทัล 48 คน อาจารย์ 1 คน ผู้ดูแล 1 คน โดยเป็นผู้ใช้งานถังขยะอัจฉริยะด้วยเทคโนโลยีอินเทอร์เน็ตของสรรพสิ่ง



2. การกำหนดขนาดของกลุ่มตัวอย่าง

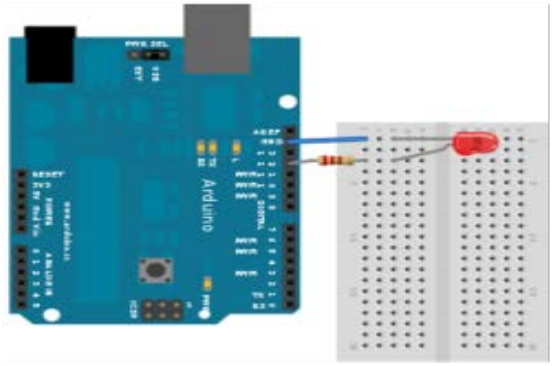
การกำหนดกลุ่มตัวอย่าง จะคำนวณจากผู้ใช้บริการถังขยะอัจฉริยะด้วยเทคโนโลยีอินเทอร์เน็ตของสรรพสิ่ง โดยใช้การวิเคราะห์จากแบบสอบถาม

ตัวแปรที่ใช้ในการวิจัย

ตัวแปรที่ใช้ในงานวิจัยนี้ ประกอบด้วยตัวแปรอิสระ และตัวแปรตามดังนี้

1. ตัวแปรอิสระ (Independent Variable)
2. ปัจจัยลักษณะทางประชากรศาสตร์
   2.1 ด้านเพศ (Gender)
   2.2 ด้านอายุ (Age)
   2.3 อาชีพ (Occupation)

ขอบเขตการวิจัย



1. ออกแบบและสร้างถังขยะอัจฉริยะด้วยเทคโนโลยีอินเทอร์เน็ตของสรรพสิ่ง
2. สามารถแสดงผลการแจ้งเตือนปริมาณของขยะไปยังสมาร์ทโฟนโดยผ่านแอปพลิเคชันไลน์ (Line Notify) ได้
3. ศึกษาการตอบสนองของระบบเซ็นเซอร์กับการเปิด-ปิดอัตโนมัติของถังขยะ

อุปกรณ์ในการดำเนินการวิจัย

1. Arduino อ่านว่า (อาดูโน่)

ความหมายของ Arduino (อาดูอิโน่) คือ เป็นบอร์ดไมโครคอนโทรเลอร์ตระกูล AVR ที่มีการพัฒนาแบบ Open Source คือมีการเปิดเผยข้อมูลทั้งด้าน Hardware และ Software ตัวบอร์ด Arduino ถูกออกแบบมาให้ใช้งานได้ง่าย ดังนั้นจึงเหมาะสำหรับผู้เริ่มต้นศึกษา ทั้งนี้ผู้ใช้งานยังสามารถดัดแปลง เพิ่มเติม พัฒนาต่อยอดทั้งตัวบอร์ด

หรือโปรแกรมต่อได้ ความง่ายของบอร์ด Arduino ในการต่ออุปกรณ์เสริมต่าง ๆ คือผู้ใช้งานสามารถต่อวงจรอิเล็กทรอนิกส์จากภายนอกแล้วเชื่อมต่อเข้ามาที่ขา I/O ของบอร์ด หรือเพื่อความสะดวกสามารถเลือกต่อกับบอร์ดเสริม (Arduino Shield) ประเภทต่าง ๆ เช่น Arduino XBee Shield, Arduino Music Shield, Arduino Relay Shield, Arduino Wireless Shield, Arduino GPRS Shield เป็นต้น มาเสียบกับบอร์ดบนบอร์ด Arduino แล้วเขียนโปรแกรมพัฒนาต่อ

รูปที่ 1 บอร์ด Arduino ต่อกับ LED

รูปที่ 2 บอร์ด Arduino ต่อกับบอร์ด XBEE Shield

2. โปรแกรม Arduino Software (IDE)

Arduino Integrated Development Environment (IDE) หรือที่เรียกว่าArduino Environment Environment เป็นโปรแกรมที่ออกแบบมาเพื่อให้ง่ายต่อการเขียนซอฟต์แวร์สำหรับแพลตฟอร์มโอเพ่นซอร์สนี้ แพลตฟอร์ม Arduino เป็นแพลตฟอร์มอิเล็กทรอนิกส์ยอดนิยมที่ออกแบบมาเพื่อลดความซับซ้อนของกระบวนการออกแบบอุปกรณ์อิเล็กทรอนิกส์ การใช้งานทั่วไป ได้แก่ หุ่นยนต์เทคโนโลยีการปรับปรุงบ้านคอมพิวเตอร์ที่สวมใส่ได้และแอปพลิเคชันอิเล็กทรอนิกส์ที่แปลกใหม่ สิ่งประดิษฐ์ Arduino และยังสามารถอัปโหลดโปรแกรมที่พัฒนาสำเร็จแล้วลงบนตัวบอร์ดได้ง่ายในเพียงแค่ไม่กี่ขั้นตอน สำหรับโปรแกรม Arduino IDE จะใช้ภาษา C/C++ ในการพัฒนาโปรแกรม

คุณสมบัติทั่วไปของ IDE รวมถึงการกำหนดหมายเลขบรรทัดอัตโนมัติการเน้นไวยากรณ์และการรวบรวมแบบรวม แม้ว่าจะเป็นไปได้ในทางเทคนิคที่จะเขียนซอฟต์แวร์โดยใช้โปรแกรมแก้ไขข้อความอย่างง่าย แต่กระบวนการนั้นง่ายกว่ามากเมื่อเขียนโค้ดใน IDE ภาษาการเขียนโปรแกรมจำนวนมากมี IDEs ของตนเองและมีการพัฒนา IDE สำหรับวัตถุประสงค์ทั่วไปหลายอย่าง IDE วัตถุประสงค์ทั่วไปเหล่านี้สามารถใช้กับภาษาการเขียนโปรแกรมที่รองรับได้หลากหลาย Arduino IDE มีสภาพแวดล้อมที่อนุญาตให้โปรแกรมเมอร์ใช้โปรแกรมเดี่ยวตั้งแต่ต้นจนจบ มันสามารถติดตามไฟล์หลาย ๆ ไฟล์ในโครงการซึ่งช่วยให้โปรแกรมเมอร์เขียนโปรแกรมที่ซับซ้อนมากขึ้นหรือโมดูลาร์เพื่อจัดการโครงการของพวกเขา IDE ยังรวบรวมรหัสตัวเองทำการดีบักพื้นฐานและส่งรหัสโดยตรงไปยังบอร์ด Arduino ซึ่งจะใช้ bootloader Arduino เพื่อเขียนโปรแกรมใหม่ลงในหน่วยความจำ แม้จะมีคุณสมบัติเพิ่มเติมเหล่านี้ แต่ขาดคุณสมบัติทั่วไปหลายประการรวมถึงการกำหนดหมายเลขบรรทัดที่มองเห็นโดยอัตโนมัติซึ่งจะช่วยให้โปรแกรมเมอร์สามารถอ้างถึงส่วนที่เฉพาะเจาะจงของซอร์สโค้ดได้ง่ายเมื่อประเมินข้อความแสดงข้อผิดพลาดหรือการสื่อสารกับโปรแกรมเมอร์อื่น ๆ ได้แก่ ข้อความแสดงข้อผิดพลาดโดยละเอียดซึ่งมีประโยชน์สำหรับการวินิจฉัยและแก้ไขข้อผิดพลาดในการเขียนโค้ดและการพับโค้ดซึ่งทำให้โปรแกรมเมอร์สามารถตรวจสอบเฉพาะบางส่วนของซอร์สโค้ดที่เกี่ยวข้องโดยการซ่อน pars ซึ่งไม่ได้รับผลกระทบ เพื่อจัดการกับข้อ จำกัด เหล่านี้โปรแกรมเมอร์ Arduino บางคนใช้ IDE อื่น ๆ เพื่อเขียนโปรแกรม ผู้ใช้เหล่านี้มีปลั๊กอินซอฟต์แวร์ที่เขียนขึ้นสำหรับ IDE วัตถุประสงค์ทั่วไปที่เพิ่มการสนับสนุนสำหรับการเขียนโปรแกรมเฉพาะArduino เป็นการเพิ่มคุณสมบัติมากมายที่โปรแกรมเมอร์พลาดใน Arduino IDE

รูปที่ 3 โปรแกรม Arduino ID

3. IR Sensor

ความหมายของ IR Sensor (เซ็นเซอร์อินฟราเรด) เป็นอุปกรณ์อิเล็กทรอนิกส์ที่ปล่อยออกมาเพื่อรับรู้บางแง่มุมของสภาพแวดล้อม เซ็นเซอร์ IR สามารถวัดความร้อนของวัตถุและตรวจจับการเคลื่อนไหวได้ เซ็นเซอร์ประเภทนี้จะวัดเฉพาะรังสีอินฟราเรดแทนที่จะปล่อยออกมาที่เรียกว่าก เซ็นเซอร์อินฟราเรดแบบพาสซีฟ โดยปกติในสเปกตรัมอินฟราเรดวัตถุทั้งหมดจะแผ่รังสีความร้อนบางรูปแบบออกมา การแผ่รังสีประเภทนี้มองไม่เห็นด้วยตาของเราซึ่งสามารถตรวจจับได้ด้วยเซ็นเซอร์อินฟราเรด ตัวปล่อยเป็นเพียง LED IR (ไดโอดเปล่งแสง) และเครื่องตรวจจับเป็นเพียงโฟโตไดโอด IR ที่ไวต่อแสง IR ที่มีความยาวคลื่นเดียวกับที่ปล่อยออกมาจาก IR LED เมื่อแสง IR ตกบนโฟโตไดโอดความต้านทานและแรงดันไฟฟ้าขาออกจะเปลี่ยนไปตามขนาดของแสง IR ที่ได้รับ

หลักการทำงาน IR Sensor (เซ็นเซอร์อินฟราเรด) หลักการทำงานของเซ็นเซอร์อินฟราเรดคล้ายกับเซ็นเซอร์ตรวจจับวัตถุ เซ็นเซอร์นี้ประกอบด้วย IR LED และโฟโตไดโอด IR ดังนั้นการรวมทั้งสองอย่างนี้สามารถสร้างเป็นตัวเชื่อมต่อภาพถ่ายหรือออปโตคัปเปลอร์ได้ กฎทางฟิสิกส์ที่ใช้ในเซ็นเซอร์นี้ ได้แก่ การแผ่รังสีของแผ่นไม้ Stephan Boltzmann และการกระจัดของ weins IR LED เป็นเครื่องส่งสัญญาณชนิดหนึ่งที่ปล่อยรังสี IR LED นี้มีลักษณะคล้ายกับ LED มาตรฐานและรังสีที่เกิดจากสิ่งนี้จะมองไม่เห็นด้วยตามนุษย์ เครื่องรับอินฟราเรดส่วนใหญ่ตรวจจับรังสีโดยใช้เครื่องส่งสัญญาณอินฟราเรด ตัวรับอินฟราเรดเหล่านี้มีอยู่ในรูปแบบโฟโตไดโอด โฟโตไดโอด IR มีความแตกต่างกันเมื่อเทียบกับโฟโตไดโอดปกติเนื่องจากตรวจจับเพียงรังสี IR ตัวรับสัญญาณอินฟราเรดชนิดต่างๆส่วนใหญ่จะขึ้นอยู่กับแรงดันไฟฟ้าความยาวคลื่นแพ็คเกจ ฯลฯ

เมื่อใช้เป็นการรวมกันของเครื่องส่งและตัวรับสัญญาณ IR แล้วความยาวคลื่นของเครื่องรับจะต้องเท่ากับเครื่องส่งสัญญาณ ที่นี่เครื่องส่งคือ IR LED ในขณะที่เครื่องรับคือโฟโตไดโอด IR โฟโตไดโอดอินฟราเรดตอบสนองต่อแสงอินฟราเรดที่สร้างขึ้นผ่าน LED อินฟราเรด ความต้านทานของโฟโต้ไดโอดและการเปลี่ยนแปลงของแรงดันเอาต์พุตเป็นไปตามสัดส่วนของแสงอินฟราเรดที่ได้รับ หลักการทำงานพื้นฐานของเซ็นเซอร์ IR เมื่อเครื่องส่งสัญญาณอินฟราเรดสร้างการแผ่รังสีแล้วเครื่องจะมาถึงวัตถุและการปล่อยรังสีบางส่วนจะสะท้อนกลับไปยังเครื่องรับอินฟราเรด ตัวรับสัญญาณ IR สามารถตัดสินใจได้โดยขึ้นอยู่กับความเข้มของการตอบสนอง

เซ็นเซอร์อินฟราเรดแบบพาสซีฟ เซ็นเซอร์อินฟราเรดแบบพาสซีฟมีเฉพาะเครื่องตรวจจับ แต่ไม่รวมเครื่องส่งสัญญาณ เซ็นเซอร์เหล่านี้ใช้วัตถุเช่นเครื่องส่งสัญญาณหรือแหล่งสัญญาณ IR วัตถุนี้ปล่อยพลังงานและตรวจจับผ่านตัวรับอินฟราเรด หลังจากนั้นตัวประมวลผลสัญญาณจะถูกใช้เพื่อทำความเข้าใจสัญญาณเพื่อรับข้อมูลที่ต้องการตัวอย่างที่ดีที่สุดของเซ็นเซอร์นี้ ได้แก่ ตัวตรวจจับไพโรอิเล็กทริกโบโลมิเตอร์เทอร์โมคัปเปิลเทอร์โมไพล์เป็นต้นเซ็นเซอร์เหล่านี้แบ่งออกเป็นสองประเภท เช่นเซ็นเซอร์ IR ความร้อนและเซ็นเซอร์ IR ควอนตัม เซ็นเซอร์ IR ความร้อนไม่ขึ้นอยู่กับความยาวคลื่น แหล่งพลังงานที่เซ็นเซอร์เหล่านี้ใช้จะถูกทำให้ร้อน เครื่องตรวจจับความร้อนทำงานช้าตามการตอบสนองและเวลาในการตรวจจับ เซ็นเซอร์ควอนตัม IR ขึ้นอยู่กับความยาวคลื่นและเซ็นเซอร์เหล่านี้รวมถึงการตอบสนองและเวลาในการตรวจจับที่สูง เซ็นเซอร์เหล่านี้ต้องการการระบายความร้อนอย่างสม่ำเสมอสำหรับการวัดเฉพาะ
